BUILDING EVACUATION PLANS
BRIGHTON HALL & ONECARD CENTER

May 2009

BUILDING COORDINATOR: Jill M. Trainer, Dean
College of Natural Sciences and Mathematics

PRIMARY BUILDING CONTACT: Laurel Heffernan, Associate Dean
College of Natural Sciences and Mathematics

Introduction:

These plans are designed to cover building evacuation during regular University office hours (generally M-F, 8-5:00). Outside of those hours the key personnel identified in the plans will generally not be available to perform their functions. In this case it will be necessary for Public Safety to determine if there are any occupants in the building, and to assure that those occupants are evacuated. The plans are based on the following additional premises:

(1) The Emergency Operations Group has determined the need to evacuate people from the building(s) in question.

(2) Public Safety has informed the office of the Dean of Natural Sciences and Mathematics that the building(s) in question must be evacuated. Such notification may be by phone (8-4655) or by messenger.

Specific Building Plans:

(3) Brighton. When an emergency notice is received, those staff who are present in the office of the Dean of Natural Sciences and Mathematics will be responsible for notifying the offices of the Department of Mathematics (BRH 141; 8-6534) either by phone or by messenger. Staff in the Mathematics office will walk the first and second floor to see that all offices, classrooms, and laboratories are evacuated. All occupants of the building will exit using one of the two building stairways (east, west). After exiting the building everyone will proceed to the emergency assembly point (EAP1), the open grass space north of Humboldt Hall and south of Placer Hall.

(4) Brighton Hall Annex (OneCard Center). When an emergency notice is received, those staff who are present in the office of the Dean of Natural Sciences and Mathematics will be responsible for notifying the OneCard Center (BRH Annex; 8-7878) either by phone or by messenger. Key personnel in the OneCard Center will ensure that offices and the OneCard Center are evacuated. After exiting the building everyone will proceed to the emergency assembly point (EAP1; see attached map), the open grass space north of Humboldt Hall and south of Placer Hall.
