**JUSTIFICATION:**

One of the two prerequisites for this course is CM 40 Materials Testing. The instructor for this course feels that CM 40 can be taken either as a prerequisite or as a co-requisite as CM 40 and CM 130 are offered only during the fall semesters. The material content in CM 40 that is necessary as a prerequisite for CM 130 is taught in CM 40 during the first 6 weeks of the semester. This prerequisite material from CM 40 is not required in CM 130 until the 8<sup>th</sup> week of the semester for the "Introduction to steel properties and stress/strain diagrams." The course change scope is to allow students to take CM 40 as a corequisite with CM 130.
