

CALIFORNIA STATE UNIVERSITY, SACRAMENTO

FACULTY SENATE

April 22, 2004

To: The Faculty Senate
Via: The Senate Executive Committee

From: William A. Dillon, Presiding Member
University ARTP Committee

Subj: Amendment of Section 5.05F of the University ARTP Policy

The University ARTP Committee recommends amendment of the subject section and renumbering the subsequent items:

4. Evidence of scholarship or creative activity in the development or application of technology or both.

This proposal amounts to a revision of FS 03-08 adopted by the Senate last year and subsequently returned to it by the President without approval.

The Proposal has been amended to cure the defect found in the original by deleting from it the phrase "... in ways that contribute to the advancement of teaching, research or performance." This deleted language created a reservation in the President's mind that a casual reader might be misled to his or her real hurt into regarding as scholarship or creative activity adaptations of existing technology to teaching that could in fairness be regarded as improvements in teaching but not scholarship. After considerable discussion, the Committee has concurred in the President's reservation and has concluded that deleting the phrase will remove potentially misleading language without altering at all the force and effect of the proposal.

The Committee requests that its Chair be invited to participate in the Executive Committee's discussion of this recommendation.
