

Altiris Vision

Using Vision for Training

WHAT

Altiris Vision is an easy-to use software package designed to help you manage participant computer activity in this lab. Vision can be used to lockdown computers and/or keyboards, demo the instructor's desktop on participant's monitors, share files between instructor and participant's workstations, or even highlight different elements on the screen using Vision's pointer tools.

WHY

Use Vision to enhance your training. Appeal to different learning styles with the help of Vision tools.

WHEN

- Provide sample files to participants during a workshop to encourage hands-on learning
- Demonstrate how to use an application for something specific by projecting your desktop onto participant's computers. Lockdown participant workstations for a full-focus presentation.
- Use Vision's pointer tools to enhance your presentation; highlight key areas of an application or use Vision's prominent pointer instead of the default mouse cursor to click on buttons and menu items when demonstrating an application.

HOW

On the password screen for the **Vision Control Center** enter: *irtVision*. To get started using Vision to enhance your training, follow these steps:

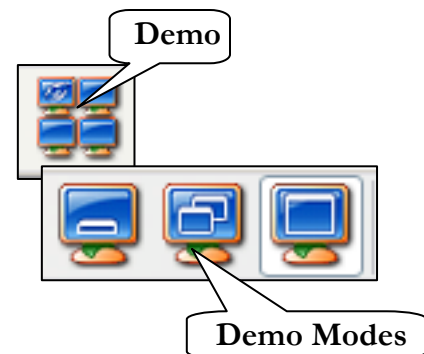

Lock and Unlock Participant Computers

- step 1.* Click the **Blank Screen** button from the **Vision** toolbar (top of Windows desktop; hidden when not in use)
- step 2.* To unlock participant computers, click the **Stop** button

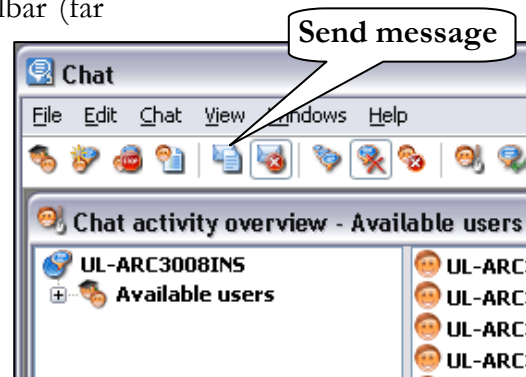

Share Your Screen

- step 1.* Click the **Demo** button from the **Vision** toolbar
- step 2.* Click **Full-screen Demo**, **Windowed Demo**, or **Minimized Demo** to select the size of the window that appears on the participant's computers
- step 3.* To stop sharing your screen, click the **Stop** button

Send Files to Participant's Computers

- step 1.* Click the **Chat** button from the **Vision** toolbar (far right, under the drop-down menu (>>))
- step 2.* Click **Send message** from the **Chat** menu
- step 3.* Type your message, then click **Browse** to select your file.
- step 4.* Select workstations from the **Available users** list to send your file(s) to; click the arrow button (>) to add them.
- step 5.* Click **Send**.
