Do Research. Be relevant. Be written.

Come join a world-class team of scientists dedicated to researching the economics of the most relevant, topical issues of today—global warming, rising food prices, food safety, world hunger, bio-energy, the rapidly-growing economies of China and India, rural poverty, and others.

The U.S. Economic Research Service (ERS) has numerous immediate openings for Ph.D. or Master’s-level economists. Positions are available in the following fields:

- agricultural markets and international trade
- production, industrial organization, and technological change
- labor economics and rural development
- natural resources and environmental economics
- food and consumer economics

Your research will have the potential to affect public policy. You will be encouraged to publish in the profession’s most prestigious journals, in addition to ERS’ award-winning publication, Amber Waves. While working toward the public good, you will be highly compensated (up to $149,000) with a generous benefits package. Our health insurance program is a nationally recognized model that offers you choice and flexibility along with a substantial employer contribution to premiums. Our leave policy provides ample time off to take care of your personal, your recreational and your health care needs. To help you manage responsibilities outside of your jobs and enhance your peace of mind while you are at work, Federal agencies offer a range of family friendly flexibilities including flexible work schedules, telework; child care and elder care resources; adoption information and incentives programs; child support programs, including subsidies and dependent care flexible spending accounts; and employee assistance programs.

And, if these weren’t enough incentives, come join your SRSA colleagues, including three past presidents.

To apply, go to the www.ers.usda.gov, and click on “careers at ERS.” There, you will find two vacancy announcements—ERS-2008-0042 and ERS-2008-0043. Clicking on those will take you to the USAJobs site, where there are instructions for completing your application. In addition to this mandatory submission, you may contact John R. Kort, Associate Administrator, ERS, at jkort@ers.usda.gov for further information.
