Instructions for importing data into Excel for experiment 14

1. Open Excel.

2. Click on the **Data** tab.

3. Click Get **External Data** under the Data Tab.

4. Click on **Import Text File**.   Select file on USB key.

5. Text Import Wizard pops up: You should see data from your file in the window.

6. Make sure **Delimited** is selected, Not Fixed width.

7. Click **Next**.

8. Click **Comma** box and leave Tab box checked.   Click **Next**.

9. Click **Finish**.

10. Your data should appear in the spreadsheet with wavelength (nm) on the left followed by absorbance on the right.

11. Rearrange data as needed and plot your graph.
