

Sierra Nevada Inventory and Monitoring Network

Sierra Nevada Network Parks: Devils Postpile National Monument, Sequoia and Kings Canyon National Parks, Yosemite National Park

Job announcement: Data Manager (Ecologist GS-0408-09/11, Biologist GS-0404-09/11, or Information Technology Specialist GS-2210-09/11).

Permanent, full-time position with the Sierra Nevada Network Inventory and Monitoring Program. (see <http://science.nature.nps.gov/im/units/SIEN/index.cfm> for more information on this program).

Location: Sequoia National Park, Three Rivers, California, with travel to all Sierra Nevada Network parks. The Sierra Nevada parks offer outstanding outdoor recreational opportunities, spectacular scenery, and diverse natural and cultural resources.

Duties: Incumbent will lead planning and implementation of data management for a long-term monitoring program that evaluates status and trends of key ecosystem components and processes. Major responsibilities include program development; database design and management; data acquisition and quality management; data documentation (metadata); data archiving and security; and data retrieval, reporting and dissemination. The incumbent will travel to all network parks, to coordinate meetings and trainings with park staffs and cooperators, and to integrate the network's data management strategy with park programs. Incumbent will collaborate with data managers at park, network, and national levels. There will be some opportunities to work in the field to oversee data collection quality assurance and quality control, and to work with other network staff in the analyses and interpretation of monitoring data.

Detailed application instructions may be found in the vacancy announcement posted at: <http://jobsearch.usajobs.gov/>. The announcement number is SEKI-08-31EE. Announcement open February 26 – March 17, 2008.
