My company is looking for a GIS professional, I came across the CSUS website with postings and would like to the position to your listing.

The position requires some knowledge of GIS and significant knowledge and experience with databases and quality assurance / quality control. The main duties are obtaining parcel data from cities and counties, verifying that data and resolving any anomalies, creating customized maps of parcel-based special assessment districts, and utilizing parcel characteristics, such as lot square footage, to run assessment scenarios and individual parcel assessments for parcels within the special assessment district.

The full job posting is attached. Although the posting says GIS experience is preferred but not required, the ideal candidate will have a strong working knowledge of GIS; particularly in creating parcel-based maps and manipulating parcel characteristics.

Thank you,
Melanee Cardoza
