Internship Opportunity

NewFields Agricultural and Environmental Resources, LLC has an internship opportunity available for a Geographic Information Systems major in its Sacramento, California office. NewFields AER is a specialty firm made up of Soil Scientists, Agronomists and Geospatial Solutions Consultants. We serve a vast array of clients mostly in the western US and specialize in the following areas:

- Geospatial and remote sensing analysis
- Crop mapping
- Remote sensing yield mapping
- Salinity management of crop, soil and water systems
- Water rights assessment
- Soil mapping and land classification

The successful candidate should have at least two to three years completed in their Geographic information systems major. This internship will offer a broad variety of professional work opportunities and experiences. An intern in this position will receive mentoring and career guidance in GIS.
