Elite Medical Scribes
Providing qualified college students and recent graduates with a paid clinical experience

- Learn to think like a doctor
- Participate in exclusive career training
- Improve your medical school application
Scribe programs across the country are seeing many of their employees matriculating into medical school. Elite is no different; after completing a rigorous training program, scribes stand out in medical school interviews. Students find that working as a scribe while finishing their undergraduate degrees makes them more successful in the classroom. The training encourages students to be organized, detailed and conscientious. Scribes use these skills to become more efficient scholars and see an improvement in their grades.

Elite Medical Scribes offers a unique four-tier training program focused on developing clinical competency. Scribes will have access to online training modules in medical terminology, anatomy, clinical laboratory medicine and more. After completing online training, an experienced trainer provides on-site instruction in the clinic or hospital.

Elite Medical Scribes is dedicated to continued employee advancement. Monthly webinars on various medical topics hosted by Medical Director, Dr. Andrew Topliff provide continuous learning opportunities. Create a foundation for a career in medicine while exploring various specialties as a scribe. Elite scribes work in:

- Family Practice
- Orthopedics
- Dermatology
- Neurology
- Internal Medicine
- Emergency Departments
- And More!
