Kinesiology Graduate Program  
Oral Thesis/Project Proposal

Upon completion of 211, or in the final 3 weeks of the completion of 211, each student is eligible to propose their thesis/project. Each student must make an oral presentation of their proposal to their thesis/project committee (Chair and Reader). Both the Chair and Reader must be present at the proposal hearing. The length of the proposal will be at the discretion of the committee members, but should last at least 20 minutes and be followed up by a question and answer period that will be limited by the committee.

Following the proposal hearing, the committee will deliberate over the status of the thesis/project behind closed doors. Once the deliberation is complete, the committee will decide whether the thesis/project will continue.

The committee will make one of three decisions:
1. Proposal is good as is and will continue,
2. Proposal is suitable, but requires changes before proceeding, or
3. Proposal is unsuitable, and the student must re-present a suitable proposal.

Upon completion of the proposal, the results form will be submitted to the Graduate Coordinator. No student may begin forward progress on their thesis until the graduate coordinator receives the completed results form, signed off by the committee.

In order for the student to continue with forward progress on their thesis/project, they must submit the following:

1. Completed proposal results form with the committee recommendation that the student go forward.
2. Submission of the student human subjects forms (if applicable)
3. Submission of the approved university human subject form (if applicable)
Oral Proposal Results Form

Name of Student __________________________
Student ID# __________________________
Date __________________________

Thesis/Project Title

Thesis/Project: __________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

Committee Members

Chair Name __________________________ Reader Name __________________________

Committee Decision

________ Proposal is good as is and will continue

________ Proposal is suitable, but requires the following changes before proceeding:
_____________________________________________________________________
_____________________________________________________________________
_____________________________________________________________________

________ Proposal is unsuitable and the student must re-present

Chair Signature __________________________ Reader Signature __________________________

Human Subjects Status

________ Submitted to department human subjects, but waiting for decision

________ Submitted to university human subjects, but waiting for decision

________ Have human subjects approval (Please attach copy)
