## Psycho-Educational Assessment Case Study

It is the beginning of the school year and Jorge is well behind the rest of the class in reading. Jorge's parents are from Mexico and have been living in CA for 3 years. Jorge has three older brothers and one younger sister. Jorge is struggling in school, particularly with reading. He is generally an attentive student in class but sometimes is more active than the teacher would like. He likes to have fun and often plays silly games with his friends. Jorge's older brothers are performing within the average range for their classroom but below what is considered basic on state proficiency tests in Language Arts and Mathematics. Jorge's younger sister just started first grade and is doing well.

1. What assessment questions does this case study generate? $\qquad$
