**Internship in School Psychology**

The Internship in School Psychology is a directed field study and seminar experience that provides the opportunity to continue your skill development through supervised practice. The purpose of this course is to provide a forum for the discussion of experiences and issues pertinent to the school psychology internship. Seminar discussions are expected to help reinforce/supplement experiential learning. Participants will learn, not only from their own experiences, but also from the experiences of others. It is expected that students will (a) reflect on and learn from their own practice; (b) interact with other professionals in a consultative, collaborative manner; and (c) critically think about professional issues.

The experience is seen as a culminating experience that addresses all performance standards previously addressed within your coursework. Specifically NASP Standards for Graduate Preparation of School Psychologists (NASP, 2010) 3.1 to 3.6 outline the requirements for an internship. Those requirements are embodied in our Internship Expectations Form.

The Internship is addressed in Standard 32 of the CCTC Standards for Training Programs in School Psychology.

**Course Expectations:**

- Be on time and prepared for each seminar.
- Attend **ALL** scheduled seminars or meetings.
- Complete all forms in a timely manner. See <http://www.csus.edu/indiv/b/brocks/#intern> for copies of forms.
- Please note that until the Internship Approval Form is completed you may not start collecting hours toward your internship.
- Maintain good communication with your field supervisor.
- Contact your university supervisor(s) for any concerns that arise and are not met in your field placement.

**Class Meeting Format:**

Students will be assigned a date for which they are responsible for providing practice related topic to be discussed. Topics will be identified ahead of time by the class and topic leaders will provide the class with relevant resources prior to the meeting.

1. Identify any priority issues from internship for large group discussion/debriefing
2. Topic leaders facilitate discussion of the designated Topic
3. General group discussion
4. Break
5. Small group discussions

## Portfolio

The School Psychology Portfolio is used as a formative evaluation tool throughout the candidate's enrollment in the CSUS school psychology training program. At the conclusion of the internship it is used as a summative evaluation. During the internship year a Behavior Intervention Case Study, and Academic Intervention Case Study, and a Psycho-educational Evaluation will be submitted by all interns and evaluated using criteria similar to that employed in EDS 240, EDS 243, and EDS 246A. It will also include an updated resume and the final School Psychology Internship Evaluation Form.

## Outline

The portfolio serves several purposes:

- First, it will provide documentation of the competencies that you have developed while in the CSUS school psychology program.
- Second, it will allow you and the faculty to note any omissions in instruction, program, or competencies.
- Third, it will help you to better understand the knowledge base and skills pertinent to your practice as a school psychologist.
- Fourth, it will be a valuable document for presenting to prospective employers your competencies and experiences.
- Fifth, it will be a useful tool as you begin your school psychology practice.

Each semester you will be expected to add to your portfolio and have it reviewed by a faculty member. At the conclusion of your course work, during the internship year, your faculty advisor and/or Internship supervisors, will need to verify that the portfolio has been completed.

There are several approaches to constructing your portfolio and each person has his or her own approach. Because your portfolio is both a personal and public document it is important that it reflect your individuality as well as meet certain standards as to content. Here are some suggestions that we have for how you might organize your portfolio.

1. Resume
2. The following sections in which you would include examples of your work that are listed on the following page. You also might include in each section a list of relevant coursework completed:
  - a. Consultation
  - b. Intervention
  - c. Assessment
  - d. Counseling
  - e. Resources
  - f. Research
  - g. Law and Ethics
3. A list of your course work and/or a copy of your transcripts
4. Certificates/credentials/honors
5. Other items that reflect what you consider your strengths. This is a document to be proud of, so enjoy showing off your skills!

The following is the form used by faculty to evaluate the School Psychology Portfolio. Responsible faculty will initial on the line before each item to indicate that they have verified that the portfolio is complete.

## School Psychology Training Program Intern Evaluation Form

**Intern Name:** \_\_\_\_\_ **Date:** \_\_\_\_\_

**Supervisors:** Please use the following form to evaluate intern progress. At a minimum it should be completed in November and May of each school year. The intern is not required to be rated at the highest level in any area, but we do expect ratings of 3 or 4 in most areas by the end of the internship experience. If you have not observed the intern in a given activity, rate it as N/A. Acceptable performance on these professional work characteristics is an important component of our students' evaluation. Please review the items carefully

### *School Psychology Intern Rating Scale*

Please rate the Intern on the questionnaire provided below. Use the following scale.

<b>N/A Not applicable or not observed.</b> This rating should be used when the activity in question is not part of placement expectations or the rater has not had the opportunity to observe or rate the intern on this item.
<b>1 Poor.</b> Fails to meet expectations. Consistently performs poorly and needs improvement. A specific plan and period of time should be established to improve performance. If improvement is not made, then the intern's suitability for this field of work should be evaluated. Bottom 5%.
<b>2 Below Standard.</b> Performance is below average. An intern whose performance consistently falls in this range requires improvement to function effectively in a professional environment. Bottom 15%.
<b>3 Standard.</b> Most interns will possess skills and judgment sufficient to meet professional demands in this area and a large proportion will remain in this range. The performance of interns in this range meets normal expectations. Middle 50%.
<b>4 Above Standard.</b> Performance and judgment of interns in this category is decidedly better than average. Shows sensitivity, judgment, and skill beyond what is normally expected or displayed by peers. Upper 15%.
<b>5 Outstanding.</b> Performance is recognizably and decidedly better than a large proportion of other interns. Upper 5%.

## EDS 441: ACADEMIC INTERVENTION CASE STUDY

The Academic Intervention Case Study requires the development, implementation and evaluation of an academic intervention. The Academic Intervention Case Study Template will be useful in designing and implementing your intervention and in writing your report; it will not be included in your final report that is turned in to your supervisor. Your completed case study will consist of a *brief report*, which will include the items listed below:

1. Describe the problem in terms of current level of performance, expected level of performance and gap analysis of the difference, and target skill.
2. Relate hypothesis as to why problem is occurring and what data supports hypothesis.
3. Describe intervention to be implemented in terms of who, what, and how often.
4. Describe monitoring strategies for student progress and intervention fidelity (Include graphs).
5. Evaluate results of intervention using three methods and CES. Explain why measures of effectiveness were chosen (Include chart).
6. Provide suggestions for change or improvement in the intervention.
