Example 2: Mildly Mentally Disabled (Educably Mentally Handicapped) Student

12. Suspension of school discipline procedures because it is determined that the student's intellectual capacity limits his understanding of appropriate sexual conduct, though the student's IEP needs to include a sex education curriculum, as do the IEPs of the other MD students in the program; 1 1/2 day suspension sufficient; behavior monitoring the rest of the school year for absence of inappropriate sexual contact with peers; individual time weekly with school psychologist for repetition of the sex education curriculum from classroom in a one-to-one setting.
