 Agenda.pdf

Instructor
Joyce Dibble

Students will need an e-mail account and computer access to the Web. All Sacramento State students enrolled in one or more units can create a [SacLink](#) account for e-mail. Although a home computer with Internet access running Microsoft Internet Explorer, Mozilla Firefox or Netscape Navigator would be beneficial, students can access the Internet from one of the [campus student labs](#). Check out [System Check](#) and [Computer Hardware Recommendations](#) for more information about equipment.
