

1. Find 35% of 240.

2. Thirty five is what percent of 80?

3. Sixty is twenty four percent of what number?

3. Max only has \$20 and sales tax in his county is 7%. Does he have enough money to buy the shirt?
4. Max found a pair of pants that were marked with a sale price of \$44. The sale is listed as an 18% off sale. Since he would have to pull out his credit card to buy these pants he wants to make sure it is worth it. He decides that if he saves more than \$5 on the pants, then he'll buy them. How much money will he save if he buys the pants?
