

BIO 132 Neurophysiology

Homework Assignment 1

20 points

(Due the day of the Final)

Write a 1-2 page essay on the following topic:

“If you HAD to be afflicted with either Huntington’s disease or Parkinson’s disease, with which one would you rather be afflicted?”

- Your audience for this essay should be your non-science major friends.
- Be sure to include background information about both diseases.
- Do not plagiarize material. Either cite other people’s words or summarize what you find in your own words.
- There is no “right” answer, but you should make a sound argument for whichever disease you choose.
