

### **Full Sentence Outline**

I. Man-made pollution is the primary cause of global warming.

A. Greenhouse gas emissions are widely identified by the scientific community to be

harmful.

1. The burning of coal and fossil fuels are the primary releasers of hazardous greenhouse gases.

2. Large scale cattle ranching operations emit substantial greenhouse gas in form of methane.

B. Greenhouse gas emissions are an evolving problem due to “stacking” of various gasses effects.

II. Natural sources of pollution must be accommodated when setting greenhouse gas limits internationally.

**Notice: If an A, then a B is required. If a 1., then a 2. If you cannot create a second subordinate, then you must rewrite the super-ordinate idea to contain it.**

Full sentence outlines are often accompanied with an APA reference list on a separate page.

Quotes within the outline must also utilize APA in-text citations.
