

ART 144 / Project 2 / Vector Imaging / Wiggins

Vector Imaging: 2 images for digital printing output: 1print@11”X15”, 1@ large format

Software: Adobe Illustrator

Duration: 4 weeks

Save your tutorial folder as “your 3 Initials” tutorials example: MFWTutorials

Tutorial folder contents:

1. Your pen tool practice files, named with your 3 initials at beginning of file name.
2. Your vector self-portrait, titled “Your 3 Initials”self.ai, 8” x 10” @ 72 ppi
File includes: four layers named head, background, pattern (rectangle filled with your swatch), and template.
3. Your four part self portrait, titled “Your 3 Initials”selfx4.ai, 16”x20” @ 72ppi, must include four named layers using four versions of your original self portrait. Change scale, rotation, and position of the head in each one. Experiment with a variety of color combinations and backgrounds. We will print the final result. Save all colors and swatches used in the four part and original portraits in your swatch library.
4. Your custom swatches titled “Your 3 Initials”swatches.ai Example: MFWswatches.ai

Homework: Create a template for Project 2 in Photoshop, using researched theme(s) images.

Prints: Final image and / or one of your self-portrait images will be printed on the computer lab large format and smaller format Epson printers.

Turn In:

- Tutorial folder
- One final Illustrator image drawn from your template / include template in file / do not flatten layers
Save your file as: “Your 3 Initials”Project2.ai. Example: MFWswatches.ai
- One large format print
- One 11 x 15 print
