

# How to uninstall McAfee Security from your Mac

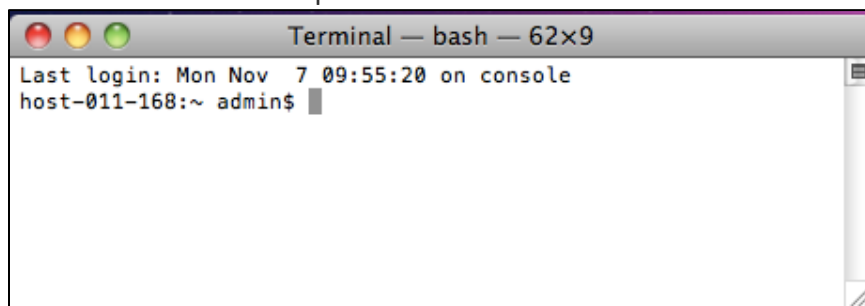

1. From the Finder, click on the **Go** menu, and select **Utilities**:

2. Double-click to open **Terminal**:

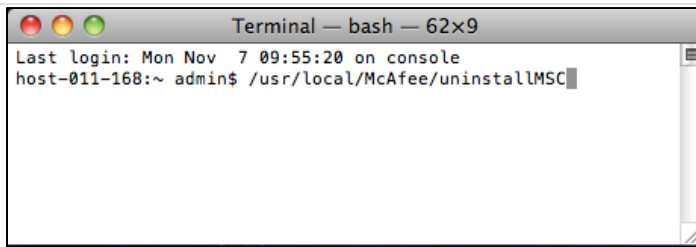

3. The **Terminal** window opens:

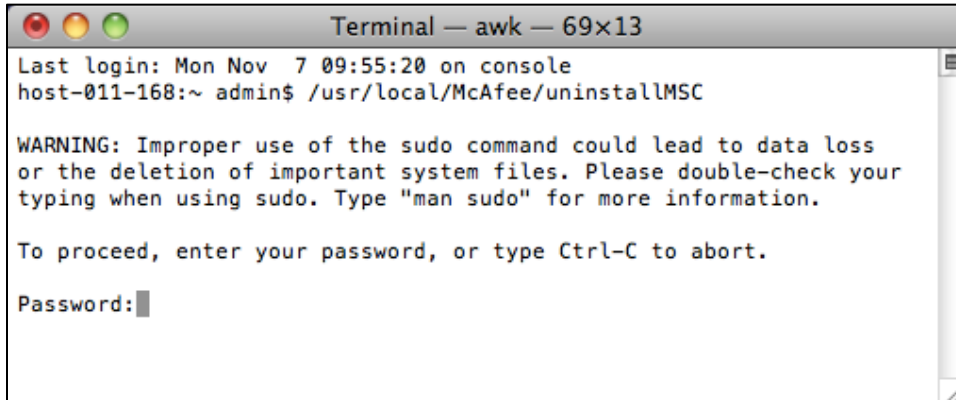

In the Terminal window, type the following command and press "return":

```
/usr/local/McAfee/uninstallMSC
```

```
Terminal — bash — 62x9
Last login: Mon Nov 7 09:55:20 on console
host-011-168:~ admin$ /usr/local/McAfee/uninstallMSC
```

4. When prompted, type your **Mac's Admin password** and press "return":

```
Terminal — awk — 69x13
Last login: Mon Nov 7 09:55:20 on console
host-011-168:~ admin$ /usr/local/McAfee/uninstallMSC

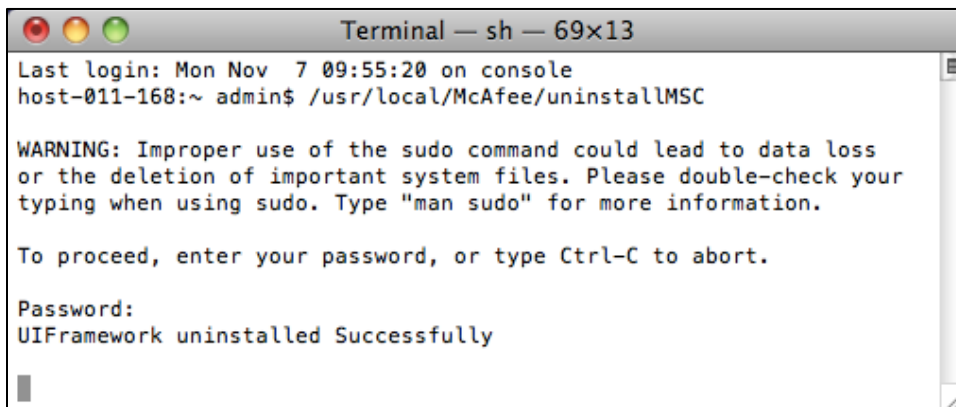

WARNING: Improper use of the sudo command could lead to data loss
or the deletion of important system files. Please double-check your
typing when using sudo. Type "man sudo" for more information.

To proceed, enter your password, or type Ctrl-C to abort.

Password:
```

**NOTE: No characters appear when you type your password.**

5. When the uninstallation process completes, a message appears in the Terminal window stating that "UIFramework uninstalled successfully".

```
Terminal — sh — 69x13
Last login: Mon Nov 7 09:55:20 on console
host-011-168:~ admin$ /usr/local/McAfee/uninstallMSC

WARNING: Improper use of the sudo command could lead to data loss
or the deletion of important system files. Please double-check your
typing when using sudo. Type "man sudo" for more information.

To proceed, enter your password, or type Ctrl-C to abort.

Password:
UIFramework uninstalled Successfully
