05-06 Assessment Reports

Name : Robin Carter

Contact : Phone : Email :

Department : Social Work

Mission : The mission of the Division of Social Work is to prepare individuals aspiring to become Social Work professionals who can both lead and serve the region in the development and delivery of human services which promote the value of human kind and improve the quality of life, particularly for the poor, vulnerable populations and populations at-risk of oppression. Towards this end, the Division of Social Work provides an undergraduate and graduate degree and offers continuing education programs to the professional Social Work community.

Outcome : All students are evaluated on a range of learning objectives by the instructors in their field placements. Since these learning objectives are also reflected in the whole curriculum, we use these evaluations as measures of how well are students are doing in meeting the designated objectives. Students receive a score of 1-5 on each item. We compile all of the evaluations and determine if there are trends in the ratings that need our attention.

Description : Above links lead to the measures used

Date and Time :

Result: We have gathered the data but have not yet analyzed it.

program_change :

procedure :

academic_change: We also are in the processes of receiving responses to a survey we sent to alumni last month.

Upcoming_year: As we are preparing for our self-study in Fall 2008, we will engage in a range of other assessment activities—all noted in our assessment plan. We hope to use this information to determine whether we need to make some changes to our curriculum before our accreditation is up.
