

# PowerPoint 2007

## YouTube Videos

### HOW TO GUIDE

CALIFORNIA STATE UNIVERSITY, SACRAMENTO

### PLAY YOUTUBE VIDEOS IN A PRESENTATION

Play YouTube videos in PowerPoint 2007 without having to go to the webpage. However, you do need a live Internet connection for the movie to play. The need thing is that the movie will play immediately when you click on the YouTube movie in a presentation without waiting for the webpage to load. This will be as smooth as you have the movie within the presentation. You can follow these steps to create a YouTube movie to play smoothly:

*step 1.* Click on the *Developer Tab* on the *Ribbon* within a presentation \* if you do not see the *Developer Tab*, the back of this page has the steps to enable the *Developer Tab*

*step 2.* Click this icon  on the *Controls* group. The *More Controls* dialog box will launch

*step 3.* Click *Shockwave flash objects*

*step 4.* Click *OK*

*step 5.* Draw a box in the slide where you want the YouTube video to play

*step 6.* Go to the movie online on the YouTube website

*step 7.* Select the URL address of the YouTube movie you want to play in your presentation

*step 8.* Copy the URL address when you highlight the address and click CTRL C

*step 9.* Click on the box in the presentation

*step 10.* Right-Click on the box in the presentation

*step 11.* Click *Properties*

*step 12.* Paste CTRL V the address in the “movie” space. See Screenshot at the back of this page

*step 13.* Delete “watch?” within the URL address of the YouTube movie

*step 14.* Replace “=” equal sign with a forward slash “/” in the URL address of the YouTube movie

Turn page over

- step 15. Turn the loop to false if you do not want the movie to loop
- step 16. Turn the Playing to false if you want to click on the movie to play
- step 17. Type 355 in the *Height* line and 425 in the *Width* line
- step 18. Close the *ShockwaveFlash* dialog box
- step 19. Play the *YouTube* movie

The screenshot shows the 'Properties' dialog box for 'ShockwaveFlash1'. The 'Movie' tab is selected. Annotations with callout boxes provide instructions:

- A box pointing to the 'Height' field (342) says: "Type 355 in the Height line" and "Scroll down and type 425 in the Width line".
- A box pointing to the 'Loop' field (True) says: "Change the loop to False".
- A box pointing to the 'Movie' field (empty) says: "Paste the YouTube URL here".
- A box pointing to the 'Playing' field (True) says: "Change True to False if you do not want the movie to play automatically".

## If you do not see the Developers Tab on the Ribbon

Click on the *Office Tab*

Click the *PowerPoint Options* button, located next to the *Exit PowerPoint* button

Click on *Popular*

Check the *Show Developer tab in the*

Click *OK* and you will now see the Developers Tab on the Ribbon
