<tbody>
<tr>
<td><strong>1. Impairments in Social Interaction</strong></td>
<td><strong>1. Deficits in Social Communication and Social Interaction</strong></td>
</tr>
<tr>
<td>(a) marked impairment in the use of multiple nonverbal behaviors such as eye-to-eye gaze, facial expression, body postures, and gestures to regulate social interaction</td>
<td>1. Deficits in social-emotional reciprocity, ranging, for example, from abnormal social approach and failure of normal back-and-forth conversation; to reduced sharing of interests, emotions, or affect; to failure to initiate or respond to social interactions.</td>
</tr>
<tr>
<td>(b) failure to develop peer relationships appropriate to developmental level</td>
<td>2. Deficits in nonverbal communicative behaviors used for social interaction, ranging, for example, from poorly integrated verbal and nonverbal communication to abnormalities in eye contact and body language or deficits in understanding and use of gestures; to a total lack of facial expressions and nonverbal communication.</td>
</tr>
<tr>
<td>(c) a lack of spontaneous seeking to share enjoyment, interests, or achievements with other people (e.g., by a lack of showing, bringing, or pointing out objects)</td>
<td>3. Deficits in developing, maintaining, and understanding relationships, ranging, for example, from difficulties adjusting behavior to suit various social contexts; to difficulties in sharing imaginative play or in making friends; to absence of interest in peers.</td>
</tr>
<tr>
<td>(d) lack of social or emotional reciprocity</td>
<td><strong>2. Restricted, Repetitive, Behaviors, Interests, Activities</strong></td>
</tr>
<tr>
<td><strong>2. Impairments in Communication</strong></td>
<td>1. Stereotyped or repetitive motor movements, use of objects, or speech (e.g., simple motor stereotypies, lining up toys or flipping objects, echolalia, idiosyncratic phrases).</td>
</tr>
<tr>
<td>(a) delay in, or total lack of, the development of spoken language (not accompanied by an attempt to compensate through alternative modes of communication such as gesture or mime)</td>
<td>2. Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal or nonverbal behavior (e.g., extreme distress at small changes, difficulties with transitions, rigid thinking patterns, greeting rituals, need to take same route or eat same food every day).</td>
</tr>
<tr>
<td>(b) in individuals with adequate speech, marked impairment in the ability to initiate or sustain a conversation with others</td>
<td>3. Highly restricted, fixed interests that are abnormal in intensity of focus (e.g., strong attachment to or preoccupation with unusual objects, excessively circumscribed or perseverative interests).</td>
</tr>
<tr>
<td>(c) stereotyped and repetitive use of language or idiosyncratic language</td>
<td>4. <strong>Hyper- or Hyporeactivity to sensory input or unusual interest in sensory aspects of the environment</strong> (e.g., apparent indifference to pain/temperature, adverse response to specific sounds or textures, excessive selling or touching of objects, visual fascination with lights or movement).</td>
</tr>
<tr>
<td>(d) lack of varied, spontaneous make-believe play or social imitative play appropriate to developmental level</td>
<td>Becomes a specifier (“with or without accompanying language impairment”)</td>
</tr>
<tr>
<td><strong>3. Restricted, Repetitive, Stereotyped Behaviors, Interests, Activities</strong></td>
<td><strong>2. Restricted, Repetitive, Behaviors, Interests, Activities</strong></td>
</tr>
<tr>
<td>(a) encompassing preoccupation with one or more stereotyped restricted patterns of interest that is abnormal either in intensity of focus</td>
<td>1. Stereotyped or repetitive motor movements, use of objects, or speech (e.g., simple motor stereotypies, lining up toys or flipping objects, echolalia, idiosyncratic phrases).</td>
</tr>
<tr>
<td>(b) apparently inflexible adherence to specific, nonfunctional routines or rituals</td>
<td>2. Insistence on sameness, inflexible adherence to routines, or ritualized patterns of verbal or nonverbal behavior (e.g., extreme distress at small changes, difficulties with transitions, rigid thinking patterns, greeting rituals, need to take same route or eat same food every day).</td>
</tr>
<tr>
<td>(c) stereotyped and repetitive motor mannerisms (e.g., hand or finger flapping or twisting, or complex whole-body movements)</td>
<td>3. Highly restricted, fixed interests that are abnormal in intensity of focus (e.g., strong attachment to or preoccupation with unusual objects, excessively circumscribed or perseverative interests).</td>
</tr>
<tr>
<td>(d) persistent preoccupation with parts of objects</td>
<td>4. <strong>Hyper- or Hyporeactivity to sensory input or unusual interest in sensory aspects of the environment</strong> (e.g., apparent indifference to pain/temperature, adverse response to specific sounds or textures, excessive selling or touching of objects, visual fascination with lights or movement).</td>
