Final Catalog

2020-2021 Catalog

Provide reasons for the program suspension.

The department can no longer support the students in this program since Dr. Ruth Ballard is FERPing and will soon be retiring. The support comes in the form of both advising, the offering of 2 classes, and the support of the course through grants and donations. The Department voted in Spring semester 2019 to suspend the program.

Indicate any programmatic or fiscal impact suspension of the program will have on other academic units' programs.

None

Describe the consultation that has occurred with affected units.

None

Explain provisions to ensure currently enrollment students have a reasonable opportunity to complete the program.

Students currently in the program will be allowed to continue and graduate under this program. We have consulted with Dr. Ballard regarding the suspension and have this planned over the next several years.

Indicate what resources will be freed up or shifted to other programs as the result of the program suspension.

2020-2021 Catalog

Type of Program Proposal:

Major

Title of the Program:

BS in Biological Science (Forensic Biology)

Catalog Description:

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The curriculum in Forensic Biology is designed to prepare students for careers as criminalist specializing in the analysis and interpretation of serological and DNA evidence. This curriculum meets the educational requirements for entry level career positions with city, county, and federal agencies. Students selecting this concentration are urged to pursue internship opportunities (BIO 195), such as those available through the Sacramento County Coroner's Office, and/or directed research (BIO 199A or BIO 199B) with a faculty member in Biological Sciences or Chemistry who utilizes molecular biology techniques and instrumentation. Students completing the requirements for a concentration in Forensic Biology also fulfill the requirements for a minor in Chemistry.

Admission Requirements: Course prerequisites and other criteria for admission of students to the degree major program, and for their continuation in it.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements: (If new courses are being created as part of a new program, it will be useful to propose courses first.)
