Briefly describe the program proposal (new or change) and provide a justification:

The link of entrepreneurship, innovation and sustainability is a subject of great interest nowadays, as society is looking for solutions leading to sustainable development. As entrepreneurs strive to translate ideas about corporate social responsibility into strategic actions, many are gravitating toward strategies that are considered as sustainable. Such strategies not only help entrepreneurs make good profits, but that also do so without harming the environment while at the same time as ensuring that business acts in a socially responsible way with regard to its stakeholders. We propose that IBUS 180 (Sustainability Business in Global Economy) be added to the list of electives in the Entrepreneurship concentration.

Objectives of the degree program:

Goal 1. Fundamental Business Knowledge: Competence based on fundamental business knowledge.

LO 1.1 Demonstrate understanding of fundamental business theories, concepts, and skills.

LO 1.2 Ability to analyze business information in performing business related tasks.

Goal 2. Integrative Business Competence: Business competence integrated with other business knowledge areas and ethical responsibility.

LO 2.1 Ability to identify factors contributing to a managerial problem from a variety of business perspectives.

LO 2.2 Enumerate the costs and benefits that potential solutions will have on the interdependent stakeholders of a firm.

Goal 3. Effective Business Communication: Business communication utilizing contemporary and classic communication techniques and methods.

LO 3.1 Convey information in a variety of business settings.

LO 3.2 Evaluate the efficacy of business communications.

Goal 4. Applied Business Capability: Ability to translate knowledge of business and management into practice.

LO 4.1 Create effective business solutions that are both ethically sound and socially responsible.
