Program Description

Child and Adolescent Development is the study of the biological, physical, socio-emotional, and cognitive growth and development of the child from conception through emerging adulthood. Using theory, empirical research, and practice, this rigorous academic program prepares students to work as agents of social change with diverse populations of children, adolescents, emerging adults, and families in a variety of areas, including education, advocacy, research, policy, counseling, and/or other settings.

Child and Adolescent Development Individualized concentration is an interdisciplinary program made up of the core academic child and adolescent courses and 14–15 units of electives, from a wide variety of fields, such as education, art, public policy, nursing, or criminal justice, just to name a few. This major is flexible to allow students to design their program to closely align with personal and career objectives. The program handbook and Web site include a current list of approved electives. However, the students should select their electives in consultation with a major advisor.
