Relevant course content has been updated and incorporated in the required course CE 190. CE 146 has not been required in the CE major since the 2018-2019 catalog and has not been offered since Spring 2019 (after getting all grandfathered students through the course). Leaving this course in the catalog has caused significant confusion for our students as it still appears as satisfying the GE Area D requirements for the major (combined with ENGR 140), which has not been accurate since the 2018-2019 catalog.
