University Learning Goals**Undergraduate Learning Goals:**

Competence in the disciplines
 Integrative learning
 Intellectual and practical skills

Will this program be required as part of a teaching credential program, a single subject, or multiple subject waiver program (e.g., Liberal Studies, Biology) or other school personnel preparation program (e.g., School of Nursing)?

No

Do these changes impact the Smart Planner roadmap?

No

Catalog Description:**Units required for Major: 73-85, includes units of study in chosen concentration (see below).****Total units required for BS: 120****Program Description**

The curriculum in Clinical Laboratory Sciences meets the undergraduate coursework requirements of the State of California for eligibility to take a Clinical Laboratory Scientist (CLS) licensure examination. Eligibility to take a licensure examination also requires a one year (CLS) internship training program at a state approved clinical laboratory. Completion of BS degree requirements in the Clinical Laboratory Sciences concentration does not guarantee admission to a CLS internship training program. Information on admission criteria and application procedures for the various CLS internship training programs throughout the state is available through the California Association for Medical Laboratory Technology (CAMLT) at their website (<http://www.camlt.org/cls/>). Information about state and out-of-state programs can be found at NAACLS.org.

As defined by policy <http://www.csus.edu/umannual/acadaff/fsm00010.htm>, a change in units constitutes a substantive change to the program. If your changes constitute a substantive change, please refer back to the "Program Change Type" field above to ensure that "Substantive" is selected.
