**Justification for course proposal:**

The DPT program has proposed to move PT618 to the 1st year Summer Semester and PT646 to the 2nd year Fall Semester. Consequently, corequisite courses listed in the catalog would no longer be accurate. The program follows a sequential curricular model, and DPT students may only take courses in the sequence listed in the catalog. Moreover, the department approves and enrolls DPT students in their classes each semester. As such, the program has opted to eliminate listed corequisite and prerequisite courses, as students would not be allowed to enroll in any program course without departmental approval.

**Course Description: (Not to exceed 90 words and language should conform to catalog copy.)**

In this course students acquire general physical therapy examination, evaluation and patient handling skills. Students will practice and demonstrate techniques under faculty supervision in the following areas: Measurement of vital signs, manual strength testing, testing of joint range of motion and muscle length, patient positioning, transfer techniques, gait training, use of wheelchairs, and use of assistive devices.
