

EEE 230: ANALOG INTEGRATED CIRCUIT DESIGN

In Workflow

1. EEE Committee Chair (mahyar.zarghami@csus.edu)
2. EEE Chair (milica@csus.edu)
3. ECS College Committee Chair (tongren.zhu@csus.edu)
4. ECS Dean (arad@csus.edu)
5. Academic Services (catalog@csus.edu)
6. Senate Curriculum Subcommittee Chair (curriculum@csus.edu)
7. Dean of Graduate (s.storms@csus.edu)
8. Dean of Undergraduate (shaw@csus.edu)
9. Catalog Editor (catalog@csus.edu)
10. Registrar's Office (k.mcfarland@csus.edu)
11. PeopleSoft (PeopleSoft@csus.edu)

Approval Path

1. 2026-04-13T14:43:55Z
Milica Markovic (milica): Approved for EEE Committee Chair
2. 2026-08-29T01:31:22Z
Milica Markovic (milica): Approved for EEE Chair
3. 2026-09-23T17:10:01Z
Tongren Zhu (tongren.zhu): Approved for ECS College Committee Chair
4. 2026-09-23T17:36:11Z
Behnam Arad (arad): Approved for ECS Dean

Catalog Title:

Analog Integrated Circuit Design

Class Schedule Title:

Analog IC Design

Academic Group: (College)

ECS - Engineering & Computer Science

Academic Organization: (Department)

Electrical and Electronic Engineering

Will this course be offered through the College of Continuing Education (CCE)?

No

Catalog Year Effective:

Spring 2027 (2026/2027 Catalog)

Subject Area: (prefix)

EEE - Electrical and Electronic Engineering

Catalog Number: (course number)

230

Course ID: (For administrative use only.)

127361

Units:

3

Is the ONLY purpose of this change to update the term typically offered or the enforcement of existing requisites at registration?

No

In what term(s) will this course typically be offered?

Fall term only

Does this course require a room for its final exam?

Yes, final exam requires a room

This course complies with the credit hour policy:

Yes

Justification for course proposal:

Revised course outlines, learning outcomes, and course title.

Course Description: (Not to exceed 90 words and language should conform to catalog copy.)

Covers core topics and fundamental building blocks in analog integrated circuits. Topics include MOS device physics; single-stage, multistage, and differential amplifiers; current mirrors and biasing techniques; frequency response of amplifiers; noise analysis; operational amplifier design; and feedback, stability, and frequency compensation.

Are one or more field trips required with this course?

No

Fee Course?

No

Is this course designated as Service Learning?

No

Is this course designated as Curricular Community Engaged Learning?

No

Does this course require safety training?

No

Does this course require personal protective equipment (PPE)?

No

Does this course have prerequisites?

Yes

Prerequisite:

EEE 109 or consent of the instructor.

Prerequisites Enforced at Registration?

No

Does this course have corequisites?

No

Graded:

Letter

Approval required for enrollment?

No Approval Required

Course Component(s) and Classification(s):

Seminar

Seminar Classification

CS#05 - Seminar (K-factor=1 WTU per unit)

Seminar Units

3

Is this a paired course?

No

Is this course crosslisted?

No

Can this course be repeated for credit?

No

Can the course be taken for credit more than once during the same term?

No

Description of the Expected Learning Outcomes and Assessment Strategies:

List the Expected Learning Outcomes and their accompanying Assessment Strategies (e.g., portfolios, examinations, performances, pre- and post-tests, conferences with students, student papers). Click the plus sign to add a new row.

	Expected Learning Outcome	Assessment Strategies
1	Analyze MOS device behavior using physical models, including operating regions, small-signal parameters, and biasing networks.	Assignments, exams
2	Design and evaluate single-stage, multistage, and differential amplifiers using appropriate circuit topologies and current mirror techniques.	Assignments, exams
3	Determine and interpret frequency response characteristics of analog amplifiers, including poles, zeros, bandwidth, and gain-bandwidth trade-offs.	Assignments, exams, design project
4	Analyze noise in analog circuits and quantify its impact on overall system performance.	Assignments, exams
5	Design operational amplifiers that meet specified requirements for gain, stability, power consumption, and dynamic performance, including feedback compensation techniques.	Assignments, exams, design project
6	Use computer-aided design (CAD) tools to simulate, verify, and analyze analog integrated circuits.	Design project

Attach a list of the required/recommended course readings and activities:

EEE 230 Course Syllabus.pdf

Is this course required in a degree program (major, minor, graduate degree, certificate?)

Yes

Has a corresponding Program Change been submitted to Workflow?

No

Identify the program(s) in which this course is required:**Programs:**

MS in Electrical and Electronic Engineering

MS in Computer Engineering

Certificate in Integrated Circuit Design

Blended BS/MS in Electrical Engineering

Does the proposed change or addition cause a significant increase in the use of College or University resources (lab room, computer)?

No

Will there be any departments affected by this proposed course?

No

I/we as the author(s) of this course proposal agree to provide a new or updated accessibility checklist to the Dean's office prior to the semester when this course is taught utilizing the changes proposed here.

I/we agree

University Learning Goals

Graduate (Masters) Learning Goals:

Disciplinary knowledge
Critical thinking/analysis
Research (optional)

Is this course required as part of a teaching credential program, a single subject, or multiple subject waiver program (e.g., Liberal Studies, Biology) or other school personnel preparation program (e.g., School of Nursing)?

No

Is this a Graduate Writing Intensive (GWI) course?

No

Key: 1736
