- Principles and practices necessary to plan, initiate, administer, and evaluate school counseling programs, including related laws. Lecture, discussion three hours.
- EDC 272. Counseling Children and Youth. 3 Units**
Prerequisite(s): EDC 216, EDC 280, classified student in Counselor Education Program. School specialization: EDC 242.
Corequisite(s): School Counseling Specialization: EDC 475.
Term Typically Offered: Fall, Spring
- Provides students with a theoretical foundation and working knowledge of contemporary issues and interventions for children and youth. A variety of presenting problems and treatment strategies are explored.
- EDC 274. Guidance and Consultation in School Counseling. 3 Units**
Prerequisite(s): EDC 216, EDC 280, EDC 270; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
- Presents a variety of topics and strategies related to the school counselor's role in implementing guidance curricula in the school. Explores models of consultation, change strategies, human relations skills, and ethical considerations. Emphasis is on the developmental nature of school counseling programming, the need for school counseling to support the larger instructional mission of the school, the role of the counselor as a change agent and the multiplicity of skills needed for successful guidance and consultation.
- EDC 280. Practicum in Communication. 2 Units**
Corequisite(s): EDC 216.
Term Typically Offered: Fall, Spring
- Supervised practice in the basic styles of communication, verbal and nonverbal, with additional focus on the particular skills of selected theories. Lecture one hour; laboratory two hours.
Note: Recommended to be taken within the first 6 units of study in the Counselor Education Program.
- Credit/No Credit
- EDC 282. Practicum in Group Counseling. 2 Units**
Prerequisite(s): EDC 219; classified student in the Counselor Education Program.
Term Typically Offered: Fall, Spring
- Supervised practice in leadership of group counseling. Lecture one hour; laboratory three hours.
 Credit/No Credit
- EDC 294. Cooperative Education Experience. 3 Units**
Prerequisite(s): Open only to upper division and graduate students; consent of Department Chair.
Term Typically Offered: Fall, Spring
- Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies, and other appropriate settings. Requires attendance at weekly meetings, preparation of application packet, completion of field study assignment, and a written final report.
Note: Units may not be used to meet course work requirements. May be repeated once for credit.
- Credit/No Credit
- EDC 296P. Current Issues in Counseling: Meditation. 1 Unit**
Term Typically Offered: Fall, Spring
- An introductory experimental class in meditation which provides a basic foundation of basic meditative theories, the experience of meditative practices, and a basic knowledge of meditative techniques of benefit both personally and with clients. Research has demonstrated that meditation is helpful in a number of stress-related conditions and recent research indicates it is often more effective than psychotherapy in treatment of some problems.
Note: Instructor approval required. May be taken twice for credit.
- Credit/No Credit
- EDC 299. Special Problems. 1 - 3 Units**
Term Typically Offered: Fall, Spring
- Individual projects at graduate level designed especially for students capable of independent study.
Note: Admission by approval of the instructor with whom the student will be working directly and the Department Chair.
- Credit/No Credit
- EDC 475. Practicum In Counseling. 3 Units**
Prerequisite(s): Prerequisites for all specializations: EDC 210, EDC 214, EDC 216, EDC 280. Additional prerequisites by specialization: Career - EDC 212+, EDC 218, EDC 219+, EDC 260, EDC 262+; Community - EDC 201, EDC 212+, EDC 218, EDC 219; MFCC - EDC 212, EDC 218+, EDC 219, EDC 234, EDC 252+, EDC 476; School - EDC 252+, EDC 270.
Corequisite(s): By specialization: School - EDC 272.
Term Typically Offered: Fall, Spring
- Supervised counseling practice in agency and/or school settings. Emphasis on application of counseling theories and the integration of one's own counseling philosophy into practical applications. Basic requirements: 100 clock hours with at least 40 client contact hours, 1 hour per week of individual/triadic supervision, and one and half hours per week of group supervision.
Note: Department petition is required the semester prior to enrollment.
- Credit/No Credit

EDC 476. Practicum in Marriage, Family and Child Counseling. 1 Unit

Prerequisite(s): EDC 216, EDC 280, classified student in the Counselor Education Program.

Corequisite(s): EDC 234.

Term Typically Offered: Fall, Spring

Structured observation and supervised practice in marriage, family, and child counseling. Application of material learned in EDC 234. Emphasis on establishing relationships and interviewing techniques with multiple clients, assessment techniques, setting goals, and learning to think systemically. Laboratory two hours.

Credit/No Credit

EDC 480. Field Study In Counseling. 2 - 6 Units

Prerequisite(s): EDC 475 and all of its prerequisites. Additional prerequisites by specialization: MFCC - completion of required courses except culminating requirement.

Corequisite(s): By specialization: School - EDC 272.

Term Typically Offered: Fall, Spring

Supervised counseling and field experiences arranged in community-based settings such as schools, colleges and/or agencies. One hundred clock hours of experience required for each unit of credit for a total of six hundred clock hours (or 6 units). Weekly supervision is provided throughout the field experience: one hour per week of individual/triadic supervision and one and half hours per week of group supervision.

Note: Department petition and approval of faculty advisor is required the semester prior to enrollment.

Credit/No Credit

EDC 500. Master's Culminating Experience. 1 Unit

Prerequisite(s): Advanced to candidacy for the master's degree and enrollment in the last semester of course work; Classified student in the Counselor Education Program; Department petition required the semester prior to enrollment.

Term Typically Offered: Fall, Spring

Focuses on reviewing and synthesizing of student's knowledge of theory, and practice. A review and examination of previous learning will be included.

Note: Taken in preparation for the comprehensive examination.

Credit/No Credit

EDC 551. Master's Project - Counseling - Plan B. 3 Units

Prerequisite(s): Advanced to candidacy. All course requirements in Counselor Education and EDC 505.

Term Typically Offered: Fall, Spring

Completion of a project approved for the Master's degree.

Note: Department petition is required the semester prior to enrollment.

EDD 600. Transformational Leadership. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Designed to engage students in understanding, implementing, and evaluating strategic leadership practices based on various theories, models, and approaches for achieving organizational transformation. Students will become skilled facilitators of the organizational transformation process by initiating, implementing, sustaining, and evaluating transformation/change efforts. Students will build a solid foundation through the integration of theory and practice in order to implement a planned change process in their home institution.

EDD 601. Organizational Leadership. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Builds and expands on candidates' knowledge of systems thinking, personal and organizational behaviors, and leadership approaches to the change process. Candidates will demonstrate ethical thinking and action in organizational settings by re-conceptualizing leadership roles and organizational structures. In coursework and related fieldwork components students will apply concepts and theories to improving their respective educational institutions. Among the interactive pedagogies used are: case studies, experiential exercises, dialogue and group activities.

EDD 602. Policy and Practice for Educational Leaders I. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Develops in students the skills for informed analysis of educational policy in order to positively influence the educational policy in the K-12 or community college setting. In addition to studying the historical perspectives pertaining to educational policy, practice, and reform, students will investigate the mission of public education. Students will also study governance and inter-governmental relations through contemporary policy development with particular reference to current law, local board policy, shared governance, and working with a variety of constituencies.

EDD 603. Policy and Practice for Educational Leaders II. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Designed to engage students in critical analyses of policy at the local, state, national, and international levels. Specific California and federal policy environment structures and processes will be examined. Students will learn about how public policy is generated, potential consequences, ethical dilemmas, social justice, and equity issues.

EDD 604. Introduction to Educational Research. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.

Term Typically Offered: Fall only

This course will introduce students to the uses of qualitative and quantitative data analysis by educational leaders for the purpose of improving student and organizational outcomes. In addition, the student will be introduced to qualitative, quantitative and mixed-methods research designs in preparation for conducting independent research and designing a doctoral dissertation. This course will also enable students to critically understand and critique various forms of data and apply it appropriately to a variety of educational issues.

EDD 605. Qualitative Research Methods. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.

Term Typically Offered: Spring only

This course is designed to provide doctoral students with instruction in qualitative research approaches as applied to questions of educational leadership and policy. The course will emphasize individual and group interviewing as techniques for qualitative study data collection as well as coding and analysis of qualitative data. This course is particularly useful for doctoral students who plan to conduct a qualitative or mixed method dissertation related to an educational leadership and/or policy topic.

EDD 606. Quantitative Research Methods. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program.

Term Typically Offered: Fall only

This course will introduce educational leaders to concepts in quantitative research in preparation for conducting independent research. This course will enable students to critically understand, critique, and develop quantitative research methodology and apply it appropriately to various educational issues.

EDD 607. Community and Communication in Educational Leadership. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Presents theories and frameworks concerning organizational, interpersonal, and cross-cultural communication in educational and community contexts. Includes developing written and verbal skills for specific contexts, including strategic planning, evaluation, presentations, formal and informal texts, technology, crisis management, and public relations. Through research and practical application, enhances communication skills needed for creating inclusive systems and positive results for all stakeholders.

EDD 608. Diversity and Equity in Complex Organizations. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Designed to engage students in self introspection of awareness and advocacy in applying theoretical frameworks and research to promote equitable, excellence in schooling. Students will demonstrate the ability to develop cross-cultural relationships across multiple constituents for the purpose of improving students performance and promoting social justice. Students will develop the capacity to be courageous change agents in assuring academic excellence for all students.

EDD 609. Human Resource Management for Educational Leaders. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Examines how to manage human resources effectively in the dynamic legal, social, and economic environment currently impacting educational institutions. Among the topics included are: formulation and implementation of human resource strategy, job analysis, methods of recruitment and selection, techniques for training and development, performance appraisal, compensation and benefits, and the evaluation of the effectiveness of human resource management frameworks and practices. Class participants will be expected to demonstrate understanding of Human Resource Management (HRM) competencies through assignments, exercises and case analyses.

EDD 610. Curriculum and Instruction Issues for Educational Leaders. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Presents curriculum and instruction from a leadership perspective within the contexts of K-12 schools and community colleges. Students examine contemporary issues in school curriculum, including policy initiatives and reform efforts affecting curricular decision-making. Prepares students to analyze and design appropriate strategies for implementing and evaluating district and school curricula and to investigate the implications of curricula for educational programming. Students also learn specific foundations and procedures for professional development that have well-documented effects on student achievement.

EDD 611. Legal Issues for Educational Leaders. 2 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Examines key legal issues that govern daily and long-range decisions of educational leaders. Focuses on understanding California and federal codes, case law, policies, and significant precedent and will emphasize analysis of key legal concepts and application of law to major areas including finance, personnel, risk management, curriculum, student services, teacher rights, torts, students rights, and access. Examines trends in law and the initiation and influence of educational law to positively influence educational institutions.

EDD 612. Student Services in Education. 2 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Provides a comprehensive insight into the student services. It addresses both practical and theoretical perspectives intended to build a sense of vision and passion to transform the profession of student affairs and leadership. In particular, examines four distinct arenas: 1) historical and philosophical foundations of student affairs and leadership 2) management and organizational issues, 3) essential skills and professional development in building an equitable organization, and 4) the synthesis of practice and theory.

EDD 613. Finance and Budget for Educational Leaders. 2 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Term Typically Offered: Fall, Spring

Analyzes two related topics with respect to public educational institutions: funding and internal budget management. Provides a state and national overview of the economics and finance of K-12 and higher education, including private and public benefits of education, methods of financing public education, and contemporary policy issues regarding school and college finances. Focuses on how educational leaders can most effectively manage resources to further the vision, goals, and philosophy of the organization.

EDD 614. Issues in Educational Leadership: Synthesis and Application. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Program and instructor permission.

Term Typically Offered: Fall, Spring

This problem based seminar integrates the three themes of the program. Includes conducting a review of the literature that will later be integrated into the candidates' proposal. In addition, each student will study and select theoretical frame/s that supports their doctoral topic. Students will also work in teams formed by research interests. They will present findings to classmates in forums that they facilitate and they will critique each other's work.

EDD 615. Dissertation Proposal Seminar. 6 Units

Prerequisite(s): Passed Ed.D. Qualifying Examination and instructor permission.

Term Typically Offered: Fall, Spring

Provides faculty and peer guidance in preparation of material to develop the dissertation proposal. Students will be guided in the clarification of dissertation topic, familiarization with relevant literature, and the development of a sound methodology. Students will learn how to critically analyze and provide constructive criticism to key research components proposed by others. At the end students are expected to complete the first three chapters of their dissertation in anticipation of their dissertation defense.

EDD 616A. Dissertation I - Seminar. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Corequisite(s): EDD 616B.

Term Typically Offered: Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program. This course provides a 3 unit seminar in support of the first phase of the dissertation.

Note: Students must have passed their qualifying examination and successfully defended their dissertation proposal.

Credit/No Credit

EDD 616B. Dissertation I - Research and Writing. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission.

Corequisite(s): EDD 616A

Term Typically Offered: Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

Note: Students must have passed their qualifying examination and successfully defended their dissertation proposal.

Credit/No Credit

EDD 617. Dissertation II. 6 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and completion of EDD 616 and instructor permission.

Term Typically Offered: Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

EDD 617A. Dissertation II - Seminar. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission. EDD 616A.

Corequisite(s): EDD 617B.

Term Typically Offered: Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program. This course provides a 3 unit seminar in support of the second phase of the dissertation.

Note: Students must have passed their qualifying examination and successfully defended their dissertation proposal

Credit/No Credit

EDD 617B. Dissertation II - Research and Writing. 3 Units

Prerequisite(s): Admission into the Ed.D. in Educational Leadership Program and instructor permission. EDD 616B.

Corequisite(s): EDD 617A.

Term Typically Offered: Fall, Spring

Each candidate will work with a dissertation advisor (dissertation committee chair) to conduct independent research leading to the completion of a dissertation. Twelve units of dissertation study will be required for completion of the program.

Note: Students must have passed their qualifying examination and successfully defended their dissertation proposal.

Credit/No Credit

EDGR 210. Contemporary Issues in Education: Curriculum and Social Emotional Well Being of Students. 3 Units
Term Typically Offered: Fall, Spring

This course examines contemporary issues in education, with special attention to the social, cultural, political, economic, and institutional dynamics of educational processes and the impacts on students, schools, and communities. Fulfilling the mission of the Masters programs and the College of Education vision, the course focuses on preparing students to become social change agents in schools and communities. Topics covered will fit into the two threads of (a) curriculum and (b) social emotional well-being of students.

EDGR 211. Contemporary Issues in Education: Context of Schooling and Leadership. 3 Units
Term Typically Offered: Fall, Spring

This course examines contemporary issues in education, with special attention to the social, cultural, political, economic, and institutional dynamics of educational processes and the impacts on students, schools, and communities. Fulfilling the mission of the Masters programs and the College of Education vision, the course focuses on preparing students to become social change agents in schools and communities. Topics covered will fit into the two threads of (a) context of schooling and (b) leadership.

EDGR 220. Issues in New Literacies throughout the Lifespan. 3 Units
Term Typically Offered: Fall, Spring

This course examines contemporary issues in literacy. The course introduces students to pedagogies and politics of new literacies within a variety of contexts: academic, new literacy studies, technology literacy, cultural, family, community, and workplace literacy. From a frame of literacy/illiteracy, students examine its connections with economic, political, social, occupational, education, governmental, and cultural change. Students will study how literacy programs are organized and implemented, examine research on the rationale for literacy, including the connection between literacy and healthy, livelihoods, empowerment, community development and cognitive skills.

EDGR 260. Writing and Research Across the Disciplines. 3 Units
Prerequisite(s): Admission to graduate program in the College of Education or instructor permission
Term Typically Offered: Fall, Spring

Orientation to graduate study design to introduce students to research within their field of study and across disciplines in the College of Education. Overview of qualitative and quantitative methods and basic statistical concepts. Focus on writing to communicate evidence-based knowledge in a professional manner using APA style. Includes research presentations, active discussion, critical reading, and analytical writing with some activities.

Note: This course serves as a foundation for further study and must be taken prior to 250. This course satisfies the GWI requirement.

EDGR 287A. Seminar in Culminating Experience Exploration and Design. 1 Unit
Term Typically Offered: Fall only

Explore and identify potential Culminating Experience project topics in instructional design and/or educational technology trends and issues through surveys of published research, discussions, and presentations with peers and professionals. Compare and contrast existing literature and research, identify trends, recognize real-world best practices, and explore underlying factors contributing or relating to your Culminating Experience topic of interest.
 Credit/No Credit

EDGR 287B. Seminar in Culminating Experience Development and Proposal. 2 Units
Prerequisite(s): EDGR 287A
Term Typically Offered: Spring only

Discuss, develop and propose a Culminating Experience project in instructional design and/or educational technology based on prior exploration and identification of topics and issues. Develop program ePortfolio.
 Credit/No Credit

EDLP 200. Diversity and Equity in Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

The primary objective of this course is to prepare future education administrators to lead for a just, equitable, and inclusive education in all educational environments.

EDLP 200A. Diversity and Equity in Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Primary objective is to provide a learning environment conducive to the development of knowledge, understanding and skills consistent with Multicultural Education and pluralistic philosophy. It will examine the advantages and complexities of a strategic approach to school and community relationships. Content will focus on public policy formation; community education role of culturally and linguistically diverse groups; current recommendations and emerging issues as they relate to the role of the school, family, and community in the ongoing debate of school reform.

EDLP 201. Foundations of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

An introduction to theory and practice of educational leadership at the local, state, and federal levels. Specifically, students will examine strategies and techniques to effectively lead schools and other educational settings in the 21st century.

EDLP 201A. Foundations of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

Introduction to theory and practice of educational administration at the local, state, and federal levels including but not limited to the structure and function of administration, organizational behavior, interpersonal relationships, trends affecting contemporary practice, and the changing nature of school reform. Designed to encourage introspection and the reflective process to examine students' values, beliefs and needs. Students will examine strategies for integrating new information and experiences into their evolving professional knowledge base.
Note: May be taken twice for credit (Adm Credential Interns).

EDLP 202. School Law and Ethics of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

The study of school law and ethical decision making as it applies to school leadership including federal and state decisions affecting the educational setting.

EDLP 202A. Legal Basis of Education. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Study of school law as set forth in the common law, state, and federal constitutions, statutes, judicial decisions, and in the rules and regulations of state departments and local units of administration.

EDLP 203. Foundations of Educational Leadership. 3 Units
Term Typically Offered: Fall, Spring

School finance with focus on the State of California school system.

EDLP 203A. Financial Resources Planning and Allocation. 3 Units
Prerequisite(s): EDLP 201
Term Typically Offered: Fall, Spring

School finance and business administration with focus on the California school system.

EDLP 205. Instructional Leadership. 3 Units
Term Typically Offered: Fall, Spring

Instructional leadership that focuses on the diverse needs of students through the collection and analysis of data, state standards, accountability systems and culturally relevant pedagogy. Theory and practice will be explored on the best practice of supervisory techniques, classroom observation, and teacher improvement.

EDLP 205A. Curriculum and Instructional Leadership in K-12 Schools. 3 Units

Prerequisite(s): EDLP 201
Term Typically Offered: Fall, Spring

Focuses on the significance of instructional leadership in the design and implementation of curriculum leading to high achievement for all students in K-12 schools. Particular attention will be given to current state and federal school accountability requirements, standards-based curriculum, the use of disaggregated student achievement data to design an instructional program appropriate to and effective for a diverse student population, and best research-based instructional practices.

EDLP 206A. Supervision and Leadership. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program and instructor permission.
Term Typically Offered: Fall, Spring

Supervisory theory and technique, including assessment of educational innovations, supervision of teaching, development of strategies for in-service programming, and the roles of various groups and individuals in the improvement of instruction.

EDLP 208A. School Leadership/Management. 3 Units
Prerequisite(s): Admission to the Educational Leadership Program
Term Typically Offered: Fall, Spring

Examination, synthesis, and application of contemporary leadership/management theory and processes at the site or unit level; consideration given to the expanding roles and current requirements in the administration of educational enterprises. Lecture three hours per week.

EDLP 209. Organizational Systems and Human Resources. 3 Units
Term Typically Offered: Fall, Spring

Students will engage in examination, synthesis, and application of human resources and management practices necessary to effectively serve as school leader in P-12 educational setting.

EDLP 209A. Human Resources and Supervision. 3 Units
Term Typically Offered: Fall, Spring

Examines human resources and personnel practices in educational organizations. Key themes and issues in personnel will be presented with broad assumptions regarding dominant practices and their application to establishing positive human relations.

EDLP 221. Foundations in Higher Education Leadership. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Analyzes higher education including its historical, political, philosophical and social aspects with emphasis upon the implications of crucial issues for leaders in higher education. An examination of the historical origins of contemporary practices and discourse and an analysis of the complex relationships between society and institutions of higher education: patterns of governance and coordination; diversity; overview of organizational and administrative structure; faculty; curriculum; student affairs, policy, and demographic trends.

EDLP 222. Diversity in Higher Education. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Engages participants in a process of inquiry and reflection through self-critique, peer critique, and the dialogical examination of our assumptions, ideas, and understandings that promote intellectual growth. Participants will examine and discuss the literature, research, and discourse concerning theory, policy, and practice about diversity and its relation to higher education.

EDLP 223. Advanced Seminar: Student Affairs Leadership. 3 Units
Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.
Term Typically Offered: Fall, Spring

Administration of student services and student affairs in colleges and universities. Principles that guide professional practice and decision making will be explored, as will the roles and responsibilities of student affairs professionals. Students will have the opportunity to explore current and future issues and directions in student services.

EDLP 224. Advanced Seminar: Dynamics of Organizational Change. 3 Units
Term Typically Offered: Fall, Spring

Students will engage in examination, synthesis, and application of theories of change, organizational problem solving, planning and evaluation and change management. An exploration of administrative roles and responsibilities.

EDLP 225. Advanced Seminar: Ethical Decision Making. 3 Units

Prerequisite(s): Admission to the Master of Education: Higher Education Leadership Option.

Term Typically Offered: Fall, Spring

Links analysis with action through a survey of the ethical, legal, and professional issues facing the public or private education administrator. Underlying decision making is to understand the basic nature of the academic enterprise and apply social and moral values to the management of higher education and ethical decision making.

EDLP 226. Workforce Development Professional Competencies. 3 Units

Term Typically Offered: Fall, Spring

Explores the foundational and professional competencies of workforce education and development in the context of educational institutions, business and industry, government, NGOs, and economic development at the national and local/regional level. Introduces the field and practice of human resource development in the workplace.

EDLP 227. Leading the Way for Student Success: Student and Instructional Services. 3 Units

Term Typically Offered: Fall, Spring

Participants will explore changing demographics, accountability regarding statewide mandates, reporting regulations, and accreditation, new technology and other factors impacting California's community college student services programs and professionals. Gain an understanding of the philosophy and mission of student services initiatives and programs and student development theory. Examine the role of faculty as leaders in curriculum, instruction and assessment and student success. Understand the purposes and uses of research and technology to address student outcomes, teaching and learning, institutional effectiveness, and decision-making.

EDLP 228. Innovative Leadership: Strengthening Organizational Capacity. 3 Units

Term Typically Offered: Fall, Spring

California higher education leaders are presented with increased legislative and public pressure for accountability while in an era of chronic and disparate under-funding of the system. Understand the relationship between higher education finance and the overall fiscal operations of California's higher education systems.

EDLP 229. Adult Education and Learning. 3 Units

Term Typically Offered: Fall, Spring

Explores the historical and philosophical foundations of the field of adult education and learning. Contemporary applications of adult learning theories and practices are explored to provide a broad understanding of andragogy (the art and science of teaching adults) and how it relates to workforce development and other related fields (e.g., career and technical education, human resource development).

EDLP 230. Master of Arts Thesis/Project Seminar. 3 Units

Prerequisite(s): EDLP 250 and advancement to candidacy.

Term Typically Offered: Fall, Spring

This individualized seminar is designed to extend research knowledge, and provide direction in the use of library/professional education resources, as well as exposure to sample theses and projects using APA style. Reviews research methods and a review of the literature and provides instruction in the appropriate academic writing style and format for academic presentations.

Credit/No Credit

EDLP 250. Education Research. 3 Units

Prerequisite(s): Admission into the EDLP Program.

Term Typically Offered: Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Establishes and improves students' professional and academic writing skills in preparation for leadership duties. Classified students are encouraged to take this course early in their graduate programs.

Note: Graduate Writing Intensive (GWI) course.

EDLP 255. Field Experience Seminar. 3 Units

Prerequisite(s): Completion of 12 units including EDLP 200, EDLP 201, and either EDLP 205 or EDLP 206A for Preliminary Administrative Services Internship Credential students only.

Corequisite(s): EDLP 401 and/or EDLP 402 for Administrative Services Credential students only.

Term Typically Offered: Fall, Spring

Experience and practice in observation and analysis of school environment, including disaggregated student achievement data.

Note: Intern Students are allowed to take class twice and can take course concurrently with EDLP 401 and EDLP 402.

Credit/No Credit

EDLP 270. Advanced Seminar: Applied Leadership and Staff Teambuilding. 3 Units

Prerequisite(s): Graduate level status within the School of Education and instructor permission.

Term Typically Offered: Fall, Spring

Develop a comprehensive theoretical/conceptual framework from which to view current research surrounding Organizational Leadership and Staff Teambuilding. Special emphasis will be on providing students with experiential learning activities beyond the classroom and incorporate challenging outdoor components. Students will develop a resource portfolio relevant to their unique work situations.

EDLP 273. Advanced Seminar: Grants, Proposals and Systematic Planning. 3 Units

Term Typically Offered: Fall, Spring

Systematic planning theory and skills with particular attention to use of these skills in the development of grant proposals. Students will use funding agency regulations and guidelines relative to program development and implementation, and will develop a proposal which may be submitted to a funding agency.

Credit/No Credit

EDLP 277. Advanced Seminar: Assessment. 2 Units

Prerequisite(s): Admitted into the Professional Administrative Credential.

Term Typically Offered: Fall, Spring

Engage participants in a process of ongoing assessment of their administrative practice as school leaders. Such ongoing assessment uses multiple points of data, multiple sources of information, and multiple feedback sources such as colleagues and mentors.

Credit/No Credit

<p>EDLP 286. Advanced Seminar: Supervision and Leadership. 3 Units Prerequisite(s): Admission to the Educational Leadership Program, EDLP 206A, instructor permission. Term Typically Offered: Fall, Spring</p> <p>Through lecture and discussion, philosophical and practical problems of supervision of instruction will be explored. Current research on effective teaching, staff development, supervisory techniques, and theories of learning for both students and adults will be examined as a basis for sound supervision practices.</p> <p>EDLP 292. Advanced Seminar: Current Topics in Educational Leadership and Policy Studies. 3 Units Term Typically Offered: Fall, Spring</p> <p>Selected current topics of concern to those involved with the administration of schools and other educational systems. Credit/No Credit</p>
--	---

- EDLP 414. Supplemental Internship Experience. 6 Units**
Corequisite(s): EDLP 404.
Term Typically Offered: Fall, Spring
- Fourth semester of the supplemental internship experience. Provides first-hand visitations and experiences in various educational and community agencies at state, county, district, and local school levels; additional supervised experience for candidates; and seminar experiences in observation and analysis of school environments for candidates for the Preliminary Administrative Services Internship Credential.
 Credit/No Credit
- EDLP 495A. Field Study in Educational Leadership. 3 Units**
Prerequisite(s): Admission to Educational Leadership Program; completion of twelve (12) units of EDLP coursework, including EDLP 255; approval of faculty advisor.
Term Typically Offered: Fall, Spring
- On-the-job experience in which the candidate assumes responsibility for observation and analysis of school environments including leadership responsibilities, supervision of instructional program, and overall school climate.
 Credit/No Credit
- EDLP 495B. Field Study in Educational Leadership. 3 Units**
Prerequisite(s): EDLP 495A
Term Typically Offered: Spring only
- Students will participate in leadership driven field experience at a TK-12 educational setting. The leadership activities will be purposefully planned to ensure the student engages in work that supports their learning as a future/current leader while simultaneously supporting the educational setting with their initiatives.
 Credit/No Credit
- EDLP 498. Advanced Administrative Field Experience. 8 Units**
Prerequisite(s): Admission to Professional Administrative Services Credential Program and full-time employment as a school administrator.
Term Typically Offered: Fall, Spring
- Candidates for the Professional Administrative Services Credential are supervised in full-time administrative roles by sponsoring employment agency and university faculty.
 Credit/No Credit
- EDLP 500A. Master of Arts Thesis/Project. 3 Units**
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring
- Completion of a thesis or project approved for the Master's degree.
- EDLP 500B. Master of Arts Thesis/Project. 3 Units**
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.
Term Typically Offered: Fall, Spring
- Completion of a thesis or project approved for the Master's degree.
- EDS 140. Introductory Behavioral Statistics. 3 Units**
Term Typically Offered: Fall, Spring
- Descriptive and interpretative statistics in education and allied fields. Use of calculators and statistical tables. Lecture three hours.
- EDS 201. Legal Aspects of Special Education. 3 Units**
Term Typically Offered: Fall, Spring
- Legislative provisions related to implementation of special education programs and procedures will be a primary focus. Additional emphasis will be given to pertinent judicial decisions and to law as it relates to special education in a multicultural context.
- EDS 202. Seminar in Neurodevelopmental Disabilities. 3 Units**
Term Typically Offered: Fall, Spring
- Examines topics and issues in neurodevelopmental disabilities and includes educational, clinical, habilitative, therapeutic, and medical perspectives. Focuses on collaborative, interdisciplinary perspectives on educational and related interventions with students who have neurodevelopmental disabilities.
- EDS 203. Seminar for Resource Specialists: Management and Delivery of Services. 3 Units**
Prerequisite(s): EDS 201, EDS 101 and Special Education Credential.
Term Typically Offered: Fall, Spring
- Review of literature, and simulated experience in the various roles of the resource specialist in special education programs in the schools. Professional problem-solving strategies; standards and procedures; model program organizational alternatives; management approaches of resource specialist program (RSP); major developments and trends at Federal, State and local levels; references to legal provisions, rules and regulations in special education.
 Credit/No Credit
- EDS 213A. Mathematics Curriculum and Instruction in Inclusive Classrooms. 2 Units**
Corequisite(s): EDS 213B.
Term Typically Offered: Fall, Spring
- Prepares Mild/Moderate/Severe and multiple subject teacher candidates to teach mathematics content standards for California public schools. Prepares teacher candidates with the knowledge of basic principles and strategies related to mathematics education. Candidates develop, implement, and evaluate math curricula appropriate for those students receiving special education services with mild/moderate/severe disabilities. Expanded treatment of mathematics pedagogy, manipulative, technological supports, accommodations, inclusive instructional techniques, and strategies specially suited in instruction of English language learners and students with disabilities. Prerequisite: Admittance to Mild/Moderate or Moderate/Severe Credential Program or permission of respective special education coordinator.
- EDS 213B. Mathematics Curriculum and Instruction in Inclusive Classrooms Lab. 1 Unit**
Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential Program or permission of respective special education coordinator.
Corequisite(s): EDS 213A.
Term Typically Offered: Fall, Spring
- Field-base practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 213A) in a setting for students who receive special and/or general education services.
 Credit/No Credit

EDS 214A. Social Science Curriculum and Instruction in Inclusive Classrooms. 2 Units

Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.

Corequisite(s): EDS 214B.

Term Typically Offered: Fall, Spring

Prepares mild/moderate/severe and multiple subject teacher candidates to teach history-social science content standards for California public schools to all students, including English Learners and students with disabilities; to use analytical and critical thinking skills in history and social science; and to integrate history-social science topics, themes and concepts with other subject areas. Pedagogical topics include the use of timelines, maps, and artifacts, case studies, simulations, literature, art, multiple perspectives, SDAIE, cooperative projects, and research activities.

EDS 214B. Social Science Curriculum and Instruction in Inclusive Classrooms Lab. 1 Unit

Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator.

Corequisite(s): EDS 214A.

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 214A) in a setting for students who receive special and/or general education services.

Credit/No Credit

EDS 215A. Science Curriculum and Instruction in Inclusive Classrooms. 2 Units

Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator

Corequisite(s): EDS 215B

Term Typically Offered: Fall, Spring

Prepares mild/moderate/serve and multiple subject teacher candidates to teach science content standards for California public schools to all students. Give participants the knowledge of basic principles and strategies related to science education appropriate for general education (k-8) teacher candidates. Participants will also develop, implement, and evaluate science curricula appropriate for those students with mild/moderate/severe disabilities. This includes an expanded treatment of science pedagogy, manipulative, technological supports, accommodations, inclusive instructional techniques, and other strategies specially suited to the instruction of English Learners and students with disabilities.

EDS 215B. Science Curriculum and Instruction in Inclusive Classrooms Lab. 1 Unit

Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education coordinator

Corequisite(s): EDS 215A.

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 215A) in a setting for students who receive special and general education services.

Credit/No Credit

EDS 217. Positive Behavioral Support: Effective Individual, Class-wide and School-wide Applications (Moderate). 3 Units

Prerequisite(s): EDSP 119, EDSP 205, EDSP 206, EDSP 207, EDSP 208, EDSP 216, EDSP 216B, EDSP 220, EDSP 235, EDS 291A, EDS 291B, EDSP 413 - or equivalents.

Corequisite(s): EDSP 414 or advisor approval.

Term Typically Offered: Fall, Spring

Students will learn to use positive behavioral supports to enhance the quality of life for individuals with serious behavioral challenges. Using the research-based methods and materials from the National Rehabilitation Research and Training Center on Positive Behavioral Support, provides the student with a thorough background in functional assessment and the design of positive behavioral support plans which are in compliance with both state (Hughes Bill) and federal (IDEA) law. After individual assessment and support plans have been covered, moves to class-wide methods of positive behavioral support and school-wide methods. The content is research-based.

EDS 222. Perspectives Workforce Dev. 3 Units

Term Typically Offered: Fall, Spring

Examines the premises of workforce development and advocacy with emphases on adult learning styles and learning communities. Explores the specific needs of the formal and informal vocational, technical and adult learning community in an ever-changing work environment.

EDS 223. Organization Learning Comm. 3 Units

Term Typically Offered: Fall, Spring

EDS 224. WF Assess+Accountability. 3 Units

Term Typically Offered: Fall, Spring

EDS 226. Resource Enhance For WDA. 3 Units

Term Typically Offered: Fall, Spring

EDS 227. Issues Impacting WDA. 3 Units

Term Typically Offered: Fall, Spring

EDS 228. Sem:Future Workforce Dev. 3 Units

Term Typically Offered: Fall, Spring

EDS 231. Group Process in School Psychology. 3 Units

Term Typically Offered: Fall, Spring

Designed to equip students with the group process skills and understanding essential to the practice of school psychology. Focus on both developing counseling groups within the schools and on the understanding of group process necessary to being an effective agent in the school setting. Topics include the logistics of working within a school system, balancing groups, soliciting referrals, sharing information, participating in staff meeting, and facilitating parent teacher and other school level meetings such as Individualized Education Program Planning meetings.

EDS 239. Education Specialist Seminar. 3 Units

Prerequisite(s): Approval as a candidate in the Education Specialist program, completion of courses required for the School Psychology Internship credential, approval of advisor, and department petition.

Term Typically Offered: Fall, Spring

Explores leadership roles of school psychologists.
Credit/No Credit

<p>EDS 240. Functional Assessment of Behavior. 3 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Assessment of behaviors using the techniques of applied behavior analysis. Students will learn how to do functional assessments of behavior. Methods appropriate for assessment of children in the school setting are emphasized.</p>	<p>EDS 243B. Assessment Practicum. 3 Units Prerequisite(s): EDS 243A Corequisite(s): EDS 247 Term Typically Offered: Fall, Spring</p> <p>Advanced practice in administration, scoring, and interpretation of tests taught in EDS 242A-B, EDS 243A, EDS 244, and EDS 247. Students will be assigned five to seven cases (with some cases in Fieldwork placements). Development of skills in assessment, analysis of data, intervention planning and conveying results orally and in writing. Note: Taken concurrently with EDS 247, unless granted special permission of faculty.</p>
<p>EDS 241. Counseling and Psychotherapy for School Psychologists. 3 Units Corequisite(s): EDS 440. Term Typically Offered: Fall, Spring</p> <p>Examination of basic theories of counseling and therapy used by school psychologists, with emphasis on children and youths in an educational setting and their families. Refinement of one's own counseling orientation is required.</p>	<p>EDS 243C. Assessment Practicum. 3 Units Prerequisite(s): EDS 243B Term Typically Offered: Fall, Spring</p> <p>Continued training in development of advanced skills in administration, scoring, and interpretation of tests taught in EDS 242 A-B, EDS 243A, EDS 243B, EDS 244, or EDS 247. Students will be assigned cases by the practicum supervisor as appropriate. Students are expected to successfully engage in all stages of assessment process with clients. Note: Taken with permission of faculty after completion of EDS 243A and EDS 243B.</p>
<p>EDS 242A. Cognitive Assessment. 3 Units Corequisite(s): EDS 242B. Term Typically Offered: Fall, Spring</p> <p>Designed to introduce prospective school psychologists to both theory and practice in the assessment of cognitive abilities. Students will be exposed to various approaches to cognitive assessment including information processing, CBA, dynamic, and psychometric. Students will learn to administer and interpret major standardized cognitive assessment instruments including the WISC-R, WAIS-R, Stanford-Binet FE, K-ABC, and others. Lecture.</p>	<p>EDS 244. Social, Emotional and Behavioral Assessment. 3 Units Prerequisite(s): EDS 242A and EDS 242B. Corequisite(s): EDS 243. Term Typically Offered: Fall, Spring</p> <p>Examines social/emotional assessment strategies and instruments appropriate for working with students in schools. Topics include clinical interviewing, social-emotional functioning, conduct disorder, and effective report writing. Students use course information during concurrent enrollment in EDS 243: Assessment Practicum. Note: Must be admitted to School Psychology Program.</p>
<p>EDS 242B. Cognitive Assessment Lab. 4 Units Corequisite(s): EDS 242A. Term Typically Offered: Fall, Spring</p> <p>Clinic based practice lab. Lab will be a synthesis and application of course content in the assessment of cognitive function. Students will be assigned clients for purposes of administering, scoring, evaluating and reporting assessment data.</p>	<p>EDS 245. Psychology In The Schools. 3 Units Prerequisite(s): Must be admitted to School Psychology Program. Term Typically Offered: Fall, Spring</p> <p>Overview of psychology in the schools. Topics include school systems, program development, service delivery models and the role of the school psychologist. Students will engage in systematic school observations.</p>
<p>EDS 243. Assessment Practicum. 3 Units Term Typically Offered: Fall, Spring</p> <p>Administration, scoring, and interpretation of tests taught in EDS 242A-B, EDS 244, or EDS 247. Students will be assigned five to seven cases. They will assess the children, meet with the families to gather history, and render interpretation. Note: Must be taken concurrently with EDS 242A, EDS 242B, EDS 244, and EDS 247. May be taken twice for credit.</p>	<p>EDS 246A. Preventive Academic Interventions. 3 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Study and application of various primary, secondary, and tertiary academic interventions designed to prevent school failure and/or learning challenges. Examines techniques of identifying pupils who are experiencing academic difficulties that interfere with school functioning, and intervention techniques designed to remediate or ameliorate these problems.</p>
<p>EDS 243A. Assessment Practicum A. 3 Units Term Typically Offered: Fall, Spring</p> <p>Administration, scoring, and interpretation of tests taught in EDS 242A and B and EDS 244. Students will be assigned five cases. They will assess the children, meet with the families to gather history, and render interpretation. Note: Taken concurrently with EDS 244, unless granted special permission of faculty.</p>	

- EDS 246B. Preventive Mental Health Interventions. 3 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Study and application of various primary, secondary, and tertiary psychological interventions designed to prevent school failure and/or emotional challenges. Examines techniques of identifying pupils who are experiencing mental health difficulties that interfere with school functioning, and intervention techniques designed to address these problems.
- EDS 247. Assessment of Special Needs. 3 Units**
Term Typically Offered: Fall, Spring
- Assessment of client behavior using formal and non-formal methods based on neuropsychological principles. Students will learn to use interview techniques, standardized cognitive and projective tests, and neuropsychological screening procedures to assess students with special needs. Report writing, parent conferences, and consultation strategies will be stressed.
- EDS 248. Human Development and Learning. 3 Units**
Term Typically Offered: Fall, Spring
- Cognitive, socio-emotional and personality development through the lifespan (with emphasis on birth through early adulthood) as influences on the learning process. Includes analysis of theories, empirical research and current issues in human development and learning as applied to school learning.
- EDS 249. Special Seminar: School Psychology. 1 - 3 Units**
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Departmental petition required.
- Credit/No Credit
- EDS 252A. Advanced Teacher Induction Seminar. 2 Units**
Prerequisite(s): Admission to Special Education Level II program.
Corequisite(s): EDS 252B.
Term Typically Offered: Fall, Spring
- Leads to the development of a Professional Level II Education Specialist Credential induction plan for the support and professional development of the teacher credential candidate as required by the California Commission on Teacher Credentialing. The candidate, the university advisor, and the employer's representative work together to plan course work, and provide individual assistance, and professional development opportunities to address individual performance goals. Seminar.
 Credit/No Credit
- EDS 252B. Advanced Teacher Induction Seminar Lab. 1 Unit**
Prerequisite(s): Admission to Special Education Level II program.
Corequisite(s): EDS 252A
Term Typically Offered: Fall, Spring
- Level II candidate, university advisor/supervisor and employer's representative work collaboratively to develop a professional plan which relates to the CCTC standards and the individual learning needs of the student. The class is designed as a lab to support the acquisition of all proscribed Level II standards and to support the development of the candidate's professional portfolio for assessment of designated competencies.
 Credit/No Credit
- EDS 264. Seminar in Counseling: Work Evaluation. 3 Units**
Term Typically Offered: Fall, Spring
- Study of the work evaluation process and the modalities utilized, with emphasis on the use of work evaluation in the rehabilitation process.
- EDS 265. Current Issues in Counseling: Disabled. 1 Unit**
Term Typically Offered: Fall, Spring
- Examination of myths regarding the disabled client. Course includes an exploration of counseling families with a disabled member, the impact of disability upon sexuality and upon interpersonal relationships. Factual data will be presented. The student's attitude toward the disabled will be examined.
 Credit/No Credit
- EDS 267A. Advanced Studies in Special Education-Seminar I. 3 Units**
Corequisite(s): EDS 267B.
Term Typically Offered: Fall, Spring
- For candidates accepted into the Level II Alternative Option Program; skills for inservice training, working with paraprofessionals, coordinating meetings, developing consensus, dealing with conflict and serving as part of collaborative teams; e-mail, use of Listproc and attendance at monthly seminars required; attaining and documenting competencies and developing portfolios related to outcomes of the Level II Mild/Moderate or Moderate/Severe Specialist Credential. Lecture.
- EDS 267B. Advanced Studies in Special Education Seminar I Laboratory. 3 Units**
Corequisite(s): EDS 267A.
Term Typically Offered: Fall, Spring
- Will be a synthesis and application of course content (EDS 267A) in a setting(s) for students who receive special education services. The 3-unit lab section requires approximately 90 hours of related field-based and/or on-the-job activities. E-mail/Internet access required.
 Credit/No Credit
- EDS 268A. Advanced Studies in Special Education-Seminar II. 3 Units**
Corequisite(s): EDS 268B.
Term Typically Offered: Fall, Spring
- For candidates accepted into the Level II Alternative Option Program; skills for ongoing individualized assessment and curriculum adaptation to meet needs of diverse populations and advanced skills for behavioral management in inclusive settings; e-mail, use of Listproc and attendance at monthly seminars required; attaining and documenting competencies and developing portfolios related to outcomes of the Level II M/M or M/S Specialist Credentials; individualized planning for candidates who are self-directed and committed to self improvement. Lecture.
- EDS 268B. Advanced Studies in Special Education Seminar II Laboratory. 3 Units**
Corequisite(s): EDS 268A.
Term Typically Offered: Fall, Spring
- Synthesis and application of course content (EDS 268A) in a setting(s) for students who receive special education services. The 3-unit lab section requires approximately 90 hours of related field-based and/or on-the-job activities. E-mail/internet access required.
 Credit/No Credit

EDS 269A. Collaborative Strategies for Inclusive Practice. 2 Units

Prerequisite(s): CCTC Preliminary Multiple or Single Subject credential. Sacramento State graduate status or CCE/Open University enrollee.

Corequisite(s): EDS 269B.

Term Typically Offered: Fall, Spring

For candidates seeking to meet Special Education CCTC requirements for Level 2 (Induction) Multiple or Single Subject Teaching Credentials. Candidates must demonstrate skills for ongoing IDEA and State mandates, curriculum adaptation to meet individual needs, and advanced skills for behavioral management in inclusive settings. All activities will be tied to attaining and documenting CCTC Level 2 special education standards through individual portfolios. Assignments will be designed to emphasize an interdisciplinary perspective to collaborative problem solving. E-mail/Internet access required.

EDS 269B. Collaborative Strategies for Inclusive Practice Lab. 1 Unit

Prerequisite(s): CCTC Preliminary Multiple or Single Subject credential. Sacramento State graduate status or CCE/Open University enrollee.

Corequisite(s): EDS 269A.

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours field). Lab will be synthesis and application of course content in a setting for students who receive special education services. Students will verify experiences across the age-span and in inclusive settings, agencies, and/or other natural environments.

Credit/No Credit

EDS 273A. Instructional Strategies - Mild/Moderate. 2 Units

Prerequisite(s): Admittance into Mild/Moderate Credential or M.A. in Education programs.

Corequisite(s): EDS 273B.

Term Typically Offered: Fall, Spring

Development of knowledge, strategies, and skills in the areas of dyslexia, social skills and transition, and other specific learning challenges for individuals with mild/moderate disabilities.

EDS 273B. Instructional Strategies - Mild/Moderate - Lab. 1 Unit

Prerequisite(s): Admittance into Mild/Moderate Credential or M.A. in Education programs.

Corequisite(s): EDS 273A.

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 273A) in developing instructional strategies for the Mild/Moderate Credential Program area. Students are required to participate in class visitations, student tutoring, and interviews.

Credit/No Credit

EDS 290. Issues in Early Childhood Education for Children with Disabilities. 3 Units

Term Typically Offered: Fall, Spring

Overview of current theories, research, policies and practices regarding educational services for children, from birth to 8, with disabilities and their families. Topics emphasized include typical/atypical development, interdisciplinary assessment, family involvement, community resources, program planning, mainstreaming, and collaborative case management. Requires observations/field study in settings serving young children with disabilities.

EDS 291A. Technology in Special Education. 2 Units

Prerequisite(s): Admittance to Special Education Program or instructor permission.

Corequisite(s): EDS 291B.

Term Typically Offered: Fall, Spring

Offers an overview of technology usage in special education. Topics covered include: current research; identification of needs of exceptional children that can be met through use of microcomputers; evaluation and prescription of software, hardware and assistive devices; writing computer-assisted instructional programs to meet special needs; time management, and the general implementation of microcomputers into a special education program.

EDS 291B. Technology in Special Education Lab. 1 Unit

Prerequisite(s): Admittance to Special Education Program or instructor permission.

Corequisite(s): EDS 291A.

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDS 291A) in technology usage with students who receive special education services.

Credit/No Credit

EDS 299. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects at graduate level especially for students capable of independent study.

Note: Departmental petition required.

Credit/No Credit

EDS 332. Assessment Center Laboratory for Multiple Subject Candidates. 2 Units

Prerequisite(s): Admittance to Mild/Moderate or Moderate/Severe Credential program or permission of respective special education instructor.

Corequisite(s): EDSP 420B or approved equivalent by assigned advisor or department chair.

Term Typically Offered: Fall, Spring

Individual support to guide multiple subject candidates through the process of completing and submitting the culminating PACT Teaching Event and completion of their electronic portfolio. The signature assignments, formative PACT assessments and summative PACT Teaching Event represent a working electronic portfolio embedded throughout the credential program, and the summative component will be polished and formally submitted at the conclusion of the EDS 332.

Credit/No Credit

EDS 412. Student Teaching: Moderate/Severe. 5 - 10 Units

Corequisite(s): EDSP 233. A total of 10 units is required.

Term Typically Offered: Fall, Spring

Students teaching in a cooperating LEA/District providing services for students receiving Moderate/Severe special education program services. Candidates must meet the criteria for student teaching to be accepted to this course.

Note: Approximately 320 hours are required to meet competencies.

Credit/No Credit

EDS 439. Early Fieldwork in School Psychology. 1 - 10 Units**Prerequisite(s):** Satisfactory completion of first year coursework.**Term Typically Offered:** Fall, Spring

Fieldwork experience is designed to allow students to explore roles in public schools and to gain experience in the organization and operation of schools, classrooms, and special services. The field placement allows students to work with pupils in public school settings that offer individual and group counseling; consultation with teachers, parents, and other school staff, and special accommodations for students with special needs. Students will work under the supervision of a credentialed school psychologist or school counselor at local school sites. A faculty supervisor from the School Psychology Training Program will work closely with students and field supervisor.

Note: May be repeated for credit.

Credit/No Credit

EDS 439A. Early Fieldwork in School Psychology. 1 - 10 Units**Prerequisite(s):** Satisfactory completion of first year coursework. Graded:

Credit / No Credit Units: 1.0 - 10.0

Term Typically Offered: Fall, Spring

Fieldwork experience is designed to allow students to explore roles in public schools and to gain experience in the organization and operation of schools, classrooms, and special services. The field placement allows students to work with pupils in public school settings that offer individual and group counseling; consultation with teachers, parents, and other school staff, and special accommodations for students with special needs. Students will work under the supervision of a credentialed school psychologist or school counselor at local school sites. A faculty supervisor from the School Psychology Training Program will work closely with students and field supervisor.

Note: May be repeated for credit.

Credit/No Credit

EDS 439B. Early Fieldwork in School Psychology. 1 - 10 Units**Prerequisite(s):** Satisfactory completion of first year coursework and EDS 439A Graded: Credit / No Credit Units: 1.0 - 10.0**Term Typically Offered:** Fall, Spring

Advanced fieldwork experience providing the opportunity for students to engage in the following activities: individual and group counseling; consultation with teachers, parents, and other school staff, and assessment of students. Students will work under the supervision of a credentialed school psychologist. A faculty supervisor from the School Psychology Training Program will work with students and field supervisor.

Credit/No Credit

EDS 439C. Early Fieldwork in School Psychology. 1 - 10 Units**Prerequisite(s):** Satisfactory completion of first year coursework and EDS 439B Graded: Credit / No Credit Units: 1.0 - 10.0**Term Typically Offered:** Fall, Spring

Ongoing fieldwork experience providing the opportunity for students to more fully develop their skills in: individual and group counseling; consultation with teachers, parents, and other school staff, and assessment of students. Students will work under the supervision of a credentialed school psychologist and a faculty supervisor from the School Psychology Training Program.

Credit/No Credit

EDS 440. Practicum in Individual Counseling/School Psychology. 3 Units**Prerequisite(s):** Approval as a candidate in School Psychology program, approval of advisor, and department petition.**Term Typically Offered:** Fall, Spring

Supervised practice in individual counseling.

Credit/No Credit

EDS 441. Internship in School Psychology. 3 - 15 Units**Prerequisite(s):** Approval as a candidate in the School Psychology program, completion of courses required for the School Psychology Internship credential, approval of advisor, and department petition. May be repeated for credit.**Term Typically Offered:** Fall, Spring

Directed field study for school psychologists. Supervised experiences are arranged in school psychology.

Credit/No Credit

EDS 441A. Internship in School Psychology. 3 - 15 Units**Prerequisite(s):** Approval as a candidate in the School Psychology program, completion of courses required for the School Psychology Internship credential, approval of advisor, and department petition. Graded: Credit / No Credit Units: 3.0 - 15.0**Term Typically Offered:** Fall, Spring

Directed field study for school psychologists. Supervised experiences are arranged in school psychology.

Credit/No Credit

EDS 441B. Internship in School Psychology. 3 - 15 Units**Prerequisite(s):** EDS 441A Graded: Credit / No Credit Units: 3.0 - 15.0**Term Typically Offered:** Fall, Spring

Advanced field study for school psychologists interns. Supervised experiences are arranged in school psychology.

Credit/No Credit

EDS 441C. Internship in School Psychology. 3 - 15 Units**Prerequisite(s):** EDS 441B Graded: Credit / No Credit Units: 3.0 - 15.0**Term Typically Offered:** Fall, Spring

Third semester of advanced field study for school psychologist interns. Supervised experiences are arranged in school psychology.

Credit/No Credit

EDS 441D. Internship in School Psychology. 3 - 15 Units**Prerequisite(s):** EDS 441C Graded: Credit/ No Credit Units: 3.0 - 15.0**Term Typically Offered:** Fall, Spring

Fourth semester of advanced field study for school psychologists interns. Final semester in which candidates may accrue hours. Supervised experiences are arranged in school psychology.

Credit/No Credit

EDS 460. Practicum in Individual Counseling/VRC. 3 Units**Prerequisite(s):** Approval as a candidate in the Vocational Rehabilitation program; approval of advisor, and department petition.**Term Typically Offered:** Fall, Spring

Supervised practice in individual counseling.

Credit/No Credit

EDS 461. Field Study in Counseling/VRC. 3 - 15 Units

Prerequisite(s): Approval as a candidate in the Vocational Rehabilitation program, completion of core courses except EDS 560, EDS 561, or Comprehensive Examination (oral or written), approval of advisor, and department petition.

Term Typically Offered: Fall, Spring

Directed field study for rehabilitation counselors. Supervised experiences are arranged in rehabilitation counseling. Forty hours of experience required for each unit of credit.

Credit/No Credit

EDS 472E. Student Teaching: Serious Emotional Disturbance. 10 Units

Corequisite(s): EDS 277.

Term Typically Offered: Fall, Spring

Students will be placed in approved settings which serve students with serious emotional disturbance as a primary disability; be expected to demonstrate skills for instruction across content areas; interact with emotionally disturbed students using a combination of counseling and behavior management strategies; and consult with families, co-workers, mental health representatives and other in a collaborative style.

Credit/No Credit

EDS 530. Project In WDA I. 2 Units

Term Typically Offered: Fall, Spring

EDS 531. Project In WDA II. 4 Units

Term Typically Offered: Fall, Spring

EDS 540. Education Specialist Thesis: School Psychology. 4 - 6 Units

Term Typically Offered: Fall, Spring

Credit given upon successful completion of a thesis approved for the education specialist degree.

Note: Open only to the graduate students who have been advanced to candidacy for the education specialist degree. Number of units of credit is determined by the candidate's education specialist advisory committee.

Credit/No Credit

EDS 541. Master's Project: Education/School Psychology (Plan B). 4 - 6 Units

Prerequisite(s): Advanced to candidacy.

Term Typically Offered: Fall, Spring

Credit given upon successful completion of a project approved for the M.A. in Education/School Psychology option.

EDS 542. Education Specialist Project: School Psychology. 4 - 6 Units

Term Typically Offered: Fall, Spring

Credit given upon successful completion of a project approved for the Education Specialist degree.

Note: Open only to the graduate student who has been advanced to candidacy. Department petition is required. Number of units of credit is determined by the candidate's advisor.

Credit/No Credit

Certificate of Competency in Educational Technology

Total units required for Certificate: 12

Program Description

A graduate student may earn a certificate in Educational Technology by completing four 3-unit courses. These courses provide the competencies needed by teachers, trainers, or curriculum specialists to integrate technology into the curriculum, scaffold its inclusion in instruction, and disseminate that knowledge via appropriate staff-development needs.

Minimum Grade Requirement

Minimum required GPA: 3.0 for all courses in the certificate program.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
Select one of the following options:		12
Option 1		
EDTE 232	Educational Applications of Computers	
EDTE 233	Teaching Problem-Solving with Educational Technology	
EDTE 234	Curriculum and Staff Development with Educational Technology	
EDTE 235	Enhancing Curriculum with Multimedia and the Web	
Option 2		
EDTE 283	Staff Development and Presentation Applications	
EDTE 284	Problem Solving and Project Development	
EDTE 280A	Fundamentals of Online Pedagogy & Instructional Design	
EDTE 280B	Instructional Design	
Total Units		12

Certificate of Competency in Mathematics Education

Total units required for Certificate: 12

Program Description

A graduate student may earn a Certificate in Mathematics Education by completing the following courses. Enrollment in the Master's program is not required provided that admission requirements are met, including having a teaching credential or being enrolled in a credential program.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
EDTE 220	Seminar in Mathematics Education	3
EDTE 221	Curriculum Development in Mathematics Education	3
EDTE 222	Teaching Mathematics in the Twenty-First Century	3
EDTE 228	Introduction to Ethnomathematics	3
Total Units		12

Certificate of Competency in Reading

Total units required for Certificate: 12

Program Description

A graduate student may earn a Reading Certificate (issued by CCTC) by completing the courses listed below. This certificate authorizes the holder to assess student reading and provide reading instruction in response to those assessments. Reading Certificate holders are also authorized to develop, implement, and adapt the reading content curriculum and assist classroom teachers in these areas. Holders of the Reading Certificate may perform the above services at one or more school sites at the grade levels authorized by their prerequisite teaching credential. Enrollment in the Master's program is not required provided that the following admission requirements are met.

Admission Requirements

- a valid California Basic Teaching Credential (e.g., Multiple Subject or Single Subject Credential);
- a minimum 3.0 grade point average in the last 60 units attempted;
- successful completion of a basic course in the Teaching of Reading from an accredited university; if reading methods course is older than seven years, must show evidence of:
- current staff development in Language and Literacy by participation in workshops, institutes, etc., (Candidates must show documentation); or
- passing the RICA test within the past seven years; and
- completion of the Reading/Language Arts Specialist Credential Application or Reading Certificate (available in Eureka Hall 203 and on the web (<http://www.csus.edu/coe>)).

Teachers must have three years of teaching experience before the Reading Certificate can be awarded.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
EDTE 200	Practicum in Decoding and Fluency: Assessment and Instruction	3
EDTE 201	Practicum in Comprehension: Assessment and Instruction	3
EDTE 203	Teaching and Assessing Writing in the Pre-K through 12 Classroom	3
EDTE 205		3
Total Units		12

Certificate of Competency in Teaching Reading to Adults

Total units required for Certificate: 15

Program Description

The Certificate in Teaching Reading to Adults (TRA Certificate) provides professional preparation and training in the theory and practice of teaching reading to adults. A combination of coursework in reading theory and pedagogy with teaching and/or tutoring experience provides the competencies and skills necessary to teach reading to adults. The program is designed for graduate candidates who expect to teach in community college or adult education settings.

Eligibility Requirements

- Candidates must either be in a graduate degree program at Sacramento State or must apply for graduate admission to the University. Once admitted to Sacramento State, prospective TRA Certificate candidates must apply to the Certificate Coordinator for admission to the program.
- Candidates must take the Writing Placement for Graduate candidates (WPG) or take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secure approval for a WPG waiver.
- International candidates must have a TOEFL score of 600 or higher (or a score of 250 or higher on the computerized TOEFL) and a score of 5 on the Test of Written English.

For further information, contact the Certificate Coordinator, Calaveras Hall 138, (916) 278-6197.

Minimum Grade Requirement

The reading certificate requires 15 units of coursework with a minimum GPA of 3.0.

Program Requirements

Code	Title	Units
Required Courses (15 Units)		
EDTE 205		3
EDTE 207	Advanced Practicum in Reading Difficulties: Assessment and Intervention	3
ENGL 215A	Reading/Vocabulary Acquisition	3
EDTE/ENGL 225C	Theoretical Issues in Adult Literacies	3
ENGL 410L	Internship in Teaching Adult Reading	3
Total Units		15

Doctorate in Education (Ed.D.)

Total units required for Doctorate: 60

Program Description

California legislation (SB 724) authored by Senator Jack Scott and signed into law in 2005 authorized the California State University to offer the doctorate (Ed.D.) in Educational Leadership. The Doctor of Education degree offered by the California State University shall be focused on preparing administrative leaders for California public elementary and secondary schools and community colleges and on the knowledge and skills needed by administrators to be effective leaders in California public schools and community colleges. The Doctor of Education degree offered by the California State University in partnership through with the California public elementary and secondary schools and community colleges shall participate substantively in program design, candidate recruitment and admissions, teaching, and program assessment and evaluation. This degree shall enable professionals to earn the degree while working full time.

The California State University, Sacramento doctoral program represents a collaborative effort between the Educational Leadership & Policy Studies Program and Department of Public Policy and Administration. This program provides an interdisciplinary program of study. It also represents a partnership with area public schools and community

colleges to develop a meaningful course of study and graduate experience.

The program is planned to meet the needs of working professionals who are engaged in the profession of education. Accordingly, the program will incorporate a variety of innovative measures to facilitate student access.

These consist of scheduling courses on a year-round basis, utilizing alternative course formats, including intensive, Friday evening, all-day Saturday, and "in-residence" summer seminars on-campus meeting times, and encouraging students to use their job-related problems as topics for research assignments. The majority of the program classes will be held on the campus of California State University, Sacramento. However, there may be sessions held with partner institutions in public schools and community colleges to host classes as appropriate.

The California State University, Sacramento doctoral program is organized as a cohort-based program. Groups of students admitted each year will take courses together. This creates several distinct advantages of group membership during graduate study which are intentionally fostered in the program:

- Cohorts offer support to candidates and provide opportunities for members to learn from one another.
- Cohorts establish professional ties that often last beyond the doctoral program itself; such networks are valuable in terms of continued professional support and growth.
- Fostering and monitoring candidates' progress is enhanced in cohorts. The group carries with it the expectation that all but the occasional candidate will complete the program successfully, including such standard benchmarks as the qualifying examination, advancement to candidacy, and completion of the dissertation.
- Scheduling an outstanding program of doctoral study can be accomplished more readily for cohorts that have courses in common. Enrollments are predictable, and a course of study can be planned in advance in relation to the availability of highly qualified faculty.

Admission Requirements

The Ed.D. Program admits candidates who meet the academic requirements for the Ed.D. degree program and who possess personal qualities and professional experiences that suggest a strong potential for success as doctoral candidates and as educational leaders in pre K-12 or community colleges.

The Ed.D. Program requires the following of applicants for admission to the doctoral program:

- an earned baccalaureate degree and master's degree or the equivalent from an accredited institution of higher education with a grade point average in upper division and graduate study of 3.0 or above;
- sufficient preparation and experience pertinent to educational leadership to benefit from the program;
- submission of Graduate Record Examination (GRE) scores- from the three sections of the General Test taken within five years of applying to the Ed.D. program;
- demonstrated educational leadership potential and skills including successful experience in school, postsecondary, community, and/or policy leadership;
- demonstrated academic excellence, problem-solving ability, and an interest in critically assessing and bringing about improvements within current educational policies and practices;

- three letters of recommendation attesting to the leadership ability and scholarship of the candidate;
- a written statement of purpose reflecting an understanding of the challenges facing the public schools or community colleges/ institutions of higher education in California;
- a personal interview; and
- a statement of support for the candidate's doctoral studies from his/ her employer or, in cases where this is not provided, an indication of the candidate's plan for meeting the demands of the program and his/her professional responsibilities.

Meeting these minimum requirements qualifies an individual for admissions consideration but does not guarantee admission to the Program. Admission will be granted on a competitive basis.

In any one academic year, a limited number of students may be admitted on an exception basis without meeting one or more of the requirements established for the Ed.D. program. The number of exceptional admissions shall not exceed 15 percent of those students regularly admitted to the campus' Ed.D. program. The intent of this exception provision is to provide for students who demonstrate particular strength in the qualities and characteristics sought for public school or community college leadership and who, at the time of seeking admission to the Ed.D. program, do not meet all the specified requirements.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying. *For more admissions information and application deadlines, please visit the Office of Graduate Studies website* (<http://www.csus.edu/gradstudies>). Prospective doctoral students must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application that can be accessed at Cal State Apply (<https://www2.calstate.edu/apply>);
- one set of official transcripts from all colleges and universities attended, other than Sacramento State.

Applicants who file with the Office of Graduate Studies will receive a confirmation email, including a Sac State ID number and instructions to establish a SacLink Account. Prospective doctoral students must sign in to <https://gradsup.webapps.csus.edu/> with their SacLink login to upload the following documents or forward them to the Ed.D. Program Office in the College of Education

- the Ed.D. program supplemental application;
- GRE results no older than 5 years from date of application;
- written statement of purpose;
- resume detailing education and professional experience;
- one set of transcripts, including Sacramento State;
- three letters of reference (forms attached to the supplemental application).

Unit Requirements

Each candidate will be required to successfully complete 60 semester units of coursework. Each of the first two years call for completion of 18 units during the regular academic year and 6 units during each summer session. The third year of the program calls for completion of the dissertation which will entail 12 units.

The Ed.D. program is designed for completion of the degree requirements within three (3) calendar years (two semesters per academic year and

summer study). The California State University, Sacramento Educational Leadership doctoral program is designed to allow completion of degree requirements within three (3) calendar years and four and a half calendar years (four years and one semester) will normally be acceptable.

Total time to qualifying examination and advancement to candidacy will not exceed three (3) years unless there are mitigating circumstances and the Ed.D. Program faculty has approved the extension; such extension normally may not exceed one year.

Total registered time is not expected to exceed five (5) years, and extension beyond this period requires approval by the Ed.D. Program faculty.

Extension of the period for degree completion beyond the period of five (5) years is normally granted to students in good academic standing, not exceed a two (2) year period. Continuation each term after the extension is granted requires determination of satisfactory progress by the Ed.D. Program faculty.

Extension of the period by more than two years can be granted only under special circumstances and based upon criteria established by the Ed.D. Program faculty. Such extension requires (a) special approval in accordance with the procedures established by the campus and (b) evidence that the student has maintained currency in the field, including demonstrated currency in literature, coursework, and research.

Satisfactory Progress Toward Degree

Each Ed.D. student is expected to maintain satisfactory progress toward the approved academic objectives as defined by the Ed.D. Program faculty and the University. The student is expected to make satisfactory progress in accordance with the Ed.D. cohort structure and program of study through the time of Advancement to Candidacy. This requires that the student complete all courses and examinations satisfactorily and Advance to Candidacy within the period for each specified by the Ed.D. Program faculty. Satisfactory progress further requires that the student pass all required examinations within two attempts.

The normal expectation is that students will attend and participate in all required program components. Students who need to make-up assignments are normally given the opportunity to do so. In the event that a student's lack of attendance/participation would cause him/her to fail to maintain a grade point average of 3.0, the student would be notified and counseled regarding requirements for satisfactory progress toward the degree. Systemwide criteria of satisfactory academic progress are provided in Appendix 5, Title 5 of California Code of Regulations: The Doctor of Education Degree §40512(c).

Students who need to stop-out are typically provided two options. One is to take extra coursework to make up courses missed and return to their original cohort. The second is to join a later cohort that, at the time they return, is taking the classes that they missed.

Criteria for Continuation in the Program

Students must maintain at least a 3.0 cumulative grade point average in the program and not have a grade point average below 3.0 in any two successive terms to be considered in good academic standing. They must also meet all the requirements of graduate students outlined in the University Catalog.

Students who fall below a 3.0 grade point average in any one term will be placed on academic probation and notified of this in writing. Students who fail to make satisfactory academic progress may be officially

disqualified from the program in writing in accordance with policies established by the campus and based upon the recommendation of the Ed.D. Program faculty.

To ensure that a decision to disqualify a student because of unsatisfactory academic progress is just, basic due process requirements will be met. Faculty will conduct a thorough review and consultation and will provide a written recommendation by the Ed.D. Program Director to the Graduate Division. The student may appeal the decision. A student who has been disqualified from the program will not be allowed to continue in the Ed.D. Program, enroll in doctoral level courses in the program, or register again in the Ed.D. Program without a formal application and re-admission to the University.

² Passage of Qualifying Examination before the start of the dissertation and successful dissertation proposal defense.

Ed.S. in School Psychology

Total units required for Ed.S.: 96-107

Program Description

The Specialist in Education, School Psychology (Ed.S.) is an advanced degree that requires students to have completed both the MA in Education (School Psychology) or its equivalent, and the Pupil Personnel Services School Psychology Endorsement Credential. Completion of the Ed.S. requires additional coursework (beyond the MA and Credential requirements) focused on identifying and addressing school-related issues that arise during school psychology practice. The School Psychology program at CSUS is approved as a Specialist level program by the National Association of School Psychologists.

Note: If students are to graduate under the provisions of this catalog, they must maintain continuous enrollment from the date of classification to the date of graduation. Students who are planning to be absent for more than one semester must file a Leave of Absence request and have it approved prior to the absence.

Admission Requirements

Admission as a classified graduate student in the Specialist in Education (Ed.S.) - School Psychology, requires:

- a baccalaureate degree;
- a minimum 3.0 overall grade point average (if GPA is below 3.0, student may be accepted conditionally);
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or passing ENGL 109W (or its equivalent) with a grade of C or better.
- evidence of registration for or CBEST passing score;
- provision Graduate Record Exam (GRE) scores; and
- Completion of the following prerequisite courses or their equivalents (contact a school psychology advisor for more information on equivalent experiences):

Code	Title	Units
	An Introductory Statistics course	3
EDUC 155	Introduction to Counseling	3
EDUC 156	Power, Privilege and Self Identity in Counseling	3
EDUC 100A & EDUC 100B	Educating Students with Disabilities in Inclusive Settings Educating Students with Disabilities in Inclusive Settings Lab ¹	3
EDUC 125A & EDUC 125B	Tutoring Children in Reading Tutoring Children in Reading Practicum ²	3
PSYC 117	Drugs and Behavior	3
PSYC 168	Abnormal Psychology	3

¹ EDUC 100A and EDUC 100B must be taken concurrently.

² One (1) year of experience as a teacher in preschool through grade 12 settings, or two (2) years experience as a teacher's aide or substitute teacher in preschool through grade 12 settings may be used as an equivalency (contact a school psychology advisor for more information on equivalent experiences).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

All students must file the following with the Sacramento State Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application via Cal State Apply for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

At the same time, each applicant must complete a separate application for admission to the School Psychology Program:

- the program's application is available online (<http://www.csus.edu/coe/apply/graduate.html>);
- two letters of reference (references will submit letters online);
- one set of transcripts;
- evidence of experience working or volunteering in schools and/or working with youth;
- evidence of strong written communication skills (obtained via writing samples);
- evidence of strong oral communication skills (obtained via an interview with a current school psychology graduate student, practicing school psychologist, and school psychology faculty member).

Department applications are due by February for admission the following Fall Semester. Applications are only accepted and processed once per year, during spring semester for admission the following fall.

Units required for the Ed.S.: 96-107

Minimum Cumulative GPA: 3.0. No single course in which a student receives a grade below "B-" will be counted as credit toward the degree unless the student has petitioned for acceptance of the course, and the petition has been accepted and approved by the School Psychology faculty.

Advancement to Candidacy

Students must advancement to candidacy prior to enrolling in EDS 540 or EDS 542. Advancement to Candidacy forms are available in the Department office and the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Please note deadline dates posted by the Office of Graduate Studies for submission of this form. For more information on Advancement to Candidacy refer to MA in Education (School Psychology).

Program Requirements

First Semester		Units
EDC 210	Multicultural/Ethnic Counseling	3
EDS 201	Legal Aspects of Special Education	3

¹ For students who were awarded an appropriate master's degree before beginning the Ed.S. in School Psychology Program, a faculty approved 3 unit elective will be substituted for EDS 249 or EDS 541.

MA in Child Development

Total units required for MA: 30

Program Description

The Master of Arts in Child Development program offers an opportunity for the advanced study of developmental theory and research in preparation for a wide range of professional objectives. The program emphasizes scholarly reflection on developmental issues, and academic excellence in oral and written communication. Program faculty value academic scholarship and research, and regard their application in professional settings as central to the mission of the MA program.

Graduates of the program are expected to be well educated, lifelong learners, with excellent preparation in research, theory and practice in diverse, multicultural settings.

The MA program prepares graduates for professional employment in a variety of settings, including working directly with infants, children and their families, teaching at the community college level, and preparing for additional study toward a doctoral degree in child development or a related field. The program incorporates the following areas of study: developmental research and theory; cognitive, linguistic and social, and emotional development of children; social, and cultural and familial influences on development; children with behavioral, emotional, cognitive, and academic special needs and their families; programming and curricula development; principles and practices involved in organizing, administering, and evaluating child development programs.

For further information please see the Academic Program Services Office, Eureka Hall 401, or check the College of Education's website (<http://www.csus.edu/coe/academics/graduate>).

Admission Requirements

Admission as a classified graduate student in the Master of Arts in Child Development requires:

- a BA in Child/Human Development or a closely related field, Some applicants may be admitted with the condition that certain prerequisite courses be completed before beginning the requirements for the MA CHDV program;
- minimum 3.0 GPA in the last 60 units completed;
- experience in programs serving children from infancy through primary grades; and
- strong writing and communication skills.

Opportunity exists for conditional classification of applicants with an undergraduate major and experiences different from those listed above. This requires that students demonstrate convincingly that they are competent to pursue the degree.

Admission Procedures

All prospective graduate students, including Sacramento State graduates, must file a University application and a separate supplemental MA CHDV program application. Both applications must be submitted by the deadlines stated on the College of Education and Office of Graduate Studies web sites. Required application materials include:

- online applications for admission;
- official transcripts from all college and universities attended, *other than Sacramento State*;
- a well-written, clearly articulated, statement of the applicant's educational and professional background and an explanation of how graduate study will advance the applicant's professional goals;
- two letters of recommendation.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>). Details about each of the components of the supplemental application can be found on the application packet posted to the College of Education web site.

Approximately six weeks after the posted application deadline, a decision regarding admission will be emailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of courses in the graduate program (see Requirements) with a minimum 3.0 GPA; and
- met the Graduate writing requirement through completion of the Graduate Writing Intensive (GWI) course, CHDV 242, with a B grade or better.

Advancement to Candidacy forms are available on the Office of Graduate Studies website or in the department office. The student should complete the Advancement to Candidacy form after planning a degree program in consultation with a program faculty advisor. The form must be submitted to the Graduate Coordinator and the Office of Graduate Studies for approval.

Project/Thesis or Examination Registration

The approved Master's Thesis/Project format guide is the American Psychological Association (APA) - latest edition. Enrollment in CHDV 504 Project/Thesis course requires that the student file an Intent to Register form **at least one full semester in advance of registration in these courses.** For students intending to complete a project or thesis, a petition must be approved prior to beginning the project or thesis. The petition requires approval from the thesis/project sponsor, a second reader and from the Graduate Coordinator or Department Chair. Please see your list of deadlines and consult with a program advisor. Additional information about CHDV theses and projects may be found in the Thesis/Project handbook on the department web page.

Check in the Department office for the policies regarding Report in Progress ("RP") grades and continuous enrollment.

Graduation

Prior to graduation, an application for graduation must be filed in the Office of Graduate Studies. In addition, all coursework leading to the Master's degree must be completed within a seven-year period.

Program Requirements

Code	Title	Units
Pre or Corequisites (7 Units)

CHDV 504	Culminating Experience in Child Development: Thesis or Project	3
Total Units		30

Note: Credit for CHDV 504 is given upon completion of a thesis, project, or other approved culminating experience. Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of his/her faculty advisor and the Department Chair one full semester prior to registration. All forms may be obtained in the Department office or on the college web site.

MA in Education (Behavioral Sciences Gender Equity Studies)

Total units required for MA: 30

Program Description

The Master of Arts in Education with a Concentration in Behavioral Sciences Gender Equity Studies, offers

1. the opportunity to take courses that focus on the role of women from the points of view of the various disciplines from other University departments;
2. the opportunity to take courses that focus on the educational needs of ethnic and older women;
3. the opportunity to focus on the developmental needs of the young for a nonsexist education; and
4. the possibility for internships with state and local governments and school districts.

The program offers an emphasis on women as agents of social change and flexible course selection to emphasize research interests in women's issues.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

General Admission Requirements/Procedures for MA in Education apply, plus:

- a minimum 3.0 GPA in the last 60 units attempted;
- an approved statement of purpose that addresses:
 - a. why the applicant wants to enter this particular program;
 - b. career objectives which will coincide with program goals;
- evidence of completion of a previous course(s) with "B" or better grade (graduate or undergraduate level) which focuses on the area of Women's Studies and/or Gender Studies; and an oral interview.

Specific Admission Procedures

On a space available basis students may be admitted after the deadline to the following programs: uncohorting Curriculum and Instruction, Gender Equity Studies, and Language and Literacy. Please contact the appropriate program coordinator.

All prospective graduate students, including Sacramento State graduates, must file the following with the Sacramento State Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for graduate admission; and
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For a more admissions and application deadlines, please email the Office of Graduate and Professional Studies in Education (coe-grad@csus.edu)

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available online through the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/forms>). The student fills out the form after planning a degree program in consultation with the appropriate M.A. Program Coordinator. The form must be submitted to the Teacher Education Department Office and the Office of Graduate Studies for approval.

Approved Master's Thesis/Project Format: American Psychological Association (APA) - Latest edition. Before beginning a 500-level course to complete a Project, Action Research, or Thesis, students are required to have an approved Culminating Experience Proposal on file in the Department office. The reservation form for a Culminating Experience Chair for fall semester is due March 10; for spring the form is due October 15. **Note:** A completed Proposal requires the approval of the Culminating Experience Chair as well as Human Subjects approval. The proposal and accompanying Protection of Human Subject forms must be reviewed by the EDTE Graduate Coordinator and the Department or University Human Subjects Review Committee.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the thesis/project during the 500-level course. One semester of continuous enrollment is allowed if the Culminating Experience Chair deems a reasonable amount of progress has been made as per the timeline in the Proposal and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress according to their Proposal timeline and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

Note: The Department of Teacher Education requires each student download the *Department of Teacher Education Graduate Student Handbook*, available on the Department website (<http://www.csus.edu/coe/academics/credentials/handbooks>).

Program Requirements

Code	Title	Units
Required Courses (15 Units)		
EDUC 165	Sex Role Stereotyping in American Education  	3
EDTE 250	Education Research	3
EDTE 251	Education for a Democratic, Pluralistic Society	3
EDTE 266	Women And Education	3
EDTE 290	Seminar: Preparation of Master's Thesis/Project	3
Electives (12 Units)		
Select 12 units of electives ¹		12
Culminating Requirement (3 Units)		
EDTE 506	Culminating Experience: Behavioral Sciences - Women's Studies ²	3
Total Units		30

¹ Select 12 units of elective courses in consultation with the Behavioral Sciences Gender Equity Studies Program Coordinator. The units must be selected from: Gender Equity core courses; Women's Studies cross-listed courses; or other courses specifically approved by the Behavioral Sciences Gender Equity Studies Program Coordinator. At least six of the elective units must be at the 200-level.

² Credit is given upon completion of a thesis, project, or other approved culminating experience. For the Master of Arts in Education (Behavioral Sciences Gender Equity Studies). Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of his/her Culminating Experience Chair and the Behavioral Sciences Gender Equity Studies Program Coordinator. All forms may be obtained on the web (<http://csus.edu/coe>).

MA in Education (Curriculum and Instruction)

Total units required for MA: 30

Program Description

The Master of Arts in Education (Curriculum and Instruction) is designed to provide professional and specialized preparation for the candidate interested in acquiring knowledge and skills essential for the design and development of curriculum and related instructional practices. The program provides a variety of options for educators to develop and enhance expertise in a particular field of interest related to elementary, middle school, and secondary education. Each course is designed to produce an ideal blend of theory, research and practice in modern, diverse educational settings. The program is committed to exploring critical intellectual questions of contemporary education. Program instructors bring varied levels of expertise with advanced degrees from major research universities and classroom experience in K-12 and higher education settings.

Students may apply to either a stateside traditional cohort or a College of Continuing Education online cohort. The traditional cohort will meet face-to-face. The online cohort will meet approximately 25% synchronously (real time) and 75% asynchronously (your own schedule within a given timeframe). During the synchronous sessions students will participate in community development, collaboration, and communications that will allow them to get to know their peers and instructors and facilitate instructional delivery suited to an online format. During asynchronous

sessions students will build on learning experiences acquired in the synchronous sessions while deepening the knowledge, skills and dispositions that emerge with reflective, "on your own schedule" participation. Students in the online cohort will complete six units of coursework during the summer term as part of the condensed format.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better;
- passing score on the California Basic Educational Skills Test (CBEST); and
- an interview with a program administrator/faculty team; interviews will be scheduled at the close of the application period.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

The stateside traditional program admits a cohort of students in fall only. The online program offered through the College of Continuing Education admits a cohort of students in fall and/or spring. Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470 ([http://catalog.csus.edu/colleges/education/graduate-professional-studies-education/ma-in-education-curriculum-and-instruction/tel:\(916\)%20278-6470](http://catalog.csus.edu/colleges/education/graduate-professional-studies-education/ma-in-education-curriculum-and-instruction/tel:(916)%20278-6470)):

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

General Admission Requirements/Procedures for MA in Graduate & Professional Studies in Education (GPSE) apply, plus:

- supplemental application for the MA in Curriculum & Instruction, including a complete set of unofficial transcripts, an essay based on a prompt that will be provided to you, and a statement of purpose; and
- two years of teaching experience or its functional equivalent; or program coordinator approval.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified status. Any deficiencies will be noted on a written response to the student's admission application.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available online through the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/forms>). The student fills out the form after planning a degree program in consultation with the appropriate M.A. Program Coordinator. The form must be submitted online with the Office of Graduate Studies for approval.

Approved Culminating Experience Format: *American Psychological Association (APA) - Latest edition*. Before beginning a 500-level course, students must submit a reservation form for a Culminating Experience to the program coordinator for approval.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the culminating experience during the 500-level course. One semester of continuous enrollment is allowed if the Culminating Experience advisor deems a reasonable amount of progress has been made and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

Program Requirements

Code	Title	Units

Culminating Requirement (3 Units)		
EDCI 505	²	3
Total Units		30

¹ Six elective units in Curriculum and Instruction coursework are to be selected by the student in consultation with the Curriculum and Instruction Program Coordinator. Students may focus their elective units in a program of their interest or select courses from various programs. At least three of the elective units must be at the 200 level. Examples of Curriculum and Instruction elective programs include: Educational Technology, Mathematics Education, Language and Literacy, Multicultural Education, Gender Equity, BTSA or other pre-approved induction courses.

With C & I Program Coordinator approval, program courses may include **one** of the following:

- 6 transfer elective units (must not be independent study or supervision units)
- 6 units of academic credit earned through Continuing Education

² Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of his/her Culminating Experience Chair and the Curriculum and Instruction Program Coordinator. All forms may be obtained on the Office of Graduate STUDIES (OGS) website.

Credit is given upon completion of a university-approved project consisting of an ePortfolio that includes an action research report, supporting materials such as curriculum and/or student work, and a poster presentation evaluated by a faculty committee. With prior approval a master's thesis may be substituted for the action research report.

MA in Education (Educational Leadership)

Total units required for MA: 33

Program Description

Educational Leadership and Policy Studies aims to develop P-12 educational leaders from diverse backgrounds who will positively impact P-12 educational settings. The program specifically focuses on cultivating leaders who promote leaders, equity, social justice and achievement for all students. Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with

conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in **P-12 School Leadership and Policy Studies** requires:

- Completion of a baccalaureate degree at the time of application;
- GPA in the last 60 units of a 2.5 or better;
- A minimum of 4 years teaching experience in a P-12 educational setting;
- Completion, and successful review, of CSU Apply and program Supplemental Application
- Successful interview with faculty, demonstrating:
 - Preparation for graduate level study
 - Some leadership experience
 - Familiarity with current issues in education
 - Knowledge of conflict resolution and negotiation skills
 - Knowledge of P-12 education as a field
 - Entry level understanding of ethical leadership
 - Vision for P-12 education

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Specific Additional Admission Procedures

Each applicant must forward the following to the Educational Leadership and Policy Studies Department in the College of Education:

- the Educational Leadership and Policy Studies application for admission (available in Eureka Hall 437);
- two letters of reference (forms attached to application packet); and
- one set of transcripts, *including Sacramento State* (these need not be official).

Approximately two weeks after the deadline for submission of application materials to the Department, each applicant will be scheduled for an interview. Approximately two weeks after all applicants have been interviewed, a decision regarding admission will be mailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0. Only units with a grade "C" or better may be counted.

Notes:

- This graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the "Graduate Studies" and the "Educational Leadership and Policy Studies Department" sections of this catalog.
- All work must be completed within a 7-year period
- 30 units required for the MA, including at least 21 units in approved Educational Leadership courses. Up to six units, including extension credit, can be transferred from another university (if current and not used toward another degree); a minimum of 21 units must be taken in residence

Advancement to Candidacy

Each student working toward a Master's degree must file an application for Advancement to Candidacy for the degree; the application is a form on which the student indicates a proposed program of graduate study. The student must be advanced to candidacy the semester prior to enrolling in EDLP 500A. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the Educational Leadership and Policy Studies graduate program with a minimum 3.0 GPA;
- obtained advisor's preliminary approval of thesis or project proposal; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to candidacy forms are available on the Office of Graduate Studies website or the Educational Leadership and Policy Studies Department Office. The student fills out the form after planning a degree program in consultation with his/her Educational Leadership faculty advisor. The completed form is returned to the Office of Graduate Studies for approval.

- ² To be taken spring semester.
- ³ To be taken in summer session.
- ⁴ To be taken 3rd semester.
- ⁵ **Thesis/Projects.** Students must file a Master's Thesis/Project Petition in the Department office one semester in advance and must have advanced to candidacy the semester prior to enrolling in thesis/project. EDLP 500A and EDLP 230 can not be taken in the same semester unless approved by the student's advisor and Graduate Coordinator or Department Chair. EDLP 500A and EDLP 500B can not be taken in the same semester unless approved by the student's advisor and Graduate Coordinator or Department Chair. Students needing additional time may enroll in subsequent semesters in EDLP 299T with approval of their advisor and Department Chair.
- ⁶ In order to be assured that faculty thesis/project advisors will be available, students must file the thesis/project petition with proposal in the Department office in advance of the semester of enrollment in EDLP 500A, EDLP 500B or EDLP 299T.

MA in Education (Educational Technology)

Total units required for MA: 30

Minimum required GPA: 3.0; no units with a grade lower than "B" may apply

Program Description

The Master of Arts in Educational Technology (iMET) is a unique fully online program which has 2-3 optional face-to-face program and class meetings each semester. It is a rigorous 24 month program focusing on a full-range of instructional design and academic technology knowledge, skills, and dispositions. Instruction is centered on the learner and on what is required of teachers or trainers in today's technologically-rich learning environment. Coursework is project-oriented, utilizing eportfolios focusing on reflective learning practices and review by peers and colleagues.

The iMET program is designed to support students who want to develop their understanding of learning with technology and advance their ability to teach and design instruction involving the use of technology. Students will be able to design, create, present and evaluate instruction and learning for various types of education environments including for private industry and K-12 and higher education environments. Coursework focuses on learning theories, instructional design models, effective instruction, assessment, educational technology, multimedia tools and strategies, research and scholarship, leadership, project management, professional development, and socio-cultural aspects in education. Students focus on developing their Culminating Experience project connecting content learned throughout the program courses with their final project. Guidance is provided by advisors through courses on an individual basis connecting students with experienced practitioners. This program is currently offered only in cohort groups. Check with the Department (online (<http://imet.csus.edu>) or (916) 278-6155) for the next start date.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as by meeting the requirements set by the University Office of Graduate Studies;
- international students must meet Office of Graduate Studies (OGS) requirements for International students, which are available on the OGS website (<https://www.csus.edu/gradstudies/futurestudents>).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Information to apply for prospective graduate students is available on the Office of Graduate Studies website (916) 278-6470, which will include the following

1. online application procedures for admission (<https://www.csus.edu/gradstudies/futurestudents/applicationdeadlines>)
2. information to apply to a Sacramento State graduate program (<https://www.csus.edu/gradstudies/futurestudents/graduateadmissions>)
3. specific program application procedures in addition to apply to a graduate program at Sacramento State are available on the College of Education Department of Graduate and Professional Studies website (<https://www.csus.edu/coe/apply/graduate.html>)
4. To be admitted to a College of Education graduate program both #2 and #3 above must be complete, meeting the general admission requirements of the University and also the specific program admission requirements in the College of Education
 - a. *For more admissions information and application deadlines, please visit the Office of Graduate Studies website and the College of Education website* (<https://www.csus.edu/coe/academics/graduate>).
 - b. The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the [Graduate Degree Requirements](http://catalog.csus.edu/graduate-degree-requirements) (<http://catalog.csus.edu/graduate-degree-requirements>) section of the University Catalog.

Specific Additional Admission Requirements

General Admission Requirements/Procedures for MA in Education apply, plus:

- a minimum 3.0 overall GPA in the last 60 units attempted; potentially waived on approval of the Program Coordinator and Department Chair
- applicants should have an intermediate level of educational technology knowledge and proficiency
- an approved statement of purpose that addresses:
 - a. why the applicant wants to enter this particular program which would include:
 - i an example of a successful experience you have had in using technology for learning or
 - ii an example of a work experience where you helped lead or support others in using technology for teaching or learning, including a description of your level of involvement, and
 - iii what you believe to be optimal ways that technology can successfully be used for teaching or learning

- b. career objectives
- i applicants must be proficient in using the Internet and have accessible Internet access to meet the requirements of a fully online program

Minimum Units and Grade Requirement for the Degree

- Units required for the MA: 30
- Minimum cumulative GPA: 3.0; no units with a grade lower than "B" may apply toward the degree

Program Costs

- Information on Tuition Fees and Campus Fees is made available on the University website. (https://www.csus.edu/aba/bursars-office/fees_deadlines_refunds.html)
- **Note:** There is an **additional Distance Learning Technology Fee of \$40 per unit** for the iMET Program courses.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- fulfilled the "Graduate Writing Assessment Requirement (GWAR)."
- Requirements for the GWAR are available on the Office of Graduate Studies website (<https://www.csus.edu/gradstudies/currentstudents/gwar.html>).
 - Information to complete the Advancement to Candidacy forms is available online and will be provided through the Program Coordinator. The Advancement to Candidacy entails the degree program in consultation with the appropriate M.A. Program Coordinator. A completed form must be submitted to the Program and Department for approval and to the Office of Graduate Studies for approval.

Approved Master's Thesis/Project Format: *American Psychological Association (APA) - Latest edition.* Before beginning the 500-level course to complete a Project, Action Research, or Thesis, students are required to have an approved Culminating Experience Proposal on file in the Department office. Dates for completing the form are announced by the Program Coordinator.

Note: A completed Proposal requires the approval of the Culminating Experience Chair as well as Human Subjects approval if needed. The proposal and accompanying Protection of Human Subject forms must be reviewed by the EDTE Graduate Coordinator and approved by the Department and University Human Subjects Review Committee.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the thesis/project during the 500-level course. Continuous enrollment is allowed if the Culminating Experience Chair deems a reasonable amount of progress has been made as per the timeline in the Proposal and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress according to their Proposal timeline, a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

¹ These courses must be taken as part of the Educational Technology cohort. The Educational Technology coursework is integrated into these courses. Requires acceptance into Master of Arts (Educational Technology); **not** open to students who have not been admitted to the program.

² Credit is given upon completion of a thesis, project or other approved culminating experience for the Master of Arts in Education (Educational Technology). Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of the Educational Technology Program Coordinator.

MA in Education (Higher Education Leadership)

Total units required for MA: 30

Program Description

What makes an effective educational leader? What characteristics and traits are predictive of successful careers in leadership? Does a leader have to be employed in a management position to provide leadership? How do leaders "do more with less" in lean times? What management and leadership skills are necessary to effectively operate today's schools, colleges and universities?

Education in California continues to face uncertainties; resources continue to dwindle while the task of educating today's generations for tomorrow grows ever more important and complex every day. The challenges have likely never been greater. Effective – not just "good" – leadership at all levels of education - public, private and higher education – has probably never been more important.

The programs in Educational Leadership are designed to meet a variety of needs in the field. The programs are oriented toward an interdisciplinary approach to the study of school leadership, offering

students opportunities to apply theory to the practice of educational leadership.

The mission of Educational Leadership and Policy Studies is to develop educational leaders from diverse backgrounds who will positively impact the improvement of educational institutions and environments - from pre-K through university and professional levels. These leaders will:

- be visionary change agents;
- create collaborative learning communities;
- engage in reflective practice;
- ensure diversity and equity;
- implement research-based practices and site-based best practices; and
- build capacity through leadership development.

EDLP program graduates serve in a broad variety of leadership and management positions throughout the region and the country. Some have chosen to pursue doctoral studies in Educational Leadership after completing their Master's level studies and have gained critical experience in leadership. All Educational Leadership programs are organized to be cohort-based. Groups of students admitted each application cycle will take all of their courses together. Enrollments are predictable, and a course of study can be planned in advance in relation to the availability of highly qualified faculty. Cohorts provide students a foundation from which to build important professional support networks with their classmates/colleagues, while facilitating collaborative and cooperative learning experiences throughout the program and into their careers.

A significant dimension of all of the programs in Educational Leadership is an interest in, and commitment to, the full development of student potential and capability. Coursework, advising, and field experiences are carefully orchestrated to ensure a full range of faculty support for student achievement. The student, as a responsible autonomous agent, is expected to assume the role of partner in this effort.

EDLP course offerings in all cohorts are hybrid, meaning that some portion of course instruction is delivered online, to maximize access and opportunity.

Courses in the MA in Education: Higher Education Leadership are delivered using both hybrid instructional delivery, and executive scheduling wherein students attend face-to-face class session on Friday nights and Saturdays throughout each semester.

Admission Requirements

Admission as a classified graduate student in Higher Education Leadership requires:

- Completion, and successful review, of CSU Mentor and program Supplemental application
- Successful interview with faculty, demonstrating
 - Preparation for graduate level study
 - Professional experience at any level in higher education
 - Some leadership experience
 - Familiarity with current issues in education
 - Knowledge of conflict resolution and negotiation skills
 - Knowledge of higher education as a field

- Entry level understanding of ethical leadership
- Vision for P-16 education

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Specific Additional Admission Procedures

Each applicant must forward the following to the Educational Leadership and Policy Studies Department in the College of Education:

- the Educational Leadership and Policy Studies application for admission (available in Eureka Hall 437);
- two letters of reference (forms attached to application packet); and
- one set of transcripts, *including Sacramento State* (these need not be official).

Approximately two weeks after the deadline for submission of application materials to the Department, each applicant will be scheduled for an interview. Approximately two weeks after all applicants have been interviewed, a decision regarding admission will be mailed to each applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0. Only units with a grade "C" or better may be counted.

Notes:

- This graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the "Graduate Studies" and the "Educational Leadership and Policy Studies Department" sections of this catalog.
- All work must be completed within a 7-year period
- 30 units required for the MA, including at least 21 units in approved Educational Leadership courses. Up to six units, including extension credit, can be transferred from another university (if current and not used toward another degree); a minimum of 21 units must be taken in residence

Advancement to Candidacy

Each student working toward a Master's degree must file an application for Advancement to Candidacy for the degree; the application is a form on which the student indicates a proposed program of graduate study. The student must be advanced to candidacy the semester prior to enrolling in EDLP 500A. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the Educational Leadership and Policy Studies graduate program with a minimum 3.0 GPA;
- obtained advisor's preliminary approval of thesis or project proposal; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to candidacy forms are available on the Office of Graduate Studies website or the Educational Leadership and Policy Studies Department Office. The student fills out the form after planning a degree program in consultation with his/her Educational Leadership faculty advisor. The completed form is returned to the Office of Graduate Studies for approval.

Notes:

- Thesis/Projects: Students must file a petition in the Department office one semester in advance and must have advanced to candidacy before they enroll in thesis/project. First semester students are to register for EDLP 500A and EDLP 500B during the second semester if they obtained a satisfactory grade in EDLP 500A. Students needing additional time may enroll in subsequent semesters in EDLP 299T with approval of their advisor and Department Chair.
- The Master of Arts in Education, Higher Education Leadership Option consists of the following tracks: Student Affairs Leadership and Community College Leadership.

Program Requirements

Code	Title	Units
Graduate Core Requirements (24 Units)		
EDLP 221	Foundations in Higher Education Leadership ^{1,2}	3
EDLP 222	Diversity in Higher Education ^{1,2}	3
EDLP 250	Education Research ³	3
EDLP 224	Advanced Seminar: Dynamics of Organizational Change ^{1,3}	3

EDLP 500A	Master of Arts Thesis/Project ⁵	3
Total Units		30

¹ Prerequisite: Admission to the Master of Education: Higher Education Leadership Option.

² To be taken in the first semester of the program.

³ To be taken in the second semester of the program.

⁴ To be taken in the third semester of the program.

⁵ To be taken in the fourth semester of the program.

MA in Education (Language and Literacy)

Total units required for MA: 30

Program Description

The Master of Arts in Education with a Concentration in Language and Literacy is designed for the administrator, the classroom teacher, and the specialist teacher of language and literacy for all types of children,

youth, and adults. The program includes required courses in Professional Education and selected courses in language and literacy.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in Education, Language and Literacy, requires:

- a valid Teaching Credential or advisor or Department approval for waiving this requirement;
- a minimum 3.0 GPA in the last 60 units attempted; and
- successful completion of a basic course in the Teaching of Reading from an accredited university; if reading methods course is older than seven years, the applicant must show evidence of either a) current staff development in Language and Literacy by participation in workshops, institutes, etc., (candidates must show documentation); or b) passing the RICA test within the past seven years.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

The Department of Teacher Education requires each student download the *Department of Teacher Education Graduate Student Handbook*, available

on the Department website (<http://www.csus.edu/coe/academics/credentials/handbooks>).

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum cumulative GPA: 3.0; no units with a grade lower than "C" may apply toward the degree.

General Advancement to Candidacy Procedures

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available online through the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/forms>). The student fills out the form after planning a degree program in consultation with the appropriate M.A. Program Coordinator. The form must be submitted to the Teacher Education Department Office and the Office of Graduate Studies for approval.

Approved Master's Thesis/Project Format: *American Psychological Association (APA) - Latest edition*. Before beginning a 500-level course to complete a Project, Action Research, or Thesis, students are required to have an approved Culminating Experience Proposal on file in the Department office. The reservation form for a Culminating Experience Chair for fall semester is due March 10; for spring the form is due October 15. **Note:** A completed Proposal requires the approval of the Culminating Experience Chair as well as Human Subjects approval. The proposal and accompanying Protection of Human Subject forms must be reviewed by the EDTE Graduate Coordinator and the Department or University Human Subjects Review Committee.

Enrollment in the 500 series Culminating Experience is for one semester. The expectation is that students will complete the thesis/project during the 500-level course. One semester of continuous enrollment is allowed if the Culminating Experience Chair deems a reasonable amount of progress has been made as per the timeline in the Proposal and assigns a grade of "RP" for the 500 series. If students fail to make adequate progress according to their Proposal timeline and there are no mitigating circumstances (e.g., illness), a grade of "no credit" is given, and the student must re-enroll in the appropriate 500 series Culminating Experience.

Note: The Department of Teacher Education requires each student download the *Department of Teacher Education Graduate Student Handbook*, available on the Department website (<http://www.csus.edu/coe/academics/credentials/handbooks>).

¹ Credit is given upon completion of a thesis, project, or other approved culminating experience for the Master of Arts in Education (Language and Literacy). Open only to the graduate student who has been advanced to candidacy for the master's degree and has secured the permission of his/her Culminating Experience Chair and the Language and Literacy Program Coordinator. All forms may be obtained on the College of Education's website (<http://csus.edu/coe>).

MA in Education (Multicultural Education)

Total units required for MA: 30-33

Program Description

The MA in Education with a Concentration in Multicultural Education graduate program explores theoretical and pedagogical issues of bilingualism, multiculturalism, educational equity, and social justice, offering courses and experiences to assist educators to work successfully in classrooms, schools, and educational agencies within our diverse State. The curriculum develops student's pedagogical, analytical, and planning skills in order to prepare them to operate effectively in the development, implementation and analysis of educational policies and programs affecting the academic lives of low income, and culturally and linguistically diverse K-12 student.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in

the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in Bilingual/Multicultural Education graduate program requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated either by passing the Sacramento State Writing Proficiency for Juniors exam or equivalent, or enrolling in ENGL 109W until the WPJ is passed;
- completion and successful review of Department application;
- successful interview with a faculty team. Interviews are scheduled within one month of the due date for submitting completed department applications.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Students will be notified of any deficiencies through written communication.

The Department does not accept units earned through Open University and they will not be credited towards either option of the Master's degree.

Specific Additional Admission Procedures

All MA cohorts begin in fall semester. Applicants must complete a university application by the posted application deadline date for the term applying:

Each applicant must also complete the following procedures with the Graduate and Professional Studies in Education by the same due dates noted above:

- complete and submit a Program application (available at Eureka Hall 401) and
- participate in an oral interview (applicants schedule interview upon submitting their Program application). Interviews are scheduled within one month after the Program and Office of Graduate Studies applications are due.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of study for the MA. The student must be advanced to candidacy prior to enrolling in EDBM 565. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of courses in the graduate program (see Degree Requirements) with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student will complete the form after planning

a degree program in consultation with the Department Graduate Coordinator. The form must be submitted to the Bilingual/Multicultural Graduate Coordinator and the Office of Graduate Studies for approval.

Thesis/Project Registration

Check with the Bilingual/Multicultural Graduate Coordinator for the policies regarding Report in Progress ("RP") grades and continuous enrollment. The culminating experience for the MA may be a thesis, project, or exam.

A 3-unit course is required when doing the thesis/project. Enrollment in the culminating experience may occur only after Advancement to Candidacy.

The Thesis/Project course requires the student to file and have an approved Thesis/Project Petition form and Advisor Reservation form on record with the BMED Graduate Coordinator at least one full semester in advance of registration. Both forms are due by April 1st for fall enrollment and by November 1st for spring enrollment. Failure to meet these deadlines will result in the inability to enroll in the Thesis/Project course for the desired semester.

The Thesis/Project Petition and reservation forms must be submitted to the Graduate Coordinator at least one month prior to the submission due date (i.e., March or October); the forms will then be forwarded to the Graduate Committee for review and recommendations.

Students may enroll in the Thesis/Project course a maximum of two semesters for credit. Students must submit the Reservation Form only to continue in the Thesis/Project course for the second semester. Failure to do so will result in inability to work with the Thesis/Project advisor for the desired semester.

Approved Master's Thesis/Project Format: *American Psychological Association (APA)* - Latest Edition.

³ Comprehensive exam students = 24 total units (will need 6 units of electives)
Thesis/project students = 27 total units (will need 3 units of electives)

MA in Education (School Psychology)

Total units required for MA: 42-45

Program Description

The Master of Arts in School Psychology offers the opportunity to gain skills in working with preschool through grade 12 students, teachers, and parents in the school setting. Graduates of this degree who also complete practicum and fieldwork requirements (described in Pupil Personnel Services School Psychology Endorsement Credential) are eligible for the Pupil Personnel Services School Psychology Endorsement Credential, offered by the California Commission on Teacher Credentialing (CCTC). Possession of the MA in Education (School Psychology) and the Pupil Personnel Services School Psychology Endorsement Credential also prepares an individual to meet the academic requirements for the Licensed Educational Psychologist (LEP) license administered by the California Board of Behavioral Science Examiners, Department of Consumer Affairs.

The program includes training in counseling techniques, the use of individual academic and psychological assessment tools, behavioral interventions in the school and the home, consultation skills, techniques of program development and evaluation, special education law, and instructional strategies.

Note: If students are to graduate under the provisions of this catalog, they must maintain continuous enrollment from the date of classification to the date of graduation. Students who are planning to be absent for more than one semester must file a Leave of Absence request and have it approved prior to the absence.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or

equivalent, or passing ENGL 109W (or its equivalent) with a grade of C or better.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application, via Cal State Apply, for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

In addition to the requirements specified above, admission as a classified graduate student in the Master of Arts in Education, School Psychology option, requires:

- a minimum 3.0 overall grade point average (if GPA is below 3.0, but at or above 2.5, the student may be accepted conditionally);
- Graduate Record Exam (GRE) scores;
- evidence of registration for, or CBEST passing score;
- Completion of the following prerequisite courses or their equivalents (contact a school psychology advisor for more information on equivalent experiences):

Code	Title	Units
	Select an Introductory Statistics course	3
EDUC 155	Introduction to Counseling	3
EDUC 156	Power, Privilege and Self Identity in Counseling	3
EDUC 100A & EDUC 100B	Educating Students with Disabilities in Inclusive Settings	3
	Educating Students with Disabilities in Inclusive Settings Lab ¹	
EDUC 125A & EDUC 125B	Tutoring Children in Reading Tutoring Children in Reading Practicum ²	3
PSYC 117	Drugs and Behavior	3
PSYC 168	Abnormal Psychology	3

¹ EDUC 100A and EDUC 100B must be taken concurrently.

² One (1) year of experience as a teacher in preschool through grade 12 settings, or two (2) years experience as a teacher's aide or substitute teacher in preschool through grade 12 settings may be used as an equivalency (contact a school psychology advisor for more information on equivalent experiences).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with

conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Specific Additional Admission Procedures

In addition to the procedures specified above, each applicant must complete a separate application for admission to the School Psychology Program (this application is typically available by October of each year, which is the start of the application cycle):

- the program's application is available online (<http://www.csus.edu/coe/apply/graduate.html>);
- two letters of reference (references will submit letters online);
- one set of transcripts;
- evidence of experience working or volunteering in schools and/or working with youth;
- evidence of strong written communication skills (obtained via writing samples);
- evidence of strong oral communication skills (obtained via an interview with a current school psychology graduate student, practicing school psychologist, and school psychology faculty member).

Department applications are due by February for admission the following Fall Semester. Applications are only accepted and processed once per year, during spring semester for admission the following fall.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 42-45

Minimum Cumulative GPA: 3.0. No single course in which a student receives a grade below "B-" will be counted as credit toward the degree unless the student has petitioned for acceptance of the course, and the petition has been accepted and approved by the School Psychology faculty.

Note: A minimum of 21 of these units must be taken in residence at Sacramento State. Use of extension courses must be approved by the advisor. Enrollment in Special Problems will only be granted under exceptional circumstances.

Advancement to Candidacy

Students working toward a Master's degree must file an application for Advancement to Candidacy, indicating a proposed program of study. This procedure should begin as soon as the classified graduate student has:

- been assigned an advisor;
- removed any deficiencies in admission requirements;
- completed 24 units of content knowledge elective units with a minimum 3.0 GPA; and
- satisfied the Writing Placement for Graduate Students (WPG) requirement within the first two semesters of coursework at California State University, Sacramento. Students may satisfy this requirement via a WPG waiver (see Office of Graduate Studies website for waiver requirements). If students do not satisfy this requirement via a WPG waiver, students must do the following:
 - Take the WPG Exam
 - If WPG Exam is passed, WPG requirement is satisfied;
 - If WPG Exam not passed, WPG requirement not satisfied, and student must:

- Take ENGL 220W (offered through the College of Continuing Education) and pass with a grade of "B" or better; or
- Take GRE/GMAT and score 4.5 or higher on the Analytical Writing portion and submit a waiver to the Office of Graduate Studies.

Advancement to Candidacy forms are available in the Department office and on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Please note deadline dates posted by the Office of Graduate Studies for submission of this form.

The MA Seminar EDS 249 and EDS 541 courses require students to file and have approved a Reservation Form for the courses the semester before intended registration. Registration for Special Problems (EDS 299) requires a Special Problems petition be filed the semester before intended registration. Enrollment in the culminating experience (Project/MA Seminar) may occur only after advancement to candidacy.

Please be aware that this Department requires the guidelines in the *American Psychological Association (APA)*, most current edition, for formatting of projects. The Office of Graduate Studies, River Front Center 215, (916) 278-6470, also publishes a two-sided form, Project Format Requirements, to refer to for the preparation and submission of the Master's Thesis or Project. You can find this form and other Graduate Studies forms on the web on the Office of Graduate Studies website (<http://csus.edu/gradstudies/forms>).

Prior to graduation, an application for graduation must be filed in the Office of Graduate Studies by the deadline and all coursework leading to this Master's degree (as well as to special education credentials) must be completed within a seven year period. Please note deadline dates posted by the Office of Graduate Studies for submission of this form.

MA in Education (Special Education)

Total units required for MA: 30

Program Description

The Master of Arts degree in Education with a concentration in Special Education is designed for candidates who concurrently apply to one of our education specialist credential programs (Mild/Moderate Disabilities, Moderate/Severe Disabilities, or Early Childhood Special Education) or candidates who are already pursuing one of these credential programs. Candidates who already hold an education specialist credential either from Sacramento State or another institution may also apply to the program.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

Admission as a classified graduate student in the Master of Arts in Education with a Concentration in Special Education, requires:

- a minimum 3.0 overall GPA in the last 60-semester units of college coursework (excluding "P" or "CR" grades); and
- already admitted to one of the Education Specialist Credential programs at California State University, Sacramento OR already hold an Education Specialist Credential.

Specific Additional Admission Procedures

Persons interested in special education programs should first contact a faculty advisor in the appropriate area of interest.

Each applicant must send the following to the Graduate and Professional Studies in Education in Eureka Hall 401:

- a supplemental program application;
- written statement of professional goals, approximately 500 words;
- two letters of recommendation and/or Evaluator Rating forms; and
- one set of transcripts, including Sacramento State (unofficial OK).

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0. No single course in which the student receives a grade below "B-" will be counted as credit toward the degree unless the student has petitioned for acceptance of the course, and the petition has been accepted and approved by the Special Education faculty

Notes:

- no more than six units transferable from another university;
- no more than six units through Special Problems;
- no more than six units of pre-M.A. 200-level coursework;
- Writing Placement for Graduate Students (WPG) exam to fulfill Graduate Writing Assessment Requirement (GWAR)

The following are not acceptable for MA credit:

- 300- or -400 level courses;
- student teaching courses; and
- extension courses not recognized by the college-of-record issuing degrees.

Advancement to Candidacy

Students working toward a Master's degree must file an application for Advancement to Candidacy, indicating a proposed program of study. This procedure should begin as soon as the classified graduate student has:

- been assigned an advisor;
- removed any deficiencies in admission requirements;

- completed 15 units of content knowledge elective units with a minimum 3.0 GPA;
- completed student teaching/internship requirements; and
- satisfied the Writing Placement for Graduate Students (WPG) requirement within the first two semesters of coursework at California State University, Sacramento. Students may satisfy this requirement via a WPG waiver (see Office of Graduate Studies website for waiver requirements). If students do not satisfy this requirement via a WPG waiver, students must do the following:
 - Take the WPG Exam
 - If WPG Exam is passed, WPG requirement is satisfied;
 - If WPG Exam not passed, WPG requirement not satisfied, and student must:
 - Take EDGR 260 (Graduate Writing Intensive Course GWI) if offered, and pass with a grade of "B" or better;
 - Take ENGL 220W (offered through the College of Continuing Education) and pass with a grade of "B" or better; or
 - Take GRE/GMAT and score 4.5 or higher on the Analytical Writing portion and submit a waiver to the Office of Graduate Studies.

Advancement to Candidacy forms are available in the Department office and the Office of Graduate Studies (OGS). The student fills out the form after planning a degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Please note deadline dates posted by the Office of Graduate Studies for submission of this form.

Notes:

- If students are to graduate under the provision of this catalog, they must maintain continuous enrollment from the date of classification to the date of graduation. Students who are planning to be absent for more than one semester must file a Leave of Absence request and have it approved prior to the absence.
- Prior to graduation, an application for graduation must be filed in the Office of Graduate Studies by the deadline and all coursework leading to this Master's degree (as well as to special education credentials) must be completed within a seven year period. Please note deadline dates posted by the Office of Graduate Studies for submission of this form.

Program Requirements

Code	Title	Units
Required Core Courses		9
EDSP 250	Education Research	3
EDSP 251	Education in a Democratic, Pluralistic Society	3
EDSP 297	Current Issues in Special Education	3
Other Content Knowledge Elective Requirements (15 Units)		15
Content Knowledge elective units can be selected from the following in consultation with advisor:		
EDSP 205	Methods in Access and Inclusion in the Core Curriculum: Mod/Severe Disabilities	
EDSP 206	Collaborative Program Planning with Families, Professionals, and Communities	
EDSP 207	Secondary/Post-Secondary Methods and Transition Planning: Moderate/Severe Disabilities	

EDSP 208	Evidenced-based Assessment and Instruction: Mod/Severe Disabilities
EDSP 209	Developing Augmentative & Alternative Communication Systems: Assessment and Intervention
EDSP 216	Understanding the Implications of Developmental Diversity in Children
EDSP 218	Instructional Strategies: Low Incidence Disabilities
EDSP 220	Language and Literacy in Inclusive Classrooms I
EDSP 221	Language and Literacy in Inclusive Classrooms II
EDSP 225A & EDSP 225B	Assessment and Evaluation for Students with Mild/Moderate Disabilities Assessment and Evaluation for Students with Mild/Moderate Disabilities Lab
EDSP 229	Curriculum and Instruction Strategies for Students with Mild/Moderate Disabilities
EDSP 230	Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges
EDSP 232	Effective Communication and Collaborative Partnerships
EDSP 235	Field Seminar in Program and Instruction: Mod/Severe Disabilities
EDSP 237	Transition Strategies for Students with Mild/Moderate Disabilities
EDSP 292	Teaching English Learners with Disabilities
EDSP 276A	Education of Students with Emotional and Behavioral Disorders
EDSP 276B	Education of Students with Emotional and Behavioral Disorders - Lab

Other courses in supporting fields may also be selected if approved by advisor.

Culminating Requirements (6 Units)¹ 6

Select one of the following:

Thesis or Project

- EDSP 290 Seminar for Culminating Experiences
& EDSP 500 Master of Arts Thesis: Special Education
or EDSP 501 Master of Arts Project: Special Education

Exam

- EDSP 290 Seminar for Culminating Experiences
& EDSP 298 Master's Seminar in Special Education

Total Units 30

¹ Thesis/Project/MA Seminar (EDSP 500/EDSP 501/EDSP 298) courses require the student to file and have approved a Reservation Form for that course the semester before intended registration. Enrollment in culminating experience (Thesis/Project/MA Seminar) may occur only after advancement to candidacy. Students seeking continuous enrollment must have advisor and graduate coordinator's approval.

Students choosing the thesis or project option must enroll for three units of EDSP 500 or EDSP 501 in one semester. The expectation is that students will complete the thesis or project during the 500-level course. If students fail to make adequate progress according to their proposal timeline and there are no mitigating circumstances (e.g., illness), an "NC" grade will be given and the student must re-enroll in the appropriate 500 series course.

MA in Education (Workforce Development Advocacy)

Total units required for MA: 30

Program Description

This program is designed to provide training for adults who wish to train/teach in a career technical/business program in public institutions or private business settings. The Bachelor's degree includes the Designated Subjects Teaching Credential in Career Technical Education or Adult Education and the Supervision and Coordination Credential. The program is offered on weekends and uses instructional techniques suited to adult learners.

The MA in Education with a Concentration in Workforce Development Advocacy is designed to complement the existing Bachelor of Science in Career and Technical Studies (CTS) degree. The new option would be offered as a component of the Master of Arts degree program in the Department of Special Education, Rehabilitation, School Psychology, and Deaf Studies but delivered through the College of Continuing Education using a similar scheduling format as the CTS program (an intensive weekend schedule to which employers as well as CTS graduates have adapted).

This program is offered through the College of Continuing Education while its academic home is in the Department of Graduate and Professional Studies in the College of Education. It is approved by the California Commission on Teacher Credentialing (CTC), the California State University Chancellor's Office, and the Western Association of Schools and Colleges (WASC).

Career Possibilities

Teacher in regional occupation programs, private post-secondary institutions, community colleges, correctional facilities and adult schools
· Trainers and facilitators in public or private industry
· School and career counselors
· Human resource recruiters and placement personnel
· Mediators and labor relations specialists
· Educational administrators
· School-to-work coordinators
· Learning specialists
· Administrators, managers and supervisors in public or private industry
· Small business owners and entrepreneurs
· Consultants in business, industry, and education

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- two years of teaching experience or its functional equivalent;
- a minimum 2.5 GPA in the last 60 units;
- proficiency in written English composition as demonstrated by either passing the Sacramento State Writing Placement for Juniors exam or equivalent, or enrolling in ENGL 109W passing with a grade of C or better; and
- an interview with a student/practicing administrator/faculty team; interviews will be scheduled at the close of the application period, (the Graduate Record Exam (GRE) or Miller Analogies Test scores are NOT required; however, these test scores may be included with the admission application).

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with

conditionally classified graduate status. Any deficiencies will be noted on a written response to the student's admission application.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Specific Additional Admission Requirements

The CTS degree program requires that students have five to seven years of career technical/business experience in a designated field prior to graduation. Degree candidates receive up to 30 elective units for prior job experience, teaching/training experience, supervisory experience, and current professional development and education. In addition, candidates complete general education and graduation requirements for Sacramento State and the Career and Technical Studies Major.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Students must advance to candidacy prior to enrollment in EDS 530 and EDS 531. Advancement to Candidacy forms are available in the Department office and the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a faculty advisor and approved by the Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval. Please note deadline dates posted by the Office of Graduate Studies for submission of this form.

MS in Counseling

Total units required for MS: 60

Program Description

The 60-unit Master of Science in Counseling prepares professional counselors for employment in a variety of settings such as public and private agencies, universities and colleges, schools and private practice. This degree meets the educational requirements for becoming a Licensed Marriage and Family Therapist (LMFT) and/or a Licensed Professional Clinical Counselor (LPCC) in the State of California. The 59-unit Pupil Personnel Services, School Counseling Credential prepares professional counselors to work within the K-12 educational system. The programs are clinically oriented, with didactic and experiential courses, a 100-hour clinical practicum, and 600 hours of field experience.

Specializations

Students earning the Master of Science in Counseling are required to specialize in one or more of the following areas:

- **Career Counseling.** The Career Counseling Specialization provides students with the knowledge, theory, and skills to work as effective counselors/career development specialists, and consultants in a variety of settings: community-based agencies, schools (K-12), colleges and universities, private practice, business, industry, and government. Students are trained to facilitate a holistic career development/career decision-making/planning process with groups and individuals that integrates personal, social, and career needs. Students develop the skills to address current issues in the 21st century, such as career self-reliance, work/family/life balance, multiculturalism, diversity, and lifelong learning.
- **Marriage, Family, and Child Counseling.** The Marriage, Family and Child Counseling Specialization is designed to provide students with all the educational competencies required by the California State Board of Behavioral Sciences (BBS) for licensure as a Marriage and Family Therapist (LMFT). The program trains professionals to work in a variety of settings, including community agencies, county and state agencies, hospitals and private practice, and prepares students to provide consulting to businesses and agencies. Emphasis is placed on developmental and preventative concerns, especially those of children.
- **School Counseling.** The School Counseling Specialization is designed for individuals who seek to become elementary, middle, or secondary school counselors. This program meets the requirements for the K-12 California Pupil Personnel Services Credential, School Counseling (PPS-SC). Students in this program are prepared to function as key members of an educational team seeking to optimize children's academic, socio-emotional, and career development. Students obtain the expertise necessary to lead the educational team in working collaboratively with a broad range of education and human service professionals, paraprofessionals, and community representatives to identify, develop, implement, and evaluate programs that provide key services to both the individual child as well as the systems and subsystems in which the child interacts.
- **Rehabilitation Counseling.** The Rehabilitation Counseling Specialization offers students the opportunity to gain several specialized skills for working with persons with disabilities.

Rehabilitation Counselors work in a wide variety of settings including community agencies, private agencies, enabling centers on college campuses, and state agencies. The program includes training in counseling techniques; the use of medical, psychological, and occupational information; and the impact of disabilities on human behavior. In addition, the skills involved in finding and intake, vocational evaluation, restoration, training, job placement, and follow-up are taught. Independent living, assistive technology and disability rights are topic areas emphasized in the program.

Students who are specializing in School Counseling and intend to be employed in California will need to obtain the Pupil Personnel Services School Counseling Credential (p. 440).

Note: Only students who are already enrolled in the School Counseling specialization at California State University, Sacramento may apply to the Pupil Personnel Services School Counseling Internship Credential Program (p. 440).

The Career Counseling; Marriage, Family, and Child Counseling; and School Counseling specializations at Sacramento State are applying for national accreditation by the Council for Accreditation of Counseling and Related Educational Programs (CACREP). The Rehabilitation Counseling specialization is nationally accredited by CACREP through October 31, 2020.

Note: For additional information on credentials, see the "College of Education" section of this catalog. Program requirements are subject to change in order to maintain compliance with relevant state and national certification, licensure, and/or accreditation requirements. Interested parties should refer to the current student handbook for up to date program information.

Special Features

- An on-campus Center for Counseling and Diagnostic Services brings clients from off campus to be counseled by students in the program and provides opportunity for video and audio feedback.
- Trainees provide off-campus counseling in local agencies, school districts, hospitals, and non-profit organizations.
- The Masters in Counseling Program and participating school districts collaborate with the Migrant Education Advisor Program (MEAP), which is a collaborative partnership with the Office of Migrant Education.
- Faculty actively support diversity and focus on multicultural counseling skills throughout the curriculum.
- Classes are offered during the day, late afternoon, and evening.

Admission Requirements

Admission as a classified graduate student in the Master of Science in Counseling program requires:

- A baccalaureate degree;
- Good academic standing at the last college attended;
- A grade point average of at least 3.0 (on a 4.0 scale) in the last 60 semester (or 90 quarter units);
- Submission of the Graduate Record Exam (GRE);
- Completion of the University application materials;
- Completion and submission of all Departmental application materials which include:
 - Application form;
 - Written statement(s) delineated in application;

- Copies of transcripts (from all universities and colleges attended);
- Professional letters of recommendation (2 total);
- Relevant work experience.
- Participation in an In-Person Admission Evaluation, which may include (but is not limited to) interviews, experiential activities, and writing samples.

Selected applicants, based on paper screening of completed applications, will be invited for an In-Person Admission Evaluation. Decisions for admission into the Master of Science in Counseling program are made based on a comprehensive assessment of **all application materials** and performance in the In-Person Admission Evaluation.

The Graduate Record Exam (GRE) is required for admission. There is no minimum GRE score required for admission. GRE scores that are not at or above the average range will only be used to increase an applicant's ranking. GRE scores will not be used to decrease an applicant's ranking.

California Basic Educational Skills Test (CBEST): Although evidence of passing the CBEST is not required for admission into the Pupil Personnel Services Credential programs, the CBEST must be successfully passed prior to receiving the Pupil Personnel Services Credentials.

Admission Procedure

The M.S. in Counseling accepts applications each fall for admission the following year. **The program does not offer spring admissions.** Applicants must complete a university application and program supplemental application by the posted application deadline date for the term applying.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

Prospective applicants, including Sacramento State graduates, must submit the following to the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- official transcripts from all colleges and universities attended, *other than Sacramento State*;
- an online program supplemental application for admission, please see the department website (<https://www.csus.edu/coe/academics/graduate>) for more information.

Admission is competitive with a limited number of students admitted each year. At the end of the application and screening period, a program recommendation will be submitted to the Office of Graduate Studies for further review. Decisions regarding admission are then mailed to each applicant. Following admission, students are assigned to a faculty advisor who assists with academic advising.

The Master of Science in Counseling and the Pupil Personnel Services credentials are subject to general University and requirements. These requirements are explained in the "Graduate Studies" and the "Counselor Education" sections of this catalog. Students may be disqualified when not meeting program standards (see Counselor Education Student Handbook).

Students are strongly advised to remain in communication with the Counselor Education Program (by attending group advising sessions and meeting with their assigned faculty advisor each semester) as well as with any licensing or credentialing boards related to their area(s) of specialization (i.e., Board of Behavioral Sciences, California Commission on Teacher Credentialing) since licensing and credentialing requirements

may change. Catalog rights hold only degree requirements; they do not protect students from changes such as prerequisites required for a given course, field study hours, individual course requirements, or additional requirements imposed by licensing or credentialing agents. Students should note that the Counselor Education course listings are subject to modification.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 60

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student working toward a Master's degree must file an application for Advancement to Candidacy for the Master's degree. The purpose of this application is to provide certification to the Office of Graduate Studies that the student will complete or has completed the necessary requirements and acceptable electives for the Master's degree with a minimum 3.0 GPA. The Advancement to Candidacy application should be filed upon completion of 30 units in the program.

Note: Students must take the Writing Placement for Graduate Students (WPG) or take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver before advancing to candidacy.

The Advancement to Candidacy forms, by specialization, are obtained from the Department of Counselor Education Website (<http://csus.edu/coe>) within the "Forms and Handbooks" link. Students should complete the relevant form in consultation with their assigned academic advisor. Once the form is endorsed by the student and the advisor, it will be verified by the Department's Graduate Coordinator and then forwarded to the Office of Graduate Studies for final approval. (The form is also available from the Office of Graduate Studies; however, it does not include the Departmental instructions.) The completed form is submitted to the Department's Graduate Coordinator for signature, then forwarded to the Office of Graduate Studies for final approval.

Culminating Requirement (1 Unit)

Written Examination. All students in the M.S. in Counseling program must enroll in EDC 500¹ during their first semester in the program and complete the Counselor Preparation Comprehensive Examination (CPCE).

In addition, all students must prepare a final case study paper on a selected client from their current fieldwork experience.

In order to pass this multiple choice examination, a student must meet the minimum criterion score set by the Counselor Education Program.

Categories covered include:

- Human Growth and Development
- Social and Cultural Foundations
- Helping Relationships
- Group Work
- Career and Lifestyle Development
- Appraisal
- Research and Program Evaluation
- Professional Orientation and Ethics

In order to pass the final case study paper, a student must obtain a score of "Meet Standard" on all elements of the case study rubric for the student's specialization.

¹ Department petition required the semester prior to enrollment.

Preliminary Administrative Services Credential

Total units required for Credential: 24

Program Description

Educational Leadership and Policy Studies' Preliminary Administrative Services Credential program aims to develop P-12 educational leaders from diverse backgrounds who will positively impact P-12 educational settings. The program specifically focuses on cultivating leaders who promote learning, equity, social justice and achievement for all students.

Educational Leadership and Policy Studies seeks to prepare transformational leaders with the capacity to effectively facilitate and manage change.

Admission Requirements

1. Completion of a baccalaureate degree at the time of application;
2. GPA in the last 60 units of 2.5 or better;
3. Completion, and successful review, of CSU Mentor and program Supplemental application;
4. A minimum of 4 years teaching experience in a P-12 educational setting; and
5. Successful interview with faculty, demonstrating:

- Preparation for graduate level study
- Leadership experience
- Familiarity with current issues in education
- Knowledge of conflict resolution and negotiation skills
- Knowledge of P-12 education as a field
- Entry level understanding of ethical leadership
- Vision for P-12 education

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, Riverfront Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

The graduate degree program is subject to general University and Departmental requirements. These requirements are explained in the Graduate Degree Requirements (p. 77) section of the University Catalog.

Preliminary Administrative Services Internship Credential

Total units required for Credential: 68

Program Description

Students who are specializing in School Counseling and intend to be employed in California will need to obtain one of the following two school counseling service credentials:

- Pupil Personnel Services School Counseling Credential
- Pupil Personnel Services School Counseling Internship Credential

Admission Requirements

All applicants must meet all Preliminary Administrative Services Credential admission requirements AND must have been appointed to an administrative position by student's employing school district.

Note: Detailed requirements and procedures for admission to the Administrative Internship program may be obtained at the Department.

This is a three semester program but students will have the option of taking an additional (fourth) semester if needed.

Pupil Personnel Services School Counseling Credential

Total units required for Credential: 15

Program Description

California schools, kindergarten through high school, require their school counselors to have the PPS-SC. Students pursuing the 57-unit PPS-SC Credential follow the exact same course requirements as students with the 60-unit Master's in Counseling Degree objective who are specializing in school counseling, with the exception of a 3-unit Culminating Requirement. The 60-unit master's degree is not required, although most students elect to complete the degree. In addition to the PPS-SC course requirements, individuals who obtain the credential must pass the California Basic Educational Skills Test (CBEST), required for all K-12 credentials in California. The program meets all standards

established by the California Commission for Teacher Credentialing (CCTC).

Students pursuing the Pupil Personnel Services School Counseling Credential follow the same course requirements, with the exception of the Culminating Requirement, as do master's degree students with the School Counseling specialization objective.

Note: This program is not open to applicants who have completed master's in counseling degrees from other institutions.

EDC 272	Counseling Children and Youth	3
EDC 274	Guidance and Consultation in School Counseling	3
Total Units		15

Pupil Personnel Services School Counseling Internship Credential

Total units required for Credential: 59

Program Description

The PPS-SCI enables school districts and other educational agencies to place candidates in school counseling positions prior to the completion of credential requirements, provided that the CBEST and practicum coursework have been passed. Requests must originate in writing from the district superintendent or other appropriate officers. The program meets all standards established by the California Commission for Teacher Credentialing (CCTC).

The Pupil Personnel Services Internship Credential Program is limited only to students who are already classified students in the Department of Counselor Education in the School Counseling Specialization. This program is not open to applicants from other institutions.

Admission Requirements

Requests to enter the Pupil Personnel Services School Counseling Internship Credential program must originate in writing from the district superintendent or other appropriate officer stating that the individual is in a position or being offered a position (for the duration of at least one year) which requires the authorization of a Pupil Personnel Services Credential in School Counseling. Issuance of the Internship Credential requires passage of the CBEST, along with all admission requirements for the Counselor Education Department.

Pupil Personnel Services School Psychology Endorsement Credential

Total units required for Credential: 89-98

Program Description

The Pupil Personnel Services School Psychology Endorsement Credential is administered by the California Commission on Teacher Credentialing (CCTC). California State University, Sacramento is accredited by the CCTC to award this credential to students meeting program requirements.

The credential is required to practice as a school psychologist in the state of California. Possession of the MA in Education (School Psychology) or its equivalent, and the Pupil Personnel Services School Psychology Endorsement Credential also prepares an individual to meet the academic requirements for the California's Licensed Educational Psychologist license administered by the Board of Behavioral Science Examiners, Department of Consumer Affairs.

Unique strengths of the program include supervised training in a clinic setting, early field experience in schools that includes a minimum 200-hour field placement in public school settings, and instruction by faculty who hold school psychology credentials.

The program also offers a CCTC approved internship in school psychology. The internship is typically paid and interns are selected by employing districts. Students are not eligible for the CCTC internship option until they are ready to register for EDS 441 A, usually in the fifth semester of the program. A minimum 1200-hour internship, completed in not more than four semesters, is required and must be approved by the Internship Coordinator.

Program Requirements

The Pupil Personnel Services School Psychology Endorsement Credential requires the program outlined for the MA in Education (School Psychology) (p. 431) plus additional coursework. The requirements listed below include both MA in Education (School Psychology) courses AND the practicum and fieldwork requirements that are unique to the credential.

Note. Students who were awarded an appropriate graduate degree prior to beginning the Pupil Personnel Services School Psychology Endorsement Credential may (with the approval of relevant faculty) substitute prior course work for selected courses listed in this Plan of Study Grid.

¹ This practicum/fieldwork course is a unique requirement for the Pupil Personnel Services School Psychology Endorsement Credential.

Reading/Language Arts Specialist Credential

Total units required for Credential: 24

Program Description

A graduate student may earn a Reading/Language Arts Specialist Credential (issued by CCTC) by completing the courses listed below. This credential prepares teachers for literacy related teaching positions pre K-12 as well as for leadership roles at school and district levels. Enrollment in the Master's program is not required provided that the following admission requirements are met.

Note: Teachers must have three years of teaching experience before the Reading/Language Arts Specialist Credential can be awarded.

Admission Requirements

Admission to the Reading/Language Arts Specialist Credential requires:

- a valid California Basic Teaching Credential (e.g., Multiple Subject or Single Subject Credential);
- a minimum 3.0 GPA in the last 60 units;
- successful completion of a basic course in the Teaching of Reading from an accredited university; if reading methods course is older than seven years, must show evidence of: a) current staff development in Language and Literacy by participation in workshops, institutes, etc., (candidates must show documentation); or b) passing the RICA test within the past seven years; and
- completion of the Reading/Language Arts Specialist Credential Application (available in Eureka Hall 203 and on the College of Education's website (<http://csus.edu/coe>)).

Program Requirements

Code	Title	Units
Required Courses (24 Units)		
<i>Tier I (Take these courses first)</i>		
EDTE 200	Practicum in Decoding and Fluency: Assessment and Instruction	3
EDTE 201	Practicum in Comprehension: Assessment and Instruction	3
EDTE 203	Teaching and Assessing Writing in the Pre-K through 12 Classroom	3
EDTE 205		3
<i>Tier II (Take these courses ONLY after completion of Tier I)</i>		
EDTE 202	Language and Literacy Development in Multicultural Settings	3
EDTE 206	Leadership In Literacy	3
EDTE 207	Advanced Practicum in Reading Difficulties: Assessment and Intervention	3
EDTE 209	Literature for the Diverse Pre- K through 12 Classroom: Issues, Models and Strategies	3
Total Units		24

Teaching Credentials

College of Education - Teaching Credentials (<https://www.csus.edu/coe/academics/credentials/programs>)

Preliminary Teaching Credentials Programs

1. Education Specialist: Early Childhood Special Education (ECSE) (p. 480)
2. Education Specialist: Mild/Moderate(M/M) Disabilities Specialist (p. 457)
3. Education Specialist: Mild/Moderate(M/M) Disabilities Specialist with Multiple Subject (p. 461)
4. Education Specialist: Moderate/Severe(M/S) Disabilities Specialist (p. 466)
5. Education Specialist: Moderate/Severe(M/S) Disabilities Specialist with Multiple Subject (p. 471)
6. Multiple Subject, with English Learner Authorization (ELA) (p. 475)
7. Single Subject, with English Learner Authorization (ELA) (p. 485)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools our teacher education programs are accredited by the California Commission on Teacher Credentialing.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Bilingual Authorization

All credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong) can complete additional requirements to add the Bilingual authorization in Spanish or Hmong.

Faculty

ALLENDER, DALE

ARELLANO, ADELE	EDMS 272. Methods for Teaching Second Language Learners, Multiple Subject (ELD and SDAIE). 3 Units
BAKER, SUSAN	Prerequisite(s): EDUC 170
BEDDOW, MARGARET	Term Typically Offered: Fall, Spring
BERTA-AVILA, MARGARITA	Focus on teaching candidates the methods, techniques and strategies needed to make content accessible for second language learners.
BIAGETTI, STEPHANIE	Candidates will learn to use the state ELD standards to create ELD lessons and SDAIE lessons within multicultural framework. Candidates will also learn how to interpret and implement formative and summative assessments. Lecture, demonstration, modeling, group work, discussions, field experience.
CHAPLIN, MAE	EDMS 299. Special Problems: Multiple Subject. 1 - 3 Units
CHO, EUN MI	Term Typically Offered: Fall, Spring
CHUNG, CHIA-JUNG	Individual projects for Multiple Subject credential candidates at graduate/credential level especially for students capable of independent study.
CINTRON, JOSE	Admission by written approval of the instructor with whom the student will be working and the Department Chair.
CLARAVALL, ERIC	Note: This course may be repeated for up to 9 units of credit.
COLLADO, CINDY	Credit/No Credit
COUGHLIN, MIMI	EDMS 300. Teaching Performance Assessment-Multiple Subjects-Mathematics. 1 Unit
DALEY, STEVEN E.	Corequisite(s): EDMS 434B or EDMS 430B or EDSP 420B
DALY, LANA	Term Typically Offered: Fall, Spring
DURAN, ELVA	Candidates in the Teacher Preparation Program must complete the Teaching Event for the Performance Assessment for California Teachers. The Teaching Event requires candidates to plan and teach an instructional sequence in their student teaching placement. They must also assess student learning during this lesson sequence and submit a videotape with material recorded during the lesson sequence. The Teaching Event is a summative assessment and one of several requirements that must be completed in order to receive a recommendation for a teaching credential.
GARDNER, PAULA	Credit/No Credit
GEE, KATHLEEN	EDMS 310C. Pedagogy C: Classroom Instruction and Positive Management for Diverse Classrooms. 1 Unit
GONSIER-GERDIN, JEAN	Prerequisite(s): Admission to Multiple Subject Credential Program. Successful completion of EDMS 310B.
GONZALES, RACHAEL	Term Typically Offered: Fall, Spring
HUANG, HUI-JU	Reinforces the cycle of teaching: lesson planning, implementing, reflection and application at a deeper developmental level. Intensive support for classroom management and discipline; disruptive behaviors; problem-solving communication with district administrators, parents at community level as child advocates. Emphasis on differentiating instruction to individual needs of diverse learners. Scaffolding to support growth and developmental stages of the learning-to-teach process and professional responsibilities. Infusion of e-portfolio development and the integration of technology.
IVES, SARAH	Credit/No Credit
LARDY, CORINNE	
LIM, BRIAN S.	
LOEZA, PORFIRIO	
MERRILL, MARCY	
MICHALS, ELISA	
NORRIS, AAMINAH	
NOWELL, LINDA S.	
OWENS, WILLIAM THOMAS	
PAN, RAVIN	
PELLA, SHANNON	
PORTER, JENNA	
SOLARI, LYNN J	

EDMS 314. Mathematics Curriculum and Instruction for the Diverse K-8 Classroom. 3 Units**Term Typically Offered:** Fall, Spring

Focusing on a "meaning approach" to mathematics which prepares candidates to teach mathematics content standards for California public schools to all students, including English Learners and special needs; to use analytical and critical thinking skills in mathematics; and to infuse mathematics topics, themes, and concepts into other subject areas. Discussion, field visits, microteaching, demonstrations, presentations, and technological applications for mathematics will be included.

EDMS 315. History-Social Science Curriculum and Instruction for the Diverse K-8 Classroom. 3 Units**Term Typically Offered:** Fall, Spring

Prepares teacher candidates in multiple subjects to teach the history-social science content standards for California public schools to all students, including English Learners and special needs; to use analytical and critical thinking skills in history and social science; and to integrate history-social science topics, themes, and concepts with other subject areas. Pedagogical topics include the use of timelines, maps, artifacts, case studies, simulations, literature, art, multiple perspectives, SDAIE, cooperative projects, and research activities.

EDMS 316. Science Curriculum and Instruction for the Diverse K-8 Classroom. 3 Units**Term Typically Offered:** Fall, Spring

Knowledge of basic principles and strategies related to science education, incorporating an expanded treatment of science pedagogy, manipulatives, technological supports, accommodations, adaptive instructional techniques, and other strategies specially suited to the instruction of diverse student populations.

EDMS 317. Visual and Performing Arts Methods for the Diverse K-8 Classroom. 1 Unit**Prerequisite(s):** Admission to Multiple Subject Teacher Credential Program.**Term Typically Offered:** Fall, Spring

Prepares candidates in multiple subjects to teach the visual and performing arts content standards for California public schools to all students, including English Learners, and special needs students, through interrelated activities with involvement in specific teaching strategies which are effective in achieving the goals of developing artistic perception and creative expression, understanding the cultural and historical origins of the arts, making informed judgments about the arts, and understanding the arts connections and relationships across curriculum.

EDMS 319A. Language and Literacy I for the Diverse K-8 Classroom. 3 Units**Term Typically Offered:** Fall, Spring

Develops understandings, attitudes, and competencies needed for effective instruction of language and literacy for mainstream populations, English Learners, and students with special needs. Instructional strategies for teaching concepts about print, phonemic awareness, phonics, fluency, vocabulary, and comprehension of narrative/expository texts. Instructional planning aligned with current content standards, and other content and preparation standards as appropriate. Assessment strategies that inform planning and instruction. Special emphasis on literacy instruction in bilingual and multilingual settings. Lecture and discussion, includes a field experience component.

EDMS 319B. Language and Literacy II for the Diverse K-8 Classroom. 3 Units**Prerequisite(s):** EDMS 319A**Term Typically Offered:** Fall, Spring

Extends understandings, attitudes, and competencies needed for effective instruction of language and literacy for mainstream populations, English Learners, and students with special needs. Instructional strategies for teaching narrative/expository text and spelling. Instructional planning aligned with current content standards, and other content and preparation standards as appropriate. Assessment strategies that inform planning and instruction. Special emphasis on literacy instruction in bilingual and multilingual settings. Lecture and discussion, includes a field experience component.

EDMS 330A. Educational Technology Lab I. 1 Unit**Prerequisite(s):** Admission to Multiple Subject Credential Program.**Term Typically Offered:** Fall only

Educational technology lab course will prepare the candidates use technology for three areas: coursework in the teaching credential program, enhancing teaching and learning and eportfolio development. Students are introduced to an array of digital technologies for teaching relevant for K-12 student learning. Among the topics include digital literacy, copyright, fair use, Internet safety, Creative Commons, presentation tools, ISTE standards, technology and Teaching Performance Expectations, presentation tools, interactive whiteboards, and many others. The focus is on students learning about technology use in teaching and learning in K-12 schools. Candidates are prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio.

Credit/No Credit

EDMS 330B. Educational Technology Lab II. 1 Unit**Prerequisite(s):** EDMS 330A**Term Typically Offered:** Spring only

In this course, candidates will learn to create, use, and manage appropriate and relevant educational technological processes and resources. The candidates will deepen their knowledge of technology in the K-12 public school environment and apply their understanding to improve student engagement and student learning outcomes. The candidates will also learn to use technology associated with the Teaching Credential Program and finalize their electronic portfolio for the program.

Credit/No Credit

EDMS 332. Assessment Center Laboratory for Multiple Subject Candidates. 2 Units**Corequisite(s):** EDMS 430B or EDMS 434B or EDSP 420B**Term Typically Offered:** Fall, Spring

Individualized support to guide multiple subject candidates through the process of completing and submitting the culminating (PACT) Teaching Event and completion of their electronic portfolio. The signature assignments, formative PACT assessments and summative PACT Teaching Event represent a working electronic portfolio embedded throughout the credential program, and the summative component will be polished and formally submitted at the conclusion of the EDMS 332 laboratory course.

Credit/No Credit

EDMS 334A. Principles of Teaching in a diverse K - 8 classroom - A. 2 Units**Prerequisite(s):** Admission to the Multiple Subject Teacher Credential Program**Corequisite(s):** EDMS 334B**Term Typically Offered:** Fall, Spring

This is the first course in a two-course series. Candidates learn foundational knowledge necessary to execute the Plan-Instruct-Assess-Reflect cycle of mindful teaching. Introduction to the theoretical foundations of teaching (learning theory, human development theory, multicultural education, inclusive and differentiated education, assessment frameworks, and models of teaching and curriculum planning), the history of public education in the U.S., and effective strategies and practices for educating all learners to rigorous outcomes, especially those who are English learners or who have special needs.

EDMS 334B. Principles of Teaching in a diverse K-8 classroom - B. 4 Units**Prerequisite(s):** Admission to the Multiple Subject Teacher Credential Program**Corequisite(s):** EDMS 334A**Term Typically Offered:** Fall, Spring

This is the second course in a two course series. Candidates translate theories, concepts and frameworks presented in Principles of Teaching A into strategies and practices for instruction, assessment, and curriculum development in the K-8 classroom. Candidates will create activities, develop lesson and unit plans, and engage in simulations, peer teaching, and workshops.

EDMS 335A. Advanced Principles of Teaching in a diverse K-8 classroom - A. 1 Unit**Prerequisite(s):** EDMS 334A and EDMS 334B**Corequisite(s):** EDMS 335B**Term Typically Offered:** Fall, Spring

This course is the first in a two-course series. It deepens candidates' knowledge of theories and practices necessary to execute the Plan-Instruct-Assess-Reflect cycle of mindful teaching for diverse students. Candidates will expand their understandings of how theoretical frameworks for teaching (learning theory, human development theory, multicultural education, inclusive and differentiated education, assessment frameworks, and models of teaching and curriculum planning) are applied in varied public school classrooms and contexts.

EDMS 335B. Advanced Principles of Teaching in a diverse K-8 classroom - B. 2 Units**Prerequisite(s):** EDMS 334A and EDMS 334B**Corequisite(s):** EDMS 335A**Term Typically Offered:** Fall, Spring

In this course, candidates translate theories, concepts and frameworks presented in Advanced Principles of Teaching A into strategies and practices for instruction, assessment, and curriculum development in the K-8 classroom. Candidates will create activities, develop lesson and unit plans that integrate and apply various theories and frameworks for instruction. Candidates will design, lead and engage in simulations, peer teaching, and workshops. Workshop and discussion.

EDMS 401. Observation and Participation in Elementary Schools. 2 Units**Prerequisite(s):** Admission to Teacher Preparation Program**Term Typically Offered:** Fall, Spring

Observations in classes in several situations and grade levels; service as an assistant in at least one classroom. Visits to community agencies which serve the school population.

Credit/No Credit

EDMS 420A. Field Experience: Multiple Subject. 4 Units**Prerequisite(s):** Admission to Teacher Preparation Program.**Term Typically Offered:** Fall, Spring

Two semesters of student teaching multiple subjects in public school classrooms providing experiences at two grade levels and with different cultural groups. Intensive, realistic experiences with continuous and varied responsibilities. This first semester student teaching with integrated methods course work requires half-day participation. Experiences in classroom teaching and participation in many of the out-of-class duties of a teacher.

Credit/No Credit

EDMS 420B. Student Teaching: Multiple Subject. 10 Units**Prerequisite(s):** Admission to Teacher Preparation Program.**Term Typically Offered:** Fall, Spring

Second semester student teaching with integrated methods course work requires full-day participation of the student. Emphasis on classroom teaching and further experience with community services.

Credit/No Credit

EDMS 430A. Student Teaching I Basic. 5 Units**Prerequisite(s):** Admission to Teacher Preparation Program**Term Typically Offered:** Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This first semester of student teaching is completed concurrently with integrated coursework.

Credit/No Credit

EDMS 430B. Student Teaching II: Basic. 7 Units**Prerequisite(s):** Admission to Teacher Preparation Program**Term Typically Offered:** Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This second semester of student teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing, and assessing instruction for whole classes of students.

Credit/No Credit

EDMS 434A. Field Experience for Elementary Teachers. 2 Units**Prerequisite(s):** Admission to the Multiple Subject Credential program**Term Typically Offered:** Fall, Spring

Candidates complete field experience in public school classrooms concurrently with integrated coursework. Field experiences focus primarily on observing model lessons and activities and on collaborative planning, implementing and assessing instruction for small groups of students.

Credit/No Credit

EDMS 434B. Student Teaching for Elementary Teachers. 4 Units**Prerequisite(s):** EDMS 434A**Term Typically Offered:** Fall, Spring

One semester of teaching multiple subjects in a public school setting with diverse learners. This final semester of student teaching is completed concurrently with integrated coursework and focuses primarily on planning, implementing and assessing instruction for whole classes of students.

Credit/No Credit

EDSP 119. Legal and Social Foundations of Special Education. 3 Units**Term Typically Offered:** Fall, Spring

Course provides analysis and practical application of social, legal, and ethical practices in the field of special education. Provides candidates with an overview of state and federal laws and regulations, current case law, and up-to-date mandates from No Child Left Behind. Competencies needed to develop individualized programming for children with disabilities (IEP and IFSP), verification criteria, parent's rights, IEP development and implementation, goal and objective development, placement procedures and IEP monitoring will be emphasized.

EDSP 201. Developing Collaborative Partnerships with Families, Professionals, and Communities. 3 Units**Prerequisite(s):** Admittance to the Education Specialist Credential Program: Early Childhood Special Education.**Term Typically Offered:** Fall only

Overview of the historical, philosophical, theoretical/empirical, and legal bases for family centered, relationship based special education services. Emphasis is on developing cross-cultural competence and a strengths-based, student centered approach to empowering families and advocating for students with disabilities. Students will develop skills required to build and maintain collaborative relationships through effective communication and teaming with families, students, professional colleagues, and community members. These skills will be applied in the context of school family-community partnerships, professional partnerships, person-centered planning/future planning, and IFSP/IEP development.

EDSP 205. Methods in Access and Inclusion in the Core Curriculum: Mod/Severe Disabilities. 3 Units**Prerequisite(s):** EDSP 209, EDSP 216/216B, or advisor approval.**Term Typically Offered:** Fall, Spring

Focus will be on the following four areas: 1) unit design, varied and modified outcomes, and evaluation of student skills; 2) instructional implementation strategies, including modeling, demonstration, direct and indirect, discovery, and cognitive/meta-cognitive strategies; 3) varied instructional formats and groupings, including cooperative learning, peer-mediated instruction, peer tutoring, and peer coaching; and 4) adaptations and accommodations which will enhance success for the full range of students with disabilities within the general education curriculum.

EDSP 206. Collaborative Program Planning with Families, Professionals, and Communities. 3 Units**Prerequisite(s):** Admittance to Mild/Moderate or Moderate/Severe Credential program or advisor approval**Term Typically Offered:** Fall, Spring

Students will develop skills in the areas of: family collaboration; school and community collaboration in the context of IEP development and school partnerships; cross-cultural competence; communication; person-centered planning/future planning, partnering with families; transdisciplinary teaming to develop the IEP and the ITP; and facilitating social relationships and friendships as part of the school experience.

EDSP 207. Secondary/Post-Secondary Methods and Transition Planning: Moderate/Severe Disabilities. 3 Units**Prerequisite(s):** EDSP 119, EDSP 206, EDSP 413, or advisor approval.**Term Typically Offered:** Fall, Spring

Students will develop knowledge and skills related to strategies for collaboration and inclusion with general education faculty members in the middle and high school environment. Students will develop skills in community-based instruction transition planning, in addition to designing outcomes and supports within the general education curriculum. Students will also gain knowledge and skills related to vocational and supported employment, and preparation for work after high school, and how to facilitate a successful transition to post-secondary education, supported living, and supported employment.

EDSP 208. Evidenced-based Assessment and Instruction: Mod/Severe Disabilities. 3 Units**Prerequisite(s):** EDSP 119, EDSP 230/230B, EDSP 235 advisor approval.**Corequisite(s):** EDSP 414**Term Typically Offered:** Fall, Spring

Students will be provided with a strong basis in ecological and functional assessment in inclusive school and community environments. Students will develop the ability to: a) set up performance analyses within natural environments; b) map out cognitive initiation vs. performance, and the communication requirements of various settings; c) conduct baselines within general education classrooms, the school, and the community, and develop resulting IEP goals and objectives; and, d) write effective and systematic instructional programs to teach a wide variety of skills across natural environments.

EDSP 209. Developing Augmentative & Alternative Communication Systems: Assessment and Intervention. 3 Units**Prerequisite(s):** EDSP 119, EDSP 206, EDSP 235 or advisor approval.**Term Typically Offered:** Fall, Spring

Participants will learn: a) how to assess communicating behavior from nonsymbolic to symbolic and unintentional to sophisticated in students with disabilities; b) to work with audiologists and ophthalmologists to assess sensory functioning related to communication; c) to develop communication system intervention plans, both low and high tech; and d) how to implement instruction across multiple environments and with multiple partners. In addition, students will learn strategies for facilitating interactions between students with and without disabilities, teaching others to utilize adapted communication systems, and collaboration with varied professionals.

EDSP 210. Assessment and Evaluation in Early Childhood Special Education. 3 Units

Prerequisite(s): Admittance to the Education Specialist Credential Program: Early Childhood Special Education
Term Typically Offered: Fall only

Quality practices in early childhood assessment using a range of culturally appropriate tools and techniques, parent-professional-collaboration, transdisciplinary team assessment, assessment reporting and translating results into intervention planning. Participants will demonstrate skills in planning, carrying out and reporting results of assessments/evaluations for eligibility determination, program planning, and monitoring ongoing progress for infants, young children and their families.

EDSP 211. Curriculum, Intervention Strategies, and Environments in ECSE I: Infants & Toddlers. 3 Units

Prerequisite(s): Admittance to the Education Specialist Credential Program: Early Childhood Special Education
Term Typically Offered: Spring only

Designed to develop the skills necessary to design and implement developmentally appropriate curriculum and intervention strategies for infants and toddlers with disabilities in a range of learning environments including home, center-based and community programs.

EDSP 212. Curriculum, Intervention Strategies, and Environments in ECSE II: Preschool. 3 Units

Prerequisite(s): Admittance to the Education Specialist Credential Program: Early Childhood Special Education
Term Typically Offered: Fall only

Designed to develop the skills necessary to design and implementation developmentally appropriate curriculum and intervention strategies for young children with disabilities in a range of learning environments including home, center-based and community programs. Lecture.

EDSP 216. Understanding the Implications of Developmental Diversity in Children. 3 Units

Term Typically Offered: Fall only

Using a critical disability theory perspective, examines early development of young children across developmental areas. Explores: 1) atypical development due to prenatal, perinatal, and early childhood developmental risk factors; 2) childhood development theories and how they support educators' understanding of children, families and developmentally appropriate practices; 3) service delivery models and key transitions; and 4) implications of developmental disabilities across the lifespan.

EDSP 218. Instructional Strategies: Low Incidence Disabilities. 3 Units

Prerequisite(s): EDSP 205, EDSP 208, EDSP 414 or advisor approval
Corequisite(s): EDSP 236, EDSP 415 or EDSP 421 or advisor approval
Term Typically Offered: Fall, Spring

Students will learn advanced methods of assessment and instruction for students with moderate to severe and profound disabilities, and multiple disabilities. Students will learn to design assessments and work with transdisciplinary team members to write an integrated assessment report, and present the report. Students will develop IEPs/ITPs based on the transdisciplinary information, write instructional programs using research-based methods, and design methods for monitoring progress using ongoing instructional data.

EDSP 220. Language and Literacy in Inclusive Classrooms I. 3 Units
Term Typically Offered: Fall, Spring

This course provides candidates with the evidence based principles and systematic and explicit techniques to develop phonological awareness, phonics, concepts about print, oral and written language, and word recognition strategies. Candidates will learn techniques specific to assessing a student in reading and applying the information to assist the student with reading difficulties. Accommodations and modifications for students with mild, moderate, and severe disabilities will be emphasized.

EDSP 221. Language and Literacy in Inclusive Classrooms II. 3 Units

Prerequisite(s): EDSP 220
Term Typically Offered: Fall, Spring

Course provides candidates with evidence based principles, systematic and explicit techniques, procedures in reading fluency, comprehension, and vocabulary development. Candidates will learn literal and higher level comprehension strategies that assist students in understanding narrative and expository text. Candidates will receive instruction on the principles, techniques, and procedures for teaching spelling, handwriting, and critical study skills. Accommodations and modifications for students with mild, moderate and severe disabilities will be emphasized.

EDSP 225A. Assessment and Evaluation for Students with Mild/Moderate Disabilities. 2 Units

Prerequisite(s): Admittance to Mild/Moderate/Severe Credential program or permission of respective special education coordinator.
Corequisite(s): EDSP 225B
Term Typically Offered: Fall, Spring

Candidates examine relationships between assessment, curriculum, and instruction through application of a variety of formal and informal assessments and curricula. Candidates administer and interpret norm-referenced, criterion-referenced, and curriculum-based instruments that assess academic achievement, social behavior, and emotional functioning. Candidates learn basic principles and strategies related to using and communicating results of a variety of assessment and evaluation approaches. Authentic assessment strategies, specifically designed to support and inform instruction, will be emphasized.

EDSP 225B. Assessment and Evaluation for Students with Mild/Moderate Disabilities Lab. 1 Unit

Corequisite(s): EDSP 225A
Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 225A) in a setting serving students with mild/moderate disabilities.
 Credit/No Credit

EDSP 229. Curriculum and Instruction Strategies for Students with Mild/Moderate Disabilities. 3 Units

Prerequisite(s): Admittance to Mild/Moderate, Moderate/Severe, Multiple Subjects, and Single Subject Credential programs or permission of respective special education advisors.

Term Typically Offered: Fall, Spring

Methods for designing and implementing instruction for students with mild/moderate disabilities. Topics include typical/atypical human development, resilience and protective factors, evidenced-based instructional strategies, designing and managing environments and materials, differentiated instruction, collaborative teaming to design and evaluate integrated services, technology (including assistive technology) to support access to general education curriculum, implementation of UDL, modifications and adaptations of state standards, components of IDEA and their implication for a multidisciplinary approach developing IEPs for special needs students included in general education classrooms.

EDSP 229B. Curriculum and Instruction Strategies for Students with Mild/Moderate Disabilities Lab. 1 Unit

Corequisite(s): EDSP 229

Term Typically Offered: Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 229) in a setting for students with mild/moderate disabilities who receive special education services. Students will verify multiple experiences across the age-span and in inclusive settings, agencies, and other natural environments.
Credit/No Credit

EDSP 230. Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges. 3 Units

Term Typically Offered: Fall, Spring

Comprehensive study and application of intervention strategies that enhance the quality of life for students with mild/moderate disabilities. Students will learn (a) how to design learning environments that prevent and reduce problem behaviors, (b) learn how to identify and assess problem behavior using functional behavioral assessment methods, (c) learn how to design and implement positive behavioral support interventions which are in compliance with federal IDEA law, and (d) apply behavioral procedures on a systemic, school wide basis.

EDSP 230B. Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges Lab. 1 Unit

Prerequisite(s): Admittance into Mild/Moderate or Moderate/Severe Credential program, APE program, or permission of respective special education coordinator.

Corequisite(s): EDSP 230

Term Typically Offered: Fall, Spring

Comprehensive study and application of intervention strategies that enhance the quality of life for students with mild/moderate disabilities. Students will learn (a) how to design learning environments that prevent and reduce problem behaviors, (b) learn how to identify and assess problem behavior using functional behavioral methods, (c) learn how to design and implement positive behavioral support interventions which are in compliance with federal IDEA law, and (d) apply behavioral procedures on a systemic, school wide basis.

EDSP 232. Effective Communication and Collaborative Partnerships. 2 Units

Term Typically Offered: Fall, Spring

The content provided in this course is directed toward the preparation of pre-service and/or intern teachers of students with mild/moderate disabilities. To facilitate positive and inclusive environments, the course provides instruction in effective communication, collaboration, and consultation with individuals with disabilities and their family, primary caregivers, general/special education teachers, related service personnel, administrators, the business community and public/non-public agencies. Candidates will also be supported in the development of a Preliminary Mild/Moderate Education Specialist Portfolio.

EDSP 233. Final Student Teaching Seminar: Mild/Moderate. 1 Unit

Prerequisite(s): EDSP 232

Corequisite(s): EDSP 472 or EDSP 473

Term Typically Offered: Fall, Spring

Designed to allow the special education candidate teacher/intern to focus upon two overall issues pertaining to their specific needs: problems and resolutions particular and general to their teaching assignment and culminating portfolio development.

Credit/No Credit

EDSP 234. Directed Fieldwork Seminar: Early Childhood Special Education. 1 Unit

Prerequisite(s): Admittance to the Education Specialist Credential Program: Early Childhood Special Education

Corequisite(s): EDSP 474 or EDSP 475 or EDSP 476 or EDSP 477

Term Typically Offered: Fall, Spring, Summer

Designed to allow the ECSE teacher candidate to focus on two overall issues: Problems and resolutions particular and general to their teaching assignment, and the development and/or refining of a preliminary Level I Performance Portfolio.

Note: May be repeated for up to 2 units of credit.

Credit/No Credit

EDSP 235. Field Seminar in Program and Instruction: Mod/Severe Disabilities. 2 Units

Prerequisite(s): Admittance into Mild/Moderate or Moderate/Severe Credential program or advisor approval

Term Typically Offered: Fall, Spring

This field seminar will provide group discussion as well as direct instructional guidance in classrooms and schools in which students in the Moderate/Severe Specialist Credential or Autism Spectrum Disorders Added Authorization (ASDAA) are conducting their assignments.

EDSP 236. Student Teaching Seminar: Moderate/Severe Disabilities.**1 Unit****Prerequisite(s):** EDSP 208 and EDSP 414**Corequisite(s):** EDSP 218, EDSP 415 or EDSP 421 or advisor approval**Term Typically Offered:** Fall, Spring

This seminar accompanies the final Student Teaching II experience. Students will meet for two hours, eight times, during the semester to discuss their experiences and problem solve any questions or challenges related to their Student Teaching II requirements. Since this is the advanced experience, it is expected that the seminar will be primarily focused on professional issues related to the collaborative implementation of effective programs for students with moderate/severe disabilities. At each meeting there will be topics for discussion generated by the professor, but also time for collaborative problem solving around specific students and program issues in the student teaching settings.

Credit/No Credit

EDSP 237. Transition Strategies for Students with Mild/Moderate Disabilities.**3 Units****Term Typically Offered:** Fall, Spring

Candidates will examine legal mandates specific to transition planning and implementation, and evaluate transitional life experiences for students with mild/moderate disabilities across the lifespan. Candidates will explore and implement social skills, and career and vocational program planning for secondary students with Mild/Moderate disabilities. Planning will include the student, community services, and other community resources such as parents and various professionals that will lead to increased student learning with career goals and objectives to support their transition to post-school settings.

EDSP 237B. Transition Strategies for Students with Mild/Moderate Disabilities Lab.**1 Unit****Corequisite(s):** EDSP 237.**Term Typically Offered:** Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 237) in inclusive setting for students with mild/moderate disabilities.

Credit/No Credit

EDSP 250. Education Research.**3 Units****Prerequisite(s):** Advancement to Candidacy for Special Education concentration; passing WPG exam for all other concentrations.**Term Typically Offered:** Fall, Spring

Studies qualitative and quantitative methods in the development of reliable knowledge in the field of education. Includes identification and formulation of research problems, research designs and presentation of reports representative of different research strategies. Classified students are encouraged to take this course early in their graduation programs.

EDSP 251. Education in a Democratic, Pluralistic Society.**3 Units****Prerequisite(s):** Passing WPG exam**Term Typically Offered:** Fall, Spring

Advanced study of social and psychological issues which need to be considered in education relating to the client, the educator, the community and society. Addresses implications of theories of learning, assessment, individual differences and social/political influences.

EDSP 276A. Education of Students with Emotional and Behavioral Disorders.**2 Units****Prerequisite(s):** Admittance into Mild/Moderate or Moderate/Severe Credential or M.A. in Education programs and EDSP 230 or equivalent**Corequisite(s):** EDSP 276B**Term Typically Offered:** Fall, Spring

Concentrate on the assessment, characteristics, interventions and classroom strategies, which uniquely address the educational needs of students with emotional and behavioral disorders. Students will review current laws, policies and selected literature specific to students identified as EBD and their families. Strategies to create and promote collaborative partnerships with parents, mental health representatives and/or other service providers will be presented.

EDSP 276B. Education of Students with Emotional and Behavioral Disorders - Lab.**1 Unit****Prerequisite(s):** Admittance into Mild/Moderate or Moderate/Severe Credential or M.A. in Education programs and EDSP 230 or equivalent**Corequisite(s):** EDSP 276A**Term Typically Offered:** Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDSP 276A) in serving students with emotional and behavioral disorders. Students are required to participate in class visitations, agency visitations, and interviews.

EDSP 281. Critical Issues in Special Education Research and Practice.**6 Units****Prerequisite(s):** Successful completion of Education Specialist Credential coursework and student teaching—Mild/Moderate Disabilities Credential, Moderate/Severe Disabilities Credential or Early Childhood Special Education Credential program**Term Typically Offered:** Summer only

This course provides an introduction to Action Research in the field of special education. The overall goal is to improve teacher effectiveness in the classroom through research and develop teacher-researchers, producers and consumers of empirical knowledge. Students will develop research writing skills to understand problems of practice, critical issues, and policy in special education. The course is designed to facilitate connections between methodological paradigm and teaching practices related to doing action research and covers quantitative, qualitative, and mixed-methods research approaches.

EDSP 290. Seminar for Culminating Experiences.**3 Units****Prerequisite(s):** Approval of Culminating Experience Proposal or instructor permission.

Seminar to focus on topics/elements/expectations to be included in the culminating experiences (thesis, project, or comprehensive exam). Successful completion of the course requires completion of Chapters 1 and 2 of the thesis/project and the beginning of Chapter 3 for the MA thesis/project option or an exam petition to be approved by the departmental exam committee, including annotated bibliographies and position papers on the focal topics for the MA comprehensive exam option.

EDSP 292. Teaching English Learners with Disabilities. 3 Units
Term Typically Offered: Fall, Spring

Candidates will learn basic principles, strategies and procedures for teaching English Learners with disabilities. Compliance and legal issues related to English Learners identified with disabilities, including writing linguistically appropriate goals and objectives, and implementing culturally responsive strategies will be addressed. Systematic and explicit strategies for accommodating and modifying curricular materials for English Learners with disabilities in inclusive classrooms will be emphasized.

EDSP 292B. Teaching English Learners with Disabilities Lab. 1 Unit
Corequisite(s): EDSP 292
Term Typically Offered: Fall, Spring

Field-based practice lab will be a synthesis and application of course content (EDSP 292) in the implementation of culturally responsive, systematic and explicit strategies, and curricular material involved in teaching English Learners with disabilities in inclusive classrooms.
Credit/No Credit

EDSP 297. Current Issues in Special Education. 3 Units
Prerequisite(s): Passing WPG exam
Term Typically Offered: Fall, Spring

Examines current issues in special education through review of selected journal articles, presentations by guest lecturers and class discussion. Students will be required to write a series of brief position papers in professional style on selected topics.

EDSP 298. Master's Seminar in Special Education. 3 Units
Prerequisite(s): EDSP 297
Corequisite(s): EDSP 297
Term Typically Offered: Fall, Spring

Students choosing Program A for the M.A. in Education, Special Education option must register for the seminar during their final semester of study, prior to attempting the written comprehensive examination. In the seminar, students will study problems and issues associated with specialty areas as well as with the field of special education as a whole.

EDSP 299. Special Problems: Special Education. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects for Special Education credential candidates at graduate/credential level especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and the Department Chair.

Note: This course may be repeated for up to 9 units of credit.

Credit/No Credit

EDSP 413. Field Experience I: Moderate/Severe Disabilities. 3 Units
Prerequisite(s): EDSP 235 or advisor approval
Term Typically Offered: Fall, Spring

Students will spend two days per week in a school where students with moderate/severe disabilities are included in general education classes and other school activities. They will be assigned both a general and special education cooperating teacher. These teachers will work with the University supervisor to make sure that the student is able to complete the assignments and required competencies. The University supervisor will observe and evaluate the practicum student at least four times during the semester. An evaluation will be completed at the end of the semester.
Credit/No Credit

EDSP 414. Field Experience II: Moderate/Severe. 3 Units
Prerequisite(s): EDSP 413 or equivalent
Term Typically Offered: Fall, Spring

The second phase of supervised field experience for specialist candidates in the Level I moderate/severe program or ASDAA program. Candidates spend 160-hours in a school setting with students who have moderate/severe disabilities. They will work directly with a qualified cooperating teacher and a University supervisor throughout a semester to complete assignments and required competencies. Assignment evaluation will be based on written and observational criteria. An evaluation will be completed at the midterm and at the end of the semester.
Credit/No Credit

EDSP 415. Student Teaching: Moderate/Severe. 5 Units
Prerequisite(s): EDSP 414
Corequisite(s): EDSP 236
Term Typically Offered: Fall, Spring

The culminating phase of field experience for specialist candidates in the Level I moderate/severe credential program. Candidates will spend 320-hours in a public school setting with students who have moderate/severe disabilities. They will work directly with a qualified mentor/cooperating teacher and a University supervisor throughout a semester to complete assignments and required competencies. Assignment evaluation will be based on written and observational criteria. An evaluation will be completed at the midterm and at the end of the semester.
Credit/No Credit

EDSP 420A. Multiple Subject Field Experience. 4 Units
Term Typically Offered: Fall, Spring

Initial (Phase I) Multiple Subject credential student teaching, with integrated methods coursework, is a M-F, half-day fieldwork requirement. Effective Instruction and classroom management are the focus of the Initial Phase I student teaching experience. Candidates must meet the criteria for student teaching to be accepted to this course.

Note: This is a full semester student teaching experience.

Credit/No Credit

EDSP 420B. Multiple Subject Student Teaching. 5 Units
Term Typically Offered: Fall, Spring

Final semester of a Multiple Subject credential student teaching with integrated methods coursework requires M-F, full-day participation of the student. Emphasis on classroom teaching and further experience with community services. Candidates must meet the criteria for student teaching to be accepted to this course.

Note: Approximately 300+ hours are required to meet competencies.

Credit/No Credit

EDSP 421. Intern Teaching: Moderate/Severe Disabilities. 5 Units**Prerequisite(s):** EDSP 414 and instructor approval**Corequisite(s):** EDSP 236**Term Typically Offered:** Fall, Spring

Intern teaching full day, M-F, for the semester in a host LEA/District providing services for students receiving moderate/severe special education services. Interns must meet CTC-mandated criteria and district must have an active Memorandum of Understanding with the university. Intern serves as a teacher of record and is employed by the district. Is supported by a university supervisor and an on-site mentor to make progress towards the program competencies and standards. An evaluation will be completed at the midpoint and end of the semester.
Credit/No Credit

EDSP 471. Initial Student Teaching: Mild/Moderate. 4 Units**Term Typically Offered:** Fall, Spring

Candidates will student teach half day/five days per week for the full semester in a setting that serves students with mild/moderate disabilities. Cooperating teachers will work with the University supervisor to support the candidate in completing required assignments and competencies. An evaluation will be completed at the mid point and end of the semester.

Note: Signature of credential candidates student's special education advisor is required on application for student teaching.

Credit/No Credit

EDSP 472. Student Teaching: Mild/Moderate. 5 Units**Prerequisite(s):** EDSP 471 or equivalent**Corequisite(s):** EDSP 233**Term Typically Offered:** Fall, Spring

Student teaching full day, M-F, for the semester in a cooperating LEA District providing services for students receiving mild/moderate special education. Cooperating teachers work with the University supervisor to support the candidate in completing the required assignments and competencies. An evaluation will be completed at the mid point and end of the semester. Variable units depending on instructor recommendation and individualized student and program considerations.

Note: Signature of credential candidates' special education advisor is required on application for student teaching.

Credit/No Credit

EDSP 473. Intern Teaching: Mild/Moderate Disabilities. 5 Units**Prerequisite(s):** All criteria related to recommendation for the intern credential and instructor approval**Corequisite(s):** EDSP 233**Term Typically Offered:** Fall, Spring

A credit/no credit directed internship in a district, county office of education or program serving students with mild/moderate disabilities. Candidates must meet the criteria for an internship to be accepted to this course. A University supervisor will support the candidate in completing all required competencies. An evaluation will be completed at mid point and end of the semester.

Note: Signature of credential candidates' special education advisor is required on application.

Credit/No Credit

EDSP 474. Directed Field Experience in ESCE: Infants/Toddlers. 3 Units**Prerequisite(s):** Admittance to the Education Specialist Credential Program: Early Childhood Special Education**Corequisite(s):** EDSP 234**Term Typically Offered:** Fall, Summer

Directed field experience in a cooperating school district, county office of education or appropriate privately operated program providing early intervention services for infants and toddlers and their families. Candidates must secure faculty approval by prior application for directed field experience.

Credit/No Credit

EDSP 475. Directed Field Experience in ECSE II: Preschool. 3 Units**Prerequisite(s):** Admittance to the Education Specialist Credential Program: Early Childhood Special Education**Corequisite(s):** EDS 234**Term Typically Offered:** Fall, Spring

Directed field experience in a cooperating school district or county office of education program providing special educational services for preschoolers and their families. Candidates must secure faculty approval by prior application for directed field experience.

Credit/No Credit

EDSP 476. Internship in ECSE: Infants & Toddlers. 10 Units**Prerequisite(s):** Admittance to the Education Specialist Credential Program: Early Childhood Special Education**Corequisite(s):** EDS 234**Term Typically Offered:** Fall, Spring, Summer

Internship in a cooperating District or County Office of Education providing special educational services for infants and toddlers and their families. Candidates must meet the criteria for an internship in order to register. Students may enroll in EDSP 474, Directed Field Experience in ECSE I: Infants & Toddlers, as an alternative to EDSP 476. Ten units, approximately 320 field hours, are required to meet competencies.

Credit/No Credit

EDSP 477. Internship in ECSE: Preschool. 10 Units**Prerequisite(s):** Admittance to the Education Specialist Credential Program: Early Childhood Special Education**Corequisite(s):** EDSP 234**Term Typically Offered:** Fall, Spring

Internship in a cooperating District or County Office of Education providing special educational services for preschoolers and their families. Candidates must meet the criteria for an internship in order to register. Students may enroll in EDSP 475, Directed Field Experience in ECSE II: Preschool, as an alternative to EDSP 477. Ten units, approximately 320 field hours, are required to meet competencies.

Credit/No Credit

EDSP 500. Master of Arts Thesis: Special Education. 3 Units**Prerequisite(s):** Approval of Culminating Experience Proposal or instructor permission**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree.

EDSP 501. Master of Arts Project: Special Education. 3 Units

Prerequisite(s): Approval of Culminating Experience Proposal or instructor permission

Term Typically Offered: Fall, Spring

Completion of a project that integrates research with development of a product related to instruction of persons with disabilities.

EDSS 279A. Method and Materials for Teaching Secondary English Learners, A. 1.5 Units

Prerequisite(s): EDUC 170; Admission to the Single Subject Credential program

Term Typically Offered: Fall, Spring

This course is the first of a two-course series. Introduces candidates to a repertoire of theory-based methods needed to facilitate and measure their own students' growth in English language development (ELD) as well as create learning environments which promote content area learning through the use of Specially Designed Academic Instruction in English (SDAIE). Candidates acquire knowledge and skills in methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279B. Methods and Materials for Teaching Secondary English Learners, B. 1.5 Units

Prerequisite(s): EDSS 279A

Term Typically Offered: Fall, Spring

Second course in a two-course series. Candidates expand their repertoire of theory-based methods to facilitate and measure their own students' growth in English language development (ELD) as well as create learning environments which promote content area learning through the use of Specially Designed Academic Instruction in English (SDAIE). Candidates deepen knowledge and skills related to methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279C. Method and Materials for Teaching Secondary English Learners, C. 1.5 Units

Prerequisite(s): EDUC 170; Admission to the Single Subject Credential Program.

The first of two-course series. Introduces candidates to theory-based methods to facilitate/measure their own students' growth in English language development and create learning environments which promote content area learning through Specially Designed Academic Instruction in English (SDAIE). Specific instruction given to develop skills in Linked Learning settings and learning activities therein. Candidates acquire knowledge/skills in methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 279D. Method and Materials for Teaching Secondary English Learners, D. 1.5 Units

Prerequisite(s): EDSS 279C

Second in two-course series. Candidates expand repertoire of theory-based methods to facilitate/measure students' growth in English language development and create learning environments which promote content area learning through Specially Designed Academic Instruction in English (SDAIE). Specific instruction given to develop skills in Linked Learning settings and learning activities therein. Candidates deepen knowledge and skills related to methods of teaching a second language through readings, fieldwork, discussion, group interaction, lesson presentation, hands-on experience of methods, and materials exploration.

EDSS 299. Special Problems: Single Subject. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects for Single Subject credential candidates at graduate/credential level especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and the Department Chair.

Note: This course may be repeated for up to 9 units of credit.

Credit/No Credit

EDSS 300. Teaching Performance Assessment-Single Subjects. 1 Unit

Corequisite(s): EDTE 470B or EDSS 474B or EDTE 471A

Term Typically Offered: Fall, Spring

Candidates in the Teacher Preparation Program must complete the Teaching Event for the Performance Assessment for California Teachers. The Teaching Event requires candidates to plan and teach an instructional sequence in their student teaching placement. They must also assess student learning during this lesson sequence and submit a videotape with material recorded during the lesson sequence. The Teaching Event is a summative assessment and one of several requirements that must be completed in order to receive a recommendation for a teaching credential.

Note: Corequisite can be waived if candidate is retaking EDSS 300

Credit/No Credit

EDSS 364A. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Lecture. 1.5 Units

Prerequisite(s): Admission to the Single Subject Credential program.

Corequisite(s): EDSS 364B

Term Typically Offered: Fall, Spring

An introduction to critical analysis of the purpose and process of public schooling. Examination of the sociopolitical contexts of public schools and society; educational theories, philosophies, notions of culture, community and educational practice. Engagement with sociocultural, historical and philosophical foundations of education, learning theories, theories of adolescent cognitive and social development. Modalities include lecture and discussions.

EDSS 364B. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop. 1.5 Units

Prerequisite(s): Admission to the Single Subject Credential program

Corequisite(s): EDSS 364A

Term Typically Offered: Fall, Spring

An introduction to critical analysis of the purpose and process of public schooling. Examination of the sociopolitical contexts of public schools and society; educational theories, philosophies, notions of culture, community and educational practice. Exploration of sociocultural, historical and philosophical foundations of education. Initial application of strategies and approaches associated with learning theories, theories of adolescent cognitive and social development. Modalities include discussion, simulation and activities.

EDSS 364C. Advanced Theoretical Foundations of Teaching in a Multicultural Democratic Society, Lecture. 1.5 Units**Prerequisite(s):** Admission into the Single Subject Credential Program;

EDSS 364A and EDSS 365B

Corequisite(s): EDSS 364D**Term Typically Offered:** Fall, Spring

Further study of the purposes and processes of public schooling. Candidates develop a philosophy of education for teaching in a multicultural, multilingual, and democratic society through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability. Modalities include lecture and discussions.

EDSS 364D. Advanced Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop. 1.5 Units**Prerequisite(s):** Admission into the Single Subject Credential Program;

EDSS 364A and EDSS 364B

Corequisite(s): EDSS 364C**Term Typically Offered:** Fall, Spring

Further study of the purposes and processes of public schooling. Candidates develop a philosophy of education for teaching in a multicultural, multilingual, and democratic society through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability. Modalities include discussions, small group tasks, group projects and simulations.

EDSS 364E. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop-Linked Learning. 1.5 Units**Prerequisite(s):** Admission to the Single Subject Credential program.**Corequisite(s):** EDTE 364A

Candidates explore sociocultural, historical and philosophical foundations of education with focus on context of Linked Learning and critical examination of traditional tracking and vocational education. Students will evaluate the extent to which programs aimed at Career Pathways and College Readiness depart from or replicate previous patterns and analyze historical/economic drivers that shape schooling. Initial application of strategies and approaches associated with Linked Learning theories, theories of adolescent cognitive and social development. Integration of Discussions, simulation, activities.

EDSS 364F. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop-Linked Learning. 1.5 Units**Prerequisite(s):** EDSS 364A and EDSS 364E**Corequisite(s):** EDSS 364C

Further study of purposes and processes of public schooling with a special focus on educational theory and practice in Linked Learning contexts. Candidates develop a philosophy of education for teaching in a multicultural, multilingual, and democratic society through self-examination of dispositions related to gender, sexuality, race, social class, language, religion/spirituality and ability. Modalities include discussions, small group tasks, group projects, simulations.

EDSS 365A. Fundamentals of Teaching, Lecture. 1.5 Units**Prerequisite(s):** Admission into Single Subject Teacher Preparation Program**Corequisite(s):** EDSS 365B**Term Typically Offered:** Fall, Spring

This course introduces the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive secondary classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as a teacher, curriculum development, long and short-term planning, and specific theories for instructional practice. Lecture and Discussion.

EDSS 365B. Theoretical Foundations of Teaching in a Multicultural Democratic Society, Workshop. 1.5 Units**Prerequisite(s):** Admission into Single Subject Teacher Preparation Program**Corequisite(s):** EDSS 365A**Term Typically Offered:** Fall, Spring

This course introduces the relationship between elements of teaching and instructional organization to effectively teach in culturally and linguistically diverse and inclusive secondary classrooms through the use of backwards design, Universal Design for Learning, and differentiated instruction. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will be on application of theories and frameworks learned in EDSS 365A, with a focus on students' development as a teacher, curriculum development, long and short-term planning, and assessing student learning. Discussion, small group work and simulations.

EDSS 365C. Advanced Fundamentals of Teaching, Lecture. 1.5 Units**Prerequisite(s):** EDSS 365A and EDSS 365B**Corequisite(s):** EDSS 365D**Term Typically Offered:** Fall, Spring

Extends learning in EDSS 365A or EDSS 365B with deeper examination of the relationship between elements of teaching and instructional organization needed to effectively teach in culturally and linguistically diverse and inclusive secondary classrooms through the use of backward design, Universal Design for Learning, differentiated instruction and assessment. The focus will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as teacher through exploration of curriculum development frameworks, long-and short-term planning approaches, specific theories for instructional practice and assessment. Lecture and discussion.

EDSS 365D. Advanced Fundamentals of Teaching, Workshop. 1.5 Units**Prerequisite(s):** EDSS 365A and EDSS 365B**Corequisite(s):** EDSS 365C**Term Typically Offered:** Fall, Spring

Extends learning in EDSS 365A, B and C by deepening knowledge about the relationship between elements of teaching and instructional organization. Focus on effective teaching for culturally and linguistically diverse and inclusive secondary classrooms through the use of backward design, Universal Design for Learning, differentiated instruction and assessment. Instructional framework will be grounded in a Social Justice/Multicultural paradigm. Emphasis will include students' development as a teacher including application of curriculum development theories, long-and short-term planning frameworks and specific theories for instructional practice and assessment. Discussion, small group work and simulations.

EDSS 365E. Fundamentals of Teaching, Workshop - Linked Learning. 1.5 Units**Prerequisite(s):** Admission to the Single Subject Teacher Preparation program**Corequisite(s):** EDTE 365A

This is the first course in a two course series; practice using instructional planning frameworks (e.g., backwards design, Universal Design for Learning, and differentiated instruction) and a Social Justice/Multicultural Education paradigm to design learning segments for culturally and linguistically diverse students. Emphasis on application of theories and frameworks learned in EDTE 365A, with a focus on Linked Learning curriculum development and integration, long- and short-term planning, and assessing student learning. Discussion, small group work, simulations.

EDSS 365F. Fundamentals of Teaching, Workshop - Linked Learning. 1.5 Units**Prerequisite(s):** EDSS 365A and EDSS 365E**Corequisite(s):** EDSS 365C

The second course in a two-course series. Deepens candidates' ability to apply frameworks for effective teaching of culturally and linguistically diverse students (e.g., inclusion strategies, backwards design, Universal Design for Learning, differentiated instruction and assessment). Continued emphasis on a Social Justice/Multicultural Education paradigm, and focus on candidates' development as a teacher. Application of Linked Learning curriculum development, long- and short-term planning frameworks, and specific theories for instructional practice and assessment. Discussion, small group work, simulations.

EDSS 366A. Single Subject Seminar, A. 3 Units**Prerequisite(s):** Acceptance into Single Subject Teacher Credential program**Corequisite(s):** EDSS 474A**Term Typically Offered:** Fall, Spring

First part of a 2-course sequence that provides structured opportunities for student teachers to discuss, analyze, and reflect upon data gathered from their field placements. Attention given to policies, school law, resources, strategies, routines, and activities that contribute to the productive management of the school and classroom as locations for student engagement and learning. Special emphasis will be on English Language Development and students with special needs. Course assignments and activities are integrated with other core courses.

Credit/No Credit

EDSS 366B. Single Subject Seminar, B. 3 Units**Prerequisite(s):** EDSS 366A**Corequisite(s):** EDSS 474B or EDTE 471A/ EDTE 471B**Term Typically Offered:** Fall, Spring

Second part of a two-part sequence that provides opportunities for student teachers to discuss, analyze, reflect upon data gathered from field placements and to support completion of PACT teaching event. Attention given to policies, school law, resources, strategies, routines and activities that contribute to productive environments in school and classrooms as locations for student engagement and learning. Special emphasis will be on English Language Development and students with special needs. Course assignments and activities are integrated with other core courses.

Credit/No Credit

EDSS 366C. Single Subject Seminar, C. 3 Units**Prerequisite(s):** Admission to the Single Subject Credential program**Corequisite(s):** EDSS 474A

First of two-course sequence. Provides structured opportunities for candidates to discuss, analyze, and reflect upon data gathered from field. Attention given to policies, school law, resources, strategies, routines, and activities that contribute to productive management of school and classroom as locations for student engagement/learning. Special emphasis on English Language Development, students with special needs, and specific management and implementation of Linked Learning activities (e.g. multidisciplinary integrated units of study). Course assignments/activities integrated with other core courses.

Credit/No Credit

EDSS 366D. Single Subject Seminar, D. 3 Units**Prerequisite(s):** EDSS 366C**Corequisite(s):** EDSS 474B

Second of two-course series. Provide structured opportunities for candidates to discuss, analyze, reflect upon data gathered from field; support completion of TPA. Further study of policies, school law, resources, strategies, routines, and activities needed for productive environments in classrooms as locations for student engagement/learning. Special emphasis on English Language Development, students with special needs, and specific management/implementation of Linked Learning activities (e.g. multidisciplinary integrated units of study). Course assignments/activities integrated with other core courses.

Credit/No Credit

EDSS 368. Inclusive Education in Secondary Schools. 1 Unit**Prerequisite(s):** Admission to the Single Subject Credential Program**Term Typically Offered:** Fall, Spring

Candidates learn historical, theoretical, and practical information related to key issues facing secondary public schooling currently, including how to educate learners with special needs, differentiate instruction in the content areas, develop assessments that fairly and accurately measure student learning, and use universal design to structure classroom and school practices, processes and policies to maximize access to core content for all students, regardless of language or ability. Lecture and discussion.

- EDSS 373A. Educational Technology Lab I.** 1 Unit
Prerequisite(s): Admission to the Single Subject Credential Program.
Term Typically Offered: Fall, Spring
- Educational technology lab course will prepare the candidates use technology for three areas: coursework in the teaching credential program, enhancing teaching and learning and eportfolio development. The candidates are introduced to an array of digital technologies for teaching relevant for K-12 student learning. The candidates are also prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio.
 Credit/No Credit
- EDSS 373B. Educational Technology Lab II.** 1 Unit
Prerequisite(s): EDSS 373A
Term Typically Offered: Fall only
- This course will offer support and instructions of facilitating and improving learning of a diverse student population by creating, using, and managing appropriate technological processes and resources. The candidates will learn applying and developing knowledge of technology in K-12 teaching and student learning. The candidates are prepared to use technology in the Teaching Credential Program and for the development of an electronic portfolio.
 Credit/No Credit
- EDSS 373C. Educational Technology Lab - Linked Learning.** 1 Unit
Prerequisite(s): Admission to the Single Subject Credential program
 This course encompasses the knowledge, skills and dispositions needed to understand, describe and develop "technological, pedagogical content knowledge" for effective pedagogical practice in a technology enhanced learning environment. Instruction occurs through labs, online resource center and individualized support. Candidates develop a range of technology skills and knowledge needed for effective instruction in the Linked Learning classroom and provides technology resources associated with project-based learning and integrated curricular units.
 Credit/No Credit
- EDSS 383A. Methods in English Education, A.** 1.5 Units
Prerequisite(s): Admission to the teacher preparation program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring
- A critical course for English teaching preparation, educational experiences will promote understandings, attitudes and competencies necessary for effective instruction in English Language Arts and literacy in grades 7-12. Candidates acquire skills related to literacy assessment, text selection, and lesson/unit planning designed to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Students are provided with opportunities to acquire skills, knowledge, practice, and experience planning for and teaching secondary English language arts and literacy. Lecture and discussion.
- EDSS 383B. Methods in English Education, B.** 1.5 Units
Prerequisite(s): EDSS 383A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring
- A critical course for English teaching preparation, educational experiences will promote understandings, attitudes and competencies necessary for effective instruction in English Language Arts and literacy in grades 7-12. Candidates acquire skills related to literacy assessment, text selection, and lesson/unit planning designed to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Students are provided with opportunities to acquire skills, knowledge, practice, and experience planning for and teaching secondary English language arts and literacy. Lecture and discussion.
Note: This course is the second in a two course series
- EDSS 384A. Instruction and Assessment of Academic Literacy, A.** 1.5 Units
Prerequisite(s): Admission to the Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring
- Introduction to foundational understandings, attitudes and competencies necessary for effective instruction of academic language and literacy in 7-12 content area classrooms. Candidates acquire skills related to literacy assessment, text selection, and lesson planning designed to meet the needs of all learners, including mainstream population, English learners and students with special needs. Candidates develop an awareness of what constitutes effective content literacy instruction and a beginning repertoire of strategies to help students meet the demands of content reading, writing and discussion. Lecture and discussion.
- EDSS 384B. Instruction and Assessment of Academic Literacy, B.** 1.5 Units
Prerequisite(s): EDSS 384A
Corequisite(s): EDSS 474B
Term Typically Offered: Fall, Spring
- Second course in a two course series on understanding effective instruction of academic language and literacy in 7-12 content area classrooms. Candidates hone skills in literacy assessment, text selection, and lesson planning to meet the needs of all learners, including mainstream populations, English learners and students with special needs. Application of content literacy instruction (pre, during and post reading and writing strategies). Enhanced knowledge of strategies to support students' attainment of the demands of content reading, writing and discussion. Lecture, discussion.
- EDSS 385A. Methods in World Language Education, A.** 1.5 Units
Prerequisite(s): Admission into the Single Subject Teacher Credential Program
Corequisite(s): EDSS 474A
Term Typically Offered: Fall, Spring
- This course is designed for candidates who are preparing to teach world languages in secondary school settings in California public schools. Candidates will learn about current theoretical bases for second-language acquisition and how such theories inform classrooms practice. Candidates have introductory opportunities to practice principles of learning from which teachers can draw as they make decisions about instruction. Lecture, discussion and simulation.
 Cross Listed: WLL 385A; only one may be counted for credit.

EDSS 385B. Methods in World Language Education, B. 1.5 Units**Prerequisite(s):** EDSS 385A or WLL 385A**Corequisite(s):** EDSS 474B**Term Typically Offered:** Fall, Spring

This course continues learning initiated in EDSS 385A and is designed for candidates who are preparing to teach world languages in secondary school settings in California public schools. Candidates will learn additional methodologies for planning and delivering instruction in world languages. Candidates will practice instructional strategies and will design lessons. Candidates will implement assessments that capture student learning of key world language outcomes, including oral language and written language development and reading fluency. Strategies for teaching cultural appreciation are also embedded. Lecture, discussion and simulation.

Cross Listed: WLL 385B; only one may be counted for credit.

EDSS 386A. Methods in Mathematics Education, A. 1.5 Units**Prerequisite(s):** Admission to Single Subject Teacher Credential Program**Corequisite(s):** EDSS 474A**Term Typically Offered:** Fall, Spring

First part of a two-course sequence that provides instruction to organize instructional materials, techniques of presentation and methods of evaluation for secondary school mathematics. Articulated with student teaching and should be taken the same semester. Activities include discussions, presentations and demonstrations.

EDSS 386B. Methods in Mathematics Education, B. 1.5 Units**Prerequisite(s):** EDSS 386A**Corequisite(s):** EDSS 474B**Term Typically Offered:** Fall, Spring

Second part of a two-course sequence that provides continuation of organization of instructional materials, techniques of presentation and methods of evaluation for secondary school mathematics. Articulated with student teaching and should be taken the same semester.

EDSS 387A. Methods in History/Social Science Education, A. 1.5 Units**Prerequisite(s):** Admission into the Single Subject Teacher Credential Program**Corequisite(s):** EDSS 474A**Term Typically Offered:** Fall, Spring

First of a two-part field and lecture-based course which will prepare candidates to teach history-social science content and analysis skills to secondary students, particularly those who are culturally and linguistically diverse, have special needs, or are English learners. Focus on identifying and evaluating curricular resources and instructional strategies that emphasize the active use of critical thinking skills and the development of civic values for informed participation in a democratic society.

EDSS 387B. Methods in History/Social Science Education, B. 1.5 Units**Prerequisite(s):** EDSS 387A**Corequisite(s):** EDSS 474B**Term Typically Offered:** Fall, Spring

Second of a two-part field and lecture-based course which will prepare candidates to teach history-social science content and analysis skills to secondary students, particularly those who are culturally and linguistically diverse, have special needs, or are English learners. Focus on implementing curriculum and instructional strategies and assessing student mastery of grade-level content and skills that are central to history-social science disciplines.

EDSS 388A. Methods in Science Education, A. 1.5 Units**Prerequisite(s):** Admission to Single Subject Teacher Credential Program**Corequisite(s):** EDSS 474A**Term Typically Offered:** Fall, Spring

First part of a two-course sequence that provides introduction to organization of instructional materials, techniques of presentation, and methods of evaluation for secondary school science. Articulated with student teaching and should be taken the same semester. Activities include discussion, presentations and demonstrations.

EDSS 388B. Methods in Science Education, B. 1.5 Units**Prerequisite(s):** EDSS 388A**Corequisite(s):** EDSS 474B**Term Typically Offered:** Fall, Spring

Second part of a two-course sequence that provides introduction to organization of instructional materials, techniques of presentation, and methods of evaluation for secondary school science. Articulated with student teaching and should be taken the same semester. Activities include discussion, presentations and demonstrations.

EDSS 401. Observation and Participation in Secondary Classrooms. 2 Units**Prerequisite(s):** Admission to Teacher Preparation Program

Teacher candidates will observe and participate as teaching assistants in public school secondary classrooms.

Credit/No Credit

EDSS 440. Work-Based Learning Field Experience. 2 Units**Prerequisite(s):** Admission to the Single Subject Credential program

This fieldwork course focuses on the work-based learning core component of Linked Learning/Career Pathways. After an orientation to work-based learning, its function in Linked Learning/Career pathways, and how it can be integrated into core curriculum, candidates will experience a non-paid, one-week internship at a worksite associated with one of the 15 major CA industries. Candidates develop work-based knowledge and experiences to be applied when they create a subject-specific curricular unit incorporating their work-based learning. Fieldwork, discussion.

EDSS 470A. Field Experience: Secondary. 6 Units**Prerequisite(s):** Acceptance into the Sacramento State Single Subject Teaching Credential Program.**Term Typically Offered:** Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Public school assignment in a secondary school serving culturally and linguistically diverse community for one university semester with three periods of responsibility: English learner class, single subject content class, and an observation/consultation period. Observations and supervised teaching experiences will be systematic and structured.

Credit/No Credit

EDSS 470B. Student Teaching: Secondary. 12 Units**Term Typically Offered:** Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Experiences will be systematic and structured. Student teachers will be placed for the public school's semester at a school serving linguistically and culturally diverse students. Candidates become more independent with primary responsibility for cycle of teaching with equivalent of three periods supervised teaching and one consultation period.

Credit/No Credit

EDSS 471A. Elementary Physical Education Student Teaching. 5 Units

Prerequisite(s): Acceptance into the Sacramento State Single Subject Teaching Credential Program.

Term Typically Offered: Fall, Spring

The elementary physical education teacher will be placed in a setting where he/she is able to plan, implement, promote and assess a developmentally appropriate physical education program that meets the diverse needs, interests and abilities of elementary school children, K-6.
Credit/No Credit

EDSS 471B. Secondary Physical Education Student Teaching. 4 Units

Prerequisite(s): The successful completion of EDTE 471A.

Term Typically Offered: Fall, Spring

The secondary physical education student teacher will be placed in a setting where he/she is able to plan, implement, promote and assess a developmentally appropriate physical education program that meets the diverse needs, interests and abilities of secondary school children, 6-12.
Credit/No Credit

EDSS 474A. Field Experiences in Secondary Schools. 3 Units

Prerequisite(s): Admission into the Single Subject Teaching Credential Program

Term Typically Offered: Fall, Spring

Provides candidates with field experiences of increasing complexity and responsibility as they engage in cycles of teaching. Public school assignment in a secondary school serving culturally and linguistically diverse community for one university semester with three periods of responsibility: English learner class, single subject content class and an observation/consultation period. Observations and supervised teaching experiences will be systematic and structured.
Credit/No Credit

EDSS 474B. Student Teaching in Secondary Schools. 4 Units

Prerequisite(s): EDSS 474A; all subject matter competence and basic skills requirements met, per CTC program standards

Term Typically Offered: Fall, Spring

Candidates engage in student teaching, taking on tasks of increasing complexity and responsibility as they perform cycles of teaching. Student teaching will be systematic and structured. Student teachers will be placed for the public school's semester at a school serving linguistically and culturally diverse students. Candidates become more independent with primary responsibility for cycle of teaching with equivalent of three periods supervised teaching and one consultation period.
Credit/No Credit

Education Specialist Credential Program: Mild/Moderate

Total units required for Credential: 39-47

Program Description

The Education Specialist Instruction Credential authorizes the holder to provide instruction and special education support as well as conduct Educational Assessments related to student's access to the academic core curriculum. Support services can be provided according to the credential holder's area of specialization in the following settings:

- Resource rooms or services
- Special education settings
- General education settings
- Special schools
- Home/hospital settings
- State hospitals
- Development centers
- Correctional facilities
- Non-public, non-sectarian schools and agencies
- Alternative and non-traditional instructional
- Public school settings other than classroom

Programs offered lead to Certificates of Eligibility and/or the Preliminary Credential in three specialties:

- **Education Specialist:** Teaching Credential Program: Early Childhood Special Education
- **Education Specialist:** Mild/Moderate Disabilities Specialist (M/M) and
- **Education Specialist:** Moderate/Severe Disabilities Specialist (M/S).

All above specialties comply with regulations and standards as issued by SB2042 and AB1059 (English Language Authorization).

University- and California Commission on Teacher Credentialing- (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate, please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>). All candidates are required to seek advisement regarding credential coursework and must complete a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.

Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;

- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but regency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special

needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.

- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. *Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:*

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination **or** (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College's Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all

baccalaureate and post-baccalaureate course work (if completed) **OR** a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master's degree or second bachelor's degree **MUST** apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. **Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.**

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process **MUST** be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the on-line COC application **AND** a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher

Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez

(figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Program Requirements

Education Specialist Credential Program: Mild/Moderate with Multiple Subject

Total units required for Credential: 54-62

Program Description

The Education Specialist Instruction Credential authorizes the holder to provide instruction and special education support as well as conduct Educational Assessments related to student's access to the academic core curriculum. Support services can be provided according to the credential holder's area of specialization in the following settings:

- Resource rooms or services
- Special education settings
- General education settings
- Special schools
- Home/hospital settings
- State hospitals
- Development centers
- Correctional facilities
- Non-public, non-sectarian schools and agencies
- Alternative and non-traditional instructional
- Public school settings other than classroom

Programs offered lead to Certificates of Eligibility and/or the Preliminary Credential in three specialties:

- **Education Specialist:** Teaching Credential Program: Early Childhood Special Education
- **Education Specialist:** Mild/Moderate Disabilities Specialist (M/M) and
- **Education Specialist:** Moderate/Severe Disabilities Specialist (M/S).

All above specialties comply with regulations and standards as issued by SB2042 and AB1059 (English Language Authorization).

University- and California Commission on Teacher Credentialing- (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate, please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>). All candidates are required to seek advisement regarding credential coursework and must complete a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.

Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;

- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but recency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special

needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.

- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. *Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:*

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination or (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College's Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all

baccalaureate and post-baccalaureate course work (if completed) OR a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master's degree or second bachelor's degree MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. **Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.**

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process **MUST** be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the online COC application AND a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher

Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez

(figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Specific Additional Admission Requirements

Code	Title	Units
Prerequisites for Admission to Program (8 Units)		
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2

Course/experience equivalencies may be granted by assigned EDS advisor as warranted.

Note: To obtain the Clear Multiple Subject Credential, candidates must successfully complete a CCTC approved induction program, determined by employer.

Program Requirements

Code	Title	Units
Program Coursework (39 Units)

Total Units		54

Education Specialist Credential Program: Moderate/Severe

Total units required for Credential: 50-56

Program Description

The Education Specialist Instruction Credential authorizes the holder to provide instruction and special education support as well as conduct Educational Assessments related to student's access to the academic core curriculum. Support services can be provided according to the credential holder's area of specialization in the following settings:

- Resource rooms or services
- Special education settings
- General education settings
- Special schools
- Home/hospital settings
- State hospitals
- Development centers
- Correctional facilities
- Non-public, non-sectarian schools and agencies
- Alternative and non-traditional instructional
- Public school settings other than classroom

Programs offered lead to Certificates of Eligibility and/or the Preliminary Credential in three specialties:

- **Education Specialist:** Teaching Credential Program: Early Childhood Special Education
- **Education Specialist:** Mild/Moderate Disabilities Specialist (M/M) and
- **Education Specialist:** Moderate/Severe Disabilities Specialist (M/S).

All above specialties comply with regulations and standards as issued by SB2042 and AB1059 (English Language Authorization).

University- and California Commission on Teacher Credentialing- (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate, please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>). All candidates are required to seek advisement regarding credential coursework and must complete

a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.

Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);

- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;
- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only

Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but recency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.
- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. *Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:*

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination **or** (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College’s Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all baccalaureate and post-baccalaureate course work (if completed) **OR** a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master’s degree or second bachelor’s degree **MUST** apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process **MUST** be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the ‘Payment Receipt’ page from the on-line COC application **AND** a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding

each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credentialing program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be

accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez (figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Prerequisite Requirements

Code	Title	Units
Required Prerequisites (6 Units)		
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3

Course/experience equivalencies may be granted by assigned EDS advisor as warranted.

Total Units		50

please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>). All candidates are required to seek advisement regarding credential coursework and must complete a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Education Specialist Credential Program: Moderate/Severe with Multiple Subject

Total units required for Credential: 70-76

Program Description

The Education Specialist Instruction Credential authorizes the holder to provide instruction and special education support as well as conduct Educational Assessments related to student's access to the academic core curriculum. Support services can be provided according to the credential holder's area of specialization in the following settings:

- Resource rooms or services
- Special education settings
- General education settings
- Special schools
- Home/hospital settings
- State hospitals
- Development centers
- Correctional facilities
- Non-public, non-sectarian schools and agencies
- Alternative and non-traditional instructional
- Public school settings other than classroom

Programs offered lead to Certificates of Eligibility and/or the Preliminary Credential in three specialties:

- **Education Specialist:** Teaching Credential Program: Early Childhood Special Education
- **Education Specialist:** Mild/Moderate Disabilities Specialist (M/M) and
- **Education Specialist:** Moderate/Severe Disabilities Specialist (M/S).

All above specialties comply with regulations and standards as issued by SB2042 and AB1059 (English Language Authorization).

University- and California Commission on Teacher Credentialing- (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate,

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.

Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-

matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);

- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;
- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but recency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.
- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**

3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a “B” grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination **or** (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.**

Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College’s Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all baccalaureate and post-baccalaureate course work (if completed) **OR** a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master’s degree or second bachelor’s degree **MUST** apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. **Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.**

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process MUST be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the online COC application AND a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special

Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered “YES” to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as “Degree(s) Awarded” with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a “C” or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of “D”, “F”, and “NC” (No Credit) are received in professional education courses, the candidate must withdraw from the program

unless a specific exception has been approved by the Credential Appeals Committee.

- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez (figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Multiple Subject Teaching Credential

Total units needed for Credential: 38-49

Program Description

The Multiple Subject Teaching Credential authorizes the holder to teach all subjects in a self-contained classroom, such as the classrooms in most elementary schools, in grades preschool, K-12, or in classes organized primarily for adults. In addition, the holder of a Multiple Subject Teaching Credential may serve in a core or team teaching setting. This credential also embeds the English Learner Authorization (ELA), which prepares candidates to work with second language learners.

The Multiple Subject Program is a post-baccalaureate program focused on preparing effective teachers for urban classrooms. Becoming an effective teacher for an urban setting, including a foundation in social justice and equity, is the focus of all activities, tasks and learning in our single subject teacher preparation program. The program has two- and three-semester options. Two semester candidates complete a program that requires full-time student status, with field experience and student teaching requirements as well as full-time coursework requirements both semesters. Two semester candidates complete their field experience and student teaching activities with partner schools in local districts including Sacramento City, San Juan, Elk Grove, Twin Rivers, Natomas, and Folsom Cordova unified school districts. Three semester candidates complete a program with a more gradual introduction of field experience/student teaching activities, though the 3rd semester of the program requires a full time commitment. Most three semester candidates will complete their field experience/student teaching in one of our 4 professional development schools, located in the San Juan Unified

School Distinct. All program coursework for both program options is conducted at the Sacramento State campus.

Two-semester and three-semester programs are available. Please visit the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials/>) for sequence of courses, time commitment, and other information.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;

- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but recency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special

needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.

- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. *Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:*

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination **or** (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College's Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all

baccalaureate and post-baccalaureate course work (if completed) **OR** a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master's degree or second bachelor's degree **MUST** apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. **Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.**

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process **MUST** be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the on-line COC application **AND** a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher

Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez

(figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Preliminary Education Specialist Teaching Credential Program: Early Childhood Special Education

Total units required for Credential: 38-52

Program Description

The Early Childhood Special Education (ECSE) Specialist credential is a stand-alone teaching credential authorizing educational services to infants, toddlers, and preschool age children with disabilities and their families. The ECSE Specialist credential is issued by the California Commission of Teacher Credentialing, with issuance based on successful completion of a Commission-approved ECSE training program. The ECSE Specialist credential program at Sacramento State is a Commission-approved program.

University- and California Commission on Teacher Credentialing- (CTC) approved program options also allow candidates to pursue the M/M or M/S specialty concurrently with the Multiple Subject Credential. Another approved program allows candidates to add an ECSE Certificate to existing Clear M/M, M/S or other California Special Education Specialist credentials. For additional information regarding the ECSE Certificate, please contact the ECSE Coordinator (current the program is on hiatus) or Teaching Credentials Office.

All credential programs undergo continual review and change; current requirements are available on the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>). All candidates are required to seek advisement regarding credential coursework and must complete a program advisement plan prior to the start of the program. Candidates must take prerequisites prior to the start of the program; candidates who continue without advisement or do not complete prerequisites prior to the start of the program may be disenrolled.

Special Education Internships

All Preliminary Education Specialist programs at Sacramento State have been approved by CCTC as internship programs. In order to be eligible for an Intern Education Specialist Credential, candidates must

- have been admitted and cleared all admission requirements for the credential program;
- have received the recommendation of a faculty member;
- have received an offer of employment from an employer; and
- be pursuing an internship with a district/school that has a written internship agreement (Memorandum of Understanding) with Sacramento State.

Only candidates in their final semester of the program can be considered for internships.

Note: Candidates working under an Education Specialist Internship Credential must concurrently fulfill the requirements of the credential program and the internship appointment.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;
- for Single Subject, complete an approved course in the teaching of reading;

- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;
- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include:

classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but regency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.
- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed

2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. *Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:*

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination **or** (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).

- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College's Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all baccalaureate and post-baccalaureate course work (if completed) **OR** a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
CHDV 30	Human Development	3
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3

30 hours documented field experience with young children (aged: birth to 5 years)

Coursework in child development or related field approved by the ECSE Coordinator

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master's degree or second bachelor's degree **MUST** apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. **Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.**

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process **MUST** be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the on-line COC application **AND** a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the

program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee

about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez (figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

Prerequisite Requirements

The following prerequisites are required:

- 30 hours documented field experience with young children (birth to 5 years);
- coursework in child development or related field approved by ECSE Coordinator; and
- CHDV 30, Human Development.

Course/experience equivalencies may be granted by assigned EDS advisor as warranted.

Program Requirements

Code	Title	Units
Required Courses (38-52 Units)		
EDSP 119	Legal and Social Foundations of Special Education	3
EDSP 201	Developing Collaborative Partnerships with Families, Professionals, and Communities	3
EDSP 209	Developing Augmentative & Alternative Communication Systems: Assessment and Intervention	3
EDSP 210	Assessment and Evaluation in Early Childhood Special Education	3
EDSP 211	Curriculum, Intervention Strategies, and Environments in ECSE I: Infants & Toddlers	3
EDSP 212	Curriculum, Intervention Strategies, and Environments in ECSE II: Preschool	3
EDSP 216	Understanding the Implications of Developmental Diversity in Children	3
EDSP 218	Instructional Strategies: Low Incidence Disabilities	3
EDSP 230 & 230B	Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges Lab	4
EDSP 292	Teaching English Learners with Disabilities	3
EDSP 234	Directed Fieldwork Seminar: Early Childhood Special Education	1
EDSP 474	Directed Field Experience in ESCE: Infants/Toddlers	3 - 10
or EDSP 476	Internship in ECSE: Infants & Toddlers	
EDSP 475	Directed Field Experience in ECSE II: Preschool	3 - 10

or EDSP 477 Internship in ECSE: Preschool

Total Units

38-52

Single Subject Teaching Credential

Total units required for Credential: 37-45

Program Description

The Single Subject Teaching Credential authorizes the holder to provide instruction in the subject named on the credential in departmentalized classrooms and embeds the English Learner Authorization (ELA), which prepares candidates to work with second language learners. In reality, almost all junior and senior high school teachers hold the single subject credential. Single Subject Teaching Credentials can be obtained in the following teaching areas:

- Art
- Biology
- Chemistry
- English/Language Arts
- French
- Geoscience
- General Science
- German
- Health Science
- Home Economics
- Mathematics (Foundational Level and Full)
- Music
- Physical Education
- Physics
- Social Science (History)

The Single Subject Program is a post-baccalaureate program organized so that candidates complete the program in two semesters. Each semester candidates complete a set of field experiences or student teaching activities and take a full-time complement of courses. Candidates are placed in an urban partner school typically for the entire academic year, where they have the opportunity to fully engage in the life of the school and forge meaningful relationships with their mentor teachers and with groups of students. Coursework in the program follows an innovative spiral schedule, where courses are taught in 8 week modules, with content aligned to meet the needs of the candidates as they take on increasing responsibilities in their host classrooms for instructional planning, teaching and adjunct teacher duties (e.g., student mentoring/support, parent meetings, support for extracurricular activities, etc.).

Becoming an effective teacher for an urban setting, including a foundation in social justice and equity, is the focus of all activities, tasks and learning in our single subject teacher preparation program. We do offer two specialized pathways: one focuses on the content, skills and experiences related to Linked Learning/Career Pathway programs in partner high schools and the other is for candidates with bilingual skills in Spanish or Hmong. Interest in the bilingual authorization is ascertained during the admissions process, and we survey all admitted candidates for interest in the Linked Learning/Career Pathway cohort.

For more information about the Single Subject Credential, visit --
Commission on Teacher Credentialing Single Subject link--.

There is currently a two-semester program available. Please visit the Teaching Credentials website (<http://www.csus.edu/coe/academics/credentials>) for sequence of courses, time commitment, and other information.

Career Pathways Certificate

Within the Single Subject (Secondary) Teaching Credential program, candidates have the option to pursue a Career Pathways Certificate and can indicate upon admission into the program their desire to pursue the certificate. The Career Pathways Certificate prepares candidates to teach in Career Pathways; these are specialized programs in high schools designed to prepare middle and high school secondary students for both college and career in themed small learning communities connected to the 15 Major California Industries. Numerous high schools in the Sacramento Region offer Career Pathways. Candidates admitted into the certificate program will take the same courses as other Single Subject candidates, but will enroll in the Career Pathways Linked Learning sections. In addition, they will complete an additional two-unit work-based learning field experience course. At the end of the program, candidates will be recommended for a Single Subject teaching credential and will receive the Career Pathways Certificate.

Preliminary Teaching Credentials

As new regulations become mandated by the California Commission on Teacher Credentialing (CTC) and the California Department of Education, requirements for meeting subject matter competency and/or requirements for all preliminary credential programs will be changed to comply with the new requirements. The preliminary credential program is legislated according to the SB 2042 (Preliminary) Credential requirements. For further information, please contact the Academic and Program Services Office in Eureka Hall 401, (916) 278-6639.

Preliminary Teaching Credential Requirements

Completion of the Preliminary Teaching Credential requires that the candidate:

- hold a baccalaureate or higher degree in a field other than professional education from a regionally accredited college or university;
- complete an approved program of teacher preparation, including student teaching;
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the elementary school level, complete either an approved subject matter program or pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for an Education Specialist – Mild/Moderate or Moderate/Severe credential, if the plan is to teach Special Education at the secondary school level, complete either an approved subject matter program in one of the core academic subject areas or pass an approved subject-matter examination in a core academic subject area (CSET: California Subject Examination for Teachers);
- for a Multiple Subject credential, pass the approved subject-matter examination (CSET: California Subject Examination for Teachers, Multiple Subject, Subtests I, II and III);
- for Single Subject, complete either an approved subject matter program or pass the approved subject-matter examination (CSET) in the appropriate teaching area;

- for Single Subject, complete an approved course in the teaching of reading;
- for Multiple Subject, complete an approved course in the teaching of reading and pass the Reading Instruction Competence Assessment (RICA) exam;
- pass a college-level course or examination on the U.S. Constitution; and
- demonstrate California Basic Educational Skills (see subsection below on options available).

Teaching Credentials offers a variety of pathways for completing the Preliminary Credential programs depending on the program:

- a one-year (two-semester) program;
- a three-semester program;
- a two-year (four-semester) program – Education Specialist programs only; part-time options are available which will increase time to program completion

Field experience and student teaching are integral parts of the program leading to Preliminary Credentials. In both the Multiple Subject and Single Subject Teacher Preparation programs, candidates move through the program in cohorts. Full-time Education Specialist candidates follow a tightly-sequenced series of courses. In all teacher preparation programs, candidates complete fieldwork in public schools. All candidates will have experience working with children or youth from a broad range of cultural, ethnic, economic and special learning needs backgrounds.

Program Admission Requirements at a Glance

1. Experiences related to working with children or youth
2. References (2)
3. Essay
4. Official Transcripts from every college/university attended
5. Writing Proficiency
6. Basic Skills Competence (i.e., pass the CBEST)
7. Subject Matter Competence (i.e., pass the CSET)
8. Grade Point Average (GPA) of at least 2.67 overall or 2.75 in last 60 semester or 90 quarter units
9. Complete Credential Prerequisite Courses: EDUC 170, EDUC 100A, EDUC 100B, HLSC 136, and KINS 172 (MS only – equivalent workshop can be taken during the program)
10. Complete the Mandatory Interview

Applications Required at a Glance

- Teaching credentials Supplemental Program Application
- CSU Graduate School Application
- Certificate of Clearance Application (and fingerprint clearance through CTC)

Admission Requirements – General Information Only Experiences Related to Working with Children or Youth (paid and/or volunteer)

A minimum of 45 hours of experience (closer to 100+ hours if you want to be competitive) with diverse populations is required to be considered for program admission. Possible field experiences can include: classroom instructional aide, tutoring, afterschool program, Peace Corps, camp counseling, child/youth recreation programs, coaching, group-home counseling, church school teaching, etc. Your responses will be evaluated using the following criteria:

- **Recency:** Experience needs to be recent – at least within 1-2 years of the application period. You can list all experiences gained on the supplemental application, but regency is key.
- **Settings:** Majority of your experiences should be in appropriate settings/schools (**ideally public schools**) with culturally, linguistically, and socioeconomically diverse students of the age group (i.e., elementary school, high school, etc.) or population (i.e., special needs population) you plan to teach. You will list the diversity of your experiences on the supplemental application.
- **Supervision:** Has the verifiable experience been gained under supervision? If so, you will need to list names of your supervisors on the supplemental application.

References

Applicants submit two reference forms (included in the supplemental application). Letters of recommendation will not be accepted in lieu of reference forms. **Only reference forms submitted in sealed envelopes will be accepted.** It is recommended that one of the references be from a person who has observed the applicant's academic competence (current or former instructor) and the other reference from a person who has observed the applicant working with children or youth. **NOTE:** References from family members will not be accepted.

Essay

Discuss a critical, current issue in teaching/education and the relationship of this issue to your motivation to become a teacher in a typed, two-page, double-spaced essay. **NOTE:** This prompt is subject to change.

Transcripts

Applicants must provide **official, sealed transcripts** from every community college/college/university attended, even if only ONE class was completed. **Sacramento State students and Sacramento State graduates are exempt, unless coursework was completed at another college after you graduated.**

Writing Proficiency

Satisfying writing proficiency is a program admission requirement. This requirement may be met in one of the following ways:

1. Pass the entire CBEST (must pass the writing portion with a minimum of 37 points); **or**
2. Pass the CSET: Writing Skills Test (*Multiple Subject applicants only*); **or**
3. Meet the graduation writing requirement (GWAR) at any CSU campus; **or**
4. Successfully complete an upper-division advanced English composition course, with a "B" grade or better.

Basic Skills Requirement (BSR)

Satisfying the basic skills requirement is a program admission requirement. Select one of the following options to meet this requirement. For detailed information visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl667.pdf>).

1. Pass the California Basic Educational Skills Test (CBEST) – all sections must be taken and passed
2. Pass the CSU Early Assessment Program (EAP) English and Math sections (tests completed in high school)
3. Pass the CSU English Placement Test (EPT) and the Entry Level Math (ELM) Test (For more information, visit the Testing Center website (<http://www.csus.edu/testing>))
4. Pass the CSET: Writing Skills Test (available to Multiple Subject applicants only)
5. Pass a basic skills examination from another state

Register online at the CTC Exams website (<http://www.ctcexams.nesinc.com>). **Take exams no later than February for FALL admission consideration.**

Subject Matter Competence (SMC)

Applicants are required to meet SMC to be considered for admission:

Special Education: Applicants holding one of the following types of credentials, may have met the subject matter competency requirement: five-year preliminary, clear, professional clear, or life credential in the following authorizations: Multiple Subject, Single Subject, Standard Elementary, Standard Secondary, General Elementary, or General Secondary. Applicants who do not hold one of the types of credentials listed above can meet SMC through one of the following options:

- CSET for Multiple Subjects option or
- Single Subject option (see requirements below)

Multiple Subject: All applicants must satisfy SMC by passing the California Subject Examinations for Teachers (CSET): Multiple Subjects subtests I, II, and III. **NOTE:** CSET passing scores on all three (3) subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).

Single Subject: Applicants may satisfy SMC in ONE of two ways, either (1) by examination or (2) by completing an approved undergraduate program of subject matter coursework.

1. **Examination(s)** Take and pass the California Subject Examinations for Teachers (CSET) in your subject area. Be sure to take all required subtests in your teaching area. **NOTE:** CSET passing scores on all subtests are required for admission consideration. **Take exams no later than February for FALL admission consideration.** Register for tests online at: www.ctcexams.nesinc.com (<http://www.ctcexams.nesinc.com>).
2. **Coursework** Complete a California Commission-approved undergraduate academic subject matter preparation (SMP) program from an accredited California college/university.

SMP Coursework Options

- **The Sacramento State Subject Matter Program (SMP)** is a California approved baccalaureate program that prepares individuals for teaching. Sac State students completing a SMP must meet with an approved advisor as soon as possible in order to complete the Subject Matter Competence Verification Form. For a listing of faculty advisors visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/smp-advisor-20160926.pdf>).
- **Non-Sacramento State applicants** who completed an approved SMP on a California campus other than Sacramento State must submit verification of completion of the SMP on letterhead stationery of your school, signed by the approved evaluator, instead of using the Subject Matter Competence Verification Form. Check with your College's Credentials office for the approved evaluator.

Grade Point Average (GPA) Required

In order to be considered for admission to a Teaching Credential Program, applicants must have attained a cumulative GPA of at least 2.67 in all baccalaureate and post-baccalaureate course work (if completed) OR a GPA of at least 2.75 in the last 60 semester or 90 quarter units attempted.

Pre-requisite Credential Courses – to be completed PRIOR to starting the credential programs:

Code	Title	Units
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
HLSC 136	School Health Education	2
KINS 172	Movement Education ¹	3

¹ For MS only. If admitted, an equivalent PE/Health methods workshop can be completed during the credential program.

List of equivalent courses, visit the Teaching Credentials website (<http://www.csus.edu/coe/apply/assets/credentials/cred-equivalencies-prereqs-20160712.pdf>).

Interview

All applicants must participate in a one-hour group interview as part of the screening process. After the supplemental program application is received by the Department, applicants are notified by email of the interview process and dates.

Applications Required

CSU Graduate School Application for the University:

Applicants not currently attending Sacramento State, Sacramento State graduating seniors, and Sacramento State students completing a master's degree or second bachelor's degree MUST apply for admission to graduate school through the Office of Graduate Studies (OGS) by completing and submitting the CSU application on-line.

Transcripts: Applicants who did not graduate from Sacramento State must submit **one (1) set of sealed, official transcripts from ALL community colleges/colleges/universities attended, even if only ONE class was completed.** If you have questions about the University graduate school application process, please contact the OGS at (916) 278-6470.

Foreign degrees: Transcripts from applicants with degrees from outside of the United States must review the information/instructions on the Office of Graduate Studies website (<http://www.csus.edu/gradstudies/FutureStudents/ApplicantsWithForeignDocuments>).

NOTE: Foreign transcripts and other supporting documents are usually due much earlier than University and department application deadlines.

Teaching Credentials Program Supplemental Application:

All applicants must submit a supplemental program application packet that includes: a list of experiences related to teaching/working with children/youth, an essay, two completed & sealed reference forms, writing proficiency verification, subject matter competency verification, and basic skills requirement verification (CBEST or other approved verification). **Beginning in OCTOBER every year, the supplemental program applications with instructions/current requirements are available on the College of Education website** (<http://www.csus.edu/coe/apply/credentials.html>). Credential programs only begin in FALL semesters. Complete supplemental applications and all supporting documents must be submitted to the Teaching Credentials by February.

The exact submission deadline date is posted once applications are available on the website.

Certificate of Clearance (COC/Fingerprint Clearance):

ALL applicants must submit verification of having been issued a clearance by the CA Commission on Teacher Credentialing (CTC) before they will be allowed to officially start the credential program.

- Applicants who *have already been issued* a clearance/permit/credential must submit a printout from the CTC website (<http://www.ctc.ca.gov>) showing the issuance date of a valid CA 30-day emergency permit, a valid CA Child Development Associate/Center permit, a valid CA credential, or a valid Certificate of Clearance.
- Applicants who *have NOT been issued* a clearance/permit/credential must apply for the Certificate of Clearance on the CTC website as well as complete the Live Scan fingerprinting process. Tips for completing the online application and Live Scan process can be found on the CTC website (<http://www.ctc.ca.gov/credentials/online-services/pdf/web-app-tips.pdf>). Proof of applying for the clearance and completing the Live Scan process MUST be submitted with the supplemental credential program application packet. Include as proof the following: a copy of the 'Payment Receipt' page from the online COC application AND a copy of your completed and scanned Live Scan form.
- Once your clearance is issued, you will receive an email from the CTC. Print this email and submit it with your supplemental program application packet. Or, if the email is received after you have submitted your application, submit the email directly to the Teaching Credentials Department in Eureka Hall - 401.

EXCEPTION – it is not necessary to apply for the Certificate of Clearance if you can verify you hold a valid California certificate or credential such as an emergency permit for substitute teaching, Pre-intern certificate, PPS credential, Child Development Associate or Supervisor Permit, Adult Vocational Education credential **OR** if you are applying for a Special Education credential program, verify a valid Multiple or Single Subject credential.

NOTE: If you answered "YES" to any of the Personal and Professional Fitness questions on the Certificate of Clearance application, you will need to obtain the official arrest record and court paperwork regarding

each incident. Refer to the CTC website (<http://www.ctc.ca.gov/educator-discipline/self-reporting.html>) for the instructions, forms, and where to submit all additional paperwork. If you have arrests and/or convictions on your record, once you submit the additional paperwork/documentation to the CTC, the processing of your clearance application can take six months or longer. This means you may not be eligible to start the credential program if your clearance is not issued before the program begins. If you have any questions, contact the CTC directly via email (credentials@ctc.ca.gov).

Additional Information

Verification of Bachelor's Degree

ALL applicants must obtain a bachelor's degree from a regionally accredited college/university in the United States in order to be eligible for a credential. Proof can be obtained through official transcripts and listed as "Degree(s) Awarded" with the date the degree was awarded. To find out if your college/university is regionally accredited by one of the accrediting agencies approved by the California Commission on Teacher Credentialing (CTC), visit the CTC website (<http://www.ctc.ca.gov/credentials/accreditation-bodies.html>).

Foreign Transcript Evaluation

Individuals who have completed college or university course work at an institution in a country other than the United States must obtain a complete evaluation of foreign transcripts, degrees¹, and other relevant documents prior to applying for a teaching credential program. This evaluation is required by the California Commission on Teacher Credentialing (CCTC). It is recommended that credential program applicants have their documents evaluated by WES (<http://www.wes.org/students>), since both the University Office of Graduate Studies and the Commission will accept the WES (<http://www.wes.org/students>) evaluation. Applicants should select the **WES INTERNATIONAL CREDENTIAL ADVANTAGE PACKAGE (ICAP) Course by Course Evaluation**. For additional information on foreign transcript evaluations please visit the CTC website (<http://www.ctc.ca.gov/credentials/leaflets/cl635.pdf>).

¹ The bachelor's degree requirement for California credentials refers to the equivalent of a four-year (or more) college-level program.

Verification of completing the United States Constitution Requirement

California Education Code, Section 44335, requires all candidates for Multiple Subject, Single Subject, and Education Specialist credentials to demonstrate knowledge of the United States Constitution by completing a college-level course with a "C" or equivalent grade or better, or pass a college-level examination in the subject, or verify AP exam credit for American History or American Government/Politics. While this is not a program admission requirement, this requirement must be completed before the credential can be granted at the end of the credential program. Most CSU graduates have met this requirement.

Additional Information for All Admitted Credential Candidates

- Continued Enrollment: **Continued enrollment in a Preliminary Credential Program is contingent upon the candidates maintaining a GPA of 3.0 in all professional education courses.** If incomplete grades or grades of "D", "F", and "NC" (No Credit) are received in professional education courses, the candidate must withdraw from the program unless a specific exception has been approved by the Credential Appeals Committee.
- Delays: Candidates who have to delay progress in a Preliminary Credential Program file a "Program Delay Petition" in the Teaching Credentials Office. A student returning after a delay may be

accommodated on a space available basis. Any student on academic probation is subject to automatic disqualification as a Credential candidate.

Appeal Process: A student who has been formally admitted to the program has the right to appeal to the Credential Appeals Committee about any policy affecting program continuation. Appeals petitions and assistance are available in the Teaching Credentials Office

Bilingual Authorization (BA)

The BA is a specialized authorization that authorizes the credential holder to provide instruction in the primary language to candidates with limited English proficiency. This option is available concurrently for all credential candidates with oral and written fluency as well as cultural/historical knowledge of the target group (Spanish or Hmong). Candidates can complete additional requirements to add the Bilingual Authorization in Spanish or Hmong. For additional information on the BA option, contact the College of Education Equity Coordinator, Karina Figueroa-Ramirez (figueroaramirez@csus.edu), for an advising appointment to review your transcripts.

EDSS 366A	Single Subject Seminar, A	3
EDSS 366B	Single Subject Seminar, B	3

EDSS 368	Inclusive Education in Secondary Schools	1
EDSS 373		1
EDSS 384A	Instruction and Assessment of Academic Literacy, A	1.5
EDSS 384B	Instruction and Assessment of Academic Literacy, B	1.5
EDSS 474A	Field Experiences in Secondary Schools	3
EDSS 474B	Student Teaching in Secondary Schools	4

Several single subject methods classes split into 1.5 segments (A/B). The exception is KINS 380 and KINS 381 that are both 1.5 unit courses but have different course numbers. Candidates take on 2-course series from the following list of content methods courses:

EDSS 383A & EDSS 383B	Methods in English Education, A Methods in English Education, B	
EDSS 385A & EDSS 385B	Methods in World Language Education, A Methods in World Language Education, B	
EDSS 386A & EDSS 386B	Methods in Mathematics Education, A Methods in Mathematics Education, B	
EDSS 387A & EDSS 387B	Methods in History/Social Science Education, A Methods in History/Social Science Education, B	
EDSS 388A & EDSS 388B	Methods in Science Education, A Methods in Science Education, B	
KINS 380 & KINS 381	Methods of Teaching Elementary Physical Education Methods of Teaching Secondary Physical Education	

Other single subject methods courses remain 3 units. Candidates in these subject areas take one course from the following list of content methods courses in accordance with their subject area:

MUSC 178	Vocal Literature and Materials (Grades 4-12)	
or MUSC 179	Instrumental Literature and Materials	
ART 135	Overview of Secondary Art Education	
or ART 133	Art Education for Children	
FACS 299		
Total Units		37

Note: An undergraduate blended program leading to a Single Subject Credential in Mathematics is also available. For further information about the Mathematics Blended Program, contact: Dr. Elaine Kasimatis.

Undergraduate Studies in Education

Program Descriptions

Child Development (<https://www.csus.edu/coe/academics/chad/overview-chdv.html>)

Child Development is the study of physical, socio-emotional, and cognitive growth and development from conception through adolescence. The purposes of this major are to provide a sound academic program in Child Development and to prepare students to work with children and families in a variety of educational and community settings.

Students working toward the Bachelor of Arts degree may select one of five concentrations: Early Development, Care and Education (EDCE), Individualized Concentration, Elementary Pre-Credential, Social and Community Settings, and Integrated Pre-Credential Subject Matter Program. The Master of Arts in Child Development program offers an opportunity for advanced study of developmental theory and research in preparation for a wide range of professional objectives.

Child Development BA students pursue careers in elementary school teaching; preschool teaching and administration; child-care and after-school employment; parent education; or work in a variety of social service and community agencies. The undergraduate major also prepares students for graduate studies in child development, elementary or special education, human development, social work or counseling. The MA program prepares graduates for professional employment in a variety of settings, including working directly with infants, children and their families, teaching at the community college level, and additional study toward a doctoral degree in child development or a related field.

Deaf Studies (<https://www.csus.edu/coe/academics/undergraduate/programs/overview-asl.html>)

Deaf Studies takes an interdisciplinary, deaf-centric approach to the study of deaf and hard-of-hearing people in American and global societies. The major and minor programs promote understanding of deaf individuals as members of diverse sociolinguistic groups with distinct cultures, traditions, literatures, and languages. Students will develop skills in analyzing stereotypes and policies around deaf people, which may allow them to work within this population and in their communities to affect and support deaf equity.

With a Deaf Studies Major, students will be prepared to undertake further training in order to enter the fields of interpreting, education, or other specialized fields working with deaf consumers. This degree is not meant to be a substitute for these types of programs, but a bridge toward them.

With an ASL and Deaf Studies Minor, students may obtain entry-level jobs in settings working with Deaf individuals such as residential supervisor, classroom aide, vocational trainer, and much more. Students may also combine an ASL and Deaf Studies Minor with a related major field of study such as education, counseling, audiology and speech therapy for a more well-rounded grounding in deaf and hard-of-hearing issues in their field. Students in fields which are not specifically deaf-related such as nursing, law, computer engineering, and many more may also experience

an edge in gaining employment anywhere, with a minor in ASL and Deaf Studies compared to those without similar coursework or experience.

Further, students having completed the Deaf Studies Major and Minor may be able to waive similar coursework at other universities with specialized fields of study centered on deaf and hard-of-hearing people that may not be offered in the Sacramento region.

Career and Technical Studies (<https://www.csus.edu/coe/academics/undergraduate/programs/overview-career-technical.html>)

This program is designed to provide training for adults who wish to train/teach in a career technical/business program in public institutions or private business settings. The Bachelor's degree includes the Designated Subjects Teaching Credential in Career Technical Education or Adult Education and the Supervision and Coordination Credential. The program is offered on weekends and uses instructional techniques suited to adult learners.

This program is offered through the College of Continuing Education while its academic home is in Undergraduate Studies in Education in the College of Education. It is approved by the California State University Chancellor's Office and the Western Association of Schools and Colleges (WASC).

Degree Programs

BA in Child Development (Early Development, Care, and Education) (p. 504)

BA in Child Development (Elementary Pre-Credential) (p. 506)

BA in Child Development (Individualized) (p. 507)

BA in Child Development (Integrated Pre-Credential Subject Matter Program) (p. 509)

BA in Child Development (Social and Community Settings) (p. 510)

BS in Career and Technical Studies (p. 513)

BA in Deaf Studies (p. 512)

Minor in American Sign Language/Deaf Studies (p. 514)

Minor in Bilingual/Multicultural Education (p. 514)

Minor in Child Development (p. 514)

Minor in Counseling (p. 515)

Minor in Teacher Education (Teaching, Equity, and Engagement) (p. 515)

MA in Child Development (<https://www.csus.edu/coe/academics/chad/overview-ma-chdv.html>)

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining

whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

CHDV 23. Assessment and Observation in Child Development. 3 Units

Prerequisite(s): CHDV 30, or CHDV 35, or equivalent

Purposes of and methodological issues involved in assessing and observing early child development and learning in educational and developmental settings. Topics include selection of appropriate observation methods, survey of standardized measures, ethics, and interpretation and implications of assessment data for teaching and learning. Focus will be on becoming objective and unbiased observers, use of both informal and formal assessment tools, and principles of observational assessment research. Students will be required to complete up to 10 hours of observation outside of class. APA style will be introduced to support the development of practical and scholarly communication and writing.

CHDV 30. Human Development. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Interdisciplinary study of human development with practical observations. Addresses physical, socio-cultural, intellectual and emotional aspects of growth and development from conception to death. A variety of field experiences will be required.

CHDV 31. Adult Supervision and Mentoring In Early Childhood Programs. 2 Units

Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.

Term Typically Offered: Spring only

Study of research and exemplary practices in the supervision of early childhood teachers, other program staff, parents and volunteers. Content emphasizes adult learning.

CHDV 32. Administration and Supervision of Early Childhood Programs. 3 Units

Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.

Term Typically Offered: Fall only

Basic issues, procedures and practices in the administration and supervision of public and private schools. Requires administrative supervisory fieldwork in an early childhood program.

CHDV 35. Child and Adolescent Development. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Examination of theory and research on cognitive, social and physical human development from conception through adolescence. Content will include data-collection techniques such as observation. Some course material will be applied to an analysis of elementary schooling.

CHDV 35F. Human Development and Elementary Field Experience.**2 Units****Corequisite(s):** Completion of or enrollment in CHDV 35.**Term Typically Offered:** Fall, Spring

Directed field experiences in elementary school settings. Students are required to work at an elementary school and attend an on campus seminar. Includes the integration of student field experiences with theory and research in Human Development. Issues in learning, social development, adult career selection and schooling will be explored. Credit/No Credit

CHDV 44. Community Service Learning in Developmental and Educational Settings.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 123. Qualitative Methods in Human Development.**3 Units****Prerequisite(s):** CHDV 30, or CHDV 35, or equivalent**Term Typically Offered:** Fall, Spring

Introduction to qualitative research methods and their philosophical underpinnings. The focus will be on theoretical, methodological, and ethical issues in studying human learning and developmental processes from interpretive and social constructivist perspectives. Attention given to methodological strategies used to document and analyze learning and development in context. Strategies include participant-observation field notes, interviews, audio/video recordings, documents, and artifacts, with implications for theory, policy, and practice. APA style will be introduced to support the development of scholarly communication and writing.

Note: For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.

CHDV 128. Combined Research Methods in Human Development.**3 Units****Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent.**Term Typically Offered:** Fall, Spring, Summer

Introduction to qualitative and quantitative research methods and their philosophical underpinnings. Consider theoretical, methodological, and ethical issues in studying learning and developmental processes from interpretive and social constructivist perspectives. Think critically about the generation of research questions and hypotheses and design and conduct of research inquiry, with implications for theory, policy, and practice. Students learn to locate, understand, critique, conduct, and report research findings from multiple approaches and be introduced to APA style writing as a tool for scholarly communication.

CHDV 130. Parent Education.**3 Units****Term Typically Offered:** Fall, Spring

Ways parent education may be conducted in Child Development programs to meet legislated requirements as well as parent needs. Attention will be given to parent education programs which serve children of different ages, diverse language and cultural backgrounds, and children with special needs. The rights and responsibilities of children, parents and teachers will be discussed. Discussion and participation in such classroom activities as panels, presentations, demonstrations and cooperative learning assignments.

CHDV 131. Language Development.**3 Units****Prerequisite(s):** CHDV 133. CHDV 133 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Investigation of the development of language and its relationship to school learning, cognitive development and social development. Both linguistic and communication competence are included. Specific attention to second language acquisition and principles underlying effective instruction in linguistically diverse children.

Note: Topic areas will vary by semester, and the course may be repeated.

CHDV 132. Fieldwork in Child Development.**3 Units****Prerequisite(s):** CHDV 123**Term Typically Offered:** Fall, Spring

Directed field experiences in settings selected to meet students' experience and needs. Students are required to work at the selected setting and attend an on-campus seminar to explore developmental content and issues. Discussion will also focus on attention to professional development and ethics in community and educational settings working with children and families.

Note: May be taken as a core requirement and repeated as an elective.

CHDV 133. Quantitative Methods in Human Development.**3 Units****Prerequisite(s):** CHDV 30, or CHDV 35, or equivalent**Term Typically Offered:** Fall, Spring

Introduction to quantitative research methods in human development and their philosophical underpinnings. Major topics include the structures, design and conduct of research inquiry, and the generation of research questions and hypotheses, and collection of data. Emphasis will also be on engaging in quantitative research as well as increasing students' ability to locate, understand, critique, and report research findings. Students will be challenged to think critically about methodological issues in quantitative research. AP A style will be introduced to support the development of scholarly communication and writing.

Note: For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.

CHDV 134. Development of Young Children as Mathematical and Scientific Thinkers. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Summer only

Theory, research, and practice in development of the child's thinking about mathematical and scientific concepts. Topics will include: (a) early emergence of conceptual reasoning connected with mathematics and science, (b) symbolic development and language of mathematics and science, (c) developmental sequences in mathematical and scientific thinking, (d) California Preschool Learning Foundations; (e) age-appropriate and culturally-relevant experiences to promote mathematic and scientific reasoning. Activities include lecture, discussions, presentations, cooperative learning assignments, and integration of course content with early childhood classroom practice.

CHDV 135. Crosscultural Child Development. 3 Units
Prerequisite(s): CHDV 133. CHDV 133 may be taken concurrently.
Term Typically Offered: Fall, Spring

Examination of the physical, socio-emotional and cognitive development in children from a crosscultural orientation. Will investigate cultural variables that influence child development from both inter- and intranational perspectives. Discussion of culturally universal and culturally specific behaviors, cognitions and experiences will be covered.

CHDV 136. Developmental Experiences, Methods and Curriculum. 3 Units
Prerequisite(s): CHDV 123. CHDV 123 may be taken concurrently.
Term Typically Offered: Fall, Spring

Examination of theory, research, and exemplary practices and programs for children through elementary school. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 137. Cognitive Development. 3 Units
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 137L.
Term Typically Offered: Fall, Spring

Cognitive development of children from conception through adolescence with consideration of biological and environmental influences. Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.
Note: Student must co-enroll in the corresponding section of CHDV 137L.

CHDV 137L. Cognitive Development Research Laboratory. 1 Unit
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 137.
Term Typically Offered: Fall, Spring

Laboratory course to complement CHDV 137. Emphasis placed on the observation, interaction, documentation, and using a scientific approach to learn about cognitive development. Classroom, field, and research experiences supporting the study of cognitive development.
Note: Student must co-enroll in the corresponding section of CHDV 137.

CHDV 138. Social and Emotional Development. 3 Units
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 138L.
Term Typically Offered: Fall, Spring

Study of the social and emotional development of children from conception through adolescence with consideration of biological and environmental influences. Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.

Note: Student must co-enroll in the corresponding section of CHDV 138L.

CHDV 138L. Social and Emotional Development Laboratory. 1 Unit
Prerequisite(s): CHDV 133.
Corequisite(s): CHDV 138.
Term Typically Offered: Fall, Spring

Laboratory course to complement CHDV 138. Emphasis placed on the nature of observation, interaction, and using a scientific approach to learn about social and emotional development. Classroom and field experiences related to the study of social and emotional development.
Note: Student must co-enroll in the corresponding section of CHDV 138.

CHDV 139. Educational Play: Theory and Practice. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent
Term Typically Offered: Summer only

Use of play as an educational vehicle in early childhood. Discovering how play helps children develop physically, socially, emotionally, cognitively and creatively through a variety of playful modes. Constructing appropriate developmental play materials and activities with emphasis on the active role of the adult in child's play. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 140. Coordination of Early Childhood Programs. 3 Units
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent
Term Typically Offered: Fall, Spring

Advanced methodology of coordinating early childhood programs, to include organization, staff development and community relations. Includes the functions of parents, aides, volunteers and varied early childhood organizational patterns.

CHDV 141. History of Childhood: International and Interdisciplinary Perspectives. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examination of what it means to be a child in today's world by comparing social constructions of childhood across the broad historical periods and in contrasting parts of the world. Exploration of cultural beliefs, values and practices of childhood in different historical, social, and economic contexts. Comparative approach provides a critical framework from which to analyze scholarly inquiry about how children develop in families, schools, and broader society. Course content will interest students from a broad array of majors.

CHDV 143. Mind and Brain in Developmental Context. 3 Units**Prerequisite(s):** CHDV 30 or 35; Introductory Biology.**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5**Term Typically Offered:** Fall, Spring, Summer

Investigation of the biological processes underlying child development, from conception through adolescence. Emphasis will be on the genetic, neurological, and endocrine processes related to cognition, social, and emotional development. Students will explore the bidirectional nature of psychobiological processes, with specific emphasis on the psychobiological mechanisms underlying the transaction between cultural, educational, and social-emotional related to educational, and mental and physical health functioning.

CHDV 144. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units**Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 145. Controversial Issues in Childhood Development, Education, and Social Policy. 3 Units**Prerequisite(s):** GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI), GE AREA D, Race & Ethnicity Graduation Requirement (RE)**Term Typically Offered:** Fall, Spring

Discussion-based examination of controversial issues linking development, education, and cultural practice in which scholarly inquiry has substantial implications for social policy. Specific topics vary by semester and include topics of both historical relevance and contemporary debates. Content relevant to multiple disciplines including issues such as adolescent risk behavior, bilingual education, brain-base pedagogy, child care, children and the law, cultural diversity, developmental theory and educational practice, gender, literacy practices, motivation, parenting styles, school violence, special education, standardized testing, and technological change.

CHDV 150A. Early Literacy Development in First and Second Language. 2 Units**Prerequisite(s):** CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.**Corequisite(s):** CHDV 150B.**Term Typically Offered:** Summer only

Students will become familiar with language and emergent literacy of young children from birth to eight. An overview of research-based developmental progression will be emphasized as it relates to the learning foundations for language and literacy. Other focal points will be home-school connections and cultural influences on literary development. Assessment topics, including observation and other developmental strategies will be intergrated. An emphasis on increasing students' ability to connect theoretical understanding to the practice offered in CHDV 150B.

CHDV 150B. Early Literacy Development in First and Second Language Practicum. 1 Unit**Prerequisite(s):** CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.**Corequisite(s):** CHDV 150B.**Term Typically Offered:** Summer only

The practicum experience (20 hours) will provide students with the application of course content material learned in CHDV 150A. Students will observe and validate multiple experiences in which first and second language learners learn language and literacy successfully. Factors affecting language and literacy development will be addressed. Credit/No Credit

CHDV 153. Apprenticeship in Advanced Child Development. 3 Units**Prerequisite(s):** Instructor permission**Term Typically Offered:** Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.

Prerequisite: Instructor permission.

Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to four times for 12 units of credit, with a limit of 6 units applied towards the CHDV major requirements.**CHDV 154. Issues in Parenting. 3 Units****Prerequisite(s):** CHDV 30 or CHDV 35 or FACS 52.**Term Typically Offered:** Fall, Spring, Summer

Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.

Cross-listed: FACS 154; only one may be counted for credit.

CHDV 157. Infant and Toddler: Development and Care. 3 Units

Prerequisite(s): One of the following: CHDV 30 or CHDV 35, FACS 50, PSYC 148, or SWRK 125A.

Term Typically Offered: Fall, Spring

Research theory and practice are examined in relation to each area of infant and toddler development (conception through 24 months): Physical, social, emotional, cognitive, and perceptual. Individual differences and needs are stressed. Issues pertinent to individual and group care will be covered. Activities include lecture, discussion, and observations.

Cross Listed: FACS 157; only one may be counted for credit.

CHDV 163. ASL Literature. 3 Units

Prerequisite(s): DEAF 154

Term Typically Offered: Fall, Spring

Students will learn several different forms of ASL literature. Aspects of both form and content will be analyzed as well as their role in the preservation and circulation of Deaf cultural forms. Students will also learn to perform narratives and/or poems in ASL. They will understand the effects of genre, style, perspective, and other artistic techniques on ASL signed art performances, and utilize similar techniques in their developed performances. Students may perform their stories for a general audience. Field trip.

Note: Course taught in ASL with No Voice.

Field trip(s) may be required.

CHDV 194. Cooperative Education Experience. 3 Units

Prerequisite(s): Completion of 60 units total credit and instructor permission. May be taken four times for a maximum of 12 units credit.

Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies and other appropriate settings. Requires regular meetings with faculty supervisor, completion of field study assignment, evaluation by field-based supervisor, and a written final report.

Credit/No Credit

CHDV 196A. Approaches to Research Methods in Child Development A. 3 Units

Prerequisite(s): CHDV 30 or CHDV 35 or equivalent; completion of 45 total units; Must be taken prior to completion of 90 units.

Term Typically Offered: Fall, Spring

This course examines methodological issues involved in assessment, observation, analysis, and design in the field of child development. Topics include the research process. APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills of scientific inquiry.

Note: First course in a series. 196B must be taken in the semester immediately following completion of CHDV 196A.

CHDV 196B. Approaches to Research Methods in Child Development B. 3 Units

Prerequisite(s): CHDV 196A.

Term Typically Offered: Fall, Spring

Two semester sequence of instruction that examines methodological issues involved in assessment, observation, research design, and analytical concepts involved in the field of child and adolescent development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills for scientific inquiry.

Note: Must be taken prior to 90 units.

CHDV 199. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor and Department Chair.

Credit/No Credit

CHDV 200. Proseminar in Child Development. 3 Units

Prerequisite(s): Admission to MA Child Development program or instructor permission.

Term Typically Offered: Fall only

Orientation to advanced scholarship in human development with a focus on understanding and evaluating current directions in developmental research. Developmental research methods and analytical strategies will be explored.

CHDV 210. Seminar in Social Development. 3 Units

Term Typically Offered: Fall, Spring

Advanced seminar focusing on theoretical and empirical readings covering topics in social/emotional development. Potential topics may include social and emotional development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 211. Seminar in Cognitive Development. 3 Units

Prerequisite(s): Admission to MA program or instructor permission.

Term Typically Offered: Fall, Spring

Advanced developmental seminar focusing on theoretical and empirical readings covering topics in cognitive development. Specific topics will be related to cognitive development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 242. Theoretical Approaches to Child Development. 3 Units

Prerequisite(s): Graduate standing or instructor permission.

Term Typically Offered: Fall, Spring

An in-depth examination of physical, cognitive, and social development from infancy through adolescence. Content includes current developmental theory and research and the application of this research to educational and community settings, with special emphasis on the cultural context of development. The development of critical thinking skills and scholarly writing will be emphasized.

Note: Graduate Writing Intensive course

CHDV 244. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units
Term Typically Offered: Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 245. Selected Topics in Developmental Theory. 3 - 6 Units
Prerequisite(s): Admission to MA program or instructor permission.
Term Typically Offered: Fall, Spring

In-depth study of selected topics in cognitive and socio-emotional development of preschool and primary grade children as related to educational practice. Content includes theory and research on psychological dimensions of children as they participate in various contextual settings.

Note: May be repeated twice as long as topic differs. Three units may be used toward the elective requirements in the Master of Arts in Child Development.

CHDV 246. Motivation and Learning in Children. 3 Units
Prerequisite(s): Graduate standing, or instructor permission.
Term Typically Offered: Fall, Spring

Sources of and developmental changes in motivation, including biological predispositions, critical life events, individual differences, and social, cultural and educational experiences will be examined. Students will participate in a group research effort on motivation and educational practice.

CHDV 247. Theoretical and Applied Perspectives on Cross-cultural Development. 3 Units
Prerequisite(s): CHDV 200 or instructor permission. CHDV 200 may be taken concurrently.
Term Typically Offered: Fall, Spring

The cultural basis of human development through an in-depth examination of the socio-emotional, cognitive, language and gender development of children from infancy through adolescence within and across different cultures and communities. Theory, methods, and research of cross-cultural investigations will be considered and applications of course material to educational and community settings will be explored and analyzed.

CHDV 248. Curriculum and Instruction. 3 Units
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring

Advanced study of the sociocultural influences on curriculum development. Research, theory, and curricular practices will be analyzed, evaluated and applied to a variety of preschool and primary grade settings.

CHDV 249. Language Processes in Development. 3 Units
Prerequisite(s): Admission to MA program or instructor permission.
Term Typically Offered: Fall, Spring

Language is an important cognitive and communicative tool that promotes learning. Through an integrative approach to language and cognitive development, students will examine how children learn through language. Students will have practical experience in collecting and analyzing children's language learning in educational settings.

CHDV 250. Quantitative Research Methods. 3 Units
Prerequisite(s): CHDV 133; admission to the MA program or instructor permission.
Term Typically Offered: Fall, Spring

Critical analysis of quantitative research methods used in the study of development. Core issues in studying development will be discussed as they relate to families and societal issues. Major topics include the philosophical underpinnings of research design, various research methods of inquiry, ethical issues, and the development of research questions and data collection. Critical thinking and writing skills will be emphasized.

CHDV 253. Apprenticeship in Advanced Child Development. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.
Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to 4 times for credit.

CHDV 290. Seminar for Culminating Experience. 3 Units
Prerequisite(s): Advancement to candidacy; completion of at least 20 units of course work towards the MA, instructor permission.
Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations to be included in the culminating experience: defining and narrowing a topic for study; abstract writing; differentiation of primary/secondary source of evidence; development of organizational schemes for a literature review; database literature searches; APA format requirements; time management, range and breadth of evidence for a comprehensive review; connecting the review and project/thesis; writing style and quality; revisions and critical feedback; social/psychological dimensions of thesis/project process; data analysis and statistics help on campus for thesis.
 Credit/No Credit

CHDV 292. Culminating Seminar for Exam Option. 3 Units
Prerequisite(s): Completion of all foundation course requirements for MA program (CHDV 200A, CHDV 200B, CHDV 242, CHDV 247, CHDV 250) advancement to candidacy, or instructor permission.
Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations for the exam option culminating experience: test preparation and tips, exam writing, practice exam questions, time management, and community building with other students. Students will complete reading and writing assignments related to each exam area and prepare for an exam question related to an approved elective topic of their choice. Students will submit an exam petition to be reviewed and approved by the departmental exam committee.
 Credit/No Credit

CHDV 295. Practicum in Child Development. 1 - 3 Units
Prerequisite(s): Graduate standing, or instructor permission.
Term Typically Offered: Fall, Spring

Directed field based experience in preschool, elementary or other community based settings serving children from infancy through adolescence and their families. Designed to provide students the opportunity to develop professional skills and understandings in applied settings or explore career development opportunities with particular emphasis on leadership or administrative skills and knowledge.
Note: Students are required to work at an instructor-approved field site consistent with their career goals and interests and attend an on campus seminar.

CHDV 299. Special Problems. 1 - 3 Units
Prerequisite(s): Open only to upper division and graduate students with consent of faculty advisor and Department Chair.
Term Typically Offered: Fall, Spring

Individual projects at graduate level designed especially for students capable of independent study. Departmental petition, signed by instructor with whom student will be working and department chair, required.
 Credit/No Credit

CHDV 504. Culminating Experience in Child Development: Thesis or Project. 3 Units
Prerequisite(s): Admission to MA, Child Development program or instructor permission.
Term Typically Offered: Fall, Spring

Guidance toward completion of thesis or project option for the MA, Child Development program. Credit is given upon successful completion of a thesis, project, or other approved culminating experience. Open only to the graduate student who has been advanced to candidacy for the Master's degree and has secured the permission of his/her faculty advisor and the Department Chair one full semester prior to registration.

CHDV 505. Culminating Experience in Child Development: Exam Option. 3 Units
Prerequisite(s): Admission to and completion of all course requirements for the MA, Child Development program, CHDV 292 or instructor permission.
Term Typically Offered: Fall, Spring

Guidance in ongoing preparation for the examination option for the MA, Child Development program. Credit is given upon successful completion of the examination option for the culminating experience. Open only to the graduate student who has completed all other course requirements, has been advanced to candidacy for the Master's degree, and has secured the permission of the Department Chair one full semester prior to registration.
 Credit/No Credit

DEAF 51. American Sign Language 1. 3 Units
Term Typically Offered: Fall, Spring

Students will learn basic vocabulary and grammar of American Sign Language. Upon completion of this course, students will be able to exchange basic information about themselves and their families such as their names, where they live, and their interests. Through out-of-class readings, in-class discussions and demonstrations, and experiences within the deaf community, students are exposed to elements of the deaf culture and community.
Note: Taught in ASL without voice.

DEAF 52. American Sign Language 2. 3 Units
Prerequisite(s): DEAF 51 or equivalent.
General Education Area/Graduation Requirement: Humanities (Area C2), Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring

Students will continue to expand vocabulary and concepts acquired in DEAF 51. Expansion of conversational range includes talking about other people and activities, giving directions, and making requests. Students develop discourse skills appropriate for establishing connections with deaf acquaintances and handling a variety of interruptions. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf culture and community.
Note: Taught in ASL without voice.

DEAF 53. American Sign Language 3. 4 Units
Prerequisite(s): EDS 52 or equivalent.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring

Students will expand communicative repertoire developed in DEAF 52 to talk about people and places in a contextually-reduced framework. Students learn to describe places, objects, and events. Students develop basic narrative skills to tell about past events. Through in-class discussions/demonstrations, course readings, and out-of-class field experience, students are exposed to elements of the deaf community and culture.
Note: Taught in ASL without voice.

DEAF 56. ASL Fingerspelling and Numbers. 1 Unit
Prerequisite(s): DEAF 52
Term Typically Offered: Fall, Spring

Students will develop increased fluency in their expressive and receptive abilities in fingerspelling through in-class practice and viewing of videotaped narratives. Students will also reinforce their abilities to utilize ASL numbering systems for time, money, measurements, and game scores, amount others.

DEAF 57. ASL Classifiers. 2 Units
Prerequisite(s): DEAF 53; may be taken concurrently
Term Typically Offered: Fall, Spring

Students will develop increased understanding of the types and uses of classifiers in ASL and develop further abilities to utilize this component of ASL in their expressive and receptive signing abilities through in-class practice, viewing of videotaped narratives, and individual practice outside of class.

DEAF 60. Introduction to Deaf Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Course introduces students to topics central to the deaf and deaf community, including audiology, education, culture, and history. Utilizing readings, lectures and group discussion, students will learn about the anatomy and causes of deafness, early intervention and education of deaf children, communication strategies and their effectiveness, the deaf as a cultural group and deaf/hearing relationships. Upon course completion, students will understand deaf individuals and their community in a holistic perspective and apply this knowledge toward further studies into the deaf culture and community.

- DEAF 154. American Sign Language 4.** 4 Units
Prerequisite(s): DEAF 53
Term Typically Offered: Fall, Spring
- Principles, methods and techniques of manual communication with deaf people using American Sign Language. Emphasis on the continuation of developing advanced manual communication skills with a focus on techniques for informing others of factual information and instruction about rules and methods for students who will work or interact with adult deaf persons. Continuation of the analysis of the culture of deafness with emphasis on participation in the community.
Note: Taught in ASL without voice.
- DEAF 155. American Sign Language 5.** 4 Units
Prerequisite(s): DEAF 154 or instructor permission.
Term Typically Offered: Fall, Spring, Summer
- Students will build upon communicative skills developed in EDS 154 to develop and expand on their abilities to discuss parts of the body and health conditions, tell a personal narrative about themselves and moments in theirs and others' lives, as well as to retell and translate simple stories into ASL.
- DEAF 161. Deaf History.** 3 Units
Prerequisite(s): DEAF 60, DEAF 154
Term Typically Offered: Fall, Spring
- An overview of the education of the deaf from prehistoric times to the present will be provided. Roots of current trends and events in deaf education will be explored, with projections for the future. Current issues such as mainstreaming, cochlear implants, communication modalities for instruction and others are discussed in both a historical context and from a deaf perspective.
- DEAF 162. Deaf Culture and Community.** 3 Units
Prerequisite(s): DEAF 60, DEAF 154
Term Typically Offered: Fall, Spring
- Course introduces students to deaf people as a cultural and linguistic minority in America through coverage of sociolinguistic, anthropological, and historic issues in the development of deaf culture and community in America and worldwide. Utilizing readings, lectures and group discussion, topics will include: theories of culture; language use; cross-cultural interaction and intercultural processes, and deaf literature and art. Upon course completion, students will understand current and past educational, legal and medical policies and their impact on deaf and hard-of-hearing people.
- DEAF 163. ASL Literature.** 3 Units
Prerequisite(s): DEAF 57, DEAF 60, DEAF 154, DEAF 161, DEAF 162, and DEAF 164.
Term Typically Offered: Fall, Spring
- Students will be exposed to a number of ASL stories on videotape, learn several different forms of ASL literature and develop their own stories and narratives in each format. They will understand the effects of genre, style, perspective, and other artistic techniques on ASL storytelling, and utilize similar techniques in their developed stories. Students may perform their stories for a general audience.
- DEAF 164. Sign Language Structure and Usage.** 3 Units
Prerequisite(s): DEAF 154 or instructor permission.
Term Typically Offered: Fall, Spring, Summer
- Examines origins and linguistic structure of American Sign Language (ASL). Cross-linguistic comparisons with spoken and signed languages of other countries will be made. Students will learn aspects of ASL phonology, morphology and syntax. Sociolinguistic aspects of ASL usage in regard to gender, ethnicity, geographical region and educational status will be discussed. Conducted entirely in American Sign Language.
- DEAF 165. Seminar: Current Issues in the Deaf -World.** 3 Units
Prerequisite(s): DEAF 154 or instructor approval.
Term Typically Offered: Fall, Spring
- This course will explore a specific theme of interest to faculty and students within the program, with course content changed each semester. Selected topics will touch upon issues of special concern and interest to the Deaf community such as genetics, multicultural issues, media representations of deafness, theatre and performance art, visual arts, and other subjects which may arise in the future. Course will consist of readings, discussion, independent research, and viewing of various media as appropriate.
Note: 1) May be repeated when different topic is offered with a different instructor of record 2) Course taught in ASL with No Voice.
- DEAF 166. Experiences in the Deaf Community - Dynamics of Oppression and Building Allyship.** 3 Units
Prerequisite(s): DEAF 155, DEAF 161, DEAF 162.
Term Typically Offered: Fall, Spring, Summer
- This course links active participation in the Deaf community to the content of previous Deaf Studies courses. In particular this course examines how to be a good ally within the Deaf community in the midst of a context of power, privilege and difference. Following a Service Learning model, students will collaborate on various service projects contributing to the Deaf community. Field trip.
Note: Course taught in ASL with No Voice.
- Field trip(s) may be required.
- DEAF 199. Independent Study in Deaf Studies.** 1 - 3 Units
Prerequisite(s): DEAF 154
Term Typically Offered: Fall, Spring
- Individual projects designed especially for students capable of independent study.
Note: Departmental petition required.
- EDUC 10. Critical Thinking and the Educated Person.** 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring
- Examines thinking process patterns and dispositions, for self, children, parents and educators. Familiarizes students with critical thinking, provides a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. Implements critical thinking applications used both in student's academic and personal lives.

EDUC 10H. Critical Thinking and the Educated Person: Honors. 3 Units**Prerequisite(s):** Open only to Honors students.**General Education Area/Graduation Requirement:** Critical Thinking (A3)**Term Typically Offered:** Fall, Spring

This introductory course will examine the thinking process patterns and dispositions for self, children, parents and educators. The purpose of this course is to familiarize students with critical thinking, and to provide a systematic approach to its process and components. Students will learn about problem solving, decision-making, logical and creative thinking. The study of critical thinking will be supplemented with readings, discussions, and written assignments. The course will implement critical thinking applications used both in student's academic and personal lives.

EDUC 18. Mathematical Practices Across Cultures. 3 Units**General Education Area/Graduation Requirement:** Math Concepts & Quantitative Reasoning (B4)**Term Typically Offered:** Fall, Spring

Introduction to diverse mathematical thought, action and practices across cultures. Mathematics will be seen from a diversity of contexts. Learners will consider how diverse contexts and traditions both reflect a culture's heritage and world view and influence the mathematics learned and used. Topics covered include: ethnomathematics, mathematical modeling, and cultural connections in relation to diverse forms of quantitative reasoning, problem solving, numbering, systems of organization, perceptions of time and space as experienced by diverse traditions and peoples.

EDUC 21. First Year Seminar: Becoming an Educated Person. 3 Units**General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Students will have the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

EDUC 99. Special Problems. 1 - 3 Units**Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Individual projects designed especially for lower division students capable of independent study. Focus is on issues and topics involving exceptional populations.

Note: may be repeated for up to 12 units of credit

Credit/No Credit

EDUC 100A. Educating Students with Disabilities in Inclusive Settings. 2 Units**Corequisite(s):** EDUC 100B.**Term Typically Offered:** Fall, Spring

This course provides an overview of current knowledge about individuals with disabilities within the context of inclusive educational and community-based settings, with substantial focus on the role of the educator in the education of students who have disabilities in diverse communities. Content includes historical factors, legislation, causes and characteristics, educational needs, educational strategies, including educational technologies, assessment, collaboration, and support services for individuals with disabilities ranging across mild, moderate, severe, and profound disability levels.

Note: Designed to meet the Special Education requirement for a clear multiple and single subject credential.**EDUC 100B. Educating Students with Disabilities in Inclusive Settings Lab. 1 Unit****Corequisite(s):** EDUC 100A.**Term Typically Offered:** Fall, Spring

Field-based 30 hour experience. Lab is a synthesis and application of EDUC 100A course content in educational setting for students who receive special education services. Students will verify multiple experiences across the age-span and in inclusive educational settings, agencies, and community environments.
Credit/No Credit

EDUC 101A. Consultation Strategies for Educators of Students with Disabilities. 2 Units**Corequisite(s):** EDUC 101B.**Term Typically Offered:** Fall, Spring

Basic skills for effective collaboration and teaming are practiced through simulations, reflective case study analyses, and interviews with families, paraprofessionals, and related service providers. Cultural, socioeconomic and organizational implications are analyzed.

EDUC 101B. Consultation Strategies for Educators of Students with Disabilities - Lab. 1 Unit**Corequisite(s):** EDUC 101A.**Term Typically Offered:** Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of course content (EDUC 101A) in the development of basic collaboration strategies for individuals with mild/moderate disabilities. Students are required to participate in class visitations, interviews, and other field assignments.
Credit/No Credit

EDUC 102. Characteristics and Management of Career Technical Education. 3 Units**Term Typically Offered:** Fall, Spring

Demonstrates how to design motivating instruction that builds self esteem, maintains on-task behavior, and promotes learning among students at different developmental levels and of varying abilities. Examines stages of development of the career technical education learner and methods of maintaining student discipline using strategies that are free of bias and promote learning among diverse students.

EDUC 103. Assessment and Instruction in Career Technical Education. 3 Units**Prerequisite(s):** EDUC 102.**Term Typically Offered:** Fall, Spring

Demonstrates how to develop performance criteria, continuously assess student performance levels, prepare lesson plans and units of instruction for use with individual, small group, and whole class delivery systems, keep accurate records of student achievement, and perform program evaluations.

EDUC 104. Teaching Diverse Learners in Career Technical Education. 3 Units**Term Typically Offered:** Fall, Spring

Demonstrates how to encourage excellence among and design instruction for students from different gender, ethnic, religious, sexual orientation, language, and ability groups. Includes consideration of relevant law, sensitivity towards cultural heritages, principles of language acquisition, bias free instructional materials, and inclusionary programs. Examines the work of major education theorists and the research on effective teaching practices. Demonstrates the use of technology and computers in instruction.

EDUC 105. Advanced Instructional Design, Program Evaluation and Leadership in Career Technical Education. 3 Units**Term Typically Offered:** Fall only

Demonstrates how to recruit, place and guide students, organize a program advisory committee, plan and manage a program budget, implement a plan for preventive maintenance, manage customer service, and reflect current professional association best practices. Examines local state, and federal structure of technical education. Demonstrates how to plan and prepare a complete course of instruction, including goals, lesson plans, materials, strategies, and assessment procedures, teaching critical thinking and problem solving skills. Develops and uses student and employer follow-up studies as a part of an evaluation plan that leads to program improvement.

EDUC 106. Instructional Supervision/Coordination I of Career Technical Education. 3 Units**Prerequisite(s):** Students must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Offers student participation in performance-based objectives program addressing the following major topics: Principles of supervision, supervision models, consultation and coordination skills, facilitation skills, curriculum management, and labor relations.

EDUC 107. Instructional Supervision/Coordination II of Career Technical Education. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Offers student participation in a performance-based objectives program addressing the following major topics: School finance, grants and proposals, teacher observation models, staff development models, and total quality management practices.

EDUC 109. Career Guidance in Career Technical Education. 1 Unit**Prerequisite(s):** Application for Review of Work Experience)**Term Typically Offered:** Fall only

Examines the occupational history of students and assists them in gathering documentation to support their request to the CSU Reviewing Committee. Assists students in identifying goals for professional accomplishment.

Credit/No Credit

EDUC 110. Current Issues in Career Technical Education. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Provides in-depth investigation of various problems and issues confronting the career technical educator in public and private sectors. The class will focus on the specific issues of adult career development and perspectives of work. These issues will be explored from both global and personal perspectives. Students will gain awareness and understanding in relation to their own individual career development, as well as the career development of those with whom they work or will work.

EDUC 111. Education for Career Technical Students with Special Needs. 3 Units**Term Typically Offered:** Fall, Spring

Introduces concepts and practices of inclusion of special needs students as provided for under federal legislation and case law. Methods of adapting instruction and devising positive behavioral supports for students of diverse abilities are studied. Methods of assessing the progress of students with diverse abilities are examined.

EDUC 112. Legislation and Financing of Career Technical Education. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Offers a historical review of legislation and financing of career technical education programs at the federal, state, and local levels, addressing community colleges, regional occupational programs, secondary schools, corrections, private post-secondary schools, private industry education and training.

EDUC 113. Introduction to Technology Based Teaching Strategies in Career Technical Education. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall only

Examines the use of computers and their application in career technical instruction. Applications involving direct instruction, discovery learning, problem solving, assessment, practice and presentation are learned. Other technologies that support teaching and learning are studied and practiced. Issues involved in access to and use and control of computer based technologies in a democratic society are studied.

EDUC 114. Multicultural Career Technical Education for a Pluralistic Society. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Examines cultural diversity and the historical and cultural traditions of the major cultural, ethnic, and linguistic groups in California. Methods of effective ways to include cultural traditions and community values in the instructional program are learned. Principles of second language acquisition, language teaching strategies, and curriculum adaptations for students whose second language is English are studied.

EDUC 115. Behavior Management and Total Quality Management in Career Technical Education Program. 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall only

Teaches students how to manage the classroom and learning behavior of career technical education students in various settings under various circumstances. Total Quality Management procedures for career technical education/training programs are studied.

EDUC 116. Special Problems in Career Technical Education. 1 - 3 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Individualized study of various questions and problems within career/technical education determined collaboratively by the student and the instructor.

Credit/No Credit

EDUC 117. Field Experience in Career Technical Education. 1 - 6 Units**Prerequisite(s):** Student must be admitted to the BSCTS program**Term Typically Offered:** Fall, Spring

Individualized field experience designed collaboratively by the student and instructor.

Note: Department consent required

Credit/No Credit

EDUC 120. Literature For Children. 3 Units**Prerequisite(s):** Must have Junior or higher standing to enroll in this course**Term Typically Offered:** Fall, Spring

Historical and modern children's literature; standards of selection and acquaintance with the leading authors and illustrators; procedures and practices in methodology.

EDUC 121. Multicultural Children's Literature. 3 Units**Prerequisite(s):** GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI), Humanities (Area C2)**Term Typically Offered:** Fall, Spring, Summer

Survey of historical and modern multicultural children's literature examining standards of selection and acquaintance with the leading authors, illustrators and book awards; procedures and practice in methodology. Focus on children's literature which represents the diversity in America and fosters an understanding of the cultural values, identity, and heritage of those populations.

EDUC 124A. Tutoring Children in Mathematics. 2 Units**Corequisite(s):** EDUC 124B.**Term Typically Offered:** Fall, Spring

Orientation to concept and practice of tutoring basic mathematics skills including developing conceptual understanding and the ability to scaffold instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.

Note: May be taken twice for credit.

Credit/No Credit

EDUC 124B. Tutoring Children in Mathematics: Practicum. 1 Unit**Corequisite(s):** EDUC 124A.**Term Typically Offered:** Fall, Spring

Practicum of tutoring basic mathematics skills and scaffolding instruction of addition, subtraction, multiplication and division of whole numbers, fractions, and decimals. After completing on-campus training, students are placed in nearby school districts. May be taken by all undergraduate students and is strongly recommended for students considering careers in education, criminal justice, psychology, and social work. It may also be used as an elective in the Blended Teacher Education Program.

Note: May be taken twice for credit.

Credit/No Credit

EDUC 125A. Tutoring Children in Reading. 2 Units**Corequisite(s):** EDUC 125B.**Term Typically Offered:** Fall, Spring

Orientation to concept and practice of tutoring basic reading skills including sight word recognition, word analysis skills, oral fluency, and comprehension. After completing on-campus training, students are placed in nearby school districts.

Note: Strongly recommended for students considering careers in education, criminal justice, psychology and social work. May be repeated once for credit. May also be used as an elective in the Blended Teacher Education Program.

Credit/No Credit

EDUC 125B. Tutoring Children in Reading Practicum. 1 Unit**Corequisite(s):** EDUC 125A**Term Typically Offered:** Fall, Spring

Field-based course provides a synthesis and application of course content learned in EDUC 125B. Students are placed in a primary level setting for at-risk students who read approximately two grade levels below their peers. The twice-weekly practicum focuses on comprehension questioning strategies, learning styles and differences, multicultural and ESL strategies, Reader's theater and poetry, and motivating students to achieve greater academic success.

Note: May be taken by all undergraduate students and must be taken concurrently with EDUC 125A.

Credit/No Credit

EDUC 126. Assisting the Elementary Classroom Teacher. 3 Units**Prerequisite(s):** EDUC 125A.**Term Typically Offered:** Fall, Spring

Directly connected to hands-on classroom experiences. Students will be intensively trained in workshops, and will work as teacher assistants in public schools (4 hours per week). Students will learn strategies for working with diverse groups of students at all grade levels; keep weekly tutoring logs; and write a case study on a student and present their findings to the class. Students will reflect on their own growth and development.

Note: May be repeated once for credit.

Credit/No Credit

EDUC 127A. Field Experience in After School STEM Programs. 2 Units**Corequisite(s):** EDUC 127B**Term Typically Offered:** Fall, Spring

Orientation to high quality Science, Technology, Engineering, and Mathematics (STEM) instruction. On-campus training includes skills to develop conceptual understanding and ability to scaffold instruction for elementary and middle school aged students in STEM after school programs. After completing on-campus training, students assist with instruction in nearby school STEM programs.

Note: May be taken twice for credit

Credit/No Credit

EDUC 127B. Field Experience in After School STEM Programs: Practicum. 1 Unit**Corequisite(s):** EDUC 127A**Term Typically Offered:** Fall, Spring

This course is designed to connect students with local public school partners in after school programs that support inquiry based STEM activities with K-8 children. After completing on-campus training, students then complete the practicum.

Note: May be taken twice for credit

Credit/No Credit

EDUC 128. Education and Communication in Korean Society. 3 Units**Term Typically Offered:** Fall, Spring

This course is designed to explore various dimensions of the education and the communication in Korea. It will focus on (a) the Korean educational philosophy, system, and practices of all levels -preschool to higher education; (b) the Korean language in a variety of communicative contexts; and (c) how education and communication shape and interface. The similarities and differences in education and communication between South Korea and the United States will be also investigated.

EDUC 130A. Typical & Atypical Developmental Characteristics and Outcomes for Young Children with Disabilities. 2 Units**Prerequisite(s):** CHDV 30 or approved equivalent.**Corequisite(s):** EDUC 130B.**Term Typically Offered:** Fall, Spring

Examination of disabilities and risk factors and their influence on developmental competencies and outcomes for infants, toddlers, and young children. Content will include typical developmental patterns of young children, atypical development due to prenatal, perinatal and early childhood developmental risk factors including low incidence disabilities, and an introduction to interventions in a range of community settings to address the unique needs of these children and their families. Lecture.

EDUC 130B. Typical & Atypical Development Characteristics and Outcomes for Young Children with Disabilities Lab. 1 Unit**Prerequisite(s):** CHDV 30 or approved equivalent.**Corequisite(s):** EDUC 130A.**Term Typically Offered:** Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture/discussion course content in home based, center based, and community settings serving infants, toddlers, and young children with disabilities and their families.

Credit/No Credit

EDUC 131A. Introduction to Family Centered Service Delivery In Early Childhood Special Education. 2 Units**Prerequisite(s):** EDUC 130A and EDUC 130B or its equivalent.**Corequisite(s):** EDUC 131B.**Term Typically Offered:** Fall, Spring

Designed to enable participants to gain knowledge and develop skills necessary to provide culturally responsive, family-centered approaches to assessment and intervention for infants and young children with disabilities. Focus will be on the historical, theoretical, and philosophical bases for family-centered service delivery, including an emphasis on understanding family systems and family life stages, respect for cultural diversity, the IFSP process, collaborative parent-professional relationships, parent advocacy, and transition planning. Lecture.

EDUC 131B. Introduction to Family Centered Service Delivery in Early Childhood Special Education Laboratory. 1 Unit**Prerequisite(s):** EDUC 130A and EDUC 130B or its equivalent.**Corequisite(s):** EDUC 131A.**Term Typically Offered:** Fall, Spring

Field-based practice lab (30 hours). Lab will be a synthesis and application of lecture course content (EDUC 131A) in home-based, center-based and/or community settings serving infants and young children with disabilities and their families.

Credit/No Credit

EDUC 155. Introduction to Counseling. 3 Units**Term Typically Offered:** Fall, Spring

Introduction to the profession of counseling, including differences between professional counseling and other professions, counseling theories, consultation skills and an introduction to basic counseling skills. Lecture three hours.

Note: Open to unclassified students on a space available basis. Required prerequisite for the Master of Science in Counseling and requirement for the Counseling minor, not included in 200-series 60 unit program for master's degree. Instructor approval required.

EDUC 156. Power, Privilege and Self Identity in Counseling. 3 Units**Term Typically Offered:** Fall, Spring

Focuses on understanding how one's values, attitudes, belief systems impact perception of differences related to race, ethnicity, culture, etc. Experiential activities promote self awareness while developing capacity in becoming a culturally responsive/skilled counselor. Historical processes that created inter and intra group constructs are explored.

Note: Open to unclassified students on a space available basis. Required corequisite for the Master of Science in Counseling and requirement for the Counseling Minor, not included in 200-series 60 unit master's degree. Instructor approval required.

EDUC 157. Child and Family Psychopathology. 3 Units

Prerequisite(s): Students minoring in counseling must take CHDV 30 or CHDV 35 or PSYC 2.

Term Typically Offered: Fall, Spring

Examines the etiology of development and mental health issues in children, youth and caregivers, including genetic and socio-cultural factors. The classification and treatment of abnormal behavior within family contexts will also be explored. Recommended for human services majors such as child development, education, psychology, counseling, social work and criminal justice.

EDUC 160. Urban Education. 3 Units

Prerequisite(s): GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Designed to enhance students' knowledge of urban schooling, especially related to dynamics of race, class, and culture. Along with a Service Learning component in urban schools, provides analysis of the following: historical, socioeconomic, and political factors influencing urban education; the distribution of opportunity in cities and their schools; and effective instructional organizational practices that close the achievement gap, including the development of positive school cultures and the use of community services and resources.

EDUC 165. Sex Role Stereotyping in American Education. 3 Units

Prerequisite(s): GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

This course is designed to introduce students to the educational programs and practices resulting from societal sex role and racial stereotyping. It analyzes the specific effects of sex and race inequalities in the total school setting.

EDUC 168. Foundational Issues for a Multicultural, Pluralistic Society, B. 3 Units

Prerequisite(s): Admission and enrollment in BMED multiple subject credential program; EDBM 117.

Corequisite(s): EDBM 402B.

Term Typically Offered: Fall, Spring

Critical examination of the socio-political relationship between California's public schools and its major population subgroups (as defined by culture, gender, social class, language, race/ethnicity, and ability). Candidates critically reflect on the philosophy and practices of schooling in relation to students' culture, family and community; analyze institutional and instructional practices for educational equity; and develop alternative instructional activities based on the principles of multicultural education and English language learning in a democratic society. Lectures, discussions, small group work, simulations, field tasks.

EDUC 170. Bilingual Education: Introduction to Educating English Learners. 3 Units

Term Typically Offered: Fall, Spring

Introductory study of important themes regarding the education of English Learners. Covers the history of bilingual education; relevant legal mandates and court rulings; first and second language acquisition; linguistic development; theory and practice of effective programs; and beginning methods, materials and strategies responsive to the students' primary language and assessed levels of English proficiency. A fieldwork component involving the tutoring of an English Learner is required.

Note: EDUC 170 is a prerequisite for EDMS 272, EDBM 279.

EDUC 171. Bilingualism in the Classroom. 3 Units

Term Typically Offered: Fall, Spring

Provides an overview of the language factors that impact first and second language acquisitions in the K-12 classrooms and will provide opportunities through which they will build a palette of strategies that can be utilized to enhance language development within the realms of listening, speaking, reading, writing, and thinking. A combination of theory and practice will provide the base as students read, discuss, listen to lectures, view videos, conduct in class and field-based tasks, and synthesize their thoughts in writing.

EDUC 172. Introduction to Hmong Literacy. 3 Units

Prerequisite(s): Fluent in Hmong
Term Typically Offered: Fall, Spring

This course covers fundamental literacy components of the Hmong language. It examines the historical development and maintenance of the Hmong oral and written language and related issues based on lectures, class discussions, group work, writing assignments, and a research paper. It fulfills one of the requirements for teaching credential students pursuing the Bilingual Cross Cultural Authorization (BCLAD).

EDUC 173. Hmong History and Culture. 3 Units

Term Typically Offered: Fall, Spring

This course covers history of the Hmong dated 5,000 years ago to the present. It examines Hmong history and culture as it evolves through living in various Asian countries and in the United States through lectures, class discussions, group work, writing assignments, and a research paper.

EDUC 175. Pedagogy and Academic Language Skills in Spanish for Bilingual Educators. 3 Units

Prerequisite(s): Spanish fluency/literacy required.
Term Typically Offered: Fall only

This course is designed to provide participants background and foundational knowledge in Standard Spanish language use, language varieties in Spanish, issues of power and language in our society, academic language use, and bilingual methods. Participants will examine theoretical and practical issues in bilingual language use in society and in the classroom. Participants will learn and apply bilingual teaching methods, will analyze children's bilingual language use, and also will evaluate Spanish medium texts and trade books.

EDUC 194. Cooperative Education Experience. **3 Units**
Prerequisite(s): Approval of Department Chair.
Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive employment in school districts, state and community agencies, companies, and other appropriate settings. Requires attendance at weekly meetings, preparation of application packet, completion of field study assignment and a written final report.

Note: Units may not be used to meet course work requirements.

Credit/No Credit

EDUC 199. Special Problems. **1 - 3 Units**
Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor with whom the student will be working and Department Chair.

Credit/No Credit

BA in Child Development (Early Development, Care, and Education)

Units required for Major: 50-51
Total units required for BA: 120

Program Description

The Child Development Concentration in EDCE prepares students to work in child care settings with children from infancy through pre-kindergarten. The program consists of the core child development academic program and 14–15 units of electives with a focus of study on developmental theory, systematic observation and assessment, and pre-school curriculum development. Students have opportunities for first-hand experience working with infants and children, and can complete most of the ECE requirements for a child development permit. Students planning to obtain the California Child Development permit for preschool/day care teaching or administration should consult a faculty advisor for information about specific course and field-work requirements and application process.

In collaboration with the College of Continuing Education, a mixed-media hybrid distance education version is currently offered. The coursework consists of 41-51 course units to meet EDCE requirements and 9 units of upper division coursework to meet the CSU general education and writing requirements. For more information visit the College of Continuing Education's Website (<http://www.cce.csus.edu/edce>).

Program Requirements

Code	Title	Units
Required Foundation Courses (12 Units)		
CHDV 30 or CHDV 35	Human Development ¹ Child and Adolescent Development	3

- Department offers students a "select from the following" option:
 - If student chooses to take CHDV 143, EDUC 121, EDUC 165, or ETHN 100, they will meet the Writing Intensive (WI) graduation requirement.
- Required in Major; also satisfies Graduation Requirement.

⁵ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Child Development (Elementary Pre-Credential)

Units required for Major: 49

Total units required for BA: 120

Program Description

The Child Development Concentration in Elementary Pre-credential is an academic child development program with an emphasis on preparing the student to enter an elementary school (multiple-subjects) teaching credential program. It consists of the core academic child development courses, 11 units of credential prerequisite courses, and 3 units of electives, chosen from the approved list. Students who intend to pursue an elementary school (multiple subjects) teaching credential must take the CBEST exam and the CSET subject matter exam as a part of the admission requirements for the credential program. Child Development students planning to pursue the credential should work with a faculty advisor to select general education courses recommended as preparation for the CSET exam.

Program Requirements

BA in Child Development (Individualized)

Units required for Major: 50-51

Total units required for BA: 120

Program Description

Child Development Individualized concentration is an interdisciplinary program made up of the core academic child development courses and 14–15 units of electives, from a wide variety of fields, such as education, art, public policy, nursing, or criminal justice, just to name a few. This major is flexible to allow students to design their program to closely align with personal and career objectives. The program handbook and Web site include a current list of approved electives. However, the students should select their electives in consultation with a major advisor.

BA in Child Development (Integrated Pre-Credential Subject Matter Program)

Units required for Major: 111-114

Program Description

Child Development Integrated Pre-credential Subject Matter Program combines state-approved courses in the subject matter areas with the coursework of the Child Development academic major. This concentration is most appropriate for students who intend to pursue an elementary school (multiple subjects) teaching credential. Students who follow this option obtain an academic major in child development and also take subject matter coursework in six categories: Language and Literature; Mathematics; Natural and Physical Sciences; Social Sciences and Humanities; the Arts; and Physical Education. The coursework is aligned with the subject matter frameworks on which the CSET subject matter examinations are based. It is essential that students considering this concentration seek early and frequent advising within the major because the general university requirements are built into the required coursework.

Note: Students do **not** follow the General Education pattern outlined in the catalog.

Minimum Grade Requirements

A grade of "C-" or higher is required for all coursework in Child Development courses.

¹ CHDV 137/CHDV 137L or CHDV 138/CHDV 138L are not recommended to be taken in the same semester.

² ENGL 20 may be satisfied with an ENGL 1C course, or its equivalent, if transferred from an approved community college.

³ Satisfies the Writing Intensive course requirement for graduation.

Notes:

- Students are strongly recommended to see an advisor early in the program and continuously throughout the program.

BA in Child Development (Social and Community Settings)

Units required for Major: 50-51

Total units required for BA: 120

Program Description

Child Development Concentration in Social and Community settings is appropriate for students interested in working with children and families in community, government, and social or therapeutic settings. Students complete the child development core academic courses, and choose 14–15 units of electives. These electives should be chosen in coordination with a major advisor to select courses and field-work in specific settings, or courses to prepare for application to a program for graduate study.

Program Requirements

BA in Deaf Studies

Units required for Major 41-44
 Total units required for BA: 120

Program Description

Deaf Studies takes an interdisciplinary approach to the study of deaf and hard-of-hearing people in American and world society. The program promotes the understanding of the deaf community as a linguistic and cultural group and encourages students to analyze existing stereotypes and policies relating to deaf and hard-of-hearing people in order to work both within their own communities and others in affecting change for the betterment of the deaf and hard-of-hearing community.

Career Options

Deaf Studies majors and minors can enter careers in both public and private sectors. Students may combine an ASL/Deaf Studies Major with a related Minor field of study such as Education, Counseling, Audiology, or Speech Therapy. Deaf Studies will provide students with a well-rounded grounding in the issues relating to the Deaf and Hard of Hearing in their fields. Students pursuing careers in the areas of health services, legal advocacy, and social services may also experience an edge in gaining employment.

Possible Careers

- Administrative Assistant
- Community Advocate
- Corporate Support Staff
- Community Relations Specialist
- Educational Paraprofessional
- Human Resources Officer
- Legal/Political Professional
- Vocational Training Paraprofessional

With Additional Training, Students Can Pursue the Following Careers

- ASL Instructor
- Counselor: Resident, School, Youth
- Sign Language Interpreter
- Social Worker
- Teacher K-12

BS in Career and Technical Studies

Units required for the Major: 39

Total units required for BS: 120

Program Description

This program is designed to provide training for adults who wish to train/teach in a career technical/business program in public institutions or private business settings. The Bachelor's degree includes the Designated Subjects Teaching Credential in Career Technical Education or Adult Education and the Supervision and Coordination Credential. The program is offered on weekends and uses instructional techniques suited to adult learners.

Eligibility Requirements

The CTS degree program requires that students have five to seven years of career technical/business experience in a designated field prior to graduation. Degree candidates receive up to 30 elective units for prior job experience, teaching/training experience, supervisory experience, and current professional development and education. In addition, candidates complete general education and graduation requirements for Sacramento State and the Career and Technical Studies Major.

Notes:

- Students will receive letter grades, "A" to "F" for all courses except special problems and field experience for which Credit/No Credit grades will be assigned. Students completing the teaching or supervision credentials will apply to the Sacramento County Office of Education.
- In addition to the courses listed, students must receive credit through the Application for Review and Evaluation of Work Experience which will go through an evaluation process for past career technical/teaching experience and must be approved by the reviewer for the degree. Students may receive up to 30 elective units from this evaluation.

Program Requirements

- ³ EDUC 106 and EDUC 107 also fulfill requirements for Supervision and Coordination Credential.
- ⁴ Not all students will be required to take elective courses.

Minor in American Sign Language/Deaf Studies

Units required for Minor: 23

Program Description

American Sign Language and Deaf Studies takes an interdisciplinary approach to the study of deaf and hard-of-hearing people in American and world society. The program promotes the understanding of the deaf community as a linguistic and cultural group and encourages students to analyze existing stereotypes and policies relating to deaf and hard-of-hearing people in order to work both within their own communities and others in affecting change for the betterment of the deaf and hard-of-hearing community.

With an ASL and Deaf Studies Minor, students may obtain entry-level jobs in settings working with the deaf such as residential supervisor, classroom aide, vocational trainer, and much more. Students may also combine an ASL and Deaf Studies Minor with a related major field of study such as education, counseling, audiology and speech therapy for a more well-rounded grounding in the issues relating to the deaf and hard-of-hearing in their field. Students in fields which are not specifically deaf-related such as nursing, law, computer engineering, and many more may also experience an edge in gaining employment, whether in deaf-related settings or not, with a minor in ASL and Deaf Studies compared to those without similar coursework or experience.

Further, students having completed the ASL and Deaf Studies Minor may be able to waive similar coursework at other universities with specialized fields of study relating to deafness that may not be offered in the Sacramento region.

Minor in Bilingual/Multicultural Education

Units required for Minor: 12

Program Description

In addition to University-based courses, the minor can include a field-based course in an educational setting with high numbers of children and adolescents from diverse backgrounds. Students develop a coherent course of study in education and diversity with a Bilingual/Multicultural Education (BMED) Advisor and approval from the BMED Chair. This minor is especially recommended for students seeking the bilingual authorization for their teacher credential offered through the BMED Multicultural/Multilingual Teacher Preparation Center.

Program Requirements

The Education Minor offered by the Bilingual/Multicultural Education Department (BMED) consists of 12 units or more of upper division education courses that focus on diversity and education. Courses in the minor offer students the opportunity to explore the issues of race, culture, language, class, gender, and ability/disability, and their relationship to education.

Minor in Child Development

Units required for Minor: 20

Program Description

Child Development is the study of the physical, socio-emotional, and cognitive growth and development of the child from conception through adolescence. The purpose of the minor is to provide an academic background that prepares students to work with children and families in a variety of settings.

Minimum Grade Requirement

A grade of "C-" or higher is required for all coursework in the Child Development minor.

Minor in Counseling

Units required for Minor: 19

Program Description

The Counseling minor consists of 10 upper division units of Child Development and 9 upper division units of Counseling (EDC). Students will critically examine the theory and research on social and emotional development, and specifically explore the role of the family context in developmental processes, with specific attention to dynamic family processes within the larger society. Students will explore the career of counseling, and the cultural, social, and emotional factors that contribute to unhealthy psychological adjustment and abnormal behavior within developmental and social contexts.

Minimum Grade Requirement

A grade of "C-" or higher is required for all coursework in the Counseling minor.

Program Requirements

Code	Title	Units
CHDV 133	Quantitative Methods in Human Development	3
CHDV 135	Crosscultural Child Development	3
CHDV 138 & 138L	Social and Emotional Development Social and Emotional Development Laboratory	4
EDUC 155	Introduction to Counseling	3

EDUC 157	Child and Family Psychopathology	3
Total Units		19

Note: Students majoring in Childhood Development **and** in the Counseling minor may overlap a maximum of 10 units (including electives) between the minor and major. Consult with a Child Development advisor for more information.

Minor in Teacher Education (Teaching, Equity, and Engagement)

Units required for Minor: 15

Program Description

This minor is advantageous for those planning graduate study in these fields and those pursuing a teaching credential or a career using teaching and engagement strategies. The skills gained in the Minor in Education coursework allows students to master facilitation and presentations talents used in various careers and workplace settings. This Minor may be particularly useful to students with undergraduate majors in Human Resources, Communication Studies, Criminal Justice, Counseling, Family and Consumer Sciences, Nursing, Recreation Administration, Social Welfare, Speech Pathology and Audiology, and Vocational Education.

College of Engineering and Computer Science

Support Programs

Internship and Career Services

Career planning services are available through the College of Engineering and Computer Science including professional development workshops, job listings, information sessions, job fairs, and guest speakers from the industry and government. The College of Engineering and Computer Science, with programs accredited by ABET (CAC and EAC) and ACCE, employs a director to assist students in choice of major, career planning, and obtaining career-related experience during their education, and in finding professional-level employment at graduation. Students in engineering, computer science, and construction management are encouraged to take advantage of career and internship services early in their educational process and to obtain experience available in a wide range of business, industry, and government organizations in the greater Sacramento area. Through these opportunities, students gain valuable experience and information about how engineering, computer science and construction management principles are applied in the real world.

Information is available on a wealth of career related topics including demand for engineering, computer science, and construction management majors, salary ranges, corporate contacts, and industry trends. Current job listings can be found on the ECS Career Services website (<http://career.ecs.csus.edu>).

Computing, Communications, and Academic Technology Services

The College of Engineering and Computer Science's Computing, Communications, and Academic Technology Services unit (abbreviated ECS Computing Services) is the integrated Information and Academic Technology (IT/AT) unit for the College. ECS Computing Services is a part of the Dean's Office and serves all faculty, staff and students of the College. It is the College unit charged with implementing and supporting the ECS Information Technology Plan and provides comprehensive IT/AT support to the College.

This support includes hardware, software, networking, and consulting for both academic and research computing and communications. ECS Computing Services manages all of the College's computing facilities, including servers for academic computing, DB, LMS, cloud storage, and web hosting, as well as 42 Windows 7/10 or Linux workstation-equipped laboratories containing 600+ workstations and the College's local area network. Computer accounts are maintained for approximately 3,000 faculty, staff, students and projects.

The ECS Computing Services unit was founded in 1986 when the College procured its first two minicomputers, a pair of DEC VAX 11/785s. The organization has evolved significantly over the years and today is focused on supporting a highly distributed and virtualized computing and communications environment.

The 42 computer equipped laboratories are located in three buildings occupied by the College - Riverside Hall, Santa Clara Hall, and the first floor of the Academic Information Resource Center (AIRC). Examples of specific labs include: Open Labs, Structures Lab, Mechanical Processes Lab, Service Courses Lab, Operating Systems Lab, Special Projects Labs, Computer Architecture Lab, Network and Communications Lab, Programming Labs, Security and Forensics Lab, Circuit Design Lab, Senior Project Design Labs, Mixed Signal Design Lab, Mechanical Design Lab, Construction Management Lab, Robotics Lab, Environmental Engineering Lab, Digital Signal Processing Lab, Virtual Instrumentation Lab, Biomedical Lab, Graduate Projects Design Labs, Biomechanics Lab, Power Lab, Computer Integrated Manufacturing Lab, Mechatronics Lab, 3D Modeling Lab, Automotive Engineering, and an Energy Systems Lab. General building hours for all labs are 7 a.m. to 9 p.m. Monday through Thursday, 7 a.m. to 5 p.m. on Friday, and 11 a.m. to 2 p.m. on Saturday. ECS students are each given a digital access key that allows them to have 24/7 building and lab access. One of these open labs also houses the ECS Computing Services Help Desk, which is staffed with student consultants and provide faculty, staff, and student support seven days a week during the academic semester.

Standard software packages such as Word, Excel, and PowerPoint are provided and distributed by ECS Computing Services. In addition, department-specific software packages such as MentorGraphics, AutoCAD, ProEngineer, Patran, Synopsys, Labview, and SolidWorks are maintained and supported. Linux and Windows 7/10 are the dominant desktop operating systems in use.

The College has an in-house data center for servers and network infrastructure. There are approximately 30 physical servers in the College Data Center, running Linux or MS Windows Server. Approximately ten of those servers host another 70 customized Virtual Servers in a highly redundant Virtual Center. College servers are available 24/7 from on-campus and off-campus via VPN access, which includes Terminal Services Servers that contain all the applications software installed in

college computer labs. The College also maintains numerous multimedia classroom facilities and an internet-based teleconference facility.

Additional information, documentation check-out, forms, centralized printer/plotter output, lab support, and user consulting are available at the Help Desk in the main ECS Computing Services Lab in 2011 Riverside Hall, (916) 278-6690. Further information may also be obtained from the ECS Web page (<http://www.ecs.csus.edu>).

Lynne Koropp, Interim Director
ECS Computing Services
Riverside Hall 2011
(916) 278-3547

Center for Information Assurance and Security

The mission of the Center for Information Assurance and Security is to advance knowledge of information assurance and security practices through:

- Education, training, and awareness programs in information assurance and security issues and practices.
- Applied research in information assurance and security.
- Developing interdisciplinary programs in information assurance and security.
- Outreach programs to assist our community, including community colleges, K-12 schools, industry, and government in information assurance and security issues.
- Forming collaboration with other education, research, industry, and government institutions as partners.

Jun Dai, Director
Center for Information Assurance and Security
Riverside Hall 2009
(916) 278-6774

Cooperative Education Program

The College endorses cooperative education (co-op) as a means to enrich a student's education. Cooperative education relates theory to practice, provides "learning by doing" and connects students with industry. The co-op program provides periods of university study with paid work experience in the student's major field of study. Students are encouraged to participate in the co-op plan by completing at least one four- to six-month work period before obtaining their degree. Credit is granted for successful completion of the co-op requirements. Students interested in the Cooperative Education Program should apply in 1204 Santa Clara Hall.

ECS Internship and Career Services
Santa Clara Hall 1204
(916) 278-6756
career@ecs.csus.edu

MESA Engineering Program (MEP)

Santa Clara Hall, Room 1206
(916) 278-6699

Participation in the MESA Engineering (MEP) increases the probability that students will be successful in their engineering coursework. Focusing on the recruitment, retention, and graduation of highly motivated students from educationally and financially disadvantaged

backgrounds, MEP emphasizes participation by students from communities with low rates of enrollment in engineering majors.

MEP provides an on-campus home for its members with a large 24 hours-a-day study center that encourages study groups. MEP provides professional development, a freshman orientation course, and counseling. The program assists in the coordination of tutoring, counseling, and professional development services for all students in the College of Engineering and Computer Science.

Office of Water Programs

The Office of Water Programs (OWP) is a self-supported program. OWP provides training, technical assistance, and applied research management services for a variety of water resource and water quality disciplines: drinking water, wastewater, stormwater, watershed planning and soils and groundwater. The mission of OWP is to provide cost-effective solutions for protecting and enhancing water resources, public health, and the environment.

Since 1972, OWP has provided high-quality training programs for operators of water treatment plants, water distribution systems, wastewater collection systems, and municipal/industrial wastewater treatment and reclamation facilities, as well as for pretreatment facility inspectors, environmental compliance inspectors, and utility managers. As an internationally recognized training leader, OWP publishes a continually evolving library of print, electronic, and online training materials to meet the changing needs of water industry operators, managers and administrators seeking professional development. For the last 20 years, OWP has also provided training, technical assistance and applied research services for stormwater, watershed planning, soils, and groundwater disciplines. OWP collaborates with a number of civil and environmental engineering organizations and California state agencies on various projects related to statewide stormwater management practices. OWP's stormwater experience spans the areas of program management, regulatory compliance, siting and design of treatment devices (including stormwater low impact development [LID]), monitoring planning and oversight, data analysis, modeling, geographic information system (GIS) programming and software tool development.

OWP also serves as the U.S. Environmental Protection Agency (USEPA) Region 9 Environmental Finance Center (EFC), which supports the region's rural, disadvantaged, and tribal communities in financial planning and asset management to better enable funding environmental and public health services in the short term and to better adapt to regulatory, technological and resource changes in the future.

Ramzi J. Mahmood, Director
Modoc Hall 1001
(916) 278-6142
Office of Water Programs Website (<http://www.owp.csus.edu>)

Preparation High School

Students entering as freshmen build primarily upon the foundations established in high school: mathematics, physical sciences, computer programming and oral and written communication. High school study for all majors should include:

- Algebra: 2 years
- Plane Geometry: 1 year
- Trigonometry: 1/2 year

- Chemistry: 1 year
- Physics: 1 year
- Mechanical Drawing: 1 year (only for civil and mechanical engineering majors)

Computer literacy and programming, analytic geometry and calculus are desirable.

Transfer

Students transferring from community colleges with at least 65 transferable units including physics, calculus and differential equations, chemistry, computer programming and lower division engineering courses as listed in this catalog for each program, may complete their engineering, computer science or construction management bachelor of science degree programs within four semesters of additional full-time study. Articulation agreements with most of the community colleges in Northern California state exact course equivalencies. Community college counseling staff are prepared to answer questions regarding articulation. Students planning to transfer from community colleges or four-year institutions with upper division standing are advised to parallel closely the appropriate California State University, Sacramento engineering, construction management or computer science program in the lower division. Completion of General Education (GE) requirements before transfer is NOT recommended or desirable, but rather, emphasis should be placed on taking prescribed basic science and engineering courses. Students should be aware that some of the major requirements also satisfy GE requirements.

Professional Development

Engineering, computer science and construction management students are encouraged to become acquainted with the functions and the branches within their fields to evaluate their own interests and abilities more carefully. For this purpose, student chapters of national organizations have been established in the college. It is to the student's advantage to become affiliated with the technical society in their interest area soon after enrolling in the university. Students with high scholastic achievement may be invited to join Tau Beta Pi, the national engineering honor society or Upsilon Pi Epsilon, the national computer science honor society.

Whenever possible, students should consider summer and part-time employment in a professional organization or an industry related to their major interest. Students are encouraged to take advantage of internship and career services. (See above.) This employment will provide the undergraduate student with practical experience in real world problems. The College's Internship and Career Services Office, working with the faculty and local industry, assists students in securing employment.

Bachelor of Science

Bachelor of Science degree programs are offered in Civil Engineering, Computer Engineering, Computer Science, Construction Management, Electrical and Electronic Engineering, and Mechanical Engineering. The undergraduate engineering programs are accredited by: Engineering Accreditation Commission of ABET (EAC/ABET)
111 Market Place, Suite 1050
Baltimore, MD 21202-4012
Telephone: (410) 347-7700

The undergraduate computer science program is accredited by: Computing Accreditation Commission of ABET (CAC/ABET)
111 Market Place, Suite 1050

Baltimore, MD 21202-4012
Telephone: (410) 347-7700

The Construction Management program is accredited by: American Council for Construction Education (ACCE)
1300 Hudson Lane, Suite 3
Monroe, LA 71201-6054
Telephone: (318) 323-2413

Students in the College of Engineering and Computer Science are required to meet the general education requirements of the University.

Engineering students must satisfy the 16-unit humanities and social science requirement of EAC/ABET. Construction Management students must satisfy the 18-unit humanities and social science requirements of ACCE. Students should consult with their advisers to determine which courses meet accreditation requirements for social sciences and humanities. By choosing carefully, the student can satisfy the University's General Education requirements with these courses.

While the objective of a broad liberal education is served through independent humanities and social science courses, it is recommended that some courses in these subject areas be at an advanced level rather than a selection of unrelated beginning courses. Courses treating such subjects as accounting, industrial management, finance, personnel administration, art and music skills, introductory language, and ROTC studies do not fulfill the accreditation humanities-social science requirement.

Enrollment in upper division courses offered by the college is normally restricted to students who have satisfactorily completed all lower division requirements and who have been admitted to one of the majors in the college. Within each program, different patterns of study are possible through a judicious choice of electives.

Minor In Engineering

Non-majors in engineering may elect to minor in this field. Minor requirements may be satisfied by completing 21 approved units, of which 12 must be upper division. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses.

Students wishing to minor in engineering must have their minor program approved by the Associate Dean of the College of Engineering and Computer Science. The program should normally include:

Code	Title	Units
ENGR 17	Introductory Circuit Analysis	3
ENGR 30	Analytic Mechanics: Statics	3
ENGR 45	Engineering Materials	3
ENGR 110	Analytic Mechanics - Dynamics	3
ENGR 112	Mechanics Of Materials	3
ENGR 124	Thermodynamics	3
ENGR 132	Fluid Mechanics	3

Master of Science

While graduates of baccalaureate programs enjoy successful careers in many aspects of engineering and computer science, graduate study is becoming more desirable for qualified students who expect to practice

in research and development, teaching, management and many areas of design.

The MS degree programs offered in the College of Engineering and Computer Science include Civil Engineering, Computer Engineering, Computer Science, Electrical and Electronic Engineering, Mechanical Engineering, and Software Engineering.

In addition, special interdisciplinary studies are possible in selected areas chosen by the student in consultation with the faculty of the College.

The Master of Science programs require a minimum of 30 units of approved graduate study. The option availability of Plan A, B, or C is indicated with each specialization. Refer to the appropriate sections for detailed information concerning admission and degree requirements.

General information on admission requirements and general graduate study regulations are listed in the section, "Graduate Degree Curricula," of this catalog.

Note: Each graduate course is administered by one of the academic departments in the College. Information on these courses may be obtained in any of the academic department sections of the Catalog.

Departments/Programs

Programs of instruction leading to the following degrees offered by the college are listed in the catalog in separate sections.

- Civil Engineering, BS, MS
- Computer Science, BS, MS
- Computer Engineering, BS, MS
- Construction Management, BS
- Electrical & Electronic Engineering, BS, MS
- Mechanical Engineering, BS, MS

Civil Engineering

College of Engineering and Computer Science

Program Description

Civil Engineering involves the application of scientific principles and knowledge of mathematics and computers to the planning, analysis, design, and construction of all types of private and public works. Reduction of air and water pollution, disposal of hazardous wastes, renewal of our old cities, planning and building of new communities, providing water, power, and high-speed ground transportation systems are the responsibilities of the civil engineer. It is a continual challenge to the civil engineer to provide these services efficiently by the construction

of dams, buildings, bridges, tunnels, highways, airports, waterways, and waste handling facilities in harmony with the natural environment.

Because of the broad range of demands on the civil engineer's services, the undergraduate program is devoted to fundamental principles in mathematics; basic and engineering sciences; the spectrum of Civil Engineering practice in both analysis and design; and required courses in the humanities and the social sciences, so that engineers may better relate to the world and society they serve. The upper division program permits students to select 9 units (3 courses) of electives. Students may increase the breadth or depth of their knowledge in Civil Engineering by selecting these electives in several areas: environmental and water quality engineering, geotechnical engineering, structural engineering, transportation, and water resources engineering.

Degree Programs

BS in Civil Engineering (p. 527)

Certificate in Wastewater Treatment (p. 530)

Cooperative Education Program (Work Experience) (p. 531)

MS in Civil Engineering (p. 531)

Certificate in Engineering Hydraulics (p. 529)

Certificate in Foundation Engineering (p. 529)

Certificate in Geo-Environmental (p. 529)

Certificate in Ground Modification (p. 529)

Certificate in Structural Engineering (p. 530)

Certificate in Transportation Planning (p. 530)

Certificate in Transportation/Traffic Engineering (p. 530)

Certificate in Treatment Systems (p. 530)

Certificate in Water Quality (p. 531)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Civil Engineering is also individually accredited by ABET, Inc.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The BSCE degree is accredited by the Engineering Accreditation Commission of the Accreditation Board for Engineering and Technology, Inc. (EAC/ABET).
- A notable strength of the program is that most faculty are licensed professional engineers in California and have practical experience in industry. Thus, faculty bring an ability to relate theory to practice, and the program prepares the student for the profession as well as for advanced study.
- Emphasis is placed on design which is the definition and solution of engineering problems in a practical manner. Lower division and first semester junior year coursework provides the preparation for design in courses such as mathematics, physics, descriptive geometry, CAD, surveying, computer applications, and engineering economics. Design courses are available to students in their last three semesters including a senior design project course in the final semester.
- Class sizes are small providing for close interaction between students and faculty. This interaction is enhanced in laboratory courses which are an integral part of the curriculum.
- Computers are used in many courses and students have free access to computer laboratories.
- Communication skills and social and ethical responsibilities of professional practice are emphasized.
- Students are encouraged to participate in the Student Chapter of American Society of Civil Engineers and other student organizations, to develop organizational skills, and to interact with practicing civil engineers.
- Sacramento, the State Capital and the seat of county government, provides proximity to city, county, state and federal agencies, and many consulting firms with Civil Engineering departments. Thus, students have a unique environment to draw upon for semester projects, part-time or summer employment, and career opportunities.

Program Educational Objectives

The objectives of the civil engineering are to prepare graduates to:

- ethically apply their hands-on, practice-oriented civil engineering education to succeed professionally;
- engage in lifelong learning through graduate education, professional development, and/or active involvement in professional organizations; and
- communicate effectively on multi-disciplinary teams to address diverse challenges, creating solutions that serve the general public.

Academic Policies and Procedures

The following is a summary of policies and procedures specific to the Department of Civil Engineering. Other University policies and procedures in this catalog also apply to Civil Engineering majors. The Department will not hear petitions for deviation from articulated policies made by students who disregard catalog policy.

- **Course Repeat Policy:** Undergraduate engineering and Civil Engineering courses that are used to meet the Bachelor of Science in Civil Engineering degree requirements may be repeated only twice (for a total of three attempts). Grades of the second and third attempt will be averaged in grade point calculations.
- **Reinstatement Policy:** Students seeking reinstatement to the Civil Engineering major must complete a Reinstatement Petition (obtained at Admissions and Records). That petition will be reviewed by the Department Chair for approval or rejection.

Note: The only basis for reinstatement is the expectation (supported by evidence provided by the student) that the student is now likely to progress towards the satisfactory completion of the Department's degree requirements in a timely manner.

- **Minimum Grade Requirements:** The purpose of this requirement is to assure that all Civil Engineering majors attain the minimum level of competency in all their coursework required for a Bachelor of Science Civil Engineering Degree.
All required courses in the major, all electives in the major, ENGL 5, and ENGL 20 must be completed with a grade of "C-" or better. A minimum grade point average of 2.0 ("C") is required in the major courses applied to the degree.
- **Incomplete Grades:** Incomplete grades are issued only in accordance with University policy. The student must be passing the course at the time an "Incomplete" is requested. An Incomplete Petition (obtained in the Department Office) must be submitted to the Department with the student's and the course instructor's signature. The Incomplete Petition must specify the work to be completed, the basis by which the student's final grade will be determined, and the last date for completion of the incomplete work. An incomplete grade that is not cleared by the set date will lapse to an F grade.

Career Possibilities

Bridge Engineer · Civil Engineer · Construction Engineer · Design Engineer · Environmental Engineer · Foundation Engineer · Geotechnical Engineer · Highway Engineer · Hydraulic Engineer · Hydrologic Engineer · Project Engineer · Public Works Engineer · Research Engineer · Sanitary Engineer · Soils Engineer · Structural Engineer · Traffic Engineer · Transportation Engineer · Urban Planner · Water Resources Engineer

CE 1A. Civil Engineering Seminar.**1 Unit****General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

Introduces students to civil engineering as a profession. Topics include the technical disciplines (environmental, geotechnical, structural, transportation, and water resources), the role of civil engineers in planning, constructing and operating infrastructure, and professional responsibilities such as licensure and ethics. Case studies are used to explore both technical and nontechnical aspects of civil engineering projects such as design and environmental constraints, constructability, and social and political issues.

CE 4. Engineering Graphics and CAD.**2 Units****General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

In-depth graphic analysis and solution of typical three dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Lecture one hour; laboratory three hours.

CE 9. Plane and Topographic Surveying.**3 Units****Prerequisite(s):** MATH 30; MATH 30 may be taken concurrently. Not currently enrolled in CE 9.**Term Typically Offered:** Fall, Spring

Instruments, methods and theories necessary for the measurement of distance, direction, angles and elevations. Application of data to traverse computations, estimation of earthwork volumes, transportation facility design and construction layout. Introduction to legal aspects of surveying, geodetic surveys, maps, boundary surveys and new technologies used in surveying. Lecture two hours; laboratory three hours.

CE 100. Engineering Geology.**2 Units****Prerequisite(s):** ENGR 112; may be taken concurrently.**Term Typically Offered:** Fall, Spring

Soil and rock mechanics and their relations to geological features influencing design, construction and maintenance of engineering projects. Lectures and field problems.

CE 101. Computer Applications in Civil Engineering.**3 Units****Prerequisite(s):** ENGR 30 and CE 4; CE 4 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Development of programming- and algorithm-based problem-solving skills in civil engineering using modern programming and scripting languages and scientific computing programs. Application to numerical methods, data science, and visualization.

CE 113. Structural Laboratory.**1 Unit****Prerequisite(s):** CE 101 and ENGR 112; WPJ score of 70+, or at least a "C-" in ENGL 109M or ENGL 109W.**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Introduction to the principles of structural analysis and design by testing of structural elements. Experimental verification of the assumptions of strength of materials. Introduction to laboratory techniques. Laboratory three hours.

CE 135. Hydraulics Laboratory.**4 Units****Prerequisite(s):** CE 101, CE 137, and GWAR; CE 137 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Laboratory experiments relating the principles of fluid mechanics to real fluid flow. Laboratory three hours.

CE 137. Water Resources Engineering.**3 Units****Prerequisite(s):** CE 1A, CE 101, ENGR 115, and ENGR 132.**Term Typically Offered:** Fall, Spring

Hydrologic and hydraulic fundamentals which are common to water resources projects; introduction to reservoirs, dams, pipelines, channels, hydraulic machinery, ground water, water rights, statistical analysis, engineering economy applications, and water resources planning.

CE 138. Hydrology.**3 Units****Prerequisite(s):** CE 137.**Term Typically Offered:** Fall only

Introduction to hydrologic engineering design. Precipitation analysis, hydrograph and flood routing applications for civil engineering. Groundwater hydrology including quality problems in development of subsurface water resources. Statistical applications in hydrology.

CE 139. Open Channel Hydraulics.**3 Units****Prerequisite(s):** CE 137.**Term Typically Offered:** Spring only

Civil engineering design problems in open channel flow. Model design, pressure problems, design application of hydraulic analysis in structures, transitions, culverts, weirs and spillways. Channel design including roughness for subcritical and supercritical flow. Analyzes and design problems in steady, uniform, gradually and rapidly varied flow.

CE 146. Civil Engineering Professional Practice.**3 Units****Prerequisite(s):** CE 1A and ENGR 30; GWAR; CE 1A may be taken concurrently.**Corequisite(s):** CE 1A.**Term Typically Offered:** Fall, Spring

Introduction to the legal and business environment of professional engineering practice, including legal responsibilities of professionals, ethics, risk and liability, types and use of contracts, specifications, the construction bid process, and environmental responsibilities. Elements of engineering organizations such as business economics, human resources, and project management.

- CE 147. Transportation Engineering.** **4 Units**
Prerequisite(s): Complete CE 1A, CE 9, CE 101, ENGR 115, GWAR certification before Fall 2009; or WPJ score of 80 or above; or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.
Term Typically Offered: Fall, Spring
- Introduction to the fundamental topics in Transportation Engineering. Focus on roadway geometric design, layout considerations, pavement materials and design, traffic operations and analysis. Lecture three hours; laboratory three hours.
- CE 148. Transportation Systems.** **3 Units**
Prerequisite(s): CE 147
Term Typically Offered: Spring only
- Transportation systems evaluation and management. Focus on transportation planning methods, including data analysis, estimation of future demand, evaluation of travel demand impacts on existing systems, and transportation system decision-making.
- CE 149. Traffic Analysis and Design.** **3 Units**
Prerequisite(s): CE 147
Term Typically Offered: Spring only
- Introduction to the fundamental principles of traffic operations, traffic data collection methods, intersection control, signal design and analysis techniques. Methods and software for designing and optimizing signalized and unsignalized intersection operation. This course may be paired with CE 265.
- CE 151. Introduction to GIS in Civil Engineering.** **3 Units**
Prerequisite(s): ENGR 115, CE 9, and either CE 137, CE 147, CE 170A, or CE 171A.
Term Typically Offered: Fall only
- Fundamental geographic information system (GIS) concepts; GIS data acquisition and analysis; GIS analytical methods. Lab exercises with GIS software used to introduce students to typical uses of GIS in civil engineering. This course may be paired with the graduate-level course GIS Applications in Civil Engineering. Lecture two hours; lab three hours.
- CE 161. Introduction to Structural Analysis.** **3 Units**
Prerequisite(s): CE 1A, CE 101, ENGR 112, and MATH 35 or MATH 100.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Analysis of statically determinate and indeterminate beams, frames, and trusses. Includes energy principles, flexibility and stiffness analyses, and influence lines. Computers are used to aid in the solution of complex structural problems.
- CE 163. Structural Design in Steel I.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall only
- Theory and practice in design of structural steel members and connections using current design specifications. Design of tension and compression members, laterally supported and unsupported beams, beam-columns, and bolted and welded connections. Use of microcomputers in design.
- CE 164. Reinforced Concrete Design.** **3 Units**
Prerequisite(s): CE 113, CE 161; CE 113 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Theory and practice in design of reinforced concrete beams, slabs, columns, footings and retaining walls. Includes study of design, preparation and testing of cements, aggregates and concrete mixtures.
- CE 166. Seismic Behavior of Structures.** **3 Units**
Prerequisite(s): CE 101, CE 161, ENGR 110.
Term Typically Offered: Spring only
- Analyzes simple structures' response to dynamic loads with emphasis on response to earthquake ground motion. Introduction to multi-story buildings dynamics. Modal and approximate analyses of earthquake response. Dynamic analysis and building code procedures.
- CE 168. Pre-stressed Concrete Design.** **3 Units**
Prerequisite(s): CE 161, CE 164; CE 164 may be taken concurrently.
Term Typically Offered: Fall only – even years
- Analyzes and design of pre-stressed concrete structures using ultimate strength and working stress methods. Detailed study of stress-strain behavior of P.C. members. Study of bond and shear. An introduction to least-weight design.
- CE 169A. Timber Design.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall only
- Wood as a structural material. Design of sawn and glulam beams, concentrically and eccentrically loaded columns, shear walls, flexible diaphragms and connections for vertical and lateral loading including effects of wind and seismic forces.
- CE 169B. Reinforced Masonry Design.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall, Spring
- Reinforced masonry as a structural material. Design of reinforced masonry beams, concentrically and eccentrically loaded columns, walls for vertical and lateral loading including effects of wind and seismic forces. Design of a small building for wind and seismic loading including torsional effects.
- CE 170. Principles of Environmental Engineering.** **4 Units**
Prerequisite(s): CHEM 1E or CHEM 1A, CE 1A, CE 101, CE 146, ENGR 115; CE 146 may be taken concurrently
Term Typically Offered: Fall, Spring
- Introduction to the principles and practices of environmental quality management. Physical and chemical principles affecting environmental quality. Water and air quality parameters, their importance, and natural processes that affect them. Introduction to treatment processes and waste management. Environmental ethics. Lecture three hours. Laboratory three hours.
- CE 170A. Principles of Environmental Engineering.** **3 Units**
Prerequisite(s): CHEM 1E or CHEM 1A, ENGR 115, CE 1A, and CE 101.
CE 101 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to principles of environmental quality management. Environmental ethics. Physical and chemical principles affecting environmental quality. Water quality parameters, their importance, and natural processes that affect them. Environmental health and risk assessment.

CE 170B. Environmental Engineering Practice.**2 Units****Prerequisite(s):** CE 170A**Term Typically Offered:** Fall, Spring

Introduction to environmental engineering professional practices. Water and wastewater treatment processes. Solid waste management. Air quality parameters and management. Sustainability.

CE 171A. Soil Mechanics.**4 Units**

Prerequisite(s): Complete CE 1A, CE 100, CE 101, ENGR 112; GEAR certification before Fall 2009 or WPJ score of 80 or above or 3-unit placement in ENGL 109M/W or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.

Term Typically Offered: Fall, Spring

Composition and properties of soils; soil classification; soil compaction; soil-water interaction, including permeability and seepage analyses; soil stresses; soil compressibility, consolidation, and settlement analysis; soil shear strength. Lecture three hours; laboratory three hours.

CE 171B. Soil Mechanics and Foundation Engineering.**3 Units****Prerequisite(s):** CE 171A.**Term Typically Offered:** Spring only

Lateral earth pressures and principles of retaining wall design; slope stability analysis and principles of slope stabilization design; ultimate bearing capacity of soils, allowable bearing pressures and settlement of structures; principles of foundation design including shallow foundations and deep foundations.

CE 172. Design of Urban Water and Sewer Systems.**3 Units****Prerequisite(s):** CE 137.**Term Typically Offered:** Fall only

Hydraulic design of water distribution and sewerage systems. Computer-assisted pipe network analysis. Analysis of pump systems. Pump station design. Other selected topics.

CE 173. Design of Water Quality Control Processes.**3 Units****Prerequisite(s):** CE 170B, ENGR 132.**Term Typically Offered:** Spring only

Analysis and design of selected physical, chemical, and biological facilities for water purification and wastewater treatment. Emphasis is on design based on loading factors and integration of unit processes into treatment systems.

CE 181. Geoenvironmental Engineering.**3 Units**

Prerequisite(s): CE 170B and CE 171A; CE 170B may be taken concurrently

Term Typically Offered: Not offered

Equilibrium distribution of contaminants among air, water and solid phases of soil systems; analysis and modeling of soil vapor extraction (SVE), pump and treat, and soil washing systems; movement of gasses in landfills; infiltration through landfill cover; geosynthetic liner systems; hazardous waste containment systems.

CE 184. Geotechnical Earthquake Engineering.**3 Units****Prerequisite(s):** CE 171A.**Term Typically Offered:** Fall only

Introduction to seismology and seismic hazard analysis; determination of building code design loads; prediction of soil-site effects; evaluation of liquefaction triggering, cyclic softening and associated consequences; introduction to mitigation techniques for liquefaction and ground failure hazards.

CE 190A. Civil Engineering Project Skills.**3 Units**

Prerequisite(s): CE 137 or CE 147 or CE 161 or CE 170A or CE 171A. This course is intended to be taken in the final year of study before taking CE 190B.

General Education Area/Graduation Requirement: GE AREA D**Term Typically Offered:** Fall, Spring

Introduction to professional engineering practice through case studies of existing projects, including estimating, scheduling, and specifications. Evaluation of design alternatives for engineering projects using principles of engineering economy and cost benefit analysis. Engineering ethics and professional responsibilities.

Credit/No Credit

CE 190B. Senior Project.**3 Units****Prerequisite(s):** CE 190A**Term Typically Offered:** Fall, Spring

Culminating degree requirement. Completion of a conceptual design and evaluation of alternatives under realistic constraints for proposed infrastructure projects. Students work in teams with practicing professionals providing mentoring. Draws upon full educational experience to date. Lecture two hours. Laboratory three hours.
Note: This course must be taken in the final semester.

CE 194. Career Development in Civil Engineering.**1 Unit****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Designed for Civil Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.

Note: Units earned cannot be used to satisfy major requirements. Cross Listed: ENGR 194, EEE194

Credit/No Credit

CE 195. Fieldwork in Civil Engineering.**1 - 3 Units**

Prerequisite(s): Petition approval by supervising faculty member and Department chair.

Term Typically Offered: Fall, Spring

Supervised work experience in civil engineering with public agencies or firms in the industry.

Note: May be repeated for credit.

Credit/No Credit

- CE 195A. Professional Practice.** 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science.
Note: Requires satisfactory completion of the work assignment and a written report.
- Credit/No Credit
- CE 196H. Concrete Technology.** 3 Units
Prerequisite(s): CE 113
Term Typically Offered: Fall, Spring
- History of portland cement, production, hydration, aggregates, supplementary cementitious materials, chemical admixtures, fresh and hardened concrete properties, concrete mixture design, and concrete construction. Introduction to concrete durability, concrete repair, and advances in concrete technology. The laboratory period will be used for demonstrations, experiments, and field trips.
 Field trip(s) may be required.
- CE 196M. Groundwater Engineering.** 3 Units
Prerequisite(s): CE 137
- Principles of groundwater, and occurrence and movement of groundwater. Groundwater flow, Darcy's Law, solutions of steady and unsteady flow problems. Confined and unconfined aquifers, leaky aquifers, pumping test design, and groundwater management.
- CE 199. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open to students judged capable of carrying out individual work. Admission requires departmental approval and sponsorship of a supervising faculty member. Cannot be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May be repeated.
- CE 199E. Independent Study Technical Elective.** 3 Units
Prerequisite(s): GPA of 2.5 or greater in the upper division courses of the major; grade of "B" or better in the required major course associated with the proposed area of study (CE 137 or CE 146 or CE 147 or CE 161 or CE 170 or CE 171A).
Term Typically Offered: Fall, Spring
- Individual project, research, or directed reading on an advanced topic.
Note: Open to only those students prepared and capable of carrying out independent work. Admission requires departmental approval and sponsorship of a supervising faculty member. Can be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May not be repeated for credit.
- CE 231A. Computer Methods of Structural Analysis I.** 3 Units
Prerequisite(s): CE 161.
Term Typically Offered: Fall only – even years
- Flexibility and stiffness methods of structural analysis are applied to two- and three-dimensional framed structures. Use of computer software to perform analysis is discussed in detail. Techniques of computer modeling are discussed.
- CE 231B. Computer Methods of Structural Analysis II.** 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
- Continuation of CE 231A with extension of theory to allow for the analysis of a wider variety of structures. Structural analysis software is used for the analysis of three-dimensional structures. Fundamentals of the finite element method and computer modeling with applications to structural problems.
- CE 232. Nonlinear Structural Analysis.** 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
- Theory and applications of nonlinear structural analysis including geometric and material nonlinear effects. Stability issues and second-order analysis methods in the context of moment amplification effects, member buckling, and the behavior of structural elements and frames undergoing large deformations. Inelastic material behavior and stress resultant plasticity concepts within a line-type element framework. Computer implementation of geometric nonlinear behavior.
- CE 234. Dynamics and Earthquake Response of Structures.** 3 Units
Prerequisite(s): Knowledge of the stiffness method of structural analysis.
Term Typically Offered: Fall only – odd years
- Response of structures modeled as single-degree systems to harmonic, periodic, and arbitrary excitation and earthquake ground motion; effects of damping and material nonlinearity; numerical methods using spreadsheets; response spectra. Response of structures modeled as multi-degree systems: modeling of structure mass, damping and elastic stiffness; solution by modal superposition; time-history and response spectrum analysis; implications for codes for earthquake-resistant design. Microcomputer software is extensively used.
- CE 235. Advanced Steel Design.** 3 Units
Prerequisite(s): CE 163
Term Typically Offered: Spring only – even years
- Advanced design methodology of steel structures using Load and Resistance Factor Design (LRFD). System level behavior, especially from a seismic loading perspective, is integrated into the design of steel components and connections. Other topics include plate girder design, plastic design of indeterminate systems, design of moment frame systems, and design of braced-frame systems.
- CE 250. Systems Analysis of Resources Development.** 3 Units
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Spring only – even years
- Investigation of resource planning using the "systems approach". Objectives of resource development; basic economic and technologic concepts, and economic factors affecting system design. Consideration of evaluation, institutional constraints, and uncertainty in water resources systems. Familiarization with modern computer techniques. Applications of concepts to air and land resources.
- CE 251. Water Resources Planning.** 3 Units
Prerequisite(s): CE 250 or instructor permission.
Term Typically Offered: Fall only – odd years
- Application of single and multi-objective planning to the design and operation of water resources projects. Objectives and constraints for water projects, criteria and procedures for evaluation, planning under uncertainty. Application in water development and water quality planning, with case studies.

<p>CE 252A. Environmental Quality Processes I. 3 Units Prerequisite(s): CE 170 or equivalent. Term Typically Offered: Fall, Spring</p>	<p>CE 262. Advanced Transportation Facility Design. 3 Units Prerequisite(s): CE 147 or instructor permission. Term Typically Offered: Fall only – even years</p>
<p>Theory and practice of chemical processes affecting water quality. Chemical equilibrium, stoichiometry and kinetics of aqueous chemistry. Acid-base, precipitation-dissolution, oxidation-reduction, and coordination chemistry. Adsorption.</p>	<p>Advanced study of current topics in highway and mass transportation facility design including safety, curve design, pavement design and drainage facility design. Focuses on current design practice and recent or impending changes in design practice.</p>
<p>CE 252B. Environmental Quality Processes II. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 263. Traffic Flow Theory. 3 Units Prerequisite(s): CE 147 or CE 148; ENGR 203 or instructor permission. Term Typically Offered: Fall only – even years</p>
<p>Theory and practice of biological processes for controlling water. Stoichiometry and kinetics of microbial growth. Aerobic and anaerobic metabolism. Engineered suspended and attached growth systems. Introduction to sludge treatment.</p>	<p>Study of traffic flow characteristics including flow rate, speed, and density, at both the microscopic and macroscopic levels. Traffic flow analysis using the theoretical methods including capacity analysis, traffic stream models, shockwave analysis, and queuing analysis. Emphasis is on theory with demonstration of practical applications.</p>
<p>CE 252C. Environmental Quality Processes III. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 265. Analysis and Control of Traffic Systems. 3 Units Prerequisite(s): CE 147 or CE 148; CE 263 or instructor permission. Term Typically Offered: Fall only – odd years</p>
<p>Theory and practice of physical and chemical processes used in engineered water and wastewater systems. Adsorption, ion exchange, gas transfer, membrane processes, coagulation, flocculation, sedimentation, filtration, precipitation, disinfection, and stripping. Physical/chemical reactors.</p>	<p>Traffic data collection and analysis, practical application of theoretical methods of analysis such as capacity, level of service, and queuing theory. Investigation of traffic control techniques such as actuated signals and signal systems, and study of management techniques for traffic congestion.</p>
<p>CE 254. Water Quality Management. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 266. Advanced Design in Reinforced Concrete. 3 Units Prerequisite(s): CE 161, CE 163, CE 164. Term Typically Offered: Spring only – even years</p>
<p>Examination of pollution sources and effects on water bodies, and the management issues and tools used to protect environmental quality. Topics include point and nonpoint pollution sources, interactions in the environment, Federal and State laws, water quality objectives, beneficial uses, and regulatory mechanisms such as basin plans and total maximum daily loads (TMDLs). Emphasis is on surface water.</p>	<p>Advanced topics in behavior and design in reinforced concrete. Detailing for seismic response.</p>
<p>CE 255. Transport of Chemicals in Soil Systems. 3 Units Prerequisite(s): MATH 45. Graduate status. Term Typically Offered: Fall, Spring</p>	<p>CE 267. Structural Systems for Buildings. 3 Units Prerequisite(s): CE 232 or instructor permission. Term Typically Offered: Spring only – even years</p>
<p>Study of the mechanics of movement of chemicals in soil, including equilibrium and partition models, development of mass transport equations in porous media, analytical solution for one-dimensional transport, lumped parameter transport model (linear reservoir model), transport of reactive and conservative chemicals numerical solutions of transport models, transport in the unsaturated zone and coupled models for saturated and unsaturated zone.</p>	<p>Analyzes and design of various structural systems for buildings: frames, tubes, shear walls with or without openings and interaction between these types. Secondary effects such as P^{Δ}, material and geometrical nonlinearities.</p>
<p>CE 261. Transportation Planning. 3 Units Prerequisite(s): CE 148 or instructor permission. Term Typically Offered: Fall only – odd years</p>	<p>CE 268. Pre-stressed Concrete Bridge Design. 3 Units Prerequisite(s): CE 164 or instructor approval. Term Typically Offered: Fall only – even years</p>
<p>Introduction to the complexities of comprehensive intermodal transportation planning. Study of transportation problems, system operating characteristics, alternative modes, and the planning process. Analyzes factors affecting travel behavior and methods of forecasting demand for travel by various modes.</p>	<p>Behavior and design of short and medium-span prestressed concrete bridges using American Association of State Highway and Transportation Officials (AASHTO) Load Resistance Factor Design (LRFD) specifications. Topics include: bridge types, aesthetics; design process; superstructure load types and live load analysis; limit states and load combinations; prestressed concrete materials; flexural analysis and design; shear analysis and design; and introduction to substructure analysis and design, including seismic design criteria. A team project is required.</p>
	<p>CE 269. Pavement Design. 3 Units Prerequisite(s): CE 147 and CE 171A. Term Typically Offered: Spring only – even years</p>
	<p>Fundamental principles of pavement analysis, design, and evaluation. Topics include pavement materials, mechanics, traffic and environmental loadings, pavement performance, design methods, construction and economic evaluation.</p>

- CE 271. Modern Hydrologic Techniques.** **3 Units**
Prerequisite(s): CE 137 or CE 138 and ENGR 203 or instructor permission.
Term Typically Offered: Spring only – even years
- Analyses of hydrologic and meteorologic phenomena by mathematical, statistical, and system methods, linear and non linear, stochastic and parametric hydrology, computer applications in hydrology.
- CE 272. Advanced Engineering Hydraulics.** **3 Units**
Prerequisite(s): CE 137 or equivalent.
Term Typically Offered: Spring only – even years
- Steady uniform and non-uniform open channel flows including gradually, rapid and spatially varied flows; analysis of supercritical flow in transition; basic principles of unsteady flows; long wave theory; Saint-Venant Equations and their solutions including method of characteristics, explicit and implicit finite difference numerical methods.
- CE 274. Hydrologic Modeling.** **3 Units**
Prerequisite(s): CE 272 or equivalent; instructor permission.
Term Typically Offered: Spring only – odd years
- Theories and structure of hydraulic model components; application of HEC-RAS (River Analysis System) and HEC-HMS (Hydrologic Modeling System) computer programs; emphasis on flood routing methods; dam safety analysis methodology including dam break and dam overtopping cases; application of microcomputers in hydraulics computations.
- CE 276. Groundwater Hydrology.** **3 Units**
Prerequisite(s): CE 137 or instructor permission.
Term Typically Offered: Fall only – even years
- Occurrence and movement of groundwater; physical characteristics of aquifers; analysis of steady-state groundwater flow problems by mathematical, digital computer, electrical analog and graphical methods; analysis of unsteady-state problems in confined and unconfined, aquifers; multiple well systems.
- CE 280A. Advanced Soil Mechanics and Foundation Engineering I.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – even years
- Advanced analyses in soil mechanics and their practical applications in foundation engineering; compressibility of soils, settlement analysis, and tolerable settlement; lateral earth pressures and design of earth retaining structures; bearing capacity of shallow foundations; in-situ soil testing for foundation design; design of deep foundations, including driven piles, drilled shaft foundations, and laterally loaded piles.
- CE 280B. Advanced Soil Mechanics and Foundation Engineering II.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – odd years
- Advanced analyses in shear strength of cohesionless and cohesive soils, including stress-strain characteristics of soils, total and effective stress analyses; slope stability analyses for natural slopes, fill slopes, earth dams, levees, and methods of slope stabilization; analysis and design of anchored bulkheads, cellular cofferdams, soil nail walls, tieback walls, mechanically stabilized earth walls, and segmental retaining walls.
- CE 280C. Geotechnical Modeling.** **3 Units**
Prerequisite(s): CE 171A
Term Typically Offered: Fall only – even years
- Advanced analysis principles and procedures for calculating monotonic and cyclic soil element response effective stress and pore water pressure distributions, dynamic site response, and soil deformations; application to analysis of complex geotechnical engineering systems such as levees, dams, and wharfs. Laboratory time devoted to numerical analysis software and physical element and small scale tests. Lecture two hours. Laboratory three hours.
- CE 283. Ground Modification Engineering.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall, Spring
- Principles of soil stabilization and earth reinforcement; mechanical compaction and treatment of difficult soils, including expansive soils, collapsible soils, oversize materials, and compressible fill; prefabricated vertical drains and preloading; dynamic deep compaction; vibro compaction; vibro-replacement; rammed aggregate pier; compaction grouting; jet grouting; slurry grouting; chemical grouting; deep soil mixing; slurry trench walls.
- CE 284. Soil Dynamics and Earthquake Engineering.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Spring only – odd years
- Introduction to vibration theory; wave propagation in soils and dynamic behavior of soils and foundations; dynamic tests; analysis of dynamically loaded foundations; causes of earthquakes; earthquake magnitude and zones; ground motions induced by earthquakes; earthquake-resistant design of foundations and earth dams.
- CE 285. Geosynthetics I.** **3 Units**
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall only – even years
- Overview of geotextiles, geogrids and geonets; geosynthetic properties and test methods; geosynthetic functions and mechanisms as in separation, roadway and soil reinforcement, filtration, and drainage; applications and design methods; construction, fabrication and installation.
- CE 286. Geosynthetics II.** **3 Units**
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall, Spring
- Overview of geomembranes, geosynthetic clay liners, and geocomposites. Topics include: geosynthetic properties and test methods; geosynthetic functions and mechanisms as in landfill liners, liquid barriers and carriers, erosion control, drainage, and design and construction methods.
- CE 289. Project Management for Civil Engineers.** **3 Units**
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Spring only
- Theory and practice of project management in civil engineering. Interrelationship of planning, design, and construction. New technologies and techniques used in both US and international architectural/engineering/construction (A/E/C) markets. Topics: Project initiation, early estimates, project budgeting, work plans, design proposals, scheduling, tracking, design coordination, construction, project close-out, team and personal management skills, and quality control.

CE 296D. Stormwater Management.**3 Units****Prerequisite(s):** CE 137 and CE 170**Term Typically Offered:** Fall, Spring

Principles and practices of stormwater management. Physical and chemical principles affecting stormwater quality, environmental effects, and treatment. Regulatory purposes and requirements for managing construction and post-construction runoff. Choosing and designing Best Management Practices. Erosion control. Hydrologic and hydraulic design of small drainage systems. Emphasis on California climatic and regulatory conditions.

CE 296H. GIS Applications in Civil Engineering.**3 Units****Prerequisite(s):** ENGR 115, CE 9 and CE 137 or CE 147 or CE 171A.**Term Typically Offered:** Fall, Spring

Introduction to fundamental concepts of geographic information systems (GIS), methods, and applications in civil engineering. Design and develop GIS-based analytical methods and solutions for civil engineering problems. Lab exercises are used to design and practice GIS applications in civil engineering. This course may be paired with CE 196H.

CE 299. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Special problems in graduate research.

Note: Approval of a petition must be obtained from the faculty supervising the work and the Department Graduate Program Coordinator. Letter grade or Credit/No Credit.

Credit/No Credit

CE 500. Culminating Experience.**3 - 6 Units****Prerequisite(s):** Advanced to candidacy and permission of the faculty advisor and Department Chair.**Term Typically Offered:** Fall, Spring

Successful completion of either: A. Thesis (3-6 units), or B. Project (3-6 units) or C. Directed Study and Examination (3 units). Plan A requires a thesis and is primarily research-orientated. Plan B requires a project report that is primarily application oriented. Plan C requires a detailed literature review or experimental data analysis resulting in a written report plus an examination by three faculty. A public presentation is required for all three plans.

BS in Civil Engineering

Units required for Major: 94 including GE courses**Total units required for BS: 124**

Program Description

Civil Engineering involves the application of scientific principles and knowledge of mathematics and computers to the planning, analysis, design, and construction of all types of private and public works. Reduction of air and water pollution, disposal of hazardous wastes, renewal of our old cities, planning and building of new communities, providing water, power, and high-speed ground transportation systems are the responsibilities of the civil engineer. It is a continual challenge to the civil engineer to provide these services efficiently by the construction of dams, buildings, bridges, tunnels, highways, airports, waterways, and waste handling facilities in harmony with the natural environment.

Because of the broad range of demands on the civil engineer's services, the undergraduate program is devoted to fundamental principles in

mathematics; basic and engineering sciences; the spectrum of Civil Engineering practice in both analysis and design; and required courses in the humanities and the social sciences, so that engineers may better relate to the world and society they serve. The upper division program permits students to select 12 units (4 courses) of electives. Students may increase the breadth or depth of their knowledge in Civil Engineering by selecting these electives in several areas: environmental and water quality engineering, geotechnical engineering, structural engineering, transportation, and water resources engineering.

Courses may be interchanged between semesters to accommodate the student's schedule, as long as prerequisites are observed. Civil engineering is a demanding major, but with devoted study it can be completed in four years. Students who are working half-time or more often find it difficult to successfully pass a full load of classes each semester. Such students should plan to take fewer units per semester and a longer time to finish their degree.

Note: Students must satisfy the requirements of the Accreditation Board for Engineering and Technology (EAC/ABET). Consult the Civil Engineering Department Chair for specific General Education requirements.

Note: Students graduating with a BS in Civil Engineering will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Program Description

Code	Title	Units
Required Lower Division Courses (65 Units)		
<i>First Semester Freshman Year</i>		
CE 1A	Civil Engineering Seminar ¹	1
CE 4	Engineering Graphics and CAD ¹	2

Total Units		124

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² Students must normally complete all lower division preparation before enrolling in upper division Engineering or Civil Engineering courses.

³ At least two Civil Engineering electives must be design courses (indicated by ⁵).

⁴ Electives are to be chosen from these courses in consultation with a faculty advisor and must include at least two design electives (indicated by ⁵).

Note: Other electives, such as a CE 196 series course or CE 199E may be chosen with the approval of a faculty advisor and Department Chair.

⁵ Indicates a design elective.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	0
Area B: Physical Universe and Its Life Forms (3 Units)

Race and Ethnicity in American Society (RE)	3
Foreign Language Proficiency Requirement ³	0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Civil Engineering are exempt from the Foreign Language Graduation Requirement.

Certificate in Engineering Hydraulics - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units

Certificate in Geo-Environmental - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 181	Geoenvironmental Engineering	3
CE 252A	Environmental Quality Processes I	3
CE 255	Transport of Chemicals in Soil Systems	3
ENGR 203	Engineering Statistics	3
Total Units		12

Certificate in Ground Modification - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 283	Ground Modification Engineering	3
CE 285	Geosynthetics I	3
CE 286	Geosynthetics II	3
ENGR 203	Engineering Statistics	3
Total Units		12

Certificate in Structural Engineering - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 231A	Computer Methods of Structural Analysis I	3
CE 232	Nonlinear Structural Analysis	3
CE 234	Dynamics and Earthquake Response of Structures	3
CE 266	Advanced Design in Reinforced Concrete	3
Total Units		12

Certificate in Transportation Planning - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 250	Systems Analysis of Resources Development	3
CE 261	Transportation Planning	3
CE 262	Advanced Transportation Facility Design	3
ENGR 203	Engineering Statistics	3
Total Units		12

Certificate in Transportation/Traffic Engineering - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 250	Systems Analysis of Resources Development	3
CE 263	Traffic Flow Theory	3
CE 265	Analysis and Control of Traffic Systems	3
ENGR 203	Engineering Statistics	3
Total Units		12

Certificate in Treatment Systems - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 252A	Environmental Quality Processes I	3
CE 252B	Environmental Quality Processes II	3
CE 252C	Environmental Quality Processes III	3
ENGR 203	Engineering Statistics	3
Total Units		12

Certificate in Wastewater Treatment

Program Description

Operating and maintaining the infrastructure system and consistently meeting those public health and environmental objectives are the operators of wastewater treatment plants and wastewater collection systems. The Wastewater Treatment Plant Operator Certificate program is designed to provide students with the technical, scientific, and application background to obtain licensure and the knowledge, skills, and abilities to completely work in the wastewater treatment industry.

Program Requirements

The Certificate is offered by the College of Business Administration and is administered by the Sacramento State College of Continuing Education (<https://www.cce.csus.edu/wastewater-treatment-plant-operation-specialist-certificate-program>).

Certificate in Water Quality - Graduate

Program Description

The graduate certificate program in Civil Engineering is designed to recognize students who have completed core graduate courses in a specialty area in Civil Engineering. This program meets the need of professional engineers that are interested in sharpening their skills in their specialty area. The certificate program is available to matriculated students in the Civil Engineering Graduate Program.

Note: A grade point average of 3.0 must be attained for all courses taken in the program.

Program Requirements

Code	Title	Units
CE 250	Systems Analysis of Resources Development	3
CE 252A	Environmental Quality Processes I	3
CE 254	Water Quality Management	3
ENGR 203	Engineering Statistics	3
Total Units		12

Cooperative Education Program (Work Experience)

Program Description

The Department of Civil Engineering encourages eligible students to participate in the Cooperative Education Program (Co-op). Eligibility requirements are completion of the pre-major and the first semester junior year with a minimum GPA of 2.5. The program provides alternate periods of University study and major-related, paid, off-campus work experience in private industry or government. The experience will enhance the student's employment prospects upon graduation.

Program Requirements

Participants in this program will complete the equivalent of one or two six-month work periods in their junior year and/or their senior year. Students must enroll in the appropriate Professional Practice course (CE 195A) and are awarded a Certificate on satisfactory completion of the Co-op. However, the credits for this course do not replace the curricular requirements of the BSCE degree.

Students interested in the Cooperative Education Program should apply in the satellite office in Riverside Hall 2004 or the main office in Lassen Hall 2008. For information call (916) 278-7234.

MS in Civil Engineering

Total units required for the MS: 30 - Includes research or independent study and units required in area of specialization (see Program Requirements below)

Program Description

Civil Engineering encompasses a broad range of professional activities. The four years of undergraduate preparation for the Bachelor of Science degree are devoted to fundamental analytical principles and basic design applications. For technical competence in specialized areas and continued effectiveness on the job, graduate study is becoming increasingly necessary.

The Civil Engineering Department offers a graduate program of study leading to a Master of Science degree in Civil Engineering in the following areas of specialization:

- **Environmental/Water Quality Engineering** - water quality analysis and management, water, and waste treatment;
- **Geotechnical Engineering** - properties and behavior of soil and their application to design of foundation, retaining structures, earth dams and slopes, soil improvement and ground stabilization, geosynthetics inclusions, and soil dynamics, and earthquake engineering;
- **Structural Engineering** - earthquake resistant steel and concrete design applied to buildings and bridges, structural dynamics, structural mechanics, and finite element methods;
- **Transportation Engineering** - Transportation engineering and planning, traffic flow theory, and system management applicable to all modes with emphasis on highway and multi modal transportation; interdisciplinary study with other areas of Civil Engineering as well as with non-engineering areas (e.g., Environmental Studies, Geography, Public Policy & Administration, and Business Administration) may also be arranged; and
- **Water Resources Engineering** - advanced hydraulics and modern hydrologic techniques, flood forecasting, groundwater flow modeling, water resources management, and policy formulation.

Each area of concentration consists of a set of core courses, a choice of electives, and culminating requirements; all selected by the student and approved by an advisor. Practicing engineers who do not have a degree objective may choose to enroll in selected courses as part of a continuing education program.

Graduate students can also elect an emphasis in **Engineering Management** by taking elective courses in the College of Business Administration. Graduate students who are interested in this option can select up to 9 units of foundation courses and/or graduate business classes (refer to College of Business Administration catalog for listing of courses). Individual programs can be tailored with a faculty advisor.

Graduate brochures specifically describing the program in each area are available in the Department Office. Some graduate assistantships are available to qualified students. Application forms for these can be obtained from the Department or from the Office of Graduate Studies, River Front Center 215, (916) 278-6470.

Admission Requirements

Admission as a classified graduate student in Civil Engineering requires:

- an undergraduate degree in Civil Engineering; and
- a minimum 2.8 GPA both overall and in upper division engineering courses.

In addition, the merit of past academic endeavor, potential for future study, and professional goals may also be considered for granting admission.

Applicants who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status.

Students with a baccalaureate degree in engineering majors other than Civil Engineering (e.g., Electrical and Electronic, Industrial, Mechanical, or Surveying) or in other non-engineering scientific disciplines (e.g., Mathematics, Physics, or Geology) who wish to pursue the graduate program in Civil Engineering may be considered on an individual basis. Such students may be admitted as conditionally classified students and will be required to complete a specifically designed list of undergraduate prerequisite courses in engineering and/or mathematics, physics, and chemistry to correct undergraduate deficiencies. Such a student must have an approved study program on file with the Department while undertaking this qualifying work. Upon completion of these courses with a GPA of 2.8 or better, the student may apply for classified graduate status in Civil Engineering.

Admission Procedures

All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies:

- an online application for admission; and
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*.
- GRE scores if a student does not have an ABET-accredited engineering degree or meet the minimum 2.8 GPA requirement.

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://csus.edu/gradstudies>).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant. After being admitted, students must meet with an advisor and complete a Graduate Student Advising Form (obtainable in the Civil Engineering Department). This advising form must be kept current and on file in the Department Office.

Minimum Units and Grade Requirements for the Degree

Total units Required for the MS: 30; includes research or independent study and units required in area of concentration (see Program Requirements below)

Minimum Cumulative GPA: 3.0. No course in the program of study may have a grade below "C+".

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the graduate student has:

- removed any deficiencies in admission requirements;
- obtained classified graduate status;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least three courses at the 200-level;

- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver; and
- selected and obtained approval for a culminating requirement (Plan A, B, or C).

Advancement to Candidacy forms are available in the Department and in the Office of Graduate Studies. The student fills out the form after planning a degree program in consultation with his or her faculty advisor. The completed form is then approved by the Graduate Coordinator of the Department and submitted to the Office of Graduate Studies.

All graduate degree programs are subject to general University requirements for graduate degrees, explained in the *Graduate Studies* section of this catalog.

Program Requirements

Code	Title	Units
Required coursework (18 Units)		
<i>Core Courses</i>		
15 units are required as outlined in the Core Courses section below		15
<i>Mathematics/Statistics</i>		
Select one of the following: ¹		3
ENGR 201	Engineering Analysis I	
ENGR 202	Engineering Analysis II	
ENGR 203	Engineering Statistics	
Elective Courses		6 - 9
Select 6 or 9 units of electives ^{2,3}		
Culminating Requirement		3 - 6
Select one of the following CE 500 requirements: ³		
<i>Plan A</i>		
Master's Thesis (3 or 6 units) Approval by the faculty thesis advisor and by a second faculty or an expert in the area of study is required. The thesis must comply with University standards for format and is filed in the University Library. The Master's Thesis should be the written product of a systematic study of a significant problem. It identifies the problem, states the major assumptions, explains the significance of the undertaking, sets forth the sources for and methods of gathering information, analyze the data, and offers a conclusion or recommendation. The finished product evidences originality, critical and independent thinking, appropriate organization and format, and thorough documentation. The work should be associated with engineering research or innovation. No more than 3 units may be awarded for a topic directly related to a topic studied of CE 299. A public presentation is required.		
<i>Plan B</i>		

Master's Project (3 or 6 units) Approval by the faculty thesis advisor and by a second faculty or an expert in the area of study is required. A Master's Project should be a significant undertaking appropriate to the engineering profession. It evidences originality and independent thinking, appropriate form and organization, and rationale. It is described and summarized in a written report that includes a discussion of the project's significance, objectives, methodology and a conclusion or recommendation. The work should be associated with practical engineering applications. The report must comply with University standards for format and will be filed in the University Library. No more than 3 units may be awarded for a topic directly related to a topic studied for CE 299. A public presentation is required.

Plan C

Directed Study (3 units) and Comprehensive Examination (0 units). Approval of one faculty member is required for Directed Study. The comprehensive examination is administered by a committee of three faculty members. A public presentation is required on the directed study. The format of the comprehensive examination can be written, oral, or both.

Total Units 30

- ¹ With advisor approval. Students pursuing an emphasis in Environmental Engineering, Water Resource Engineering or Transportation Engineering must take ENGR 203. Students pursuing an emphasis in Structural Engineering must take ENGR 201 or ENGR 202.
- ² Elective courses (including CE 299) selected with prior approval of the student's faculty advisor in the area of interest. In addition to 200-level courses, these may also include the technical electives (but not the required courses) from the undergraduate curriculum. Not more than 3 units of CE 299 may be taken without prior approval of the Graduate Coordinator.
Students who are interested in emphasizing **Engineering Management** may select 9 units of elective courses from the College of Business Administration (refer to foundation courses and/or graduate courses offered by the College of Business Administration). Under this option students should work with a faculty advisor to develop a plan for the management elective courses.
- ³ Totals required units for degree is 30, variable units are listed due to variable culminating requirement units.

Core Courses

Units required: 15 – a minimum of 12 units must be taken from one of the following five areas of specialization. Up to 3 units can be satisfied by 200 level coursework (not including CE 299) outside the chosen area of specialization.

Code	Title	Units
Environmental/Water Quality Engineering (21 Units)		
CE 250	Systems Analysis of Resources Development	3
CE 252A	Environmental Quality Processes I	3
CE 252B	Environmental Quality Processes II	3
CE 252C	Environmental Quality Processes III	3
CE 254	Water Quality Management	3
CE 255	Transport of Chemicals in Soil Systems	3
CE 276	Groundwater Hydrology	3
Geotechnical Engineering (21 Units)		

CE 280A	Advanced Soil Mechanics and Foundation Engineering I	3
CE 280B	Advanced Soil Mechanics and Foundation Engineering II	3
CE 280C	Geotechnical Modeling	3
CE 283	Ground Modification Engineering	3
CE 284	Soil Dynamics and Earthquake Engineering	3
CE 285	Geosynthetics I	3
CE 286	Geosynthetics II	3

Structural Engineering (21 Units)

CE 231A	Computer Methods of Structural Analysis I	3
CE 231B	Computer Methods of Structural Analysis II	3
CE 232	Nonlinear Structural Analysis	3
CE 234	Dynamics and Earthquake Response of Structures	3
CE 235	Advanced Steel Design	3
CE 266	Advanced Design in Reinforced Concrete	3
CE 267	Structural Systems for Buildings	3

Transportation Engineering (18 Units)

CE 261	Transportation Planning	3
CE 262	Advanced Transportation Facility Design	3
CE 263	Traffic Flow Theory	3
CE 265	Analysis and Control of Traffic Systems	3
CE 269	Pavement Design	3
CE 285	Geosynthetics I	3

Water Resources Engineering (18 Units)

CE 250	Systems Analysis of Resources Development	3
CE 251	Water Resources Planning	3
CE 271	Modern Hydrologic Techniques	3
CE 272	Advanced Engineering Hydraulics	3
CE 274	Hydrologic Modeling	3
CE 276	Groundwater Hydrology	3

Computer Engineering

College of Engineering and Computer Science

Program Description

Computer Engineering is one of the newest areas of engineering, a dynamic field that thrives on innovation and challenges. Business, industry, and home applications create the need for products that often can be used both for work as well as for entertainment. In the high technology areas of the United States, Sacramento included, Computer Engineering has experienced tremendous growth, becoming one of the major driving forces behind the rapidly advancing electronics and computer industry. Employment projections consistently predict that computer engineering and computer science will continue to experience more than a doubling of growth in a ten-year period.

Nationally, nearly all engineering universities offer a degree in Computer Engineering. Being close in course content to Electrical Engineering and to Computer Science, these degrees are found in various departmental and program configurations. At Sacramento State, Computer Engineering enjoys the advantage of both areas since it is a program jointly supported by the Electrical and Electronic Engineering Department and the Computer Science Department.

Lower division preparation in Computer Engineering parallels that of Computer Science, with the addition of a basic electrical circuit course and a logic design course. Except for the logic design course, most community colleges offer sufficient lower division courses in mathematics, chemistry, physics, and most importantly, computer science.

Degree Programs

BS in Computer Engineering (p. 537)

MS in Computer Engineering (p. 538)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Computer Engineering is also individually accredited by ABET, Inc.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- Due to numerous generous donations from supportive industries, the computer engineering labs are well equipped with servers and workstations, and with software development tools for VLSI application-specific integrated circuits. Industries donate large electronic devices (FPGAs, CPUs) to each student in computer engineering laboratories.
- The Sacramento State Computer Engineering BS degree is accredited by the Engineering Accreditation Commission (EAC) of ABET, www.abet.org (<http://www.abet.org>). Computer Engineering faculty value accreditation very highly.
- A mechanism of maintaining currency in technology, curriculum review, and outcomes assessment is in place to assure the university and graduates of the continued growth and high quality of the program.

Program Educational Objectives

The objectives of this program are to prepare graduates to:

- enter professional employment and/or graduate study in computer engineering areas, such as logic design, computer architecture, processor hardware, and computer systems;
- identify, analyze, and solve practical computer engineering problems using both hardware and software design tools and techniques;
- work cooperatively and communicate effectively through speaking, writing, and graphics, with peers, with multi-disciplinary teams, and with the general public;

- practice computer engineering in a professionally responsible and ethical manner; and
- anticipate changes in one's own career with respect to changing technology and shifting societal needs for the application of computer engineering.

Career Possibilities

Computer Engineer · Computer Architect · ASIC Designer · Chip Architect · VLSI Engineer · Real Time System Design Engineer · Design Engineer · Hardware Engineer · Software Engineer · Systems Engineer · Applications Engineer · Networking Engineer · Control Engineer · Marketing Engineer · Data Communications Engineer · Project Engineer · Research Engineer · Consulting Engineer · Test Engineer · Production Engineer · Telecommunications Engineer · Solid State Engineer · DSP Engineer

CPE 64. Introduction to Logic Design.

4 Units

Prerequisite(s): CSC 15 or CSC 25 or ENGR 50.

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented. Lecture three hours; laboratory three hours.

Cross listed: EEE 64

CPE 64W. Introduction to Logic Design Workshop.**1 Unit****Corequisite(s):** CPE 64.**Term Typically Offered:** Fall, Spring

Designated to assist students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours.

Cross Listed: EEE 64W; only one may be counted for credit.

Credit/No Credit

CPE 138. Computer Networks and Internets.**3 Units****Prerequisite(s):** CSC 35, CSC 60, CSC 130.**Term Typically Offered:** Fall, Spring

Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling. LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol, Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, Search engine operations, and Web database operations.

Cross Listed: CSC 138; only one may be counted for credit.

CPE 142. Advanced Computer Organization.**3 Units****Prerequisite(s):** CSC 137 or CPE 166 and CPE 185.**Term Typically Offered:** Fall, Spring

Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchical memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.

Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CPE 144. Dsp Architecture Design.**3 Units****Prerequisite(s):** CPE 142.**Term Typically Offered:** Fall, Spring

Fundamental principles of Digital Signal Processing (DSP): sampling theory, aliasing effects, frequency response, Finite Impulse Response filters, Infinite Impulse Response filters, spectrum analysis, Z transforms, Discrete Fourier Transform, and Fast Fourier Transform. Emphasis on hardware design to achieve high-speed real and complex multiplications and additions. Pipelining, Harvard, and modified Harvard architectures are included. Concludes with architectural overviews of modern DSP applications: modems, speech processing, audio and video compression and expansion, and cellular.

CPE 151. Cmos And Vlsi.**3 Units****Prerequisite(s):** CPE 64 and EEE 108.**Term Typically Offered:** Fall, Spring

Begins with an introduction to CMOS gates and design of CMOS combinational and sequential functions at the gate level, including CMOS memory. The theory of MOS transistors is covered including: DC equations, threshold voltage, body effect, subthreshold region, channel length modulation, tunneling, punch through, basic CMOS inverter, and the CMOS transmission gate. A basic exposure to VLSI includes the following topics: CMOS processing technology, CMOS layout, CMOS circuit design and CMOS logic design. Simulations on SPICE and basic VLSI layouts using LEDIT will be included.

CPE 153. Vlsi Design.**3 Units****Prerequisite(s):** CPE 151.**Term Typically Offered:** Fall, Spring

Review basic CMOS VLSI technology, circuit characterization and performance estimation, and provides detailed information on synthesis, placing and routing, clocking strategies, quality and reliability, and I/O structures. Design examples, design techniques, and testing techniques will be presented via current EDA design tools. Students assigned one project from concept design through validation.

CPE 159. Operating System Pragmatics.**3 Units****Prerequisite(s):** CSC 139.**Term Typically Offered:** Fall, Spring

Application of operating system principles to the design and implementation of a multi-tasking operating system. Students will write an operating system for a computer system. Topics include scheduling of processes, control and allocation of computer resources and user interfacing.

Cross Listed: CSC 159; only one may be counted for credit.

CPE 166. Advanced Logic Design.**4 Units****Prerequisite(s):** CPE 64, ENGR 17.**Term Typically Offered:** Fall, Spring

VHDL and Verilog Hardware Description Languages are studied and used on the following advanced level logic design topics: synchronous state machines, asynchronous state machines, metastability, hazards, races, testability, boundary scan, scan chains, and built-in self-tests. Commercial Electronic Design Automation (EDA) toolsets are used to synthesize lab projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Post synthesis simulations by these same tools verify the design before implementation on rapid prototyping boards in the lab.

CPE 185. Computer Interfacing.**4 Units****Prerequisite(s):** CPE 64, CSC 35 and CSC 60.**Term Typically Offered:** Fall, Spring

Design of microcomputer systems including memory systems, parallel and serial input/output, timer modules, and interrupt structures; designing "C" language code, in laboratory, to exercise interface modules of parallel and serial input/output, timer modules, and interrupts; extensive study of interrupt handlers, assemblers, linkers, and loaders. Practical features of interfaces, handshaking techniques, displays, keypads, and trackballs are included.

- CPE 186. Computer Hardware System Design.** 3 Units
Prerequisite(s): CPE 185 or EEE 174.
Term Typically Offered: Fall, Spring
- Study of Intel and Motorola architectures, bus structures, interrupts, memory interface and controllers, bus arbitration, DMA controllers, I/O interface, bridges and microcontroller. Electromagnetic compatibility and regulations, cabling and shielding, grounding, digital circuit noise and layout.
- CPE 187. Embedded Processor System Design.** 2 Units
Prerequisite(s): CPE 166, CPE 185, EEE 102, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Students will design, construct and test an embedded processor system project. All address decoding, control functions, input and output ports, handshaking signals and interrupt control will be implemented in an FPGA. The system will interface to a microcontroller system. Students will use an assembler, a C compiler and either VHDL or Verilog to fully test their project. Laboratory techniques include oscilloscopes, logic analyzers, protocol analyzers and programmers for EPROMs, FLASH and microcontrollers. One lecture per week and one three-hour laboratory per week.
- CPE 190. Senior Design Project I.** 2 Units
Prerequisite(s): CPE 142, CPE 166, CPE 186, CPE 187, EEE 108
Term Typically Offered: Fall, Spring
- Centers on developing hardware and software project planning and engineering design skills. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, working with others in a team arrangement, development of specifications and effective utilization of available resources. Lecture one hour per week, laboratory three hours per week.
- CPE 191. Senior Design Project II.** 2 Units
Prerequisite(s): CPE 190, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Continuation of CPE 190. Students are expected to continue the project started by design teams in CPE 190. The hardware will be completed, tested and redesigned if necessary. At the same time, software for the project will be finished and debugged. The final results of the team project will be presented to the CPE faculty and students at a prearranged seminar. Lecture one hour, laboratory three hours.
- CPE 195. Fieldwork in Computer Engineering.** 1 - 15 Units
Prerequisite(s): Petition approval by Program Coordinator.
Term Typically Offered: Fall, Spring
- Directed observations and work experience in computer engineering with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies. Faculty approval required.
Note: May be repeated for credit.
- Credit/No Credit
- CPE 195A. Professional Practice.** 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
 Credit/No Credit
- CPE 195B. Professional Practice.** 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
 Credit/No Credit
- CPE 195C. Professional Practice.** 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
 Credit/No Credit
- CPE 199. Special Problems.** 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open only to those students who appear competent to carry on individual work. Admission to this course requires approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor. May be repeated for credit.
- CPE 201. Research Methodology.** 1 Unit
Prerequisite(s): Fully classified graduate status.
Term Typically Offered: Fall, Spring
- Research methodology, problem formulation and problem solving. Collective and individual study of selective issues and problems relating to fields of study in the Computer Engineering Graduate Program. Orientation to the requirements for Master's Thesis or Project in Computer Engineering.
 Credit/No Credit
- CPE 273. Hierarchical Digital Design Methodology.** 3 Units
Prerequisite(s): CSC 205, EEE 285 or their equivalents.
Term Typically Offered: Fall, Spring
- Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process', and design with Application Specific Integrated Circuits (ASICs) and programmable logic.

CPE 274. Advanced Timing Analysis.**3 Units****Prerequisite(s):** EEE 273, CSC 273, CPE 273 or instructor permission.**Term Typically Offered:** Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: EEE 274; only one may be counted for credit.

CPE 280. Advanced Computer Architecture.**3 Units****Prerequisite(s):** CSC 205, fully classified graduate status.**Term Typically Offered:** Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and course grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.

CPE 296T. Digital Speech Processing.**3 Units****Prerequisite(s):** EEE 181 or instructor permission.**Term Typically Offered:** Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition. Cross listed: EEE 296T.

CPE 299. Special Problems.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.

CPE 500. Culminating Experience.**5 Units****Prerequisite(s):** Advanced to candidacy and graduate coordinator's permission.**Term Typically Offered:** Fall, Spring

Completion of a thesis or project approved for the master's degree.

Note: May be repeated for credit.

BS in Computer Engineering

Units required for Major: 97

Total units required for the BS: 124

Program Description

The Bachelor of Science degree in Computer Engineering is a four-year program that emphasizes engineering design of computer hardware and systems at all levels. Engineering design begins with logic design taught to entering students during their first semester. The thread of design continues through the study of architecture, CMOS and VLSI technology, ASIC design, operating systems, computer hardware design,

and networking hardware. To complete their degree, students take a two-semester senior design and project course.

Program Requirements

Code	Title	Units
Required Lower Division Courses (23 Units)		
CPE/EEE 64	Introduction to Logic Design ¹	4
CSC 15	Programming Concepts and Methodology I	3
CSC 20	Programming Concepts and Methodology II	3
CSC 28	Discrete Structures for Computer Science	3
CSC 35	Introduction to Computer Architecture	3
CSC 60	Introduction to Systems Programming in UNIX	3
ENGR 1	Introduction to Engineering ¹	1
ENGR 17	Introductory Circuit Analysis	3
Required Mathematics Courses (11 Units)		
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 45	Differential Equations for Science and Engineering	3
Additional Required Courses (13 Units)		
ENVS 10	Introduction to Environmental Science ¹	3
ENGR 140	Engineering Economics ¹	2
PHYS 11A	General Physics: Mechanics ¹	4
PHYS 11C	General Physics: Electricity and Magnetism	4
Required Upper Division Courses (47 Units)		
CPE/CSC 138	Computer Networks and Internets	3
CPE/CSC 142	Advanced Computer Organization	3
CPE 151	Cmos And Vlsi	3
CPE/CSC 159	Operating System Pragmatics	3
CPE 166	Advanced Logic Design	4
CPE 185	Computer Interfacing	4
CPE 186	Computer Hardware System Design	3
CPE 190	Senior Design Project I ¹	2
CPE 191	Senior Design Project II ¹	2
CSC 130	Data Structures and Algorithm Analysis	3
CSC 139	Operating System Principles	3
EEE 108	Electronics I	3
EEE 108L	Electronics I Laboratory	1
EEE 117	Network Analysis	3
EEE 117L	Networks Analysis Laboratory	1
EEE 180	Signals and Systems	3
ENGR 120	Probability and Random Signals	3
Technical Electives (3 Units)		
Select one of the following:		3
CPE 144	Dsp Architecture Design	
CPE 153	Vlsi Design	
CSC 131	Computer Software Engineering	
CSC 133	Object-Oriented Computer Graphics Programming	
CSC 134	Database Management Systems	
CSC 151	Compiler Construction	
CSC 152	Cryptography	
CSC 153	Computer Forensics Principles and Practices	
CSC 154	Computer System Attacks and Countermeasures	

CSC 155	Advanced Computer Graphics
EEE 120	Electronic Instrumentation
EEE 122	Applied Digital Signal Processing
EEE 181	Introduction to Digital Signal Processing
EEE 187	Robotics
Total Units	97

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Note:

- Students are expected to satisfy the general education requirements of the Accreditation Board for Engineering and Technology (ABET) as well as the University's General Education requirements. Students should consult the Program Coordinator for specific General Education requirements.
- A second-year foreign language course (2A or equivalent) may also satisfy 3 units of GE when the course is being taken to comply with the Sacramento State foreign language requirement. Students should consult with an advisor for exact GE eligibility of these courses.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ²	0
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	Take upper-division course to complete Area & upper division requirements. ²	0
Area E: Understanding Personal Development		
Area E Course ²		0
Total Units		30

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>
Note: Students with a declared major of BS in Computer Engineering are exempt from the Foreign Language Graduation Requirement.

MS in Computer Engineering

Total units required for MS: 30 minimum, (including 0-5 units of 500-level courses for Plan A, B, or C) and the remaining units from the list of required and elective courses

Program Description

The Master of Science degree in Computer Engineering is jointly supported by the Departments of Computer Science and Electrical and Electronic Engineering. The program is designed to provide opportunities for students with undergraduate degrees in Computer Engineering, Computer Science, Electrical Engineering, or a closely related field to pursue graduate studies in this interdisciplinary field. The program provides students with broad and advanced knowledge in areas such as advanced microprocessor architecture, parallel computer architecture, advanced microprocessor systems, distributed computing, data communication, computer networks, operating systems, and concurrent programming. The program is sufficiently flexible to allow students to conduct independent research and broaden their professional scope. Each student plans a program of study in consultation with a graduate

advisor and/or his/her thesis or project advisor and works closely with these advisors.

Computer Engineering is a part of the larger Information Technology (IT) discipline. Highly skilled computer engineers who have advanced knowledge of both hardware and software and who can design, test, and implement complex digital systems are a part of the IT workforce. Networks such as the Internet, Intranets, communication systems, banking computer systems, public utility systems, and transportation systems are just a few examples of areas where high-tech solutions and skilled workers are needed. The continuing dramatic progress in hardware and the sophistication of computing devices and systems require continually increasing technical skills in hardware and software.

Note: All graduate students are required to take CPE 201 in their first semester of study. Students may take no more than 6 units of CPE 299 to fulfill the unit requirements. Only those courses completed within seven years prior to date of graduation will satisfy course requirements.

Admission Requirements

Admission to the graduate program in Computer Engineering requires all of the following:

- a BS degree in Computer Engineering (CPE), Computer Science (CSC), Electrical and Electronic Engineering (EEE), or a closely related field;
- at least a 3.0 GPA in the last 60 units of the BS degree;
- Graduate Record Examination (GRE) general test scores and;
- background as specified in Required Basic Knowledge to enter the program.

Students with deficiencies in the admission requirements are advised to remove any such deficiencies before applying. However, under special circumstances, a student who does not satisfy the admission requirements may be admitted as a conditionally classified graduate student. Conditional admission may be granted to those students who are likely to complete all the admission requirements. Deficiencies will be specified in the acceptance letter to the student and must be removed by the student before the student can become a fully classified graduate student.

A student registered as an unclassified or conditionally classified graduate student cannot use graduate courses to improve his/her grade point average for admittance to the program. Only undergraduate courses required in the degree program in CPE, CSC, or EEE may be taken or retaken to improve the GPA for admittance to the graduate program.

Required Basic Knowledge

A student must have completed the following list of Required Basic Knowledge before becoming a fully classified graduate student in Computer Engineering. Courses listed in parentheses are the equivalent Sacramento State courses.

Minimum required GPA in the following subject areas: 3.0

Electrical Fundamentals
 Analog/Digital Electronics
 CMOS and VLSI
 Digital Logic Design and Introduction to Computer Organization
 Assembly Language
 Computer Interfacing
 Object Oriented Programming
 Algorithms and Data Structure

Systems Programming
 Introduction to Operating Systems
 Computer Networks and Internets
 Differential Equations for Science and Engineering
 Statistics and Probability
 Applied Linear Algebra
 Numerical Analysis

Graduate Admission Procedures

Applications will be accepted as long as there is space available. All prospective graduate students, including Sacramento State graduates, must file all of the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for graduate admission;
- two sets of official transcripts from colleges and universities attended, *other than Sacramento State*; and
- Graduate Record Examination (GRE) scores;

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 30

Minimum cumulative GPA: 3.0. Up to three courses in the program of study may have a grade of "C+" or "B-". All other courses in the program of study must have a grade of "B" or higher.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in the admission requirements;
- completed at least 12 units of graduate level (200 series) Computer Engineering courses with a minimum 3.0 GPA; and
- passed the Writing Placement for Graduate Students (WPG) or secured approval for a WPG waiver.

Students must have been advanced to candidacy before they can register for Plan A, B or C. The student should fill out the form after planning a degree program in consultation with a Computer Engineering graduate advisor. The completed form must be signed by the CPE Graduate Coordinator and is then returned to the Office of Graduate Studies for approval.

Note: It should be recognized that the industry puts a high value on project and thesis problem-solving experience, and the demonstration of technical writing skills that these options require. Graduating under the Plan C option will not provide that experience. Students taking this option should consider, with their elective area advisors, other ways of gaining that valuable experience, such as through a CPE 299 Special Problems course.

Program Requirements

Code	Title	Units
A. Required Core Courses		11
CPE 201	Research Methodology ¹	
CSC/EEE 273	Hierarchical Digital Design Methodology	
CSC 205	Computer Systems Structure ²	
EEE 270	Advanced Topics in Logic Design ²	
B. Required Breadth Courses²		6 - 12
Students must cover at least two from the following five areas with equal number from CSC and EEE courses:		
<i>Algorithms and Applications</i>		
CSC 206	Algorithms And Paradigms	
EEE 221	Machine Vision	
EEE 225	Advanced Robot Control	
EEE 244	Electrical Engineering Computational Methods and Applications	
EEE 246	Advanced Digital Control	
<i>Computer Architecture and Digital Design</i>		
CSC 242	Computer-Aided Systems Design and Verification	
EEE 272	High Speed Digital System Design	
EEE 274	Advanced Timing Analysis	
EEE/CSC 280	Advanced Computer Architecture	
EEE 285	Micro-Computer System Design I	
EEE 286	Microcomputer System Design II	
<i>Microelectric Design</i>		
EEE 230	Analog and Mixed Signal Integrated Circuit Design	
EEE 231	Advanced Analog and Mixed Signal Integrated Circuit Design	
EEE 232	Key Mixed-Signal Integrated Circuit Building Blocks	
EEE 234	Digital Integrated Circuit Design ²	
EEE 235	Mixed-Signal IC Design Laboratory	
EEE 236	Advanced Semiconductor Devices	
EEE 238	Advanced VLSI Design-For-Test I	
EEE 239	Advanced VLSI Design-For-Test II	
<i>Networks and Security</i>		
CSC 250	Computer Security	
CSC 253	Computer Forensics	
CSC 254	Network Security	
CSC 255	Computer Networks	
<i>Systems Software</i>		
CSC 151	Compiler Construction	
CPE/CSC 159	Operating System Pragmatics ^{3,4}	
CSC 239	Advanced Operating Systems Principles and Design	
C. CSC Elective		3
Courses from Area B (Required Breadth Courses) or any 200-level CSC courses subject to meeting the required prerequisites.		
D. EEE Elective		3
Courses from Area B (Required Breadth Courses) or any 200-level EEE courses subject to meeting the required prerequisites.		

E. Culminating Requirement

CPE 500	Culminating Experience	0 - 5
<i>Plan A: Thesis (5 units)^{5,6}</i>		
Minimum 25 units of course work including 11 units from Area A (Required Core Courses), a minimum of 6 units from Area B (Required Breadth Courses), and a minimum of 3 units each from Area C (CSC Elective) and Area D (EEE Elective).		
<i>Plan B: Project (2 units)^{5,6}</i>		
Minimum 28 units of course work including 11 units from Area A (Required Core Courses), a minimum of 12 units from Area B (Required Breadth Courses), and a minimum of 5 units from the following options:		
a) 3 units from Area C (CSC Elective) and 2 units 299 where minimum 1 unit must be CPE or EEE;		
b) 3 units from Area D (EEE Elective) and 2 units 299 where minimum 1 units must be CPE or CSC; or		
c) 3 units from Area C (CSC Elective) and 3 units from Area D (EEE Elective).		
<i>Plan C: Comprehensive Exam (0 units)^{5,6}</i>		
Minimum 30 units of course work including 11 units from Area A (Required Core Courses), a minimum of 12 units from Area B (Required Breadth Courses), and a minimum of 3 units each from Area C (CSC Elective) and Area D (EEE Elective).		
Total Units		29-34

- All graduate students must concurrently take CPE 201 in the semester they take their first graduate course.
- Students whose undergraduate degree preparation has covered a significant amount of the material in the course may be allowed to waive the course. The course waiver form must be approved by the Computer Engineering Coordinator. In this case, for each CSC course waived students must take an additional CSC course, and for each EEE course waived students must take an additional EEE course from Required Breadth Courses or Elective Courses to satisfy the program unit requirement.
- Students whose undergraduate degree preparation has not covered a significant amount of the material in CSC 159/CPE 159 must take this course as one of the CSC Breadth Requirement courses.
- No more than 6 units of under 200-level courses.
- Additional units from Area B (Required Breadth Courses), Area C (CSC Elective), or Area D (EEE Elective), or 299, to fulfill the minimum course work units.
- The Masters Degree requires 18 units of Graduate (200-level) seminar courses. No more than six units of 295, 296, or 299 may be counted towards a degree.

Computer Science

College of Engineering and Computer Science

Program Description

The Bachelor of Science degree in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET, Inc. (<http://www.abet.org>), providing majors with a sound educational base in Computer Science. The Minor in Computer Science and the Minor in

Information Security and Computer Forensics are available for students majoring in disciplines other than Computer Engineering.

The Department offers an MS in Computer Science and an MS in Software Engineering.

The Department also offers programs in conjunction with other units: with the Electrical and Electronic Engineering Department, a BS and an MS in Computer Engineering (refer to the Computer Engineering section of this catalog).

Degree Programs

BS in Computer Science (p. 552)

Certificate in Cyber Defense and Operations (p. 555)

Certificate in Game Engineering (p. 556)

Certificate in Information Assurance and Security (p. 556)

Certificate in Software Engineering (p. 557)

Certificate in Systems Software (p. 558)

Minor in Computer Science (p. 558)

Minor in Information Security and Computer Forensics (p. 558)

MS in Computer Science (p. 559)

MS in Software Engineering (p. 561)

Certificate in Advanced Studies (p. 554)

Certificate in Computer Architecture (p. 554)

Certificate in Computer Engineering (p. 554)

Certificate in Computer Networks and Communications (p. 555)

Certificate in Data Management Systems (p. 555)

Certificate in Data Mining (p. 555)

Certificate in Information Assurance and Security - Graduate (p. 557)

Certificate in Intelligent Systems (p. 557)

Certificate in Software Engineering - Graduate (p. 557)

Certificate in Systems Software - Graduate (p. 558)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Computer Science is also individually accredited by Computing Accreditation Commission of ABET, Inc.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining

whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The research interests of the department faculty span a broad spectrum of Computer Science including active databases, algorithm analysis, autonomic computing, bioinformatics, compilers, computer architecture, computer forensics, computer graphics and computer game design, computer networks and communications, computing theory, cryptography, data models and database management systems, data warehousing and data mining, distributed systems and real-time systems, formal methods, human-computer interfaces, information assurance and security, intelligent and knowledge-based systems, Internet and Web technologies, machine learning, mobile and cloud computing, network security, operating systems, performance modeling and evaluation, programming languages and methodologies, software architecture, software project management, software requirements engineering, software system engineering, verification and validation, VLSI design.
- A large heterogeneous network of Linux 64-bit, Sun RISC, and Hewlett-Packard RISC servers combined with Linux, SunOS, HP-UX, Windows, and MacOS workstations supports the instructional programs. Linux and Windows workstation laboratories support both lower and upper-division instruction. Specialized laboratories support systems, communications and networking, computer security, and computer architecture instruction. A graduate laboratory is designed to provide graduate students with access to a variety of advanced workstations. All students have access to the Internet and every conceivable Web resource.
- Majors are urged to join the student chapters of the Association for Computing Machinery or the IEEE Computer Society. Students with high scholastic achievement may be invited to join Upsilon Pi Epsilon, the national honor society for Computer Science.
- The University's proximity to many California State agencies and major computer corporations provides numerous opportunities for part-time student employment.

Bachelor of Science Educational Objectives

Three to five years after graduation, a graduate of the B.S. in computer science should have:

1. Made contributions to the development, maintenance, and support of real world computing systems.
2. Taken initiative and assumed responsibilities as an effective member of project teams.
3. Worked independently and functioned effectively in an environment with incomplete information.
4. Progressed in the computing field, engaged in professional development, and/or pursued an advanced degree.
5. Produced quality technical and non-technical documents and presentations for a variety of audiences.
6. Adhered to the ethical standards of the profession and understood the implications of his/her professional activities.

Career Possibilities

Computer Scientist · Computer Engineer · Software Engineer · Computing Science Educator · Information Technology Specialist · Computer Systems Analyst · Scientific Application Programmer · Computer Operations Manager · Computer Services Coordinator · Database Administrator · Computer Game Developer · Data Communications Manager · Data Processing Manager · Data Processing Application Programmer · Network Administrator · Programmer Analyst · Software Requirements Engineer · Software Architect · Software Quality Assurance Specialist · Software Development Project Manager · Systems Manager · Systems Programmer · Computer Graphics Specialist · Knowledge Engineer · Systems Engineer · Cyber Security Specialist · Information Assurance Specialist · Information Security Officer · Data Mining Analyst · Web/eCommerce Developer · IT Business Analyst · IT Infrastructure Specialist · Technical Control Specialist · Technical Representative

CSC 1. Introduction to Computer Science. 3 Units

Prerequisite(s): Intermediate algebra.

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall, Spring

Fundamental concepts of computers, computation and programming; history and principles of computing; problem solving; input, output; data representation, storage, and file organization; computer hardware, networking and data communication; social, economic and ethical implications; computer security and privacy. Students will solve problems using a programming language. Lecture, two hours; technical activity and laboratory, two hours.

CSC 1A. Introduction to Computer Science for Advanced Students. 3 Units

Term Typically Offered: Fall, Spring

Same material as covered in CSC 1 but intended for students who already have significant knowledge of the fundamental concepts of computers and/or computer programming. Students must attend the orientation session during the first class meeting. Two placement tests, one on programming and one on concepts, will be scheduled and used to determine student's prior preparation.

Note: May be taken by those wishing to obtain credit by examination. Please refer to examination credit guidelines in the University catalog. Not open to students who have received credit for CSC 1 or MIS 5.

Credit/No Credit

CSC 5. Personal Computing. 3 Units

Term Typically Offered: Fall, Spring

Introduction to the role and use of personal computers, emphasizing the use and relevancy of common software for word processing, database, spreadsheet analysis, graphics, and communications. Examination of the personal computing milieu and the applications environment. Lecture two hours, technical activity and laboratory two hours.

CSC 8. Introduction to Internet Technologies. 3 Units

Prerequisite(s): Basic computer literacy recommended.

Term Typically Offered: Summer only

Internet applications such as email, instant messaging, file transfer, secure communications, the web, and related tools and protocols. Basics of the web-publishing process and methods used to locate authoritative information on the internet. Webpage design, internet security and emerging technologies on the internet.

CSC 8S. Self-Paced Introduction to Internet Technologies. 3 Units

Prerequisite(s): Basic computer literacy recommended.

Term Typically Offered: Fall, Spring

Covers the same material as CSC 8, Introduction to Internet Technologies. Provided by electronic means in addition to meetings for orientation, laboratory demonstrations, and tests. Internet applications such as Email, instant messaging, file transfer, secure communications, the Web, and related tools and protocols. Basics of the Web-publishing process and methods used to locate authoritative information on the Internet. Webpage design, Internet security and emerging/declining technologies on the Internet.

Credit/No Credit

CSC 10. Introduction to Programming Logic. 3 Units**Prerequisite(s):** Math 11 or equivalent**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Introduction to computer science with an emphasis on programming concepts and methodology. Intended to assist students with little or no programming experience to understand the basic principles of programming logic. Topics include computer hardware and software, problem solving and algorithm development, flow of control, modular design using techniques that can be applied to common programming languages. Lecture two hours, technical activity and laboratory two hours.

CSC 10A. Accelerated Introduction to Programming Logic. 3 Units**Term Typically Offered:** Fall, Spring

Introduction to computer science with an emphasis on programming concepts, logic, and methodology: computer hardware and software, problem solving and algorithm development, flow of control, and modular design. Accelerated and more in-depth study of programming concepts than CSC 10. Intended for computer science and computer engineering majors who have little or no programming experience. Lecture two hours, technical activity and laboratory, two hours. Not open to students who have received credit for CSC 10. Prerequisite: Math 11

CSC 15. Programming Concepts and Methodology I. 3 Units**Prerequisite(s):** CSC 10, or programming experience in a high-level programming language.**Term Typically Offered:** Fall, Spring, Summer

Programming concepts using an object-oriented programming language. Introduction to methodologies for program design, development, testing, and documentation. Topics include program design, algorithm design, number systems, classes and objects, methods (functions), control structures, arrays, and interactive input/output. Lecture two hours, technical activity and laboratory two hours.

CSC 15W. Programming Methodology I Workshop. 1 Unit**Corequisite(s):** CSC 15.**Term Typically Offered:** Fall, Spring, Summer

Designed to assist students in developing a more thorough understanding of programming methodology and problem solving techniques. Activity two hours.
Credit/No Credit

CSC 20. Programming Concepts and Methodology II. 3 Units**Prerequisite(s):** CSC 15.**Term Typically Offered:** Fall, Spring

Application of object-oriented techniques for systematic problem analysis and specification, design, coding, testing, and documentation. Semester-long project approach emphasizing larger programs. Managing program complexity using abstraction. Introduction to algorithm analysis and Big-O notation. Advanced language features. Basic sorting and searching algorithms. Recursion. Lecture two hours, technical activity and laboratory two hours.

CSC 21. First Year Seminar: Becoming an Educated Person. 3 Units**General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall only

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Development of information competence and computer literacy. Students interact with fellow students and the seminar leader to build a community of academic and personal support.

CSC 22. Visual Programming in BASIC. 3 Units**Prerequisite(s):** Intermediate Algebra.**Term Typically Offered:** Fall, Spring

Computer Programming using Visual Basic. Topics include the Visual Basic Integrated Development Environment, visual user interface development, concepts of object-oriented programming, variables, control structures, arrays, functions, subroutines, strings, files, and database access. Applications will be created in areas such as business, games, and multimedia. Lecture two hours, technical activity and laboratory two hours.

CSC 25. Introduction to C Programming. 3 Units**Term Typically Offered:** Fall only

Topics include: types, operators, control structures, input/output, arithmetic operations, the C library and preprocessor, functions and parameters, arrays, strings, pointers, and structures. Program design and style will be emphasized. Students will use a compiler.

Note: Students with significant programming experience should take CSC 60 rather than CSC 25. Lecture two hours, technical activity and laboratory two hours.

CSC 28. Discrete Structures for Computer Science. 3 Units**Prerequisite(s):** MATH 26A or MATH 29; and CSC 20; CSC 20 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Introduction to the essential discrete structures used in Computer Science, with emphasis on their applications. Topics include: counting methods, elementary formal logic and set theory, recursive programming, digital logic and combinational circuits, real number representation, regular expressions, finite automata.

CSC 35. Introduction to Computer Architecture. 3 Units**Prerequisite(s):** CSC 15.**Term Typically Offered:** Fall, Spring

Internal representation of numeric and non-numeric data, assembly level machine architecture, addressing modes, subroutine linkage, polled input/output, interrupts, high-level language interfacing, macros and pseudo operations. Lecture two hours, technical activity and laboratory two hours.

CSC 60. Introduction to Systems Programming in UNIX. 3 Units**Prerequisite(s):** CSC 20, CSC 35.**Term Typically Offered:** Fall, Spring

Features of the C language commonly used in systems programming, application to systems programming in a UNIX environment. Topics include C preprocessor macros, I/O, bit-manipulation facilities, timesharing system concepts, file permissions, shell script programming, make files and source code control, basic system calls like fork and exec, pointers and dynamic memory allocation, libraries and relocation and linking concepts including assembler handling of symbol tables. Prior knowledge of a C like programming language is presumed.

CSC 80. Web Development with HTML/XHTML and Tools. 3 Units**Prerequisite(s):** CSC 8 or equivalent computer and Internet experience.**Term Typically Offered:** Fall, Spring

Hands-on course covering the processes and guidelines for creating and customizing interactive webpages. Emphasis on use of HTML/XHTML, CSS, and tools to create webpages. HTML/XHTML syntax to create, format, and link documents. Use of tables, graphics, styles, forms, multimedia, and other features in webpages. Effective webpage design and website organization. Lecture two hours and technical activity and laboratory two hours.

CSC 114. Digital Evidence and Computer Crime. 3 Units**Prerequisite(s):** CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.**Term Typically Offered:** Fall, Spring

Topics include technology and law, computer basics for digital investigations, network basics for digital investigations, investigation of computer crime, and the handling of digital evidence.

CSC 115. Internet Security. 3 Units**Prerequisite(s):** CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.**Term Typically Offered:** Summer only

Internet security problems and discussion of potential solutions: network vulnerabilities and attacks, secure communication and use of cryptography, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and use of software tools for network security.

CSC 116. Cyber Forensics. 3 Units**Prerequisite(s):** CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.**Term Typically Offered:** Summer only

Fundamentals of computer forensics and cyber-crime scene analysis including laws, regulations, and international standards; formal methodology for conducting security incident investigations; categories of electronic evidence. Projects involving digital forensic tools.

CSC 120. Web Server Administration. 3 Units**Prerequisite(s):** CSC 80.**Term Typically Offered:** Fall, Spring

Managing and maintaining Web servers. Administering open source and commercial Web servers, Web hosting alternatives, professional standards and practices of website hosting, Web server installation, configuration, management, and security. Selecting and using technologies to support professional quality websites. Lecture two hours; technical activity and laboratory two hours.

CSC 121. Client-Side Web Programming. 3 Units**Prerequisite(s):** CSC 22, CSC 80 or equivalents; OR PCSC/CSC Major, CSC 60, CSC 130.**Term Typically Offered:** Fall, Spring

Client-side Web programming using JavaScript, DHTML, and client-side Web technologies. Event-driven programming, dynamic data types, control structures, and introduction to object-oriented programming and program design. Use of cookies and built-in objects. Validation and processing of forms. Basic features of the Document Object Model.

CSC 122. Web Database Applications. 3 Units**Prerequisite(s):** CSC 10 or CSC 22; and CSC 80 or equivalent.**Term Typically Offered:** Fall, Spring

Fundamentals of building effective database-driven web applications. Particular emphasis on database access via web interfaces. Introduction to database management systems, their structure and usage, SQL, integrating web applications with databases, design and implementation of dynamic web database applications.

CSC 123. Web Application Development. 3 Units**Prerequisite(s):** CSC 22, CSC 121, CSC 122, or equivalent experience; OR PCSC/CSC Major, CSC 60, CSC 134.**Term Typically Offered:** Fall, Spring

Developing multi-tiered enterprise-level Web applications. Standards of Web services and other current Web technologies, including XML, AJAX, and server-side programming such as Java EE, .NET, or PHP. Development of Web applications such as those used for e-commerce, e-business, and content management. Format consists of two 1.5 hour lecture/lab sessions per week.

CSC 126. 3D Computer Modeling. 3 Units**Prerequisite(s):** CSC 10 or ART 97 or equivalent.**Term Typically Offered:** Fall only

Techniques and processes to create 3D computer models and environments. Exercises, assignments and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students' conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/new media and computer gaming.

Note: May be taken twice for credit. Cross-listed as ART 142.**CSC 127. 3D Computer Animation. 3 Units****Prerequisite(s):** ART 142 or CSC 126.**Term Typically Offered:** Spring only

Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques; keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair, and fur simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects.

Cross-listed: ART 143.

CSC 130. Data Structures and Algorithm Analysis. 3 Units
Prerequisite(s): CSC 20, CSC 28; CSC 28 may be taken concurrently.
Term Typically Offered: Fall, Spring

Specification, implementation, and manipulation of complex data structures: linear/lists, stacks, queues, trees, sets, and graphs. Design and analysis of algorithms. Recursion and stack-based memory management. Advanced searching and sorting. NP-completeness.

CSC 131. Computer Software Engineering. 3 Units
Prerequisite(s): CSC 130; may be taken concurrently.
Term Typically Offered: Fall, Spring

Principles of Software Engineering covering the software development life cycle, including software requirements engineering (elicitation, modeling, analysis and specification), software design, software implementation and testing. Main topics include various software development process models, method and techniques for specifying requirements, architectural and detailed design specification, prototyping, top-down and bottom-up software implementation and testing. Topics also include project management, project documentation and the development of communication skills through written documentation and oral presentation.

CSC 132. Computing Theory. 3 Units
Prerequisite(s): CSC 28, CSC 130; CSC 130 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; language recognition and generation; language hierarchy; deterministic and non-deterministic automata; regular expressions; pushdown automata and context-free grammars; properties of regular and context-free languages; Turing machines; computable and noncomputable functions; decidability.

CSC 133. Object-Oriented Computer Graphics Programming. 3 Units
Prerequisite(s): CSC 130, CSC 131.
Term Typically Offered: Fall, Spring

Introduction to computer graphics and advanced topics in object-oriented (OO) programming. The OO paradigm is used throughout, utilizing computer graphics as the vehicle for solidifying basic OO concepts, studying the implementation of event-driven systems, and for developing a thorough understanding of advanced OO concepts such as inheritance and polymorphism. Topics include fundamental concepts of object-oriented programming, software design patterns, graphic devices, line and surface drawing, simple 2D and 3D representation, and use of User Interface components.

CSC 134. Database Management Systems. 3 Units
Prerequisite(s): CSC 130.
Term Typically Offered: Fall, Spring

Entity-Relationship (ER) model; relational model; relational database design by ER-to-relational mapping; design of applications using database technology; SQL; schema definition, constraints, and queries; relational algebra; data normalization; access methods such as indexing and hash structures; introduction to transaction processing.

CSC 135. Computing Theory and Programming Languages. 3 Units
Prerequisite(s): CSC 28, CSC 35, CSC 130.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; regular expressions; deterministic and non-deterministic finite automata; pumping lemma for regular languages; push-down automata and context-free grammars; language recognition; parsing techniques including recursive descent; Turing machines; computable and non-computable functions. Design and implementation of selected features of programming languages. Functional and logic programming paradigms.

CSC 136. Programming Languages. 3 Units
Prerequisite(s): CSC 35, CSC 132.
Term Typically Offered: Fall, Spring

Evolution and characteristics of programming languages. Scripting, procedural, object-oriented, functional and logic paradigms. Language specification; interpreters and compilers; virtual machines; parsing techniques. Design and implementation of selected features of programming languages. Programming languages used in the development of intelligent systems, with introduction to Artificial Intelligence. Trends in programming languages.

CSC 137. Computer Organization. 3 Units
Prerequisite(s): CSC 28, CSC 35, CSC 130
Term Typically Offered: Fall, Spring

Introduction to computer organization and architecture. Combinational devices, sequential and synchronized circuits, memory organization, CPU architecture and organization, bus structures, input/output, interrupts, DMA, memory hierarchy, introduction to instruction level parallelism, multithreading, and multiprocessing. Exposure to hardware security issues.

CSC 138. Computer Networks and Internets. 3 Units
Prerequisite(s): CSC 35, CSC 60, CSC 130.
Term Typically Offered: Fall, Spring

Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling. LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol, Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, search engine operations, and Web database operations.
 Cross Listed: CPE 138; only one may be counted for credit.

- CSC 139. Operating System Principles.** 3 Units
Prerequisite(s): CSC 60 and CSC 130, and either CSC 137 or CPE 185
Term Typically Offered: Fall, Spring
- Concepts, principles, fundamental issues, organization and structure of contemporary operating systems. Topics include processes, threads, concurrency, scheduling, inter-process communication and synchronization, deadlock, real and virtual memory management, device management, file systems, network and distributed operating systems, security, and protection.
- CSC 140. Advanced Algorithm Design and Analysis.** 3 Units
Prerequisite(s): CSC 130.
Term Typically Offered: Spring only
- Algorithm design using dynamic programming, randomization and greedy methods. Analysis using recurrence relations and amortization. String and network-flow algorithms. NP-completeness, reductions, and approximation algorithms. Review of divide-and-conquer design and asymptotic notation.
- CSC 142. Advanced Computer Organization.** 3 Units
Prerequisite(s): CSC 137 or CPE 166 and CPE 185.
Term Typically Offered: Fall, Spring
- Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchical memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.
Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.
- CSC 148. Modeling and Experimental Design.** 3 Units
Prerequisite(s): MATH 26B or MATH 31, STAT 50 or ENGR 115, and proficiency in a programming language.
Term Typically Offered: Not offered
- Modeling and simulation techniques; Monte Carlo methods; queuing theory; model formulation, data collection and analysis, experimental design; model verification and validation.
- CSC 151. Compiler Construction.** 3 Units
Prerequisite(s): CSC 135
Term Typically Offered: Fall only
- Practical approach to compiler design and implementation. Organization of a compiler, algorithms for lexical, syntactic and semantic analysis, recursive descent and/or LALR parsing, organization of symbol tables, error detection and recovery, object code generation. Modular design will be emphasized.
- CSC 152. Cryptography.** 3 Units
Prerequisite(s): CSC 60, CSC 130; and STAT 50 or ENGR 115
Term Typically Offered: Fall only
- Introduction to design and analysis of cryptographic systems. Symmetric cryptography: Block ciphers and secure hash functions. Asymmetric cryptography: Key exchange and public-key systems. Authentication and encryption in an adversarial model. Simple cryptanalysis. Protocol design and analysis.
- CSC 153. Computer Forensics Principles and Practices.** 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Spring only
- Fundamentals of computer forensics, cyber-crime scene analysis and electronic discovery. Technical and formal methodology for conducting security incident investigations; file systems and storage analysis, data hiding techniques, network forensics; projects involving using, understanding, and designing digital forensics tools; anti-forensics; legal issues and standards.
- CSC 154. Computer System Attacks and Countermeasures.** 3 Units
Prerequisite(s): CSC 138 or CPE 138.
Term Typically Offered: Fall only
- Introduction to network and computer security with a focus on how intruders gain access to systems, how they escalate privileges, and what steps can be taken to secure a system against such attacks. Topics include: Perimeter defenses, intrusion detection systems, social engineering, distributed denial of service attacks, buffer overflows, race conditions, trojans, and viruses.
- CSC 155. Advanced Computer Graphics.** 3 Units
Prerequisite(s): CSC 133.
Term Typically Offered: Fall only
- Modeling, viewing, and rendering techniques in 3D computer graphics systems. Topics include modeling systems and data structures; polygonal and parametric surface representation; transformations, windowing, clipping and projections in 3D; hidden surface removal algorithms; techniques for realism such as shading, shadows, highlights, and texture; fractals and procedural models; introduction to animation; hardware support for computer graphics; and the application of graphics principles to virtual reality systems and 3D games.
- CSC 159. Operating System Pragmatics.** 3 Units
Prerequisite(s): CSC 139.
Term Typically Offered: Fall, Spring
- Application of operating system principles to the design and implementation of a multitasking operating system. Students will write an operating system for a computer platform. Topics include: scheduling of processes, control and allocation of computer resources, and user interfacing.
 Cross Listed: CPE 159; only one may be counted for credit.
- CSC 163. Parallel Programming with GPUs.** 3 Units
Prerequisite(s): CSC 60, CSC 130, CSC 137; and either MATH 30 or MATH 26A.
Term Typically Offered: Fall, Spring
- Parallel programming with emphasis on developing GPU computing applications. Topics include the GPU architecture and programming model, mapping computations to parallel hardware, parallel computation patterns, parallel programming optimization techniques, and application case studies.

CSC 165. Computer Game Architecture and Implementation. 3 Units

Prerequisite(s): CSC 130; CSC 133; MATH 26A or MATH 30; PHYS 5A or PHYS 11A.

Term Typically Offered: Spring only

Architecture and implementation of computer game systems. Topics include game engine architecture; screen management and rendering control; geometric models; algorithms and data structures for spatial partitioning, occlusion, and collision detection; real-time interactive 3D graphics and animation techniques; behavioral control for autonomous characters; simulation of physical phenomena; sound and music in games; optimization techniques; multi-player games and networking; game development tools and environments. Substantial programming and project work.

CSC 170. Software Requirements and Specification. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – odd years

Analysis and specification of functional and non-functional requirements for real-time and non-real-time software systems in the context of a software development lifecycle. Determining customer and user software requirements and ensuring that specifications are correct, complete, and testable. Includes modeling techniques, methods for representing real-time requirements, and the use of Computer-Aided Software Engineering (CASE) tools to illustrate analysis concepts.

CSC 171. Software Engineering Project Management. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – even years

Fundamental issues in the management and economics of a software engineering project in the context of the software development lifecycle. Topics include: techniques for project planning (budgeting and scheduling), controlling (including quality assurance and configuration management), organizing, staffing, and directing a software project (leadership and motivation); and contemporary issues in management.

CSC 174. Advanced Database Management Systems. 3 Units

Prerequisite(s): CSC 131, CSC 134.

Term Typically Offered: Fall only

Enhanced Entity-Relationship (EER) modeling; relational database design based on EER; SQL views; integrity constraints and triggers; stored procedures and functions; database programming techniques; query processing and optimization; transactions concurrency and recovery techniques; relational decomposition and normalization algorithms; database schema and data security.

CSC 176. Database Architecture and Optimization. 3 Units

Prerequisite(s): CSC 174.

Term Typically Offered: Spring only

Advanced object-relational systems, advanced catalog systems, security mechanisms, distributed database processing, advanced schema design-partitioning, introduction to data warehousing and data mining, materialized views, Internet technologies, parallel query processing, system utilities, database tuning, DBA tools and techniques.

CSC 177. Data Warehousing and Data Mining. 3 Units

Prerequisite(s): CSC 134 and STAT 50 or ENGR 115.

Term Typically Offered: Spring only

Data warehousing involves data preprocessing, data integration, and providing on-line analytical processing (OLAP) tools for the interactive analysis of multidimensional data, which facilitates effective data mining. Data mining is the automated extraction of hidden predictive information from databases. Data mining applies concepts and techniques from the fields of databases, machine learning, algorithms, information retrieval, and statistics. Topics include: data warehousing, association analysis, classification, clustering, numeric prediction, and selected advanced data mining topics.

CSC 179. Software Testing and Quality Assurance. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – even years

Testing, verification, validation, and control of real-time and non-real-time software systems in the context of a software development lifecycle. Topics include: unit, integration and system testing; verification and validation (V&V), quality assurance, metrics, and configuration management.

CSC 180. Intelligent Systems. 3 Units

Prerequisite(s): MATH 26B or MATH 31; STAT 50 or ENGR 115; CSC 130 and CSC 135.

Term Typically Offered: Spring only

Theory and implementation of a variety of techniques used to simulate intelligent behavior. Expert systems, fuzzy logic, neural networks, evolutionary computation, and two-player game-tree search will be covered in depth. Knowledge representation, pattern recognition, hybrid approaches, and handling uncertainty will also be discussed.

CSC 190. Senior Project: Part I. 2 Units

Prerequisite(s): Senior status, completion of CSC 130, CSC 131 and four additional 3-unit CSC upper-division courses that fulfill the major requirements (excluding CSC 192-195, 198, 199), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).

Term Typically Offered: Fall, Spring

First of a two-course sequence in which student teams undertake a project to develop and deliver a software product. Approved project sponsors must be from industry, government, a non-profit organization, or other area. Teams apply software engineering principles in the preparation of a software proposal, a project management plan and a software requirements specification. All technical work is published using guidelines modeled after IEEE documentation standards. Oral and written reports are required. Lecture one hour, laboratory three hours.

CSC 191. Senior Project-Part II. 2 Units

Prerequisite(s): CSC 190.

Term Typically Offered: Fall, Spring

Continuation of the group project begun in CSC 190. Teams apply software engineering principles to the design, implementation and testing of their software product. All technical work is published using guidelines modeled after IEEE documentation standards along with an appropriate user manual. Oral and written reports are required. Senior project is completed with the successful delivery, installation and demonstration of the software along with all approved documentation. Lecture one hour, laboratory three hours.

<p>CSC 192. Career Planning. 1 Unit Prerequisite(s): CSC 130 and three additional upper-division courses that fulfill major requirements with a C- grade or better (excluding CSC 190-195, CSC 198, and CSC 199). Term Typically Offered: Fall, Spring</p>	<p>CSC 196V. Data Visualization. 3 Units Prerequisite(s): CSC 130, CSC 134, and STAT 50 or ENGR 115. Term Typically Offered: Fall, Spring</p>
<p>Designed to help students learn more about the labor market and opportunities in the Computer Science field. Students will examine their interests, consider their goals, and learn how to conduct an effective proactive job search. Strategies for long term career growth will be identified. Credit/No Credit</p>	<p>Design principles and concepts for visualizing data; current visualization systems and languages, exploratory data analysis, interaction techniques, high-dimensional data, network visualization, and text visualization. CSC 198. Co-Curricular Activities in Computer Science. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>CSC 194. Computer Science Seminar. 1 Unit Prerequisite(s): Upper division or graduate status in CSC. Term Typically Offered: Spring only</p> <p>Series of weekly seminars on Computer Science topics. These topics cover subjects not normally taught in the course of a school year and they range from the very theoretical in Computer Science through applications to presentations by industry on working conditions, real world environment and job opportunities. Note: May be repeated for credit.</p>	<p>Students will serve in leadership roles in computer science activities, provide tutoring or technical assistance in labs, assist instructors in grading coursework, or assist in other activities related to the subject matter and concerns of the department. Credit/No Credit CSC 199. Special Problems. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>CSC 195. Fieldwork in Computer Science. 1 - 4 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies. Note: Faculty approval required. May be repeated for credit. Credit/No Credit</p>	<p>Individual projects or directed reading in specified topics in computer science. Note: Open only to students who appear competent to carry on individual work; approval of faculty supervisor and advisor required. May be repeated for credit. Credit/No Credit</p>
<p>CSC 195A. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center. Note: Requires satisfactory completion of the work assignment and a written report. Credit/No Credit</p>	<p>CSC 201. Programming Language Principles. 3 Units Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering. Term Typically Offered: Fall, Spring</p>
<p>CSC 195B. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center. Note: Requires satisfactory completion of the work assignment and a written report. Credit/No Credit</p>	<p>Notations for the specification of programming language syntax and semantics; attribute, translational, operational, axiomatic, algebraic, denotational, and action semantics. Applications of programming language syntax and programming language semantics. Use of meta languages to generate executable language definitions for language implementation, program transformation, program property analysis, and rapid software prototyping. Principles of logic, functional, and object-oriented programming languages. CSC 204. Data Models for Database Management Systems. 3 Units Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering. Term Typically Offered: Fall, Spring</p>
<p>CSC 196P. Cloud and Mobile Computing Pragmatics. 3 Units Prerequisite(s): CSC 134, CSC 138, and CSC 139</p> <p>Introduction to cloud computing. Cloud services. Deployment options. The installation, configuration, and deployment of a cloud infrastructure based upon industrial standards. Step-by-step cloud setup as well as the development of scripts for automated deployment. The installation, building, deployment, testing, and provisioning of a multi-tier cloud based mobile application as a cloud service.</p>	<p>Database management system (DBMS) architecture; database file organizations and access methods; the relational model and relational algebra; SQL query language; introduction to query optimization; concurrent transaction processing and backup and recovery; applications using embedded SQL, object types, and stored procedures; database analysis and design notations: EER, UML, and XML; web database environments; database security and administration throughout course. Note: Not intended for students who have completed CSC 174.</p>

- CSC 205. Computer Systems Structure. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring
- Overview of computer systems organization and design. Concepts of instruction set architecture, interactions of hardware-software interface, principles of performance analysis, processor design, instruction level parallelism, survey of contemporary architectures, hierarchical memory design and analysis, interfacing I/O devices, parallel processing and multiprocessing, and introduction to EDA tools and methodologies for computer systems design and verification.
- CSC 206. Algorithms And Paradigms. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
- Design and analysis of algorithms. Classical design paradigms including greedy, divide-and-conquer, dynamic programming, and backtracking algorithmic methods. Alternative paradigms of computing including parallel and numerical approaches. Theoretical limits of computation. Selected additional topics such as genetic, approximation, and probabilistic algorithms.
- CSC 209. Research Methodology. 1 Unit**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering, completion of at least 12 units of 200-level courses in Computer Science, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Research methodology, problem formulation, and problem solving. Orientation to the requirements for Master's Thesis or Project. Presentations on various research topics.
 Credit/No Credit
- CSC 212. Bioinformatics: Data Integration and Algorithms. 3 Units**
Prerequisite(s): CSC 130, STAT 50, and graduate status; BIO 10 recommended.
Term Typically Offered: Fall, Spring
- The application of information technology and computer science to biological problems, in particular to biomedical science issues involving genetic sequences. Algorithms and their applications to DNA sequencing and protein database search; tools and techniques for data integration to transform genetic sequencing data into comprehensible information to study biological processes.
- CSC 214. Knowledge-Based Systems. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
- Historical perspective of knowledge-based systems and their relationship to artificial intelligence. Concepts of knowledge representation and automated reasoning. Survey of expert systems in a variety of applications in engineering and other fields. Implementation of expert systems and expert system shells.
- CSC 215. Artificial Intelligence. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring
- Nature of intelligence and possibility of its realization on digital computers via algorithmic and heuristic programming methods. Knowledge representation. Search procedures. Problem-solving paradigms and simulation of cognitive processes. Machine learning. Natural language understanding, expert systems, and knowledge engineering. Image understanding. Future of artificial intelligence and limits of machine intelligence.
- CSC 219. Machine Learning. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.
Term Typically Offered: Fall, Spring
- Introduction to major paradigms and methods of machine learning. Inductive learning, explanation-based learning, classifier systems and genetic algorithms, analogical reasoning, case-based learning, connectionist learning, data driven approaches to empirical discovery, and basis of learning theory. Focus is on representative systems that have been built.
- CSC 230. Software System Engineering. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.
Term Typically Offered: Fall, Spring
- Integration of managerial and technical activities in system engineering that control the cost, schedule, and technical achievement of the developing software system. Application of the principles, activities, tasks and procedures of system engineering and software engineering to the development of a software system.
- CSC 231. Software Engineering Metrics. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
- Software quality and quantity metrics in software engineering. Measurement theory and metrics. Metrics include management metrics, indirect and direct metrics and predictive metrics. Uses of metrics include software cost and schedule estimates, model calibration, and software productivity measurements. Metrics techniques include the Goal-Question-Metric approach, COCOMO, and function point analysis.
- CSC 232. Software Requirements Analysis and Design. 3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
- Software engineering requirements including elicitation, analysis, specification, verification and management. Emphasizes IEEE software engineering requirements and standards and the concept of operations (ConOps) document. Techniques include structured analysis, use cases and object-oriented analysis.

CSC 233. Advanced Software Engineering Project Management.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Advanced methods and procedures for managing a software development project. Includes project planning, scheduling, and cost estimation, project organizational types, staffing and training considerations, leading and motivating computer personnel, and methods for measuring and controlling a project. Emphasizes IEEE software engineering management standards and keys to project success.

CSC 234. Software Verification and Validation.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.**Term Typically Offered:** Fall, Spring

Verification and validation (V & V) techniques to identify and resolve software problems and high-risk issues early in the software lifecycle. Application of V & V to all phases of the lifecycle process. Includes planning and reporting on the V & V effort. Topics also include software quality assurance and software testing.

CSC 235. Software Architecture.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Software architecture styles. Concepts and activities for software architecture design. Notations, models, and specification languages for software architecture design. Engineering discipline and guidance for software architecture design. Techniques, methods, tools for designing, building, analyzing, and evaluating software architecture. Object-oriented approach for software architecture design. Architecture-based software development. Management of software architecture design. Reuse of software architecture design.

CSC 236. Formal Methods in Secure Software Engineering.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Basic concepts of formal methods in secure software engineering; formal methods based software development models and methodologies; formal methods for software system specification, modeling, analysis, verification, information assurance and security; systems and tools for the application of formal methods in secure software engineering; advances of formal methods in secure software engineering.

CSC 237. Microprocessor Systems Architecture.**3 Units****Prerequisite(s):** CSC 205.**Term Typically Offered:** Fall, Spring

Microprocessor/microcomputer architecture and hardware/software interfacing design. RISC v. CISC architecture in-depth, case studies of several popular commercial advanced 32-bit microprocessors. Microcomputer firmware architecture is discussed and illustrated with detailed examples. Term project in which students specify, design and build the hardware and firmware of a computer system.

CSC 238. Human-Computer Interface Design.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Issues involved in design of interaction between people and computers. Insight and experience in key issues of HCI design. Emphasis on identifying issues and tradeoffs in interaction design. Development and evaluation of alternative solutions to design problems.

CSC 239. Advanced Operating Systems Principles and Design.**3 Units****Prerequisite(s):** CSC 205.**Term Typically Offered:** Fall, Spring

Advanced concepts of concurrent processes, concurrent programming and operating systems. Virtual memory management systems, deadlock, file systems, operating system performance measurement and evaluation.

CSC 242. Computer-Aided Systems Design and Verification.**3 Units****Prerequisite(s):** CSC 205 or CSC/EEE 273.**Term Typically Offered:** Fall, Spring

Design and verification methodology using hardware description and verification languages (HDLs). Advances in IC chip design; introduction to HDLs such as System Verilog; HDVL language basics including data types, arrays, structures, unions, procedural blocks, tasks, functions, and interface concepts; design hierarchy; verification planning and productivity; verification infrastructure; guidelines for efficient verification of large designs; assertion-based verification; comprehensive computer-related design projects.

CSC 244. Database System Design.**3 Units****Prerequisite(s):** CSC 174 or CSC 204.**Term Typically Offered:** Fall, Spring

Topics in the design and implementation of database management systems. Database system concepts and architectures; query compiler, query processing algorithms, logical and physical query plans, query optimization; recovery, concurrency control; transaction management in centralized database management systems and distributed database management systems. Also exploration of current research directions, issues, and results related to databases and data management.

CSC 245. Performance Modeling and Evaluation.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Performance and cost measures; software and hardware performance monitors; data reduction and evaluation; analytic and simulation models of hardware and program behavior; performance-cost trade-offs and resource allocation.

CSC 250. Computer Security.**3 Units****Prerequisite(s):** Fully classified graduate standing in Computer Science, Computer Engineering, or Software Engineering.**Term Typically Offered:** Fall, Spring

Principles and technologies behind computer security. Introduction to encryption and decryption; security mechanisms in computer programs, operating systems, databases, and networks; administration of computer security, and legal and ethical issues.

CSC 251. Principles of Compiler Design.**3 Units****Prerequisite(s):** CSC 151 or CSC 201.**Term Typically Offered:** Fall, Spring

Programming language translation, lexical analysis, syntax analysis including LR, LALR, and predictive techniques. Semantic analysis including semantic specification. Code generation and optimization including control and data flow analysis. Storage management. Error detection and recovery.

CSC 252. Cryptography Theory and Practice.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.**Term Typically Offered:** Fall, Spring

Introduction to design and analysis of cryptographic systems. Symmetric cryptography: block ciphers and secure hash functions. Asymmetric cryptography: key exchange and public-key systems. Authentication and encryption in an adversarial model. Simple cryptanalysis. Protocol design and analysis.

CSC 253. Computer Forensics.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.**Term Typically Offered:** Fall, Spring

Structured security incident investigations internal and external; emphasis on analysis of electronic evidence and proper audit; utilization of scientific aids in obtaining information from computing devices; legal electronic evidence.

CSC 254. Network Security.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.**Term Typically Offered:** Fall, Spring

In-depth study of network security problems and discussion of potential solutions. Topics include: network vulnerabilities and attacks, secure communication, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and demonstration of software tools used for network security.

CSC 255. Computer Networks.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science, Software Engineering, or a Computer Engineering.**Term Typically Offered:** Fall, Spring

Computer networking fundamentals with emphasis on higher level protocols and functions. Network design considerations, software design and layering concepts, interface design, routing and congestion control algorithms, internetworking, transport protocol design, and end-to-end communication, session and application protocols. Specific examples of commercial and international standards.

CSC 258. Distributed Systems.**3 Units****Prerequisite(s):** CSC 204 and fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.**Term Typically Offered:** Fall, Spring

Distributed system architectures, distributed object model, component-based design, time and global states, coordination and agreement, distributed transactions and concurrency control, replication, security, distributed multimedia systems, message passing and distributed shared memory, Web services and Service-Oriented Architecture (SOA), Grid computing. Emphasis on scalability, manageability, security, and dependability of distributed systems.

CSC 273. Hierarchical Digital Design Methodology.**3 Units****Prerequisite(s):** CSC 205, CPE 64, or equivalent.**Term Typically Offered:** Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high-level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.

Cross Listed: EEE 273; only one may be counted for credit.

CSC 275. Advanced Data Communication Systems.**3 Units****Prerequisite(s):** Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.**Term Typically Offered:** Fall, Spring

Fundamental concepts, principles and issues of data communication systems. The ISO/OSI reference model is used as a vehicle for discussion and emphasizes the lower layer of the model. Specific topics include: motivation and objectives, layered architectures, physical layer principles and protocols, data link and medium access control principles and protocols, circuit, packet and cell switching, local area network design principles and performance comparisons, high speed networking, introduction to wide area network architectures. Typical examples and standards are cited for point-to-point, satellite, packet radio and local area networks.

CSC 280. Advanced Computer Architecture.**3 Units****Prerequisite(s):** CSC 205 and fully classified graduate status in Computer Science or Software Engineering.**Term Typically Offered:** Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and coarse grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.

Cross Listed: EEE 280; only one may be counted for credit.

CSC 288. Special Topics in Computer Science - Software Engineering.**3 Units****Term Typically Offered:** Fall, Spring

Contemporary topics in computer science will be offered as needed. Topics offered:

CSC 295. Fieldwork.**Term Typically Offered:** Fall, Spring

Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.

Note: Faculty approval required. May be repeated for credit.

Credit/No Credit

CSC 299. Special Problems.**Term Typically Offered:** Fall, Spring

Any properly qualified student who wishes to pursue a problem of his own choice may do so if the proposed subject is acceptable to the member of the staff with whom he/she works and to his/her advisor.

Note: May be repeated for credit.

Credit/No Credit

CSC 500. Master's Thesis.**Prerequisite(s):** CSC 209; advanced to candidacy.**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree.

Note: May be repeated for credit.**CSC 502. Master's Project.****Prerequisite(s):** CSC 209; advanced to candidacy.**Term Typically Offered:** Fall, Spring

Completion of a project approved for the Master's degree.

BS in Computer Science

Units required for Major: 81**Total units required for BS:** 129

Program Description

The Bachelor of Science degree in Computer Science is accredited by the Computing Accreditation Commission (CAC) of ABET, Inc. (<http://www.abet.org>), providing majors with a sound educational base in Computer Science.

Note: Students graduating with a Bachelor of Science Computer Science will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Course Repeat Policy: Please see University Repeat Policy for more information.

Note: Useful information can also be found in the College of Engineering and Computer Science section.

Work Experience: Students may receive a limited amount of academic credit for relevant work experience in Computer Science. There are many opportunities for students to work part-time in the federal, state, and local governments. A significant number of positions in private industry are also available in both well-established and new companies in the Sacramento area. Such work experiences often lead to permanent positions upon graduation.

1 - 3 Units

Pre-Major Requirements

All students are admitted as pre-Computer Science majors. Registration in upper-division courses numbered 133 and above is restricted to Computer Science and Computer Engineering majors. Other students need to obtain approval from the CSC Department Chair.

To change to the Computer Science major, students who have completed the following lower division (pre-major) requirements are required to complete and submit a Change of Major form to the Computer Science Department Office along with transcript copies:

Code	Title	Units
CSC 15	Programming Concepts and Methodology I	3
CSC 20	Programming Concepts and Methodology II	3
CSC 28	Discrete Structures for Computer Science	3
CSC 35	Introduction to Computer Architecture	3
CSC 60	Introduction to Systems Programming in UNIX	3
MATH 26A/30	Calculus I for the Social and Life Sciences	3
MATH 26B/31	Calculus II for the Social and Life Sciences	3

Minimum Grade Requirement

Grade of "C-" or better required in all courses applied to the Computer Science major.

Program Requirements

Code	Title	Units
Required Lower Division Courses (15 Units)		
CSC 15	Programming Concepts and Methodology I	3
CSC 20	Programming Concepts and Methodology II	3
CSC 28	Discrete Structures for Computer Science	3
CSC 35	Introduction to Computer Architecture	3
CSC 60	Introduction to Systems Programming in UNIX	3
Required Mathematics and Science Courses (24 Units)		
MATH 26A	Calculus I for the Social and Life Sciences ¹	3
or MATH 30	Calculus I	
MATH 26B	Calculus II for the Social and Life Sciences	3
or MATH 31	Calculus II	
STAT 50	Introduction to Probability and Statistics	4
or ENGR 115	Statistics For Engineers	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
or PHYS 11A	General Physics: Mechanics	
Select 10 units of the following: ²		10
Any MATH or STAT course with calculus as a prerequisite		
CHEM 1A	General Chemistry I	
CHEM 1E	General Chemistry for Engineering	
CSC 148	Modeling and Experimental Design	
PHIL 160	Deductive Logic II	
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	
PHYS 11B	General Physics: Heat, Light, Sound, Modern Physics ¹	
PHYS 11C	General Physics: Electricity and Magnetism	
PHYS 106	Introduction to Modern Physics	
PHYS 162	Scientific Computing: Basic Methods	

PHYS 163	Scientific Computing: Modeling, Simulation, and Visualization	
Required Upper Division Courses (33 Units)		
CSC 130	Data Structures and Algorithm Analysis	3
CSC 131	Computer Software Engineering	3
CSC 133	Object-Oriented Computer Graphics Programming	3
CSC 134	Database Management Systems	3
CSC 135	Computing Theory and Programming Languages ¹	3
CSC 137	Computer Organization	3
CSC/CPE 138	Computer Networks and Internets	3
CSC 139	Operating System Principles	3
CSC 190	Senior Project: Part I	2
CSC 191	Senior Project-Part II	2
PHIL 103	Business and Computer Ethics ¹	3
Select two units from the following:		2
CSC 192	Career Planning	
CSC 194	Computer Science Seminar	
CSC 195	Fieldwork in Computer Science	
CSC 195A	Professional Practice	
CSC 198	Co-Curricular Activities in Computer Science	
CSC 199	Special Problems	
Electives (9 Units)		
Select 9 units of CSC courses 140 or above excluding the following: ³		9
CSC 192	Career Planning	
CSC 194	Computer Science Seminar	
CSC 195	Fieldwork in Computer Science	
CSC 195A	Professional Practice	
CSC 198	Co-Curricular Activities in Computer Science	
CSC 199	Special Problems	
Total Units		81

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² In addition to the math and science courses (minimum 14 units), students must choose elective courses to bring the total number of math and science units to a minimum of 24.

³ In addition to the required lower-division and upper-division Computer Science courses, Computer Science majors must take additional elective courses, totaling at least nine (9) units, from undergraduate Computer Science courses numbered CSC 140 or above (excluding the listed courses).

Note: To satisfy the requirement of CAC, the Computing Accreditation Commission of ABET, which accredits computer science programs, one or more electives must be from MATH (p. 1361), STAT (p. 1467) or PHIL (p. 1398) (MATH 100 Recommended). Courses may not be selected with significantly overlapping topics. Students who select MATH 26A and MATH 26B for their calculus sequence must take STAT 50 and PHYS 5A. The following are recommended for students considering graduate school or an engineering major:

Code	Title	Units
MATH 30	Calculus I	4
MATH 31	Calculus II	4

PHYS 11A	General Physics: Mechanics	4
PHYS 11C	General Physics: Electricity and Magnetism	4

The following are recommended for students considering a math or statistics minor:

Code	Title	Units
MATH 30	Calculus I	4
MATH 31	Calculus II	4
STAT 50	Introduction to Probability and Statistics	4

The following are recommended for students considering a scientific computing and simulation certificate and willing to take PHYS 163 as an additional course:

Code	Title	Units
Select one of the following:		4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	
PHYS 11B	General Physics: Heat, Light, Sound, Modern Physics	
PHYS 11C	General Physics: Electricity and Magnetism	
PHYS 162	Scientific Computing: Basic Methods	3

If CSC 148 is chosen as an elective to meet the math and science requirements, it cannot be used for a computer science elective. An undergraduate handbook with further course selection advice is available at the department website.

Course choices should be made with advisor consultation. With advance written approval from their advisor, the course instructor, and the Department Chair, students with a GPA of 3.0 or greater may take graduate courses as electives. In any case students must meet the prerequisite stated in the catalog prior to taking any elective course.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ²	0
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9 Units)		
Area D	Area D Course	3

Area D Course	3
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements. ²	0
Area E: Understanding Personal Development (3 Units)	
Area E Course	3
Total Units	36

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

- ² Required in Major; also satisfies GE.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

- ² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>
Note: Students with a declared major of BS in Computer Science are exempt from the Foreign Language Graduation Requirement.

Certificate in Advanced Programs - Graduate

Program Description

The Certificates in Computer Science program are designed to recognize students who have completed the following core graduate courses plus additional advanced coursework in a specialty area.

These certificates are available **only** for MS Computer Science matriculated students.

Note: Minimum required GPA for all courses taken in the program: 3.0

Program Requirements

Code	Title	Units
CSC 201	Programming Language Principles	3
CSC 204	Data Models for Database Management Systems	3
CSC 205	Computer Systems Structure	3
CSC 206	Algorithms And Paradigms	3

Certificate in Computer Architecture - Graduate

Units required for Certificate: 9

Program Description

The Certificates in Computer Science program are designed to recognize students who have completed the following core graduate courses plus additional advanced coursework in a specialty area.

These certificates are available **only** for MS Computer Science matriculated students.

Note: Minimum required GPA for all courses taken in the program: 3.0

Program Requirements

Code	Title	Units
CSC 242	Computer-Aided Systems Design and Verification	3
CSC/EEE 280	Advanced Computer Architecture	3
Select one of the following:		3

Total Units		9

Certificate in Cyber Defense and Operations

Units required for Certificate: 12

Program Description

The Cyber Defense and Operations certificate includes the same courses as the Information Assurance and Security certificate, but additional requires advanced study in operating systems. An understanding of operating system pragmatics better prepares students for the technical work needed in defending and hardening networked computer systems. Students will not be awarded the Information Assurance and Security certificate if they complete the requirements for the Cyber Defense and Operations certificate.

Academic Certificates

In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap

with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Students interested in earning a certificate in addition to their degrees should meet with an academic advisor.

Requirements for Certificates

Certain combinations of courses gives students a deeper understanding of specialized areas in Computer Science. Completion of any of the following course lists entitles the student to receive a certificate indicating that they concentrated their elective study in the particular area. The Computer Science Department will try and offer on a regular basis all courses required for each certificate, but course cancellations and scheduling conflicts do sometimes occur causing students difficulty in completing their desired course study. In such situations, students may need to forgo completion of their certificate. Printed certificates must be requested directly from the Computer Science Department office after a student graduates.

Program Requirements

Code	Title	Units

CSC 212	Bioinformatics: Data Integration and Algorithms	
CSC 244	Database System Design	
Total Units		9

Certificate in Game Engineering

Units required for Certificate: 12

Program Description

This certificate is intended to give students an opportunity to explore the science and engineering of computer games, and to prepare students for careers in those fields of computing which utilize or are heavily impacted by advances in computer gaming. These include such areas as video and strategy game development, 3-D graphics, modeling and animation and their support tools, intelligent decision making, specialized user interface hardware, machine learning, and working in interdisciplinary teams.

Academic Certificates

In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Students interested in earning a certificate in addition to their degrees should meet with an academic advisor.

Total Units		12

Certificate in Information Assurance and Security

Units required for Certificate: 12

Program Description

The Information Assurance and Security certificate is designed to help students advance their technical skills to prepare for a leadership role in planning, managing, certifying and accrediting a security and incident response plan for their organization - including methods to combat threats to organization information resources, which in today's world is becoming top priority for many businesses since most information is in electronic form.

Academic Certificates

In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Students interested in earning a certificate in addition to their degrees should meet with an academic advisor.

Certificate in Software Engineering

Units required for Certificate: 12

Program Description

The Software Engineering certificate is designed to focus on the principles of designing, building, testing and maintaining reliable, efficient, and secure software systems. The certificate is designed to emphasize the knowledge, competencies, and skills needed to produce competent graduates to begin a professional career in the field of software engineering, or pursue graduate programs.

Academic Certificates

In addition to completing the requirements for the Bachelor of Sciences in Computer Science degree program, students enrolled in the major may also complete one of the (optional) 9-12 unit Academic Certificate programs. Each certificate includes 9 required units which can overlap with elective coursework taken to satisfy the major requirements, with some of the certificates requiring 3 additional units (1 additional course) beyond the degree requirements. Certificate in Systems Software

Units required for Certificate: 12

Program Description

The Systems Software Certificate provides necessary background to participate in the development of low-level software for computer hardware and the software infrastructure needed by application developers. Understanding how such software operates makes students valuable additions to interdisciplinary teams where exploiting features of systems tools is important. The certificate will also prepare students to design, implement, and be effective users of systems tools such as language processors, utilities, and diagnostic tools.

Units required for Certificate: 9

Program Description

The Certificates in Computer Science program are designed to recognize students who have completed the following core graduate courses plus additional advanced coursework in a specialty area.

These certificates are available **only** for MS Computer Science matriculated students.

Note: Minimum required GPA for all courses taken in the program: 3.0

Program Requirements

Code	Title	Units
CSC 239	Advanced Operating Systems Principles and Design	3
Select at least two of the following:		6
CSC 245	Performance Modeling and Evaluation	
CSC 250	Computer Security	
CSC 251	Principles of Compiler Design	
CSC 258	Distributed Systems	
CSC 288	Special Topics in Computer Science - Software Engineering	
Total Units		9

Minor in Computer Science

Units required for Minor: 21

Program Description

The Minor in Computer Science is available for students majoring in disciplines other than Computer Engineering.

Admission Requirement

Completion of MATH 29 with a grade of "C-" or better, or passing the ELM at a level qualifying for MATH 30.

Minimum Grade Requirement

Grade of "C-" or better required in all courses applied to the Computer Science minor.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
CSC 15	Programming Concepts and Methodology I	3
CSC 20	Programming Concepts and Methodology II	3
CSC 28	Discrete Structures for Computer Science	3
CSC 130	Data Structures and Algorithm Analysis	3
Electives (9 Units)		
Select 9 units with faculty approval ¹		9
Total Units		21

¹ At least six units must be upper division courses, and only Computer Science courses which are part of the major may be applied to this nine-unit requirement.

Minor in Information Security and Computer Forensics

Units required for Minor: 15

Program Description

The Minor in Information Security and Computer Forensics is available for students majoring in disciplines other than Computer Engineering.

Minimum Grade Requirement

Grade of "C-" or better required in all courses applied to the Computer Science minor.

Program Requirements

Code	Title	Units
Required Courses (15 Units)		
CSC 1	Introduction to Computer Science	3
Select one of the following:		3
CSC 8	Introduction to Internet Technologies	
CSC 8S	Self-Paced Introduction to Internet Technologies	
CSC 80	Web Development with HTML/XHTML and Tools	
Select one of the following:		3
CSC 15	Programming Concepts and Methodology I	
CSC 22	Visual Programming in BASIC	
CSC 25	Introduction to C Programming	
CSC 115	Internet Security	3
CSC 116	Cyber Forensics	3
Total Units		15

MS in Computer Science

Total units required for MS: 30

Program Description

The Computer Science Department offers Master's Degree programs in Computer Science and Software Engineering, Certificates of Advanced Study for students enrolled in the Computer Science program, and a Master's Degree joint program in Computer Engineering.

The primary goal of each of these programs is to prepare students to serve as effective professional computer specialists in a society which increasingly depends on computer usage and technology.

A secondary goal is to prepare interested students for research, teaching, or further study toward the Ph.D. in Computer Science. The programs also enable individuals with background in other areas to obtain the skills and knowledge necessary to enter and advance in employment in computer-related industries.

Completion of the Master of Science in Computer Science requires advanced coursework in a minimum of three of the following areas: computer architecture/computer engineering, database management systems, information assurance and security, intelligent systems, networks and communications, software engineering, and systems software.

Teaching associateships are occasionally available for qualified graduate students; these students assist in instruction of undergraduate courses, supervision of laboratory work, and aid faculty members in research projects. Interested persons should apply in the Department office.

Due to the large number of graduate students in Computer Science who are employed, most graduate level courses are offered in the late afternoon or evening.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- GRE general test;
- mathematical preparation including two semesters of calculus and one semester of calculus-based probability and statistics corresponding to Sacramento State courses:

Code	Title	Units
MATH 30	Calculus I	4
MATH 31	Calculus II	4
STAT 50	Introduction to Probability and Statistics	4

- Computer Science lower-division preparation including programming proficiency, discrete structures, machine organization, and UNIX and PC-based program development environment proficiency corresponding to Sacramento State courses (see the following) and as evidenced by a pass on the graduate student placement test or a baccalaureate degree in Computer Science;

Code	Title	Units
CSC 15	Programming Concepts and Methodology I	3
CSC 20	Programming Concepts and Methodology II	3
CSC 28	Discrete Structures for Computer Science	3
CSC 35	Introduction to Computer Architecture	3
CSC 60	Introduction to Systems Programming in UNIX	3

- Computer Science advanced preparation as evidenced by a 3.25 GPA in the following Sacramento State upper division Computer Science courses or their equivalent elsewhere:

Code	Title	Units
CSC 130	Data Structures and Algorithm Analysis	3
CSC 131	Computer Software Engineering	3
CSC 132	Computing Theory	3
CSC 134	Database Management Systems	3
CSC 137	Computer Organization	3
CSC/CPE 138	Computer Networks and Internets	3
CSC 139	Operating System Principles	3

Applicants with deficiencies in the admission requirements area are advised to remove any such deficiencies before applying.

Admission Procedures

Applicants must complete a university application and a separate departmental application by the posted application deadline dates for the term applying. *For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>):*

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- official GRE general test scores.

Minimum Units and Grade Requirement for the Degree

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. No grade below "C" may count toward the degree.

Note: Only those courses completed within seven years prior to date of graduation will satisfy course requirements.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of graduate level (200 series) Computer Science courses with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Students must have been advanced to candidacy before they can register for Master's thesis or project. Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Computer Science graduate advisor. The completed form must be signed by the Graduate Coordinator or the Department Chair and is then returned to the Office of Graduate Studies for approval.

Program Requirements

Code	Title	Units

Restricted Electives (3-6 Units)		
Select 3-6 units ²		3 - 6
Culminating Requirement (2-5 Units)		
Select one of the following:		2 - 5
CSC 500	Master's Thesis ³	
CSC 502	Master's Project ³	
Total Units		30-33

¹ Students whose undergraduate preparation has covered a significant amount of the material in CSC 204 or CSC 205 may be given a waiver by the Department from taking one or more of these courses. In this case, for each course waived with department approval, the student must take three additional units of Restricted Electives.

² Prior to taking an elective course, students must obtain approval from their advisor, and either the Graduate Coordinator or the Department Chair.

Students should choose their electives according to the following guidelines:

1. One of the following upper division courses: CSC 148, CSC 155, CSC 159/CPE 159, CSC 165, CSC 176, CSC 177 as long as they have not been used towards another degree. (A maximum of 6 undergraduate units may be used in any graduate program.)
2. Any 200-level CSC courses not already used to satisfy the Breadth Requirement, with the exception of CSC 295 and CSC 299. Students not required to take CSC 204 or CSC 205 must, for each course waived, take an additional three units in this category.
3. Related 200-level courses from outside the Computer Science Department may only be taken with prior department approval and may not have been used in another program.

³ Students are required to make an oral presentation of their master's project or conduct an oral defense of their master's thesis. The recommended department-level deadline in each semester for submitting an MS project or thesis signed by the committee chair and its members to the Graduate Coordinator's office is 10 weekdays prior to the University deadline.

MS in Software Engineering

Total units required for MS: 30

Program Description

This degree provides the student with the ability to specialize in the application of software engineering principles to the development of large and complex computer systems.

The program's courses are structured to satisfy two groups of students:

1. those pursuing an MSE degree and
2. those interested in individual courses.

Individuals wishing to pursue a degree must satisfy the Computer Science graduate program entrance requirements. Those enrolling in individual courses must have an undergraduate degree in Computer Science (or related field) or a minimum of one-year's work experience involving some aspect of software engineering.

The MS Degree in Software Engineering offers, in addition to a core curriculum, advanced studies in the software engineering area. This program covers the entire software application development process from problem definition through requirements, design, implementation, testing, operation, and maintenance.

Teaching associateships are occasionally available for qualified graduate students; these students assist in instruction of undergraduate courses, supervision of laboratory work, and aid faculty members in research projects. Interested persons should apply in the Department office.

Admission Requirements

Admission as a classified graduate student requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- GRE general test;
- mathematical preparation including two semesters of calculus and one semester of calculus-based probability and statistics corresponding to Sacramento State courses:

Code	Title	Units
MATH 30	Calculus I	4
MATH 31	Calculus II	4
STAT 50	Introduction to Probability and Statistics	4

- Computer Science lower-division preparation including programming proficiency, discrete structures, machine organization, and UNIX and PC-based program development environment proficiency corresponding to Sacramento State courses (see the following) and as evidenced by a pass on the graduate student placement test or a baccalaureate degree in Computer Science;

Code	Title	Units

Construction Management

College of Engineering and Computer Science

Program Description

The Sacramento State University Construction Management degree prepares students for managerial positions with contractors and other organizations involved in the construction process. For a graduate, this preparation can combine with experience and lead to recognition as a

construction professional, a Constructor. The construction professional is responsible for the execution of construction work, for the creation of completed projects from plans prepared by design professionals such as architects and engineers. What is to be built is defined by design professionals; how the work is to be accomplished is the concern of the Constructor. A Constructor determines the methods to be used and directs the economical application of resources in the construction of timely and safe projects at satisfactory prices, and to the required standards of quality.

The immediate objective of the program is to provide university-level preparation for managerial positions in construction and a foundation for continued learning. The curriculum emphasizes subject areas that are significant to the Constructor: engineering fundamentals, construction management, business administration, humanities and social sciences, and the development of analytical and communication skills.

Degree Program

BS in Construction Management with a Minor in Business Administration (p. 565)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Construction Management is also individually accredited by the American Council for Construction Education.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

To meet the objectives of this specialized professional program, the Construction Management curriculum consists of four distinct components:

Engineering: Based in sciences and mathematics, this component stresses engineering principles and their application to the construction process. This component provides sound engineering fundamentals.

Construction Management: This component utilizes the functional approach as a framework for studying the management of the construction process. In the individual courses, construction activities are analyzed from a managerial viewpoint and the functions of management are stressed.

Business Administration Courses: Business courses form the third component and reinforce the program's management emphasis. A minor in Business Administration is obtained by combining the required lower and upper division business courses. Furthermore, completing the minor

requirements can satisfy many of the core requirements of the graduate program in Business Administration at Sacramento State.

General Education Courses: The fourth component is critical to the success of construction students who must be sensitive to the issues driving contemporary society.

- This unique program is accredited by the American Council for Construction Education (ACCE).

Academic Policies and Procedures

The following is a summary of policies and procedures specific to the Construction Management program. Other university policies and procedures in this catalog also apply to Construction Management majors. The Department will not hear petitions for deviation from articulated policies made by students who disregard catalog policy.

- Most Construction Management courses require a grade of "C-" or better.
- **Course Repeat Policy:** Undergraduate Construction Management courses that are used to meet the degree requirements for the Bachelor of Science degree in Construction Management may be repeated only twice (for a total of three attempts). Grades of the second and third attempt will be averaged in grade point calculations.

Career Possibilities

Construction Manager · General Contractor · Sub-Contractor · Project Manager · Construction Estimator · Technical Salesperson · Construction Scheduler or Planner · Forensic Construction Specialist · Environmental Remediation Contractor · Construction Consultant

ANDERSON, MIKAEL

FIGGESS, GARETH

HANSEN, KAREN L.

SALAMA, TAREK

CM 9. Construction Surveying and Layout. 3 Units

Prerequisite(s): CM 10, CM 20, CM 21 and either Math 26A or MATH 30 ; CM 21 and Math 26A or MATH 30 may be taken concurrently.

Corequisite(s): CM 21.

Term Typically Offered: Fall, Spring

Geomatics and the principles of surveying measurements for distance, direction, and elevation. Special emphasis on the application of surveying skills relevant to the field of construction, including building, bridge, and sitework layout techniques and procedures, establishment of reference line and grade, topographic mapping, and earthwork computations. Lecture two hours. Laboratory 3 hours.

CM 10. The Construction Industry. 1 Unit

Term Typically Offered: Fall, Spring

Introduction to the Construction Management program and the many facets of the construction industry and to the various career opportunities. The unique products of construction, the organizations involved, and the people that make it happen. Guest speakers. Lecture one hour.

Credit/No Credit

CM 15. Fundamentals of Construction Management. 3 Units

Prerequisite(s): CM 10. CM 10 may be taken concurrently.

Term Typically Offered: Fall, Spring

Introduction to the Construction Management program and industry. Critical reading, thinking and writing for the construction profession. Introduction to visualization and graphic communication using both manual and computer assisted techniques. Introduction to quantitative software commonly used in the construction industry.

CM 20. Construction Materials and Processes. 3 Units

Prerequisite(s): CM 10, ENGL 1A; CM 10 may be taken concurrently.

Term Typically Offered: Spring only

Introduction to construction materials; to their properties in-place in completed projects, and to their characteristics that affect construction processes. The organizations, methods, equipment and safety considerations that are common to projects of all types and to all segments of the industry. Field trips. Lecture two hours; laboratory three hours.

Field trip(s) may be required.

CM 21. Construction Graphics. 3 Units

Prerequisite(s): ENGL 1A and CM 10; CM 10 may be taken concurrently.

Term Typically Offered: Fall only

Instruction and exercises in graphic techniques and procedures applicable to construction. Analysis of drawings in the civil, architectural, structural, mechanical, and electrical fields and how drawings affect construction planning. Freehand sketching. Isometric and oblique projections. Material quantity surveying. Lecture two hours; laboratory three hours.

CM 22. Construction Documents. 3 Units

Prerequisite(s): ENGL 1A, CM 20, and CM 21; CM 20 may be taken concurrently.

Term Typically Offered: Spring only

Analyzes construction contract documents. Technical and legal interpretations and implications to managers of the construction process. Quantity surveying. Lecture two hours; laboratory three hours.

CM 30. Engineering Mechanics--Statics. 3 Units

Prerequisite(s): MATH 26A or MATH 30; and PSYC 5A or PSYC 11A.

Term Typically Offered: Spring only

Introduction to the solution of engineering design problems. Concepts of units, vectors, equilibrium, forces, force systems, shear and moment diagrams. Lecture three hours.

- CM 40. Properties of Construction Materials.** **3 Units**
Prerequisite(s): PHYS 5A.
Term Typically Offered: Fall only
- Study of the engineering performance characteristics of materials. Covers testing concepts and procedures. Includes basic properties of metals, aggregates, cements, concrete, timber, asphalt, masonry and plastics with emphasis on construction applications. Lecture two hours; laboratory three hours.
- CM 110. Legal Aspects of Construction.** **3 Units**
Prerequisite(s): Senior class standing, MGMT 101, CM 22.
Corequisite(s): CM 126
Term Typically Offered: Fall only
- Application of advanced legal concepts to the construction process. Analyzes problems relating to contract formation, administration, and interpretation. Includes bidding and contract enforcement; litigation of disputes vs. arbitration; liability for negligence, warranty, and strict liability; safety; license law requirements; mechanics' liens and stop notices; bond rights and obligations. Lecture three hours.
- CM 111. Construction Labor Relations.** **3 Units**
Term Typically Offered: Spring only
- Study of federal and state labor law; labor unions, and their importance in the construction industry; and an analysis of the growth of open-shop construction. Employment law. Lecture three hours.
- CM 120. Construction Operations and Methods Analysis.** **3 Units**
Prerequisite(s): CM 22.
Corequisite(s): CM 121.
Term Typically Offered: Fall only
- Introduction to the analysis and management of construction projects in terms of the work that must be performed in the construction process. Analyzes operations and methods using concepts and techniques, including video, that are applicable to all types of projects in all segments of the industry, variables affecting productivity. Safety as an integral part of project and operations management. Field trips. Lecture two hours; laboratory three hours.
Field trip(s) may be required.
- CM 121. Fundamentals of Construction Estimating.** **3 Units**
Prerequisite(s): CM 22.
Corequisite(s): CM 120.
Term Typically Offered: Fall only
- Study of the basic approaches to estimating the cost of construction projects from a managerial viewpoint. Types of estimates and methods; elements of cost, variables and costing concepts; analysis procedures for detailed estimates. Lecture two hours; laboratory three hours.
- CM 124. Engineering Construction.** **3 Units**
Prerequisite(s): CM 125, CM 135.
Term Typically Offered: Fall only
- Study of engineering construction projects with emphasis on equipment-paced operations including safety aspects. Engineering fundamentals and other factors that affect equipment selection and production. Amplification of recording and analysis techniques. Unit price contracts. Field trips. Lecture two hours; laboratory three hours.
Field trip(s) may be required.
- CM 125. Advanced Estimating and Bidding.** **3 Units**
Prerequisite(s): CM 120, CM 121.
Term Typically Offered: Spring only
- Study of the concepts and practices involved in the total estimating and bidding process in construction, from initial project selection to submission of final bids. Covers considerations in project selection, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each student. Lecture two hours; laboratory three hours.
- CM 126. Construction Project Management.** **3 Units**
Prerequisite(s): CM 125, CM 127.
Corequisite(s): CM 110.
Term Typically Offered: Fall only
- Introduction to the study of Project Management as it is used on the larger construction project. Students study how construction contractors manage cost, time, scope, and quality. The theory of Project Management is developed and compared to management of the on-going business enterprise. Matrix and functional organizations are examined within the context of the industrial, commercial and heavy contract construction industries using the principles of the management process. Lecture three hours.
- CM 127. Planning, Scheduling and Control.** **3 Units**
Prerequisite(s): CM 121.
Term Typically Offered: Spring only
- Study of the concepts used in planning and controlling construction projects. Arrow, PERT, precedence, and linear scheduling methods; resource leveling; time-cost analysis; bar charts; and time-scaled diagrams. Manual procedures followed by computer applications. Lecture three hours.
- CM 129. Senior Project.** **3 Units**
Prerequisite(s): CM 110, CM 111, CM 124, CM 126, HROB 101.
Term Typically Offered: Spring only
- Consideration of technical, legal, business and human factors (including safety) in applying the functional approach to the management of construction organizations, projects, and operations. The individual construction professional in a competitive industry: personal and professional development, ethics, stress, physical and mental health. The industry and the construction professional in relation to the social and physical environments. Lecture three hours.
- CM 130. Structures I -- Design Principles and Structural Steel Design.** **3 Units**
Prerequisite(s): CM 30, CM 40; CM 40 may be taken concurrently.
Term Typically Offered: Fall only
- Introduction to structural design. Consideration of load conditions, stresses, strain, beam deflection and column action. Basic design of structural steel members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Lecture three hours.

CM 135. Soils and Foundations.**3 Units****Prerequisite(s):** CM 130.**Term Typically Offered:** Spring only

Study of the properties and behaviors of soils used as materials in construction. Index and physical properties of soils including compaction; permeability, compressibility, and shear strength. Methods of laboratory and field tests. Principles of foundation design, pavements, embankments and temporary soil support systems for trenches and cuts. Lecture two hours; laboratory three hours.

CM 136. Principles of Mechanical and Electrical Engineering.**3 Units****Prerequisite(s):** PHYS 5B, CM 30.**Term Typically Offered:** Fall only

Basic principles of thermodynamics with application to heating, ventilating and air conditioning systems. Introduction to electrical circuits and circuit analysis with construction applications. Lecture three hours.

CM 140. Structures II -- Timber and Formwork Design.**3 Units****Prerequisite(s):** CM 130.**Term Typically Offered:** Spring only

Basic design of structural timber members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Application of engineering principles to satisfy construction requirements that are not designed or shown in typical construction documents. Includes analysis and design of concrete form systems, shoring, and falsework, and construction dewatering. Lecture three hours.

CM 150. Structures III -- Reinforced Concrete and Reinforced Masonry.**3 Units****Prerequisite(s):** CM 130.**Term Typically Offered:** Fall only

Basic design concepts of reinforced concrete and reinforced masonry design. Topics and examples include design of beams, slabs, columns and walls. Students are required to demonstrate drafting ability. Assignments include design and drawings of various structural systems. Lecture three hours.

CM 199. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

Note: Open only to students competent to carry on individual work. Admission to this course requires approval of an instructor and the program coordinator.

Credit/No Credit

BS in Construction Management

Units required for Major: 105 (includes units required for Minor in Business Administration)

Total units required for BS: 134

Program Description

The Sacramento State University Construction Management degree prepares students for managerial positions with contractors and other organizations involved in the construction process. For a graduate, this preparation can combine with experience and lead to recognition as a construction professional, a Constructor. The construction professional

is responsible for the execution of construction work, for the creation of completed projects from plans prepared by design professionals such as architects and engineers. What is to be built is defined by design professionals; how the work is to be accomplished is the concern of the Constructor. A Constructor determines the methods to be used and directs the economical application of resources in the construction of timely and safe projects at satisfactory prices, and to the required standards of quality.

The immediate objective of the program is to provide university-level preparation for managerial positions in construction and a foundation for continued learning. The curriculum emphasizes subject areas that are significant to the Constructor: engineering fundamentals, construction management, business administration, humanities and social sciences, and the development of analytical and communication skills.

Note: Students graduating with a BS in Construction Management will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Note: Students graduating with a BS in Construction Management consecutively earn a Minor in Business Administration.

FIN 101	Business Finance	
MKTG 101	Principles Of Marketing	
OPM 101	Operations Management	
Total Units		105

¹ Course also satisfies General Education (GE)/Graduation Requirement. For the degree, students must satisfy all the University's General Education requirements for Construction Management. Students should contact the program office for a complete list of these requirements. A second year foreign language course (2A or equivalent) may also satisfy 3 units of GE when the course is being taken to comply with the Sacramento State foreign language requirement. Students should consult with an advisor for exact GE eligibility of these courses.

² All majors and pre-majors shall demonstrate computer literacy and competency prior to taking 100-level construction management or business courses. This requirement is met by passing scores on examinations as administered by the College of Business Administration in each of the following areas:

- Basic understanding and manipulation skills for operating system, Email system, and browser (covered in MIS 1);
- Basic facility with spreadsheets using the College of Business Administration's standard spreadsheet package (covered in MIS 2);
- Word processing and presentation graphics (covered in MIS 3).

³ Upper division Construction Management courses are open only to students who have satisfactorily completed all required lower division preparation and have been admitted to the major.

Notes:

- High school chemistry (one year), mechanical drawing (one year), and trigonometry (one-half year) also required. Students without this high school preparation must take the necessary courses in addition to those listed above.
- The recommended course sequence may change. Students should consult the Construction Management program for current information.

Business Administration lower and upper division courses apply both to the major and to a Business Administration minor. Students interested in pursuing a pre-MBA sequence should contact the Degree Program Center in the College of Business Administration.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (6 Units)		
Area D Course		3
Area D Course		3
Area D Course ²		0
Area D Course - Take upper-division course to complete Area & upper division requirements. ²		0
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		33

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (6 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI) ²		0
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ³		0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Construction Management are exempt from the Foreign Language Graduation Requirement.

Electrical and Electronic Engineering

College of Engineering and Computer Science

Program Description

Electrical Engineers design systems that generate, transmit and distribute electricity. Electronic engineers design electronic devices which perform computation, communication, or control of robots and machines. Electrical and electronic engineers work with technologies ranging from large power lines and generators to tiny integrated circuits containing billions of transistors.

The Department of Electrical and Electronic Engineering offers a Bachelor of Science (BS) in Electrical and Electronic Engineering. The Department also offers a Master of Science degree in Electrical and Electronic Engineering, with the following focus areas: control systems, power systems, communication systems, microelectronic design, and computer architecture & digital design.

Students receive a thorough grounding in mathematics and the basic sciences during their first four semesters. Engineering design and applications are stressed in the final four semesters. Prospective students are urged to discuss their plans as early as possible with their high school or community college counselor and with the Electrical and Electronic Engineering Department Chair who will advise students individually.

Degree Programs

BS in Electrical and Electronic Engineering (p. 577)

MS in Electrical and Electronic Engineering (p. 579)

Certificate in Mixed-Signal Integrated Circuit Design (p. 579)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Electrical and Electronic Engineering is also individually accredited by ABET, Inc.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled

by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The BS degree in Electrical and Electronic Engineering is accredited by the Engineering Accreditation Commission (EAC) of ABET, <http://www.abet.org>
- The major strengths of the Electrical and Electronic Engineering program lie in its faculty, whose industrial experience equips them to relate theory to practice and prepare students for the profession or for graduate study.
- The Department has outstanding laboratory facilities to provide hands-on instruction.
- A Committee of power industry leaders from throughout the State is a source of advice and assistance to the Department regarding the preparation of students for careers in power engineering.
- The EEE Department Industry Liaison Council (ILC) consists of industry professionals representing various disciplines within electrical and electronic engineering. The ILC provides feedback on program direction and our outcomes assessment efforts. The ILC is active in providing professional development opportunities for our faculty.
- The Department has a strong IEEE Student Branch. It is among the most active student chapters in the Sacramento Section of IEEE. The student branch has an elected core of officers, who plan and execute the programs of the chapter in consultation with the branch faculty advisor. The primary purpose of the student branch is to develop professional awareness among the students and provide them with opportunities to expand their leadership and communication skills.

Program Educational Objectives

The Electrical and Electronic Engineering Program has developed a set of Program Educational Objectives. These statements describe what the faculty is preparing the students to achieve within a few years after graduation:

- Core Knowledge: Our graduates will have active careers in Electrical and Electronic engineering, or be actively engaged in a related career path.
- Application of Knowledge: Our graduates will apply their knowledge and skills to solve practical engineering problems.
- Professionalism: Our graduates will demonstrate the professional skills, such as high ethical standards, effective oral and written communications, and teamwork, necessary to be productive engineers and to advance in their careers.
- Life-long Learning: Our graduates will continue to develop their skills and seek knowledge after graduation in order to adapt to advancing technology and the needs of society. This may be indicated by the graduate's pursuit of an advanced degree or other formal instruction, and/or that the graduate has developed a professional specialty.

EEE 64. Introduction to Logic Design. 4 Units
Prerequisite(s): CSC 15 or CSC 25 or ENGR 50
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented.
 Cross Listed: CPE 64; only one may be counted for credit.

EEE 64W. Introduction to Logic Design Workshop. 1 Unit
Corequisite(s): EEE 64.
Term Typically Offered: Fall, Spring

Assists students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours. Lecture three hours; laboratory three hours.
 Cross Listed: CPE 64W; only one may be counted for credit.

Credit/No Credit

EEE 108. Electronics I. 3 Units
Prerequisite(s): EEE 117.
Corequisite(s): EEE 108L.
Term Typically Offered: Fall, Spring, Summer

Introduction to electronics, ideal OP-AMPS, BJTs, FETs, DC biasing, VI characteristics, single stage amplifiers, low frequency small signal models, power supplies and voltage regulation. PSPICE required.

EEE 108L. Electronics I Laboratory. 1 Unit
Prerequisite(s): EEE 117, EEE 117L.
Corequisite(s): EEE 108.
Term Typically Offered: Fall, Spring, Summer

Characteristics and applications of OP-AMPS, rectifiers, BJTs and FETs. Introduction to GPIB, PSPICE and LabVIEW. Laboratory three hours.

EEE 109. Electronics II. 4 Units
Prerequisite(s): EEE 108, EEE 108L, EEE 117, EEE 117L; and)GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring, Summer

Differential and multistage amplifiers, high frequency models (BJTs and FETs), feedback and sensitivity, power amplifiers, oscillators and waveform shaping circuits. Advanced use of PSPICE. Lecture three hours; laboratory three hours.

EEE 110. Advanced Analog Integrated Circuits. 3 Units
Prerequisite(s): EEE 109 or consent of instructor.
Term Typically Offered: Fall only

The use of operational amplifiers in circuit designs for applications such as filtering, switched capacitor design, sample and hold design, instrumentation amplifiers, and voltage reference circuitry will be explored, as well as topics in Feedback Theory.

EEE 111. Advanced Analog Integrated Circuits Laboratory. 1 Unit
Prerequisite(s): EEE 109; either EEE 110 or EEE 230. EEE 110 or EEE 230 may be taken concurrently.
Term Typically Offered: Fall only

Circuit design, mask design, and simulation of integrated circuitry. Use of CAD software to prepare design for fabrication. Individual and group design projects. Laboratory three hours.

EEE 117. Network Analysis. 3 Units
Prerequisite(s): ENGR 17, MATH 45, and PHYS 11C
Corequisite(s): EEE 117L.
Term Typically Offered: Fall, Spring, Summer

Review of sinusoidal steady state, phasors, complex power, three phase power, mutual inductance, series and parallel resonance. Introduction to application of Laplace transforms in network analysis, transfer functions, Bode plots, Fourier series, two-port circuits.

EEE 117L. Networks Analysis Laboratory. 1 Unit
Corequisite(s): EEE 117.
Term Typically Offered: Fall, Spring, Summer

Introduces fundamental laboratory techniques while demonstrating the concepts introduced in the EEE 117 lecture. The computer simulation language PSPICE is introduced and applied. Laboratory three hours.

- EEE 120. Electronic Instrumentation.** **4 Units**
Prerequisite(s): EEE 108, EEE 117; EEE 108 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Fundamental principles of sensors and instrumentation systems, together with their electrical implementation, such as biasing and signal conditioning circuits. Temperature, force, pressure, and mechanical sensors. Optical sensors, including a brief introduction to light sources and detectors. Applications to biomedical engineering and industrial control. Lecture three hours; laboratory three hours.
- EEE 122. Applied Digital Signal Processing.** **3 Units**
Prerequisite(s): EEE 117, EEE 180.
Term Typically Offered: Fall only
- Application of digital signal processing to biomedical signals. Origin and characteristics of biomedical signals and contaminations. Preparation of biomedical signals for processing, including sensors, amplification, filtering, sampling, and quantization. Time-domain processing, including peak and zero-crossing detection, time interval measurement, peak height, and moving average estimates of mean and root mean square value. Frequency domain processing, including filtering to separate biomedical signal components and spectrum estimation. Joint time-frequency analysis.
- EEE 130. Electromechanical Conversion.** **3 Units**
Prerequisite(s): EEE 117 and EEE 161
Term Typically Offered: Fall, Spring, Summer
- Magnetic circuits and principles of electromechanical energy conversion, transformers, DC machines, asynchronous AC machines, synchronous AC machines, introduction to special machines.
- EEE 131. Electromechanics Laboratory.** **1 Unit**
Prerequisite(s): EEE 117, EEE 130 (EEE 130 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Direct current motor and generator characteristics, three phase synchronous motor and synchronous generator characteristics, single phase power transformer short circuit and no-load tests, frequency changer tests and tests on DC and AC machine models, potential and current transformers.
- EEE 135. Renewable Electrical Energy Sources and Grid Integration.** **3 Units**
Prerequisite(s): EEE 130.
Term Typically Offered: Fall, Spring
- The study of existing sources of renewable electric energy such as wind, solar, geothermal, hydro, tidal, wave power, and biomass. Emphasis on wind and solar energy sources and their integration into the electric power grid. Various energy storage methods to accommodate the intermittent nature of these resources. Economic constraints, environmental benefits and institutional regulations.
- EEE 136. Smart Electric Power Grid.** **3 Units**
Corequisite(s): EEE 142 or EEE 144.
Term Typically Offered: Spring only
- Smart grid to enhance reliability, security, robustness and efficiency of transmission and distribution systems. Integration of renewable energy sources and distributed generation. Energy storage systems. Advanced metering infrastructure, home-area networks, micro-grids, real-time pricing, plug-in hybrid vehicles, demand response, load curve sharing. Control, monitoring and protection grid; SCADA systems. Voltage and load frequency control to ensure balance. Enabling active participation of consumer. Anticipating and responding to system disturbance in self healing manner. Providing power quality for digital systems needs.
- EEE 137. Applications of Power Electronics in Power Systems.** **3 Units**
Prerequisite(s): EEE 130 and EEE 141
Term Typically Offered: Spring only
- Analysis methods for power electronics. Power electronic devices and their control methodologies. Electric machinery drives and flexible alternating current transmission systems (FACTS) devices simulation of cases relevant to applications of power electronics in power systems.
- EEE 141. Power System Analysis I.** **3 Units**
Prerequisite(s): EEE 117 and EEE 161
Term Typically Offered: Fall, Spring, Summer
- Characteristics of power system components. Transmission line parameters and the steady state performance of transmission lines. Introduction to solutions of linear and nonlinear algebraic equations using Gauss, Gauss-Seidel, and Newton-Raphson techniques. Introduction to power flow analysis.
- EEE 142. Power System Analysis II.** **3 Units**
Prerequisite(s): EEE 130, EEE 141, and EEE 184
Term Typically Offered: Fall, Spring
- Review of the fundamentals in electric energy systems; power flow analysis, disturbance of normal operating conditions, symmetrical components and sequence impedances, analysis of balanced and unbalanced faults; a brief review of protection systems; optimum allocation and dispatching of generators; dynamic system control; introduction to stability studies. Students in the course will use MATLAB to solve problems.
- EEE 143. Power System Laboratory.** **1 Unit**
Prerequisite(s): EEE 130, EEE 141, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Simulation of three phase operations and transmission line operation including voltage regulation, efficiency of long lines, power system stability, voltage control and load-frequency control, load flow and optimal dispatch for simplified interconnected systems.
- EEE 144. Electric Power Distribution.** **3 Units**
Prerequisite(s): EEE 130.
Term Typically Offered: Fall, Spring
- Operation and design of utility and industrial distribution systems including distribution system planning; load characteristics; application of distribution transformers; design of subtransmission lines, distribution substations, primary systems, secondary systems; application of capacitors; voltage regulation and reliability.

EEE 145. Power System Relay Protection and Laboratory. 4 Units
Prerequisite(s): EEE 141
Term Typically Offered: Fall only

Principles of protective relaying (classical and modern), current and voltage transformers, setting and testing or relaying elements, including differential, impedance, over/under current, voltage, and frequency relay types and/or elements, and their applications in protection of power system elements, including lines, generators, transformers, motors, and buses. Lecture 3 hours; laboratory 3 hours.

EEE 146. Power Electronics Controlled Drives. 3 Units
Prerequisite(s): EEE 108, EEE 130.
Term Typically Offered: Spring only

Review thyristors, controlled rectifiers, DC choppers and inverters and pulse width modulation methods including space vector method. Control of DC drives and methods of control of induction synchronous motors including flux-vector methods and computer simulations will be studied.

EEE 147. Power System Operation and Control Laboratory. 1 Unit
Prerequisite(s): EEE 141.
Term Typically Offered: Fall, Spring

Computer simulation methods to describe power system behavior under steady state and dynamic conditions. Experiments conducted using MATLAB and Simulink for load flow in distribution lines, optimal power dispatch, synchronous machine transient behavior under short circuit conditions, transient stability, voltage and reactive power control, classical and modern load frequency control. Laboratory three hours.

EEE 148. Power Electronics Laboratory. 1 Unit
Prerequisite(s): EEE 146; may be taken concurrently.
Term Typically Offered: Spring only

Solid state applications in power control. Diodes, rectifiers (single state and three phase), thyristors. Principle of phase controlled rectification, single phase and three phase converters. Power factor improvement. Three phase Pulse Width Modulation (PWM). AC voltage controllers. SPICE modeling. Strong design emphasis. EMTP modeling. LabView graphics simulation. Microprocessor control of power electronics systems. UPS systems, power supplies, power quality monitoring.

EEE 161. Applied Electromagnetics. 4 Units
Prerequisite(s): MATH 32, MATH 45, PHYS 11C, ENGR 17, and CSC 25.
Term Typically Offered: Fall, Spring, Summer

Review of vector calculus. Electrostatic fields from lines, surface and volume charges by Coulomb's law, Gauss' law, Laplace's and Poisson's equations. Capacitance. Magnetostatic field calculations using Biot-Savart's law and Ampere's law. Inductance. Forces on moving charges. Magnetic materials. Electric and magnetic energy in fields. Faraday's law. Ideal transformer. Moving conductor in time-varying magnetic field. Displacement current. Charge-current continuity relation. Transmission line analysis, characteristic impedance, reflection coefficient and standing wave concepts. Introduction to Smith Chart solutions to matching problems.

EEE 162. Applied Wave Propagation. 3 Units
Prerequisite(s): EEE 117, EEE 161.
Term Typically Offered: Fall only

Review of distributed circuit theory and the Smith chart. Impedance matching using series or shunt lumped and distributed circuits or near-quarterwave-matching sections. Noise temperature and noise figure. Scattering coefficient characterization of two-ports. Stability circles for high frequency transistors. Constant gain and noise figure circles. Basic antenna theory. Illustrated by their use for cell phones and other wireless systems.

EEE 163. Traveling Waves Laboratory. 1 Unit
Prerequisite(s): EEE 117, EEE 162 (EEE 162 may be taken concurrently), and (WPJ score of 70+, or at least a C- in ENGL 109M/W)
Term Typically Offered: Fall only

Selected experiments in the transmission and reflection of waves in coaxial lines and waveguides. Antenna impedance and pattern measurements. Laboratory three hours.

EEE 165. Introduction To Optical Engineering. 3 Units
Prerequisite(s): EEE 161, EEE 180, EEE 185; EEE 185 may be taken concurrently.
Term Typically Offered: Fall, Spring

Generation, propagation and detection of light. Fresnel equations, Snells law, diffraction, polarization and interference. Operating principles of LEDs, lasers, photodiodes and optical fibers. Introduction to optical communications systems, integrated optical devices, and optical instrumentation.

EEE 166. Physical Electronics. 3 Units
Prerequisite(s): EEE 108 and CHEM 1E or CHEM 1A
Term Typically Offered: Spring only

Semiconductor physics, atomic models and crystal structures. Quantum theory, energy bands, motion of charge carriers, minority/majority carrier profiles and pn junctions. Manufacturing processes for and operating characteristics of diodes, bipolar transistors and field effect devices.

EEE 167. Electro-Optical Engineering Lab. 1 Unit
Prerequisite(s): EEE 161, EEE 180, EEE 165; EEE 165 may be taken concurrently, and (WPJ score of 70+, or at least a C- in ENGL 109 M/W)
Term Typically Offered: Fall, Spring

Provides senior level undergraduates with hands-on experience in optical engineering and design. Experiments involving laser characteristics, spectral radiometry, diffraction, polarization, modulation of light, holography and spatial filtering will be performed. Laboratory three hours.

EEE 174. Introduction to Microprocessors. 4 Units
Prerequisite(s): Junior status, EEE 64.
Term Typically Offered: Fall, Spring, Summer

Topics include: microcomputer systems, microprocessor architecture, machine and assembly language programming, timing operations, bus arbitration and exception processing logic, addressing modes, parallel and serial ports, memory, assemblers and development systems. The lab uses development systems and target systems in the Computer Engineering laboratory to assemble, link, test and debug and run various assignments. Lecture three hours; laboratory three hours.

EEE 178. Introduction to Machine Vision.**3 Units****Prerequisite(s):** EEE 180 or ME 172, or instructor approval.**Term Typically Offered:** Spring only

Fundamental digital image processing and machine vision concepts and their application to the fields of robotics and automation. Topics include: digital image processing, image formation, two dimensional transforms, boundary descriptors, motion, camera calibration, vision for robot control, 3-D vision, and hardware architectures to support vision.

EEE 180. Signals and Systems.**3 Units****Prerequisite(s):** EEE 117; EEE 117 may be taken concurrently.**Term Typically Offered:** Fall, Spring, Summer

Rigorous development of the fundamental relationships governing time-domain and frequency-domain analysis of linear continuous-time and discrete-time systems. Topics include Fourier, Laplace and z-transforms, sampling theorem, modulation, system stability, and digital filters.

EEE 181. Introduction to Digital Signal Processing.**3 Units****Prerequisite(s):** EEE 64, EEE 180.**Term Typically Offered:** Spring only

Focuses on the application of linear systems theory to design and analysis of digital signal processing systems. Discrete systems, the z transform, and discrete Fourier transform are reviewed. Design of infinite impulse response filters, finite impulse response filters, and digital spectral analysis systems is presented. Computer simulation is used to study the performance of filters and spectral analysis systems. Signal processing architectures are introduced.

EEE 182. Digital Signal Processing Lab.**1 Unit****Prerequisite(s):** EEE 180, EEE 181; EEE 181 may be taken concurrently.**Term Typically Offered:** Spring only

Provides senior level undergraduate students with experience in the software/hardware design of discrete-time systems, and modern DSP techniques. Laboratory projects will include the following: spectral analysis of analog and digital signals, design of sampling and quantizer circuits, design and realization of IIR and FIR Digital Filters. Hardware projects will include acquisition, analysis, and filtering of speech, biomedical and video signals using Digital Signal Processors (DSPs).

EEE 183. Digital and Wireless Communication System Design.**3 Units****Prerequisite(s):** EEE 161, EEE 180; EEE 185 may be taken concurrently.**Term Typically Offered:** Fall only

Review of fundamentals, probability, information, distortion by channel, sampling, pulse code modulation, companding, link power calculation, noise figure, pseudo noise. Matched filter detection of binary signals, bit error rate, inter-symbol interference, zero-forcing equalizers. Effects of additive white Gaussian noise in pulse code modulation, spread spectrum in multiple access, cellular radio and other wireless applications. Procedure for making design trade offs will be discussed.

EEE 184. Introduction to Feedback Systems.**3 Units****Prerequisite(s):** EEE 180.**Term Typically Offered:** Fall, Spring, Summer

Dynamic system modeling by transfer function and state-space methods using differential equation, time-response and frequency-response methods. Determination of steady-state errors due to step, ramp and parabolic inputs and disturbances for closed-loop systems. Mapping of block diagrams and state-space representations to signal flow graphs (SFG) as well as finding the transfer function of the system represented by the SFG by Mason's Rule. Closed-loop system stability is examined via poles and eigenvalues and by using the Routh-Hurwitz criterion. Introduction to observability and controllability of systems. Design of compensators for feedback systems using root-locus, frequency response and state-space methods. Introduction to digital control. Computer simulation methods such as MATLAB and SIMULINK are used to support the above subjects.

EEE 185. Modern Communication Systems.**3 Units****Prerequisite(s):** EEE 180, ENGR 120; ENGR 120 may be taken concurrently.**Term Typically Offered:** Fall, Spring, Summer

Review of signal and system analysis, sampling theorem and Nyquist's criteria for pulse shaping, signal distortion over a channel, study of digital and analog communication systems, line coding, signal to noise ratios, performance comparison of various communication systems.

EEE 186. Communication Systems Laboratory.**1 Unit****Prerequisite(s):** EEE 117 (EEE 185 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).**Term Typically Offered:** Fall, Spring

Experimental study of modulation and demodulation in AM, FM, and digital communication systems, A/D and D/A conversion, measurement of power spectra, noise characterization in frequency domain.

EEE 187. Robotics.**4 Units****Prerequisite(s):** EEE 180 or equivalent, or instructor permission.**Term Typically Offered:** Fall only

Lecture introduces principles of robotics and design of robot systems. Includes robot architectures, sensing position/velocity, digital circuit noise, actuator and path control, robot coordinate systems, kinematics, differential motion, computer vision/architectures, and artificial intelligence. Laboratory will apply lecture theory in design experiments utilizing five degree-of-freedom robots, an industrial robot, and vision systems.

EEE 188. Digital Control System.**3 Units****Prerequisite(s):** EEE 180, GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.**Term Typically Offered:** Spring only

Intended to present treatment of the classical digital control with an introduction to modern digital control system in the state space. Z-transform as applied to discrete-time systems with transformation from the s-plane to the z-plane. Analyzes digital control systems using Nyquist and Bode plots and root-locus. Stability analysis of digital systems using Jury test, Routh Criterion, Nyquist and Bode plots. Design using root-locus and Bode plots introduced. Introduction to state-space and pole assignment. Finite-word length effects. MATLAB applications.

- EEE 189. Controls Laboratory.** **1 Unit**
Prerequisite(s): EEE 184 (EEE 184 may be taken concurrently), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Study, simulation and design of linear feedback control systems using digital control methods such as MATLAB and SIMULINK. Practical examples of analysis and compensation for closed loop systems.
- EEE 192A. Electrical Power Design Project I.** **2 Units**
Prerequisite(s): EEE 141, EEE 142, EEE 143; EEE 143 may be taken concurrently. WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring
- Concentrates on the planning, research and design aspects of electric power systems, including generation, transmission and distribution systems. Emphasis is placed on design philosophies, problem definition, research, project planning, written and oral communication skills, teamwork, development of specifications and effective utilization of available resources. Lecture one hour; laboratory three hours.
- EEE 192B. Electrical Power Design Project II.** **2 Units**
Prerequisite(s): EEE 142, EEE 143, and EEE192A.
Term Typically Offered: Fall, Spring
- Continuation of EEE 192A. Students are expected to continue the power engineering design project begun the previous semester in EEE 192A. Final results of the project report will be presented orally to the class and invited faculty in a publicized seminar. Lecture one hour; laboratory three hours.
- EEE 193A. Product Design Project I.** **2 Units**
Prerequisite(s): EEE 108, EEE 109, EEE 130, EEE 161, EEE 174, EEE 180 (EEE 109 may be taken concurrently), GE Area A and (WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Concentrates on the planning and design of electronic engineering devices, systems and software. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, teamwork, development of specifications, utilization of computer aided design systems, and effective utilization of available resources. Lecture one hour; laboratory three hours.
- EEE 193B. Product Design Project II.** **2 Units**
Prerequisite(s): EEE 193A.
Term Typically Offered: Fall, Spring
- Concentrates on design projects begun by the previous semester design teams in EEE 193A. The hardware will be completed, tested for the meeting of specifications and other requirements, and redesigned if necessary. Required software will be written, debugged and incorporated in a written report. The final results of the team project will be presented orally to the class and invited faculty in a publicized seminar. Lecture one hour; laboratory three hours.
- EEE 194. Career Development in Electrical and Electronic Engineering.** **1 Unit**
Prerequisite(s): EEE 192A or EEE 193A, may be taken concurrently.
Term Typically Offered: Fall, Spring
- Designed for Electrical and Electronic Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.
Note: Units earned cannot be used to satisfy major requirements.
- Credit/No Credit
- EEE 195. Fieldwork in Electrical and Electronic Engineering.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
- Supervised work experience in Electrical and Electronic Engineering with public agencies or firms in the industry. Requires approval of a petition by the supervising faculty member and Department Chair.
Note: May be repeated for credit.
- Credit/No Credit
- EEE 195A. Professional Practice.** **1 - 12 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
- Credit/No Credit
- EEE 195B. Professional Practice.** **1 - 12 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
- Credit/No Credit
- EEE 195C. Professional Practice.** **1 - 12 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.
Note: Units earned cannot be used to satisfy major requirements.
- Credit/No Credit

<p>EEE 195D. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p>	<p>EEE 214. Computer Aided Design for Microwave Circuits. 3 Units Prerequisite(s): EEE 211 or instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report. Note: Units earned cannot be used to satisfy major requirements.</p>	<p>Introduction to design methodology of the basic building blocks of communication systems. Use of solid state devices in communications and microwave technology. Implementation of transmitter and receiver architectures. Impedance matching, S-parameters and small-signal, large-signal device operation. Design of transmitter and receiver components using a professional software tool. Design and simulations of gain and low noise amplifiers, detectors, mixers, power amplifiers and oscillators. Tradeoffs involved in the design of a complete transmitter and a receiver.</p>
<p>Credit/No Credit EEE 196A. PCB Design Fundamentals. 1 Unit Prerequisite(s): EEE 102, CPE 102 or EEE 108. Term Typically Offered: Fall only</p>	<p>EEE 215. Lasers. 3 Units Prerequisite(s): EEE 180 and EEE 161 or instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Printed circuit board (PCB) design fundamentals including library component creation, schematic capture, layout, routing, signal integrity and transmission line analysis, IEEE/IPC rules and standards, materials, manufacturing processes, and other physical properties of a PCB.</p>	<p>Review of electromagnetic theory. Ray tracing in an optical system, Gaussian beam propagation. Resonant optical cavities, study of excitation and lasing mechanisms in gas and semiconductor lasers. General characteristics and design of CW, Q switched and traveling wave lasers.</p>
<p>EEE 199. Special Problems. 1 - 3 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p>	<p>EEE 221. Machine Vision. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Individual projects or directed reading. Note: Open only to students who appear qualified for independent work. Approval of the faculty sponsor and the academic advisor must be obtained before registering. May be repeated for credit.</p>	<p>Introduces the student to fundamental digital imaging processing concepts and their application to the fields of robotics, automation, and signal processing. Topics include: digital image filters, two dimensional transforms, boundary descriptors, Hough transform, automated visual inspection techniques, vision for robot control, 3-D vision, and hardware architectures to support vision.</p>
<p>EEE 201. Research Methodology. 1 Unit Prerequisite(s): Fully classified graduate status. Term Typically Offered: Fall, Spring</p>	<p>EEE 222. Electronic Neural Networks. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Research methodology, problem formulation and problem solving. Collective and individual study of selected issues and problems relating to fields of study in the Electrical and Electronic Engineering Graduate Program. Orientation to the requirements for Masters Thesis or Project in Electrical Engineering. Credit/No Credit</p>	<p>Current neural network architectures and electronic implementation of neural networks are presented. Basics of fuzzy logic is covered. Application software will be used to simulate training. Testing of various neural net architectures. Learning strategies such as back-propagation, Kohonen, Hopfield and Hamming algorithms will be explored. A final project requires the student to design, train and test a neural network for electronic implementation that solves a specific practical problem.</p>
<p>EEE 211. Microwave Engineering. 3 Units Prerequisite(s): EEE 161; EEE 108 or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>EEE 225. Advanced Robot Control. 3 Units Prerequisite(s): EEE 184 or equivalent. Term Typically Offered: Fall, Spring</p>
<p>High-frequency passive electronic circuit design, specifically S-parameters, impedance matching, microstrip lines, filters, couplers and antennas.</p>	<p>Introduction to robot kinematics and dynamics followed by a comprehensive treatment of robot control. Topics include: independent joint control, multivariable control, force control, feedback linearization, real-time parameter estimation, and model-reference adaptive control.</p>
<p>EEE 212. Microwave Engineering II. 3 Units Term Typically Offered: Fall, Spring</p>	<p>EEE 230. Analog and Mixed Signal Integrated Circuit Design. 3 Units Prerequisite(s): EEE 109 or instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Passive microwave components; power dividers, couplers and hybrids. Microwave filter design, periodic structures, image parameter and insertion loss methods for designing filters. Design of ferromagnetic components, isolators, phase shifters and circulators. Noise in microwave circuits.</p>	<p>Covers core topics and circuits important for analog and mixed-signal integrated circuits. Topics include: device structures and models, single-stage and differential amplifiers, current mirrors and active loads, operational amplifier design, stability and compensation, fully-differential circuits and common-mode feedback, noise in integrated circuits and the impact of IC processes on analog performance.</p>
<p>EEE 213. Microwave Devices and Circuits. 3 Units Prerequisite(s): EEE 162. Term Typically Offered: Fall, Spring</p>	
<p>Theory and application of electromagnetic radiation at microwave frequencies; study of microwave impedance and power measurement and characteristics of microwave circuit components, and electronic devices.</p>	

EEE 231. Advanced Analog and Mixed Signal Integrated Circuit Design. 3 Units**Prerequisite(s):** EEE 230 or consent of the instructor.**Term Typically Offered:** Fall, Spring

A companion course to EEE 230, covers additional topics important in analog and mixed-signal integrated circuit design. Topics include traditional issues such as device matching and analog layout techniques, as well as important building blocks such as bandgap references and bias circuits. Also included are current-mode techniques such as high-speed current-mode logic (CML), and an introduction to noise in integrated circuits. Circuit and layout projects are assigned using CAD software.

EEE 232. Key Mixed-Signal Integrated Circuit Building Blocks. 3 Units**Prerequisite(s):** EEE 230 or consent of instructor.**Term Typically Offered:** Fall, Spring

Covers key mixed-signal integrated circuit building blocks most often used in modern ICs. Topics covered include data converter fundamentals, comparators, and important circuit architectures for Analog-to-Digital Converters (ADCs), Digital-to-Analog Converters (DACs), and Phase-Locked Loops (PLLs).

EEE 234. Digital Integrated Circuit Design. 3 Units**Prerequisite(s):** EEE 230 or instructor permission.**Term Typically Offered:** Fall, Spring

The background and techniques needed to design and layout digital circuits at the transistor level for mixed-signal integrated circuits are covered. Topics include the design, layout and characterization of digital logic gates at the transistor level, typical CMOS process flows, device models and physics, and chip level considerations.

EEE 235. Mixed-Signal IC Design Laboratory. 1 Unit**Prerequisite(s):** EEE 230 or consent of the instructor.**Term Typically Offered:** Fall, Spring

Methods to develop successful mixed-signal integrated circuits using an industrial design methodology and computer-aided design tools. Proven design techniques presented; hands-on experience gained through each student designing their own integrated circuit. Communications skills developed through periodic presentations, including reviews for the circuit architecture, design and layout.

EEE 236. Advanced Semiconductor Devices. 3 Units**Term Typically Offered:** Fall, Spring

Semiconductor device modeling, including the application of the continuity equation and Poissons equation to abrupt and graded p/n junctions, semiconductor/metal contacts, junction field effect transistors (JFET), metal-oxide-semiconductor transistors (MOSFET), and bipolar junction transistors (BJT). Special topics include compound semiconductor devices and heterostructures.

EEE 238. Advanced VLSI Design-For-Test I. 3 Units**Prerequisite(s):** CPE 151 and CPE 166.**Term Typically Offered:** Fall, Spring

Focus on integrated circuit design-for-test-techniques; semiconductor reliability factors and screening; semiconductor fabrication processes, device physics and related performance limitations; quantifying cost/quality tradeoffs; IC manufacturing flows and high-accuracy parametric test methods.

EEE 239. Advanced VLSI Design-For-Test II. 3 Units**Prerequisite(s):** EEE 238.**Term Typically Offered:** Fall, Spring

Advanced topics in VLSI testing and Design-For-Test applications. Memory-specific test methodology and special features of memory designs employed in high volume manufacturing for improved testability, yield, and reliability. VLSI failure modes, their detection and prevention. Application of trim, redundancy, wear-leveling, and error correction.

EEE 241. Linear Systems Analysis. 3 Units**Prerequisite(s):** EEE 180 or equivalent.**Term Typically Offered:** Fall, Spring

Analyzes linear systems in the state-space. System realization and modeling, solutions of linear systems, stability including the method of Lyapunov, controllability and observability, state feedback and observers for both continuous and discrete-time systems. Familiarity with MATLAB is required.

EEE 242. Statistical Signal Processing. 3 Units**Term Typically Offered:** Fall, Spring

Introduces the student to modern statistical approaches for solving electronic system noise problems. A few of the topics covered are: Stochastic processes, Wiener and Kalman filters, linear prediction, lattice predictors and singular-value decomposition.

EEE 243. Applied Stochastic Processes. 3 Units**Prerequisite(s):** ENGR 120.**Term Typically Offered:** Fall, Spring

Introduction to sequence of random variables and multivariable distributions; models of stochastic processes; stationary stochastic processes and their applications; Markov processes, Markov chains, continuous Markov chains; renewal processes; birth-death processes; time-series applications in stochastic processes in filtering, reliability and forecasting, prediction and control.

EEE 244. Electrical Engineering Computational Methods and Applications. 3 Units**Prerequisite(s):** EEE 180.**Term Typically Offered:** Fall, Spring

Computational methods for solving problems in engineering analysis. Topics include variational methods, finite-difference analysis, optimization methods, and matrix methods. Focuses predominantly on applications of the methods, and students are required to solve real-world, engineering problems on the computer.

EEE 245. Advanced Digital Signal Processing. 3 Units**Prerequisite(s):** EEE 174, EEE 181 or equivalent.**Term Typically Offered:** Fall, Spring

Advanced signal processing topics include: multirate signal processing, adaptive filter design and analysis, spatial filtering and the application of FIR filter theory to beamforming. Applications of digital signal processing in communication systems, radar systems, and imaging systems are covered. Hardware and software topics, including current products and the incorporation of VLSI are included. Lecture.

- EEE 246. Advanced Digital Control. 3 Units**
Prerequisite(s): EEE 241.
Term Typically Offered: Fall, Spring
- Review of digital control methods using transform techniques. State-variable representation and design of digital control systems, state-space compensators and tracking systems, polynomial equations approach, LQR and LQG discrete-time control and identification, and introduction to adaptive self-tuning regulators.
- EEE 249. Advanced Topics in Control and Systems. 3 Units**
Term Typically Offered: Fall, Spring
- Topics from recent advances in control, systems and robotics control selected from IEEE Journals and related professional publications. May be taken twice for credit.
- EEE 250. Modern Power Transmission Systems. 3 Units**
Prerequisite(s): EEE 142 or equivalent.
Term Typically Offered: Fall, Spring
- Characteristics of modern power transmission systems, Transmission line parameters, Steady-state, Dynamic and Transient behavior of AC/DC transmission systems, Flexible AC Transmission Systems (FACTS), High-Voltage Direct Current (HVDC) systems, Analysis of faulted transmission systems and AC/DC hybrid grids.
- EEE 251. Power System Economics and Dispatch. 3 Units**
Prerequisite(s): EEE 141 or equivalent.
Term Typically Offered: Fall, Spring
- Study of a number of engineering and economic matters involved in planning, operating, and controlling power generation and transmission systems in electric utilities. Effects of hydro and nuclear plants on system economics. Economic and environmental constraints. Theoretical developments and computer methods in determining economic operation of interconnected power systems with emphasis on digital computers.
- EEE 252. Power System Reliability and Planning. 3 Units**
Prerequisite(s): EEE 142 or equivalent.
Term Typically Offered: Fall, Spring
- Power system economics, generation, transmission and distribution reliability. Production costing and generation planning, transmission planning.
- EEE 253. Control and Stability of Power Systems. 3 Units**
Prerequisite(s): EEE graduate standing.
Term Typically Offered: Fall, Spring
- The fundamental concepts of control and stability in power systems. Topics include: power systems dynamics and linearized models, small and large disturbances, voltage and frequency stability. Introduction to power systems dynamic simulation for stability studies using CAD tools.
- EEE 254. Large Interconnected Power Systems. 3 Units**
Prerequisite(s): EEE 142.
Term Typically Offered: Fall, Spring
- Computer control, optimization and organization of large power systems. Load and frequency control, voltage control, large load flow and contingency studies. Introduction to state estimation and load forecasting.
- EEE 255. Future Power Systems and Smart Grids. 3 Units**
Prerequisite(s): EEE 141, EEE 146, EEE 180, and EEE 250 or instructor permission.
Term Typically Offered: Fall, Spring
- Future power systems from component and system perspectives. Smart grids, micro-grids, and interactive power systems using renewable resources and energy storage elements. National standards for certification of distributed generation involving machine-based and inverter-based technologies. Essential elements of advanced sensing, communications and information technology and their roles in adaptive automation, control, protection, and security.
- EEE 256. Advanced Power Systems Protection. 3 Units**
Prerequisite(s): EEE 141; EEE 145 or instructor permission.
Term Typically Offered: Fall, Spring
- Advanced concepts and schemes used in power system protection including the various protective schemes used for transmission lines, transformers, machines, and other elements of a large interconnected power system. Concepts in digital and microprocessor based relay design and analysis of typical protection subsystems, in conjunction with the protection of the power system as a whole.
- EEE 257. Wind Energy Electrical Conversion Systems. 3 Units**
Prerequisite(s): Fully classified graduate standing in EEE or instructor permission
Term Typically Offered: Fall, Spring
- Fundamentals of current technologies and methods in wind energy conversion systems, including turbines, generators and converters as well as control and integration of these devices in power grids. Topics include: power conversion, grid converters for wind systems, system integration, methods for power, voltage and frequency control, and wind farms simulation and aggregation methods.
- EEE 259. Advanced Topics in Power Systems. 3 Units**
Prerequisite(s): EEE 142.
Term Typically Offered: Fall, Spring
- Topics from recent advances in Electrical Power Engineering selected from IEEE Journal on "Power Systems" and "Power Systems Delivery." May be taken twice for credit.
- EEE 260. Statistical Theory of Communication. 3 Units**
Prerequisite(s): EEE 185.
Term Typically Offered: Fall, Spring
- Review of Fourier analysis and theory of probability, random processes, optimum filtering, performance of analog and digital communication systems in the presence of noise, system optimization.
- EEE 261. Information Theory, Coding, and Detection. 3 Units**
Prerequisite(s): EEE 185.
Term Typically Offered: Fall, Spring
- Signal space concepts, optimum M-ary communication systems, MAP estimation of continuous waveform parameters, information theory, coding.

- EEE 262. Wireless Communications Systems. 3 Units**
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall, Spring
- Wireless communication techniques, systems and standards. Topics include cellular systems, RF transmission and analog/digital modulation techniques. Modern techniques such as multiple access and spread spectrum systems. Channel coding and diversity will also be included.
- EEE 264. Advanced Topics in Wireless Communications. 3 Units**
Prerequisite(s): EEE 262 or instructor permission.
Term Typically Offered: Fall, Spring
- Advanced theoretical and practical aspects of modern wireless communications. Specific topics include: advanced cellular concepts, modern small-scale and large-scale propagation models, complex equalization and diversity system design, 3G (third generation) wireless networks, Bluetooth and Personal Area Networks (PANs), GPRS (General Packet Radio Service) and wireless measurement techniques.
- EEE 265. Optoelectronic Engineering. 4 Units**
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Fall, Spring
- Generation, propagation and detection of light. Fresnel equations, Snell's law, diffraction, polarization, and interference. Operating principles of LEDs, lasers, photodiodes, optical fibers, photovoltaic devices. Introduction to optical communications systems and optical instrumentation.
Note: EEE 265 and EEE 165 may not be both taken for graduate credit.
- EEE 267. Fiber Optic Communications. 3 Units**
Prerequisite(s): EEE 185 or instructor permission.
Term Typically Offered: Fall, Spring
- Fundamentals of modern lightwave communication systems, sources detectors and optical fibers. Study of dispersion in Step Index, Graded Index and Single Mode Optical Fibers. Intensity Modulated Direct Detection systems (IMDD) and Coherent Fiber Optic Systems (COFOCS). Performance evaluation and design considerations. Wavelength division multiplexing, Local Area Networks, optical amplifiers and photonic switching.
- EEE 270. Advanced Topics in Logic Design. 4 Units**
Prerequisite(s): EEE Graduate Student Standing.
Term Typically Offered: Fall, Spring
- Synchronous and asynchronous state machines. Timing issues in high-speed digital design. Design of a complex system using VHDL and Verilog Hardware Description Languages in a CAD environment. Automation toolsets to synthesize projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Simulations using CAD tools to verify the design before implementation on rapid prototyping boards in the lab. Lecture 3 hours; laboratory 3 hours.
- EEE 272. High Speed Digital System Design. 3 Units**
Prerequisite(s): EEE 161, fully classified graduate standing and instructor permission.
Term Typically Offered: Fall, Spring
- Theoretical topics and practical applications relating to high speed digital systems. Review of basic transmission line theory, crosstalk, impact of PCB traces, vias, and connectors on signal integrity, return current paths, simultaneous switching noise, high frequency power delivery, high speed timing budgets, high speed bus design methodologies, radiated emissions, and system noise.
- EEE 273. Hierarchical Digital Design Methodology. 3 Units**
Prerequisite(s): EEE 64 or equivalent.
Term Typically Offered: Fall, Spring
- Hierarchical digital design course that includes: State machine design, Programmable Logic Devices, digital simulation techniques, digital interface, design with ASIC (Application Specific Integrated Circuits), programmable Gate Arrays, and designing with Gas high speed logic devices. Problems with EMI, RFI and EMC will be presented along with design guidelines. Lecture three hours.
 Cross Listed: CSC 273; only one may be counted for credit.
- EEE 274. Advanced Timing Analysis. 3 Units**
Prerequisite(s): EEE 273, CSC 273, CPE 273 or instructor permission.
Term Typically Offered: Fall, Spring
- Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues.
 Cross-listed: CPE 274; only one may be counted for credit.
- EEE 280. Advanced Computer Architecture. 3 Units**
Prerequisite(s): CSC 205 or instructor permission.
Term Typically Offered: Fall, Spring
- Introduces computer classification schemes, structures of uni- and multi-processor systems, parallelism in uniprocessor systems, design and performance analysis of pipelined and array processors; survey and analysis of interconnection networks and parallel memory organizations; programming issues of multiprocessor systems; and fault tolerant computing and design for testability.
 Cross Listed: CSC 280; only one may be counted for credit.
- EEE 285. Micro-Computer System Design I. 3 Units**
Prerequisite(s): EEE 174 or CPE 185.
Term Typically Offered: Fall, Spring
- Focuses on: design of the microprocessor based computer system, study of bus structures, interrupt schemes, memory interfacing, timing, bus arbitration, system architecture, data communications, introduction to multiprocessor systems, and software development.
- EEE 286. Microcomputer System Design II. 3 Units**
Prerequisite(s): EEE 285 or CPE 186.
Term Typically Offered: Fall, Spring
- Includes PCI and PCI express bus specifications/architecture, PCI bridges transaction ordering, PCI express transactions and handshaking protocols, electromagnetic interference, methods of eliminating interference, shielding grounding, balancing, filtering, isolation, separation, orientation, cancellation techniques and cable design. Involves design projects and research presentations on PCI and PCI Express Bridge.

EEE 296C. Transients in Power Systems.**Prerequisite(s):** EEE 130 and EEE 141**Term Typically Offered:** Fall, Spring

Transients in electric power systems due to shunt capacitor switching, voltage flicker and nonlinear loads such as electric arc furnaces.

Lightning surges and their effect on the power system health and operation. Transformer inrush currents and motor starting. The knowledge of EEE 130 and EEE 141 or equivalent courses is required for taking this course.

Credit/No Credit

3 Units

Digital Electronics, Control Systems, Communication Engineering, and Power Engineering. Students select a senior project either in power engineering or in the general area of electronics. Each of these options includes a sequence of two courses for the completion of the project, and has its own pre-requisite requirements.

Note: Students graduating with a BS in Electrical and Electronic Engineering will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

EEE 296T. Digital Speech Processing.**Prerequisite(s):** EEE 181 or instructor permission.**Term Typically Offered:** Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition.

Cross listed: CPE 296T.

3 Units**EEE 299. Special Problems.****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.

1 - 3 Units**EEE 500. Culminating Experience.**

Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator, and GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.

Term Typically Offered: Fall, Spring**1 - 6 Units**

Completion of a thesis, project or comprehensive examination. Credit given upon successful completion of one of the following plans: Plan A: Master's Thesis, 5 units; Plan B: Master's Project, 2 units; or Plan C: Comprehensive Examination.

BS in Electrical and Electronic Engineering

Units required for Major: 92

Total units required for BS: 123

Program Description

The field of Electrical and Electronic Engineering continues to expand in scope, driven by advances in technology and new challenges faced by society. To prepare our graduates for careers in this demanding field, we equip them with a strong background in the fundamental principles of the discipline, and subsequent advanced courses in specific areas. Our curriculum provides practical, hands-on experience through laboratory courses.

The Electrical and Electronic Engineering program provides breadth (core courses), depth (elective sequence), and a culminating design project to apply the knowledge gained through the curriculum. The curriculum allows flexibility by offering a number of elective courses providing our graduates with depth in their respective areas of interest. The electives offered provide depth in one or more of the following areas: Analog/

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to an Electrical and Electronic Engineering major.

Program Requirements

Code	Title	Units
Required Lower Division Courses (38 Units)		
CHEM 1E	General Chemistry for Engineering ¹	4
CPE/EEE 64	Introduction to Logic Design ^{1,2}	4
ENGR 1	Introduction to Engineering ¹	1
ENGR 17	Introductory Circuit Analysis ²	3
ENGR 50	Computational Methods and Applications	3
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
MATH 45	Differential Equations for Science and Engineering	3
PHYS 11A	General Physics: Mechanics ¹	4
PHYS 11C	General Physics: Electricity and Magnetism ¹	4
Required Upper Division Courses (33 Units) ³		
EEE 108	Electronics I	3
EEE 108L	Electronics I Laboratory	1
EEE 117	Network Analysis	3
EEE 117L	Networks Analysis Laboratory	1
EEE 130	Electromechanical Conversion	3
EEE 161	Applied Electromagnetics	4
EEE 174	Introduction to Microprocessors	4
EEE 180	Signals and Systems	3
EEE 184	Introduction to Feedback Systems	3
EEE 185	Modern Communication Systems	3
ENGR 120	Probability and Random Signals	3
ENGR 140	Engineering Economics ¹	2
Required Design Project Series		
Select one of the following two series:		
<i>Electrical Power Design Project Series (11 units)</i>		
EEE 141	Power System Analysis I	
EEE 142	Power System Analysis II	
EEE 143	Power System Laboratory	
EEE 192A	Electrical Power Design Project I ¹	
EEE 192B	Electrical Power Design Project II ¹	
<i>Product Design Project Series (8 units)</i>		
EEE 109	Electronics II	
EEE 193A	Product Design Project I ¹	
EEE 193B	Product Design Project II ¹	

Elective Requirements for Power Design Project Series (10 Units)	
Select two lecture courses and one lab course from one of the Depth Requirement Areas	7
Select one additional lecture course from any on the list of electives	3
Elective Requirements for Product Design Project Series (13 Units)	
Select two lecture courses and one lab course from one of the Depth Requirement Areas	7
Select two additional lecture courses from any on the list of electives	6
Total Units	94

¹ Course also satisfies General Education (GE)/Graduation Requirement. The designation "General Education course" denotes a course which meets GE requirements other than those which also serve as prerequisites to courses in the major. Students are expected to satisfy the University's GE requirements. Consult the Department Chair for specific GE requirements. Students should take ENGL 5 as early as possible since it is required for admission to the upper division.

² EEE 64W or ENGR 17W may be available to augment understanding of material; however, these courses cannot be used to satisfy graduation requirements.

³ It is imperative that students take the University's Writing Placement for Juniors (WPJ) during the first semester of the junior year, as it is a prerequisite to all laboratory courses after EEE 117L.

Depth Requirement Areas and List of Electives (13 units)

Depth Requirement (Non-Power):

- Select 6 units of lecture and 1 unit of laboratory from one of the four areas listed below.
- Select 6 additional units from any on the list of the electives.

Depth Requirement (Power):

- Select 6 units of lecture and 1 unit of laboratory from one of the four areas listed below.
- Select 3 additional units from any on the list of electives.

Code	Title	Units
Analog/Digital Electronics (29 Units)		
CPE/CSC 138	Computer Networks and Internets	3
CPE 151	Cmos And Vlsi	3
CPE 153	Vlsi Design	3
CPE 166	Advanced Logic Design	4
CPE 186	Computer Hardware System Design	3
CPE 187	Embedded Processor System Design	2
EEE 109	Electronics II ¹	4
EEE 110	Advanced Analog Integrated Circuits	3
EEE 111	Advanced Analog Integrated Circuits Laboratory	1
EEE 166	Physical Electronics	3
Control Systems (11 Units)		
EEE 178	Introduction to Machine Vision	3
EEE 187	Robotics	4
EEE 188	Digital Control System	3
EEE 189	Controls Laboratory	1
Communication Engineering (22 Units)		
EEE 122	Applied Digital Signal Processing	3

EEE 162	Applied Wave Propagation	3
EEE 163	Traveling Waves Laboratory	1
EEE 165	Introduction To Optical Engineering	3
EEE 167	Electro-Optical Engineering Lab	1
EEE 181	Introduction to Digital Signal Processing	3
EEE 182	Digital Signal Processing Lab	1
EEE 183	Digital and Wireless Communication System Design	3
EEE 186	Communication Systems Laboratory	1

Power Engineering (25 Units)		
EEE 131	Electromechanics Laboratory	1
EEE 135	Renewable Electrical Energy Sources and Grid Integration	3
EEE 136	Smart Electric Power Grid	3
EEE 141	Power System Analysis I ²	3
EEE 142	Power System Analysis II	3
EEE 143	Power System Laboratory ²	1
EEE 144	Electric Power Distribution	3
EEE 145	Power System Relay Protection and Laboratory	4
EEE 146	Power Electronics Controlled Drives	3
EEE 148	Power Electronics Laboratory	1

¹ Students planning to complete EEE 193A/EEE 193B series may **not** use EEE 109 to meet depth/elective requirement.

² Students planning to complete EEE 192A/EEE 192B series may **not** use EEE 141, EEE 142, and EEE 143 to meet depth/elective requirement.

Note:

- Other upper division courses in Engineering and Computer Science may be selected as elective lectures with **prior** approval of the student's advisor.
- Other upper division and graduate courses in Engineering and Computer Science may be selected as elective lectures with **prior** approval of the student's advisor. Graduate courses counted towards a BS degree may **not** be used for a MS degree.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ²	0
Area C: Arts and Humanities (12 Units)		
C1	Arts	3

C2 - Humanities	3
C1/C2 - Area Course C	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9 Units)	
Area D Course	3
Area D Course	3
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements. ²	0
Area E: Understanding Personal Development	
Area E Course ²	0
Total Units	33

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>
Note: Students with a declared major of BS in Electrical and Electronic Engineering are exempt from the Foreign Language Graduation Requirement.

Certificate in Mixed-Signal Integrated Circuit Design

Units required for Certificate: 16

Program Description

The certificate in mixed-signal integrated circuit design will recognize the commitment and accomplishments of graduate students studying in this area, and provide potential employers with evidence of the skills students have developed. Graduate students studying mixed-signal integrated circuit (IC) design will become knowledgeable and proficient in the different skills this demanding field requires. This requires studying multiple subjects such as amplifier design, device physics and matching, analog layout techniques, and key mixed-signal building blocks. In addition, students will learn the methods and tools used to design and layout ICs.

Program Requirements

Code	Title	Units
Required Lower Division Courses (13 Units)		
EEE 230	Analog and Mixed Signal Integrated Circuit Design	3
EEE 231	Advanced Analog and Mixed Signal Integrated Circuit Design	3
EEE 232	Key Mixed-Signal Integrated Circuit Building Blocks	3
EEE 235	Mixed-Signal IC Design Laboratory	1
EEE 236	Advanced Semiconductor Devices	3
Required Electives (3 Units)		
Select one of the following:		3
EEE 110	Advanced Analog Integrated Circuits	
EEE 234	Digital Integrated Circuit Design	
EEE 238	Advanced VLSI Design-For-Test I	
EEE 239	Advanced VLSI Design-For-Test II	
Total Units		16

MS in Electrical and Electronic Engineering

Total units required for MS: 30

Program Description

The Master of Science degree program in Electrical and Electronic Engineering is designed to provide students with advanced study in a variety of Electrical and Electronic Engineering topics, and opportunities to conduct independent research to broaden their professional scope.

The scheduling of courses and the Culminating Experience options in the program are designed to provide flexibility for working professionals. All students complete a one-unit research methodology course, three-unit computational methods course, and at least two of the designated elective area core courses. This requirement is designed to provide a strong academic foundation. In consultation with the Graduate Coordinator and faculty advisors, students then focus their studies in one or more of the following areas, adapting to the needs and interests of the practicing engineer or post-graduate candidate:

- Control Systems
- Communication Systems
- Power Systems
- Microelectronic Design
- Computer Architecture & Digital Design

Coordinated courses are offered in advanced microprocessors, electromagnetic theory and microwaves, lasers and fiber optics, semiconductor devices, robotics and intelligent machines, systems and control, networks, and communication systems. Other coordinated courses facilitate the study of estimation and stochastic control, advanced communications and signal processing, large interconnected power systems, power systems reliability, and planning, advanced design and organization of digital computer systems, and advanced integrated circuit design. The program is also sufficiently flexible to allow special independent studies of problems of current interest.

The Department has a strong relationship with the local engineering community. Students of the program have access to Department laboratories and facilities and to University computer services.

Admission Requirements

Admission as a classified graduate student in Electrical and Electronic Engineering requires:

- a BS in Electrical and Electronic Engineering or equivalent;
- at least a 3.0 GPA in the BS in Electrical Engineering or equivalent; and
- at least a 3.25 GPA in the last 60 units of the BS in Electrical and Electronic Engineering or equivalent.

Under special circumstances, a student who does not satisfy the Admission Requirements may be admitted as a conditionally classified graduate student. Deficiencies will be specified in the acceptance letter to the student and must be removed by the student before the student can become a classified graduate student.

A student registered as an unclassified graduate student should carefully note that graduate courses taken as an unclassified graduate or as an open university student cannot be used to improve the student's grade point average for admittance to the Electrical and Electronic Engineering graduate program. Only undergraduate Electrical and Electronic Engineering courses can be taken or retaken to improve the GPA of the student for admittance to the graduate program.

Admission Procedures

Applications are accepted as long as room for new students exists. However, students are strongly urged to apply by April 1 for the following fall or October 1 for the following spring. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*.

At the same time, students not meeting the above admission requirements should submit to the Electrical and Electronic Engineering Graduate Coordinator two letters of recommendation, Graduate Record Examination scores, and/or other evidence of their potential for successful graduate study in this program.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. No more than three (3) courses in the program of study may have a grade below "B" and no course may have a grade below "C+".

Advancement to Candidacy

By the end of the first semester, after admission to the program, each student in the EEE Department is required to have a program of study approved by an elective area core faculty advisor and the Graduate Coordinator. Students will fill out a form (contract) outlining what courses they plan to take to complete the MS degree. This contract will be signed by the student and the faculty advisor, and filed in the EEE Department Office.

In addition, each student must file an application for Advancement to Candidacy with the Office of Graduate Studies indicating a proposed program of graduate study for the completion of the MS EEE. This procedure should begin as soon as the *classified* graduate student has:

- removed any deficiencies in Admission Requirements;
- completed a minimum of 12 units in the graduate program with a minimum 3.0 GPA; at least nine units of the 12 units must be EEE 200 level courses; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Each student must be advanced to candidacy prior to registering for EEE 500.

Advancement to Candidacy forms are available in the Office of Graduate Studies and in the Electrical and Electronic Engineering Department Office.

Program Requirements

Code	Title	Units
Required Core Courses (10 Units)		9
EEE 201	Research Methodology	1

Computer Architecture & Digital Design		
EEE 270	Advanced Topics in Logic Design	
EEE 272	High Speed Digital System Design	
EEE/CSC 273	Hierarchical Digital Design Methodology	
EEE 274	Advanced Timing Analysis	
EEE/CSC 280	Advanced Computer Architecture	
EEE 285	Micro-Computer System Design I	
EEE 286	Microcomputer System Design II	
Culminating Requirement (1-6 Units)		
EEE 500	Culminating Experience	1 - 6
Total Units		30-36

¹ Only one of these two courses will be counted as a core requirement. The other may be taken as an elective.

² Select at least 15 units if completing a 5 unit Plan A thesis/ select at least 18 units if completing a 2 unit Plan B project, and select at least 20 units if completing a Plan C exam. This selection must be done in consultation with the elective area faculty advisor and the Graduate Coordinator, and may include approved courses from other areas. A maximum of 7 units of undergraduate technical electives in electrical and electronic engineering or computer engineering may be applied to this requirement if approved by the Graduate Coordinator and if they have not been used to satisfy the BS program requirements or MS EEE admission requirements.

Notes:

- **The student cannot register for the Culminating Experience until the student passes the Writing Placement for Graduate Students (WPG), and advances to candidacy.** In subsequent semesters, students will enroll in Continuous Enrollment through the College of Continuing Education after qualifications for enrollment are verified.
- **Before registering for EEE 500**, students choosing Plan A, Master Thesis (5 units), or Plan B, Master Project (2 units), must submit an approved Topic Form to the Graduate Coordinator.
- **Students opting for Plan C, Comprehensive Exam**, must have that option approved by their elective area advisor. They will not receive degree credit for EEE 500. They must complete a total of 30 units of approved coursework, including core, elective core, and elective courses. They must advance to candidacy for the degree, and take a written comprehensive exam that will cover all of the material in their MS Program of Study. After a student's first failed attempt at the Plan C examination, the student shall receive advising from the graduate coordinator designed to prepare the student for a second attempt at the examination. Such advising may include a recommendation for the student to take additional course(s) to improve preparation for the next attempt. According to the Office of Graduate Studies policy, students are allowed no more than two attempts at the examination; however, if the EEE Department determines that there are extreme extenuating circumstances, the student may be recommended to the Office of Graduate Studies for a third attempt at the examination. Students are advised that a change from the exam option to project or thesis option is **not allowed** after the first attempt at the exam. Additionally, after two unsuccessful attempts at the exam, the student is subject to discontinuation from the graduate program. **Note:** It should be recognized that industry puts a high value on project and thesis problem-solving experience, and the demonstration of technical writing skill that these options require. Graduating under Plan C option will not provide that experience. Students taking this option should consider, with their elective area advisors, other ways of gaining that valuable experience, such as through an EEE 299 Special Problems course.
- **As soon as possible after the student has registered for EEE 500**, it is expected that the student will select a committee appropriate to the chosen plan of study. The Thesis Committee is to consist of the student's Thesis Advisor, who is the Chairperson of the student's Thesis Committee, and two other faculty members. The Project Committee is to consist of the student's Project Advisor, who is the Chairperson of the student's Project Committee, and one other faculty member. The committee members selected by the student must be approved by the Electrical and Electronic Engineering Department's Graduate Coordinator.
- **The Thesis (Plan A)** must be orally presented and defended, approved by the student's Thesis Committee, and approved by the Electrical

and Electronic Engineering Graduate Coordinator prior to submittal of the Thesis to the Office of Graduate Studies.

- **The Project (Plan B)** is to culminate in a report and a device or simulation, which is to be demonstrated to the student's Project Committee. The Project Report must be approved by the student's Project Committee and approved by the Electrical and Electronic Engineering Graduate Coordinator prior to its submittal to the Office of Graduate Studies.

Engineering

College of Engineering and Computer Science

Engineering Minor Description

Non-majors in Engineering may elect to minor in this field. Minor requirements may be satisfied by completing 21 approved units, of which 12 must be upper division. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses. Added some info.

Students wishing to minor in Engineering must have their minor program approved by the Associate Dean of the College of Engineering and Computer Science.

ENGR 1. Introduction to Engineering.

1 Unit

Prerequisite(s): Engineering major status or instructor permission

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Engineering study skills, fundamentals of the engineering design process and problem solving, current engineering challenges. Distinctions and similarities of different engineering disciplines. The engineering profession, ethics, teamwork, communication skills. Course helps students make an informed choice of their engineering majors.

Credit/No Credit

ENGR 1A. Fundamentals of Engineering.

3 Units

Prerequisite(s): Algebra and trigonometry or instructor permission.

Term Typically Offered: Fall, Spring

Problem solving skills needed in all areas of engineering offered at Sacramento State. Exposure to the different areas of engineering, and understanding of the relationship between them. Students will work in teams and complete hands-on engineering laboratory experiments and projects. Development of effective communication skills by presenting periodic oral and written reports. Computers will be used throughout. Lecture two hours, laboratory three hours.

Note: Not for degree credit.

Credit/No Credit

ENGR 2. Robotics Explorations.

3 Units

Prerequisite(s): Algebra and Trigonometry.

Term Typically Offered: Fall, Spring

Introduction to robotics. History of robotics, recent advances in the field, common devices such as sensors and actuators. Use of modular robotic kits. Students will be assigned competition based projects.

ENGR 6. Engineering Graphics and CADD (Computer Aided Drafting and Design).

3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring, Summer

In-depth graphical analysis and solution of typical three-dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Preparation of engineering drawings utilizing the CAD system. Lecture two hours; laboratory three hours.

ENGR 6W. Engineering Graphics and CADD Workshop.

1 Unit

Corequisite(s): ENGR 6.

Term Typically Offered: Fall, Spring, Summer

Problem solving and discussion of topics in Engineering Graphics and CADD (Computer Aided Drafting and Design) to enhance students' understanding of subject matter. Not for degree credit. Technical activity and laboratory, two hours.

Credit/No Credit

ENGR 7. 3-D CAD Solid Modeling.

3 Units

Prerequisite(s): ENGR 4 or ENGR 6.

Term Typically Offered: Fall, Spring

Applications of three-dimensional representation techniques as used in a typical CAD (computer aided drafting) software package (AutoCAD). Fundamentals employed in creating, modifying, analyzing and filing engineering drawings. This course will have a mechanical emphasis. Lecture two hours; laboratory three hours.

ENGR 17. Introductory Circuit Analysis.

3 Units

Prerequisite(s): PHYS 11C, MATH 45; either the math or physics may be taken concurrently, but not both.

Term Typically Offered: Fall, Spring, Summer

Writing of mesh and node equations. DC and transient circuit analysis by linear differential equation techniques. Application of laws and theorems of Kirchoff, Ohm, Thevenin, Norton and maximum power transfer. Sinusoidal analysis using phasors, average power.

ENGR 17W. Circuits Workshop. Corequisite(s): ENGR 17. Term Typically Offered: Fall, Spring, Summer	1 Unit	ENGR 60. MEP Orientation and Problem Solving. Term Typically Offered: Fall, Spring	2 Units
<p>Elaborates on fundamentals and enhances students' understanding of circuits.</p> <p>Note: Not for degree credit.</p>		<p>Mandatory class for MEP freshman students on orientation to the University, its resources, facilities and faculty. Students will be encouraged to form a group atmosphere where they can freely interact with each other and value each other as resources. Students will be provided with instruction and materials on study skills, note taking, time management, preparing for tests and dealing with stress. Presentation by working engineers and field trips to engineering firms will be taken. Personal and professional development will also be part of the freshman orientations with leadership, public speaking and career planning being topics of discussion. Lecture one hour; activity two hours.</p> <p>Note: Not for use as an engineering major technical elective and is not applicable to the baccalaureate degree.</p>	
<p>Credit/No Credit</p> <p>ENGR 30. Analytic Mechanics: Statics. Prerequisite(s): PHYS 11A and MATH 31 Term Typically Offered: Fall, Spring, Summer</p>	3 Units	<p>Field trip(s) may be required.</p> <p>ENGR 70. Engineering Mechanics. Prerequisite(s): PHYS 11A. Term Typically Offered: Fall, Spring</p>	3 Units
<p>Statics of particles. Equivalent systems of forces. Equilibrium of rigid bodies. Centroids, centers of gravity and forces on submerged surfaces. Analyzes trusses including use of computer programs. Analyzes frames and machines. Forces in beams including shear and moment diagrams. Friction. Moments of inertia.</p>		<p>Statics of particles. Equivalent systems of forces. Equilibrium of rigid bodies. Centroids, centers of mass and gravity. Analyzes trusses, frames and machines. Friction. Moments of inertia. Fundamental principles of kinematics and kinetics, study of motion and force analysis of particles and rigid bodies.</p>	
<p>ENGR 45. Engineering Materials. Prerequisite(s): CHEM 1E and MATH 30. CHEM 1E may be taken concurrently. Term Typically Offered: Fall, Spring, Summer</p>	3 Units	<p>ENGR 96A. Interdisciplinary Topics in Engineering. Term Typically Offered: Fall, Spring</p>	1 Unit
<p>Basic principles of mechanical, electrical and chemical behavior of metals, polymers and ceramics in engineering applications; topics include bonding, crystalline structure and imperfections, phase diagrams, corrosion, and electrical properties. Laboratory experiments demonstrate actual behavior of materials; topics include metallography, mechanical properties of metals and heat treatment. Lecture two hours; laboratory three hours.</p> <p>Note: Fee course.</p>		<p>Course will enable students to make an informed choice of their engineering majors, engage on interdisciplinary discussions between engineering fields, and equip them with relevant study skills. An introduction to engineering and the fundamentals of problem solving. Distinctions between different disciplines within engineering as well as other similarities. The engineering profession and ethics. Study skills for an engineering education.</p> <p>Credit/No Credit</p>	
<p>Fee course.</p> <p>ENGR 45W. Engineering Materials Workshop. Term Typically Offered: Fall, Spring, Summer</p>	1 Unit	<p>ENGR 105. Sustainable Design and Construction. Prerequisite(s): Upper division standing or instructor permission. General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p>	3 Units
<p>Problem solving and discussion of topics in materials science to enhance students' understanding of subject matter. Activity two hours.</p> <p>Note: Can not be used for the degree requirement.</p>		<p>Strategies, analysis methods, and processes of environmentally conscious planning, design, construction, operation, deconstruction, and assessment of engineered facilities. Presents a systematic framework for problem solving, decision making, design, and construction using the principles of sustainability as guiding objectives. Tools, and techniques for gathering information, generating, analyzing, and evaluation alternatives, and developing implementation strategies are presented and demonstrated.</p>	
<p>Credit/No Credit</p> <p>ENGR 50. Computational Methods and Applications. Prerequisite(s): Math 30 and PHYS 11A; Physics 11A may be taken concurrently Term Typically Offered: Fall, Spring</p>	3 Units	<p>ENGR 110. Analytic Mechanics - Dynamics. Prerequisite(s): Student must pass ENGR 30, MATH 45, and MATH 32 or MATH 35 or MATH 100 with a minimum grade of C- or better. Term Typically Offered: Fall, Spring, Summer</p>	3 Units
<p>Computational methods for solving problems in analysis and design. Introduces lower division students to the use of computer technology for the computations required to solve real world problems in science and engineering. Includes introduction to numerical techniques, introduction to structured programming, and graphic visualization. Practical applications of analysis and design using tools such as MATLAB and C++. Emphasis is on developing confidence and skill in finding computational solutions to practical science and engineering problems. Portable computer recommended. Lecture three hours.</p>		<p>Fundamental principles of kinematics and kinetics, study of motion and force analysis of particles and rigid bodies, application to idealized structures and physical systems, introduction to free and forced vibrations.</p>	

ENGR 110W. Analytic Mechanics-Dynamics Workshop. 1 Unit Corequisite(s): ENGR 110. Term Typically Offered: Fall, Spring, Summer	ENGR 132. Fluid Mechanics. 3 Units Prerequisite(s): ENGR 110 (may be taken concurrently) Term Typically Offered: Fall, Spring, Summer
Problem solving and discussion of topics in dynamics to enhance students' understanding of subject matter. Activity two hours. Note: Can not be used for degree requirement.	Lectures and problems in the fundamental principles of incompressible and compressible fluid flow.
Credit/No Credit	ENGR 140. Engineering Economics. 2 Units Prerequisite(s): ENGR 17 or ENGR 30 Term Typically Offered: Fall, Spring, Summer
ENGR 112. Mechanics Of Materials. 3 Units Prerequisite(s): ENGR 30; ENGR 45; MATH 45; and either CE 4 or ENGR 6 (CE 4 or ENGR 6 may be taken concurrently). Term Typically Offered: Fall, Spring, Summer	Evaluation of economic consequences of engineering design proposals on projects. Emphasis on marginal or incremental economic analysis using Net Present Value, Annual Equivalence, Rate of Return and Benefit-Cost methods including multiple alternatives, taxes, uncertainty, inflation, organizational constraints and money market factors.
Stresses, strains and deformations in elastic behavior of axial force, torsion and bending members, and design applications. Statically indeterminate problems. Strain energy. Column stability.	ENGR 150. Technical Communication. 3 Units Prerequisite(s): Recommendation based on the results of the WPG or instructor permission Term Typically Offered: Fall, Spring
ENGR 115. Statistics For Engineers. 3 Units Prerequisite(s): MATH 31, may be taken concurrently. Term Typically Offered: Fall, Spring	Practical technical communication for engineers and computer scientists. Topics covered include practical technical writing, improving technical writing style, development of strategies to improve writing, oral presentations, running effective meetings, and the use of visual aids. The use of appropriate communication technology is emphasized throughout the course.
Application of statistical methods to the analysis of engineering and physical systems. Data collection, characteristics of distributions, probability, uses of normal distribution, linear and nonlinear regression analysis, hypothesis testing, and decision-making under uncertainty.	ENGR 181. Electronic Materials. 3 Units Prerequisite(s): CHEM 1A, PHYS 11A, MATH 45. Term Typically Offered: Fall, Spring
ENGR 117W. Networks Workshop. 1 Unit Corequisite(s): EEE 117. Term Typically Offered: Fall, Spring	Basic principles of materials behavior pertaining to electronics applications. Topics include electrical conductivity, bonding, crystal structures, optical properties, magnetic properties, energy transfer, and the fundamentals of some simple electronic devices. Lecture 3 hours.
Elaborates on fundamentals and enhances students' understanding of networks. Note: Not for degree credit.	ENGR 194. Career Development Seminar. 1 Unit Term Typically Offered: Fall, Spring
Credit/No Credit	This course is designed for all ECS majors making career decisions and developing a job search strategy. Instruction will include: effective career planning strategies and techniques including skill assessment, interests, values, job search organization and strategies, goal setting, and time management as well as professional image development including interview techniques, resume writing, employment related correspondence and portfolio construction. Guest speakers from industry will be featured. Credit/No Credit
ENGR 120. Probability and Random Signals. 3 Units Prerequisite(s): EEE 180; may be taken concurrently. Term Typically Offered: Fall, Spring, Summer	ENGR 196B. Energy and Modern Life. 3 Units Term Typically Offered: Fall, Spring
Probability and random signals and their application in engineering systems. Topics include the random sample space model, concept of axiomatic probability, conditional probability, discrete and continuous random variables, probability density and distribution functions, functions and statistics of random variables, random vectors multivariate distributions, and correlation and covariance of random vectors. Applications include estimation, risk, signal detection, random signals and noise in linear systems, reliability, and estimation.	Our "modern life" is intimately and increasingly intertwined with energy utilization. This course deals with where energy comes from, how it is converted to desirable forms, where it is consumed, and what the consequences of this consumption are. In each case, historical perspective, current status, and future projections will be discussed. The ultimate objective of this course is to help students to make informed decisions on energy-related issues in their personal life and as responsible citizens of the society.
ENGR 124. Thermodynamics. 3 Units Prerequisite(s): CHEM 1E, PHYS 11A, and MATH 32 or MATH 35 or MATH 100. Term Typically Offered: Fall, Spring, Summer	ENGR 124W. Thermodynamics Workshop. 1 Unit Corequisite(s): ENGR 124. Term Typically Offered: Fall, Spring, Summer
Study of thermodynamic principles and their applications to engineering problems. Includes a study of the first and second laws, the properties of pure substances and ideal gas, gas/vapor mixtures, and an introduction to thermodynamic cycles.	Problem solving and discussion of topics in thermodynamics to enhance students' understanding of subject matter. Activity two hours. Credit/No Credit

ENGR 201. Engineering Analysis I.**3 Units****Prerequisite(s):** MATH 45.**Term Typically Offered:** Fall, Spring

Mathematical methods for the solution of advanced engineering problems. Vector analysis, tensors and matrix algebra, complex variable techniques. The applications of these methods to practical engineering problems are demonstrated.

ENGR 202. Engineering Analysis II.**3 Units****Prerequisite(s):** MATH 45.**Term Typically Offered:** Fall, Spring

Mathematical methods for the solution of advanced engineering problems. Solutions of ordinary and partial differential equations, Fourier series and Laplace transforms and operational calculus. The applications of these methods to practical engineering problems are demonstrated.

ENGR 203. Engineering Statistics.**3 Units****Prerequisite(s):** ENGR 115 or equivalent.**Term Typically Offered:** Fall, Spring

Applications of statistics to engineering problems. Collection and analysis of data, sampling methods, design of experiments, probability theory, decision theory, analysis of variance, regression analysis, and mathematical curve fitting.

ENGR 296. Experimental Methods for Fluids.**3 Units****Prerequisite(s):** ENGR 132, and either MATH 32 or ENGR 202**Term Typically Offered:** Spring only

Experimental methods for flow and transport phenomena are studied in the lecture and applied in the lab/field. Topics include planar laser induced fluorescence, acoustic velocimetry, and sediment transport.

ENGR 296A. Quality Management Systems for Engineers.**3 Units****Prerequisite(s):** Graduate Standing**Term Typically Offered:** Fall, Spring

Designed to equip students with understanding of basic terms and definitions related to quality, a brief history and basic quality concepts, understanding measurement systems and tools, understanding differences of quality control (QC), quality assurance (QA) and quality management (QM), getting familiar with the applications of different tools, systems and standards and how to select proper tools for different quality requirements. Understanding basic inspection, auditing, assessment and evaluation techniques.

Minor in Engineering

Units required for Minor: 21, of which 12 must be upper division

Program Description

Non-majors in Engineering may elect to minor in this field. Students who have not completed the lower division requirements in calculus, including differential equations, physics, chemistry, and a few engineering courses will find it difficult to complete this minor in the four-year program due to the prerequisite requirements of upper division engineering courses.

Students wishing to minor in Engineering must have their minor program approved by the Associate Dean of the College of Engineering and Computer Science.

Program Requirements

Code	Title	Units
ENGR 17	Introductory Circuit Analysis	3
ENGR 30	Analytic Mechanics: Statics	3
ENGR 45	Engineering Materials	3
ENGR 110	Analytic Mechanics - Dynamics	3
ENGR 112	Mechanics Of Materials	3
ENGR 124	Thermodynamics	3
ENGR 132	Fluid Mechanics	3
Total Units		21

Mechanical Engineering

College of Engineering and Computer Science

Program Description

Mechanical Engineering involves the design of all types of machines and equipment including vehicles used in ground, air, and space transportation; machines for the conversion of fuels into energy; food processing; consumer products; robots; biomedical devices; the machines used to manufacture all of the above; and the climate control of buildings. Mechanical engineers bring together the fields of design graphics, manufacturing, engineering materials, thermodynamics and heat transfer, and the principles of mathematics and science to find solutions to societal needs. They often work directly in the design and operation of food processing plants, power plants, manufacturing plants, refineries, and other industrial operations. A major goal of the curriculum is to provide the graduates with the analytical and practical skills needed to perform mechanical design in a variety of fields, preparing graduates to take advantage of the many employment opportunities.

The Mechanical Engineering Program includes courses on design, thermal sciences, manufacturing, properties, and selection of materials, and computer applications related to these topics. The curriculum maintains a balance among basic fundamentals, analytical methods, and design applications of current knowledge, preparing the graduates for both entry into the profession and a life-long career.

The employers of Mechanical Engineering graduates include aircraft and automobile companies, food processing companies, machinery and equipment companies, gas and electric utilities, architectural and engineering firms, and many agencies in federal, state, and local governments. Some graduates continue their education by completing advanced degrees in Engineering or Management.

Cooperative Education Program (Work Experience)

The Department of Mechanical Engineering encourages students to participate in the Cooperative Education Program, which provides alternate periods of university study and major-related, off-campus, paid employment in industry. Most students who elect to participate in cooperative education will complete the equivalent of two 6-month work periods before graduation.

Students interested in the Cooperative Education Program should apply in Lassen Hall 1013. For information, call (916) 278-6231.

Degree Programs

BS in Mechanical Engineering (p. 595)

Blended BS/MS in Mechanical Engineering Program (p. 594)

MS in Mechanical Engineering (p. 597)

- Specializations in Aerospace Systems, Design & Dynamic Systems, Manufacturing & Materials Engineering, and Thermal & Fluid Systems

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Mechanical Engineering is also individually accredited by ABET, Inc.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The Mechanical Engineering program is ABET accredited by the Engineering Accreditation Commission (EAC/ABET), Engineering Accreditation Commission (EAC/ABET)
111 Market Place, Suite 1050
Baltimore, Maryland 21202
(410) 347-7700
In keeping with its accreditation, the Mechanical Engineering program has strong engineering design content. In particular, the program includes a four-semester sequence on modern design and manufacturing methods.
- Faculty members have backgrounds in Mechanical, Aeronautical, Manufacturing, and Materials Science. The faculty has a variety of research interests; the majority has industrial experience which contributes to the applied emphasis in the Mechanical Engineering program. Most of the faculty have doctorates; some are registered Professional Engineers (PE).
- Lectures and lab are arranged so students can participate in meaningful discussions and a real exchange of ideas between students and faculty.
- Upper division students do cooperative work on team projects and often develop study groups for other courses.
- Courses taken in the freshman and sophomore years form a foundation for the upper division program; e.g., the dynamics and strength of materials studied in the junior year depend on the sophomore mechanics, calculus, and physics courses. Building on analytical and communications skills learned in the lower division, students take a four semester design-project sequence which includes the study of design methods, and the procedures for developing a design solution from concept through a fully-developed design and finally to production. The courses in mechanics, energy transformation, manufacturing, and materials support this sequence.

- Students can take elective courses in computer analysis, heating, ventilating and air-conditioning, manufacturing methods, and systems and materials engineering.

Program Educational Objectives

Mechanical Engineering Graduates will have:

- utilized a foundation in engineering and science to engage in successful careers in mechanical engineering or other fields to the benefit of society.
- become effective participants or leaders in innovation and multi-disciplinary collaboration to address global technical, social, and industrial issues.
- engaged in career and professional development through self-study, continuing education, or graduate studies in engineering or other professional fields.

Academic Policies and Procedures

Course Repeat Policy - Undergraduate engineering and mechanical engineering courses that are used to meet the Bachelor of Science in Mechanical Engineering degree requirements may be repeated only twice (for a total of three attempts). Grades of the second and third attempts will be averaged in grade point calculations.

Incomplete Grades - Incomplete grades are issued only in accordance with University policy. The student must be passing the course at the time an "Incomplete" is requested. An Incomplete Petition must be submitted to the Department with the student's and the course instructor's signature. The Incomplete Petition (obtained in the Department Office) must specify the work to be completed, the basis by which the student's final grade will be determined, and the last date for completion of the incomplete work. An incomplete grade that is not cleared by the set date will lapse to an "F" grade.

Career Possibilities

Aeronautical Engineer · Automotive Engineer · Design Engineer · Development Engineer · Energy Management Engineering Manager · Environmental Engineer · Food Processing Machine Designer · Manufacturing Engineer · Plant Engineer · Project Engineer · Research Engineer · Technical Sales Engineer

ME 37. Manufacturing Processes. 3 Units
Term Typically Offered: Fall, Spring, Summer

Principles of manufacturing processes in the areas of metal removal, forming, joining and casting and fundamentals of numerical control. Study includes applications of equipment, e.g., lathe, milling machine, drill press, saw, grinder, welder, molding equipment and core makers. Emphasis on safety during hands-on operations. Two hours lecture, one three-hour lab.

ME 105. Introduction to Technical Problem Solving. 3 Units
Prerequisite(s): ENGR 17 and ENGR 30.
Term Typically Offered: Fall, Spring, Summer

Introduction to the use of computers for engineering, science and mathematical computations. Introduction to linear algebra and matrix applications. Introduction to concepts of programming and visualization using MATLAB and PBasic. Practical applications involving design using a microcontroller. Applications will be drawn from a variety of science and engineering areas. Lecture two hours, Laboratory three hours.

ME 108. Professional Topics for Mechanical Engineers. 2 Units
Prerequisite(s): MATH 31
Term Typically Offered: Fall, Spring

Introduction to statistical methods applied to analysis of engineering systems. Topics include data collection, distribution characteristics, probability, uses of regression analysis, and decision-making under uncertainty. Introduction to economic analysis applied to engineering designs. Topics include marginal or incremental economic analysis using multiple standard methods while addressing organizational constraints and market factors. Investigations into the roles engineers play in society in working toward sustainability, and ethical decision making in a technological world.

ME 114. Vibrations. 3 Units
Prerequisite(s): ENGR 110, ME 105.
Term Typically Offered: Fall, Spring

Generation of equations of motion for single and multiple degree freedom systems. Study of natural frequencies, eigenvectors, free and forced response, modes of vibration and vibration control and isolation. Mechanical and structural vibrations with applications to rotating machinery and vehicles. Fundamentals of acoustics and the engineering of musical instruments.

ME 115. Dynamics of Machinery and Multi-Body Systems. 3 Units
Prerequisite(s): ENGR 110, ME 105.
Term Typically Offered: Fall, Spring

Kinematic and kinetic analysis of mechanisms. Rigid and flexible multi-body assembly models in two and three dimensions. Use of solid modeling, dynamic analysis and finite element methods. Study of loads on linkages, cams, gears as integral functioning components of machines, ground and space vehicles. Study of forces and moments in machinery under impulsive and impact forces, balancing, and elements of vibration.

ME 116. Machinery Design I. 2 Units
Prerequisite(s): ENGR 6, ENGR 112, and ME 37. ENGR 112 and ME 37 may be taken concurrently.
Term Typically Offered: Fall, Spring

Introduction to basic design methodology for mechanical systems and devices. Detail design of machine components; application of analytical methods in the design of complex machines. Failure mode analysis, theories of failure, yield, fracture, deflection, and fatigue analysis of machine elements. Design of common machine elements such as bearings and shafts.

ME 117. Machinery Design II. 2 Units
Prerequisite(s): ME 116.
Term Typically Offered: Fall, Spring

Introduction to design of machine components; application of analytical methods in the design of complex machines. Design of common machine elements such as threaded fasteners, springs, flexible drive components, gears, and friction devices. Introduction to stress and deflection analysis using finite element software.

ME 121. Solar Thermal and Energy Storage Systems. 2 Units
Prerequisite(s): ENGR 124.
Term Typically Offered: Fall, Spring

Study of solar thermal heat and power and energy storage including the characterization, theory, operation, analysis and modeling of solar thermal and energy storage systems.

ME 122. Geothermal and Bioenergy Systems. 2 Units
Prerequisite(s): ENGR 124
Term Typically Offered: Fall, Spring

Study of geothermal and bioenergy systems including the characterization, theory, operation, analysis and modeling.

ME 123. Wind, Hydro and Ocean Energy. 3 Units
Prerequisite(s): ENGR 124 and ENGR 132.
Term Typically Offered: Fall, Spring

Exploring sustainable energy and power generation, through study of wind, hydro and ocean energy systems, including the characterization, theory, operation, analysis, modeling, planning impacts and design process.

ME 126. Heat Transfer. 3 Units
Prerequisite(s): ENGR 124 and ENGR 132.
Term Typically Offered: Fall, Spring, Summer

Basic principles of heat transfer, including processes of conduction, convection, radiation, evaporation and condensation. Lecture three hours.

<p>ME 126W. Heat Transfer Workshop. 1 Unit Corequisite(s): ME 126. Term Typically Offered: Fall, Spring, Summer</p>	<p>ME 141. Introduction to Tolerance Analysis. 2 Units Prerequisite(s): ME 116 Term Typically Offered: Fall, Spring</p>
<p>Problem solving and discussion of heat transfer to enhance students' understanding of subject matter. Note: May be repeated for credit.</p>	<p>Introduction to techniques used in manufacturing tolerance analysis. Assembly tolerance analysis using standard industry practices; application of geometric dimensioning techniques to tolerance analysis; drawing practices for indicating dimensional tolerances; statistical techniques; tolerance allocation. Introduction to computer aided tolerance analysis.</p>
<p>Credit/No Credit ME 128. Thermal-Fluid Systems. 3 Units Prerequisite(s): ENGR 124. Term Typically Offered: Fall, Spring, Summer</p>	<p>ME 143. Vehicle Dynamics and Design. 3 Units Prerequisite(s): ENGR 110 and ME 117. Term Typically Offered: Fall, Spring</p>
<p>Fundamentals of the Otto, Diesel, Brayton and Rankine power cycles, vapor-compression refrigeration, psychrometric processes and chemical reactions. Theory and application of temperature, pressure, flow, and velocity instruments, introduction to experiment design, errors, uncertainty and data acquisition, data analysis and presentation.</p>	<p>Principles and practice in vehicle dynamics and design using computer aided techniques. Design methods for passenger vehicles, SUVs, trucks, motorcycles and space vehicles. Study of tires, drivetrain and gear boxes in ground vehicles. Kinematics and kinetics of mechanisms in two and three dimensions with applications to suspensions, steering mechanisms. Frame design using finite element analysis, power trains, braking, auxiliary systems. Computer dynamic models for analysis of vehicle stability, collisions rollovers, and failure analysis using state-of-the-art software.</p>
<p>ME 136. Numerical Control Programming. 3 Units Prerequisite(s): ME 37 and ME 105; ME 105 may be taken concurrently. Term Typically Offered: Fall, Spring</p>	<p>ME 151. Fundamentals of Combustion. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Computer programming languages for automated manufacturing, including CNC manual programming, cutter compensation, geometric definition of products, cutting tool definition, continuous path part programming, computation, decision, looping, computer graphics programming and intelligent machines.</p>	<p>Principles of combustion and pyrolysis of gaseous, liquid, and solid materials. Applications of principles, including analysis and design of stationary and mobile powerplants, waste management, and fire safety.</p>
<p>ME 137. Product Design for Manufacturing and Automation. 3 Units Prerequisite(s): ME 117. Term Typically Offered: Fall, Spring</p>	<p>ME 152. Turbomachinery Design. 3 Units Prerequisite(s): ME 105. Term Typically Offered: Fall, Spring</p>
<p>Various manufacturing and automation aspects of product design, including design for machining, design for automation, applications of CAD/CAM software in product design and automation, and rapid prototyping. Virtual design and manufacturing and agile manufacturing will also be discussed.</p>	<p>Theoretical analysis of energy transfer between fluid and rotor; principles of axial, mixed, and radial flow compressors and turbines. Applications and computer-aided design of various types of turbomachines.</p>
<p>ME 138. Concurrent Product and Process Design. 3 Units Prerequisite(s): ME 37 and ME 116. Term Typically Offered: Fall, Spring</p>	<p>ME 153. Thermodynamics of Combustion Engines. 3 Units Prerequisite(s): ENGR 124, ENGR 132, ME 105. Term Typically Offered: Fall, Spring</p>
<p>Manufacturing considerations in product design including: design for manufacturing (DFM), design for assembly (DF A), design to cost (DTC), design to life cycle cost (DTLCC), design for quality and reliability (DFQR); introduction to concurrent engineering. Two hours lecture, three-hour lab.</p>	<p>Application of thermodynamic and fluid mechanical analysis to various kinds of engines, including those based on Otto, Diesel, Brayton, Rankine, and Stirling cycles. Development of computer models and comparison of cycles in terms of applications to land, marine, and aerospace propulsion.</p>
<p>ME 140. Introduction to Motors and Actuators. 2 Units Prerequisite(s): ME 172 or EEE 184. Term Typically Offered: Fall, Spring</p>	<p>ME 154. Alternative Energy Systems. 3 Units Prerequisite(s): ENGR 124. Term Typically Offered: Fall, Spring</p>
<p>Power conversion hardware used in electromechanical systems. Operation and sizing of electric motors, both DC and AC systems, motor controllers, and power electronics; sensors; design in fluid power systems, both pneumatic and hydraulic; and power transmission systems such as ball screws and belt drivers.</p>	<p>Study of alternative energy technologies, such as renewable fuels, wind, solar, oceanic and geothermal power. Concentration on fundamental thermodynamic principles, modern design features and non-technical aspects of each technology.</p>
<p>ME 141. Introduction to Tolerance Analysis. 2 Units Prerequisite(s): ME 116 Term Typically Offered: Fall, Spring</p>	<p>ME 155. Gas Dynamics. 3 Units Prerequisite(s): ME 105. Term Typically Offered: Fall, Spring</p>
<p>Thermodynamics and mechanics of one-dimensional compressible flow; isentropic flow; normal and oblique shock waves; Prandtl-Meyer flow. Combined effects in one-dimensional compressible flow. Nozzles, diffusers and shock tubes. Computer use in gas dynamics.</p>	<p>Thermodynamics and mechanics of one-dimensional compressible flow; isentropic flow; normal and oblique shock waves; Prandtl-Meyer flow. Combined effects in one-dimensional compressible flow. Nozzles, diffusers and shock tubes. Computer use in gas dynamics.</p>

- ME 156. Heating and Air Conditioning Systems.** **3 Units**
Prerequisite(s): ENGR 124, ENGR 132.
Term Typically Offered: Fall, Spring
- Theory and design of heating, ventilating and air conditioning for industrial and comfort applications. Topics include refrigeration cycles, heating and cooling load calculations, psychrometrics, solar heating and cooling component, and system design.
- ME 157. Solar Energy Engineering.** **3 Units**
Prerequisite(s): ME 126; may be taken concurrently.
Term Typically Offered: Fall, Spring
- In-depth study of the basics of solar engineering, including the nature and availability of solar radiation; operation, theory and performance of solar collectors; energy storage and model of solar systems.
- ME 159. High Efficiency HVAC.** **3 Units**
Prerequisite(s): ME 156 or instructor permission.
Term Typically Offered: Fall, Spring
- Starts with a review of the theory and design of HVAC systems. Recent improvements and new developments in cooling and heating equipment are studied in detail. Computer models such as the Trane TRACE Program are used to size an HVAC system with an emphasis on high efficiency. Computer based controls and energy management systems are discussed and demonstrated. Field trips to energy efficient installations are included.
 Field trip(s) may be required.
- ME 164. Introduction to Test Automation.** **3 Units**
Prerequisite(s): ME 105, ME 117.
Term Typically Offered: Fall, Spring
- Basic concepts to automate testing procedures. Introduction to sensors, signal conditioning, sampling theory, design of experiments, data acquisition software, and data reduction techniques. Hands-on experience with PC based data acquisition software and hardware which will be used to create testing programs. Lecture two hours; laboratory three hours.
- ME 165. Introduction To Robotics.** **3 Units**
Prerequisite(s): ME 105, ME 116
Term Typically Offered: Fall, Spring
- Fundamentals of design and application of industrial robotics. Manipulator kinematics, trajectory planning and controller design, design of end effectors and actuators, sensors, programming languages, and machine vision. Applications in manufacturing, approach to implementing robotics, economic analysis for robotics. Lecture two hours; laboratory three hours.
- ME 171. Modeling and Simulation of Mechatronics and Control Systems.** **3 Units**
Prerequisite(s): ENGR 110, ME 105.
Term Typically Offered: Fall, Spring, Summer
- Computer modeling and mathematical representation of mechanical, electrical, hydraulic, thermal, and electronic systems or combinations of these. Development of system design criteria and solutions using computer simulation. Use of state of the art automated modeling and simulation methods to build models of multi-energy mechatronics and control systems. Vibration concepts, applied, natural frequencies, eigenvectors, and solution of differential equations using computer simulation. Introduction to state variable feedback control systems. A design project is required.
- ME 172. Control System Design.** **3 Units**
Prerequisite(s): ME 171.
Term Typically Offered: Fall, Spring, Summer
- Use of mathematical models for the generation of equations of motion for mechanical and electrical systems. Evaluation of single and multiple degrees of freedom systems in the time and frequency domain. Topics include feedback control systems, Laplace transform, state space representation, transfer functions, error analysis, stability of control systems and system response. Automatic control system design using root locus and frequency response methods. Design of compensating controls using state of the art software and automation tools. Introduction to digital control.
- ME 173. Applications of Finite Element Analysis.** **3 Units**
Prerequisite(s): ENGR 112, ME 105.
Term Typically Offered: Fall, Spring
- Mathematical fundamentals of Finite Element Modeling (FEA). Engineering analysis and design of structural members, and machinery components using FEA models. Model generation using computer graphics. Computer solutions of static, dynamic, heat transfer, stress analysis, fluid mechanics and structural problems.
- ME 176. Product Design & CAD.** **3 Units**
Prerequisite(s): ENGR 6, ME 105 and ME 116.
Term Typically Offered: Fall, Spring
- Digital product development using an integrated CAD system. Philosophy of parametric design. Component and assembly design, basic drawing creation, and simulations. Team product design investigating the effects of variations in geometry, dimensions, and material selection. Lecture two hours; laboratory three hours.
- ME 177. Product Design and 3D Parametric Solid Modeling.** **3 Units**
Prerequisite(s): ENGR 6, ME 105 and ME 116.
Term Typically Offered: Fall, Spring
- Introduction to Solid Modeling and its application to mechanical product design. Digital product development using 3D Parametric Solid Modeling tools. Also covers component and assembly design, basic drawing creation. Reverse design project engineering investigating the effects of variations in geometry, dimensions, and material selection. Lecture two hours; laboratory three hours.
- ME 180. Mechanical Properties of Materials.** **3 Units**
Prerequisite(s): ENGR 112
Term Typically Offered: Fall, Spring, Summer
- Principles of mechanical properties of metals, including strength under combined loads, fatigue, and fracture mechanics. Laboratory includes study of strengthening mechanisms, and principles of experimental stress analysis. Lecture two hours; Laboratory three hours.
- ME 180W. Mechanical Properties of Materials Workshop.** **1 Unit**
Corequisite(s): ME 180.
Term Typically Offered: Fall, Spring, Summer
- Problem solving and discussion of mechanical properties of materials to enhance students' understanding of subject matter.
 Credit/No Credit

<p>ME 182. Introduction to Composite Materials. 3 Units Prerequisite(s): ME 180. Term Typically Offered: Fall, Spring</p>	<p>ME 195. Professional Practice. 1 - 6 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Properties, mechanics, and applications of anisotropic fiber-reinforced materials with an emphasis on the considerations and methods used in the design of composite structures.</p>	<p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report. Credit/No Credit</p>
<p>ME 184. Corrosion and Wear. 3 Units Prerequisite(s): ME 180. Term Typically Offered: Fall, Spring</p>	<p>ME 195A. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Introduction to the phenomena of corrosion and wear, including the electro-mechanical bases of corrosion, examples of corrosion of iron, steel and stainless steels, and prevention of corrosion. Fundamentals of wear are covered including effects of loads, material properties, and lubrication on wear rates.</p>	<p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report. Credit/No Credit</p>
<p>ME 186. Fracture Mechanics in Engineering Design. 3 Units Prerequisite(s): ME 180. Term Typically Offered: Fall, Spring</p>	<p>ME 196A. Motion and Dynamic Analysis using Solid Modeling. 3 Units Prerequisite(s): ENGR 6 and ME 117. Term Typically Offered: Fall, Spring</p>
<p>Fracture mechanics approach to mechanical design; role of microstructure in fracture toughness and embrittlement; environmentally-induced cracking under monotonic and fatigue loads; laboratory techniques; service failures in various industries and failure mechanisms.</p>	<p>Practical approach to study of motion and dynamic analysis of machine components and assemblies in two or three dimensions. Uses solid modeling software to analyze the forces, moments and dynamic loads for parts and entire assemblies in motion. Topics include stress and strain during motion, kinematics, kinetics, drop tests in two and three dimensions, frequency analysis, buckling, dynamic fatigue and finite element analysis, time history of motion, harmonics, and vibrations.</p>
<p>ME 190. Project Engineering I. 3 Units Prerequisite(s): ME 117 General Education Area/Graduation Requirement: Further Studies in Area B (B5) Term Typically Offered: Fall, Spring, Summer</p>	<p>ME 196B. Engineering Systems Approach to Product Design. 2 Units Prerequisite(s): ME 116 Term Typically Offered: Fall, Spring</p>
<p>Beginning of a two semester project; design of a product, device, or apparatus that will be fabricated in ME 191. Students work in small groups, interacting with product users, vendors, technicians, and faculty advisors. Lecture two hours; laboratory three hours.</p>	<p>Study of product design process and formal design methodologies. Various topics in product and system design including creativity, visualizations and communications, human factors, design for X methodology decision science, economics, product design and robust quality design.</p>
<p>ME 191. Project Engineering II. 2 Units Prerequisite(s): ME 190. Term Typically Offered: Fall, Spring, Summer</p>	<p>ME 196C. Computer Programming for Mechanical Engineering Applications. 2 Units Prerequisite(s): ME 105 Term Typically Offered: Fall, Spring</p>
<p>Continuation of the project begun in ME 190. Part II consists of fabrication and assembly of equipment, testing and evaluation, and reporting. Seminar one hour; laboratory three hours.</p>	<p>Computer programming languages such as C/C++, Java, Processing, and their applications to engineering problem solving using computer graphics, simulations, and physical prototyping. Programming computer communications with microprocessors for controlling sensors and motors.</p>
<p>ME 194. Career Development in Mechanical Engineering. 1 Unit Prerequisite(s): Senior status. Term Typically Offered: Fall, Spring</p>	<p>ME 196D. Ground Vehicle Aerodynamics. 3 Units Prerequisite(s): ENGR 132 Term Typically Offered: Fall, Spring</p>
<p>Designed for Mechanical Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessment, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour. Note: Units earned can not be used to satisfy major requirements.</p>	<p>Fundamental and applied subjects of aerodynamics for ground vehicle design and performance including flow features, aerodynamic forces, drag reduction strategies, and different methodologies for evaluation of aerodynamic forces and vehicle design. Numerical modeling approaches with experience of running a commercial computational fluid dynamics program. Units: 3 Units (2 Unit Lecture and 1 Unit Lab)</p>
<p>Credit/No Credit</p>	

ME 196E. Vehicle Safety and Crash Reconstruction. 3 Units
Term Typically Offered: Fall, Spring

Study of forensic engineering using state of the art technology in vehicles that contribute to passenger safety and stability. Application of principles of dynamics for forensic investigation and reconstruction of vehicle collisions. Study of seat belts, airbags, and electrohydraulic stabilizers. Study of the Event Data Recorders (EDRs), data analysis and verification with real cases using classical reconstruction techniques, and the use of computer simulations in two and three dimensions.

ME 196F. Materials Selection in Engineering Design. 3 Units
Prerequisite(s): ENGR 45 and ME 116. ME 116 may be taken concurrently.
Term Typically Offered: Fall, Spring

Quantitative treatment of materials selection for engineering applications. Discussion of the relationship between design parameters and materials properties. Emphasis on the influence of processing and fabrication on the properties of metals, ceramics, polymers and composites as related to the overall design process. Sustainability, Eco-Design, and manufacturability considerations.

ME 196G. Power Plant Design. 3 Units
Prerequisite(s): ENGR 124 and ME 128. ME 128 may be taken concurrently.

Study of modern power plants for electric power generation and cogeneration, covering technologies such as nuclear and fossil-fueled steam plants, gas turbine based systems, and emerging technologies. Thermos-economic analysis, parametric design, and environmental impact studies of different plant concepts. Utilization of industry-standard software tools to simulate complex plant configurations.

ME 196H. Air Resources Engineering. 2 Units
Prerequisite(s): ENGR 124 and ENGR 132. ENGR 132 may be taken concurrently.

Air quality standards. Stationary and transportation emission sources. Chemical and physical interactions of air pollutants, including greenhouse gases, with the atmosphere. Introduction to air quality modeling, including atmospheric temperature effects due to longwave thermal radiation. Air Quality measurement. Emission control strategies and design. Air resources economics and policy.

ME 196M. Engineering Research Methodology and Communication for Undergraduate Students. 3 Units
Prerequisite(s): ME 108
Term Typically Offered: Fall, Spring, Summer

This course will prepare students for engineering research by introducing them to how to identify, plan, conduct, and present a research project as well as research methods, literature review process, research ethics, writing proposal, writing technical reports, and oral and poster research presentations. The students will be conducting an independent supervised engineering research on an agreed-upon research project. They will refine their communication skills by working one-on-one with the instructor to present their research in a professional setting.

ME 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. Admission requires approval of an instructor and the student's advisor. May be repeated for credit.

Credit/No Credit

ME 206. Stochastic Modeling for Engineers. 3 Units
Prerequisite(s): MATH 45 or equivalent.
Term Typically Offered: Fall, Spring

Fundamentals and applications of stochastic processes for engineers, including a review of engineering statistics, autoregression moving average (ARMA) models, characteristics of ARMA models, ARMA modeling and forecasting, and transformation from discrete models to continuous models. Applications of stochastic processes in engineering field, e.g., precision manufacturing, monitoring and diagnosis of machines, tools, and processes, system identification, vibrations, and statistical process control (SPC).

ME 209. Research Methodology. 2 Units
Prerequisite(s): Graduate status in Mechanical Engineering.
Term Typically Offered: Fall, Spring

Research methodology and engineering approach to problem solving. Includes an orientation to the requirements for Master's thesis in Mechanical Engineering. Students will be exposed to a variety of possible thesis topics. Students will be required to complete an essay concerning aspects of engineering research. The student will be required to prepare a presentation and also review other students work.
Note: Graduate Writing Intensive (GWI) course.

ME 233. Intelligent Product Design and Manufacturing. 3 Units
Prerequisite(s): ME 105, ME 138.
Term Typically Offered: Fall, Spring

Application of expert systems, fuzzy logic and neural networks in product design and manufacturing. Concurrent product and process design using expert systems and fuzzy logic. Monitoring tool conditions and manufacturing processes using neural networks so as to achieve high quality, high efficiency, and automation.

ME 236. Computer Controlled Manufacturing Processes. 3 Units
Prerequisite(s): ME 105, ME 138.
Term Typically Offered: Fall, Spring

Applications of logic and motion controls in manufacturing. Computer controlled open and feedback systems. CNC machining processes, CNC programming. Applications of robots in manufacturing, programming for robots. PLC logic controls, sensors and output devices, creating ladder logic diagrams for the PLCs. Design for Manufacturing (DFM) and Design for Assembly (DFA) of modern computer controlled machines.
Note: Lectures as well as some tutorial activities are covered in two 75-minute classes per week.

ME 237. Digital Control of Manufacturing Processes. 3 Units
Prerequisite(s): ME 105, ME 138, MATH 45.
Term Typically Offered: Fall, Spring

Introduction to both the theory and applications of digital control of manufacturing processes, including the discrete controller for manufacturing, digital controlled systems for manufacturing, sensors of control loop for manufacturing, discrete process models for manufacturing, manufacturing system input and response, and stability analysis of manufacturing systems.

ME 238. Automated Inspection.**3 Units****Prerequisite(s):** ME 105, ME 138.**Term Typically Offered:** Fall, Spring

Introduction to measurement for machine accuracy and process quality including the use of coordinate measuring machines; system considerations and sensor technology in automated visual inspection; applications of pattern recognition in automated inspection.

ME 240. Mechanical Design Analysis.**3 Units****Prerequisite(s):** ENGR 201; ENGR 201 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Analyzes mechanical designs with respect to strength or deformation criteria. Elastic and inelastic failure criteria, energy methods, effects of temperature, stress concentrations, and fatigue are discussed.

ME 241. Optimum Mechanical Design.**3 Units****Prerequisite(s):** ENGR 201; ENGR 201 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Mathematical methods of optimum design using linear and non-linear optimization; constrained and unconstrained optimum design. Optimization of mechanical elements and assemblies to meet design requirements, material characteristics and geometry. Numerical methods and computer usage in optimal design. Application of these principles to realistic design problems.

ME 250. Heat Transfer: Conduction.**3 Units****Prerequisite(s):** ME 126, ENGR 202; ENGR 202 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Theory and analytical methods in steady-state and transient heat conduction. Development of the differential equations and initial and boundary conditions. Solutions by separation of variables, transforms, finite differences and integral methods. Heat transfer from extended surfaces.

ME 251. Heat Transfer: Convection.**3 Units****Prerequisite(s):** ME 126, ENGR 201; ENGR 201 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Analyzes convective heat and mass transfer. Development of the Navier-Stokes and energy equations for two-dimensional flows. Boundary layer theory and numerical techniques in solving convection problems. Analyzes turbulence, transport by Reynold's stresses and Prandtl's mixing length theory.

ME 252. Heat Transfer: Radiation.**3 Units****Prerequisite(s):** ME 126, ENGR 202.**Term Typically Offered:** Fall, Spring

Fundamentals and basic laws of radiative transfer. Properties of surfaces, spectral characteristics and configuration factors. Radiation transfer between surfaces. Absorbing, emitting and scattering media. Combined conduction, convection and radiation. Applications to solar energy systems.

ME 253. Advanced Fluid Mechanics.**3 Units****Prerequisite(s):** ENGR 132, graduate status.**Term Typically Offered:** Fall, Spring

Analytical and numerical analysis of Navier-Stokes equations for laminar flow; stability of laminar flow and its transition to turbulence. Analyzes stream functions and the velocity potential, and vorticity dynamics. The mathematical analysis of incompressible turbulent flows; development of Reynolds stress equations, turbulent boundary layer equations, turbulent flow in pipes and channels, and turbulent jets and wakes.

ME 255. Advanced Heat Transfer.**3 Units****Term Typically Offered:** Fall, Spring

Advanced topics in heat transfer including analytical and numerical solutions to heat conduction equations in both the steady and unsteady state; use of approximate and analytical techniques for the prediction of convective heat transfer in laminar and turbulent flows, heat transfer in high-velocity flows; analysis of the nature of thermal radiation and radiative heat transfer in enclosures.

ME 256. Mechanics and Thermodynamics of Compressible Flow.**3 Units****Prerequisite(s):** ENGR 201 or ENGR 202; ENGR 201 or ENGR 202 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Application of the laws of fluid mechanics and thermodynamics to problems of compressible flow in two and three dimensions; small perturbation theory, hodograph method and similarity rules for subsonic flow. Method of characteristics, shock wave analysis for steady, unsteady and supersonic, one-dimensional flows.

ME 258. Advanced Thermodynamics.**3 Units****Prerequisite(s):** ENGR 202.**Term Typically Offered:** Fall, Spring

Advanced topics in thermodynamics including applications of fundamental postulates to chemical, mechanical, magnetic and electric systems, theory of fluctuations, and irreversible thermodynamics.

ME 259. Introduction to Computational Fluid Dynamics.**3 Units****Prerequisite(s):** ENGR 132, ME 105 and ME 126.**Term Typically Offered:** Fall, Spring

Fundamentals of computational fluid dynamics, modeling of physical processes, including the fluid flow, heat and mass transfer, and computer skills. Basic concepts of numerical analysis using computer, including the solutions of ordinary and partial differential equations. Basic hands-on experience on using commercial computational fluid dynamics software packages.

ME 270. Advanced Computer-Aided Design of Dynamic Systems.**3 Units****Prerequisite(s):** ME 114 or ME 171.**Term Typically Offered:** Fall, Spring

Computer analysis, synthesis and modeling of physical systems including single and multiple degree of freedom, and linear/nonlinear systems. Use of Computer-Aided Modeling software (CAMP-G) and Advanced Digital Simulation Languages (ADSL). Design and analysis of multi-energy systems using Block Diagrams, Bond Graphs, and state space equation representation. Design of electromagnetic, electro-hydraulic servomechanisms, actuators and driven systems; introduction to multi-variable control of complex systems; stability, controllability, and observability.

ME 272. Finite Element Modeling in Computer-Aided Design. 3 Units
Prerequisite(s): ME 105, ME 173.
Term Typically Offered: Fall, Spring

Finite-element methods in the analysis and optimal design of machine components, structures, and distributed systems. Generation of FEA models using computers. Theoretical and practical application of a finite element code such as PATRAN to the solution of engineering problems. Topics include static and vibration analysis, stress analysis buckling, normal modes, direct and modal frequency response, transient analysis, and heat transfer.

ME 273. Multibody Dynamics of Rigid and Flexible Systems. 3 Units
Prerequisite(s): Graduate standing.
Term Typically Offered: Fall, Spring

Analysis and design of rigid and flexible multi-body assemblies in two and three dimensions with applications to mechanisms, machinery, ground and space vehicles. Kinematic and kinetic analysis in two and three dimensions; impulsive and impact forces; modes of vibration. Use of solid modeling, dynamic analysis and finite element analysis methods.

ME 274. Introduction to Flight Dynamics. 3 Units
Prerequisite(s): MATH 45, ENGR 110.
Term Typically Offered: Fall, Spring

Review of Laplace Transforms, matrix algebra, and aerodynamics. Derivation of aircraft rigid body equations of motion. Linearization of the equation of motion about reference flight (trim) condition, and separation into longitudinal and lateral equations of motion. Determination of aerodynamic stability derivatives and control effectiveness. Trim analysis, static and dynamic stability and control. Aircraft handling qualities and stability augmentation. Simulation of aircraft response to control and atmospheric inputs.

ME 275. Analysis of Aircraft Structures. 3 Units
Prerequisite(s): Graduate standing.
Term Typically Offered: Fall, Spring

Review of structural analysis: elasticity, virtual work and energy methods, torsion of solid sections, bending of plates, columns. Analysis of aircraft structures: materials, structural components of aircraft, airworthiness, airframe loads, fatigue, structural idealization, fuselages, wings.

ME 276. Advanced Vibration Theory. 3 Units
Prerequisite(s): ME 114, ME 171, or CE 166.
Term Typically Offered: Fall, Spring

Advanced study of mechanical and structural vibrations. Discrete and distributed parameter systems with linear and nonlinear characteristics. Variational principle, Lagrange's equation and finite element method. Matrix equation and eigenvalue problems. Modal analysis and modal testing. Stability and control. Theory developed through physical problems.

ME 278. Space Systems Engineering Management. 3 Units
Prerequisite(s): ENGR 110.
Term Typically Offered: Fall, Spring

Systems Engineering approach to plan and direct engineering projects. Emphasizes systems engineering process, requirement design fundamentals, subsystem fundamentals, trade studies, integration, technical reviews, case studies and ethics. Space exploration used as an example; skills applicable to any engineering project. Project-orientated course to plan the design of space and ground vehicles, satellites, airplanes and multidisciplinary subsystems.

ME 280. Advanced Mechanical Properties of Materials. 3 Units
Prerequisite(s): ME 180
Term Typically Offered: Fall, Spring

Mechanical properties of materials, with special attention to dislocations/defects and deformation and fracture control mechanisms. Mechanical properties of conventional engineering materials as well as advanced materials such as nanostructured materials are considered. Effects of defects on mechanical behavior at ambient and elevated temperature are discussed with attention given to strengthening mechanisms, creep, fatigue and fracture.

ME 285. Materials for Extreme Environments. 3 Units
Prerequisite(s): ME 180 or PHYS 110
Term Typically Offered: Fall, Spring

Comprehensive study of material applications in extreme environments, with special attention to mechanical, thermal and electronic behavior. Extreme temperature, pressure, corrosive or toxic environments and high rate deformation are considered. Currently available materials as well as emerging materials are explored for specific applications such as undersea, outer space, ballistic, nuclear, combustion, and other extreme application arenas.

ME 295. Fieldwork. 1 - 3 Units
Prerequisite(s): Permission of Graduate Coordinator or Department Chair.
Term Typically Offered: Fall, Spring

Supervised employment in industry or government that provides practical work experience. Requires satisfactory completion of the work assignment and a written report.
Note: Units may not be applied toward meeting the 30-unit requirement of the degree.

Credit/No Credit

ME 296L. Creative Engineering Design for Quality Products. 3 Units
Prerequisite(s): ME 138 and ME 180.
Term Typically Offered: Fall, Spring

Introduction to analytical and systematic design methodologies in creative and quality product design. Topics include product design process, creative conceptual design tools such as axiomatic design, theory of inventive problem solving (TRIZ), and engineering decision making. Quality product design including design of experiments, robust design techniques, and design optimization. Assignments include application of these principals to solving open-ended design problems using computing tools. Two hour lecture; Three hour laboratory.

ME 296O. Advanced Heat Transfer. 3 Units
Prerequisite(s): ME 126 and ENGR 202.
Corequisite(s): ENGR 202.
Term Typically Offered: Fall, Spring

Advanced topics in heat transfer including analytical and numerical solutions to heat conduction equations in both the steady and unsteady state; use of approximate and analytical techniques for the prediction of convective heat transfer in laminar and turbulent flows, heat transfer in high-velocity flows; analysis of the nature of thermal radiation and radiative heat transfer in enclosures.

ME 296P. Advanced Dynamics.**3 Units****Prerequisite(s):** Graduate Standing
Term Typically Offered: Fall, Spring

Newtonian mechanics: Newton's laws, impulse and momentum, work and energy. Analytical mechanics: Degrees of freedom, generalized coordinates, constraints. Lagrange multipliers, principles of virtual work, D'Alembert's principle, Hamilton's principle, Lagrange's equation of motion. Rotating reference frames. Rigid body dynamics: kinematics, linear and angular momentum, and kinetic energy of a rigid body, principle axes, equations of motion. Euler angles. Behavior of dynamic systems: motion about equilibrium points, stability, Lyapunov's direct method. Perturbation techniques: secular terms, Lindstedt's method, Duffing's equation.

ME 296Q. Advanced Solid Modeling.**3 Units****Prerequisite(s):** Student must pass ME 116.
Term Typically Offered: Fall, Spring

Advanced topics in computer-aided design for mechanical product design. Reviews on fundamental part and assembly modeling, and engineering drawings. Advanced modeling topics such as surface modeling, top-down assembly, macros and API programming, manufacturing oriented design such as sheet metal, plastic and mold design.

ME 296S. Advanced CAD for Aerospace Applications.**3 Units****Term Typically Offered:** Fall, Spring

Design of aerospace systems including profile definition, constraints, operations and visualizations, component design, transformation features, and insertions using advanced CAD software such as CATIA. Creation of complete assembly design including creation of product files, identifying, inserting and displacing components, constraining parts, numbering parts and scene creation. Specifics of sheet metal design for aerospace design including creation of flange, cut-out, joggle, holes, stampings and patterns.

ME 296U. Advanced Computer-Aided Product Design.**3 Units****Prerequisite(s):** ENGR 6 and ME 116, or graduate-level status
Term Typically Offered: Fall, Spring

Advanced topics in computer-aided design and applications for mechanical product design. Reviews of fundamental parts, assembly modeling, and engineering drawings. Advanced modeling topics such as surface modeling, design for manufacturing, simulation-based design, top-down assembly, macros and API programming.

ME 296V. Advanced Control System Design.**3 Units****Prerequisite(s):** ME 172
Design of Multi-Input/Multi-Output controllers using linear quadratic regulator method and advanced controls architectures. Architectures include Proportional, Proportional Integrator and Proportional Integrator Derivative (filter) schemes. The course also includes Digital Control, Optimal Control, Introduction to Guidance, Navigation and Control techniques.**ME 296W. Accident Biomechanics.****3 Units****Prerequisite(s):** ENGR 110

Study of the interaction of human body kinematics and dynamic biomechanics in accidents involving human activities and vehicles. Impact injury mechanisms, response of the human body using computer models and software analysis tools. Biomechanical response to impact, and tolerance levels. Human factors that influence the biomechanical reactions of people with their vehicles and the environment. Photographic and video analysis, computer graphics, and computer simulations. Forensic engineering to determine the dynamic forces that cause injury in different situations.

ME 299. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Any properly qualified student who wishes to pursue a problem of his/her own choice may do so if the proposed subject is acceptable to the faculty member with whom he/she works and to his/her advisor.
Credit/No Credit

ME 500. Master's Thesis.**1 - 6 Units****Prerequisite(s):** Open to students who have advanced to candidacy and have secured approval of a Thesis proposal form one full semester prior to registration.**Term Typically Offered:** Fall, Spring

Completion of a thesis. Credit given upon successful completion of a Master's Thesis (4 - 6 units; maximum 6 units).

Note: Course may be repeated for no more than 6 units total.

Blended BS/MS in Mechanical Engineering Program

Total units required for Blended BS/MS: 153

Program Description

The Blended BS/MS program in Mechanical Engineering allows qualified students in the BS degree program to simultaneously complete requirements for both the BS and MS degree. Students in the program can progress from undergraduate to graduate status without applying for admission through the Office of Graduate Studies.

Eligibility Requirements

Students majoring in Mechanical Engineering will be eligible to apply to the program if they meet the following criteria:

- Completion of the WPJ or equivalent, eligible for WI course, and completion of the prerequisites for ME 190 (Project Engineering I);
- Have not yet enrolled in ME 190; and
- Have a minimum GPA in major courses of 3.00.

Application Procedures

Students interested in applying to the Blended BS/MS Program should follow the following procedure:

- Prior to the tenth week during the semester before taking ME 190, students must complete the department application.
- Applicants do not need to pay the graduate program application fee.
- Electronic applications will be submitted to the ME Graduate Coordinator for review.

- Upon acceptance to the program, the department will notify the Registrar's Office and the Office of Graduate Studies in the change in status of the student.

Program of Study

In the two semesters of their senior year, students admitted to the program will be required to take the following graduate classes:

- ME 209 Research Methodology (2 units)
- Two graduate-level courses (200 level) in Mechanical Engineering selected in consultation with the Graduate Coordinator (3 units each)

When the students have completed the core courses for the undergraduate program and have completed the 8 units of graduate courses listed above, they will be converted to graduate status and the BS degree can be awarded. Students will be eligible to receive the MS degree when the remaining requirements for the graduate degree are completed (i.e., the requirements for the MS degree are the same whether taken separately or blended).

During their first semester in graduate status, students will be required to submit a thesis proposal to the ME department and to apply for advancement to candidacy.

Opt-Out Option

Students who wish to opt out after completing all other BS major requirements except the 6 units of ME electives may do so and the two graduate courses will count as two of the electives required in the normal undergraduate program. The total number of units taken for the BS degree will be the same (129 units) as for students who are not in the blended program.

BS in Mechanical Engineering

Units required for Pre-Major: 42 plus GE/GR courses

Units required for Major: 50 plus GE/GR courses

Total units required for BS: 122

Program Description

Sequence of Study: Courses taken in the Freshman and Sophomore years, either at Sacramento State, or at a Community College or transfer college, directly contribute to the upper division (Junior-Senior) program. For example, upper division work in Computer-Aided Design (CAD) develops skills introduced in freshman graphics and CAD courses; upper division analytical courses depend on the freshman and sophomore calculus and physics courses. Communication skills learned in the lower division are developed through the writing of reports and oral presentations.

Mechanical Engineering design involves far more than solving the types of problems found in chemistry, physics, and calculus courses; design work involves a large measure of analytical and creative work. The principles of mathematics and science are extremely useful when developing a detailed design solution but contribute little to the critical issues of correctly defining the problem, specifying the solution, and locating and organizing needed information. In addition, the design cannot violate fundamental physical laws and must be built from real materials using real manufacturing methods at a reasonable cost while satisfying safety and environmental factors.

The work in the four semester design-project sequence and other courses addresses these issues by including the study of design methods,

procedures for developing a design solution from concept through a fully-developed design, and construction of a prototype. The courses in mechanics, thermodynamics, manufacturing, and materials complement the design sequence. The design work includes a mixture of problem and project work in individual courses; some of the course-level projects are team projects to help the student develop the ability to efficiently and effectively work with other engineers making decisions, use the abilities of different colleagues, and distribute the work of large projects. The design sequence includes classical as well as computer aided design and analysis techniques. The work in the two-semester, capstone and senior project sequence involves team effort on a significant design problem. Students interested in furthering their skills in analysis, including finite element analysis, and dynamic modeling of systems, can choose from a number of elective courses which rely heavily on computer methods.

Advising: Each student has a faculty advisor who meets with him/her at least once a semester to discuss academic progress, plan the following semester, explain University requirements, and answer questions about the Mechanical Engineering program.

Note: Students graduating with a BS in Mechanical Engineering will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to a Mechanical Engineering major.

Program Requirements

Code	Title	Units
Required Lower Division Courses (Pre-Major) (60 Units) ¹		
<i>First Semester Freshman Year</i>		
CHEM 1E	General Chemistry for Engineering	4
ENGR 6	Engineering Graphics and CADD (Computer Aided Drafting and Design) ²	3

- ¹ Lower division requirements are essentially common for Civil, Electrical and Electronic, and Mechanical Engineering.
Note: Courses are listed in a recommended sequence, and may be interchanged among semesters to accommodate the student's schedule, as long as prerequisites are met.
- ² Course also satisfies General Education (GE)/Graduation Requirement.
Note: A second year foreign language course may also satisfy 3 units of GE when the course is being taken to comply with the Sacramento State foreign language requirement. Students should consult with an advisor for exact GE eligibility of these courses.
- ³ Students are allowed to enroll in upper division Engineering or Mechanical Engineering courses with the Department's approval. Pre-Major students must complete a Change of Major form and submit it to the Mechanical Engineering Department Office during the application filing period.
- ⁴ An upper division course in Engineering, Mathematics, and Science may be selected with prior approval of the student's advisor.
Note: All elective courses are NOT offered every semester. The Mechanical Engineering Department Office maintains a listing showing when particular courses will be offered.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ²	0
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course - Take upper-division course to complete Area & upper division requirements.		3

Area E Course ²		0
Total Units		36

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Mechanical Engineering are exempt from the Foreign Language Graduation Requirement.

MS in Mechanical Engineering

Total units required for MS: 30

Program Description

The Master of Science program in Mechanical Engineering prepares students for leadership in the practice of Mechanical Engineering. The program includes the study of scientific and technical principles underlying modern engineering practice and advanced mathematical techniques needed for their application in research and design.

Specializations

Four areas are offered as specializations: Design and Dynamic Systems; Manufacturing and Material Engineering; Thermal and Fluids Systems; and Aerospace Systems. In each area there are specific course requirements to be met; all four specializations encompass Engineering Design.

Elective courses allow for the development of each student's particular interests. An individual's applied research or design study, presented in

a Master's thesis or project, complements the formal class work and completes the program.

Admission Requirements

Admission as a classified graduate student in Mechanical Engineering requires:

- a Bachelor of Science degree in Engineering or Computer Science;
- a minimum GPA of 3.0 in upper division engineering courses; and
- English Language Requirement (for foreign students only).

Applicants who do not meet the three admission requirements listed above because they have a Baccalaureate degree in a field other than Engineering or Computer Science, and/or because their GPA is below 3.0 but above 2.5 in the last 60 units of undergraduate work, may be admitted with conditionally classified status. Any deficiencies will be noted in a written response to the applicant.

If a student lacks some of the undergraduate courses needed for successful completion of the graduate program, such prerequisite courses must be taken before the student can be fully accepted to the program.

Admission Procedures

Applications are accepted as long as space for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended *other than Sacramento State*; and
- English Language Requirement (for foreign students only).

For more admissions information and application deadlines, please visit the Office of Graduate Studies website (<http://csus.edu/gradstudies>).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed.

Minimum Units and Grade Requirement for the Degree

Units Required for the MS: 30

Minimum Cumulative GPA: 3.0. Up to six units of grade "C" or better may be credited toward fulfillment of the requirements for the master's degree. All other graded units must be completed with a grade of "B" or better. Grades of "C-", "D", "F", "WU", "I", "W" and "NC" may not be used to fulfill any MS degree requirements.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including ME 209 (2 units) and at least 7 other units at the 200 level. Note: For our program completion of ME 209 with a grade of "B" or above satisfies the Graduate Writing Assessment Requirement (GWAR); and

- obtained approval of a thesis/project topic using the Department of Mechanical Engineering Master's Thesis/Project Approval Form.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a faculty advisor. After approval by the Mechanical Engineering Graduate Coordinator, the form is then returned to the Office of Graduate Studies for approval.

Notes:

- The student cannot register for the culminating experience (ME 500), until he/she has been advanced to candidacy. One full semester prior to registering for (ME 500), the student must submit a proposed topic from to the Department office.
- The Thesis Committee consists of the student's Thesis Advisor, who is the Chairperson of the Thesis Committee, and another faculty member who serves as the second advisor.
- Advising: The Department of Mechanical Engineering has a Graduate Coordinator who is the liaison between each graduate student and the Office of Graduate Studies. After Advancing to Candidacy (see above), the student proceeds with research for the thesis. Guidance of this phase of study is done by a faculty member with expertise in the particular thesis topic.

Program Requirements

Code	Title	Units
Required Core Courses (8 Units)		8
ENGR 201	Engineering Analysis I	3
ENGR 202	Engineering Analysis II	3
or ME 206	Stochastic Modeling for Engineers	
ME 209	Research Methodology 	2
Additional Requirements for Suggested Specializations (9 Units)		
Select at least three courses with advisor approval to develop a focus area of study		9
Aerospace Systems		
Design and Dynamic Systems		
Manufacturing and Materials Engineering		
Thermal and Fluid Systems		
Electives (7-9 Units)

¹ Selected in consultation with advisor. May include two undergraduate courses.

² Master's Thesis (4-6 units) program consists of the following minimum requirements:
 Core courses (8 units)
 Specialty Area (9 units)
 Electives (7-9 units)
 ME 500 (4-6 units)

Thesis Defense/Presentation: The Thesis must be orally presented and defended, approved by the student's Thesis Committee and approved by

the ME Graduate Coordinator or the Department Chair prior to submittal of the thesis to the Office of Graduate Studies.

Additional Requirements for Suggested Specializations

Note: With advisor approval select at least **three** courses to develop a focus area of study.

Specialization - Aerospace Systems

This area focuses on the design of aerospace systems. Classical and computer-aided techniques are studied to provide a strong background in mechanical design theory and practice. Industrial software tools are used to perform finite-element modeling, dynamic system analysis, and optimum design.

Code	Title	Units
ME 274	Introduction to Flight Dynamics	3
ME 275	Analysis of Aircraft Structures	3
ME 278	Space Systems Engineering Management	3

Or other courses selected in consultation with an advisor.

Specialization - Design and Dynamic Systems

This area focuses on the design of products and on the manufacturing systems needed for their production. Classical and computer-aided techniques are studied to provide a strong background in mechanical design theory and practice. Industrial software tools are used to perform finite-element modeling, dynamic system analysis, and optimum design.

Code	Title	Units
ME 241	Optimum Mechanical Design	3
ME 270	Advanced Computer-Aided Design of Dynamic Systems	3
ME 272	Finite Element Modeling in Computer-Aided Design	3
ME 276	Advanced Vibration Theory	3

Or other courses selected in consultation with an advisor.

Specialization - Manufacturing and Materials Engineering

This area includes the use of mathematical methods as well as current computer techniques to solve problems encountered in planning, designing, and/or controlling manufacturing systems. Study of the techniques for product design and Manufacturing, Neural Networks, Artificial Intelligence, and Industrial Management is conducted. This area also focuses on the design of products and on the manufacturing systems needed for their production. Classical and computer-aided techniques are studied to provide a strong background in mechanical design theory and practice. Industrial software tools are used to perform finite-element modeling, dynamic system analysis, and optimum design.

Code	Title	Units
ME 233	Intelligent Product Design and Manufacturing	3
ME 236	Computer Controlled Manufacturing Processes	3
ME 237	Digital Control of Manufacturing Processes	3
ME 238	Automated Inspection	3

Specialization - Thermal and Fluid Systems

This area concentrates on the principles of thermodynamics, heat transfer, and fluid mechanics as applied to such products as heat exchangers, internal combustion engines, gas turbines, and solar energy systems. Courses make use of computational fluid dynamics (CFD) and finite element analysis (FEA) software tools to explore the behavior of a variety of thermal energy conversion systems and components. In this

area of interest, innovative system design is becoming more important as progress is made toward increasing the efficiency of thermal systems while reducing the adverse effects on the environment.

Code	Title	Units
ME 253	Advanced Fluid Mechanics	3
ME 256	Mechanics and Thermodynamics of Compressible Flow	3
ME 258	Advanced Thermodynamics	3
ME 259	Introduction to Computational Fluid Dynamics	3
ME 2960	Advanced Heat Transfer	3

Or other courses selected in consultation with an advisor.

College of Health and Human Services

The **College of Health and Human Services** at Sacramento State has a long and proud history of providing the region with health and human services professionals that are leaders in the region through their innovation, engagement, and impact. The College plays important roles in addressing the workforce needs of the region, in community engagement, and in research that matters. With over 40,000 alumni from the College, chances are that if you interact with a nurse, a social worker, or a police officer in the region, they are a Sac State alum. With over 7,300 student majors, making it the largest college on campus, the programs offered in the College continue to be in high demand. The faculty and staff are committed to student success, which is one of the primary values of our mission.

The College of Health and Human Services has eight departments including the **Department of Communication Sciences and Disorders**, the **Division of Criminal Justice**, the **Department of Health Science**, the **Department of Kinesiology**, the **School of Nursing**, the **Department of Physical Therapy**, the **Department of Recreation, Parks and Tourism Administration**, and the **Division of Social Work**. Within each of these departments there are a number of programs for students to choose from: 15 of these programs are externally accredited by professional accrediting associations. In addition, the College is the home for seven centers including the Center for Health Practice, Policy & Research, the Student Success Center, and ten community clinics.

The College operates the Maryjane Rees Language, Speech and Hearing Center which treats over 950 clients each year with speech and hearing disorders. The College also operates The Center for African Peace and Conflict Resolution (CAPCR) which provides education and training, research, and direct services pertaining to mediation, negotiation, and arbitration. With the addition of new space in Folsom Hall, the College of Health and Human Services has established a Center for Health Practice, Policy & Research. This is the site of the College's School of Nursing with, state-of-the-art teaching/research facilities including skills labs and a number of high-fidelity simulation labs. The Doctoral Program in Physical Therapy and the Department of Communication Science and Disorders have also moved into new research and teaching laboratories in Folsom Hall.

The College faculty are recognized for their expertise as teachers, scholars, and practitioners. They serve as professional role-models for students and are actively involved in the life of the surrounding community and their professional organizations. The College faculty and staff are also committed to the values of student success, community

engagement, diversity and inclusion, leadership, professional ethics, excellence, social responsibility, and collaboration.

In summary, the College of Health and Human Services provides quality academic programs that educate and empower students, serve and enrich diverse communities, promotes well-being, and inform policy and best practices.

Departments/Programs

Programs of instruction leading to the following degrees offered by the College are listed in this catalog in separate sections.

- Communication Sciences and Disorders, BS, MS, AuD
- Criminal Justice, BS, Minor, MS
- Health Science, BS, Minor, MPH
- Kinesiology, BS, Minor, MS
- Nursing, BS, MS
- Physical Therapy, DPT
- Recreation, Parks, and Tourism Administration, BS, Minor, MS
- Social Work, BA, Minor, MSW

Communication Sciences and Disorders

College of Health and Human Services

Program Description

The fields of Speech-Language Pathology and Audiology are concerned with disorders of speech, language, communication, swallowing, and hearing. A Speech-Language Pathologist is trained to diagnose and treat language, speech, swallowing and cognitive disorders. An Audiologist is trained to identify impairments and dysfunction of auditory, balance, and other related systems.

The Department offers a Bachelor of Science degree in Communication Sciences and Disorders and a Master of Science degree in Communication Sciences and Disorders. The Bachelor of Science degree provides a background in the theoretical and clinical foundations

of Speech-Language Pathology and Audiology. The Master's degree provides professional training for a career in Speech-Language Pathology. The Department also offers a Second Bachelor of Science degree in Communication Sciences and Disorders through the College of Continuing Education.

Employment as a Speech-Language Pathologist in California requires both a Master's degree and a credential or license. Completion of the Master's degree provides the training necessary for students to qualify for the American Speech-Language-Hearing Association's Certificate of Clinical Competence in Speech-Language Pathology, California State License as a Speech-Language Pathologist and the Speech-Language Pathology Services Credential for working as a Speech-Language Pathologist in the California public schools. The Department also prepares students to apply for the Special Class Authorization, an extension of the Speech-Language Pathology Services Credential, required to teach a classroom for children with language disorders. Employment as an Audiologist requires a clinical doctorate of Audiology (AuD) and appropriate certification.

The broad, yet challenging, nature of the Bachelor's degree in Communication Sciences and Disorders prepares students to apply for graduate study in the fields of speech-language pathology and audiology and for employment requiring a background in human development, communication, health, and education. Graduates have pursued further education and work in the fields of special education, counseling, and rehabilitation, as well as careers in the health insurance industry, disability law, career advising, and government health programs.

Degree Programs

BS in Communication Sciences and Disorders (p. 605)

Doctor of Audiology (Au.D.) (p. 606)

MS in Communication Sciences and Disorders (p. 610)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Master of Science in Communication Sciences and Disorders is also accredited by American Speech-Language-Hearing Association.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The Bachelor's degree program in Communication Sciences and Disorders is accredited by the Western Association of Schools and Colleges (WASC).

- Graduate students pursuing a degree in Communication Sciences and Disorders in the Department of Speech-Language Pathology and Audiology participate in supervised clinical practica through the campus-based Maryjane Rees Language, Speech, and Hearing Center.
- Graduate practica in Communication Sciences and Disorders include three semesters of on-campus clinic followed by an internship in the public schools and an internship in local hospitals or other agencies. Upon completion of the Master's degree, students will have acquired a variety of supervised clinical experiences totaling a minimum of 388 clock hours.
- The Master's degree program in Communication Sciences and Disorders is accredited by the Council on Academic Accreditation (CAA) of the American Speech-Language-Hearing Association (ASHA).
- The Speech-Language Pathology Services Credential with or without Special Class Authorization is approved by the California Commission on Teacher Credentialing (CCTC).

Career Possibilities

Please note that most of the career possibilities listed below require additional education beyond the baccalaureate degree.

Speech-Language Pathology Assistant (SLPA) · Speech-Language Pathologist in medical, school and private practice settings · Speech-Language Pathologist with Special Class Authorization to teach a classroom of communicatively disabled children · Audiologist · Employment requiring a background in human development, communication, health, and education · Fields of audiology, special education, counseling, rehabilitation, the health insurance industry, disability law, career advising, hospital administration, school administration and government health programs.

CSAD 110. Physics of Sound and Phonetics.**4 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 111**Term Typically Offered:** Fall only

Physical production, acoustic characteristics of sounds of speech. International Phonetic Alphabet as applied to speech sounds; practice in phonetic transcription of dialects and deviant speech; applications in speech education, speech and hearing therapy. Introduction to physiological acoustics, psychoacoustics, and acoustic phonetics. Perception of speech including voice, resonance, individual speech segments; instrumentation for acoustic and perceptual analysis of speech.

CSAD 111. Anatomy and Physiology of the Speech Mechanism. 3 Units**Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 110**Term Typically Offered:** Fall only

Anatomical, physiological and neurological bases of speech. Covers development, normal structure and function. A general course in human anatomy is recommended as background.

CSAD 112. Language Science and Development.**3 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 110 and CSAD 111**Term Typically Offered:** Fall only

Overview and comparison of normal and abnormal child language development from infancy through upper elementary school. Establishes a framework for understanding language disorders including autism and pervasive developmental delay. Includes theories of language acquisition, basic principles of language sampling, systems of language, elements of grammar, and preparation for informal and standardized assessment of language disorders. Introduces students to the impact of variables such as attention deficit disorder, poverty, bilingualism on developing language skills.

CSAD 120. Introduction to Language, Speech and Hearing Problems.**3 Units****Term Typically Offered:** Fall, Spring

Review of normal speech and language development. Overview of language, speech, and hearing development and disorders including multicultural issues. Introduction to professional issues and ethics.

CSAD 123. Voice and Fluency.**3 Units****Prerequisite(s):** CSAD 125, CSAD 126, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

Fluency - Characteristics of stuttering, etiologic theories and their implications for treatment. Management of stuttering and other disorders of rhythm. Voice - Current concepts regarding anatomy and physiology, etiology, assessment and treatment of hyperfunctional and organic disorders.

CSAD 125. Developmental and Acquired Neurogenic Language Disorders Across the Lifespan.**3 Units****Prerequisite(s):** CSAD 112, CHDV 30, PSYC 2, STAT 1, and DEAF 51.**Term Typically Offered:** Spring only

Language disorders and the dynamic, reciprocal relationships between the disability, the client, his/her family, and the environment. Developmental and acquired neurogenic language disorders from infancy through adulthood will be covered including neurophysiology and neuropathology.

CSAD 126. Speech Sound Development and Disorders in Children: Aspects of Articulation and Phonology.**3 Units****Prerequisite(s):** CSAD 110, CHDV 30, PSYC 2, STAT 1, and DEAF 51.**Term Typically Offered:** Spring only

Study of normal articulation and phonological development in children. Discussion of etiologies and specific characteristics of articulatory-phonological disorders. Introductory description of foundational specific assessment and treatment principles. Analyzes case studies.

CSAD 127. Introduction to Medical Speech Pathology.**3 Units****Prerequisite(s):** CSAD 123, CSAD 125, CSAD 126, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

Current concepts regarding anatomy and physiology, etiology, assessment, and treatment of craniofacial disorders, laryngectomy, tracheostomy and dysphagia.

CSAD 130. Audiology and Hearing Testing.**3 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110 and CSAD 111**Term Typically Offered:** Spring only

Introduction to audiology; anatomy and physiology of the hearing mechanism; pathologies of the ear; basic acoustics of sound and its relation to hearing and speech; school hearing screening; hearing conversation; audiometric interpretation and its relationship to speech language and learning disorders.

CSAD 133. Aural Rehabilitation.**3 Units****Prerequisite(s):** CSAD 125, CSAD 126, CSAD 130, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

According to Tye-Murray, aural rehabilitation is "intervention aimed at minimizing and alleviating the communication difficulties associated with hearing loss." This course examines communication assessment and remediation approaches for children and adults with both peripheral and central auditory problems.

CSAD 140. SLPA Methods.**3 Units****Prerequisite(s):** CSAD 145 and instructor permission.**Corequisite(s):** CSAD 140L.**Term Typically Offered:** Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 140L. SLPA Practicum, Ethical and Legal Parameters. 3 Units**Prerequisite(s):** CSAD 145 and instructor permission.**Corequisite(s):** CSAD 140.**Term Typically Offered:** Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 142. Topics in Autism Spectrum Disorders. 2 Units**Prerequisite(s):** CSAD 112, CSAD 125, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

Detailed look at characteristics of autism spectrum disorders (including Asperger's Syndrome, PDD-NOS and Autism). Issues related to diagnosis/assessment, early intervention, school-based intervention, functional therapeutic techniques and theories, and current "hot topics" in Autism (Theory of Mind, joint attention, biomedical issues, dietary restrictions, sensory regulation and intervention paradigms) will be a part of this course.

CSAD 143. Communication Disorders in Multicultural Populations. 3 Units**Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 125, and CSAD 126.**Term Typically Offered:** Fall, Spring

Identification, evaluation, and treatment of multicultural, multilingual clients with communication disorders. Discussion of normal second language acquisition, bilingual development, and cultural values related to effective service delivery for multicultural clients.

CSAD 145. Supervised Field Observations. 1 Unit**Prerequisite(s):** CSAD 110, CSAD 111, CSAD 112, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Corequisite(s):** CSAD 125, CSAD 126, and CSAD 130.**Term Typically Offered:** Spring only

Directed observations of speech and hearing testing (screening and diagnostic); therapy and case staffing in schools, service clinics and hospitals.

Credit/No Credit

CSAD 146. Introduction to Clinical Issues and Methods. 3 Units**Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.**Term Typically Offered:** Fall, Spring

Methods and materials used in clinical procedures are introduced. Work with graduate students and clients provides introduction to actual procedures and ethical practices. Introduction to ASHA Code of Ethics and legal issues in professional practice including federal and state laws and regulations, funding sources and scope of practice, survey of professional settings for speech and hearing services, including multidisciplinary settings. Prior to enrolling in CSAD 146, students must fulfill the catalogue requirements listed in the catalogue section "Undergraduate Clinical Assistantship."

CSAD 147. Assessment Procedures. 3 Units**Prerequisite(s):** CSAD 125, CSAD 126, CSAD 145, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

Current principles, methods and materials used by the speech-language pathologist to assess communication disorders are presented. Issues related to a model of assessment, informal and formal testing, dynamic assessment, interview techniques, administration, scoring and interpretation of test results, report writing and related issues will be discussed.

CSAD 148. Research in Speech - Language Pathology and Audiology. 3 Units**Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, SAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.**Term Typically Offered:** Fall, Spring

Survey of research strategies and methods in Speech-Language Pathology and Audiology. Statistical procedures and single-subject designs. Emphasis on interpreting research reports in the literature and on developing research projects. Writing research proposals and reports.

CSAD 199. Special Problems. 1 - 3 Units**Term Typically Offered:** Fall, Spring

Individual projects or directed reading. Open only to students competent to carry on individual work.

Note: Departmental petition required.

Credit/No Credit

CSAD 217. AAC and Assistive Technologies. 2 Units**Term Typically Offered:** Spring only

Biological, acoustic, psychological, development, linguistic, and cultural bases for motor speech disorders, focusing on augmentative and alternative communication an assistive technologies as well as their assessment and treatment techniques.

CSAD 218. Motor Speech Disorders. 3 Units**Prerequisite(s):** Classified graduate status.**Term Typically Offered:** Fall only

Background pertinent to understanding neurophysiology associated with congenital and acquired dysarthria and dyspraxia. Descriptions and classifications of disorders and their causes, methods of assessment and treatment.

CSAD 219. Counseling Techniques for Speech Pathologists and Audiologists. 3 Units**Term Typically Offered:** Fall only

Development of strategies for counseling and interviewing clients with communication disorders and their families. Development of specific skills such as effective listening, dealing constructively with emotions, working with families, and leading support groups. Students will learn to deal effectively with the affective side of communication disorders to help clients benefit maximally from assessment and treatment.

CSAD 221. Neurogenic Language Disorders. 4 Units**Term Typically Offered:** Spring only

In-depth study of language and cognitive disorders in adult, secondary to cerebrovascular accident, dementia, and/or traumatic brain injury. Assessment and intervention strategies are covered with particular emphasis on functional outcomes.

CSAD 222. Curriculum in Relation to Language -- Learning Disabilities in School-age Children. 3 Units**Prerequisite(s):** Instructor permission.**Term Typically Offered:** Spring only

Language acquisition as a continuum from oral language to reading and writing, the role of the speech-language specialist in working with reading disabilities; the interactions among speech-language intervention and curricula areas including mathematics, spelling, handwriting, social studies and language arts; and various service delivery models, including collaborative consultation and learning centers.

CSAD 223. Advanced Seminar in Child Language Disorders. 3 Units**Prerequisite(s):** CSAD 125 or equivalent**Term Typically Offered:** Fall only

In-depth study of childhood language disorders emphasizing the use of critical thinking to integrate evidence-based practice into discussion of current assessment and intervention practices for children with primary and secondary language impairment. Specific topics include language sampling, early intervention, connecting intervention with Common Core State Standards, and team-based service delivery. Populations addressed include bilingual learners, those with working memory deficits, and autism spectrum disorder. The impact of the digital era and screen exposure on children with language impairment is discussed.

CSAD 227. Dysphagia and the Medical Setting. 3 Units**Prerequisite(s):** CSAD 218, CSAD 221, instructor permission.**Term Typically Offered:** Fall, Spring

Swallowing problems from infancy through old age; growth patterns and failures in younger populations; feeding and swallowing problems related to normal aging processes and those associated with neurogenic disorders. Assessment and treatment. Includes theoretical and experiential components. Overview of the role of Speech-Language Pathologist in the hospital setting including learning how to read medical charts, basic insurance information, understanding other disciplines and how they affect the job and career of an SLP in the hospital, and medical terms/abbreviations.

CSAD 228A. Methods: Speech Disorders I. 2 Units**Prerequisite(s):** CSAD 125, CSAD 126, CSAD 143, CSAD 145, CSAD 146, CSAD 148 or equivalents; instructor permission.**Corequisite(s):** CSAD 229A.**Term Typically Offered:** Fall, Spring

Diagnosis and treatment as applied to the current caseload, including articulation and phonological disorders and characteristics associated with English as a second language (ESL) populations. Methods for both children and adults. Staffings, case studies and presentations, demonstrations and class discussions.

CSAD 228B. Methods: Speech Disorders II. 1 Unit**Prerequisite(s):** CSAD 123, CSAD 127 or equivalents; CSAD 228A, instructor permission.**Corequisite(s):** CSAD 229B.**Term Typically Offered:** Fall, Spring

Techniques and materials for assessing and treating speech disorders emphasizing fluency and voice. Staffings and discussion of cases in the current caseload.

Note: May be repeated.**CSAD 228C. Methods: Speech Disorders III. 1 Unit****Prerequisite(s):** CSAD 218, CSAD 228B; CSAD 221 may be concurrent; instructor permission.**Corequisite(s):** CSAD 229C.**Term Typically Offered:** Fall, Spring

Techniques and materials for assessing and treating clients with disordered speech secondary to developmental disabilities and syndromes, degenerative diseases or complex problems associated with English as a second language (ESL). Discussions of cases in the current caseload.

Note: May be repeated.**CSAD 229A. Practice: Speech Disorders I. 2 Units****Prerequisite(s):** Instructor permission**Corequisite(s):** CSAD 228A**Term Typically Offered:** Fall, Spring

Supervised clinical practice emphasizing articulation and phonological disorders, and phonological difficulties associated with English as a second language (ESL). Clients may include both children and adults.

CSAD 229B. Practice: Speech Disorders II. 2 Units**Prerequisite(s):** Instructor permission.**Corequisite(s):** CSAD 228B.**Term Typically Offered:** Fall, Spring

Supervised clinical practice emphasizing clients whose speech is disrupted by abnormal rhythm and rate (e.g. stuttering and cluttering) or abnormal vocal pitch, loudness, and/or quality.

CSAD 229C. Practice: Speech Disorders III. 2 Units**Prerequisite(s):** Instructor permission**Corequisite(s):** CSAD 228C**Term Typically Offered:** Fall, Spring

Supervised clinical practice emphasizing children and adults whose speech is disrupted secondary to developmental disorders and syndromes, degenerative disorders or complex problems.

CSAD 241S. Practice: Hearing Screenings. 1 Unit**Prerequisite(s):** CSAD 130**Term Typically Offered:** Fall, Spring

Supervised clinical practice in the administration of hearing screening tests. The student must furnish his/her own transportation. Fifteen to twenty hours for one unit.

Credit/No Credit

CSAD 242A. Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology. 2 Units**Prerequisite(s):** Admission to Graduate Program**Corequisite(s):** CSAD 243A**Term Typically Offered:** Fall, Spring

Methods, materials and procedures in language disorders with emphasis on working with children and adults with peripheral hearing loss or central auditory processing disorders (CAPD). Includes staffing and discussion of cases in the current caseload. Focus on professional writing in the field of Speech-Language Pathology through the development of treatment plan proposals, critical responses, and clinic reports.

CSAD 242B. Methods: Language Disorders II.**Prerequisite(s):** CSAD 223, CSAD 242A; instructor permission.**Corequisite(s):** CSAD 243B.**Term Typically Offered:** Fall, Spring

Techniques and materials for assessing and treating children with disordered language secondary to a myriad of contributing factors including delayed development, neurological problems and various genetic conditions. Discussion of cases in the current caseload.

Note: May be repeated.**CSAD 242C. Methods: Language Disorders III.****Prerequisite(s):** CSAD 218, CSAD 242B; CSAD 221 may be taken concurrently; instructor permission.**Corequisite(s):** CSAD 243C.**Term Typically Offered:** Fall, Spring

Techniques and materials for assessing and treating speech and language disorders emphasizing disorders secondary to cerebral vascular accidents, traumatic brain injury, or other neurological disorders. Discussion of cases in the current caseload.

Note: May be repeated.**CSAD 243A. Practice: Language Disorders I.****Prerequisite(s):** Instructor permission**Corequisite(s):** CSAD 242A**Term Typically Offered:** Fall, Spring

Supervised clinical practice in language disorders emphasizing children and adults with peripheral hearing loss or central auditory processing disorders (CAPD).

CSAD 243B. Practice: Language Disorders II.**Prerequisite(s):** Instructor permission**Corequisite(s):** CSAD 242B**Term Typically Offered:** Fall, Spring

Supervised clinical practice with children demonstrating language disorders secondary to a myriad of contributing factors including delayed development, neurological problems, and various genetic conditions.

CSAD 243C. Practice: Language Disorders III.**Prerequisite(s):** CSAD 243B; instructor permission**Corequisite(s):** CSAD 242C**Term Typically Offered:** Fall, Spring

Supervised clinical practice emphasizing adult clients whose speech and language are disordered secondary to neurogenically related problems such as cerebrovascular accident, traumatic brain injury, or other neurological disorders.

CSAD 244. Methods: Speech -- Language Assessment.**Prerequisite(s):** CSAD 147 or equivalent; CSAD 228B, CSAD 242B; instructor permission.**Corequisite(s):** CSAD 245.**Term Typically Offered:** Fall, Spring

Methods and materials for initial assessment in Speech-Language Pathology.

1 Unit**CSAD 245. Practice: Speech -- Language Assessment.****Prerequisite(s):** Instructor permission**Corequisite(s):** CSAD 244**Term Typically Offered:** Fall, Spring

Supervised clinical practice in assessment with a variety of communication disorders in children and adults. Experience with interdisciplinary teams.

CSAD 250. Speech/Language Internships Seminar.**Prerequisite(s):** CSAD 228A, CSAD 228B, CSAD 228C, CSAD 229A,

CSAD 229B, CSAD 229C, CSAD 241S, CSAD 242A, CSAD 242B, CSAD 242C, CSAD 243A, CSAD 243B, CSAD 243C, CSAD 244, CSAD 245.

Corequisite(s): CSAD 295I, or CSAD 295M, or CSAD 295P, or CSAD 295S.**Term Typically Offered:** Fall, Spring

Assessment, scheduling and conducting language speech and hearing programs in schools. Related issues including scope of practice, managed care, interagency cooperation and transdisciplinary approaches.

CSAD 295I. Internship: Speech-Language and Hearing Services in Schools (SLHS).**Prerequisite(s):** All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST.**Corequisite(s):** CSAD 250. Graded: Credit/No Credit Units: 4**Term Typically Offered:** Fall, Spring

Supervised clinical practice in the school setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295M. Internship: Speech-Language Pathology in a Medical Setting.**Prerequisite(s):** All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST.**Corequisite(s):** CSAD 250. Graded: Credit/No Credit Units: 4**Term Typically Offered:** Fall, Spring

Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295P. Internship: Speech-Language Pathology in Private Practice.**Prerequisite(s):** CSAD 250. All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit. Units: 4**Corequisite(s):** CSAD 250. Graded: Credit/No Credit. Units: 4**Term Typically Offered:** Fall, Spring

Supervised clinical practice in a private practice setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation. Credit/No Credit

CSAD 295S. Internship: Special Class Authorization Eligibility. 4 Units
Prerequisite(s): CSAD 250. All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
 Credit/No Credit

CSAD 299. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on individual work.
Note: Departmental petition required.

Credit/No Credit

CSAD 500C. Culminating Experience: Comprehensive Exam. 2 Units
Prerequisite(s): Advanced to Candidacy Graded: Credit/No Credit Units: 2.0
Term Typically Offered: Fall, Spring

Written exam comprised of eight questions. Examinees are given one and a half hours to complete each question.

CSAD 500P. Culminating Experience: Project. 2 Units
Prerequisite(s): Advancement to Candidacy. Graded: Credit/No Credit. Units: 2.0 - 4.0
Term Typically Offered: Fall, Spring

Independent work conducted under the supervision of faculty members. A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality, independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project's significance, objectives, methodology, and a conclusion or recommendation. Students must follow all department and university project guidelines.

CSAD 500T. Culminating Experience: Thesis. 2 Units
Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit.
Term Typically Offered: Fall, Spring

Independent research study, conducted under the supervision of faculty members. Thesis must involve a research question or hypothesis, review of pertinent literature, collection and analysis of data. It is the student's responsibility to locate and recruit subjects, to collect data, and to write the thesis. Students must follow all department and university thesis guidelines.

BS in Communication Sciences and Disorders

Units required for Major: 52-55 (40-43 CSAD courses + 12 major prerequisites)

Total units required for BS: 120

Program Description

A student must have a 2.5 GPA in the major in order to graduate with a Bachelor of Science Degree in Communication Sciences and Disorders. To achieve this GPA, students may repeat up to a maximum of 16 units

of coursework in the major in courses for which grades of C- or below were earned, contingent upon their eligibility to do so under the campus policy on repeating courses. Repeated course grades will either be forgiven or averaged with the new grade according to the campus policy on repeating courses. Students must complete the major prerequisites before beginning courses in Communication Science and Disorders.

Undergraduate courses are designed for students to begin in the fall semester and progress in a proscribed sequence.

It is strongly recommended that students:

- Take a course in physics and/or chemistry as some programs offering the Master's Degree in Speech-Language Pathology or Communication Sciences and Disorders will require it.
- Finish all Undergraduate General Education units before beginning major coursework.

Program Requirements

Code	Title	Units
Required Major Prerequisite Courses (12 Units)		
CHDV 30	Human Development (or other course in Human Development through the lifespan) ¹	3
Select one of the following:		3
STAT 1	Introduction to Statistics ¹	
SWRK 110	Statistics and Research for Social Workers	
PSYC 101	Statistics for Psychology	
SOC 101	Introduction to Statistics for Sociologists	
Other introductory Statistics course		
PSYC 2	Introductory Psychology (or other course in Introduction to Psychology) ¹	3
DEAF 51	American Sign Language 1 (or other course in sign language)	3
Required Upper Division Courses (43 Units)		
<i>Semester 1, Fall</i>		
CSAD 110	Physics of Sound and Phonetics	4
CSAD 111	Anatomy and Physiology of the Speech Mechanism	3
CSAD 112	Language Science and Development	3
<i>Semester 2, Spring</i>		
CSAD 125	Developmental and Acquired Neurogenic Language Disorders Across the Lifespan	3
CSAD 126	Speech Sound Development and Disorders in Children: Aspects of Articulation and Phonology	3
CSAD 130	Audiology and Hearing Testing	3
CSAD 145	Supervised Field Observations	1
<i>Semester 3, Fall</i>		
CSAD 123	Voice and Fluency	3
CSAD 142	Topics in Autism Spectrum Disorders	2
CSAD 146	Introduction to Clinical Issues and Methods ²	3
CSAD 147	Assessment Procedures	3
<i>Semester 4, Spring</i>		
CSAD 127	Introduction to Medical Speech Pathology	3
CSAD 133	Aural Rehabilitation	3
CSAD 143	Communication Disorders in Multicultural Populations	3

CSAD 148	Research in Speech - Language Pathology and Audiology	3
Total Units		55

- ¹ Course also satisfies General Education (GE)/Graduation Requirement.
- ² **Offered Fall or Spring.** *Required* for students who plan to apply to Sacramento State for the Master's in Communication Sciences and Disorders. *Recommended* for students who plan to apply to graduate programs at other universities. *Optional* for students who do not plan to attend graduate school.
- Note:** Students must submit a signed record of all observation hours and supervised clinical clock hours to the Communication Sciences and Disorders Department. Students should retain a second copy for their personal records.
- Prior to enrolling in CSAD 146, students must fulfill the following requirements:**
- Pass/complete the Sacramento State undergraduate writing requirement as delineated in the University Policy Manual posted on the campus website.
 - 3.2 GPA within the major (CSAD) with no CSAD courses below a grade of "C."
 - Proof of negative tuberculin (PPD) test and verification of measles, rubella, and hepatitis B immunizations.
 - Completion of a Level 1 criminal background screening. Screenings must be conducted by the department-sanctioned agency. Refer to Department webpage for current agency instructions. Background checks performed by other agencies are not accepted.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (10-13 Units)		
B1	Physical Science	3
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)	1
B4	Math Concepts ²	0-3
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9 Units)		
	Area D Course	3
	Area D Course	3
	Area D Course ³	0
	Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development		

Area E Course ³	0
Total Units	40-43

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² Department offers students a "select from the following option":
- If student chooses to take STAT 1, they will meet Area B4.
- ³ Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI)	3
Graduation Requirements (required by Sacramento State) (12 Units)		
	English Composition II	3
	Race and Ethnicity in American Society (RE)	3
	Foreign Language Proficiency Requirement ²	6

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Doctor of Audiology

Program pending approval from the CSU Chancellor's Office.

Program pending review from the Council on Academic Accreditation (CAA). An Application for Candidacy was submitted Spring 2019.

The program has received approval from the Western Association of Schools and Colleges Senior College and University Commission (WSCUC). The Accreditation Commission for Audiology Education (ACAE) granted the program "Developing Status" in Fall 2018.

Units required for Doctorate of Audiology (Au.D.): 118

Program Description

The Doctor of Audiology (Au.D.) program at Sacramento State is a four-year clinical doctorate that is designed to prepare students for professional practice of audiology. The Au.D. program provides coursework in the theoretical foundations of audiology practice and

evidence-based practice, as well as varied clinical training experiences in the Sacramento community and surrounding areas. The Maryjane Rees Language, Speech, and Hearing Center, which is located on campus, provides the community with speech, language, and hearing services for children and adults with communication disorders. In addition, the department is located in Folsom Hall, home of the The Center for Health Practice, Policy & Research (CHPPR), giving students opportunities to work alongside and learn from and with other health professions students.

Admission Requirements

- Students must have an undergraduate degree from an accredited institution.
- Students must have completed a course in each of the following:
 - Human Development Across the Lifespan
 - Introduction to Psychology
 - Introduction to Statistics
 - American Sign Language
 - Biological Science
 - Physical science
- Students must have completed the equivalent of the following Sacramento State Communication Sciences and Disorders courses:

Code	Title	Units
CSAD 110	Physics of Sound and Phonetics	4
CSAD 111	Anatomy and Physiology of the Speech Mechanism	3
CSAD 112	Language Science and Development	3
CSAD 125	Developmental and Acquired Neurogenic Language Disorders Across the Lifespan	3
CSAD 130	Audiology and Hearing Testing	3
CSAD 133	Aural Rehabilitation	3

- Students must have a GPA of 3.00 overall and a GPA of 3.00 for the above pre-requisite courses.
- Domestic applicants with foreign documents and international students (F-1 or J-1 visa applicants) must consult the Office of Graduate Studies (<https://www.csus.edu/gradstudies/futurestudents/#apply>) and the International Programs and Global Engagement Office (<https://www.csus.edu/ipge/international-admissions/intladm.html>) for specific application instructions. These students must also submit TOEFL scores. Consult the Department website (<https://www.csus.edu/hhs/csad>) for department-specific TOEFL scores.
- GRE scores obtained in the last 5 years. Applicants are required to have a minimum combined score of 291 on the verbal and quantitative portions of the test and a minimum score of 3.5 on the analytical writing portion of the test.
- Three letters of recommendation, two of which must come from university faculty who can speak to the student's academic potential and one must come from a professional reference in the field of audiology.
- Oral and written essay.
- Resume of education, related work, volunteer and multicultural experience, and any scholarships, awards or other commendations.
- Documentation of 25 completed documented observation hours in communication sciences and disorders, of which at least 50% must be in audiology.

- Students must consult the Department website for additional current admission requirements and procedures.

Doctor of Audiology Graduate Program Policies and Procedures

1. A student must have, at minimum, a 3.0 GPA in the graduate coursework in order to graduate with a Doctor of Audiology degree. Students may not earn a grade of less than a B in any major didactic course or clinical practicum. The Au.D. Program Director will review each student's grade reports at the end of each semester to identify students who receive less than a B in any graduate level course or clinical practicum or students who have less than a 3.0 GPA for the semester. The course instructor (for didactic courses) or clinical supervisor (for practicum sites) will meet with the Au.D. Program Director and student to discuss steps for the student to remediate the coursework, address areas of weakness in clinical performance, etc. Students falling to maintain a GPA of 3.00 are automatically placed on academic probation. Students on academic probation must independently remediate the coursework or address the deficiencies identified by the course instructor and Au.D. Program Director or s/he will not be allowed to continue the graduate program and will be dismissed. Any student who has less than B in any two didactic or B in any clinical practicum courses will not be allowed to continue in the graduate program and will be dismissed.
2. Prior to enrolling in any clinical practica, students must fulfill the following criteria:
 - a. Proof of negative tuberculin (PPD) test and verification of measles, rubella, and hepatitis B immunization series.
 - b. Completion of a Level 1 criminal background check. Background checks must be conducted by the department-sanctioned agency. Refer to the Department webpage for current agency instructions. Background checks performed by other agencies are not accepted.
 - c. Students must complete all clinical practica in the prescribed sequence. Students who have not completed a given semester's clinical practica will not be allowed to progress into subsequent clinical practica, including internships and the externship.
 - d. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
3. Students must meet clock-hour requirements for the Accreditation Commission for Audiology Education (ACAE), American Speech-Language and Hearing Association (ASHA) Certificate of Clinical Competence (CCC) (pending approval of program's CAA Candidacy status) and California License in Audiology.
4. Internship requirements: Documentation of the following is required by the end of the second clinical semester:
 - a. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
 - b. Complete Certificate of Clearance.
5. Students must furnish their own transportation to off-campus practicum sites.
6. Students must explore and complete additional internship requirements as delineated by each site.
7. Clock hours from the following may be counted for the CCC (pending approval of program CAA candidacy status) and California License in Audiology only if the on-site supervisors have their CCCs and California License in Audiology:

Course	Course title	Units
CSAD 620C	Audiology clinic II	1

CSAD 630C	Audiology clinic III	2
CSAD 640C	Audiology clinic IV	1
CSAD 650C	Audiology clinic V	1
CSAD 660C	Audiology clinic VI	2
CSAD 670C	Audiology clinic VII	2
CSAD 680C	Audiology clinic VIII	2
CSAD 710E	Audiology externship I	7
CSAD 720E	Audiology externship II	7
CSAD 730E	Audiology externship III	7

8. Students must meet the clinical practicum requirements, including approved hours, for the Certificate of Clinical Competence (CCC) (pending approval of program's CAA Candidacy status) and the California License in Audiology at the time of graduation in order to receive the Au.D. degree.
9. Students must submit a signed record of all observation hours and supervised clinical clock hours to the Communication Sciences and Disorders Department. Students should retain multiple copies for their personal records.
10. Students earning less than a B in clinical practicum must repeat the clinical experience during the following semester. Hours earned for the semester in which the student earned less than a B will not be counted.

Audiology Doctoral Project

1. Students must complete a doctoral project in order to graduate.
2. To enroll in CSAD 501, students must have passed the first-year progress exam, CSAD 510.
3. Students must enroll in CSAD 501, 502, 503, 504, and 505 for five consecutive semesters after passing CSAD 510.
4. A student may not register for CSAD 501 unless the following conditions have been met:
 - a. The readers judge that the proposal, which includes a comprehensive review of the literature and proposed methodology, is sufficiently well-developed.
 - b. Her/his proposal has been approved by the Doctoral Project Committee no later than the 6th week of the third semester. The proposal must include the introduction (including literature review) and methodology.
 - c. Written approval of the first reader has been accepted by the Department Chair.
5. No subjects may be recruited until the study has received Institutional Review Board (IRB) approval. IRB approval should be obtained by the eighth week of the fall semester (year 2). It is possible for this process to take up to a full academic year.

Definition: The Au.D. doctoral project is an independent research study conducted by the student under the supervision of members of the faculty. The project must include a testable research question and hypothesis, review of pertinent literature, and the collection and analysis of data. It is the student's responsibility to locate and recruit subjects and to collect the data, as well as to write the paper. Papers that are based on original data are preferred; however, those based on secondary data sources will also be considered.

Supervision: The doctoral project is supervised by a committee of three faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee and the student's primary advisor and editor. The "second reader" and

"third reader" evaluate the proposal at the beginning, consult on the development of the paper as necessary, and must approve the final paper.

Credit: A student enrolls in one unit of Audiology Doctoral Project each semester he/she works on the project for a total of five units. Students must complete the project before the end of the third year in order to complete degree requirements.

Audiology Progress Exam (CSAD 510)

Consists of written and clinical portions. Both portions must be passed according to the criteria below:

Formative written exam: Based on coursework taken in the first year of the Au.D. program (anatomy and physiology, acoustics and psychoacoustics, instrumentation, audiologic evaluation, amplification, disorders of the auditory system, genetics, research methods, and pediatric and educational audiology). The exam is administered during the summer of the first year. The exam period is over two days, and students will write for up to four hours each day.

1. Faculty will develop questions and scoring rubrics for each of the nine subject areas assessed based on expertise and subject areas taught.
2. Each response will be scored by two faculty members. If two faculty members award different scores (e.g. pass and no-pass), a third faculty member will serve as a tie breaker. Faculty scores are confidential.
3. Upon completion and review by the examiners, each question is given a grade of "Pass", "Conditional Pass, or "No-Pass"
 - a. "Pass" indicates a satisfactory completion of the question.
 - b. "Conditional Pass" indicates a pass, but the examiners require additional work or remediation. Examiners are required to provide written feedback of the student's responses. Deficiencies can be addressed through an oral exam for further clarification or coursework remediation (reading, independent study, etc.), which is determined by the faculty examiner and Au.D. Program Director. A timeline for this remediation plan and a method for verifying completion of the work must be determined by the faculty examiners, Au.D. Program Director, and the student.
 - c. "No-Pass" indicates an unsatisfactory answer. Students are required to meet with the examiners and Au.D. Program Director to review their performance. Students who receive "No-Pass" results on less than or equal to 25% of the questions will meet with the examiners to address deficiencies.
4. Students must receive a "Pass" on all areas of the exam to proceed to the second year.
5. Students receiving conditional "Pass" results on more than 50% of the questions may be placed on academic probation and given the opportunity to retake the exam by the end of the summer semester after completing remediation work. Failure to receive a "Pass" on the second administration of the exam will result in dismissal from the program.
6. Students receiving "No-Pass" results on more than 25% of the questions will be dismissed from the program.

Clinical exam: Includes a practical portion and a case study. Students will perform clinical procedures related to the topics presented in CSAD 614: Audiologic evaluation, CSAD 622: Amplification I, CSAD 622L: Amplification I lab, CSAD 631: Amplification II, and CSAD 632: Pediatric and Educational Audiology. Students will perform the evaluation in the presence of an Au.D. faculty member. The second part of the clinical

exam will involve the presentation of a case study in which students will discuss their preparation for the appointment, possible diagnostic results, clinical interpretation of findings, and recommendations.

1. Grading
 - a. Students must pass the clinical portion of the exam at 80% or higher in order to enroll in CSAD 504.
 - b. Students receiving less than 80% will have one opportunity to retake the clinical portion of the exam and receive a "Pass" result
 - c. Students who fail to receive a "Pass" result on the second attempt will be removed from the program

Audiology Comprehensive Exam (CSAD 520)

Definition: Summative written and oral exam that assesses knowledge and skills gained through coursework and/or clinical practica, and evaluates problem-solving and critical thinking skills for clinical cases. The written exam will be completed within the first week of the testing period during the spring semester, and the oral exam will be scheduled during the second week of testing.

1. The written portion consists of 200 questions that evaluate students' knowledge of the first two years of didactic and clinical coursework. Students must score 80% or better on this section to pass. The exam period is up to four hours on one day.
 - a. Students who receive less than 80% on the exam must develop a plan for remediation with the Au.D. program faculty. Students may retake the written portion of the exam once. Failure to achieve a passing score on the second attempt will result in dismissal from the program.
2. The oral exam includes three cases (e.g. pediatric, adult, vestibular, etc.). The student will discuss the case history information, diagnostic results, and management plan with the examining committee. Questions pertaining to interpretation of the test results, site-of-lesion determination, recommendations or referrals, and rehabilitation of cases will be asked. Students will be expected to reference research and/or evidence-based practice guidelines in their responses. Students will also be asked additional questions to respond to during this examination period.
 - a. Each response to the oral exam will be evaluated by three Au.D. faculty members. Faculty will evaluate responses using a rubric for thorough discussion, appropriate assessments and recommendation, and correct responses to questions.
 - b. Upon completion and review by the examiners, each question is given a grade of "Pass" or "No-Pass."
 - i "Pass" indicates a satisfactory completion of the question.
 - ii "No-Pass" indicates an unsatisfactory answer to any of the discussion questions of the oral exam. Students who receive a "No-Pass" result are not permitted to begin the third-year externship. Students will be given the opportunity to develop a remediation plan with Au.D. program faculty before retaking the exam at the end of the summer semester. Failure to receive a "Pass" result on the second attempt will result in dismissal from the program.

Additional Information

Licensure, Certification, and Fellowship

Students completing the program will be eligible to apply for California licensure in audiology and fellowship from the American Academy of Audiology. Students seeking the Certificate of Clinical Competence from the American Speech-Language and Hearing Association (ASHA) (pending approval of CAA candidacy status) after graduation must

notify the clinical coordinator to find ASHA-certified supervisors for the placements (specifically, during the externship year).

Licensure

Admission into programs leading to licensure does not guarantee that students will obtain a license. Licensure requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure requirements.

Program Requirements

Coursework in the Doctor of Audiology program are lockstep and begin in the fall semester.

Students are admitted to the program on a yearly basis. There are eleven semesters in the program.

Units required for Doctorate of Audiology Program: 118 units

Code	Title	Units
Semester 1: Fall (13 Units)		
CSAD 610	Introduction to clinic	1
CSAD 611	Anatomy and physiology of the auditory and vestibular systems	3
CSAD 612	Acoustics and psychoacoustics	3
CSAD 613	Instrumentation	3
CSAD 614	Audiologic evaluation	3
Semester 2: Spring (13 Units)		
CSAD 620	Clinical methods: Communicating with patients	1
CSAD 620C	Audiology clinic II	1
CSAD 621	Research methods in audiology	3
CSAD 622	Amplification I	3
CSAD 622L	Amplification I lab	1
CSAD 623	Disorders of the auditory system	3
CSAD 624	Genetics for audiology	1
Semester 3: Summer (10 Units)		
CSAD 510	Audiology progress exam	1
CSAD 630	Clinical methods: Report writing	1
CSAD 630C	Audiology clinic III	2
CSAD 631	Amplification II	3
CSAD 632	Pediatric and educational audiology	3
Semester 4: Fall (13 Units)		
CSAD 640	Clinical methods: Current topics in audiology	1
CSAD 641	Auditory evoked potentials	3
CSAD 641L	Auditory evoked potentials lab	1
CSAD 642	Industrial audiology and hearing conservation	3
CSAD 643	Tinnitus	3
CSAD 640C	Audiology clinic IV	1
CSAD 501	Audiology doctoral project I	1
Semester 5: Spring (12 Units)		
CSAD 502	Audiology doctoral project II	1
CSAD 650	Clinical methods: Billing and coding	1

CSAD 650C Audiology clinic V	1
CSAD 651 Objective measures	3
CSAD 652 Pediatric habilitation	3
CSAD 653 Diagnosis and management of vestibular disorders	3
Semester 6: Summer (9 Units)	
CSAD 503 Audiology doctoral project III	1
CSAD 660 Clinical methods: Legal/ethical issues	1
CSAD 660C Audiology clinic VI	2
CSAD 661 Aural rehabilitation	3
CSAD 662 Implantable devices and technology	2
Semester 7: Fall (11 Units)	
CSAD 504 Audiology doctoral project IV	1
CSAD 670 Clinical methods: Professional issues	1
CSAD 670C Audiology clinic VII	2
CSAD 671 Counseling in audiology	3
CSAD 672 Central auditory processing disorders	3
CSAD 673 Pharmacology and ototoxicity	1
Semester 8: Spring (10 Units)	
CSAD 681 Practice management	2
CSAD 682 Aging and the auditory system	2
CSAD 683 Speech-language pathology for audiologists	1
CSAD 680C Audiology clinic VIII	2
CSAD 680 Clinical methods: Differential diagnosis	1
CSAD 505 Audiology doctoral project V	1
CSAD 520 Audiology comprehensive exam	1
Semester 9: Summer (9 Units)	
CSAD 710 Clinical methods: Externship I	2
CSAD 710E Audiology Externship I	7
Semester 10: Fall (9 Units)	
CSAD 720 Clinical methods: Externship II	2
CSAD 720E Audiology Externship II	7
Semester 11: Spring (9 Units)	
CSAD 730 Clinical methods: Externship III	2
CSAD 730E Audiology Externship III	7
Total Units	118

MS in Communication Sciences and Disorders

Total units required for MS: 55-57 units

Program Description

Employment as a Speech-Language Pathologist in California requires both a Master's degree and a credential or license. Completion of the Master's degree provides the training necessary for students to qualify for the American Speech-Language-Hearing Association's Certificate of Clinical Competence in Speech-Language Pathology, the California State License in Speech-Language Pathologist and the California Speech-Language Pathology Services Credential. The Department also prepares students to apply for the Special Class Authorization, an extension of the Speech-Language Pathology Services Credential, required to teach a classroom of students with primary disabilities in the area of speech and

language impairment (Other experiences and exams are also required; these will be described below under "Additional Information").

Admission Requirements

- Students must have an undergraduate degree (or its equivalent) in Speech-Language Pathology, Communication Sciences and Disorders, or its approved equivalent.
- Students must understand that admission preference is given to students whose undergraduate curriculum is equivalent to Sacramento State's Communication Sciences and Disorders Undergraduate Curriculum.
- Students must have completed the required major prerequisite coursework as delineated in the Undergraduate Program Catalog description for Communication Sciences and Disorders at Sacramento State before beginning graduate-level coursework in Communication Sciences and Disorders. [Pre-requisites: CHDV 30, PSYC 2, Statistics, DEAF 51, or their equivalents].
- Students must have an overall GPA of 2.75 and a 3.00 GPA in the major.
- Domestic applicants with foreign documents and international students (F-1 or J-1 visa applicants) must consult the Office of Graduate Studies and Global Education/International Admissions Department for specific application instructions. These students must also submit TOEFL scores. Consult the Department website for department-specific TOEFL scores.
- Successful passage of all three sections of CBEST.
- GRE scores obtained in the last 5 years.
- Three letters of recommendations.
- Oral and written essay.
- Resume of related work, volunteer and multicultural experience and any scholarships, awards or other commendations.
- Documentation of completed observation hours.
- Students must consult the Department website for additional current admission requirements and procedures.

Communication Sciences and Disorders Graduate Program Policies and Procedures

1. A student must have a 3.0 GPA in the major in order to graduate with a Master of Science Degree in Communication Sciences and Disorders. To achieve this GPA, students may not earn a grade of less than a B in any major didactic course or a grade of B- in any clinical practicum. Repeated course grades will either be forgiven or averaged with the new grade according to the campus graduate policy on repeating courses. Students failing to maintain a GPA of 3.00 are automatically placed on academic probation. The student then has one semester to make up the grade point deficiency or s/ he will not be allowed to continue the graduate program and will be dismissed. Any student who has failed any two clinical practicum courses will not be allowed to continue in the graduate program and will be dismissed.
2. Prior to enrolling in any Clinical Practica, students must fulfill the following criteria:
 - a. Proof of negative tuberculin (PPD) test and verification of measles, rubella, and hepatitis B immunization series.
 - b. Completion of a Level 1 criminal background check. Background checks must be conducted by the department-sanctioned agency. Refer to Department webpage for current agency instructions.

Background checks performed by other agencies are not accepted.

- c. Students must complete all clinical practica in the proscribed sequence. Students who have not completed a given semester's clinical practica will not be allowed to progress into subsequent clinical practica including internships.
 - d. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
3. Students must meet clock-hour requirements for the American Speech-Language and Hearing Association (ASHA) Certificate of Clinical Competence (CCC), California License in Speech-Language Pathology and the California Speech-Language Pathology Services Credential with or without Special Class Authorization.
 4. Internship requirements: Documentation of the following is required by the end of the second clinical semester:
 - a. Current certification in Cardiopulmonary Resuscitation (CPR) for Health Care Providers.
 - b. Complete Certificate of Clearance.
 - c. Pass the California Basic Educational Skills Test (CBEST)
 - d. Students must complete CSAD 295I and CSAD 295M. Optional additional clinical practica are: CSAD 295S and CSAD 295P
 5. Students must furnish their own transportation to off-campus practicum sites.
 6. Students must explore and complete additional internship requirements as delineated by each site.
 7. Clock hours from the following may be counted for the CCC and California License in Speech-Language Pathology only if the on-site supervisors have their CCCs and California License in Speech-Language Pathology:

Code	Title	Units
CSAD 295I	Internship: Speech-Language and Hearing Services in Schools (SLHS)	4
CSAD 295M	Internship: Speech-Language Pathology in a Medical Setting	4
CSAD 295P	Internship: Speech-Language Pathology in Private Practice	4
CSAD 295S	Internship: Special Class Authorization Eligibility	4
 8. Students must complete 100 supervised, direct-client-contact practica hours over forty-five work days in CSAD 295I and in the optional CSAD 295S.
 9. Students must meet the clinical practicum requirements for the Certificate of Clinical Competence (CCC) and the California License in Speech-Language Pathology at the time of graduation in order to receive the Master's Degree.
 10. Students must submit a signed record of all observation hours and supervised clinical clock hours to the Speech-Language Pathology and Audiology Department. Students should retain multiple copies for their personal records.
 11. Advancement to Candidacy: Students must file for Advancement to Candidacy per Office of Graduate Studies procedures as posted on their website.

Additional Information
Program Completion

If the Bachelor's Degree in Communication Sciences and Disorders, or its equivalent, has been completed at another University, additional time may be needed to complete the undergraduate requirements not already

met. If courses are waived at Sacramento State because they were taken at another University, the student must have an adequate number of graduate units at Sacramento State in the major to meet the MS degree requirements and ASHA graduate-level requirements.

Certificate of Clinical Competence

A Master of Science Degree from Sacramento State fulfills the academic and clinical requirements for the Certificate of Clinical Competence (CCC), which is granted by the American Speech-Language-Hearing Association (ASHA). The student must complete a Clinical Fellowship (one year of paid professional experience under supervision) and pass the appropriate PRAXIS exam before the certificate is granted. The Certificate of Clinical Competence is required for most employment positions, both in the public schools and in other settings.

Licensure

A Master of Science Degree from Sacramento State fulfills the academic and clinical requirements for the California License in Speech-Language Pathology. The license is required for employment in settings other than schools or federal agencies. Students must complete a Clinical Fellowship Year (one year of paid professional experience under supervision) and pass the appropriate PRAXIS exam before the license is granted.

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the department graduate coordinator who can be reached at (916) 278-6601.

Credential

A Master of Science Degree from Sacramento State fulfills the academic and clinical requirements for the California Speech-Language Pathology Services Credential. This credential authorizes the individual to work as an itinerant speech-language pathologist in the California public schools. This requires a minimum of 200 clock hours of clinical practice with minors. One hundred of these hours must be in a public school setting. In addition, the applicant may also qualify as a teacher of a special day class for students with primary disabilities in the area of speech and language impairment by acquiring the Special Class Authorization. This authorization, an extension of the Speech-Language Pathology Services Credential, requires completion of the SPHP 295S: Special Day Class Internship, passage of the Reading Instruction Competence Assessment (RICA), and passage of appropriate California Subject Matter examinations for Teachers (CSET: Multiple Subjects OR a single subject CSET in the areas of art, English, foreign language, mathematics including foundational-level mathematics, music, social science, or foundational-level general science). Note: For students with undergraduate degrees in the single subject areas listed above, completion of a subject matter program in one area or an applicable subject matter waiver program may fulfill this subject matter requirement.

For more information on these examinations, the student is referred to the CTC Exams website (<http://www.ctcexams.nesinc.com>).

Candidates must pass the California Basic Education Skills Test (CBEST).

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the department graduate coordinator who can be reached at (916) 278-6601.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 55-57

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Students must advance to candidacy before they can enroll in CSAD 500C, CSAD 500P, or CSAD 500T (see culminating experience below).

Program Requirements

Graduate courses are designed for students to begin in the fall semester and progress in a proscribed sequence. Students are admitted into the program in two cohorts. The first cohort (Fall Clinical Practica Cohort) begins clinical practica and coursework in the fall semester and can expect to graduate in a minimum of 4 semesters. The second cohort (Spring Clinical Practica Cohort) begins coursework in the fall semester and begins clinical practica in the spring semester. This group can expect to graduate in a minimum of 5 semesters.

Fall Clinical Practica Cohort

Semester 1: Fall		Units
CSAD 218	Motor Speech Disorders	3
CSAD 223	Advanced Seminar in Child Language Disorders	3
CSAD 228A	Methods: Speech Disorders I	2
CSAD 229A	Practice: Speech Disorders I	2
CSAD 241S	Practice: Hearing Screenings	1
CSAD 242A	Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology	2
CSAD 243A	Practice: Language Disorders I	2
Units		15
Semester 2: Spring		Units
CSAD 217	AAC and Assistive Technologies	2
CSAD 221	Neurogenic Language Disorders	4
CSAD 222	Curriculum in Relation to Language – Learning Disabilities in School-age Children	3
CSAD 228B	Methods: Speech Disorders II	1

CSAD 229B	Practice: Speech Disorders II	2
CSAD 242B	Methods: Language Disorders II	1
CSAD 243B	Practice: Language Disorders II	2
Units		15
Semester 3: Fall		
CSAD 219	Counseling Techniques for Speech Pathologists and Audiologists	3
CSAD 227	Dysphagia and the Medical Setting	3
CSAD 228C	Methods: Speech Disorders III	1
CSAD 229C	Practice: Speech Disorders III	2
CSAD 242C	Methods: Language Disorders III	1
CSAD 243C	Practice: Language Disorders III	2
CSAD 244	Methods: Speech – Language Assessment	1
CSAD 245	Practice: Speech – Language Assessment	1
CSAD 500T or CSAD 500P	Culminating Experience: Thesis 3 or Culminating Experience: Project	2
Units		16
Semester 4: Spring		
CSAD 250	Speech/Language Internships Seminar	2
CSAD 295I	Internship: Speech-Language and Hearing Services in Schools (SLHS) ¹	4
Select one of the following:		4
CSAD 295M	Internship: Speech-Language Pathology in a Medical Setting	
CSAD 295P	Internship: Speech-Language Pathology in Private Practice	
CSAD 295S	Internship: Special Class Authorization Eligibility	
Select one of the following:		2
CSAD 500C	Culminating Experience: Comprehensive Exam	
CSAD 500P	Culminating Experience: Project	
CSAD 500T	Culminating Experience: Thesis	
Units		12
Semester 5: Fall		
Semester 5 is optional ²		
Select one or two of the following:		
CSAD 295M	Internship: Speech-Language Pathology in a Medical Setting	
CSAD 295P	Internship: Speech-Language Pathology in Private Practice ^{1, 2}	
CSAD 295S	Internship: Special Class Authorization Eligibility ^{1, 2}	
Units		0
Total Units		58

¹ Minimum of 8 units of internships required for the Master of Science Degree in Communication Sciences and Disorders.

² If a student elects to pursue an additional internship experience, then the student may enroll in one or more of these experiences.

³ Students completing a thesis or project must enroll in two units of CSAD 500T or CSAD 500P in semester 3 **AND** semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.

Spring Clinical Practica Cohort

Semester 1: Fall		Units
CSAD 218	Motor Speech Disorders	3
CSAD 223	Advanced Seminar in Child Language Disorders	3
Units		6
Semester 2: Spring		
CSAD 221	Neurogenic Language Disorders	4
CSAD 222	Curriculum in Relation to Language – Learning Disabilities in School-age Children	3
CSAD 228A	Methods: Speech Disorders I	2
CSAD 229A	Practice: Speech Disorders I	2
CSAD 241S	Practice: Hearing Screenings	1
CSAD 242A	Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology	2
CSAD 243A	Practice: Language Disorders I	2
Units		16
Semester 3: Fall		
CSAD 219	Counseling Techniques for Speech Pathologists and Audiologists	3
CSAD 227	Dysphagia and the Medical Setting	3
CSAD 228B	Methods: Speech Disorders II	1
CSAD 229B	Practice: Speech Disorders II	2
CSAD 242B	Methods: Language Disorders II	1
CSAD 243B	Practice: Language Disorders II	2
Units		12
Semester 4: Spring		
CSAD 217	AAC and Assistive Technologies	2
CSAD 228C	Methods: Speech Disorders III	1
CSAD 229C	Practice: Speech Disorders III	2
CSAD 242C	Methods: Language Disorders III	1
CSAD 243C	Practice: Language Disorders III	2
CSAD 244	Methods: Speech – Language Assessment	1
CSAD 245	Practice: Speech – Language Assessment	1
CSAD 500T or CSAD 500P	Culminating Experience: Thesis ³ or Culminating Experience: Project	2
Units		12
Semester 5: Fall		
CSAD 250	Speech/Language Internships Seminar	2
CSAD 295I	Internship: Speech-Language and Hearing Services in Schools (SLHS) ¹	4
Select one of the following:		4
CSAD 295M	Internship: Speech-Language Pathology in a Medical Setting ¹	
CSAD 295P	Internship: Speech-Language Pathology in Private Practice	
CSAD 295S	Internship: Special Class Authorization Eligibility	
Select one of the following:		2

CSAD 500C	Culminating Experience: Comprehensive Exam	
CSAD 500P	Culminating Experience: Project	
CSAD 500T	Culminating Experience: Thesis	
Units		12
Semester 6: Spring		
Semester 6 is optional ²		
Select one of the following:		
CSAD 295M	Internship: Speech-Language Pathology in a Medical Setting	
CSAD 295P	Internship: Speech-Language Pathology in Private Practice ^{1, 2}	
CSAD 295S	Internship: Special Class Authorization Eligibility ^{1, 2}	
Units		0
Total Units		58

- ¹ Minimum of 8 units of internships required for the Master of Science Degree in Speech-Language Pathology.
- ² If a student elects to pursue an additional internship experience, then the student may enroll in one or more of these experiences.
- ³ Students completing a thesis or project must enroll in two units of CSAD 500T or CSAD 500P in semester 3 **AND** semester 4. Students completing the comprehensive examination must enroll in 2 units of CSAD 500C in semester 4.

Culminating Experience

- A student working toward a master's degree may choose as a Culminating Experience either a Thesis CSAD 500T, Project CSAD 500P, or Comprehensive Examination CSAD 500C.
- In order to enroll in CSAD 500T, CSAD 500P, or CSAD 500C a student must have been advanced to candidacy.**
- A student may not register for CSAD 500T unless the following conditions have been met:
 - The first and second readers judge that the first two chapters of the thesis or project (literature review and methodology) are sufficiently well-developed.
 - Her/his proposal has been approved by the Culminating Experience Committee no later than the 11th week of the second clinical semester. The proposal must include the first two chapters specified above.
 - Institutional Review Board (IRB) approval has been obtained. ***It is possible for this process to take up to a full academic year.***
 - Written approval of the first reader has been accepted by the Department Chair.
- No subjects may be recruited until the student has registered for CSAD 500T and has received Institutional Review Board (IRB) approval.
- A student may not register for CSAD 500P until the following conditions have been met:
 - The first and second readers judge that her/his written proposal describing the project's significance, objectives, methodology, and conclusions or recommendations are sufficiently well-developed.
 - Her/his proposal has been approved by the Culminating Experience Committee no later than the 11th week of the second clinical semester. The proposal must include the first project description specified above.
 - Written approval of the first reader has been accepted by the Department Chair.

- Institutional Review Board (IRB) approval obtained, if applicable. ***It is possible for this process to take up to a full academic year.***
6. A student enrolled in CSAD 500T or CSAD 500P may switch to the CSAD 500C Comprehensive Exam with approval from the Culminating Experience Committee and submission of a Petition for Exception form. ***There is no reversal of this change.***

Thesis (CSAD 500T)

- **Definition:** A thesis is an independent research study conducted by the student under the supervision of members of the faculty. A thesis must involve a research question or hypothesis, review of pertinent literature, and the collection and analysis of data. It is the student's responsibility to locate and recruit subjects and to collect the data, as well as to write the thesis. A thesis that includes the generation of original data is preferred; however, proposals based on file data or other secondary data sources will be considered.
- **Supervision:** A thesis is supervised by a committee of two or more faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee, and the student's primary advisor and editor. The "second reader" evaluates the thesis at the beginning, consults on the development of the manuscript as necessary, and must approve the final manuscript.
- **Credit:** A student enrolls in two units of CSAD 500T each semester he/she works on the thesis, up to a total of four units. If the thesis is not completed within two semesters the student may enroll in continuous enrollment (CSAD 599), if not otherwise actively enrolled, for two additional semesters. Students are allowed a maximum of three semesters past the semester of first registering in CSAD 500T to complete their thesis for a maximum of four semesters total. Students who do not finish the thesis within the first semester of enrolling in CSAD 500T will receive a grade of "Report in Progress" (RP). If a student does not complete the thesis within the four total semesters, s/he will receive a No Credit (NC) grade for the original units and must enroll in CSAD 500C for the culminating experience.

Project (CSAD 500P)

- **Definition:** A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality and independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project's significance, objectives, methodology, and a conclusion or recommendation. The project can be, but is not limited to, a curriculum project that contributes to the fields by enhancing communication of the subject matter or a research project that contributes to the fields by adding to the professional knowledge base.
- **Supervision:** A project is supervised by a committee of two or more faculty members in the Department of Communication Sciences and Disorders. The "first reader" is the chair of the committee, and the student's primary advisor and editor. The "second reader" evaluates the project at the beginning, consults on the development of the project as necessary, and must approve the final project.
- **Credit:** A student enrolls in two units of CSAD 500P each semester he/she works on the project, up to a total of four units. If the project is not completed within two semesters, the student may enroll in continuous enrollment (CSAD 599), if not otherwise actively enrolled, for two additional semesters. Students are allowed a maximum of three semesters past the semester of first registering in the CSAD 500P to complete their project for a maximum of four

semesters total. Students who do not finish the project within the first semester of enrolling in CSAD 500P will receive a grade of "Report in Progress" (RP). If a student does not complete the project within the four total semesters, she/he will receive a No Credit (NC) grade for the original units and must enroll in CSAD 500C for the culminating experience.

Comprehensive Exam (CSAD 500C)

- **Definition:** Written exam comprised of eight questions. Examinees are given one-and-a-half hours to complete each question.
- Comprehensive Exams are scheduled once per semester at the discretion of the department.
- Upon completion and review by the examiners, each question is given a grade of "Outstanding", "Pass", "Pass with Conference" or "No-Pass."
 - a. "Pass" indicates a satisfactory completion of the question.
 - b. "Pass with Conference" indicates a pass, but the examiner requires oral or written clarification of the answer from the student. This must be completed before the 14th week of the semester in which the exam is taken. Conferences are scheduled at the discretion of the examiner.
 - c. "No-Pass" indicates an unsatisfactory answer.
- The student may receive a "No-Pass" for up to two questions without retaking the entire exam. These "No-Pass" questions must be rewritten under the direction of the examiner.
- Question rewrites must be successfully completed with a grade of "Pass" before the 14th week of the semester in which the exam is taken.
- If any rewritten question is not passed, the student receives a grade of No Credit (NC) for CSAD 500C.
- If three or more questions of the exam receive a grade of "No-Pass", the student receives a grade of No Credit (NC) for CSAD 500C.
- Student receiving a grade of No Credit (NC) for CSAD 500C must register again in CSAD 500C and retake the comprehensive exam in its entirety at the next scheduled administration.
- The same conditions for grading apply on a retaken comprehensive exam as on the first attempt. Students may take CSAD 500C no more than **two times**.

Criminal Justice

College of Health and Human Services

Program Description

Criminal Justice encompasses multidisciplinary examinations of crime, crime control, the justice process, and justice institutions. The discipline addresses definitions, causation, prevention, investigation, legal process, treatment, rehabilitation, and research relating to crime and justice as well as the institutions of the justice system and their administration.

The comprehensive program at Sacramento State covers every aspect of the field. Courses are offered which span the entire system of justice administration in both public and private sectors.

The Division of Criminal Justice:

- Seeks to identify and increase understanding of major social issues related to crime, offenders, prevention and control, and victims.
- Features a large and diverse faculty combining scholars from a variety of disciplines who have contributed extensively to the justice

field with practitioners who have many years of experience in justice administration.

- Offers a flexible undergraduate major, including the option of internship, and highly-structured advising. Advising allows the student to shape an undergraduate program specifically to prepare for employment in multiple areas of criminal justice, advanced study in criminal justice, or law school.
- Features a Master of Science program that offers students a generalist degree focused on a variety of areas within the field of Criminal Justice including, but not limited to, criminological theory and research methods, corrections, policing, law and justice, restorative justice, victimology, juvenile justice, white collar crime, terrorism, and comparative criminal justice. In addition, we offer experimental courses in areas with a growing body of research such as the mentally ill and the criminal justice system and emergency management.

Many graduates find positions with various federal, state, and local criminal justice agencies. Others have pursued advanced study in criminology and law. Employment opportunities for Criminal Justice majors have remained strong for the past decade, both with government agencies and in private security, and future demand appears assured.

The Criminal Justice program at Sacramento State is one of the most highly sought-after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Criminal Justice majors must complete a series of required lower division courses and then apply for admission to the program. It is highly recommended that interested students speak with the Criminal Justice Student Advising Center as early as possible.

Degree Programs

BS in Criminal Justice (p. 625)

Minor in Criminal Justice (p. 628)

Minor in Forensics Investigations (Chemistry and Biology Majors Only) (p. 628)

Certificate in Law Enforcement (p. 628)

MS in Criminal Justice (p. 629)

Career Possibilities

Investigative positions, most with law enforcement authority, with federal, state, and local agencies such as the FBI, ATF, Secret Service, DEA, Homeland Security Administration, state level Departments of Justice, Alcohol Beverage Control, Department of Motor Vehicles, District Attorney's and Public Defender's Offices · Includes uniformed peace officer positions within local and state governments, such as: police officer, deputy sheriff, highway patrol, and natural resources officer, including crime scene specialists, and crime analysts · Correctional peace officer positions including state and local probation officers and parole agents within adult and juvenile correctional systems · Includes non-sworn correctional counselors and administrators. Private corporate security agents and investigators such as those employed by banks and insurance companies and transportation companies, including loss-prevention specialists · Victim services and officer services positions within a wide variety of social service agencies related to crime, justice, and rehabilitation · In addition, graduates can pursue advanced degrees

in law or research disciplines, and may apply to military officer candidate schools.

Law as a Career

Lawyers are often called upon to fill many varied and complex roles. At various times they function as advocates, social planners, and mediators. Because society turns most frequently to the legal profession when it looks for a method of balancing changing conditions and traditional values, lawyers are social planners. Lawyers play a weighty role in our society and have a tremendous responsibility, not only to the citizenry

which they serve, but also to the law itself, and to the concept of justice, to which they must be committed.

Pre-Law Education

The student's cumulative undergraduate GPA and his/her score on the *Law School Admissions Test* (LSAT) are the primary factors on which law schools base their admissions decisions. The importance of these factors cannot be overestimated. Assuming that you qualify in this manner for admissions, your undergraduate course of study plays a role in preparing for the study and practice of law. Students interested in law school should visit the Law School Admission Council's website www.lsac.org (<http://www.lsac.org>) early in their college careers in order to learn about the process of preparing for and applying to law school.

Undergraduate Program

It would be unwise and, perhaps, impossible to prescribe a specific course of study and assert that it is the best one can receive in preparation for entering law school. Therefore, there is no established major for pre-law students. In 1988, the Association of American Law Schools (AALS) expressed the view that the "quality of education is concerned with the development of basic skills and insights. It thus involves education for:

1. comprehension and expression in words;
2. critical understanding of the human institutions and values with which the law deals;
3. creative power in thinking;
4. knowledge of computers and word processing."

While no one major embraces all of these characteristics and, while personal development in these areas is an individualistic effort molded to one's particular strengths, weaknesses, and interests, the University offers numerous courses which give training in these skills. The following areas of study encompass these recommendations and suggest courses which prepare students for the study and practice of law.

- **Business:** When an individual becomes a lawyer, he/she also becomes a member of the business community; hence, classes in business are beneficial to the pre-law student. Competence in this field can make the difference between an organized, successful lawyer and a bewildered, ineffective one. Furthermore, the practical judgment one develops in business classes frequently allows one to penetrate the legal maze and to quickly reach the important issues of any case.
- **Computer Science:** In an age where information storage and problem solving is increasingly accomplished by computers, a lawyer cannot afford to venture into the future without a working knowledge of computers.
- **Criminal Justice:** The Division of Criminal Justice includes three law courses in its core curriculum and offers the option of additional law and constitutional theory courses among its electives. The department offers intern placements in law related positions. Law courses are instructed in the case study method used in law schools. This instruction allows a student to determine their level of interest and aptitude for legal studies while still an undergraduate. Several members of the teaching faculty are attorneys, and law courses are taught by attorneys licensed by the bar. In addition, the major in criminal justice offers a general orientation to the justice field and provides students a suggested pre-law course of study engineered to provide an excellent foundation for the study of law.

- **Economics:** As the AALS asserts: "Economics is a science that calls upon the student to master patterns of thought, to explore questions of causation and to probe potentials for solutions." Since many legal problems ultimately involve economic issues, a study of economics will benefit the pre-law student.
- **History and Government:** We are a product of yesterday in our society, our customs and our laws. Without a general understanding of history and how it relates to our present state, the lawyer cannot appreciate the intimate relationship laws have with our culture. By failing to comprehend the relationship between our society, its governmental institutions, and its laws, one risks not understanding certain laws intelligible only in terms of their historical and institutional significance.
- **Logic and Mathematics:** Since the law is abstract, those considering law school need training in the reasoning powers essential for dealing with abstract concepts. The study of logic and mathematics provides the practice needed for developing the ability to think logically.
- **Oral and Written Communication:** The lawyer is primarily a communicator; whether in the courtroom or in the legislature, as a counselor or negotiator, he/she must know how to communicate on many levels with precision and style.
- **Philosophy:** A sizable number of students of philosophy go on to law school and there are now many successful philosopher-lawyers. This is no mere coincidence. Legal questions often raise issues of profound philosophical import. And the two fields share many of the same methods of reasoning and argumentation. The Philosophy Department's Major Concentration in Applied Ethics and Law is specifically designed to prepare prospective students for the intellectual rigors of law school.
- **Science and Engineering:** Students who concentrate in the sciences or in engineering develop the ability to think clearly and concisely. The rigor and discipline required in these courses is valuable training for the law school years.
- **Social Sciences:** Since both law and social science deal with behavior and its implications, lawyers draw on the social sciences for an understanding of human behavior. Applying the tools of the other social sciences to the practice of law enhances the effectiveness of the attorney.

Obviously, one cannot receive degrees in all of these areas; it is suggested that the pre-law student choose a major which interests him/her and supplement this curriculum with as many courses from other areas as possible. In addition to this, the pre-law student should read widely in areas outside the major.

Pre-Law Student Organization

The Phi Alpha Delta Law Fraternity International has been formed by pre-law students to meet the needs of students interested in preparing for a career in law. CSU, Sacramento has an active Phi Alpha Delta chapter and information about joining can be acquired by visiting one of the campus pre-law advisors.

Grades

Good grades are essential to those interested in being accepted at a well regarded school. However, it should be clear that one does not benefit from being so grade conscious that the major criterion for course selection becomes the likelihood of receiving an "A." Tough, demanding professors and courses are essential for training the mind to perform well under the pressures of law school. Challenging, thought-provoking courses are the best way to prepare for the LSAT, for success in law school and as a member of the legal profession. Moreover,

when undergraduate transcripts are viewed by law school admission committees, a great deal of attention is given to the difficulty and the desirability of the courses chosen by the student. For law school admission, grades of "I" (Incomplete) or "W" (Withdrawal) are not included in computing the overall GPA. However, a grade of "WU" or "NC" (No Credit) is counted as an "F," and if a course is repeated, the two grades are averaged. Students should also note that failure to complete work for a grade posted as "I" will result in the "I" converting to an "F" after two semesters.

LSAT

The LSAT is the second major factor considered by law schools in determining admissibility. It is administered by the Law School Admission Council (LSAC). Everything a student needs to know about the LSAT is available at www.lsac.org (<http://www.lsac.org>). The test measures abilities and skills related to problem identification, analysis, logical reasoning, and reading. In addition, the LSAT includes a written essay, copies of which will be sent to individual law schools to enable them to evaluate a candidate's writing ability. Because many law schools consider the LSAT as influential, or more influential, than the GPA, it is important that students prepare for the test very carefully. Students who believe they may qualify for a fee waiver because of serious financial need should apply for the LSAC fee waiver at www.lsac.org. The fee waiver will cover the student's LSAT and Credential Assembly Service fees as well as provide materials that will enable the student to prepare for the LSAT.

There are a number of preparation courses available for students intending to take the LSAT. Students are advised to investigate particular review classes and to assess their ability to prepare successfully for the LSAT without benefit of these often costly courses. The best LSAT preparation materials are those published by the LSAC.

Letters of Recommendation

Most law schools require between one to three letters of recommendation from individuals who can comment on the applicant's potential as a law student. The individuals selected to write letters of recommendation should be able to comment extensively on the applicant's academic capabilities. And, obviously, the evaluation should be a positive one. Letters should also discuss the applicant's ability to comprehend, to communicate, and to critically analyze concepts.

Credential Assembly Service

Students must register for the Credential Assembly Service (CAS) at www.lsac.org (<http://www.lsac.org>) in order to submit applications for American Bar Association accredited law schools. There is a fee associated with registration for the CAS which is waived if the student is approved for the LSAC fee waiver. The CAS compiles a report that contains the student's personal information, LSAT score(s), transcripts, letters of recommendation and, if prepared, recommender evaluations.

The student completes each individual law school application online using their account at www.lsac.org (<http://www.lsac.org>). Once the student has submitted the application the law school requests the CAS report and it is transmitted electronically to them by the LSAC.

Personal Statement

Most law schools require the applicant to submit a personal statement in which the applicant tells the law school something about the applicant's background, the reasons why the applicant wants to study law, and, in some instances, what the applicant hopes to do following law school. This is an extremely important component of the application. It provides the student with an opportunity to share their personal background and

experiences with the law school admissions committee. Students should take time to carefully craft the personal statement and should seek advice from trusted friends, professors and their pre-law advisor to help them in the writing process.

Pre-Law Advisors

Laurie Kubicek, Criminal Justice
Alpine Hall 103, 278-5066

Russell Loving, Criminal Justice

CRJ 1. Introduction to Criminal Justice and Society. 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Reviews the problem of crime and the societal response to criminals. Institutions discussed are those intended to discover the crime and the criminal and those designed to deal with the criminal, the victim, and society, once the criminal has been labeled. Finally, the bureaucracy of crime and its measurement as a social phenomenon are discussed.

CRJ 2. Law of Crimes. 3 Units

Term Typically Offered: Fall, Spring

Introduction to the case method of studying criminal law. Understanding and correlating the common law crimes and substantive law crimes. Study and emphasis on the classification and nature of crimes, the requisite elements of the major common law felonies and criminal responsibility of various persons involved in crime.

CRJ 4. General Investigative Techniques. 3 Units

Term Typically Offered: Fall, Spring

Techniques involved in the investigation of crimes; interview of victims and witnesses; questioning of suspects; organization and procedure in the investigation of crimes; crime scene searches; surveillance; use of scientific aids; and sources of information.

CRJ 5. The Community and the Justice System. 3 Units

Term Typically Offered: Fall, Spring

Examines complex, dynamic relationships between communities and the justice system in addressing crime and conflict with emphasis on the challenges and prospects of administering justice within a diverse, multicultural population and the roles played by race, ethnicity, gender, religion, sexual orientation, age, social class, culture, and justice professionals in shaping relationships within the justice system. Special topics include crime prevention, restorative justice, and conflict resolution and pure justice.

CRJ 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provide students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

CRJ 101. Introduction to Criminal Justice Research Methods. 3 Units
Prerequisite(s): Restricted to Criminal Justice majors
Term Typically Offered: Fall, Spring

Introduction to research methodologies used in the social sciences, with a special emphasis on those methods most often used in the study of crime and criminal behavior, police/court systems, and correctional institutions, policies, and programs. Students will acquire the knowledge and skills necessary to understand, critically analyze and assess descriptive and quantitative research studies. Topics include the roles of theory and ethics in research, hypothesis testing, and research design.

CRJ 102. Crime And Punishment. 3 Units
Prerequisite(s): Criminal Justice major
Term Typically Offered: Fall, Spring

This course provides an overview of the causes, consequences and responses to crime in society, with special emphasis on the use of theory and research to guide criminal justice policy and practice. The course surveys major theories of crime causation, examines consequences of crime on individuals and societies, and explores various perspectives on the appropriate role of criminal sanctions and offender treatment in modern day systems of justice.

CRJ 105. Delinquency, Prevention and Control. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall only

Comprehensive juvenile delinquency planning process and its contribution to effective delinquency prevention and control; new roles for delinquency control agencies (police, courts, and corrections); the Youth Service Bureau; innovative strategies in delinquency prevention programming.

CRJ 106. Analysis of Career Criminals. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring

Observation and analysis of criminal career patterns using the following approaches: anthropological, autobiographical, psychological, psychiatric, and sociological. The examination of career criminal behavior patterns will focus upon: the process of induction into criminal activity; the deviant orientation of the professional criminal; the organization, life style, and activities of the specialized criminal; and the methodological problems associated with the measurement of recidivism.

CRJ 108. Domestic Crime and Violence. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring

Detailed examination of the multiple causes, effects and dynamics of crime against children, spouses, domestic partners and the dependent elderly, the response of criminal justice agencies to these crimes and the impact of these crimes on their victims.

CRJ 109. Media, Crime, and Criminal Justice. 3 Units
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall only

Analyzes the social construction of crime by news and entertainment media and introduces criminal justice students to the manner in which the media influences and shapes crime in their own society and in the criminal justice system. Analyzes images of crime and the criminal justice system that are presented through the major mass media within America, including a detailed analysis of media institutions, American pop culture, and the construction of crime and justice. Exposes students to a new way of looking at crime problems and provide them with a deeper understanding of how crime and the criminal justice system are both socially constructed by the news and entertainment media.

CRJ 111. Women and the Criminal Justice System. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Survey of the roles of women as offenders, victims and employees in the criminal justice system. Examines statistics, research and the literature as it relates to female crime. Evaluates current patterns and practices of law enforcement, criminal courts and corrections relative to women as offenders, victims, and employees.

CRJ 112. Gangs and Threat Groups in America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of criminal organizations in America. The problems posed by "anti-social groups," their structure and their history in contemporary American society. The spectrum of social sciences is employed in an examination of "illegal groups" and such issues as aggression and group dynamics. Styles such as street gangs, prison gangs and traditional organized crime are defined and studied.

CRJ 114. Sexual Offenses and Offenders. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Exploration of relevant factors and dimensions of sexual offenses and offenders related to the Criminal Justice system, its cliental and practitioners.

CRJ 115. Violence and Terrorism.**3 Units**

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Systemically examines political violence, responses by government institutions to that violence and implications of both for the administration of justice. Content is structured along a continuum, ranging from small scale violence to mass violence - assassinations, terrorism by sub-national and transnational organizations, state terror and genocide. In recent years political violence has progressively drawn the American governmental institutions, particularly justice agencies, into the global picture of violence committed by both domestic and international terrorists.

CRJ 116. Restorative Justice and Conflict Resolution.**3 Units**

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines concepts, principles, techniques of conflict resolution and restorative justice in contemporary US legal system, global peacebuilding, across cultures, and comparative justice practices. The centerpiece is a classroom simulation that introduces students to theoretic analysis and practical knowledge on resolution of conflicts and crime. Addresses nonviolent responses to inter/intra state and community conflicts. Topics include negotiation, mediation, victim offender reconciliation, alternative dispute resolution (ADR), circle sentencing, transitional justice, peace treaty, transformative justice, intergroup dialogues, etc.

CRJ 117. American Criminal Justice and Minority Groups. 🗳️**3 Units**

General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Course examines the origins of racial/ethnic/gender/sex discrimination and disparities in the US justice system. Additionally, course provides a critical examination of the processes and outcomes of the justice system by reviewing the major theories of crime and number of minorities reported in crime data. Using discussions about various criminal justice policies and their impact on minority groups, the course assesses the changing dynamic of race relations and diversity in society and their influences on justice administration.

CRJ 118. Drug Abuse and Criminal Behavior.**3 Units**

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Sociogenic review of the case histories and life styles of selected juvenile and adult offenders with a history of drug abuse. An inquiry into the drug scene, "street" drugs, an examination of people who have abused drugs and have been guilty of delinquent or criminal acts for the purpose of determining the known and identified relationships between drug abuse and crime, and probing the many unknown relationships. A sustained and disciplined examination of the main issues and problems by the use of case studies, discussion groups, and student involvement.

CRJ 121. The Structure and Function of the American Courts.**3 Units**

Prerequisite(s): declared majors or minors or chair permission.
Term Typically Offered: Fall, Spring

Overview of the Federal and State court structures including jurisdiction, venue, roles of court participants, due process and post arrest procedures employed in adjudication, trial process, appellate review. Constitutional issues such as discretion, indigent rights, right to counsel, discovery, pleas, bail and preventive detention, competency, evidence suppression, double jeopardy, and speedy trial will also be addressed.

CRJ 123. Law of Arrest, Search and Seizure.**3 Units**

Prerequisite(s): Restricted to declared majors or minors or department chair permission.
Term Typically Offered: Fall, Spring

Current and recent developments relating to arrest, searches, and seizures; study of constitutional rights predominately associated with the Fourth, Fifth, Sixth and Fourteenth Amendments as related to criminal justice and its administration -- warrants, warrantless seizures, exclusionary rule, confession, eye-witness identification, electronic surveillance, entrapment, and state variance with federal rules. Case study method law course.

CRJ 125. Law of Responsibility.**3 Units**

Prerequisite(s): Restricted to declared majors or chair permission.
Term Typically Offered: Spring only

Substantive criminal law of responsibility and culpability. Topics include legal cause, mens rea, negligence, intent and its equivalents, motive, immaturity, mental incapacitates, mistake, and affirmative defenses including authority and privilege as found in American statute and case law. A case method law course.

CRJ 126. Law of Evidence.**3 Units**

Prerequisite(s): CRJ 121 and CRJ 123; restricted to declared majors or chair permission.
Term Typically Offered: Fall only

Law of evidence as codified and its complimentary interpretations by the courts. Topics include the admission and exclusion of evidence, relevance, the hearsay rule and its exceptions, the use of writings and demonstrative evidence, judicial notice, order of proof and presumptions, and issues relating to witness competency and privileges. Constitutional exclusions and their impacts are not covered.

CRJ 127. Juvenile Law.**3 Units**

Prerequisite(s): CRJ 102 and CRJ 121; restricted to CRJ majors or chair permission.
Term Typically Offered: Fall, Spring

Overview of legal concepts and principles affecting the adjudication of delinquent children in juvenile and adult court systems, develops the ability to read and analyze difficult legal issues relating to juvenile law, and provides the information required to evaluate the effectiveness of the juvenile court system in the context of its stated rehabilitative goals and the potential impact of a shift in focus to a more retribution-oriented structure.

CRJ 128. Administrative Law for Public Safety Personnel. 3 Units

Prerequisite(s): CRJ 121 and CRJ 123; restricted to CRJ majors or chair permission

Term Typically Offered: Spring only

Administrative law is the study of the adjudicatory and law making processes that take place within administrative agencies of the executive branches of government. Further, it is a study of the legal relationship between those agencies and the legislature, the courts, and private parties. Particular attention will be paid to the Federal Administrative Procedures Act, and the California Administrative Procedure Act.

CRJ 130. Fundamentals of Corrections. 3 Units

Prerequisite(s): Restricted to declared CRJ majors or minors or department chair permission.

Term Typically Offered: Fall, Spring

Overview and critical analysis of contemporary correctional theory and practice. Comparison of mainline American corrections with historical, cross-cultural, philosophical and non-traditional views of corrections. Controversial issues in contemporary corrections, including prisoner rights, victimization, the death penalty, unions, institutional corrections, community corrections, future of corrections, correctional careers, and administration and staffing of correctional programs.

CRJ 131. Correctional Institutions. 3 Units

Prerequisite(s): CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission

Term Typically Offered: Fall, Spring

Role and function of the correctional institution in the administration of criminal justice. A review of institutional procedures: reception, classification, program assignment, mass custody, treatment programs, and release, including parole and discharge. The inmate social system and its relationship to the official world that contains it. The following topics will receive special attention: the determinate sentence; the confinement of repetitively violent offenders; the death penalty and its impact on prison management, inmate social services; prison reform; and the stresses experienced by institutional personnel.

CRJ 134. Community Based Corrections. 3 Units

Prerequisite(s): CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission.

Term Typically Offered: Fall only

Role of local and state government in the development of community-based correctional programs; regional detention facilities; recent trends in jail organization and management; ex-offenders and employment; the impact of community corrections on the criminal justice system.

CRJ 136. Corrections Administration. 3 Units

Prerequisite(s): CRJ 101, CRJ 130 and CRJ 160; restricted to declared majors or chair permission.

Term Typically Offered: Fall, Spring

Concepts of administration; corrections as a component of criminal justice; organization and management of correctional services and correctional institutions for delinquent youth and adult offenders; probation and parole; and the legal and political contexts of corrections.

CRJ 141. Police and Society. 3 Units

Prerequisite(s): Restricted to declared CRJ majors or minors or department chair permission

Term Typically Offered: Fall, Spring

Examination of the origins, philosophy, objectives and priorities of the police service in the U.S. A holistic analysis of political, social, economic, legal and other factors impacting the relationship between the police and the society they serve. Police use of discretion, police roles, police and minority groups, police and protest groups, police brutality, and police ethics are also studied.

CRJ 142. Police Administration. 3 Units

Prerequisite(s): CRJ 101, CRJ 141 and CRJ 160; restricted to declared majors or chair permission.

Term Typically Offered: Fall only

Concepts of organization and management; relationships between police agencies and the public, other criminal justice agencies, and other agencies of government; organization for delivery of police services: first response, crime investigation, youth services, vice, communications, and information management.

CRJ 144. Contemporary Issues in Police Administration. 3 Units

Prerequisite(s): CRJ 101 and CRJ 141; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Roles of police in a democratic society; analysis of public disobedience to law; racial and ethnic group relationships with police; public, official, and police corruption; police discretion; professionalism; development of criminal intelligence.

CRJ 151. White Collar Crime. 3 Units

Prerequisite(s): Junior/Senior status, Criminal Justice or Fire Service Management major or chair permission

Term Typically Offered: Fall, Spring

Introduces students to a variety of white collar crime issues, including definitional complexities, the causes, frequency and impact of economic crime, and victim and offender profiles. Governmental corruption, organizational fraud, consumer and environmental offenses, anti-trust violations and international schemes will be covered. Students will also become familiar with methods used to investigate, prosecute and sentence white collar offenders. Policy considerations will be discussed for controlling national and international white collar crime.

CRJ 152. Interviewing and Detection of Deception. 3 Units

Prerequisite(s): CRJ 102; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Principles and techniques of interviewing and detection of deception studied from communication, physiological and psycho-social points of view. Introduction to the use of the polygraph; laws pertaining to confessions and admissions.

CRJ 153. Advanced Criminal Investigation. 3 Units

Prerequisite(s): CRJ 102; restricted to declared CRJ majors or declared Forensic minor or have chair permission.

Term Typically Offered: Fall, Spring

Principles involved in the investigation of crimes; utilization of scientific aids in obtaining information from physical objects; concepts in obtaining information from and about people; concept of reconstruction of crime and profile of suspect; development of leads; investigative problems in major crimes; special problems in crime investigation.

CRJ 154. Introduction to Physical Evidence. 3 Units

Prerequisite(s): CRJ 102; restricted to declared CRJ majors or Forensic Investigation minor or chair permission.

Term Typically Offered: Fall, Spring

Provides an overview of the role of science in collecting and evaluating physical evidence as a component of the criminal investigation and legal processes. Various operations in the examination and interpretation of physical evidence are examined with emphasis on the role of science in supporting the investigator and in the litigation process. Suitable for both science and non-science majors.

CRJ 156. Introduction to Crime and Intelligence Analysis. 3 Units

Prerequisite(s): CRJ 101; must be a declared CRJ major or have chair permission.

Term Typically Offered: Fall, Spring

Introduction to crime and intelligence analysis with a special emphasis on those methods most often used in the study of crime and criminal behavior patterns. Students will acquire the knowledge and skills necessary toward understanding crime analysis, intelligence analysis and mapping geospatial data. Topics include theory, the history of crime analysis, crime analysis technologies, intelligence analysis, and types/functions of crime analysis.

CRJ 160. Justice and Public Safety Administration. 3 Units

Prerequisite(s): restricted to declared CRJ majors or minors or department chair permission.

Term Typically Offered: Fall, Spring

Examines the nature and development of public safety and criminal justice organizations in American society with attention to how the unique functions performed by these agencies has shaped and developed their nature. Particular emphasis is placed on understanding the unique problems generated by administration of bureaucratic, public agencies in a highly politicized environment. Examines the influence of social and political factors on justice and public safety organizations.

CRJ 162. Intergovernmental Relations, Finance and Budgeting for Public Safety Personnel. 3 Units

Prerequisite(s): CRJ 160 or PPA 100; Junior or Senior standing; must be a Criminal Justice or Fire Service Management Major.

Term Typically Offered: Fall only

An examination of the structure, organization and management of state and local government with particular attention to the interplay between governmental agencies that is focused on the operations and management of public safety agencies. Government leadership models, such as mayor and city manager will be examined. Finance, the state and local budgets, taxation, revenue and spending will be addressed.

CRJ 163. Leadership in Criminal Justice and Public Safety. 3 Units

Prerequisite(s): CRJ 160; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Addresses role of leadership in shaping and directing complex justice and public safety organizations. Leadership styles, roles, communication, group dynamics and organizational culture are examined and applied to organizational maintenance, adaptation, and change. Also addresses the role of employee organizations and personal practices in shaping leadership options and styles in public agencies. Particular attention is focused on implementing leadership in the bureaucratic and public agencies typical to the fields of criminal justice and public safety administration.

CRJ 165. Planning for Justice and Public Safety. 3 Units

Prerequisite(s): CRJ 101, CRJ 102 and CRJ 160; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Spring only

Addresses planning in complex justice and public safety organizations. Focuses on the role of planning in preparing for change, maximizing utilization of resources and addressing crime and public safety. Emphasis is placed on the use of planning to unify fragmented public agencies at multiple levels of government in preparing for disaster, controlling crime, and assuring public safety.

CRJ 166. Personnel Administration in Criminal Justice and Public Safety Organizations. 3 Units

Prerequisite(s): CRJ 160; declared CRJ major or chair permission

Term Typically Offered: Fall, Spring

This course provides an understanding of history, theories, laws, and practices related to contemporary as well as future criminal justice/public safety personnel administration and practice.

CRJ 167. Collective Bargaining and Arbitration Issues in Public Safety. 3 Units

Prerequisite(s): Must be a declared CRJ major or chair permission.

Term Typically Offered: Fall, Spring

This course is designed to provide the public safety student and/or criminal justice student, practitioner and/or administrator with an understanding of public safety personnel practices in the area of collective bargaining. Labor-management relations, dispute resolution, arbitration, and the various laws that govern labor-management relations, at all levels of government, will be covered.

CRJ 168. Justice and Public Safety Information Systems. 3 Units

Prerequisite(s): Restricted to declared majors or chair permission.

Term Typically Offered: Fall, Spring

Introduction to criminal justice and public safety information systems. Provides a framework for understanding the needs, types, capabilities and applications of information systems to the field. Current uses are surveyed and future potential applications are examined.

CRJ 169. Emergency Management. 3 Units

Prerequisite(s): CRJ 164; Criminal Justice or Fire Service Management major, or instructor permission.

Term Typically Offered: Fall, Spring

Course reviews the history of emergency management, the current systems in place to manage mitigation, preparedness, response and recovery and the coordination and communication required to do so. Diverse responses to various emergencies will be presented with detailed examination of the roles of various levels of government and integration required. The formal declaration of emergencies and federal aid procedures, agencies involved and their administration will be covered.

CRJ 170. Human Trafficking and Slavery. 3 Units

Prerequisite(s): Junior/Senior level and CRJ majors only; or department chair permission.

Term Typically Offered: Fall, Spring

The course explores the international and domestic legal framework that defines human trafficking and slavery and analyzes the major theories and current research on related causes and risk factors. The role of involvement of transnational organized criminal groups and vulnerability of social groups are discussed. Lastly, the course provides a critical analysis of effective strategies in victim identification, protection, prosecution, and prevention as instrumental components in assessment of crime control policy.

CRJ 172. Comparative Criminal Justice Systems. 3 Units

Prerequisite(s): Junior status; restricted to declared CRJ majors or chair permission

Term Typically Offered: Fall, Spring

Examines representative criminal justice systems from a variety of nations with emphasis on the role of history, culture, social and political values and economic institutions in shaping institutions of justice including law, police, courts, corrections, and juvenile justice systems and practice. Attention is paid to conflict and cooperation between criminal justice systems and ideologies that occur when peoples of different cultures and systems are in close proximity.

CRJ 174. Criminal Justice Systems of the Future. 3 Units

Term Typically Offered: Fall, Spring

Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminals and sanctions in future societies.

CRJ 176. Security Systems. 3 Units

Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Purposes, functions and historical development of industrial security in the U.S. Co-responsibilities of security personnel and line supervisors; principles of physical security, document protection, pilferage prevention and employee programs for plant and inventory protection. Survey of related laws and cooperating agencies of government.

CRJ 181. Topics in Criminal Justice. 3 Units

Prerequisite(s): CRJ 100 and CRJ 110; must be a CRJ major.

Term Typically Offered: Fall, Spring

Topics of interest to criminal justice students and faculty will be offered as the need arises.

Note: May be repeated provided the topic is different.

CRJ 190. Contemporary Issues in Criminal Justice. 3 Units

Prerequisite(s): CRJ 101, CRJ 102, CRJ 121, CRJ 123, CRJ 130, CRJ 141, CRJ 160; restricted to declared CRJ majors or chair permission with senior status, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Examination of current issues in criminal justice with an emphasis on the application of law, management, practice and ethics to analysis of contemporary criminal justice policy. The culminating event for criminal justice majors with an emphasis upon written and oral communication, research and analytical thinking.

CRJ 191. Topics in Criminal Justice Administration. 3 Units

Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

CRJ 195. Internship. 1 - 6 Units

Prerequisite(s): Restricted to declared majors or chair permission and senior status

Term Typically Offered: Fall, Spring

Supervised work and experience in justice or public safety related agencies designed to expand the student's understanding of techniques, procedures and problems that occur in these agencies. Supervision provided by both faculty and agency personnel.

Note: may be repeated for credit

Credit/No Credit

CRJ 196. Experimental Offerings in Criminal Justice. 2 - 4 Units

Prerequisite(s): Restricted to declared majors and minors or instructor permission.

Term Typically Offered: Fall, Spring

To be offered in the various fields of Criminal Justice in response to student needs.

CRJ 196A. The Mentally Ill Individual in the Criminal Justice System. 3 Units

Term Typically Offered: Fall, Spring

Overview and analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, and prisons, and then reentry into the community via parole and probation. The history of how the mentally ill became so embedded in the criminal justice system, whether mental illness has become criminalized, evidence-based mental health programs, and treatment for this population will be covered.

CRJ 196B. Law of Homeland Security and Emergency Management.**3 Units****Term Typically Offered:** Fall, Spring

Current and historical developments relating to the laws surrounding homeland security and emergency management. Topics include the legal framework for the U.S. domestic preparedness and national incident management system, the role of the military in emergency response and homeland security, and the legal jurisdiction and authority of federal, state, and local public safety, as well as private sector institutions, in terrorism prevention and response. Course utilizes cases, statutes, executive orders, government reports, and scholarly research.

CRJ 196S. Ethics and the Criminal Justice System.**3 Units****Prerequisite(s):** CRJ Majors or department chair permission**Term Typically Offered:** Fall, Spring

Purpose of course is to learn various ethical considerations within the criminal justice system. Course will briefly explore the classical, philosophical foundations of ethics and proceed into surveying modern, ethical decision-making among the various criminal justice components. Criminal justice system ethics and decision-making of the police, prosecution, courts, corrections, and probation/parole from a managerial standpoint and a line perspective will be examined and critiqued. Emphasis will be placed on viable, practical solutions to ethical conundrums.

CRJ 198. Co-Curricular Activities.**1 - 3 Units****Prerequisite(s):** Permission of the sponsoring professor and the Division Chair.**Term Typically Offered:** Fall, Spring

Co-Curricular activities related to the subject matters and intellectual concerns of the Division of Criminal Justice, including service learning, related community service assignments, and service on University and community policy making bodies.
Credit/No Credit

CRJ 199. Special Problems.**1 - 3 Units****Prerequisite(s):** Restricted to declared CRJ majors or chair permission and senior status.**Term Typically Offered:** Fall, Spring

Individual projects or directed reading, open only to those students who appear competent to carry on individual work.
Credit/No Credit

CRJ 200. Research Methods in Criminal Justice. **3 Units****Prerequisite(s):** Classified graduate status, satisfactory completion of a basic statistics course.**Term Typically Offered:** Fall, Spring

Research theory and methodology in Criminal Justice; research designs; conceptual models; design and preparation of Master's thesis prospectus.

Note: Graduate Writing Intensive (GWI) course.**CRJ 201. Advanced Research Design and Data in Criminal Justice.****3 Units****Prerequisite(s):** CRJ 200

This course provides applied explanations of advanced research designing, use of data development strategies, and techniques for effective data analysis using statistical software. Topics generally covered include: (1) issues and techniques in advanced research design with emphasis on theory testing and hypothesis formulation; (2) measurement, data collection strategies, reliability and validity of measures and results, sampling, surveys; and, (3) examination of qualitative versus quantitative research techniques, working with observational data, field research issues, and triangulation.

Note: Required core course**CRJ 205. Criminal Justice Policy Analysis.****3 Units****Prerequisite(s):** Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GVAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.**Term Typically Offered:** Fall, Spring

Examination of responses of the criminal justice system to major current issues with attention to factors influencing their effects; review of uses and limitations of various responses; appraisal of the consequences of various criminal justice policy alternatives.

CRJ 207. Criminal Justice Research and Program Evaluation.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Systematic review of selected evaluations of major criminal justice programs, demonstration projects, experiments, and innovations; introduction to basic techniques of interpretation and analysis of research findings to determine outcomes.

CRJ 210. Critical Examination of Law and Justice.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examines the historical, theoretical, and practical developments that gave rise to the dominance of legal formalism in the American legal tradition. Examines the multiple challenges to that model, including legal realism, the sociology of law, critical legal studies, and critical race theory. Will critically examine the intersection of the American legal tradition with issues concerning the possibility and implementation of social justice strategies in diverse, and increasingly global contexts.

CRJ 220. Politics of Crime Legislation.**3 Units****Prerequisite(s):** Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GVAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.**Term Typically Offered:** Fall, Spring

Familiarizes students with the legislative process, the performance of the legislature as it relates to the handling of crime bills and the role of interest groups and politics in the process of initiating and passing laws. Topics include: theoretical models of lawmaking, factors in legislative decision-making, the politics of crime legislation, ethics in politics, and how people influence and use the legislative process.

CRJ 230. The Prison.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Contemporary penal institutions will be studied using the literature in the social sciences, the biographies of prisoners, and the writings of prison critics.

CRJ 231. Graduate Seminar in Corrections.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Provides a historical analysis and discussion of the current state of corrections and correctional management. Theories of punishment will be addressed and management techniques will be covered. Goes beyond concepts of institutionalized corrections to explore modern correctional alternatives, correctional policy and special topics relevant to corrections.

CRJ 233. Psychodynamics of Confinement.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examination of current conditions of confinement; review of confinement related factors common to populations in penal institutions, military installations, mental hospitals, prisoner of war camps, and concentration camps; investigation into the broader implications of conditions of confinement for society; survey of practical strategies for developing and implementing standards for confined populations.

CRJ 240. Contemporary Issues in Policing.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

In-depth study of contemporary issues in policing in the U.S., including management, organization and issues confronting law enforcement at federal, state and local levels.

CRJ 250. Comparative Analysis of the Criminal Justice System.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examination of alternative systems for criminal justice provides a basis for improved understanding of organizational and functional components within given sociopolitical environments. Through comparison of formal and operational levels, decision-making processes are made explicit with reference to historical, legal, social, and economic parameters in the administration of justice.

CRJ 251. White-Collar Crime.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examines the underlying theories and the diverse nature of white-collar crime. Studies offenses associated with corporations, occupations, governments, enterprises and individuals. Examines the offenders and the organizational culture that facilitates criminal action. Topics include embezzlement, political corruption, employee theft, fraud, computer crime, and environmental crime. Study consequences for victims, offender characteristics and the theoretical explanations for the decisions by criminals to commit white-collar crimes.

CRJ 252. Violence and Victims.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Comprehensive survey of the literature on violence emphasizing high-fear crimes; the repetitively violent criminal; the emerging field of victimology; improved delivery of social services to victims; juvenile gangs; and the response of criminal justice agencies to urban violence.

CRJ 255. Crime, Criminology and Criminal Justice.**3 Units****Prerequisite(s):** Classified graduate status.**Term Typically Offered:** Fall, Spring

Study of major criminological theories, their ideological premises and basic assumptions, interrelationships, and the shifts in emphasis and focal points in the study of criminality. Analyzes past and current applications of theory to the intervention strategies of crime control.

CRJ 256. Historical Analysis of the American Criminal Justice System.**3 Units****Prerequisite(s):** Classified graduate status**Term Typically Offered:** Fall, Spring

Evolution and historical foundations of American patterns of crime and violence, criminological theories, law enforcement structures and philosophies, the adult criminal justice system, and the juvenile system will be traced through three distinct historical periods: Colonial and Early American Roots, 1609-1814; Creating the American Criminal Justice System, 1815-1900; and Reforming the Criminal Justice System, 1900 to present.

CRJ 257. The Nature Of Terrorism.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Theoretical approaches to the study of terrorism and analysis of terrorist theory and strategies. Topics include operational definitions of terrorism, typologies of terrorism, threat analysis of terrorism in the U.S., and responses of the criminal justice system to acts of hostage-taking, bombing, political murder, and narco-terrorism.

CRJ 260. Management of Complex Justice Organizations.**3 Units****Prerequisite(s):** Classified graduate status.**Term Typically Offered:** Fall, Spring

Description, analysis, solution, and synthesis of contemporary management problems in criminal justice organizations; presentation and exemplary implementation of management concepts significant to criminal justice organizations; review of case studies for management problem recognition; and the study of operational systems.

CRJ 262. Administration of Juvenile Justice.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Theoretical and empirical study of the cause and control of delinquent behavior. Assessment of policies and practices of agencies involved in juvenile justice including the impact of recent federal and state legislation.

CRJ 266. Personnel Administration in Justice Organizations.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Provides an in depth understanding of the history, theories, laws, processes, issues and unique environment shaping contemporary personnel administration in a variety of criminal justice agencies.

CRJ 267. Criminal Justice Issues in Collective Bargaining and Arbitration. 3 Units

Prerequisite(s): Classified graduate status; CRJ 200, CRJ 255, CRJ 256 and CRJ 260; or chair permission

Term Typically Offered: Fall, Spring

Designed to provide the criminal justice practitioner and administrator with an understanding of criminal justice labor-management relations and collective bargaining and difference resolution, along with conflict resolution practices as applied to inmate-custody and control situations.

CRJ 289. Criminal Justice Systems of the Future. 3 Units

Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260

Term Typically Offered: Fall, Spring

Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminal and sanctions in future societies.

CRJ 295. Internship. 3 Units

Prerequisite(s): Classified graduate status

Term Typically Offered: Fall, Spring

Supervised graduate student placement in selected criminal justice agencies with emphasis on research and evaluation project assignments.
Credit/No Credit

CRJ 296A. The Mentally Ill Individual in the Criminal Justice System. 3 Units

Prerequisite(s): Graduate student status

Term Typically Offered: Fall, Spring

A critical analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, prisons, and then reentry into the community via parole and probation. Current and historical topics about the mentally ill will be explored via an in-depth analysis of the current literature regarding the mentally ill in the criminal justice system, which will be reviewed and critiqued.

CRJ 296K. Emergency Management. 3 Units

Prerequisite(s): Graduate status; CRJ 200, CRJ 255, CRJ 256 and CRJ 260 or chair permission.

Term Typically Offered: Fall, Spring

Introduction to the authority, organization, responsibilities, challenges, and issues related to emergency management in California and the U.S., examines the implications of citizen involvement in preparation for and management of natural and man-made disasters. Graduate students will consider impact of terrorism on democratic governance issues and potential future trends and issues.

CRJ 299. Special Problems. 1 - 3 Units

Prerequisite(s): CRJ 200, CRJ 201, CRJ 255 and CRJ 260

Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who are competent to carry on individual work.

Credit/No Credit

CRJ 500. Culminating Experience. 3 Units

Prerequisite(s): Advanced to candidacy.

Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.

CRJ 501. Culminating Experience: Thesis/Project Development. 3 Units

Prerequisite(s): Advancement to candidacy.

Term Typically Offered: Fall, Spring

Provides students with an opportunity to develop a foundation for their culminating experience. Students will complete the initial components of their project or thesis including the Statement of the Problem, Literature Review, and Human Subjects application. Students are expected to read assigned materials and engage in weekly discussions about their progress and experience with other students, the instructor, and their advisor (as needed).

Credit/No Credit

CRJ 502. Culminating Experience: Thesis or Project. 3 Units

Prerequisite(s): Advanced to candidacy; satisfactory completion of CRJ 501.

Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. A thesis requires an original contribution to knowledge in a traditional research format. A project is a significant undertaking of a pursuit appropriate to the profession. It must evidence originality and independent thinking, appropriate form and organization and a rationale.
Credit/No Credit

BS in Criminal Justice

Units required for Major: 60

Total units required for BS: 120

Program Description

Criminal Justice encompasses multidisciplinary examinations of crime, crime control, the justice process, and justice institutions. The discipline addresses definitions, causation, prevention, investigation, legal process, treatment, rehabilitation, and research relating to crime and justice as well as the institutions of the justice system and their administration.

The Criminal Justice program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Criminal Justice majors must complete a series of required lower division courses and then must apply for admission to the program. It is highly recommended that interested students speak with a Criminal Justice advisor as soon as possible.

Pre-Requisite Requirements

To become a Criminal Justice major, the student must first have successfully completed the following courses or their equivalent with a grade of "C" or better.

Code	Title	Units
CRJ 1	Introduction to Criminal Justice and Society	3
CRJ 2	Law of Crimes	3

CRJ 4	General Investigative Techniques	3
CRJ 5	The Community and the Justice System	3

Students who wish to become a Criminal Justice minor must contact the Division of Criminal Justice.

Most upper division Criminal Justice courses are restricted to Criminal Justice majors or minors or permission of instructor. Students interested in Criminal Justice majors or minors are encouraged to contact the Criminal Justice Student Advising Center.

Criminal Justice majors are assigned a faculty advisor at the time they are approved for admission into the major. Majors must meet with their assigned faculty advisor during their first semester. Advising appointments are scheduled in the Criminal Justice Office Alpine Hall 137.

Minimum Grade Requirement

Students majoring in Criminal Justice must achieve a "C" grade or better in each lower division and a "C-" or better in each upper division course applied to the major and a GPA of at least 2.0 ("C") for all upper division required courses applied to the major.

Program Requirements

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² **Prerequisite:** Restricted to declared majors and minors or instructor permission.

³ Students will collaborate with their Criminal Justice advisor to develop a plan of electives that reflects the student's academic and professional interests. Electives must be drawn from at least two of the listed "Areas of Interest," of which one must be from the "Supporting Courses" area. The Writing Intensive graduation requirement may be completed in the major. An approved minor may be substituted for up to 12 units of the major elective courses and fulfills the requirement for selection of a course from the "Supporting Courses".

⁴ No more than 6 units of Credit/No Credit courses will be allowed toward completion of the degree.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (13 Units)		
B1	Physical Science	3
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)	1
B4	Math Concepts	3
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9 Units)		
Area D Course		3
Area D Course		3
Area D Course ²		0
Area D Course - Take upper-division course to complete Area & upper division requirements.		3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		46

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (6 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI) ²		0
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Certificate in Law Enforcement

Units required for Certificate: 18

Program Description

Students participating in the Law Enforcement Candidate Scholars' (LECS) program who wish to obtain a Certificate of Academic Achievement in Law Enforcement must complete the following courses with a minimum grade of "C" or higher. Courses for the Certificate program are applicable toward course requirements for the Criminal Justice major.

All courses and petitions for substitutions will need to be approved by the Law Enforcement Candidate Scholars' Program and Criminal Justice Division and will reflect the criteria and learning outcomes of the Law Enforcement Certificate.

Additional eligibility criteria and certificate information can be obtained from the Law Enforcement Candidate Scholars' (LECS) Program or Criminal Justice Division Advising Center. Visit the LECS website (<http://www.csus.edu/hhs/lecs>) for more information.

Program Requirements

Code	Title	Units
CRJ 1	Introduction to Criminal Justice and Society	3
CRJ 2	Law of Crimes	3
CRJ 4	General Investigative Techniques	3
CRJ 5	The Community and the Justice System	3

CRJ 153	Advanced Criminal Investigation ¹	3
CRJ 154	Introduction to Physical Evidence ¹	3
Total Units		21

¹ Restricted to declared majors and minors or instructor permission.

MS in Criminal Justice

Total units required for MS: 30

Program Description

The Master of Science program in Criminal Justice is designed to provide broad knowledge and understanding of the field of criminal justice, law enforcement, legal processes, and rehabilitation of offenders. It also provides an extensive academic foundation for a growing variety of professional opportunities and facilitates professional development in preparation for positions of increasing responsibility. Curriculum objectives are based on the philosophy that the function of the professional criminal justice practitioner and educator is to aid the orderly development of society, to contribute significantly to the improvement of the quality of services, and to advance the criminal justice system. Students who anticipate pursuing graduate studies should prepare themselves for work on this level by selecting undergraduate courses which provide competence in the following areas: statistical analysis, behavioral science methodology, independent library research, and the writing of research papers.

The University's location in the state capital provides direct access to many local, federal, and state agencies through internship and fieldwork opportunities. All graduate students should consult the Criminal Justice Graduate Coordinator when planning their program of courses for each upcoming semester.

All work toward the degree must be completed within a seven-year period. The general University requirements for graduate degrees are explained in the "Graduate Studies (p. 77)" section of this Catalog.

Admission Requirements

Admission as a classified graduate student in Criminal Justice requires:

- a baccalaureate degree from an institution accredited by a regional accrediting association;
- a minimum 3.0 GPA in the last 60 units attempted and a 3.0 GPA in the major field;
- a score of 4 or more in the Analytical Writing Section of the Graduate Record Examination (GRE) General Test;
- a letter outlining in some detail the applicant's **interests, goals, and expectations** in pursuing the MS in Criminal Justice; and
- three letters of recommendation from individuals who can evaluate the applicant's potential for graduate study.

In addition, applicants are expected to have an undergraduate major in Criminal Justice or its equivalent. Whatever the applicant's undergraduate major, however, it is essential that each student have adequate preparation for graduate study. For this reason, some applicants (regardless of their undergraduate program) may be asked to remove deficiencies in their education by taking courses from the

undergraduate curriculum before being admitted as a classified graduate student. In such cases, conditionally classified graduate status may be granted subject to completion of these courses with grade "B" or better. The number of units required to remove deficiencies will total no more than 15 and these must be taken in addition to the 30 units required for the MS. Any deficiencies will be noted on a written response to the admission application.

Admission Procedures

Applications are accepted as long as space for new students is available. If applications for graduate admissions exceed the capacity of the Department, the Department will limit admissions. Applicants will be rank ordered for admission based on an evaluation of the academic record, GRE scores, professional and life experience, references, proposed academic plan and potential for diversifying, and enriching the Criminal Justice graduate program. *For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>.*

All prospective graduate students, including Sacramento State graduates, must provide the following:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State; and*
- Graduate Record Exam (GRE) scores.
- a letter outlining in some detail the applicant's interests, goals, and expectations in pursuing the MS in Criminal Justice; and
- three letters of recommendation from individuals who can evaluate the applicant's potential for graduate study.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be emailed by the University to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy for the master's degree indicating the proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admissions requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Students may not enroll in CRJ 502 before they are advanced to candidacy.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with the Criminal Justice Graduate Coordinator. The completed form should then be returned to the Office of Graduate Studies for approval.

Total Units		30-33

¹ Students requiring more than one semester to complete their culminating experience must re-enroll in CRJ 502.

Health Science

Department of Health Science

Program Description

The academic area of study in Health Science is part of the total program of the College of Health and Human Services. Students pursue a Health Science concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health, healthcare administration, or occupational health and safety. The faculty supports the idea of focused academic preparation in each concentration such that Health Science BS graduates will have job appeal in their chosen professional field.

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within the specific concentration, such as health care costs, consumer health issues, alcohol and other drugs, human sexuality, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues as well as management, business and administration skills in the health care administration option.

Students interested in pursuing advanced degrees in the health sciences will find that the BS program provides the foundation upon which to undertake a MPH or MS in community, health care administration, or occupational health and safety degree programs.

The Health Science Bachelor of Science program at Sacramento State is a highly sought after degree. Due to the large number of applications, the program is currently impacted. Students wishing to become Health Science majors must complete a series of required lower division courses and apply for admission to the program. Check the Department website (<http://www.csus.edu/hhs/khs/hlsc/impaction.html>) for requirements, and it is highly recommended that interested students speak with the Health Science academic advisor.

Degree Programs

BS in Health Science (Community Health Education) (p. 634)

BS in Health Science (Health Care Administration) (p. 636)

BS in Health Science (Occupational Health and Safety) (p. 638)

Minor in Health Science (p. 639)

Minor in Occupational Health and Safety (p. 640)

Special Features

- A key feature of the program involves the diversity of the field experiences available. Students may select from state, county, city, or local health and safety related agencies, hospitals, as well as any private voluntary not-for-profit agency. This on-site experience continues to be a valuable professional experience that may lead to employment.
- Employment opportunities can be identified in any of the school/community health/safety/health care related programs, as well as in the private sector. Employment opportunities often evolve from the networking that develops naturally from students' field experiences.
- Because of the unique location of the University in the state capital, students majoring in Health Science benefit from professional health resources of numerous state and local health agencies that include, but are not limited to the Sacramento County Department of Health and Human Services, California State Departments of Health Services, Mental Health, Aging and Alcohol and Drug Abuse. A variety of health/safety related agencies provide opportunities for field work experiences, internships, part-time, and summertime employment.

- Courses are offered on a schedule to accommodate both full-time and part-time students, including night courses and online options.
- The faculty consists of members with specialized preparation in the health science field. Our full-time faculty is augmented by the use of adjunct instructional staff selected from the above mentioned health science agencies.

Note: Students who have completed an allied health licensure program and who wish to obtain a BS degree in Health Science at California State University, Sacramento, should contact the Sacramento State Outreach Office for application and course requirements.

Career Possibilities

Alcohol Education Consultant · Community Health Educator · Community Program Director · Environmental Health & Safety Specialist · Family Planning Educator · Health Administration Assistant · Health Program Coordinator · Human Resources Specialist · Loss Control Consultant · Occupational Safety Specialist · OSHA Compliance · Patient Administration Specialist · Public Health Educator · Public Health Investigator

HLSC 50. Healthy Lifestyles. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Examines the concepts of: health and wellness; the determinants of health and wellness; and the concept of self-responsibility for health and wellness. These health and wellness concepts shall be applied to the areas of: mental wellness, nutrition, fitness, human sexuality, and drugs. The lecture/discussion format provides for a sharing of views regarding the integrated concepts of health that emphasizes the physical, mental, emotional, social, spiritual, and environmental factors that influence an individual's health status.

HLSC 98. Health Science ProSeminar. 3 Units
Term Typically Offered: Fall, Spring

Potential and beginning Health Science students become oriented to the Health Science discipline. They will acquire and develop the knowledge and understanding needed to fulfill the Health Science major learning outcomes. Students will develop their individual learning plans designed to assure fulfillment of the Health Science major, General Education, and University graduation requirements.

HLSC 100. Fundamentals of Safety and Health. 3 Units
Prerequisite(s): must be a Health Sciences or a Fire Service Management major or minor to enroll in this class
Term Typically Offered: Fall, Spring

Explores global and national issues in occupational and non-occupational safety and health. Subjects include motor vehicle, consumer, workplace, fire, school, and home safety. Examines concepts and principles related to the cause, control, and mitigation of unintentional injuries and illnesses. Emphasizes the development, implementation, and integration of effective safety and health program strategies in the prevention and control of loss.

HLSC 106. Occupational Health. 3 Units
Prerequisite(s): Health Science majors or minors only, or instructor permission.
Term Typically Offered: Spring only

Concepts of occupational health as they pertain to appraising and controlling occupational health hazards, including occupational diseases, chemical, biological, and physical agents. Discusses techniques for the recognition, evaluation, prevention, and control of occupational health hazards.

HLSC 107. Occupational Safety. 3 Units
Prerequisite(s): Health Science majors or minors only; or instructor permission.
Term Typically Offered: Spring only

Examines common hazards and problems encountered in the workplace, including concepts and principles related to the control and mitigation of occupational safety hazards. Emphasizes the development, implementation, and integration of effective occupational safety and health program components.

HLSC 108. Occupational Health and Safety Laws and Regulations. 3 Units
Prerequisite(s): Health Science majors or minors only; or instructor permission.
Term Typically Offered: Fall only

Overview of regulatory agencies involved in occupational health and safety and their functions in the enforcement of regulation and/or compliance of safety laws. Special emphasis on Cal/OSHA. Other topics: application of surveillance, research, control technology, and trained personnel to maintain compliance. Recognizes that strategies to achieve a safe workplace includes an analysis of economic and employment impacts on the employer.

HLSC 109. Cause and Control of Occupational Loss. 3 Units

Prerequisite(s): Health Science majors or minors only; or instructor permission.

Term Typically Offered: Fall only

Study of the characteristics, causes, and control of occupational loss; influence of the work environment and system structure on incident outcomes; and analysis of occupational injuries and illnesses through the application of incident investigation and system safety techniques. Course will use occupational injuries and illnesses to focus on the process of problem identification and analysis, including the development and implementation of control measures.

HLSC 110. Issues in Occupational Health and Safety. 3 Units

Prerequisite(s): HLSC 100 or instructor permission

Term Typically Offered: Fall, Spring

Examines current and emerging issues in occupational health and safety, including historical, philosophical, and conceptual factors that serve as a basis for predicting, understanding, and resolving occupational health and safety issues. Examples include: Issues in high hazard industries, special populations at risk, emerging technologies, occupational hazards, and traumatic injuries.

HLSC 112. Disease Prevention. 3 Units

Prerequisite(s): Health Science majors or minors only; or instructor permission

Term Typically Offered: Fall, Spring

Surveys the current methods of promoting high level wellness through a preventive medicine approach for the promotion of more enjoyable and productive living. Attention directed toward the specific methods of promoting personal health through various current methodologies including the "holistic health" movement. Meets the needs of major students as well as those in allied fields such as nursing, social work and other interested students.

HLSC 114. Human Ecology and Health. 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring, Summer

Emphasizes the social and natural environmental influences that have a direct impact upon the health of the individual. Primary consideration is directed to an analysis of health as influenced by a person's interaction with his/her environment.

HLSC 116. Public Health Administration and Policy. 3 Units

Prerequisite(s): Must be a Health Science or Gerontology major or minor

Term Typically Offered: Fall, Spring

Understanding of the management of public health programs; pattern of health organization; the scope of public health concern of environmental health and health service marketing. Consideration of the various administration factors involved in the practice of public health by department, division or agency unit.

HLSC 117. Global Health. 3 Units

Prerequisite(s): Health Science majors or minors only; or instructor permission

Term Typically Offered: Fall, Spring

Introduction to the globalization of public health and the critical health issues facing all citizens of the world, with special emphasis on health concerns of developing countries. Topics include global malnutrition, primary health care, maternal and child health, international environmental health, comparative health care systems, epidemiology and international health threats, and sustainable health and development programs undertaken by nongovernmental organizations.

HLSC 118. Community Health. 3 Units

Prerequisite(s): Must be a Health Science major or minor

Term Typically Offered: Fall, Spring

Insights into comprehensive planning for health by community health agencies and organizations in implementing their programs.

HLSC 119. Community Health Education. 3 Units

Prerequisite(s): Must be a Health Science major or minor with a minimum "C" grade or better in HLSC 118 or have instructor permission

Term Typically Offered: Fall, Spring

In addition to the current practice in community health education, examines the philosophical, conceptual and theoretical constructs that serve as a basis for understanding, predicting and facilitating change in health-related behavior. Explores the use of health communication processes, selected instructional media, health planning, community organization techniques, and mass communications in community health education.

HLSC 122. Health Psychology. 3 Units

Prerequisite(s): Must be a Health Science or Child Development major or minor

Term Typically Offered: Fall, Spring

Introduction to behavioral and social factors which influence health and illness. Explores the causes of premature death, the relationships between personality and health, and the development of health problems. Includes an overview of psychological principles in behavioral medicine, physiological foundations of health psychology, the role of emotions in immune function, and topical theories of, techniques for, and research on how psychology can help people live longer, healthier lives.

HLSC 124. Consumer Health Education. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring, Summer

Introduction to the processes and methods of conducting health education within the clinical setting and the integration of educational theory and applied health knowledge specific to common health disorders. Topics to include the dimensions of quackery in health treatments, efficacy of safety standards, and the elements of deceptive advertising and bogus claims. Emphasis on how to distinguish health facts from bogus claims, make effective consumer decisions of health care services, and the basics of self-health care.

- HLSC 130. Alcohol and Other Drugs. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Various aspects of drug usage will be studied with emphasis on the role of health education in reducing abuse. This course is designed to explore contemporary issues related to alcohol and other drugs. The course will examine the physiological, psychological, social, and cultural impact of licit and illicit drugs.
- HLSC 134. Understanding Human Sexuality. 3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Provides a variety of information about the physiological, psychological, social, and cultural differences and similarities of the sexes. Sexual myths and misconceptions will be explored. Contemporary sex roles and patterns of interactions currently practiced in our society will be discussed.
- HLSC 136. School Health Education. 2 Units**
Prerequisite(s): CPR training; may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer
- Provides teacher candidates, social workers, and nurses an understanding of the educational methods, processes, and content of the scope of health education as provided in the Framework for Health Instruction of the California State Department of Education. Offers an understanding of current problems related to personal, family and community health. General theories and organization for teaching health education will be discussed. Meets the requirement for teacher candidates under the SB2042.
Note: Not open to lower division students.
- HLSC 144. Community Health Planning and Evaluation. 3 Units**
Prerequisite(s): HLSC 118, HLSC 148; GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X; or instructor permission; restricted to Health Science majors and minors.
Term Typically Offered: Fall, Spring
- Introduces students to the process and practice of program planning and evaluation. Examines the social and physical determinants of health; the impact of the community structure on health status; and, the influence of personal health behavior on community health education practice. These concepts shall be applied in the planning, implementation, and evaluation of health education services.
- HLSC 147. Health Data Analysis. 3 Units**
Prerequisite(s): STAT 1, Health Science major or instructor permission.
Term Typically Offered: Fall, Spring
- Introduction to methods and statistical practices used in the health sciences. Emphasis on the methods of collection, analysis, interpretation, and presentation of health data. Conceptual learning will be facilitated by sessions using computational software.
- HLSC 148. Epidemiology. 3 Units**
Prerequisite(s): STAT 1 or instructor permission; Health Sciences or Biological Sciences major or minor.
Term Typically Offered: Fall, Spring, Summer
- Designed to offer cognitive insights into community health epidemiology. Provides understanding of the study of the distribution and determinants of communicable, infectious and chronic disease, and of injuries in the human population.
- HLSC 150. Aging and Health. 3 Units**
Prerequisite(s): Student must be admitted to the Health Science, Kinesiology, or Gerontology major or minor, or have instructor permission to enroll in this course.
Term Typically Offered: Fall, Spring
- Designed to introduce students to the basic aging and health concerns of older people and to broader issues of aging, health and society. Examines the: demography of the aging population, biological theories of aging, social and psychological aspects of aging. Includes such issues as nutrition, drugs, exercise, sexuality, patterns of health services utilization, institutionalization, alternatives to the provision of long-term care in institutions, and dying.
- HLSC 151. Introduction to the U.S. Healthcare System. 3 Units**
Prerequisite(s): Student must be admitted to the Health Science major or minor, or have instructor permission to enroll in this course.
Term Typically Offered: Fall, Spring
- This course presents an overview of the historical, structural, and operational aspects of the nation's healthcare systems. Students will examine the factors that shape public policy regarding the allocation of health care resources and will gain an understanding of the relationship between healthcare costs, quality of care, and the access to health services. The influence of professional associations, medical technology, and social values in health reform initiatives is discussed.
- HLSC 152. Healthcare Systems and Operations. 3 Units**
Prerequisite(s): Health Science majors and minors only; or instructor permission
Term Typically Offered: Fall, Spring
- Introduce students to a broad range of issues related to managing healthcare organizations. Students will explore areas such as organizational behavior and theory applied to healthcare organizations and the role of administrators in planning, organizing, and overseeing the delivery of healthcare services. Organizational principles and decision-making strategies are applied to functional areas of health administration including finance, human resources, performance improvement, strategic planning, and healthcare information systems.
- HLSC 153. Administration of Healthcare Organizations. 3 Units**
Prerequisite(s): Health Science majors only
Term Typically Offered: Fall, Spring
- Introduction to the study of healthcare administration. Examines the broad field of healthcare administration. Topics include healthcare management, leading healthcare professionals, strategic planning in healthcare, healthcare budgeting and finance, healthcare insurance, healthcare marketing, healthcare information technology, healthcare ethics and law, and healthcare fraud and abuse.

HLSC 154. Healthcare Organizational Behavior. 3 Units

Prerequisite(s): Health Science (Health Care Administration) majors only
The study of healthcare organizational behavior including individual and group dynamics in the context of healthcare settings. Examines the impact of organizational contexts on the behavior of individuals and groups in healthcare organizations. Topics include individual motivation, power and influence, leadership theory, stress in the workplace, decision-making, conflict and negotiation, group dynamics, and change planning in healthcare.

HLSC 155. Introduction to Healthcare Process Improvement. 3 Units

Prerequisite(s): Health Science majors only
Term Typically Offered: Fall, Spring

An exploration of the basic principles and techniques of process improvement in healthcare through a range of topics, including measurement of health care system performance to creating high-quality services that result in organizational improvement and customer satisfaction.

HLSC 195. Fieldwork - Health or Safety. 2 - 4 Units

Prerequisite(s): Permission of faculty advisor, program coordinator and Department chair.

Term Typically Offered: Fall, Spring, Summer

To obtain insights into the practical application of the classroom teachings, fieldwork experiences are required of those preparing for a career in community health education or other areas of health and safety studies.

Note: Submit an application for field work no later than the fourth week of the semester prior to taking HLSC 195. May be repeated once for credit.

Credit/No Credit

HLSC 196. Experimental Offerings in Health Science. 1 - 3 Units

Term Typically Offered: Fall, Spring

Undergraduate seminar designed to provide an in-depth examination and discussion of current topics in the area of personal and community health and safety.

HLSC 199. Special Problems. 1 - 3 Units

Prerequisite(s): Permission of faculty under whom individual work will be conducted, program coordinator, and Department chair; HLSC 116, HLSC 118, HLSC 119, and HLSC 148 are strongly recommended.

Term Typically Offered: Fall, Spring

Note: Open only to HLSC majors and minors who appear competent to conduct independent work such as

Credit/No Credit

HLSC 222. Health Communication Strategies. 3 Units

Prerequisite(s): Master of Public Health major or instructor permission.
Term Typically Offered: Fall only

Provides students with knowledge and understanding of health communication theory and research. Students will examine the effects of media, including mass media, social media, and participatory media, in promoting or impeding public health goals and achievements. This course emphasizes the importance of public engagement and the development of effective communication with public health stakeholders including consumers, community goals, policy makers, health care providers, news media, and the general public.

HLSC 224. Program Planning. 3 Units

Prerequisite(s): Master of Public Health majors or instructor permission and HLSC 201

Term Typically Offered: Fall only

Covers the elements needed for successfully planning and implementing a health promotion program including the application of health behavior theory and program planning models. Students will apply concepts of social and physical determinants of health, community structure on health status, social/health policies of communities and personal health behaviors in program planning design and implementation.

HLSC 295. Seminar and Practicum Experience. 3 Units

Prerequisite(s): Master of Public Health or instructor permission
Term Typically Offered: Spring only

Provides students with in-depth supervised experience in an approved organization during their graduating semester. The practicum will require students to complete an applied practice experience related to a public health issue that is a focus within the organization. Seminars will discuss and review the integration of core public health concepts with the practicum. Students will create materials that demonstrate the analysis, synthesis, and intersection of course work and practicum work, while demonstrating mastery of the broad field of public health. Field Trip. Credit/No Credit

Field trip(s) may be required.

BS in Health Science (Community Health Education)

Units required for Major: 58

Total units required for BS: 120

Program Description

The academic area of study in Health Science is part of the total program of the College of Health and Human Services. Students pursue a Health Science concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health, healthcare administration, or occupational health and safety. The faculty supports the idea of focused academic preparation in each concentration such that Health Science BS graduates will have job appeal in their chosen professional field.

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within the specific concentration, such as health care costs, consumer health issues, alcohol and other drugs, human sexuality, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues as well as management, business and administration skills in the health care administration option.

The Health Science Bachelor of Science program at Sacramento State is a highly sought after degree. Due to the large number of applications, the program is currently impacted. Students wishing to become Health Science majors must complete a series of required lower division courses and apply for admission to the program. Check the Department website (<http://www.csus.edu/hhs/khs/hlsc/impaction.html>) for requirements, and it is highly recommended that interested students speak with the Health Science academic advisor.

Note: Students graduating with a BS in Health Science (all concentrations) will not be subject to the University's Foreign Language

Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Minimum Grade Requirement

All courses must be completed with at least a "C" grade.

Additional Information

Repeat Policy: Health Science majors and minors can only repeat Health Science courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

Advising: It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Health Science faculty strongly recommends that all Health Science students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

	Race and Ethnicity in American Society (RE)	3
	Foreign Language Proficiency Requirement ²	0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Health Science (Occupational Health and Safety), BS in Health Science (Health Care Administration), or BS in Health Science (Community Health Education) are exempt from the Foreign Language Graduation Requirement.

BS in Health Science (Occupational Health and Safety)

Units required for Major: 58-62

Total units required for BS: 120

Program Description

The academic area of study in Health Science is part of the total program of the College of Health and Human Services. Students pursue a Health Science concentration leading to a degree with specialization and job skills applicable to one of three professional areas of study: community health, healthcare administration, or occupational health and safety. The faculty supports the idea of focused academic preparation in each concentration such that Health Science BS graduates will have job appeal in their chosen professional field.

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within the specific concentration, such as health care costs, consumer health issues, alcohol and other drugs, human sexuality, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues as well as management, business and administration skills in the health care administration option.

The Health Science Bachelor of Science program at Sacramento State is a highly sought after degree. Due to the large number of applications, the program is currently impacted. Students wishing to become Health Science majors must complete a series of required lower division courses and apply for admission to the program. Check the Department website (<http://www.csus.edu/hhs/khs/hlsc/impaction.html>) for requirements, and it is highly recommended that interested students speak with the Health Science academic advisor.

Note: Students graduating with a BS in Health Science (all concentrations) will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Minimum Grade Requirement

All courses must be completed with at least a "C" grade.

Additional Information

Repeat Policy: Health Science majors and minors can only repeat Health Science courses one time if they receive less than a "C." Students must meet with their academic advisor before petitioning the department to repeat the course. Refer to the Repeat Policy section of the Sacramento State Catalog for additional information.

Credit by Examination: A student who seeks course credit by examination is to enroll in the course to be challenged. No course may be challenged

after the first two weeks of the semester. The instructor of the course will conduct an assessment of the student's readiness for the challenge for credit examination. Refer to Credit by Examination section of the Sacramento State Catalog.

Advising: It will be necessary to work very closely with an advisor to complete the BS degree in a timely manner. Therefore, the Health Science faculty strongly recommends that all Health Science students consult with an advisor prior to enrollment for any course. This procedure should be followed each semester.

Program Requirements

Code	Title	Units
Required Lower Division Courses (16 Units)		
BIO 25	Human Anatomy and Physiology I	4
BIO 26	Human Anatomy and Physiology II	4
CHEM 6A	Introduction to General Chemistry ¹	5
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Courses (15 Units)		
HLSC 118	Community Health	3
HLSC 147	Health Data Analysis	3
HLSC 148	Epidemiology	3
HLSC 151	Introduction to the U.S. Healthcare System	3
HLSC 195	Fieldwork - Health or Safety	3
Concentrations (27-31 Units)		
Select one concentration from the following:		27
		-
		31
Community Health Education		
Health Care Administration		
Occupational Health and Safety		
Total Units		58-62

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Note: Health Science courses depend upon concentration, permission of the faculty advisor, program coordinator, and department chair.

Concentration in Occupational Health and Safety (27 - 31 units)

Code	Title	Units
CHEM 6B	Introduction to Organic and Biological Chemistry	3 - 5
or CHEM 20	Organic Chemistry Lecture–Brief Course	
HLSC 100	Fundamentals of Safety and Health	3
HLSC 106	Occupational Health	3
HLSC 107	Occupational Safety	3
HLSC 108	Occupational Health and Safety Laws and Regulations	3
HLSC 109	Cause and Control of Occupational Loss	3
Select three of the following:		9 - 11
BIO 39	Microbiology for Allied Health Students	
or BIO 139	General Microbiology	
ENVS 128	Environment and the Law	

ENVS 130	Environmental Toxicology	
ENVS 165	American Environmental History ¹	
FIN 138	Principles of Risk Management and Insurance	
PHYS 5A	General Physics: Mechanics, Heat, Sound ¹	
	or PHYS 10	Physics In Our World
Total Units		27-31

¹ Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (6 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (9-12 Units)		
	Area D Course	3
	Area D Course	3
	Area D Course	3
	Area D Course - Take upper-division course to complete Area & upper division requirements. ³	0-3
Area E: Understanding Personal Development (3 Units)		
	Area E Course	3
Total Units		39-42

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students a "select from the following option":
 • If student chooses to take ENVS 165, they will meet upper division Area D.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI)	3

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Health Science (Occupational Health and Safety), BS in Health Science (Health Care Administration), or BS in Health Science (Community Health Education) are exempt from the Foreign Language Graduation Requirement.

Minor in Health Science

Units required for the Minor: 18, all of which must be Health Science courses.

Program Description

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within the specific concentration, such as health care costs, consumer health issues, alcohol and other drugs, human sexuality, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues as well as management, business and administration skills in the health care administration option.

Note: The Health Science Minor and Occupational Health and Safety minor will be suspended due to the impact of the Health Science Program that begins Fall 2012. The suspension of the Health Science Minor and Occupational Health and Safety Minor will begin Fall 2012 and conclude Spring 2014.

Minimum Grade Requirement

All Health Science courses must be completed with a "C" grade or better.

Program Requirements

The 18 units selected require approval by a Health Science faculty advisor.

Minor in Occupational Health and Safety

Units required for the Minor: 18, all of which must be Health Science courses.

Program Description

Students can expect to be involved, both in class and field experiences, in areas that deal with significant issues within the specific concentration, such as health care costs, consumer health issues, alcohol and other drugs, human sexuality, unintentional injury causes and prevention, and other personal, occupational, and community health and safety issues as well as management, business and administration skills in the health care administration option.

Kinesiology

Department of Kinesiology

Program Description

Kinesiology is an academic area of study concerned with the art and science of human movement. The Department offers a Bachelor of Science degree with two concentrations of study in Physical Education and Exercise Science, a stand-alone Bachelor of Science in Athletic Training, a Master of Science with two concentrations of study (Exercise Science and Movement Studies), and a Personal Trainer/Strength and Conditioning Certificate. Two Minor programs (Coaching and Supplementary Authorization in Physical Education) are also available.

Degree Programs

BS in Kinesiology (Exercise Science) (p. 653)

BS in Kinesiology (Physical Education) (p. 655)

Minor in Coaching (p. 657)

Minor in Supplementary Authorization in Physical Education (p. 657)

Certificate in Personal Trainer/Strength and Conditioning (p. 656)

Subject Matter Program in Athletic Training (Pre-Credential) (p. 661)

Credential in Adapted Physical Education Specialist (p. 657)

Single Subject Credential in Physical Education (K-12) (p. 661)

MS in Kinesiology (Exercise Science) (p. 658)

MS in Kinesiology (Movement Studies) (p. 659)

The Health Fitness/Strength Conditioning option is a National Strength Conditioning Association (NSCA) recognized program that prepares students for graduate work in the areas of exercise and sport science, as well as for careers as a strength and conditioning specialist in corporate and community wellness, college/professional-based athletics, commercial fitness & health club settings. The Clinical Exercise & Rehabilitation option provides students with in-depth science-based coursework which meets the prerequisite requirements for most physical therapy, occupational therapy, and other health related professional programs. Career options include cardiac rehabilitation, clinical exercise specialist, and other clinical/technical specialties in allied health fields.

Athletic Training: This bachelor's degree program is presently accredited by the Commission on the Accreditation of Athletic Training Education Programs (CAATE). Completion of the Athletic Training Education Program prepares students for careers in athletic training, sports medicine, and other paramedical areas. Upon completion of the degree, students are qualified to take the national certification exam to become a National Athletic Trainers Association Board of Certification (BOC) Certified Athletic Trainer. Students are also encouraged to pursue a teaching credential.

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Kinesiology (Athletic Training) is also individually accredited by Commission on Accreditation of Athletic Training Education (CAATE).

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Kinesiology (Physical Education) is also individually accredited by California Commission on Teacher Credentialing (CCTC).

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and

credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The Kinesiology facilities include state of the art high tech laboratories for motor learning, biomechanics, exercise physiology, sport performance, physical therapy/therapeutic exercise and rehabilitation, and athletic training.
- Several activity spaces are available, including dance, weight training, and gymnastics rooms. Outside facilities include a lap pool, racquetball and tennis courts, jogging trails, sports fields, putting green, driving range, and aquatic center.
- Kinesiology majors at Sacramento State have opportunities for unique experiences at the undergraduate level. In the Physical Education Concentration, students observe and teach children in both on and off campus field sites. Students concentrating in the Athletic Training area serve internships under BOC certified athletic trainers in the community colleges and on the campus with Division I athletes.
- Sacramento State has an accredited CAATE undergraduate Athletic Training Program and a CCTC Accredited Physical Education Teacher Education program.
- Exercise Science students gain useful experience through their internships at various on and off campus locations.
- Students interested in Physical Therapy build a valuable background of experience in community hospitals and rehabilitation centers.
- At the graduate level, students engage in a variety of research projects, both on and off campus in the areas of Exercise Science and Movement Studies.

Note: Students interested in majoring or minoring in Kinesiology are encouraged to go to the Department of Kinesiology and Health Science Office for an assignment to a faculty advisor.

Career Possibilities

Athletic Trainer · Biomechanist · Cardiac Catherization Technician · Cardiac Electrophysiologist · Cardiac Rehabilitation Specialist · Cardiac Technician · Cardiovascular Sonography Technician · Clinical Exercise Physiologist · Coach · Community Center Leader · Corporate Wellness/Fitness · Corrective Therapist · Doctor of Osteopathy School · Echocardiogram Technician · Endurance Sport Coach · Exercise Physiologist · Exercise Scientist · Health Fitness Specialist · Intramural Recreational Sports Specialist · Medical School · Nursing School · Occupational Therapist School · Personnel Fitness Trainer · Pharmacy Sale Representative · Physician Assistant · Physical Therapy Aide · Physical Therapist · Physical Education Teacher · Recreation Sports Coordinator · Sportscaster · Strength Conditioning Specialist · University Student Fitness/Wellness Coordinator

KINS 4. Beginning Swimming. 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Development of physical and mental adjustment to the water. Basic instruction in front crawl, back crawl, elementary backstroke, breast and side strokes and survival is stressed.
Note: May be repeated for credit.

KINS 5. Intermediate Swimming. 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Development of physical skills involving strokes, turns, safety and survival techniques.
Note: May be repeated for credit.

KINS 9. Beginning Sailing. 1 Unit
Prerequisite(s): 50 yards swimming ability.
Term Typically Offered: Fall, Spring

Instruction in the fundamentals of sailing including safety and a discussion of terminology and technology of sailing. Additional charge for off-campus services.
Note: May be repeated for credit.

- KINS 10. Intermediate Sailing.** **1 Unit**
Term Typically Offered: Fall, Spring
 Continuation of KINS 25, using our fleet of C-15s, Laser and Hobie Turbo 14s. Covers rigging, boating safety, sailing, theory and racing tactics.
Note: May be repeated for credit.
- KINS 11. Basic Windsurfing.** **1 Unit**
Term Typically Offered: Fall, Spring
 Introduces the student to the basic fundamentals of windsurfing. Covers rigging, terminology, balance, stance, sail adjustment, safety, rescue skills, and tricks.
Note: May be repeated for credit.
- KINS 12. Water Skiing.** **1 Unit**
Prerequisite(s): 50 yards swimming ability.
Term Typically Offered: Fall, Spring
 Basic water skiing, boat and boating safety and in the fundamental skills in water skiing. Additional charge for off-campus services.
Note: May be repeated for credit.
- KINS 14. Basic Olympic Rowing.** **1 Unit**
Term Typically Offered: Fall, Spring
 Teaches the novice rower oar control, basic commands, and correct style. Students will begin rowing on a modern eight-oared racing shell and be introduced to the one person rowing single.
Note: May be repeated for credit.
- KINS 15. Introduction to Fly Fishing.** **1 Unit**
Term Typically Offered: Fall, Spring
 KINS 15 is a course designed for Sacramento State students of all experience levels to develop proficiency in the sport of fly fishing while promoting an appreciation of the sport as a socio-cultural and lifetime recreational pursuit. Instruction/participation will include, but is not limited to the following topics: conditioning, conservation techniques, equipment use/care/selection, fly casting, aquatic entomology, stream hydrology, interpretation of fly fishing opportunities, fly fishing tactics, basic knots, and field trips to local streams.
 Field trip(s) may be required.
- KINS 21. First Year Seminar: Becoming an Educated Person.** **3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic and personal support.
- KINS 22. Creative Aerobic Fitness I.** **1 Unit**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Provides student with a wide range of flexibility, strength, muscular endurance and creative cardiovascular endurance (aerobic) exercises that promote physical fitness, positive changes in body composition and stress reduction when performed regularly.
Note: May be repeated for credit.
- KINS 24. Aqua Aerobics.** **1 Unit**
Term Typically Offered: Fall, Spring
 Using the unique buoyancy and resistance properties of water, the course includes aquatic exercises for flexibility, strength, and cardiovascular endurance to promote general fitness, body conditioning, and stress reduction. As the course will take place in shallow water, swimming proficiency is not required.
Note: May be repeated for credit.
- KINS 26. Exercise For Fitness.** **1 Unit**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Designed to encourage self-improvement through posture evaluation, biomechanic analysis of exercises performed and through participation in varied exercise forms. Students will develop a personalized repertoire of strength, suppleness and stamina exercises calculated to improve possible deficiencies in posture or movement to optimize enjoyment of living.
Note: May be repeated for credit.
- KINS 28. Jogging.** **1 Unit**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Jogging will expose the student to the fundamentals of jogging/running, its potential physiological and sociological benefits as a lifetime activity, fitness testing and individualized conditioning programs.
Note: May be repeated for credit.
- KINS 30. Bicycling.** **2 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Cycling as a lifetime sport; physiological benefits derived from bicycle riding; individual functional evaluation and conditioning, cycle touring. Lecture one hour; activity two hours.
Note: May be repeated for credit.
- KINS 33. Intermediate Weight Training.** **1 Unit**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
 Weight training as a lifetime fitness activity; emphasis on going beyond the beginning level through development of an individualized program designed to meet the needs of each individual.
Note: May be repeated for credit.

<p>KINS 36. Beginning Olympic Weight Lifting. 1 Unit Prerequisite(s): KINS 33 or equivalent. Term Typically Offered: Fall, Spring</p> <p>Introduces the lifter to the sport of weight lifting which consists of the two lifts (two hands snatch and the two hands clean and jerk) used in Olympic competition. It includes the complete breakdown of the two lifts, the assistive lifts necessary to learn the parts of the two lifts, and the proper training sequence. The students will also be introduced to training cycles, proper diet, and the use of assistive equipment. Note: May be repeated for credit.</p>	<p>KINS 59. Self Defense and Conditioning. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Multifaceted conditioning course that utilizes self defense techniques to develop self discipline, confidence and respect for physical capabilities and limitations of others. Note: May be repeated for credit.</p>
<p>KINS 40. Tai Chi. 1 Unit General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p> <p>Examines the historical, philosophical, psychological and physiological aspects of Tai Chi. Students will be provided the opportunity to experience a wide range of movement patterns that focus on the integration of mind and body. The form and structure of technique as well as breathing exercises will be included. Note: May be repeated for credit.</p>	<p>KINS 63. Beginning Ballroom Dance. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Development of proficiency in ballroom dance, including history, vocabulary, ballroom dance etiquette and basic steps for foxtrot, waltz, hustle, cha cha, tango, rumba, salsa, and merengue. Note: May be taken for credit more than once for credit.</p>
<p>KINS 43. Beginning Tae Kwon Do. 1 Unit General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p> <p>Primary emphasis on throwing, blocking, punching and kicking. The philosophy of Truism and Confucianism is explored. Note: May be repeated for credit.</p>	<p>KINS 72. Beginning Basketball. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Development of fundamental skills and tactics of the game, knowledge of basic strategy and rules. Emphasis given to individual and team concepts as they relate to performance and competition. Note: May be repeated for credit.</p>
<p>KINS 46. Beginning Judo. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Instruction in beginning judo tactics including throws and falls, conditioning, and protective devices for self-defense. Note: May be repeated for credit.</p>	<p>KINS 73. Intermediate Basketball. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Advancement of basketball skills and strategy. Emphasis is given to individual and team concepts as they relate to performance competition and officiating basketball. Note: May be repeated for credit.</p>
<p>KINS 50. Uechi-Ryu Karate. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Examines the historical, philosophical, and physical aspects of Uechi-Ryu Karate. Students will be asked to learn the basic techniques and skills used in this Okinawan system as well as to develop and improve in body strength, flexibility and coordination. Note: May be repeated for credit.</p>	<p>KINS 75. Beginning Volleyball. 1 Unit General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p> <p>Develop basic skills, basic offensive and defensive systems of team play, basic strategies and rules. Emphasis on team work and developing supportive attitudes and behavior which encourages continued involvement in volleyball as a physical activity. Note: May be repeated for credit.</p>
<p>KINS 56. Beginning Self-Defense for Women. 1 Unit General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p> <p>Prepares women to deal psychologically, sociologically and physically with rape and violent assault. The physical tactics taught are based on the use of hands and feet as weapons. They are simple yet an effective use of one's strength and mental attitude. Note: May be repeated for credit.</p>	<p>KINS 79. Beginning Soccer. 1 Unit Term Typically Offered: Fall, Spring</p> <p>Development of basic skills of ball handling, passing, dribbling, trapping, tackling, individual and team tactics and strategies; rules interpretation and officiating; promotion of bio-psychosocial well being. Note: May be repeated for credit.</p>
	<p>KINS 83. Beginning Golf. 1 Unit General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p> <p>Development of sufficient basic proficiency in golf to recognize and enjoy it as a lifetime activity; including U.S.G.A. rules, etiquette and the fundamental mechanics involved in the use of irons and woods. Note: May be repeated for credit.</p>

- KINS 86. Beginning Tennis.** 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Development toward proficiency in tennis, including basic court skills, knowledge, and elementary strategies. Development of enjoyable and appropriate cooperative and competitive modes of behavior, including etiquette and self-awareness. Attention is given to healthful approaches to vigorous lifetime physical activity.
Note: May be repeated for credit.
- KINS 87. Intermediate Tennis.** 1 Unit
Term Typically Offered: Fall, Spring
- Development and refinement of skills at the intermediate level in all strokes. Development and refinement of playing techniques and strategies. Learning how to enjoy competitive situations and to relate well to others in competition. Adjustment to stressful competitive conditions and improvement of personal responses under stress.
Note: May be repeated for credit.
- KINS 89. Beginning Badminton.** 1 Unit
Term Typically Offered: Fall, Spring
- Development of fundamentals in badminton including beginning skills, offensive and defensive tactics and strategy; singles, doubles and mixed doubles tournament play.
Note: May be repeated for credit.
- KINS 90. Intermediate Badminton.** 1 Unit
Term Typically Offered: Fall, Spring
- Development of movement skills, strokes, tactics in singles and doubles at a more advanced level. Emphasis on "cut" or deceptive strokes, rotation or diagonal system of doubles play, increased ability to move on the court, application of laws to move difficult playing situations. Singles, doubles and mixed doubles play in tournaments.
Note: May be repeated for credit.
- KINS 91. Alpine Skiing and Snowboarding.** 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Designed to develop proficiency at all skill levels of alpine skiing, beginner through expert, while promoting appreciation of the sport as socio cultural phenomena and lifetime pursuits. Sessions will take place at a scheduled Sierra ski area as well as on campus. Additional fee.
Note: May be repeated for credit.
- KINS 92. Beginning Racquetball.** 1 Unit
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Fundamental theory and practice of the game of racquetball including service, receiving the service, back wall play, basic shots, variations, court positioning and general tactics; history rules, and safety precautions.
- KINS 93. Intermediate Racquetball.** 1 Unit
Term Typically Offered: Fall, Spring
- Development of proficiency at the intermediate level. Includes service and return, backwall play, offensive and defensive shots with emphasis on techniques, strategy and tactics of competition.
Note: May be repeated for credit.
- KINS 99. Exercise for Healthy Living.** 2 Units
Corequisite(s): One unit skill or fitness class; may be taken concurrently.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Exposes students to a broad range of information related to the understanding and development of personal fitness and health, including psycho-social well-being. Examines the elements of exercise, nutrition, and stress management as they relate to healthful living. Students will explore a variety of personal choices and the options for developing and maintaining lifetime wellness.
- KINS 106C. Advanced Weight Training.** 1 Unit
Term Typically Offered: Fall, Spring
- Advanced instruction in weight lifting including Olympic weight lifting, power lifting, body building, lifting for athletic competition and lifting for physical fitness.
- KINS 110. Women and Sport.** 3 Units
Term Typically Offered: Fall, Spring
- Role of women in sport; an inquiry into traditional and contemporary attitudes and practices regarding the woman's role in the sporting world.
- KINS 118A. Martial Arts: Karate.** 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring
- Explores the ancient tradition of the Asian martial arts in conjunction with actual participation in a selected martial arts course. Asks the student to critically examine the cultural contributions of specific Asian communities such as Japan, China, and Korea, to the Martial Arts as practiced in the U.S.
- KINS 118B. Martial Arts: Tae Kwon Do.** 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2), Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
- KINS 118C. Martial Arts: Tai Chi.** 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)
Term Typically Offered: Fall, Spring

KINS 120. Strength and Conditioning. 3 Units

Prerequisite(s): Restricted to Kinesiology, Pre-Exercise Science, or instructor approval.

Term Typically Offered: Fall, Spring

The course is designed to introduce students, persons interested in the personal training field, strength & conditioning and/or prospective coaches at the high school, college, or professional level, public, private settings to what are commonly referred to as training units. These training units are part of the total training program an individual/student/athlete would use to prepare for participation in fitness activity or sport. Included are practical hands-on participatory experiences, program design strategy and practical field tests.

KINS 121. Peak Performance Through Psychological Skills. 3 Units

Term Typically Offered: Fall only

Examination of, and practical experience in, techniques for maximizing sport and creative performance through the development of mental skills and strategies for stress control, imagery, goal setting, and concentration.

KINS 122B. Cardiopulmonary Resuscitation. 1 Unit

Term Typically Offered: Fall, Spring

Designed to meet American Red Cross or American Heart Association Certification in CPR.

Note: May be repeated for credit.

Credit/No Credit

KINS 130. Elementary Physical Education Curriculum and Content. 3 Units

Prerequisite(s): KINS 138; Restricted to junior or senior Kinesiology majors-Physical Education concentration.

Term Typically Offered: Spring only

Overview of the total elementary physical education curriculum. Designed specifically for physical education concentration students. The primary focus will be placed on cooperative activities, movement education, development of locomotor, non-locomotor, manipulative skills, perceptual motor activities, fitness, games, and the correlation of classroom subjects with physical education. Introduces students to developmentally and instructionally appropriate physical education for children. Students will be able to develop a scope and sequence for an elementary physical education curriculum.

KINS 131. Secondary Physical Education Curriculum. 2 Units

Prerequisite(s): KINS 138; Kinesiology major - Physical Education concentration students only.

Term Typically Offered: Fall only

Designed for senior level students in the Kinesiology major, Physical Education Option, Credential Concentration who wish to deliver an effective, meaningful physical education curriculum to diverse students. Covers curriculum components that include content, content organization, distinctive curriculum models and aspects of curriculum application. Students will learn how to sustain a positive learning experience, conceive and plan meaningful curricula for school based instruction, and to link the school program to opportunities for adolescents outside of school.

KINS 132. Planning, Designing and Managing a Fitness Center. 3 Units

Term Typically Offered: Fall, Spring

Designed to provide students with the basic guidelines for starting and managing multiple health and fitness centers in the private setting; focus on initial start-up of a health and fitness center and operating procedures with emphasis on equipment selection and arrangement, employee training, program planning for safe and optimally beneficial health and fitness results.

KINS 133. Integration of Concepts. 3 Units

Prerequisite(s): KINS PETE or PACC majors only; and GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Critical perspective of how theoretical concepts and integrated knowledge can be applied to various aspects of physical education, sport, and physical activity. Emphasis is on a coherent understanding of the interrelationships that exist in the subdisciplines of kinesiology and other related subject areas. Capstone experience for students in the Physical Education Concentration; must be taken during the final semester of the student's plan of study.

KINS 134. History and Philosophy of Physical Education and Sport. 3 Units

Term Typically Offered: Fall, Spring

Examination of historical events in physical education and sport; examination of how these historical events have influenced the varying philosophies of physical education, sport, and physical activity, past and present; identification of societal forces in cultures which lead to philosophical beliefs and concepts relative to the structure of the disciplines of physical education, sport, and physical activity.

KINS 135. Assessment Strategies in Physical Education. 3 Units

Term Typically Offered: Fall, Spring

Selection, analysis, construction and administration of norm-referenced and criterion-referenced tests used for formative and summative evaluation in the physical education public school setting. Includes both traditional and alternative assessment strategies. Computers are used for data collection, development of assessment instruments, development of grading programs, and for descriptive statistical analysis.

KINS 136. Sport And Aging. 3 Units

Term Typically Offered: Fall, Spring

Considers the positive and negative aspects of vigorous exercise and/or sport activity throughout the aging process. Included will be inquiry into the opportunities for activity among adults over the age of thirty, through the active career years, and beyond.

KINS 137. Sociology Of Sport.
Term Typically Offered: Fall, Spring**3 Units**

Analyzes sport as a social institution and the interrelations between sport and societal subsystems. Consideration of the attitudes, values, and behaviors associated with sport. Analyzes contemporary problems associated with sport: race relations, the traditional and emergent role of women, leisure behavior, aggression and violence, and political and economic concerns. Analyzes a sociological problem within the context of sport.

KINS 138. Teaching Strategies in Physical Education. **3 Units**

Prerequisite(s): Physical Education Majors, Minors and Liberal Studies PE Concentration.

Term Typically Offered: Fall, Spring

Introduction to teaching in K-12 schools for physical education majors. Topics include: professionalism, philosophy, the CA framework, lesson/unit planning, class management, organization techniques, communication skills, teaching styles and effective teaching skills. (Students will be required to complete four observations off campus and two peer-teaching assignments on campus.) Serves as a prerequisite or corequisite for all skill analysis classes in the major.

KINS 139. Leadership and Communication. **3 Units**

Term Typically Offered: Fall, Spring

Social actions and behavioral patterns as influenced by the communication process; experiential approaches to techniques of interpersonal and small group relationships and leadership; the constantly evolving communication media as instruments of behavioral change.

KINS 141. PRO ACT I - Dual Sports. **3 Units**

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Fall only

Designed to prepare physical education students to analyze and teach developmentally appropriate activities designed for dual participation in the public school setting. Student will be given opportunity to learn and apply the basic techniques of tennis, badminton and pickleball as well as the offensive and defensive net strategies for game play. Emphasis will be given to skill acquisition analysis.

KINS 142. Professional Activities II - Creative Movement and Dance. **3 Units**

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Spring only

Students will develop an understanding of the content specific to the design and delivery of educational gymnastics and rhythm/dance activities in a K-12 setting. Gymnastics components include: skills, appropriate progressions, spotting techniques, safety and methods of organization. Rhythm and dance will include basic locomotive skill development; basic rhythm activities; and contemporary, line, square, round, contra, folk, country and Western and social/ballroom dance. Historical and multicultural concepts related to dance are also included.

KINS 144. Analysis of Weight Training & Muscular Fitness. **2 Units**

Prerequisite(s): Restricted to Kinesiology, Pre-Exercise Science, Coaching Minor or instructor approval

Term Typically Offered: Fall, Spring

The course is designed to prepare students to teach, design, and implement strength/conditioning for various fitness/athletic populations. Included are skill techniques, skill analysis, class/group organization, equipment analysis, muscular fitness related to athletics, fitness, rehabilitation, and other factors related to effective teaching of muscular fitness in high school, college, private, public and corporate settings. Emphasis is on kinesiology/biomechanics principles, human anatomy, and physiological adaptations to the various strength/conditioning for fitness/athletic training covered in the course.

KINS 145. Pro Act III - Team Sports. **3 Units**

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Fall only

This is an introductory course designed for students within the Kinesiology Major Physical Education Concentration to analyze the teaching of field sports in secondary school settings. This course provides the student the opportunity to learn basic techniques, strategies, and rules of flag football, volleyball, softball, soccer and basketball. Emphasis will be given to skill performance, skill development, teaching methodology, skill analysis, lead-up activities, and sport participation.

KINS 146. PRO ACT IV Individual Sports. **3 Units**

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Spring only

Designed to prepare physical education students to analyze and teach developmentally appropriate activities designed for individual participation in the public school setting. Student will be given the opportunity to learn and apply the basic techniques of golf, track and field and aquatics as well as the strategies necessary for effective participation. Emphasis will be given to skill acquisition and analysis.

KINS 148. ProAct V - Nontraditional Games and Sports. **3 Units**

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Fall only

Students will develop an understanding of the content specific to the design and delivery of non-traditional games and sports. Instruction will focus on performance, skill analysis, methods of teaching, strategies for instruction, and evaluation of skills in K-12 settings. The students will be introduced to a variety of nontraditional games and outdoor activities, as well non-traditional team sports including Lacrosse, Ultimate Frisbee, Speedball, Team Handball, and Field Hockey.

KINS 149. Professional Activities of Health and Skill Related Fitness. 3 Units

Prerequisite(s): KINS 138

Corequisite(s): KINS 138

Term Typically Offered: Spring only

Students will develop an understanding of the content specific to the design/delivery of a variety of innovative fitness/wellness learning experiences for individuals in K-12 settings. Emphasis will be placed on movement and its relationship to the components of health fitness when pursuing and promoting a physically active lifestyle. Students will develop skills in assessing fitness levels and implementing strategies for supporting positive behaviors and attitudes toward fitness/wellness for individuals from diverse populations.

KINS 150. Exercise and Sport Physiology. 3 Units

Prerequisite(s): BIO 30 or BIO 26 or equivalent

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5, Laboratory (B3)

Term Typically Offered: Fall, Spring

Sports physiology with special emphasis on studying the various systems in the body that are involved in work, exercise and sport. Training programs to improve these systems and their responses will be discussed in a wide variety of settings including exercise for health, fitness, recreation, and sports competition. Lecture two hours; laboratory three hours.

Note: Does not satisfy exercise physiology requirement for Exercise Science majors.

KINS 151. Kinesiology. 3 Units

Prerequisite(s): BIO 22 or equivalent.

Term Typically Offered: Fall, Spring

Anatomical concepts and physical laws as applied to human movement emphasizing the effects of individual and environmental variables. Includes analysis of normal and pathological gait. Lecture two hours; laboratory three hours.

KINS 151A. Biomechanics. 3 Units

Prerequisite(s): KINS 151.

Term Typically Offered: Fall, Spring

Introduction to fundamental mechanical concepts as they apply to human movement. A broad range of human movement will be explored including activities from sport, industrial settings, normal and pathological locomotory skills, and movements involved in manipulating the environment in which we live. Laws of physics, mechanical principles and mathematical concepts will be integrated in studying man as a biological entity. Lecture two hours; laboratory three hours.

KINS 151B. Biomechanics II. 3 Units

Prerequisite(s): BIO 10, BIO 22, KINS 151, and KINS 151A

Term Typically Offered: Fall, Spring

The study of biomechanical theory in regards to quantifying and analyzing human movement. Human movement will be examined from an advanced perspective, including tissue mechanics, the pathomechanics of chronic disease, and exercise and sport performance.

KINS 151C. Dance Kinesiology. 3 Units

Prerequisite(s): BIO 22 or equivalent.

Term Typically Offered: Fall, Spring

Human musculoskeletal and neurological systems, energy production, and biomechanical interrelationships of human motion applied to dance. Emphasis on the nervous, muscular and tendinous structures and the mechanical function of levers and force application and injury prevention for the dancer.

KINS 151D. Applied Kinesiology and Biomechanics. 3 Units

Prerequisite(s): BIO 30 with a grade of C or BIO 26

Term Typically Offered: Fall, Spring

Fundamentals of human movement patterns with an emphasis on applied anatomy, movement principles, movement sequences, applied biomechanics, developmental motor stages and basic movement analysis.

Note: Does not satisfy kinesiology or biomechanics requirements for Exercise Science majors.

KINS 152. Physiology Of Exercise. 3 Units

Prerequisite(s): CHEM 1B or CHEM 6B and BIO 131

Term Typically Offered: Fall, Spring

Study of circulatory, respiratory and metabolic response to exercise in humans under various physiological and ambient conditions. Lecture 2 hours; laboratory 2.5 hours.

KINS 152A. Fundamentals of Exercise Programs. 3 Units

Prerequisite(s): KINS 152.

Term Typically Offered: Fall, Spring

Study of current training programs used in different types of activity. Emphasis will be placed on specific training techniques, nutritional needs, methods of testing/evaluating, and special considerations needed for various populations.

KINS 152B. Exercise Physiology of Women. 2 Units

Term Typically Offered: Fall, Spring

Examines the general physiology of women, how physical activity affects women's physiological functions, and how physiological functions affect women in sport and exercise performance. A comprehensive review of scientific literature is included.

KINS 152C. Prolonged Exercise. 2 Units

Prerequisite(s): An introductory college biology or zoology course.

Term Typically Offered: Fall, Spring

Extensive review of the energy metabolism, cardiovascular and pulmonary function, endocrine response, nutritional need, training effect, and biochemical response to prolonged exercise of 1-6 hours in duration.

KINS 152D. Blood Lactate and Exercise. 2 Units

Prerequisite(s): KINS 152.

Term Typically Offered: Fall, Spring

Reviews the basic aspects of lactate formation, release, and uptake by skeletal muscle and blood during exercise and training. Presents recent clinical and research findings related to physical performance.

KINS 152S. Energy Production & Sports Performance. 3 Units

Prerequisite(s): KINS 152 and co-enrollment in KINS 153 or Instructor Permission Recommended: FACS 10 & FACS 113

Term Typically Offered: Fall, Spring

Study of ergogenic aids, exercise nutrition and exercise performance enhancing drugs/supplements and their physiological effects on energy production and exercise performance. Lecture: 3 hours

KINS 153. Cardiovascular Testing and Exercise Prescription. 3 Units

Prerequisite(s): KINS 152 or instructor permission.

Term Typically Offered: Fall, Spring

Designed to train exercise leaders, exercise test technologists, and exercise program directors. Focus is upon development of basic skills, both administrative and technical, needed to develop a program of graded exercise testing and exercise prescription for asymptomatic and symptomatic populations. Lecture two hours; laboratory three hours.

KINS 153C. Cardiac Rehabilitation & Exercise Electrocardiography. 3 Units

Prerequisite(s): KINS 153 or Instructor Permission

Term Typically Offered: Fall, Spring

Study of cardiac rehabilitation and exercise electrocardiography, reviews clinical pathophysiology and ECG abnormalities during rest, exercise stress testing and cardiac rehabilitation. Lecture 3 hours.

KINS 154A. Principles and Techniques in a Clinical Setting. 3 Units

Prerequisite(s): Athletic Training or Kinesiology majors only; instructor permission

Term Typically Offered: Fall, Spring

Introduction to professional ethics and attire, the allied health care system, patient transfers, wheelchair and ambulation aids, medical terminology and record keeping. Fundamental principles and concepts underlying the therapeutic application of modalities, including methods of administering heat, cold, electricity, sound, light and water are covered.

KINS 154B. Management and Health Care Administration in Athletic Training. 3 Units

Prerequisite(s): Instructor permission only

Term Typically Offered: Fall, Spring

Organization, management and health care administration of athletic training programs. Includes communication skills, budget, facility design and management, legal aspects, drug testing, education, computer use, insurance and record keeping, personnel development (job search, CEUs, licensure), professional and governing organizations, athletic training reporting systems, emergency action plans, blood borne pathogen procedures, preparticipation exam management, health care issues and fundraising.

KINS 154C. Therapeutic Modalities Laboratory. 1 Unit

Prerequisite(s): BIO 22 or BIO 26, and KINS 154A, and KINS 156, and instructor permission.

Term Typically Offered: Fall, Spring

Techniques and clinical skills in the treatment of injuries using therapeutic modalities. Hands-on experience in the clinical application of contemporary therapeutic modalities (electrotherapeutic modalities, hydrotherapeutic modalities, cryotherapy, radiant energy, paraffin, intermittent compression units, traction units, massage) including patient preparation, set-up, dosage determination and operational procedures. Lab two hours.

KINS 155A. Clinical Evaluation of the Upper Extremity. 2 Units

Prerequisite(s): BIO 22 or BIO 26, and KINS 154A, and KINS 156.

Term Typically Offered: Fall, Spring

Analyzes and performance of evaluation procedures of the upper extremity, head and spine. Includes the development of skills in a patient interviewing, palpation methods, manual muscle testing, neurological and orthopedic assessments and special tests.

KINS 155B. Clinical Evaluation of the Lower Extremity. 2 Units

Prerequisite(s): BIO 22 or BIO 26, KINS 154A, KINS 156.

Term Typically Offered: Fall, Spring

Analyzes and performance of evaluation procedures of the lower extremity, trunk and low back. Includes the development of skills in patient interviewing, palpation methods, manual muscle testing, neurological and orthopedic assessments and special tests.

KINS 156. Care Of Athletic Injuries. 3 Units

Term Typically Offered: Fall, Spring

Application and methods of caring for and preventing athletic injuries through strapping, padding, conditioning, etc.; practical application of first aid and a basic introduction to treatment and rehabilitation of common athletic injuries.

KINS 156A. Emergency Response. 2 Units

Term Typically Offered: Fall, Spring

Underlying principles and applied techniques of first aid. Meets the requirements for the Emergency Response and CPR for the Professional Rescuer certificates of the American Red Cross. Lecture one hour, laboratory two hours.

KINS 157. Therapeutic Exercise. 3 Units

Prerequisite(s): BIO 22 or BIO 26; KINS 151 or KINS 151D; and KINS 155A or KINS 155B

Term Typically Offered: Fall, Spring

Biomechanical principles in the prescription of musculoskeletal rehabilitation exercises. Topics include passive, active and resistive range of motion, manual muscle testing, and exercises for strength, stamina and suppleness for every part of the body.

KINS 158. Motor Learning. 3 Units

Prerequisite(s): BIO 22 or BIO 25

Term Typically Offered: Fall, Spring

Study of the motor and cognitive characteristics of individuals involved in learning and controlling motion skills and the conditions that can influence that learning and control. Lecture two hours; laboratory three hours.

KINS 160. Sport and Exercise Psychology. 3 Units

Term Typically Offered: Fall, Spring

Application of research findings as they apply to psychological performance factors in sport, physical education and exercise settings, such as motivation/adherence, stress management, personality and psychological skills training.

- KINS 161. Theory of Sport and Fitness Management.** 3 Units
Term Typically Offered: Fall only
- This course is designed to introduce students to the basic theory underlying the multiple components of the sport and fitness industry. Fundamental concepts and theories of sports and fitness management will be applied to various segments of the sports industry: professional sports, collegiate sports, community sports and recreation, intramural sports and corporate fitness.
- KINS 165. Theory of Coaching.** 3 Units
Term Typically Offered: Spring only
- Students will be introduced to coaching theory as it relates to developing leadership skills to work with athletes, and teams in the context of organized sport. Topics will include motivation, self-esteem, leadership, communication, competition and cooperation, team management, and optimal performance skills (goal setting, concentration, composure, recovery from mistakes/loss, consistency, and stress management).
- KINS 166. Ethics, Inclusion and Equity in Coaching.** 3 Units
Term Typically Offered: Fall only
- This course educates future coaches on the moral and ethical dilemmas typically encountered in competitive athletics. Students will also develop strategies to address various forms of exclusion and inequity in sports and athletics.
- KINS 167. The African American Sport Experience.** 3 Units
Term Typically Offered: Fall, Spring
- Examination of the experiences of the African American athlete in sport and society, from the period of enslavement to the contemporary era. Topics include gender experiences, intercollegiate experiences, professional sport, and the Olympic games, as well as the interconnections between African American communities and the role of sport. The experiences of African Americans will be compared to those of other ethnic and cultural groups.
- KINS 168. Sport and Film.** 3 Units
Term Typically Offered: Fall, Spring
- This course uses sport films to examine relationships of power in society and the way those relationships are contested and often reinforced. Particular attention will be paid to cultural tensions and negotiations around issues related to race, gender, class, and sexuality. This course utilizes films, with accompanying readings, to understand the institution of sport in American culture, as well to understand how sport is setting where issues of race, class, gender, religion, ability/disability, and sexuality are contested and reinforced.
- KINS 169. The Modern Olympic Games.** 3 Units
Term Typically Offered: Fall, Spring
- A study of the historical development of the modern Olympic Games. Areas covered include politics, nationalism, commercialism, marketing and amateurism. The contribution of athletes and administrators who have help shape the Olympic tradition will be assessed.
- KINS 171. Adapted Physical Education: Basic Skill/Fitness Activities and Assessment.** 3 Units
Prerequisite(s): KINS 177.
Term Typically Offered: Fall, Spring
- Development of competencies for planning, developing, and evaluating effective skill and fitness activities for students with disabilities. Emphasis will be placed on basic skill development, fitness and traditional and alternative assessment strategies and postures assessment and programming for students with disabilities. Information regarding the application of specific standardized assessment instruments for placement decisions will be examined. Students will be required to participate in 15 hours of service learning. Class meets for 2 hours lecture and 2 hours activity.
- KINS 172. Movement Education.** 3 Units
Prerequisite(s): Liberal Studies or Child Development majors only, or instructor permission
Term Typically Offered: Fall, Spring
- Examination of activities and theoretical concepts that relate to the physical, social, emotional and intellectual development of the individual. Content includes: health-related physical fitness, movement concepts, stability, locomotor and manipulative skills, rhythms and dance, gymnastics, games and sport activities.
- KINS 176. Perceptual Motor Development.** 3 Units
Term Typically Offered: Fall, Spring
- Study of the genetic, prenatal, perinatal and postnatal factors affecting the sequential perceptual motor development of children. Inquiry is made into reflexes, sensory motor testing and stimulation, perceptual motor testing and remedial activities in motor development.
- KINS 177. Introduction to Adapted Physical Education.** 3 Units
Term Typically Offered: Spring only
- Historical and philosophical bases for adapted physical education, including the development and management of programs with emphasis on the psychomotor, affective and cognitive domains. The impact of federal and state legislation, legal liability and special health and safety problems will be studied in relationship to the role of the adapted physical education teacher, the interdisciplinary team, the parent and the pupil.
- KINS 179. Adapted Physical Education: Program Planning.** 3 Units
Prerequisite(s): KINS 171 and KINS 177.
Term Typically Offered: Fall, Spring
- Study of the variables in physical education curriculum and program planning - assessment, goals and objectives, development of program content, and evaluation - as related to individuals with disabilities.
- KINS 194A. Assigned Field Experience in Kinesiology.** 1 - 2 Units
Term Typically Offered: Fall, Spring
- Assigned experience in the conduct of physical education. Students keep records of daily experiences and prepare periodic progress reports. Students receive one unit of credit for three hours per week for one semester of field experience.
Note: Registration requires prior approval of the department coordinator. May be repeated for a total of five units.

Credit/No Credit

KINS 194B. Assigned Internship in Exercise Science. 1 - 3 Units
Prerequisite(s): KINS 151 and/or KINS 152; or instructor permission.
Term Typically Offered: Fall, Spring

Assigned internship other than in the Human Performance Lab. The student will assist in laboratory experiments and other special procedures; will learn the operation of equipment and sequentially will be expected to administer tests and interpret the results. Interns will be expected to attend monthly conferences.

Note: May be repeated for a total of 3 units.

Credit/No Credit

KINS 194C. Assigned Field Experiences in Pre-Physical Therapy. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned experience under the direction of a physical therapist. Students keep records of their experiences. Registration requires prior approval of the pre-physical therapy coordinator.

Note: May be repeated up to a total of 6 units. Open to Physical Education majors in the pre-physical therapy option.

Credit/No Credit

KINS 194D. Assigned Field Experience in Coaching. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned experience in coaching (two hours daily for the full schedule of the sport for two units of credit). Students keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports.

Note: May be repeated for a total of 6 units.

Credit/No Credit

KINS 194E. Assigned Internship in Adapted Physical Education. 1 - 3 Units

Prerequisite(s): Any two of the following: KINS 171, KINS 176, KINS 177, or KINS 179; permission of adapted credential advisor.

Term Typically Offered: Fall, Spring

Assigned experience in the conduct of Adapted Physical Education Programs. Students will keep records of their experiences. Three clock hours per week per unit of credit. Credential candidates may not use in lieu of Phase III requirements.

Note: May be repeated up to six times for credit for a maximum of 6 units.

Credit/No Credit

KINS 194F. Assigned Field Experience in Allied Health. 1 - 3 Units
Term Typically Offered: Fall, Spring

Practical experience in Occupational Therapy, Chiropractic or other allied health professions. Students keep records of their experiences while working under the direct supervision of a licensed clinician. Registration requires prior approval of a Pre-Physical Therapy advisor.

Note: May be repeated up to a total of 6 units.

Credit/No Credit

KINS 194G. Assigned Professional Experience. 1 - 2 Units
Term Typically Offered: Fall, Spring

Assigned professional experience in organization and evaluation of physical education, athletic training, exercise or pre-therapy. Students work closely with a Sacramento State faculty member and receive one unit of credit for three hours of work per week for one semester.

Note: May be repeated for a total of 3 units toward graduation. These units may not be applied to the major.

Credit/No Credit

KINS 194H. Assigned Field Experience in Athletic Training. 1 - 3 Units
Prerequisite(s): Instructor's permission only
Term Typically Offered: Fall, Spring

Practical experience in athletic training under the direct supervision of an NATA Certified Athletic Trainer in one of the following settings: professional athletics, high school, clinic, industrial or private business.

Note: Registration requires prior approval of the program director. May be repeated up to a total of 3 units.

Credit/No Credit

KINS 195A. Directed Field Experience in Kinesiology. 1 - 2 Units
Term Typically Offered: Fall, Spring

Directed experience in the conduct of physical education. Students keep records of daily experiences and prepare periodic progress reports. Students receive one unit of credit three hours per week for one semester of field experience.

Note: Registration requires prior approval of the department coordinator. May be repeated for a total of 5 units.

Credit/No Credit

KINS 195B. Directed Internship in Exercise Science. 1 - 3 Units
Prerequisite(s): KINS 151 and/or KINS 152; or instructor permission.
Term Typically Offered: Fall, Spring

Directed internship in the Human Performance Laboratory under the supervision of one or more members of the faculty. The student will assist in laboratory experiments and other special procedures; will learn the operation of equipment and sequentially will be expected to administer tests and interpret the results. Interns will be expected to attend monthly conferences.

Note: May be repeated for a total of 3 units.

Credit/No Credit

KINS 195C. Directed Observation in Athletic Training. 1 - 2 Units
Prerequisite(s): Requires prior approval of Program Director
Term Typically Offered: Fall, Spring

Planned student observation of the health care practices of the Athletic Trainer and other sports medicine personnel in a clinical setting. Selected NATA competencies may be completed on site. 60 hours per unit.

Note: May be repeated for up to 4 units total credit.

Credit/No Credit

<p>KINS 195D. Practicum in Athletic Training. 4 Units Prerequisite(s): Instructor's permission only Term Typically Offered: Fall, Spring</p>	<p>KINS 203. Specificity of Conditioning. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Supervised athletic training experience in the athletic training room under the direct supervision of a Certified Athletic Trainer. Included are a series of guest lecturers from the medical and paramedical field presenting lectures and demonstrations on topics in sports medicine. 300 hours plus all lectures are 4 units. Note: Can be taken a minimum of four times and maximum of five times for credit, with the total units not to exceed 20 units.</p>	<p>Survey of current research in training regimen of conditioning programs designed to optimize physical conditioning in preparation for specific athletic competitions.</p>
<p>Credit/No Credit</p>	<p>KINS 209. Graduate Studies in Kinesiology. 3 Units Term Typically Offered: Fall, Spring</p>
<p>KINS 196. Experimental Offerings in Kinesiology. 2 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>An overview of the varied subdisciplines, such as sport pedagogy, motor learning, strength and conditioning, sport psychology, cultural studies of sport, exercise physiology, and biomechanics. Students will read research from each subdiscipline and be able to make interdisciplinary connections.</p>
<p>Guided study and discussion of problems and topics in kinesiology. Supplemental readings, reports, and term projects are included. Proseminars dealing with specific topics or problems will be scheduled when the need exists. Note: May be repeated for credit up to three times for credit.</p>	<p>KINS 210. Research Methods in Kinesiology. 3 Units Term Typically Offered: Fall, Spring</p>
<p>KINS 198A. Seminar in Physical Education - Elementary. 2 Units Prerequisite(s): KINS 381 and EDTE 474A. Corequisite(s): KINS 380 and EDTE 474B. Term Typically Offered: Fall, Spring</p>	<p>Various methods and techniques of educational research as they are commonly applied in the field of Kinesiology; study of examples of their use in published research; practice in applying them to problems of interest to the student; analyzing data and writing research reports.</p>
<p>Open to physical education single subject credential candidates this course accompanies an eight-week elementary student teaching experience. The focus is twofold: a) engage student teachers in the planning, instruction and assessment of an elementary physical education program aligned with state standards b) support student teachers with the Performance Assessment for California Teachers (PACT). Candidates will be expected to create a class environment that ensures the safe and productive participation in developmentally appropriate elementary physical education.</p>	<p>KINS 211. Research Seminar. 1 Unit Term Typically Offered: Fall, Spring</p>
<p>KINS 198B. Seminar in Physical Education - Secondary. 1 Unit Prerequisite(s): KINS 198A. Corequisite(s): EDTE 474B. Term Typically Offered: Fall, Spring</p>	<p>Students develop and defend research proposals. Students registering for KINS 500 for the first time must register for KINS 211 concurrently. Note: Student must re-enroll if proposal is not completed and accepted during the first registration</p>
<p>Open to physical education single subject credential candidates this eight-week course accompanies an eight-week secondary student teaching experience. The focus is twofold: a) engage student teachers in the planning, instruction and assessment of a secondary physical education program aligned with state standards b) support student teachers with the Performance Assessment for California Teachers (PACT). Candidates will be expected to create a class environment that ensures the safe and productive participation in developmentally appropriate secondary physical education.</p>	<p>Credit/No Credit KINS 236. Sport and Society. 3 Units Term Typically Offered: Fall, Spring</p>
<p>KINS 199. Directed Individual Study. 1 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>Society and the institution of sport interact in a variety of ways. Students are given the opportunity to investigate and discuss in-depth a wide range of topics linking sport and society. Among these topics are violence and aggression, politics, racism, sexism, counter-cultures, mass media and the future of sport. The application of research to the real world is an integral part of the course.</p>
<p>Individual research, project or directed reading. Open only to majors who appear competent to carry on individual work. Approval of the faculty under whom the individual work is to be conducted, and approval of the Department Chair required. Formal written report required. Note: May be repeated for credit.</p>	<p>KINS 245. Administration of Physical Education and Athletics. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Credit/No Credit</p>	<p>The organization and administration of physical education and athletic programs and the functional considerations involved. Primary areas include: personnel, curriculum, budgeting, contract management, public relations, liability and safety, critical issues, and procedures essential to quality programs.</p>
	<p>KINS 250. Advanced Exercise Physiology Laboratory. 3 Units Prerequisite(s): KINS 152 or instructor permission. Term Typically Offered: Fall, Spring</p>
	<p>Describes, explains, and practices the application of selected measurement techniques in the laboratory as they relate to pertinent research in the areas of exercise physiology. Emphasis will be placed on the use and calibration of equipment as well as adaptation of equipment to different research settings. Lecture two hours; laboratory three hours.</p>

- KINS 252. Advanced Exercise Physiology. 3 Units**
Prerequisite(s): 1 year of General Chemistry, BIO 131 or equivalent, KINS 152 or equivalent, and KINS 153 or equivalent.
Term Typically Offered: Fall, Spring
- Human physiological responses, from the cellular level to organ system level, to both acute and chronic exercise will be studied in detail with an emphasis on integrative physiological responses to exercise. The course will emphasize a complex regulatory systems approach to the changes and adaptations that occur with exercise. Specifically, how the regulatory systems dictate these changes. The course will aid in the understanding of both theoretical and integrative concepts in the area of exercise physiology. The course will provide a solid foundation that is needed to review and understand complex research in exercise physiology.
- KINS 254. Advanced Biomechanics. 3 Units**
Prerequisite(s): KINS 151, KINS 210; or instructor permission.
Term Typically Offered: Fall, Spring
- Study human movement from a mechanical perspective utilizing laws of physics and relevant functional anatomical principles. Human movement will be looked at from a broad perspective, including basic movements to more complex skills. Students will use a variety of techniques to study the biomechanical principles of movement production including laboratory work, library research and examination of the appropriate theoretical constructs. Lecture two hours; laboratory three hours.
- KINS 258. Research in Motor Learning. 3 Units**
Prerequisite(s): KINS 158, KINS 210, or instructor permission.
Term Typically Offered: Fall, Spring
- Designed to provide students with a solid foundation experience in motor learning; focus is on an intensive examination of a selected topic in motor learning; directed individual pilot study and the nature of original laboratory research.
- KINS 259. Research in Exercise Physiology. 3 Units**
Prerequisite(s): KINS 152, KINS 210, or instructor permission.
Term Typically Offered: Fall, Spring
- Provides students with a solid foundation experience in human performance research. Primary focus is on intensive examination of selected advanced topics in exercise physiology.
- KINS 260. Psychology Of Sport. 3 Units**
Term Typically Offered: Fall, Spring
- The in-depth study of parameters of human behavior as specifically related to sport including personality factors, motivational techniques, expectancy effects, group dynamics, leadership issues, aggression, arousal, concentration, and goal setting.
- KINS 262. Psychological Aspects of Peak Performance. 3 Units**
Term Typically Offered: Fall, Spring
- In-depth examination of current research relating to theories of and techniques for performance enhancement in sport and dance through psychological skills strategies.
- KINS 270. Instructional Strategies for Physical Activity and Sport. 3 Units**
Term Typically Offered: Fall, Spring
- Study of theoretical concepts, models and research that relates to organizational and instructional strategies for physical activity and sport. Along with developing problem solving and critical thinking skills, provides the student with the opportunity to partake in self-directed and cooperative learning experiences, and develops communications skills that will enhance staff development and teaching of individuals and groups in a variety of physical activity and sport environments.
- KINS 276. Teaching and Coaching Effectiveness. 3 Units**
Term Typically Offered: Fall, Spring
- Study of the research methodology, systematic observation, and findings that relate to effective teaching and coaching in the school environment. Provides an analytical approach to the investigation of teaching and coaching behaviors by examining models and critical variables involved in describing, analyzing and interpreting the instructional process.
- KINS 294A. Contemporary Topics in Sport Performance. 1 - 3 Units**
Prerequisite(s): KINS 210.
Term Typically Offered: Fall, Spring
- Advanced research seminars on topics of contemporary interest. Specific topics will vary.
Note: May be taken more than once for credit, provided topic is not repeated.
- KINS 294B. Contemporary Topics in Exercise Physiology. 1 - 3 Units**
Prerequisite(s): KINS 210.
Term Typically Offered: Fall, Spring
- Advanced research seminars on topics of contemporary interest. Specific topics will vary.
Note: May be taken more than once for credit, provided topic is not repeated.
- KINS 294C. Special Topics in Biomechanics. 1 - 3 Units**
Prerequisite(s): KINS 254.
Term Typically Offered: Fall, Spring
- Advanced research seminars on varied topics of contemporary interest.
Note: May be taken more than once for credit, provided topic is not repeated.
- KINS 295. Practicum. 1 - 3 Units**
Prerequisite(s): Approval of graduate faculty advisor and graduate coordinator.
Term Typically Offered: Fall, Spring
- Graduate experiences in a practical setting.
Note: Open only to graduate students within the Physical Education Department.
- Credit/No Credit

KINS 296A. Experimental Elementary Physical Education Workshop. 1 Unit

Term Typically Offered: Fall, Spring

Overview of the total elementary physical education curriculum. Major focus will be on appropriate practices, national content standards, establishing a learning environment, movement concepts, skill themes, and health-related physical fitness. Designed to meet the physical education component for graduate students seeking a multiple subject credential.

Note: Not open to undergraduate students, and it does not substitute for KINS 172.

Credit/No Credit

KINS 299. Directed Individual Study. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual research, project, or directed reading.

Note: Open only to majors who appear competent to carry on individual work. Admission to this course requires approval of the graduate advisor and the graduate coordinator. Formal written report required. May be repeated for credit.

Credit/No Credit

KINS 380. Methods of Teaching Elementary Physical Education. 1.5 Units

Prerequisite(s): KINS 130,

Corequisite(s): KINS 198A

Term Typically Offered: Fall, Spring

KINS 380 is an 8 week course designed for the future physical educator who wishes to deliver an effective, meaningful elementary physical education curriculum to a diverse population of students. Emphasis is on physical education pedagogy - the skills and techniques that successful teachers use to ensure student learning.

KINS 381. Methods of Teaching Secondary Physical Education. 1.5 Units

Corequisite(s): EDTE 366A

Term Typically Offered: Fall, Spring

An 8 week course, KINS 381 is designed for the future physical educator who wishes to deliver an effective meaningful physical education curriculum to a diverse population of students. Emphasis is on physical education pedagogy - the skills and techniques that successful teachers use to ensure student learning.

KINS 500. Culminating Experience. 1 - 4 Units

Prerequisite(s): Advanced to candidacy. Completion of KINS 211 or concurrent enrollment.

Term Typically Offered: Fall, Spring

Completion of a thesis or project under the direction of a department committee.

BS in Kinesiology (Athletic Training)

Program scheduled for Discontinuation, please contact the Department of Kinesiology (p. 640) for further details.

BS in Kinesiology (Exercise Science)

Units required for Major: 60

Units required for Health Fitness/Strength Conditioning Specialist

Option: 60

Units required for Clinical Exercise & Rehabilitation Specialist Option: 60

Total units required for BS: 120

Program Description

This concentration has two options: 1) Health Fitness/Strength Conditioning and 2) Clinical Exercise & Rehabilitation. The Health Fitness/Strength Conditioning option prepares students for graduate work in the areas of exercise and sport science, as well as for careers in personal training, cardiac rehabilitation, wellness, fitness consulting in business/industry and health clubs, and other paramedical and health related fields. The Clinical Exercise & Rehabilitation option provides students with in-depth science-based coursework which meets the prerequisite requirements for most Physical Therapy, Occupational Therapy, and other health related professional preparation programs. Admission to professional preparation programs is competitive and it is critical that students work closely with an assigned advisor to plan coursework.

Note: Students graduating with a **BS in Kinesiology—Exercise Science Concentration** will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Pre-Major Requirements

Freshman or transfer students interested in the BS Exercise Science Concentration Kinesiology Major are admitted as Pre-Exercise Science Concentration Kinesiology Major students.

To change to a BS Exercise Science Concentration Kinesiology major, Pre-major students are required to complete the following grade and course requirements and submit a Declaration of Major/Concentration to the Kinesiology Department Office along with transcript copies.

1. An overall GPA of 2.0.
2. Completion of the **Pre-Major required courses** with a "C-" or better. Only first and second attempts will be considered.

Minimum Grade Requirement

All courses counted for the Exercise Science Concentration must be completed with a "C-" or better.

Program Requirements

Code	Title	Units
Pre-Major Required Courses (17 Units)		
BIO 10	Basic Biological Concepts ¹	3
BIO 22	Introductory Human Anatomy	4
CHEM 1A	General Chemistry I ¹	5
or CHEM 6A	Introduction to General Chemistry	
CHEM 1B	General Chemistry II	5
or CHEM 6B	Introduction to Organic and Biological Chemistry	
Required Upper Division (30 Units)		
BIO 131	Systemic Physiology	4
KINS 151	Kinesiology	3

KINS 151A	Biomechanics	3
KINS 152	Physiology Of Exercise	3
KINS 152A	Fundamentals of Exercise Programs	3
KINS 152S	Energy Production & Sports Performance	3
KINS 144	Analysis of Weight Training & Muscular Fitness	2
KINS 153	Cardiovascular Testing and Exercise Prescription	3
KINS 156	Care Of Athletic Injuries	3
KINS 158	Motor Learning	3

Specialist Options (13 Units)

Select one of the following specialist options: 13

Health Fitness/Strength Conditioning Specialist Option

Clinical Exercise & Rehabilitation Specialist Option

Total Units 60

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Health Fitness/Strength Conditioning Specialist Option

In prior consultation with an exercise science advisor, a minimal of 13 units from the recommended list of courses below are required in addition to the core courses above:

Code	Title	Units
Select a minimum of 13 units from the following:		13

KINS 120	Strength and Conditioning	
KINS 122B	Cardiopulmonary Resuscitation	
KINS 132	Planning, Designing and Managing a Fitness Center	
KINS 136	Sport And Aging	
KINS 151B	Biomechanics II	
KINS 152B	Exercise Physiology of Women	
KINS 152C	Prolonged Exercise	
KINS 152D	Blood Lactate and Exercise	
KINS 160	Sport and Exercise Psychology	
NUFD 10	Nutrition And Wellness	
NUFD 113	Nutrition And Metabolism	
PHYS 5A	General Physics: Mechanics, Heat, Sound ¹	
STAT 1	Introduction to Statistics ¹	

Total Units 13

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Clinical Exercise & Rehabilitation Specialist Option

In prior consultation with an exercise science advisor, a minimal of 13 units from the recommended list of courses below are required in addition to the core courses above:

Code	Title	Units
Select a minimum of 13 units from the following:		13

BIO 39	Microbiology for Allied Health Students	
BIO 106	Genetics: From Mendel to Molecules	
BIO 122	Advanced Human Anatomy	
BIO 123	Neuroanatomy	
BIO 130	Histology	

BIO 132	Neurophysiology	
BIO 133	Cardiovascular, Respiratory and Renal Physiology	
CHEM 20	Organic Chemistry Lecture--Brief Course	
CHEM 161	General Biochemistry	
KINS 122B	Cardiopulmonary Resuscitation	
KINS 151B	Biomechanics II	
KINS 153C	Cardiac Rehabilitation & Exercise Electrocardiography	
KINS 154A	Principles and Techniques in a Clinical Setting	
NUFD 10	Nutrition And Wellness	
NUFD 113	Nutrition And Metabolism	
NURS 14	Pharmacology	
PT 130	Pathophysiology	
PHYS 5A	General Physics: Mechanics, Heat, Sound ¹	
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	
PSYC 150	Psychological Aspects of Aging	
	or PSYC 168 Abnormal Psychology	
STAT 1	Introduction to Statistics ¹	

Total Units 13

¹ Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
------	-------	-------

Area A: Basic Subjects (9 Units)

A1 - Oral Communication	3
A2 - Written Communication	3
A3 - Critical Thinking	3

Area B: Physical Universe and Its Life Forms (0-6 Units)

B1 - Physical Science ²	0
B2 - Life Forms ²	0
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4 - Math Concepts ³	0-3

B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ⁴ 3

Area C: Arts and Humanities (12 Units)

C1 - Arts	3
C2 - Humanities	3
C1/C2 - Area C Course	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.	3

Area D: The Individual and Society (12 Units)

Area D Course	3
Area D Course	3
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements.	3

Area E: Understanding Personal Development (0-3 Units)

Area E Course ⁵	0 - 3
Total Units	33-42

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² Required in Major; also satisfies GE.
- ³ Department offers students a "select from the following option" within the Specialist Options:
- If student chooses to take STAT 1, they will meet Area B4.
- ⁴ Department offers students a "select from the following option" within the Specialist Options:
- If student chooses to take FACS 113, they will meet Area B5.
- ⁵ Department offers students a "select from the following option" within the Specialist Options:
- If student chooses to take FACS 10, they will meet Area E.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>
Note: Students with a declared major of BS in Kinesiology (Exercise Science) are exempt from the Foreign Language Graduation Requirement.

BS in Kinesiology (Physical Education)

Units required for Major: 57

Total units required for BS: 120

Program Description

The physical education concentration is designed with two options: the first option, Physical Education Teacher Education (PETE), prepares students for a teaching career in physical education. The student who completes the program in physical education will have the breadth and depth of knowledge regarding developmentally appropriate physical education. The PETE option provides students with the coursework for both subject matter content and pedagogy for teaching physical education at the K-12 level. Students who choose this option will then have the opportunity to attain their Single Subject Physical Education California Teaching Credential, an additional two semester program through the Department of Teacher Education at Sacramento State.

The second option, Sport Studies, prepares students for a career in a variety of movement settings, other than the traditional physical education teaching career. These movement settings include club and high school athletics, intercollegiate athletics, and professional athletics, in the fields of coaching, conditioning, and administration. The Sport Studies option does not meet the standards for subject matter preparation and the Sport Studies student would need to complete additional coursework to qualify for admission to pursue the Physical Education Teaching Credential at Sacramento State and other institutions.

The student who completes the PETE or Sport Studies option will understand the aesthetics of movement and human performance and the meaningfulness of physical activity in lifelong learning. Additionally, the student will gain knowledge of the historical and philosophical factors that relate to performance, fitness and wellness.

Note: Additional units may be required to meet the Sacramento State foreign language requirement.

Minimum Grade Requirement

All courses listed must be completed with a grade of "C" or better.

Program Requirements

Code	Title	Units
Required Core (13 Units)		
BIO 30	Anatomy & Physiology - Brief Course	4

KINS 144	Analysis of Weight Training & Muscular Fitness	2
KINS 151	Kinesiology	3
KINS 152	Physiology Of Exercise	3
KINS 153	Cardiovascular Testing and Exercise Prescription	3
KINS 156	Care Of Athletic Injuries	3
KINS 194A or KINS 195A	Assigned Field Experience in Kinesiology Directed Field Experience in Kinesiology	2
Total Units		28

Credential in Adapted Physical Education Specialist

Units required for Credential: 21

Program Description

The Credential in Adapted Physical Education Specialist is intended that the courses in this specialty be taken in addition to or concurrent with the courses required for the Single Subject Teaching Credential in Physical Education.

Prerequisite Requirements

For students who are not Physical Education Teaching Concentration Majors

Code	Title	Units
BIO 22	Introductory Human Anatomy	4
HLSC 136	School Health Education	2
KINS 130 or KINS 172	Elementary Physical Education Curriculum and Content Movement Education	3
KINS 151	Kinesiology	3
KINS 151D	Applied Kinesiology and Biomechanics	3
KINS 158	Motor Learning	3

Program Requirements

Code	Title	Units
Required Courses (22 Units)		
EDSP 230	Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges	3
EDSP 230B	Positive Behavior Supports for Students with Mild, Moderate, and Severe Behavioral Challenges Lab	1

KINS 171	Adapted Physical Education: Basic Skill/Fitness Activities and Assessment	3
KINS 176	Perceptual Motor Development	3
KINS 177	Introduction to Adapted Physical Education	3
KINS 179	Adapted Physical Education: Program Planning	3
KINS 194E	Assigned Internship in Adapted Physical Education	3
RPTA 118	Recreation Therapy Facilitation Techniques	3
Total Units		22

Minor in Coaching

Units required for Minor: 19-20

Program Description

Kinesiology is an academic area of study concerned with the art and science of human movement.

Program Requirements

Code	Title	Units
KINS 150	Exercise and Sport Physiology	3
KINS 156	Care Of Athletic Injuries	3
Select one of the following:		3
KINS 110	Women and Sport	
KINS 137	Sociology Of Sport	
KINS 160	Sport and Exercise Psychology	
ATIC Coaching Series Courses		4
KINS Analysis Series Courses		2 - 3
Select 4 units from the following:		4
KINS 156A	Emergency Response	
KINS 194D	Assigned Field Experience in Coaching	
Total Units		19-20

Note: Substitutions can be made with permission of Department Chair.

Minor in Supplementary Authorization in Physical Education

Units required for Minor: 18

Program Description

This minor will fulfill the California Commission on Teacher Credentialing requirements for a supplementary authorization to teach Introductory Physical Education, K-9.

Program Requirements

Code	Title	Units
KINS 138	Teaching Strategies in Physical Education	3
KINS 142	Professional Activities II - Creative Movement and Dance	3
KINS 172	Movement Education	3
Select one of the following:		3
KINS 145	Pro Act III - Team Sports	
KINS 150	Exercise and Sport Physiology	

KINS 176	Perceptual Motor Development	
KINS 177	Introduction to Adapted Physical Education	
Select two of the following:		5 - 6
KINS 141	PRO ACT I - Dual Sports	
KINS 144	Analysis of Weight Training & Muscular Fitness	
KINS 146	PRO ACT IV Individual Sports	
KINS 148	ProAct V - Nontraditional Games and Sports	
KINS 149	Professional Activities of Health and Skill Related Fitness	
Select one of the following:		2 - 3
KINS 131	Secondary Physical Education Curriculum	
KINS 134	History and Philosophy of Physical Education and Sport	
KINS 135	Assessment Strategies in Physical Education	
KINS 137	Sociology Of Sport	
KINS 160	Sport and Exercise Psychology	
Total Units		19-21

MS in Kinesiology (Exercise Science)

Total units required for the MS: 30, including 19 units for concentrations (see below).

Program Description

The graduate program leading to the Master of Science degree in Kinesiology is designed to expand the students' knowledge and to augment their qualifications for leadership in their chosen profession.

The objectives of the program are to increase the students' breadth and depth of knowledge relative to the discipline of Kinesiology; to provide the opportunity for students to engage in scholarly activity that includes creative and analytical thinking, interpreting, evaluating and reporting published research, designing and conducting research; and to provide a focus of study that will enhance career commitment and allow for experiences that will lead to continued self-development and growth.

Admission Requirements

For students *with an undergraduate major* in Kinesiology, admission to the MS program as a classified graduate student requires:

- an overall GPA of 2.8 or 3.0 in the last 60 semester units; and
- upper division statistic course (e.g., EDS 140 or equivalent).

Students who have deficiencies in admission requirements which can be removed by specific additional preparation may be admitted to unclassified or conditionally classified graduate status for the purpose of removing deficiencies. Coursework taken to qualify for classified graduate status is in addition to and not counted toward the master's program. While completing admission deficiencies, students may, if they possess the necessary prerequisites, enroll also in degree coursework, but no more than 6 units as an unclassified student or 12 units as a conditionally classified student can be applied toward the MS degree. Students must remove all admission deficiencies before being considered for classified status.

Students with deficiencies in admission requirements are requested to submit additional documentation in support of their application. These materials may include:

- GRE or GMAT scores;
- a letter stating reasons for pursuing graduate study in Kinesiology;
- a copy of recent research paper and/or a creative project; and
- letters of recommendation that speak specifically to academic ability.

Students applying for admission to the Kinesiology graduate program who **do not have a degree in Kinesiology**, are required to take a minimum of 20 specified units in Kinesiology. These students should see the graduate coordinator or a graduate advisor for details.

Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center, Room 215 (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- two letters of recommendation.

For more admissions information and application deadlines please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant. Upon admission, the student will select a graduate advisor.

Note: An 11-unit core of courses is required of all students; seven units of required courses and four units that are earned through the completion of a thesis or project. The thesis or project is required of all candidates for the Master of Science in Kinesiology. The courses in the core are designed to focus on an advanced study of the knowledge which is of common interest and concern to all graduate students pursuing a degree in Kinesiology. Within the remaining 19 units, the student is focused in an area of special interest by selecting a concentration: Exercise Science or Movement Studies. Each concentration includes a set of required courses and a specified number of elective units.

Note: Six semester units of graduate work taken at other accredited institutions may be approved by the Graduate Coordinator or the student's graduate advisor. Prerequisite units, units taken for undergraduate majors/minors, and units taken to qualify for fully classified graduate status, will not be counted for graduate credit. Only rarely are undergraduate Kinesiology courses approved for graduate credit. A maximum of six elective units may be taken in upper division undergraduate courses with advisor approval. A maximum of four units of graduate Practicum or Directed Individual Study may be taken for degree credit with advisor approval.

Minimum Units and Grade Requirements for the Degree

Units required for the MS: 30, including 19 units for concentrations (see below).

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. The procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

This application must be filed no later than the semester prior to enrolling in KINS 211. Advancement to Candidacy forms are available on the Office of Graduate Studies website. See the Department's graduate coordinator for more information about this process.

Program Requirements

Code	Title	Units
Required Courses (7 Units)		
KINS 209	Graduate Studies in Kinesiology	3
KINS 210	Research Methods in Kinesiology	3
KINS 211	Research Seminar	1
Culminating Requirement (4 Units)		
KINS 500	Culminating Experience ¹	4
Concentrations (19 Units)		
Select one of the following concentrations:		19
Exercise Science Concentration		
Movement Studies Concentration		
Movement Studies/Strength Condition Option		
Movement Studies/Sports Psychology Option		
Movement Studies/Sport Pedagogy Option		
Total Units		30

¹ The first time the student registers for KINS 500, he/she must also register for KINS 211. During this semester, the student develops his/her proposal with assistance from others in the seminar, the seminar professor and the student's committee. When the proposal is completed, formal written and oral presentations are made to the seminar with the student's committee in attendance. If the student does not complete the proposal and have it approved, he/she must enroll and attend KINS 211 another semester.

Exercise Science Concentration (19 units)

Code	Title	Units

Total Units		19

MS in Kinesiology (Movement Studies)

Total units required for the MS: 30, including 19 units for concentrations (see below).

Program Description

The graduate program leading to the Master of Science degree in Kinesiology is designed to expand the students' knowledge and to augment their qualifications for leadership in their chosen profession.

The objectives of the program are to increase the students' breadth and depth of knowledge relative to the discipline of Kinesiology; to provide the opportunity for students to engage in scholarly activity that includes creative and analytical thinking, interpreting, evaluating and reporting published research, designing and conducting research; and to provide a focus of study that will enhance career commitment and allow for experiences that will lead to continued self-development and growth.

Admission Requirements

For students *with an undergraduate major* in Kinesiology, admission to the MS program as a classified graduate student requires:

- an overall GPA of 2.8 or 3.0 in the last 60 semester units; and
- upper division statistic course (e.g., EDS 140 or equivalent).

Students who have deficiencies in admission requirements which can be removed by specific additional preparation may be admitted to unclassified or conditionally classified graduate status for the purpose of removing deficiencies. Coursework taken to qualify for classified graduate status is in addition to and not counted toward the master's program. While completing admission deficiencies, students may, if they possess the necessary prerequisites, enroll also in degree coursework, but no more than 6 units as an unclassified student or 12 units as a conditionally classified student can be applied toward the MS degree. Students must remove all admission deficiencies before being considered for classified status.

Students with deficiencies in admission requirements are requested to submit additional documentation in support of their application. These materials may include:

- GRE or GMAT scores;
- a letter stating reasons for pursuing graduate study in Kinesiology;
- a copy of recent research paper and/or a creative project; and
- letters of recommendation that speak specifically to academic ability.

Students applying for admission to the Kinesiology graduate program who **do not have a degree in Kinesiology**, are required to take a minimum of 20 specified units in Kinesiology. These students should see the graduate coordinator or a graduate advisor for details.

Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center, Room 215 (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- two letters of recommendation.

For more admissions information and application deadlines please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant. Upon admission, the student will select a graduate advisor.

Note: An 11-unit core of courses is required of all students; seven units of required courses and four units that are earned through the completion of a thesis or project. The thesis or project is required of all candidates for the Master of Science in Kinesiology. The courses in the core are designed to focus on an advanced study of the knowledge which is of common interest and concern to all graduate students pursuing a degree in Kinesiology. Within the remaining 19 units, the student is focused in an area of special interest by selecting a concentration: Exercise Science or Movement Studies. Each concentration includes a set of required courses and a specified number of elective units.

Note: Six semester units of graduate work taken at other accredited institutions may be approved by the Graduate Coordinator or the student's graduate advisor. Prerequisite units, units taken for undergraduate majors/minors, and units taken to qualify for fully classified graduate status, will not be counted for graduate credit. Only rarely are undergraduate Kinesiology courses approved for graduate credit. A maximum of six elective units may be taken in upper division undergraduate courses with advisor approval. A maximum of four units of graduate Practicum or Directed Individual Study may be taken for degree credit with advisor approval.

Minimum Units and Grade Requirements for the Degree

Units required for the MS: 30, including 19 units for concentrations (see below).

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. The procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

This application must be filed no later than the semester prior to enrolling in KINS 211. Advancement to Candidacy forms are available on the Office of Graduate Studies website. See the Department's graduate coordinator for more information about this process.

Note: Student teaching, extension courses, undergraduate fieldwork, and 300-numbered methods or workshop courses may not be applied to the MS program requirements.

Please see the Department Web site for the most current program requirements.

Single Subject Credential in Physical Education K-12

Program Description

Blended Credential Option students must formally apply to the Teacher Preparation Program for acceptance into the credential option. A separate application and requirements are required for admission to the student teaching phase. Consult a Physical Education Concentration Advisor for details.

Program Requirements

Code	Title	Units
EDTE 471A		
EDTE 471B		
KINS 198A	Seminar in Physical Education - Elementary	2
KINS 198B	Seminar in Physical Education - Secondary	1
Total Units		3

Note: The following must be attained before student teaching can begin:

- Standard First Aid Certification;
- Current CPR Certification; and
- Receive **passing scores** on the California Basic Educational Skills Test (CBEST).

Subject Matter Program Athletic Training

Program Description

Athletic Training students interested in teaching must meet the Commission on Teacher Credentialing standards prior to entrance into a credential program. Courses to meet standards can be taken concurrently with the Athletic Training courses.

Program Requirements

Note: The program is currently under review by the Commission on Teacher Credentialing and students are strongly encouraged to consult the Program Director for appropriate coursework.

Nursing

College of Health and Human Services

School of Nursing Mission and Vision

The School of Nursing (SON) prepares nurses to lead diverse individuals, families, and communities in achieving optimal health through nursing science, collaborative practice, advocacy, and service.

The School of Nursing transforms health care through innovative nursing education, community partnerships, and policy engagement. We believe that the SON serves its students and the society at large by creating an environment in which faculty and students pursue the knowledge of nursing practice guided by the following core values:

- caring;
- integrity;
- advocacy;
- collaboration;
- inclusion;
- equity; and
- leadership.

Degree Programs

BS in Nursing (Pre-Licensure) (p. 668)

MS in Nursing (p. 672)

RN-BSN and ADN-BSN Collaborative Track (p. 673)

School Nurse Credential (p. 675)

Special Teaching Authorization in Health (STAH) (p. 675)

Programs Descriptions

The baccalaureate program consists of a four-year curriculum of lower and upper division coursework. There are two (2) years of General Education including prerequisites and two (2) years of clinical nursing. The time to complete the prerequisites may increase the time to complete the degree. The Nursing program content prepares competent professional practitioners of nursing who will help meet the changing health care needs of society.

The School of Nursing offers two pathways for students who start their nursing education in a non-baccalaureate program to earn a

bachelor's degree (BSN). These pathways are: an RN-BSN Traditional 15-Week Semester track and an Associates Degree in Nursing (ADN) to BSN Collaborative track. Both tracks are designed to be completed in 12-15 months if attending full-time; the RN-BSN track has a part-time attendance option. Scheduling of program offerings and hybrid (mostly online) classes will provide maximum flexibility and the opportunity for self-directed study.

The Master of Science in Nursing is designed to prepare registered nurses with baccalaureate degrees for roles in nursing education, community, adult clinical roles, and credentialed school nurses. The curriculum emphasizes the systematic study of professional nursing practice and preparation for leadership roles. The program is designed for nurses currently employed in hospitals, long term care facilities, health agencies and educational institutions who require graduate preparations to qualify for present positions of greater responsibility and complexity. Scheduling of program offerings and hybrid (mostly online) classes will provide maximum flexibility and the opportunity for self-directed study.

Accreditation

California State University, Sacramento is fully accredited by the Western Association of Schools and Colleges (WASC).

The baccalaureate degree in nursing program and master's degree in nursing program at California State University, Sacramento are accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The specific purposes of the baccalaureate program are to: 1) provide a program of study which includes the developing theory and practices of nursing leading to a Bachelor of Science degree with a major in Nursing, 2) prepare a generalist in nursing practice who is able to utilize the nursing process to meet the health care needs of the community, and 3) provide the student with a base for graduate study.
- In the baccalaureate program, students are provided with a variety of learning experiences both on and off campus. Examples of clinical facilities used in the Sacramento and surrounding areas include acute care hospitals, skilled nursing and extended care facilities, outpatient clinics, schools, and community health and social service agencies.
- Admission to ADN to BSN Collaborative track is restricted to students currently in good standing and actively enrolled in one of the community college nursing programs; American River, Sacramento

City, Sierra College. Pre-requisite courses must be met prior to admission.

- Students are encouraged to participate in the California Nursing Students' Association (CNSA) as they pursue their academic studies. In their fourth semester of clinical nursing coursework, students are eligible for membership in Zeta Eta, the local chapter of Sigma Theta Tau, International Honor Society for Nursing.
- The Sacramento State program in professional nursing is approved by the California State Board of Registered Nursing. The baccalaureate degree in nursing program and the master's degree in nursing program at California State University, Sacramento are accredited by the Commission on Collegiate Nursing Education (<http://www.ccnaccreditation.org>).
- The student satisfactorily completing the baccalaureate program is awarded a Bachelor of Science degree in Nursing and is eligible to apply for licensure by the California Board of Registered Nursing. Graduates are also eligible to apply for a Public Health Certificate. For the RN-BSN and the ADN to BSN Collaborative students, there is a clinical elective course which, along with community health theory, allows the student to apply to the California Board of Registered Nursing for a Public Health Nursing certificate.
- Graduation from programs leading to licensure, credentialing, or certification eligibility does not guarantee that students will obtain a license, credential, or certification. Licensure, credentialing, or certification requirements are set by agencies that are not controlled by, or affiliated with, the CSU and requirements can change at any time. For example, licensure, credentialing, or certification requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure, credentialing, or certification requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure, credentialing, or certification requirements. Information concerning licensure, credentialing, or certification requirements are available from Sara Niekamp, Office Manager, at 916/278-6714 or sara.niekamp@csus.edu. Mailing address: 6000 J Street, Sacramento, CA 95819-6096. Physical address: 7667 Folsom Boulevard, Sacramento, CA 95826.

Career Possibilities

Registered Nurse (RN, BSN or RN, MSN): Hospital, e.g., Medical, Surgical, Emergency Room, Operating Room, Pediatrics, Obstetrics, Mental Health, Critical Care, Oncology, Rehabilitation · Community Health · Home Health · Extended Care · Physician's Office · Clinics and Industry · Advanced Practice (MS) roles: Educator · Nurse Administrator · School Nurse · Advanced Clinical Role

NURS 10. Health Care: Issues and Delivery Systems. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Explores the relationships between social, political and economic systems, and the health care and delivery systems currently operational in the U.S. today. Provides a format to debate current biomedical issues and explores crosscultural health practices. Lecture three hours.

NURS 14. Pharmacology. 2 Units
Prerequisite(s): Entry level physiology course, such as BIO 25 or BIO 26
Term Typically Offered: Fall, Spring

Basic principles of pharmacology with a focus on pharmacokinetics, pharmacodynamics and related therapeutic implications for major drug categories. May be taken by pre-nursing or non-nursing students. Lecture two hours.

NURS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provides students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

NURS 53. Paramedic Skills Part 1. 2 Units
Prerequisite(s): Admission to the Paramedic program
Corequisite(s): NURS 51
Term Typically Offered: Fall, Spring

Part 1 of foundational ALS skills content for pre-hospital care in the Emergency Medical System (EMS). Participants apply theoretical knowledge of Advanced Life Support in skills lab and simulated patient care experiences. Students will practice assessment and intervention of psychomotor skills for Advanced Life Support (ALS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Cardiac Life Support (PALS) and International Trauma Life Support (ITLS).

NURS 54. Paramedic Skills Part 2. 3 Units
Prerequisite(s): Admission to the Paramedic program, NURS 51 & NURS 53
Corequisite(s): NURS 52
Term Typically Offered: Fall, Spring

Part 2 of foundational ALS skills content for pre-hospital care in the Emergency Medical System (EMS). Participants apply theoretical knowledge of Advanced Life Support in skills lab and simulated patient care experiences. This is the skills section of NURS 52. Students will practice assessment and intervention of psychomotor skills for Advanced Life Support (ALS), Advanced Cardiac Life Support (ACLS), Pediatric Advanced Cardiac Life Support (PALS) and International Trauma Life Support (ITLS).

NURS 111. Introduction to Professional Nursing. 3 Units
Prerequisite(s): Admission to Nursing program or instructor permission
Term Typically Offered: Fall, Spring

Provides a conceptual base for the practice of professional nursing. The changing and expanding roles of the professional nurse in the health care delivery system are explored, with an emphasis on professional behavior, ethics, evidence-based practice and informatics. Lecture three hours.
Note: may be repeated for credit

NURS 112. Nursing Care Of Adults. 5 Units
Prerequisite(s): Admission to the Nursing Program
Corequisite(s): NURS 111, NURS 113
Term Typically Offered: Fall, Spring

Introduction and application of nursing concepts in meeting health needs of adults. Emphasis is placed on health promotion and disease management across the adult life span. Lecture three hours; laboratory six hours

Note: May be repeated for credit

NURS 113. Professional Nursing Communication, Assessment and Skills. 4 Units**Prerequisite(s):** Admission to nursing program**Corequisite(s):** NURS 111 and NURS 112**Term Typically Offered:** Fall, Spring

Apply nursing practice concepts in assessment, skills, and professional communication in the context of laboratory scenarios and field experiences across the lifespan. Laboratory twelve hours.

NURS 119. Mental Health Nursing for the LVN 30-Unit Option. 4 Units**Prerequisite(s):** Microbiology with a lab, Physiology with a lab, and California licensure as a Vocational Nurse.**Corequisite(s):** Nurs 123.**Term Typically Offered:** Fall, Spring

Theoretical basis for the nursing care of individuals who require nursing intervention to achieve and maintain mental health through adaptive processes. The course includes a supervised practicum which incorporates therapeutic modalities. A variety of psychodynamic theories related to anxiety, interpersonal relationships, crisis intervention, and group process are discussed.

NURS 120. Nursing Application of Research and Critical Analysis.**3 Units****Prerequisite(s):** NURS 111, NURS 112, NURS 113 or instructor permission. GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI), Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Evaluation and application of research to nursing practice. Emphasis is placed on application of evidence to improve quality and safety in healthcare and advance nursing practice. Develop an understanding of the humanities and diverse cultures through the lens of nursing practice. Application of a critical framework of sociocultural, historical, and economic perspectives to analyze scholarly inquiry of health and healthcare.

NURS 123. Nursing Families in Complex Illness. 6 Units**Prerequisite(s):** NURS 111, NURS 112 and NURS 113; or instructor permission.**Term Typically Offered:** Fall, Spring

Provides students with the opportunity to learn and apply nursing concepts through the care of individuals and families experiencing complex illness across the adult lifespan. The focus is on skill development and the synthesis of data from multiple sources to formulate nursing interventions. Lecture three hours; laboratory six hours.

Note: May be repeated for credit**NURS 129. Mental Health Nursing. 5 Units****Prerequisite(s):** NURS 111, NURS 112 and NURS 113; or instructor permission**Term Typically Offered:** Fall, Spring

Provides an overview of multidimensional factors, perspectives, and approaches associated with mental health across the lifespan. Mental health concepts and interventions are applied across multiple settings. Lecture three hours; laboratory six hours.

Note: May be repeated for credit**NURS 133. Leadership and Management for the LVN to RN. 2 Units****Prerequisite(s):** Microbiology with a lab; Physiology with a lab; NURS 119 and NURS 123**Corequisite(s):** NURS 137 and NURS 138**Term Typically Offered:** Fall, Spring

This course is designed to present leadership and management skills for the Licensed Vocational Nurse transitioning to the Registered Nurse role. The principle and processes of administration, management, and supervision will be discussed within an organizational framework. Lecture two hours.

NURS 136. Nursing Laboratory for the Childbearing Family. 1 Unit**Prerequisite(s):** NURS 120, NURS 123 and NURS 129, or instructor permission**Corequisite(s):** NURS 137**Term Typically Offered:** Fall, Spring

Application of skills and assessment in the care of the childbearing family and women experiencing reproductive health changes across the lifespan.

Credit/No Credit

NURS 137. Nursing the Childbearing Family. 5 Units**Prerequisite(s):** NURS 120, NURS 123 and NURS 129 or instructor permission.**Corequisite(s):** NURS 136.**Term Typically Offered:** Fall, Spring

Application of nursing concepts in the care of the childbearing family and women experiencing reproductive health changes across the lifespan. Lecture three hours; laboratory six hours.

Note: May be repeated for credit**NURS 138. Nursing the Childrearing Family. 5 Units****Prerequisite(s):** NURS 120, NURS 123, NURS 129, or instructor permission**Corequisite(s):** NURS 139**Term Typically Offered:** Fall, Spring

Introduction and application of nursing concepts in meeting health needs of the child from birth through adolescence. Emphasis is placed on health promotion and disease management within the context of the family and applied across multiple settings. Lecture three hours; laboratory six hours.

Note: May be repeated for credit

NURS 139. Nursing Laboratory for the Childrearing Family. 1 Unit

Prerequisite(s): NURS 120, NURS 123, NURS 129, or instructor permission

Corequisite(s): NURS 138

Term Typically Offered: Fall, Spring

Acquisition of knowledge and practice using tools and techniques for assessing the child and the family in a variety of settings. Laboratory three hours.

Note: May be repeated for credit

Credit/No Credit

NURS 143. Leadership and Management in Nursing Practice. 3 Units

Prerequisite(s): NURS 136, NURS 137, NURS 138, and NURS 139, or instructor permission.

Term Typically Offered: Fall, Spring

Integration of leadership and management principles to promote health across the lifespan and care settings. Application of leadership and management principles in the examination of organizational structures, processes, and approaches to quality and safety concepts in health care systems and practice environments. Emphasis will be placed on career development and transition to professional practice.

Note: May be repeated for credit. Lecture three hours.

NURS 144. Community Health Nursing. 5 Units

Prerequisite(s): NURS 136, NURS 137, NURS 138, and NURS 139, or instructor permission.

Term Typically Offered: Fall, Spring

Contemporary role of the community health nurse is presented within a public health framework, emphasizing the concept of community as client. Presents nursing interventions related to groups and aggregates identified as high risk for the development of health problems. Clinical experience is provided across community settings. Lecture and clinical hours.

Note: May be repeated for credit

NURS 145. Clinical Leadership and Professional Role Development. 6 Units

Prerequisite(s): NURS 136, NURS 137, NURS 138, NURS 139 or instructor permission.

Corequisite(s): NURS 144.

Term Typically Offered: Fall, Spring

The purpose of this culminating senior practicum is to facilitate the transition of the nursing student into the role of a professional BSN graduate nurse. The course will integrate the theoretical and clinical nursing concepts acquired throughout the curriculum into a precepted senior practicum. Students will apply principles of clinical nursing, nursing management and nursing leadership in a selected clinical setting. Credit/No Credit

NURS 160. Human Sexuality. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Designed to explore the physiological, sociological, and psychological components of human sexuality in a sufficiently detailed manner so that the myth and confusion enveloping this needlessly hypersensitive subject can be dispelled. Hopefully, students will be able to integrate these components in a meaningful pattern into their own lives and will be not only better able to understand and accept their own sexual needs and behavior but also, at the same time, will be more accepting and understanding of persons whose sexual attitudes and behavior might differ from their own. Lecture three hours.

NURS 167. Women's Health. 3 Units

Term Typically Offered: Fall, Spring

Designed for people seeking knowledge about women's health, women's health risks, and the delivery of traditional and non-traditional medical interventions for the maintenance of health and management of illness. Covers the physiological and psychological components of women's health. The leading acute and chronic illnesses which affect women are introduced. Discussions include: means of sustaining a wellness lifestyle; identification, management and consultation for acute and chronic illness; normal physiological life changes and adaptations to aging; mind/body connection in the control of health and illness; pharmacology and drug therapy for women; health management for infants and children; access and control of care for women in traditional and non-traditional health settings; and research in women's health. Lecture-discussion three hours.

NURS 168. The Brain and Gender-Related Differences. 3 Units

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5

Term Typically Offered: Fall, Spring

Gender-related differences which are mediated by the brain are examined from the theoretical framework of evolution. The place of molecular genetics, hormone physiology, neural function, biomedical research, human development, personality theory and research, and crosscultural research are studied in an attempt to understand the processes that affect sex differences. Gender-related differences in normal and abnormal behavior resulting from chronic and acute disease, and pathological states, will be introduced. The student should acquire the fundamentals of a scientific understanding of gender-related differences between humans, and an appreciation of the unique role the brain plays in the mediation of these differences.

NURS 170. Foundations for Evidence-Based Nursing Practice. 3 Units

Prerequisite(s): Acceptance into the RN to BSN Program or instructor permission.

Term Typically Offered: Fall, Spring

This course provides an overview of nursing research and application to practice. Students will identify components of evidence-based practice and develop skills in critiquing research and in professional writing.

NURS 171. Transitional Concepts: The Baccalaureate Nurse. 6 Units
Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course expands students' knowledge of theories, concepts, and social issues which have implications for nursing practice. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.

NURS 171A. Transitional Concepts: The Baccalaureate Nurse Role. 3 Units

Prerequisite(s): NURS 170, may be taken concurrently
 This course expands students' knowledge of theories, concepts, and social issues which have implications for the role of the nurse in any professional setting. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.

NURS 171B. Transitional Concepts: The Client Lifespan. 3 Units

Prerequisite(s): NURS 170, may be taken concurrently
 This course expands students' knowledge of theories, concepts, and social issues which have implications for health across the lifespan. Assignments and experiences are designed to transition the RN to the baccalaureate level of proficiency.

NURS 173. Theoretical Foundations for Leadership and Management. 6 Units

Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course provides the theoretical foundations for leadership and management across multiple settings. Theories related to the principles and processes of leadership and management will be applied to select practice experiences.

NURS 173A. Theoretical Foundations for Leadership. 3 Units

Prerequisite(s): NURS 170, may be taken concurrently
 This course provides the theoretical foundations for leadership across multiple settings. Theories related to the principles and processes of leadership will be applied to select practice experiences.

NURS 173B. Theoretical Foundations for Management. 3 Units

Prerequisite(s): NURS 170, may be taken concurrently
 This course provides the theoretical foundations for management across multiple settings. Theories related to the principles and processes of management will be applied to select practice experiences.

NURS 174. Community Health Nursing: Concepts and Practice. 4 Units

Prerequisite(s): NURS 170, may be taken concurrently.
Term Typically Offered: Fall, Spring

This course presents the role of the community health nurse within a public health framework and examines public health systems, policies, and socioecological factors that shape the health of individuals, groups, and communities. Students will be introduced to principles of population health, epidemiology, disease prevention, and health promotion, to plan community health nursing interventions.

NURS 174C. Community Health Nursing: Clinical Elective. 2 Units
Prerequisite(s): NURS 170, NURS 174, both may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer

In this course students will integrate and apply knowledge of population-based nursing and evaluate the role of the community health nurse in various systems. Students will provide care to individuals, families, or communities within a public health framework. This course meets the California BRN clinical requirements for the Public Health Nurse Certificate.

Note: NURS 174C is an elective course that is only required for students wishing to apply for the California Board of Registered Nursing Public Health Nurse Certificate. Students not planning to apply for a Public Health Nurse Certificate must petition for an exemption from this clinical course. Students who are granted exemption for NURS 174C will only complete 44 units.

NURS 178. Culminating Project. 3 Units

Prerequisite(s): Completion of 19 units in the program or instructor permission.
Term Typically Offered: Fall, Spring

Students will apply leadership and management principles within a community to determine a defined need or issue, identify goals to meet or solve the issue, and complete the culminating project based on previous course work.

NURS 179. Professional Communication and Reasoning Development. 3 Units

Prerequisite(s): NURS 170, may be taken concurrently; and either department permission or GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

This hybrid course is designed to expand communication and leadership skills among RN to BSN students in their professional practice. Students will develop an understanding of the humanities and diverse cultures through the lens of nursing practice. Specifically, students will reflect on how culture and experience determines the human condition which is reflected in their animating ideas and values towards health and healthcare.

NURS 194. Work Study in Nursing. 1 - 12 Units

Prerequisite(s): NURS 120, NURS 123 and NURS129; School of Nursing faculty recommendation; Instructor permission; Minimum 2.5 GPA
Corequisite(s): Enrollment in undergraduate nursing program
Term Typically Offered: Fall, Spring

Nursing students participate in clinical nursing experiences that reflect the realities of the healthcare environment and have opportunity to master learned skills.

Note: May be repeated for credit

Credit/No Credit

NURS 195. Field Study. 1 - 6 Units

Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Guided study and experience in a specified nursing area.
 Credit/No Credit

- NURS 199. Special Problems.** 2 Units
Term Typically Offered: Fall, Spring
- Individual projects and directed reading for students who are competent to assume independent work. Admission to this course requires approval of faculty member under whom the independent work is to be conducted.
 Credit/No Credit
- NURS 209. Advanced Role Development in Nursing.** 3 Units
Prerequisite(s): Admission to Graduate Program.
Term Typically Offered: Fall, Spring
- Students will explore emerging issues in healthcare and consider how these issues shape their practice. Through examination of current issues and challenges confronting the nursing profession, analysis of the literature, examination of personal values, rights, and obligations, and the application of ethical decision-making processes, students' ability to engage in ethical discussions will be enhanced, as will their ability to provide professional leadership.
Note: Satisfies the GVAR requirement.
- NURS 210. Research as the Foundation for Advanced Nursing.** 3 Units
Prerequisite(s): Admission to the graduate program for nursing
Term Typically Offered: Fall, Spring
- Participants will explore nursing research as the foundation for clinical and organizational decision making. Content will include understanding key elements of evidence-based practice, developing skills to access data bases in nursing and healthcare, evaluation of evidence in nursing including published nursing research, problem identification within the practice setting, and incorporation of evidence in initiating change and improving clinical practice.
- NURS 213. Seminar in Organizational and Systems Leadership.** 3 Units
Prerequisite(s): NURS 209 and NURS 210, and 21 units of graduate coursework.
Term Typically Offered: Fall, Spring
- This course requires that students operationalize knowledge, skills, and dispositions acquired in previous courses. Students will identify contemporary healthcare issues and apply graduate core competencies to guide nursing praxis in the planning, implementation and evaluation of quality healthcare for individuals, families, groups and communities.
- NURS 213C. Seminar in Specialized Nursing Processes: School Nursing I.** 4 Units
Prerequisite(s): Admission to School Nurse Credential Program.
Term Typically Offered: Fall, Spring
- Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school age children (pre-k through age 22), and professional management of school nursing services. Emphasis is on the foundations of school nursing practice, legal and ethical issues, special education services, and management of episodic illness and chronic health conditions.
- NURS 213D. Seminar in Specialized Nursing Processes: School Nursing II.** 4 Units
Prerequisite(s): NURS 213C.
Term Typically Offered: Fall, Spring
- Provision and application of concepts needed for nursing practice in the schools. Focuses on the three major competencies of school nursing practice: providing health and wellness services, direct client care services for school age children (pre-k through age 22), and health service program coordination and management. Emphasis is on ethical issues and federal laws addressing education for students with disabilities, health promotion programs, issues of adolescent health, and behavior assessment and management including considerations for students receiving special education services.
- NURS 214. Educational Program Development in Nursing.** 3 Units
Prerequisite(s): NURS 209 and NURS 210 or instructor's permission
Term Typically Offered: Fall, Spring
- Introduction to curriculum development and instructional design concepts in preparation for the role of educator in an educational institution or health care setting. Emphasis will be on instructional design, instructional strategies, and measurement of learner outcomes. Lecture three hours.
Note: FOCUS alternates between K-12 and higher education.
- NURS 214C. Educational Program Development in Nursing II.** 3 Units
Prerequisite(s): NURS 214B.
Corequisite(s): NURS 294C.
Term Typically Offered: Fall, Spring
- Introduction to curriculum development and instructional design concepts in preparation for the role of educator in an educational institution or health care setting. Continues emphasis on instructional design, related to curriculum development and implementation, and to program evaluation. Lecture three hours.
Note: FOCUS alternates between K-12 and higher education.
- NURS 215. Community Health Services and Policy.** 3 Units
Prerequisite(s): NURS 209 and NURS 210, or instructor's permission
Term Typically Offered: Fall, Spring
- Examines issues of health policy, financing, and the organization and delivery of health services at the local, national, and global levels. Health promotion will be defined and the influence of community on the individual, group, and family's health will be explored. Epidemiological data bases will be identified. These data bases will be critiqued and used to develop a health promotion program.
- NURS 216. Vision and Scoliosis Screening.** 1 Unit
Term Typically Offered: Fall, Spring
- Theory and practice of detecting idiopathic scoliosis, and visual disorders resulting from inadequate refraction, ocular mal-alignment, and color deficiency in the school setting. The pathophysiology of said conditions will be presented, the nursing role delineated, and opportunities for paired screening practice provided.
- NURS 230. Advanced Concepts in Pathophysiology.** 3 Units
Term Typically Offered: Fall, Spring
- Seminar designed to promote the understanding and application of fundamental disease processes and physiological principles in cross-clinical settings for the purpose of improving nursing assessments and patient care management. Lecture three hours.

NURS 231. Pharmacology for Advanced Practice. 3 Units

Term Typically Offered: Fall, Spring

Conceptual and systematic study of pharmacodynamics, pharmacokinetics, pharmacoeconomics and therapeutic implications for healthcare practitioners. Efficient use of traditional and web based pharmaceutical resources is encouraged. Designed to meet Board of Registered Nursing requirements for prescriptive privileges. Requires familiarity with disease process. Lecture three hours.

NURS 232. Advanced Physical Assessment Across the Lifespan. 3 Units

Prerequisite(s): NURS 209 and NURS 210.
Term Typically Offered: Fall, Spring

Advanced concepts and skills in health and physical assessment are essential to the clinical decision making and caring process for the nurse in advanced practice and leadership roles. The emphasis is on eliciting an accurate and thorough history considering the client's multiple dimensions, development of advanced physical examination skills and the development of documentation skills to provide a database for continuous improvement of nursing practice.

Note: Availability of a stethoscope is required. Individual practice outside of class is required.

NURS 232A. Advanced Physical Assessment: Infant, Child, Adolescent. 3 Units

Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Seminar designed to present techniques related to the physical assessment, in the school or home setting, of the child, age birth through 18 years. Emphasis is on the common morbidities and mortalities of these age groups including interrelationship of the physical, emotional and socioeconomic causes of health problems and illnesses. Availability of an otoscope and stethoscope required. Individual practice required outside of class. Lecture three hours.

NURS 293. Practicum in Organizational and Systems Leadership. 3 Units

Prerequisite(s): NURS 209, NURS 210, NURS 214, NURS 230, NURS 231, NURS 232, and instructor permission.
Corequisite(s): NURS 213.
Term Typically Offered: Fall, Spring

This course provides supervised field experience to provide the student with an opportunity to apply theoretical concepts from NURS 213 in a clinical practice setting focusing on the care of adult clients. The emphasis of this experience will be to application of graduate core competencies to guide leadership in nursing praxis in the planning, implementation and evaluation of quality healthcare for individuals, families, and groups.
Credit/No Credit

NURS 293D. Practicum in Specialized Nursing Processes: School Nursing. 4 Units

Prerequisite(s): NURS 213C.
Corequisite(s): NURS 213D.
Term Typically Offered: Fall, Spring

Application of a planned sequence of supervised clinical experiences in one or more California public school districts offering nursing services to infants, children and adolescents for the purpose of developing a clinical leadership role in school nursing. Focuses on the three major competencies of school nursing practice: providing health and wellness services, providing direct client care services for school age-children (pre-k through age 22, including students with special health care needs), and professional management of school nursing services.
Credit/No Credit

NURS 294. Practicum in Educational Program Development in Nursing. 3 Units

Prerequisite(s): NURS 214, may be taken concurrently.
Term Typically Offered: Fall, Spring

Opportunity for analysis and synthesis of concepts of management and leadership in an educational setting while practicing the role of a nursing educator.
Credit/No Credit

NURS 295. Field Study. 1 - 6 Units

Term Typically Offered: Fall, Spring

Experiences in an off-campus facility are provided for the continued development of clinical or functional role skills. Each student spends 45 hours per unit. Field study is not designed to be used in lieu of regularly scheduled practicums. Enrollment in NURS 295 requires permission of a faculty member who will serve as sponsor and coordinator of the experience.
Credit/No Credit

NURS 299. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual research, study, and directed reading in an area not directly covered in the Division's core courses, role preparations or electives. Students pursue a particular course of study on a one-to-one basis with a faculty member. Educational objectives must be specified in advance.
Credit/No Credit

NURS 500. Culminating Experience. 3 Units

Prerequisite(s): Advanced to candidacy for the Master's degree and must be in the final semester of the program.
Term Typically Offered: Fall, Spring

The Culminating Experience is in the form of a comprehensive examination. The comprehensive examination is an original scholarly paper that reflects an in-depth problem-solving proposal or a business proposal. Students that wish to do a thesis or project as the culminating experience must petition the Division of Nursing Graduate Committee and will be approved on an individual basis.

BS in Nursing (Pre-Licensure)

Units required for Pre-Clinical: 29

Units required for Major: 61

Total units required for BS: 120

Program Description

The School of Nursing provides excellent and innovative undergraduate and graduate nursing education designed to meet the needs of a diverse community. Students are prepared for roles in nursing as clinicians, advocates, researchers, educators, and leaders in the changing health care system.

Admission Requirements

Admission to the Sacramento State baccalaureate Nursing program is a two-step process:

1. admission to the University and
2. admission to the Clinical Nursing program

Prospective first-time freshmen and transfer students, who will not complete certain Clinical Nursing prerequisites by the time they enroll, may apply for University admission at any time up to the regular application deadline. They will be considered "expressed interest" until they enter the Clinical Nursing program.

Up to 80 traditional pre-licensure students are admitted to the *clinical* portion of the baccalaureate Nursing program each semester. A competitive selection process has been established since applications exceed program space in the traditional pre-licensure program. Newly admitted students are selected from among candidates who meet the prerequisite requirements and follow the supplemental application procedures described below. Continuing Sacramento State, transfer students, and second baccalaureate degree applicants are given equal consideration in the selection process for available new seats.

The clinical portion of the nursing program is open only to those who can satisfy the California residence requirements. Students who qualify for Deferred Action for Childhood Arrivals (DACA) status, AB 540 status, or military fee waiver are eligible.

Admission Advising

Group advising meetings are scheduled throughout the academic year. Times of these meetings and program publications are available at on the School of Nursing website (<http://www.csus.edu/hhs/nrs>).

Application Procedures - Nursing Pre-Licensure BSN Program

Clinical Nursing Selection Criteria

- The GPA of the pre-clinical and corequisite courses completed at the time of application, the results of the ATI Test of Essential Academic Skills (TEAS), and the optional criteria, if selected by the student, will be used to determine program admission.
- Applicants who satisfy the minimum admission point total are selected from a rank ordering or total points assigned to different GPA and TEAS result levels as well as points assigned to the optional criteria.

Prerequisites Requirements - Nursing Pre-Licensure BSN

The following prerequisites are to be met by time of enrollment unless otherwise stated.

- Completion of six of the eight specific courses listed under pre-clinical courses. One science and one non-science pre-clinical course may be in progress at the time of application. All eight pre-clinical courses must be completed in December when applying for a spring term; June for fall. When applying for a fall term, coursework

completed in summer will not be considered or accepted. Pre-Clinical courses are acceptable regardless of date completed, but current knowledge is essential.

- Applicants are encouraged to complete the corequisite courses prior to admission. Introductory Psychology, Nutrition, and Life Span Human Development must be completed prior to the second semester of the nursing program. A societal-cultural patterns course must be completed prior to licensure and graduation.
- A minimum science GPA of 3.0 is required on the pre-clinical science courses completed at the time of application (anatomy, physiology, microbiology, and chemistry). One science course may be in progress at the time of application.
- A minimum GPA of 3.3 is required on the pre-clinical and corequisite courses completed at the time of application. Applicants may omit up to two grades from their GPA calculation providing they have a minimum of eight grades total, including 2 science grades. For example, an applicant applying with nine grades may omit one grade; an applicant with 10-12 grades may omit up to two grades. All pre-clinical and corequisite courses must be completed with a grade of "C-" or better. Up to 50 admission points will be assigned based on the applicant's GPA (see School of Nursing website for details).
- All GPAs will be calculated using standard weights, not varying institutional unit assignments. Science lab courses will be weighted four (4) units; all other coursework will be weighted three (3) units. Pluses and minuses are not considered.
- Only three (3) of the twelve (12) grades in the Nursing GPA calculation may be repeats; only one (1) of the three (3) repeats may be a science course. A third attempt will not be considered. Courses over seven (7) years old are acceptable, but not included in repeat count.
- Completion of the ATI, Test of Essential Academic Skills (TEAS). A minimum score of 75.0% is required. The test must be taken no later than March 1 for the following fall semester or October 1 for the following spring semester. The test may be taken three times within a five-year period preceding the Supplemental Nursing Application deadline. The highest score will be used. Points will be assigned based on the applicant's total score from the best testing. See School of Nursing website for current point details and amounts.
- A minimum admission point total is required. The total will be based on current applicant pool statistics and posted on the Nursing website.

Optional points for admission (see School of Nursing website for current point details and amounts) **are awarded in the following categories:**

Bilingual Skills in Spanish, Chinese, South East Asian Languages, Indian Languages (Hindi, Punjabi), Tagalog, Russian, Farsi, Arabic, or American Sign Language will be determined by:

- completion of an oral proficiency examination;
- transcript documenting instruction provided in approved language.

Health-Related Work Experience. Candidates may receive points for documentation of paid or volunteer work in acute, long term, clinical, or community settings which involves direct human-client/patient interactions. Hours may be combined from multiple locations. Points are awarded for the following increments of time:

- 50 hours – minimum possible points
- 75 hours
- 100 hours – maximum possible points

Background. Details can be found on the nursing website.

- **First-Generation College Student.** Neither parent graduated with an associate or higher degree.
- **Environmental Background:** Attending a disadvantaged high school.

GPA Calculation: Candidates may receive points for having no course omits for total GPA calculation and/or not having a repeat of a pre- or co-requisite course. Details can be found on the nursing website.

Additional Information

Health Requirements

Students admitted to the Clinical Nursing program are required to have specified immunizations by the Student Health Center or a private physician prior to beginning nursing coursework. Drug and alcohol screening is required before beginning clinical nursing (see below for details). Health insurance is required. Complete information on health requirements for nursing students may be secured from the School of Nursing.

Technology Competence

To be successful in the curriculum, students must be able to demonstrate competency in computer technology, such as word processing, use of the Internet, e-mail, and database searches. Clinical nursing students are required to own a personal computer.

Professional Liability Insurance, Automobile Insurance, Transportation and CPR Certification

All students enrolled in clinical laboratory courses in the nursing major must pay the University fee for professional liability insurance, provide proof of automobile insurance, and have a means of transportation to extended campus facilities. Professional liability insurance is mandatory prior to beginning clinical experiences. CPR certification for medical professionals is required as a prerequisite to the program and recertification must be maintained according to the requirements of the American Heart Association.

Background Checks

Nursing students must satisfactorily complete all clinical, community, and laboratory requirements in order to progress in courses, progress in the program, and to receive their degree. In order to make an initial determination as to whether there are any current barriers to admitted students qualifying for and/or participating in clinical programs, all admitted students must submit to a background check and drug screen under the direction of the nursing program **prior to enrollment**. Requirement for drug screening is consistent with the California Board of Registered Nursing guidelines for safe nursing practice. Results of background checks and drug screens will be provided to the nursing program's affiliating clinical agencies (partner agencies) which must approve the background checks and drug screens in order for students to qualify for participation in and fulfillment of the required clinical component. Students will be advised of any identified issues impacting their eligibility for participation in required clinical and community placements prior to making their decision to enroll. The full policy concerning background checks and drug screening in the nursing program can be found on the School of Nursing website (<http://www.csus.edu/hhs/nrs>). Students should also be aware that the State of California Board of Registered Nursing makes determinations for licensure based in part on background checks. Students who have concerns regarding their background checks should review the BRN website (<http://www.rn.ca.gov/enforcement/convictions.shtml>) for

information related to initial licensure before determining whether to apply and/or enroll in the nursing program.

Challenge by Examination

The School of Nursing offers the opportunity of petitioning certain nursing courses for credit by examination. Students who by reason of special study, experience or training, already possess the skills, knowledge, and attitudes which are the objectives of the given course, may petition for credit by examination. A maximum of 30 units may be challenged. Licensed Registered Nurses, Licensed Vocational Nurses, and Corpsmen are examples of students who may be eligible to challenge specific nursing courses. Additional information may be obtained by referring to "Credit by Examination" in this catalog or by contacting the School of Nursing.

Note: Students graduating with a Pre-Licensure BS Program in Nursing (traditional) will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Program Requirements

Code	Title	Units
Required Pre-Clinical Courses (29 Units)		
Select a two-semester Anatomy and Physiology series with an in-class lab such as:		8
BIO 25 & BIO 26	Human Anatomy and Physiology I Human Anatomy and Physiology II	
Select a Microbiology course with an in-class lab such as:		4
BIO 39	Microbiology for Allied Health Students	
Select a Chemistry course; general, inorganic, organic, or integrated (with associated lab if required at the Institution where the course was taken) such as:		5
CHEM 6A	Introduction to General Chemistry	
Select an introductory college composition (any GE Area A2) course such as:		3
ENGL 5	Accelerated Academic Literacies ¹	
Select an Oral Communication (any GE Area A1) course such as:		3
COMS 4	Introduction to Public Speaking ¹	
Select a statistics (any GE Area B4) course such as:		3
STAT 1	Introduction to Statistics ¹	
Select a Critical Thinking (any GE Area A3) course such as:		3
COMS 2 or ANTH 4	Argumentation ¹ Language, Culture, and Critical Thinking	
Required Clinical Nursing Courses (61 Units)		
<i>At any time prior to 2nd semester</i>		
CHDV 30	Human Development (or similar course in Life Span Human Development) ¹	3
NUFD 10	Nutrition And Wellness	3
PSYC 2	Introductory Psychology (or similar course in Introductory Psychology) ¹	3
<i>First Semester Courses</i>		
NURS 111	Introduction to Professional Nursing	3
NURS 112	Nursing Care Of Adults	5
NURS 113	Professional Nursing Communication, Assessment and Skills	4
<i>Second Semester Courses</i>		

NURS 120	Nursing Application of Research and Critical Analysis  ^{1,2}	3
NURS 123	Nursing Families in Complex Illness	6
NURS 129	Mental Health Nursing	5

Third Semester Courses

NURS 136	Nursing Laboratory for the Childbearing Family	1
NURS 137	Nursing the Childbearing Family	5
NURS 138	Nursing the Childrearing Family	5
NURS 139	Nursing Laboratory for the Childrearing Family	1

Fourth Semester Courses

NURS 143	Leadership and Management in Nursing Practice	3
NURS 144	Community Health Nursing	5
NURS 145	Clinical Leadership and Professional Role Development	6

Additional Graduation Requirements (3 Units)

Select a course in societal-cultural patterns at any time before graduation and prior to certification of eligibility for state licensure such as:

ANTH 2	Introduction to Cultural Anthropology ¹	
ANTH 101	Cultural Diversity  ¹	
ANTH 144	Contemporary American Culture in Anthropological Perspective	
ANTH 186	Culture and Poverty   ¹	
ETHN 11	Introduction to Ethnic Studies  ¹	
ETHN 100	Ethnic America   ¹	
HRS 161	Multicultural America  ¹	
SOC 1	Principles of Sociology ¹	

The following additional courses are recommended but not required:

NURS 160	Human Sexuality	
NURS 168	The Brain and Gender-Related Differences ^{1,2}	

Total Units 93

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² No more than nine units from courses bearing the same designation as student's major may be applied to General Education requirements (e.g., NURS). Freshman Seminar does not, in any case, count against the 9 unit overlap.

When possible, students are encouraged to apply their pre-clinical courses to General Education requirements.

Notes:

- Applicants with a prior baccalaureate degree are exempt from General Education requirements.
- In addition to the major in Nursing, students may also complete a minor in another discipline. There are numerous disciplines which would enrich the baccalaureate degree in Nursing (e.g., Gerontology). Information on minors can be obtained by contacting the department of interest.
- Satisfactory completion of the program requires a grade of "C" or better in every nursing course. The policy in the School of Nursing permits one repeat of only *one* failed course. However, opportunity to repeat a failed nursing course will depend upon the number of students enrolled in the course, the availability of clinical and community experiences (if applicable), and a successful petition to

repeat from the School of Nursing. Course repeats are not permitted to increase grade.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects		
A1	Oral Communication ²	0
A2	Written Communication ²	0
A3	Critical Thinking ²	0
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. ²	0
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (6-9 Units)		
	Area D Course	3
	Area D Course	3
	Area D Course ²	0
	Area D Course - Take upper-division course to complete Area & upper division requirements. ³	0 - 3
Area E: Understanding Personal Development		
	Area E Course ²	0
Total Units		21-24

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department recommends ANTH 101, ANTH 186, or ETHN 100 to meet upper division Area D.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (6 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI) ²	0
Graduation Requirements (required by Sacramento State) (6 Units)		
	English Composition II	3

Race and Ethnicity in American Society (RE)	3
Foreign Language Proficiency Requirement ³	0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

MS in Nursing

Total units required for the MS: 33

Program Description

The Master of Science in Nursing is traditionally designed to prepare registered nurses with baccalaureate degrees for advanced roles in nursing. The hybrid curriculum (refer to the University's e-Learning policy (<http://www.csus.edu/umannual/acadaff/fsd00010.htm>)) emphasizes the systematic study of professional nursing practice and preparation for educational and leadership roles. The program is designed for nurses who require graduate preparations to qualify for positions of greater responsibility and complexity.

Admission into programs leading to licensure, credentialing, or certification eligibility does not guarantee that students will obtain a license, credential, or certification. Licensure, credentialing, or certification requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure, credentialing, or certification requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure, credentialing, or certification requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure, credentialing, or certification requirements. Information concerning licensure, credentialing, or certification requirements are available from Sara Niekamp, Office Manager, at 916/278-6714 or sara.niekamp@csus.edu. Mailing address: 6000 J Street, Sacramento, CA 95819-6096. Physical address: 7667 Folsom Boulevard, Sacramento, CA 95826.

Admission Requirements

To be considered for admission to the Master of Science in Nursing, applicants must:

- have a Bachelor of Science degree in nursing from an accredited institution, OR an RN from an accredited associate's degree program and a baccalaureate degree in a discipline related to nursing;
- have a GPA of 3.0 in the last 60 units of undergraduate nursing coursework;

- have an overall GPA of 3.0 (If the GPA requirement is unmet, the student may apply for conditional classification and demonstrate academic ability by enrolling in, and successfully passing with a "B" (83%) or better, NURS 209 and NURS 210 in one attempt);
- possess a current unencumbered RN license in California; and
- submit a statement of purpose that outlines the goals and objectives for the pursuit of graduate study.

Professional Liability and Automobile Insurance and Health Requirements

All students enrolled in clinical laboratory courses in the Master's program must pay the fee for the University professional liability insurance. Professional liability insurance is mandatory prior to beginning clinical experiences. Proof of automobile insurance may be required for clinical experience. The student admitted to the Master's program is required to have specified immunizations by the Student Health Service or a private physician prior to beginning nursing coursework. Drug and alcohol and background screening is required. Health insurance is required. Complete information on health requirements may be secured from the School of Nursing.

Technology Competence

To be successful in the curriculum, students must be able to demonstrate competency in computer technology, such as word processing, use of the Internet, e-mail, and database searches.

Admission Procedures

Prospective graduate students, including Sacramento State graduates, must file the following materials as a complete admission packet with the Office of Graduate Studies:

- an online application for admission;
- one set of official transcripts from all colleges and universities attended, *other than Sacramento State*;

For more admissions information and application deadlines please visit the School of Nursing website (<http://www.csus.edu/gradstudies>).

Notice of the decision regarding admission will be mailed to the applicant after files are complete and reviewed. Students will be assigned a faculty advisor at the beginning of the school year.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 33

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. The procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program, with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available online at www.csus.edu/gradstudies/forms (<http://www.csus.edu/gradstudies/forms>), Office of Graduate Studies. The student fills out the form after planning a degree program in consultation with his/her advisor. The completed form is then returned to the Office of Graduate Studies for approval. Students may not register for the Culminating Requirement until they have advanced to candidacy.

Program Requirements

Code	Title	Units
Core Courses (15 Units)		
NURS 209	Advanced Role Development in Nursing 	3
NURS 210	Research as the Foundation for Advanced Nursing	3
NURS 213	Seminar in Organizational and Systems Leadership	3

Culminating Requirement (3 Units)		
NURS 500	Culminating Experience	3
Total Units		33

RN-BSN (Track A) and ADN-BSN Collaborative Track

Units required for Major: 44-46

Total units required for BSN: 120

Program Description

The School of Nursing offers two pathways for students who start their nursing education in a non-baccalaureate program to earn a bachelor's degree (BSN).

These two pathways are:

1. RN-BSN Track A - Traditional 15-Week Semester track
2. ADN to BSN Collaborative track

Both tracks are designed to be completed in 12-15 months if attending full time. Nursing courses are offered in hybrid format (<http://www.csus.edu/umanual/acadaff/fsd00010.htm>). Depending on the student's need, General Education courses may be hybrid or on campus. The programs include a Community/Public Health clinical course (NURS 174C). Completion of the full program of study, which includes NURS 174C, qualifies students to apply for a Public Health Nurse (PHN) certificate from the the California Board of Registered Nursing. The School of Nursing faculty strongly recommend NURS 174C for all students as it is an important part of the BSN education and offers opportunities for diverse nursing roles and employment. Students may petition to be exempt from taking NURS 174C as part of their program; petitions must be received no later than 45 days before the start of their program.

Admission Requirements

RN-BSN Track A - Traditional 15-Week Semester Track:

- Prerequisite courses must be completed prior to admission;
- Must possess a current valid California registered nursing license;
- Applicants who are currently employed as a Registered Nurse and/or completed all prerequisites will have priority for admission;
- Must have a cumulative GPA of 2.6 upon completion of qualifying nursing program
 - In the event all candidates meet all eligibility requirements, supplemental written or oral communication may be required;
- Admission to Sacramento State;
- Completed RN to BSN online application;
- Official transcripts of all institutions attended;
- Program admission is contingent upon meeting requirements outlined and passing drug screening and background check.

ADN to BSN Collaborative Track:

- Students currently in good standing and actively enrolled in once of the community college nursing programs at American River, Sacramento City, or Sierra College are eligible to apply;
- Prerequisite courses must be completed prior to admission;
- Must have a cumulative GPA of 2.6 or higher
 - In the event all candidates meet all eligibility requirements, supplemental written or oral communication may be required;
- Admission to Sacramento State;
- Completed RN to BSN online application;
- Official transcripts of all institutions attended;
- Program admission is contingent upon meeting requirements outlined and passing drug screening and background check;

Note: Students must pass the NCELX RN examination and possess a current valid Registered Nurse License to enroll in third semester. Students not passing the examination may apply for the RN-BSN Program Track A and have units transferred.

Required Prerequisite Requirements

The prerequisite classes listed below must have all been completed prior to admission with a grade of "C" or better and are used as part of the 70 transferable units:

- A two-semester Anatomy and Physiology series with an in-class lab (8 units) such as:

- BIO 25 Human Anatomy and Physiology I **AND** BIO 26 Human Anatomy Physiology II or Systemic Physiology **OR** BIO 22 Introductory to Human Anatomy **AND** BIO 131 Systemic Physiology
- A Microbiology course with a lab (4 units) such as:
 - BIO 39 Microbiology for Allied Health Students **OR** BIO 139 General Microbiology
- Chemistry as approved by campus; general, inorganic, or integrated; with associated lab (if applicable at the institution where the course was taken) (5 units) such as:
 - CHEM 5 Chemistry for Nurses **OR** CHEM 6B Introduction to Organic and Biological Chemistry
- A Written Communication course (any GE Area A2 course) (3 units) such as:
 - ENGL 5 Accelerated Academic Literacies
- An Oral Communication course (Any GE Area A1 course) (3 units) such as:
 - COMS 4 Introduction to Public Speaking
- A Statistics course (3 units) such as:
 - STAT 1 Introduction to Statistics
- A Critical Thinking course (any GE Area A3 course) (3 units) such as:
 - COMS 2 Argumentation **OR** ENGL 1C Critical Thinking and Writing

In Progress Policy: Classes may be in progress prior to admission. Unofficial transcripts may be submitted for in-progress classes but must be replaced with official transcripts.

Minimum Grade Requirement

Satisfactory completion of the program requires a grade of "C" or better in every nursing course.

Program Requirements

Code	Title	Units
Prerequisite Courses (37 Units) ¹		
BIO 25 & BIO 26	Human Anatomy and Physiology I & Human Anatomy and Physiology II	8
OR		
BIO 22 & BIO 131	Introductory Human Anatomy & Systemic Physiology	8
BIO 39 or BIO 139	Microbiology for Allied Health Students & General Microbiology	4
CHEM 5 or CHEM 6B	Chemistry for Nurses ² & Introduction to Organic and Biological Chemistry	5
ENGL 5	Accelerated Academic Literacies ^{2,3}	3
COMS 4	Introduction to Public Speaking ^{2,4}	3
COMS 2 or ENGL 1C	Argumentation ^{2,5} & Critical Thinking and Writing	3
STAT 1	Introduction to Statistics ²	3

¹ To be completed prior to admission.

² Course also satisfies General Education (GE)/Graduation Requirement.

³ Any GE Area A1 (<http://catalog.csus.edu/colleges/academic-affairs/general-education/#text>) course.

⁴ Any GE Area A2 (<http://catalog.csus.edu/colleges/academic-affairs/general-education/#text>) course.

⁵ Any GE Area A3 (<http://catalog.csus.edu/colleges/academic-affairs/general-education/#text>) course.

Code	Title	Units
RN-BSN Track A - Traditional 15-Week and ADN to BSN Collaborative Track Required Upper Division Courses (46 Units)		
NURS 170	Foundations for Evidence-Based Nursing Practice	3
NURS 171	Transitional Concepts: The Baccalaureate Nurse	6
NURS 173	Theoretical Foundations for Leadership and Management	6
NURS 174	Community Health Nursing: Concepts and Practice	4
NURS 174C	Community Health Nursing: Clinical Elective ¹	2
NURS 178	Culminating Project	3
NURS 179	Professional Communication and Reasoning Development ²	3
Nursing NCLEX-RN (National Exam/RN) credit will be awarded in the final semester of the nursing program		19
Total Units		46

¹ NURS 174C is an elective course that is only required for students wishing to apply for the California Board of Registered Nursing Public Health Nurse Certificate. Students not planning to apply for a Public Health Nurse Certificate must be petition for an exemption from this clinical course. Students who are granted exemption for NURS 174C will only complete 44 units.

² Course also satisfies General Education (GE)/Graduation Requirement.

Note:

- Students graduating with a BSN (post-licensure) in Nursing will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.
- Opportunity to repeat nursing courses will depend upon space availability in classroom and clinical placements.
- Total Units Required for BSN (post-licensure program) 120.

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects		
A1	Oral Communication ²	0
A2	Written Communication ²	0
A3	Critical Thinking ²	0
Area B: Physical Universe and Its Life Forms (6-12 Units)		
B1	Physical Science ^{2,3}	0-3
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ^{2,3}	0-3
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (9 Units)		
C1	Arts	3
C2	Humanities	3

C1/C2 - Area C Course	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements. ²	0
Area D: The Individual and Society (12 Units)	
Area D Course	3
Area D Course	3
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)	
Area E Course	3
Total Units	30-36

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students an "OR" option for CHEM 5 or CHEM 6B:
 • If student chooses to take CHEM 5, they will meet Area B1 and Area B3.
 • If student chooses to take CHEM 6B, they will still be required to complete a Area B1 and Area B3.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (6 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI) ²	0
Graduation Requirements (required by Sacramento State) (6 Units)		
	English Composition II	3
	Race and Ethnicity in American Society (RE)	3
	Foreign Language Proficiency Requirement ³	0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of Nursing (all concentrations) in are exempt from the Foreign Language Graduation Requirement.

RN-BSN (Track B)

Program scheduled for Suspension, please contact the School of Nursing (p. 661) for further details.

School Nurse Credential

Units required for Credential: 22-25

Program Description

Students who are eligible for the California School Nurse Services Preliminary Credential from the California Commission on Teacher Credentialing and who meet the graduate program admission criteria may apply to the program. Admission criteria and procedures are similar to those for the MS program except the application and recommendation forms are directed to the School Nurse Program Coordinator. Students are held to the same professional liability and automobile insurance and health requirements as MS students.

Program Requirements

Code	Title	Units
NURS 213C	Seminar in Specialized Nursing Processes: School Nursing I	4
NURS 213D	Seminar in Specialized Nursing Processes: School Nursing II	4
NURS 214	Educational Program Development in Nursing	3
NURS 215	Community Health Services and Policy	3
NURS 216	Vision and Scoliosis Screening	1
NURS 232A	Advanced Physical Assessment: Infant, Child, Adolescent	3
NURS 293D	Practicum in Specialized Nursing Processes: School Nursing	4
Coursework required to become certified as a California school audiometrist		0-3
Total Units		22-25

In addition to the above courses, the Professional Credential for MS candidates requires two years of full-time school nurse experience (or its part-time equivalent).

Special Teaching Authorization in Health (STAH)

Program Description

The STAH option is available to school nurses who wish to position themselves to become faculty of record for health classes within public school districts. The STAH is not required for the school nurse credential but is considered a supplemental credential. Candidates for the STAH must hold a school nurse credential or apply for both credentials at the same time. The STAH authorizes nurses to provide health education instruction beyond that of periodic guest presentations (e.g., Family Life Education) and allows school administrators to utilize nurses in the capacity of health educators through the provision of direct and regular health instruction.

Program Requirements

Completion of nine units of educational pedagogy including a supervised student (practice) teaching experience and passing of the CBEST (California Basic Educational Skills Test).

Code	Title	Units
NURS 214C	Educational Program Development in Nursing II	3
NURS 294	Practicum in Educational Program Development in Nursing	3

Physical Therapy

College of Health and Human Services

Program Description

The primary mission of the California State University, Sacramento Doctor of Physical Therapy program is to graduate knowledgeable, effective, adaptable, and reflective physical therapist generalist practitioners and health care leaders. Graduates demonstrate ethical, responsible, professional behavior, are sensitive to cultural and psychosocial differences, use evidence derived from the scientific and professional literature to inform independent judgments to meet patient needs and to advance the profession. They utilize critical and integrative thinking and problem-solving, practice lifelong learning, and provide services that contribute to the optimal health and function of community residents.

Physical Therapy at Sacramento State is one of several professional curricula in the College of Health and Human Services. The program complements others in the College and provides opportunities for scholarship, instructional collaboration, and interaction.

The doctoral curriculum of 3 years, including summers, encompasses didactic instruction, laboratory experience, and clinical education. The clinical component is thirty-six weeks of full-time, off-campus clinical internships.

Degree Program

Doctor of Physical Therapy (p. 684)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Doctor of Physical Therapy is also individually accredited by Commission on Accreditation in Physical Therapy Education (CAPTE).

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and

credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- Following successful completion of both the clinical and regular academic program, students are awarded a Doctor of Physical Therapy and will be eligible to take the National Physical Therapy Licensure Examination.
- The Doctor of Physical Therapy degree program at Sacramento State is fully accredited by the Commission on Accreditation in Physical Therapy Education/APTA. The Commission can be contacted for questions at:
1111 North Fairfax Street
Alexandria, VA 22314-1488
(703) 684-2782

Notes:

- Admission is for fall semester only.
- Classes are offered primarily during daytime hours, and full-time study is required.

Career Possibilities

Hospitals · Ambulatory Care Centers · Private Practice · Sports Medicine Centers · Rehabilitation Centers · Industries · Extended Care Facilities · Home Health Care · Schools · University Teaching and Research · Consulting

<p>PT 130. Pathophysiology. 2 Units Prerequisite(s): BIO 22 or equivalent, BIO 131 or equivalent. Term Typically Offered: Fall, Spring</p>	<p>PT 299. Special Problems. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>Designed to promote the understanding and application of fundamental disease processes in clinical settings. General concepts of disease, including etiology, pathogenesis, morphology, and clinical significance are discussed. General pathophysiology concepts include: cell injury, necrosis, inflammation, wound healing, and neoplasia. These concepts are applied in a systems-oriented approach to disease processes affecting musculoskeletal, cardiopulmonary, renal, nervous, gastrointestinal, immune, hematological, and endocrine systems. Lecture two hours.</p>	<p>Individual projects or directed reading designed for students capable of independent study. Note: Admission requires written approval of instructor and program director. Credit/No Credit</p>
<p>PT 260A. Graduate PT Seminar IA. 1 Unit Prerequisite(s): PT 200, PT 202, PT 204, PT 206, PT 208, PT 220, PT 222, PT 224, PT 225, PT 226, PT 300 and if taken in the spring: PT 227, PT 240, PT 244, PT 245, PT 246, PT 248. Term Typically Offered: Fall, Spring</p>	<p>PT 400A. Clinical Practicum II. 4 Units Term Typically Offered: Fall, Spring</p>
<p>Advanced study and mentoring in foundational and clinical sciences in physical therapy. Students may be chosen to mentor in select courses identified by faculty to be arranged prior to the first class session. Note: Open to Physical Therapy Majors only.</p>	<p>This component of the PT 400 clinical certificate series totals 8 weeks of progressively responsible full-time clinical education in an inpatient, outpatient, long term care, home health care, or pediatric setting under direct supervision of a licensed PT. Students improve, refine and master evaluation and treatment abilities developed during Physical Therapy master's curriculum. Note: Open to Physical Therapy majors only who have successfully completed two years of the master's curriculum and the Clinical Practicum I experience. Credit/No Credit</p>
<p>PT 260B. Graduate Pt Seminar IB. 1 Unit Prerequisite(s): PT 200, PT 202, PT 204, PT 206, PT 208, PT 220, PT 222, PT 224, PT 225, PT 226, PT 227, PT 240, PT 244, PT 245, PT 246, PT 248, PT 300. Term Typically Offered: Fall, Spring</p>	<p>PT 400B. Clinical Practicum III. 4 Units Term Typically Offered: Fall, Spring</p>
<p>Advanced study in foundational and clinical sciences in physical therapy. Students may choose from a selection of current topics to be arranged prior to the first class session. Note: Open to Physical Therapy majors only.</p>	<p>This component of the PT 400 clinical certificate series totals 8 weeks of progressively responsible full-time clinical education in an inpatient, outpatient, long term care, home health care, or pediatric setting under direct supervision of a licensed PT. Students improve, refine and master evaluation and treatment abilities developed during the Physical Therapy master's curriculum. Note: Open to Physical Therapy majors only who have successfully completed two years of the master's curriculum, Clinical Practicum I and II experience. Credit/No Credit</p>
<p>PT 280. Graduate PT Seminar II. 1 Unit Term Typically Offered: Fall, Spring</p>	<p>PT 400C. Clinical Practicum IV. 4 Units Term Typically Offered: Fall, Spring</p>
<p>Presented after the final clinical field experience, will review students' experiences in the clinic and promote reflection on the professional practice of physical therapy. Serves as a review of a variety of physical therapy subjects in preparation for the licensure examination. Students will use computer interactive software to assist with preparation for this standardized national test format. Note: Open to Physical Therapy majors only.</p>	<p>This third component of the PT 400 clinical certificate series totals 8 weeks of progressively responsible full-time clinical education in an inpatient, outpatient, long term care, home health care, or pediatric setting under direct supervision of a licensed PT. <p>PT 295. Physical Therapy Clinical Experience. 1 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>PT 600. Pathokinesiology. 5 Units Prerequisite(s): Open to Physical Therapy majors only. Corequisite(s): BIO 633, PT 602, PT 608, PT 630. Term Typically Offered: Fall, Spring</p>
<p>Supervised clinical affiliation equivalent to two full-time weeks up to six full-time weeks in a physical therapy setting under the direct supervision of a licensed Physical Therapist. Note: Placement is arranged through the Program. Permission of Clinical Coordinator required.</p>	<p>This course will address functional anatomy, surface anatomy with palpation, arthrology, biomechanics, pathologies related to the musculoskeletal and nervous systems. Both normal motion and pathological motion will be addressed. Students will gain competence in surface anatomy and palpation skills.</p>
<p>Credit/No Credit</p>	

- PT 602. Evidence Informed Practice I.** **3 Units**
Prerequisite(s): Open to Physical Therapy majors only.
Corequisite(s): BIO 633, PT 600, PT 608, PT 630.
Term Typically Offered: Fall, Spring
- This course is designed to teach students to critically read and interpret the physical therapy scientific literature. Topics will include research design and statistical testing procedures commonly used in physical therapy. Students will review and critique current physical therapy articles utilizing the research designs and statistical testing procedures being studied.
- PT 604. Principles of Human Movement.** **2 Units**
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 606, PT 614, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring
- This course focuses on developing an understanding of components of human movement under normal and pathological conditions. Content includes the American Physical Therapy Association Model of Practice, models of disablement, contemporary concepts of motor learning and motor control, task analysis, and theories of the recovery of function. The course includes a review of the foundations of neuroanatomy for normal movement.
Note: Open to Physical Therapy majors only.
- PT 606. Therapeutic Measurements and Techniques.** **4 Units**
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 614, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring
- In this course students acquire general physical therapy examination, evaluation and patient handling skills. Students will practice and demonstrate techniques under faculty supervision in the following areas: Measurement of vital signs, manual strength testing, testing of joint range of motion and muscle length, patient positioning, transfer techniques, gait training, use of wheelchairs, and use of assistive devices.
Note: Open to Physical Therapy majors only.
- PT 608. PT/Patient/Professional Interactions.** **2 Units**
Corequisite(s): BIO 633, PT 600, PT 602, PT 630.
Term Typically Offered: Fall, Spring
- The course prepares physical therapy students to learn about themselves, others, and the environment in which they will interact with others as professionals. It addresses professionalism, self-awareness, communication, cultural competence, ethics, documentation, and end-of-life care. This course assists students with transitioning into their professional roles.
Note: Graduate Writing Intensive (GWI) course; open to Physical Therapy majors only.
- PT 614. Neuroscience for Physical Therapy.** **3 Units**
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring
- This course is designed to prepare clinicians to better understand the neurological control of human behavior. A systems approach is used to examine the major anatomical and physiological principles and mechanisms by which the nervous system controls behavior under normal and pathological conditions. Because the course is being taught to health care professionals, clinical correlates of each system will also be presented. One class session is dedicated to presentation of human gross anatomical specimens.
- PT 618. Foundations for Patient Management.** **1 Unit**
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 620, PT 622.
Term Typically Offered: Fall, Spring
- This course introduces the disablement model that forms the conceptual framework for understanding and organizing the practice of physical therapy. The model delineates the possible consequences of disease and injury for the person and society. The course goes on to identify how the model informs the five elements of patient management: Examination, Evaluation, Diagnosis, Prognosis (including Plan of Care), and Intervention. The course will further expand on professionalism introduced in PT 608.
Note: Open to Physical Therapy majors only.
- PT 620. Physical Therapy Interventions I.** **3 Units**
Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630.
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 622.
Term Typically Offered: Fall, Spring
- In this course students learn, practice and demonstrate the clinical application of basic exercise regimes for the prevention of limitations, improvement of functional abilities and the treatment of disorders associated with the neuromuscular, skeletal and cardiopulmonary systems. In addition, the application of motor control principles to exercise and aquatic therapy are addressed.
Note: Open to Physical Therapy majors only.
- PT 622. Evidence Informed Practice II.** **3 Units**
Corequisite(s): PT 604, PT 606, PT 614, PT 618, PT 620.
Term Typically Offered: Fall, Spring
- Designed to build upon the data analysis and research design topics covered in PT 602. Emphasis will be placed on evidence based methodologies currently used in the physical therapy literature evaluating the effectiveness of interventions, the validity of outcome measures, the validity of diagnostic measures, and the identification of prognostic measures.
Note: Open to Physical Therapy majors only. Prerequisite

PT 624. Adult Neuromuscular Patient Management I. 4 Units**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636, PT 638.**Corequisite(s):** PT 625, PT 626, PT 640, PT 646.**Term Typically Offered:** Fall, Spring

This course is first in a three course sequence focused on acquisition and integration of knowledge and skills needed to manage patients with movement dysfunction caused by neurological damage (Referred to in the Guide as Neuromuscular Practice Patterns). Focus is on development and implementation of plans of care based on sound evaluative, treatment and problem-solving skills.

Note: Open to Physical Therapy majors only.**PT 625. Musculoskeletal Patient Management I. 4 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636, PT 638.**Corequisite(s):** PT 624, PT 626, PT 640, PT 646.**Term Typically Offered:** Fall, Spring

This course, the first of three, focuses on acquisition, integration, knowledge and skills involved in developing and implementing a patient management plan for the patient with musculoskeletal dysfunction based on sound evaluative findings. Lectures address etiology, signs and symptoms, medical, surgical, and physical therapy management of musculoskeletal dysfunction. Labs address skill development for performing evaluation and interventions safely and effectively. The course addresses the management of lower extremity dysfunction.

Note: Open to Physical Therapy majors only.**PT 626. Clinical Agents. 3 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636, PT 638.**Corequisite(s):** PT 624, PT 625, PT 640, PT 646.**Term Typically Offered:** Fall, Spring

This course presents theory, demonstration and laboratory practice in physical therapy modalities and techniques including thermal agents, hydrotherapy, ultrasound (US), ultraviolet, diathermy and massage. Theory, demonstration and practice using electrical modalities are included. Case studies will be utilized for decision making in the proper application of modalities based on current research evidence, knowledge of indications, contradictions and physiologic effects.

Note: Open to Physical Therapy majors only.**PT 627. Physical Therapy Educator. 1 Unit****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646.**Corequisite(s):** PT 644, PT 645, PT 648, PT 662, PT 669.**Term Typically Offered:** Fall, Spring

This course presents the role of the physical therapist as health educator. The course introduces teaching and learning theory, learning domains, the identification of learning styles, and teaching strategies to address different learner needs across the life-span. Students will practice instructional formats and prepare and analyze patient education materials. Students will practice applications of appropriate technology for the design of professional presentations. Self-assessment, reflection and peer-assessment are required course components.

Note: Open to Physical Therapy majors only.**PT 630. Pathophysiology. 3 Units****Prerequisite(s):** Admission to the Doctor of Physical Therapy Program.**Corequisite(s):** BIO 633, PT 600, PT 602, PT 608.**Term Typically Offered:** Fall, Spring

This course is designed to promote the understanding and application of fundamental disease processes in clinical settings. General concepts of disease, including etiology, pathogenesis, morphology, and clinical significance are discussed within the context of cases. General pathophysiology concepts include: cell injury, necrosis, inflammation, wound healing and neoplasia. These concepts are applied in a systems-orientated approach to disease processes affecting musculoskeletal, cardiopulmonary, renal, nervous, gastrointestinal, immune, hematological and endocrine systems.

PT 632. Pharmacology for Physical Therapists. 2 Units**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.**Corequisite(s):** PT 634, PT 636, PT 638.**Term Typically Offered:** Fall, Spring

This course provides a study of pharmacological agents and their effects on the musculoskeletal, neuromuscular, cardiopulmonary and integumentary systems. Particular emphasis is placed on recognition of adverse reactions and side effects of various drugs as they affect patients receiving physical therapy.

Note: Open to Physical Therapy Majors only.**PT 634. Diagnostic Imaging for Physical Therapy. 2 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.**Corequisite(s):** PT 632, PT 636, PT 638.**Term Typically Offered:** Fall, Spring

This course provides an overview of imaging techniques commonly used in radiology and their implications to the role of physical therapists in professional practice. The role of imaging techniques in the diagnostic and intervention-planning processes for physical therapists is presented.

Note: Open to Physical Therapy Majors only.**PT 636. Geriatrics/Gerontology for Physical Therapists. 2 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.**Corequisite(s):** PT 632, PT 634, PT 638.**Term Typically Offered:** Fall, Spring

This course explores normal and pathological aging and the implications of both on Physical therapist practice. It will explore the ramifications of aging components of patient management interventions including major practice patterns: musculoskeletal, neuromuscular, cardiopulmonary, and integumentary. It will also explore how aging may impact patient teaching.

Note: Open to Physical Therapy majors only.

PT 638. Health, Wellness and Ergonomics in Physical Therapy. 2 Units**Prerequisite(s):** BIO 633, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630.**Corequisite(s):** PT 632, PT 634, PT 636.**Term Typically Offered:** Fall, Spring

This course presents basic philosophical, historical, psychological and scientific foundations in wellness; reviews cultural forces/theories that affect individuals and society; applies concepts of healthy lifestyle education to reach an understanding of the importance of wellness and to establish an effective and potentially fulfilling lifestyle. Ergonomic concepts as they apply to patient and self (to maintain and prevent future injuries, especially repetitive) will be covered as one preventative strategy.

Note: Open to Physical Therapy majors only.**PT 640. Physical Therapy Interventions II. 3 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636 and PT 638.**Corequisite(s):** PT 624, PT 625, PT 626, PT 640, PT 646, PT 660A.**Term Typically Offered:** Fall, Spring

This course is a continuation of Physical Therapy Interventions I. This course focuses on the presentation of selected topics in acute care and cardiopulmonary Physical Therapy. Students will learn how to perform appropriate and comprehensive examinations, interpret the examination findings as well as design and implement a plan of care based upon the next available evidence.

Note: Open to Physical Therapy majors only.**PT 644. Adult Neuromuscular Patient Management II. 4 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.**Corequisite(s):** PT 627, PT 645, PT 648, PT 662, PT 669.**Term Typically Offered:** Fall, Spring

This course is the second in a three course sequence focused on acquisition and integration of knowledge and skills needed to manage patients with movement dysfunctions caused by neurological damage (Referred to in the Guide as Neuromuscular Practice Patterns). Focus is on development and implementation of plans of care based on sound evaluative findings and evidence of efficacy. Case presentation, video demonstrations, and patient contact is used to develop evaluation, treatment and problem solving skills.

Note: Open to Physical Therapy majors only.**PT 645. Musculoskeletal Patient Management II. 4 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.**Corequisite(s):** PT 627, PT 644, PT 645, PT 648, PT 662, PT 669.**Term Typically Offered:** Fall, Spring

This course, the second of three, focuses on acquisition and integration of knowledge and skills involved in developing and implementing management plans for patients with musculoskeletal dysfunction from sound evaluative findings. Lectures address etiology, signs and symptoms, medical, surgical, and physical therapy management of musculoskeletal dysfunction. Labs address safe and effective evaluation and interventions, specifically joint mobilizations. Joint mobilizations will cover one technique per joint restriction. This course addresses upper extremity and spine dysfunction.

Note: Open to Physical Therapy majors only.**PT 646. Acute Care and Cardiopulmonary Physical Therapy. 2 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636 and PT 638.**Corequisite(s):** PT 624, PT 625, PT 626, PT 640.**Term Typically Offered:** Fall, Spring

This course focuses on the presentation of selected topics in acute care and cardiopulmonary Physical Therapy. The course includes a discussion of common pathologies in the cardiopulmonary system and those associated with an acute care setting, as well as common medical tests, laboratory tests, surgical procedures and pharmacological interventions used with this patient population.

Note: Open to Physical Therapy majors only.**PT 648. Health Care Delivery in Physical Therapy I. 2 Units****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.**Corequisite(s):** PT 627, PT 644, PT 645, PT 662, PT 669.**Term Typically Offered:** Fall, Spring

This course provides a historical overview of health care delivery and financing in the U.S., up to and including the current effects on the delivery of physical therapy care. The continuum of care concept, an overview of national economic policy and the mechanisms for financing physical therapy services will be presented. Administrative topics including human resources, financial management, planning, marketing, patient's rights, and medical records management will be covered.

Note: Open to Physical Therapy majors only.**PT 660A. Graduate Physical Therapy Seminar 1A: Research. 1 Unit****Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 630, PT 632, PT 634, PT 636 and PT 638**Corequisite(s):** PT 624, PT 625, PT 626, PT 640, PT 646**Term Typically Offered:** Fall, Spring

This seminar is the first designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty-directed research projects. Students' activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least 50 hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected seminars in the curriculum.

PT 660B. Graduate Physical Therapy Seminar IB: Research. 1 Unit**Prerequisite(s):** BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.**Corequisite(s):** PT 627, PT 644, PT 645, PT 648, PT 662, PT 669.**Term Typically Offered:** Fall, Spring

This seminar is the second designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty-directed research projects. Students' activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least fifty hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected seminars in the DPT curriculum.

Note: Open to Physical Therapy majors only.

PT 660C. Graduate Physical Therapy Seminar IC: Research. 1 Unit

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 680, PT 690.

Term Typically Offered: Fall, Spring

This seminar is the third designed for advanced study and mentoring in physical therapy research. Students will be participating in faculty directed research projects. Students' activities will vary depending on the faculty member and research project being conducted. Students are required to perform at least 50 hours of activities toward the directed research project to receive credit for this course. This course satisfies one of two requirements for selected in the DPT curriculum.

Note: Open to Physical Therapy majors only.

PT 660D. Graduate Physical Therapy Seminar ID: Electrotherapeutics. 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646.

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662, PT 669.

Term Typically Offered: Fall, Spring

This is a seminar laboratory experience focusing on electrophysiology and electrodiagnostics in physical therapy. The lab will allow students to research and apply evidence-based practice and gain advanced hands-on practice in performing and interpreting the results of electromyographic and nerve conduction velocity testing with clients. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660E. Graduate Physical Therapy Seminar IE: NeuroPediatric Laboratory. 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 680, PT 690.

Term Typically Offered: Fall, Spring

This seminar laboratory experience focuses on pediatric patient management. The lab will allow students to research and apply evidence-based practice and gain advanced hands-on practice in pediatric physical therapy. This course is best suited for students planning a career in pediatric patient management. The course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660F. Graduate Physical Therapy Seminar IF: Adult Neuromuscular Laboratory. 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 646, PT 644, PT 645, PT 648, PT 662, PT 669.

Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 680, PT 690.

Term Typically Offered: Fall, Spring

This seminar laboratory experience focuses on adult neuromuscular patient management. The laboratory will allow students to research and apply evidence-based practice and gain advanced hands-on practice in adult neurorehabilitation. Students will also serve as mentors for the Mock Clinic portion of PT 624. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660G. Certified Strength and Conditioning Specialist (CSCS). 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

Corequisite(s): PT 663, PT 664, PT 665, PT 668

Term Typically Offered: Fall, Spring

This seminar is designed to prepare students to take the Certified Strength and Conditioning Specialist Examination. The seminar covers the topics of exercise physiology, bioenergetics, nutritional factors in performance, resistance, speed, and agility training, endocrine responses to resistance training, exercise testing, and other training considerations. This course satisfies one of two requirements for selected seminars in the curriculum.

Note: Open to Physical Therapy majors only.

PT 660H. Graduate Physical Therapy Seminar H: Cardiovascular Wellness Clinic Experience. 1 Unit

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669.

This elective provides mentored clinical experience for students in the area of cardiovascular well ness. The student will design and implement an evaluation of a volunteer client in a cardiovascular well ness program, develop an individualized plan of care, and monitor the impact of the intervention. A written comprehensive case report will analyze the impact of the interventions on the cardiovascular well ness of the client.

Note: Open to Physical Therapy majors only.

PT 660K. Graduate Physical Therapy Seminar 1K Adv. Biomechanics II. 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630, PT 604, PT 606, PT 614, PT 618, PT 620, PT 622, PT 632, PT 634, PT 636, PT 638, PT 624, PT 625, PT 626, PT 640, PT 696J

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 669, PT 662

This elective is designed to prepare students to run a gait analysis clime in the biomechanics laboratory. The course is one unit of lecture and one unit of lab, and covers the topics of assessment of balance, lower extremity strength assessment, special tests, and running analysis from both the research "gold standard" as well as the clinically feasible perspective with a particular focus on running.

PT 662. Differential Diagnosis in Physical Therapy. 3 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 669.

Term Typically Offered: Fall, Spring

This course focuses on learning and practicing screening techniques for physical therapists to detect medical or other problems for which a referral to a medical doctor or another health care provider is indicated. Students will learn to screen patients for dysfunction in a variety of physiological systems by taking medical history, medication history, performing a risk factor assessment and manual examination, and screening various physiological systems.

Note: Open to Physical Therapy majors only.

PT 663. Integumentary Patient Management. 2 Units

Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 662, 669 and 695A.

Corequisite(s): PT 664, PT 665, PT 668, PT 680, PT 690.

Term Typically Offered: Fall, Spring

This course focuses on the management of patients with integumentary impairments and their related sequelae. Topics include post-surgical management of patients with amputations, prosthetics, and management of the patient with a wound or burn injury. Lecture, case presentation, video demonstrations, and laboratory activities will be used to develop patient management skills.

Note: Open to Physical Therapy majors only.

PT 664. Neuropediatric Patient Management. 2 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669 and PT 695A.

Corequisite(s): PT 663, PT 665, PT 668, PT 680, PT 690.

Term Typically Offered: Fall, Spring

This course is the third part of a three course series focusing on the acquisition and integration of knowledge and skills involved in developing and implementing a treatment plan based on sound evaluative findings for the patient with neurological dysfunction. In this course, the focus is on the pediatric patient with neurological dysfunction. Case presentation, video demonstrations, and actual patient contact will be used to develop evaluation, treatment, and problem-solving skills.

Note: Open to Physical Therapy Majors only.

PT 665. Musculoskeletal Patient Management III. 3 Units

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 669, PT 695A. Corequisite: PT 663, PT 664, PT 668, PT 690.

Term Typically Offered: Fall, Spring

This course builds on the foundational intervention techniques established for management of the patient with musculoskeletal dysfunction in PT 625 and PT 645. It will address additional manual therapy skills and students will apply their developing skills under faculty supervision to patients referred from the Student Health Center. Students will be responsible for patient management of a case load including accurate documentation and submission of patient records to the Student Health Center.

Note: Open to Physical Therapy Majors only.

PT 668. Health Care Delivery in Physical Therapy II. 2 Units

Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 662, 669 and 695A.

Corequisite(s): PT 663, PT 664, PT 665, PT 680, PT 690.

Term Typically Offered: Fall, Spring

In this course, students will have professional practice behavior expectations and requirements previously introduced in other courses reinforced through the review of the American Physical Therapy Association documents: the Standard of Practice for Physical Therapy and the Code of Ethics, as well as the State of California's Physical Therapy Practice Act. Additionally, students will hear from other health care professionals on their expectations of the physical therapist's role on a health care team.

Note: Open to Physical Therapy majors only.

PT 669. Psychosocial Issues in Physical Therapy. 1 Unit

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640 and PT 646.

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662.

Term Typically Offered: Fall, Spring

This course examines psychological and social impact of and reactions to illness and physical disability. Explores elements of the psycho-social dynamics related to disability with a focus on adjustments required of the disabled and the provider. The course addresses social, cultural, personal, and familial factors which impact comprehensive rehabilitation in the clinical setting. Attention will be placed on interpersonal relationships between patients, family, health care providers, and society.

Note: Open to Physical Therapy majors only.

PT 680. Graduate Physical Therapy Seminar II.**1 Unit**

Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 662 and 669.

Corequisite(s): PT 663, PT 664, PT 665, PT 668, PT 690.

Term Typically Offered: Fall, Spring

This course, presented just prior to the final clinical internships, will review student's experiences in the curriculum and promote reflection on the professional practice of physical therapy. The course will review professional core values and expectations for clinical internships. The course will also review portfolio requirements to determine students' readiness to proceed into final internships. In addition, students will be expected to develop five year personal professional development plans.

Note: Open to Physical Therapy majors only.

PT 689. Doctoral Project Proposal.**1 Unit**

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, and PT 646

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 662, and PT 669

The Doctoral Project Proposal must demonstrate students' understandings of the application of current evidence-based practice in a multicultural and complex health care environment. The proposal must be of sufficient rigor to ensure students' demonstrations of critical and independent thinking and abilities to interpret the research literature and apply to current physical therapist practice. The proposal includes a written document and oral defense. Open to Physical Therapy Majors only.

Credit/No Credit

PT 690. Doctoral Project/Culminating Experience.**3 Units**

Prerequisite(s): BIO 633, PT 600, PT 602, PT 604, PT 606, PT 608, PT 614, PT 618, PT 620, PT 622, PT 624, PT 625, PT 626, PT 627, PT 630, PT 632, PT 634, PT 636, PT 638, PT 640, PT 644, PT 645, PT 646, PT 648, PT 662, PT 663, PT 664, PT 665, PT 668, PT 669, PT 680, and PT 695A

Term Typically Offered: Fall, Spring

The Doctoral Project/Culminating Experience may include evidence-based practice projects, clinical research projects, or case reports consistent with the Chancellor's Office Executive Order. Culminating events must demonstrate students' understandings of the application of current evidence-based practice in a multicultural and complex health care environment. They must be of sufficient rigor to ensure students' demonstrations of critical and independent thinking and abilities to interpret the research literature and apply to current physical therapist practice.

PT 695A. Clinical Internship I.**6 Units**

Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648 and PT 669

Term Typically Offered: Fall, Spring

This first component of the clinical certificate series of the Doctor of Physical Therapy (DPT) program curriculum totals 12 weeks of progressively responsible full-time clinical education per student under the direct supervision of a licensed physical therapist. Students improve and refine evaluation and treatment abilities developed during their first two academic years and integrate knowledge and skills in a selected variety of clinic settings.

Note: Open to Physical Therapy majors only who have successfully completed the first two years of the DPT curriculum.

Credit/No Credit

PT 695B. Clinical Internship II.**6 Units**

Prerequisite(s): BIO 633, PT 600, 602, 604, 606, 608, 614, 618, 620, 622, 624, 625, 626, 627, 630, 632, 634, 636, 638, 640, 644, 645, 646, 648, 669 and 695A.

Term Typically Offered: Fall, Spring

This second component of the clinical education series of the Doctor of Physical Therapy (DPT) program curriculum totals twelve weeks of progressively responsible full-time clinical education under the direct supervision of a licensed physical therapist. Students improve and refine patient management skills and abilities developed during their first seven semesters and integrate knowledge and skills in a selected clinical setting.

Note: Open to Physical Therapy majors only who have successfully completed the first seven semesters of the DPT curriculum.

Credit/No Credit

PT 695C. Clinical Internship III.**6 Units**

Term Typically Offered: Fall, Spring

This third component of the clinical education series of the Doctor of Physical Therapy (DPT) program curriculum totals twelve weeks of progressively responsible full-time clinical education under the direct supervision of a licensed physical therapist. Students improve and refine patient management skills and abilities developed during their first eight semesters and integrate knowledge and skills in a selected clinic setting.

Note: Open to Physical Therapy majors only who have successfully completed two years of the DPT curriculum. Prerequisite

Credit/No Credit

PT 696J. Graduate Physical Therapy Seminar IJ Adv. Biomechanics I.**2 Units**

Prerequisite(s): BIO 633, PT 600, PT 602, PT 608, PT 630, PT 604, PT 606, PT 614, PT 618, PT 620, PT 622, PT 632, PT 634, PT 636, PT 638, PT 624, PT 625, PT 626, PT 640, and PT 646

Corequisite(s): PT 627, PT 644, PT 645, PT 648, PT 669, and PT 662

This elective is designed to prepare students to run a gait analysis clinic in the biomechanics laboratory. The course is one unit of lecture and one unit of lab, and covers the topics of assessment of balance, lower extremity strength assessment, special tests, and running analysis from both the research "gold standard" as well as the clinically feasible perspective with a particular focus on running.

Note: Fall semester only

Doctor of Physical Therapy

Total units required for Doctorate: 105-114

Program Description

Physical Therapy at Sacramento State is one of several professional curricula in the College of Health and Human Services. The program complements others in the College and provides opportunities for scholarship, instructional collaboration, and interaction.

The doctoral curriculum of 3 years, including summers, encompasses didactic instruction, laboratory experience, and clinical education. The clinical component is thirty-six weeks of full-time, off-campus clinical internships.

Admission Requirements

To be eligible for admission consideration, students must meet the following criteria:

- Attain a baccalaureate degree from an accredited college or university prior to enrollment in the program;
- Eligible for admissions as a graduate student in good standing;
- Complete nine of the eleven prerequisite courses by the application deadline. The two remaining courses must be completed in the Spring and/or Summer semester (a maximum of one of these course may be completed during the summer);
- Complete a minimum 100 total hours of work/volunteer experience in an inpatient and an outpatient setting;
- Three letters of recommendation, one from a college professor and two from licensed physical therapists;
- GRE taken within five years of application.

Admission Procedures

Submit the following applications:

1. Physical Therapist Centralized Application Service (PTCAS) online application by the listed deadline;
2. CSU, Sacramento's Department of Physical Therapy, DPT Supplemental Application, by the listed deadline.

Both applications are accessible via the department website. Following the initial screening, the top 100 applicants will be invited to interview and to submit a CSU Mentor application.

Applicants will submit the following requirements with their PTCAS application:

- Official transcripts from all colleges and universities that you have attended.
- Verification of completing a minimum 100 total hours of work/volunteer experience in at least one "Inpatient" and one "Outpatient" setting. Each setting must have at least twenty-five (25) hours of exposure. All PT experience hours must be completed and verified by the deadline.
- Three letters of recommendation, two from U.S. licensed physical therapists and one from a college professor.
- Graduate Record Examination (GRE) scores taken within five years of applying to the DPT program using code: 7588.
- Applicants who do not possess a baccalaureate degree from a post-secondary institution where English is a principal language must take

the TEST of English as a Foreign Language (TOEFL). Submit TOEFL scores with your PTCAS application.

- Applicants who previously attended another professional entry-level physical therapy program must submit a letter from the director of the previous physical therapy program designating their academic standing (*if applicable*).

Admission is granted on a competitive basis. Meeting the admission requirements does not guarantee acceptance into the DPT program.

Selection Procedures

Application materials are reviewed by the DPT Admissions Committee. During the first screening applications are reviewed for the prerequisite coursework GPA, recommendation forms from two licensed physical therapists and one academic professional, GRE scores, volunteer hours, and additional background criteria. Based on the results of this first screening, the top applicants will be invited for a panel interview. The top thirty-two applicants along with alternates will be notified of their status within two weeks of the final interviews.

Additional Information

Health Requirements

Students admitted to the graduate program in the Department of Physical Therapy are required to have specified immunizations by the Student Health Center or a private physician prior to any clinical participation. Complete information on health requirements will be provided to incoming students.

Costs and Fees

In addition to University tuition and fees, students can be expected to incur costs of approximately \$1,800 per year for books, and supplies.

Students are required to assume responsibility for transportation and housing costs for clinical internships which may be anywhere in a contracted site in California.

Health Insurance, Transportation Schedules, CPR Certification, and Background Screens

All students accepted into the graduate program in the Department of Physical Therapy must provide their own health insurance and transportation to clinical facilities. Major medical health insurance is mandatory prior to beginning clinical experiences. CPR certification (Basic Adult and Pediatric for healthcare providers) must be maintained according to the requirements of the American Heart Association or American Red Cross. Students will be required to complete a criminal background check prior to clinical placements. A positive criminal history may limit or preclude student participation in the clinical courses.

Required Prerequisite Courses (41-42 units)

Prerequisite coursework must have been completed at an accredited college or university with a minimum grade of "C" or better.

Code	Title	Units
Prerequisite Courses Required for enrollment consideration (41-42 Units)		
<i>Human Anatomy with Lab</i> ¹		
Select one of the following:		4
BIO 22	Introductory Human Anatomy	
or BIO 122	Advanced Human Anatomy	
BIO 25	Human Anatomy and Physiology I	
& BIO 26	Human Anatomy and Physiology II	
<i>Human Physiology with Lab</i> ¹		

Select one of the following: 4

BIO 25 & BIO 26	Human Anatomy and Physiology I Human Anatomy and Physiology II	
BIO 131	Systemic Physiology	

Psychology

PSYC 2	Introductory Psychology	3
--------	-------------------------	---

Select one additional Psychology course similar to: 3

PSYC 148	Child Psychology	
PSYC 150	Psychological Aspects of Aging	
PSYC 151	Psychological Aspects of Death and Dying	
PSYC 168	Abnormal Psychology	

Statistics

STAT 1	Introduction to Statistics	3 - 4
or STAT 50	Introduction to Probability and Statistics	

Chemistry I with Lab

CHEM 1A	General Chemistry I	5
or CHEM 6A	Introduction to General Chemistry	

Chemistry II with Lab

CHEM 1B	General Chemistry II	5
or CHEM 6B	Introduction to Organic and Biological Chemistry	

Physics I with Lab

PHYS 5A	General Physics: Mechanics, Heat, Sound	4
---------	---	---

Physics II with Lab

PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
---------	---	---

Kinesiology (with lab preferred)¹

KINS 151	Kinesiology	3
or KINS 151A	Biomechanics	
or KINS 151D	Applied Kinesiology and Biomechanics	

Physiology of Exercise (with lab preferred)¹

KINS 150	Exercise and Sport Physiology	3
or KINS 152	Physiology Of Exercise	

Total Units 41-42

¹ Anatomy, Physiology, Kinesiology/Biomechanics, and Exercise Physiology must have been completed within the last ten (10) years of the application deadline for the DPT program.

Minimum Units and Grade Requirement for the Degree

Units Required for the DPT: 105-114

Minimum Cumulative GPA: 3.0; students must earn a grade of "B" in all courses taken in the Doctor of Physical Therapy Program.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements and achieved classified status;
- successfully completed all courses with a grade of "B" or higher in the first 4 terms with a minimum of 3.0 ("B") overall grade point average in all DPT graduate level coursework;

- passed (with a grade of "B" or higher) a Graduate Writing Intensive (GWI) course (PT 608) and
- passed the faculty candidacy assessment.

¹ Elective Course. A minimum of 2 elective units is required.

Recreation, Parks, and Tourism Administration

College of Health and Human Services

Program Description

The Bachelor of Science in Recreation Administration provides students with the skills to manage people, programs, and events in a variety of recreational settings that include city parks and recreation programs, state and national parklands, hotels, playgrounds, forests, beaches, health clubs, tourism destinations, and non-profit community centers. Students will also gain an understanding of professional advocacy, ethics, and current evaluation procedures applicable in a variety of employment settings.

RPTA students and graduates will find a wide range of internship and job opportunities with public and private agencies in the Greater Sacramento Region, the State of California, and throughout the United States.

Degree Programs

BS in Recreation Administration (Recreation and Park Management) (p. 694)

BS in Recreation Administration (Recreation Therapy) (p. 696)

Minor in Non-Profit Administration (p. 700)

Minor in Recreation Administration (p. 701)

Certificate in Event Planning (p. 698)

Certificate in Hospitality and Tourism Administration (p. 698)

Certificate in Natural Resources Administration (p. 699)

Certificate in Non-Profit Administration (p. 699)

Certificate in Outdoor Adventure Administration (p. 700)

MS in Recreation Administration (p. 702)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science and Master of Science in Recreation, Parks, and Tourism are also

individually accredited by Council on Accreditation of Parks, Recreation, Tourism and Related Professions (COAPRT).

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features and Fast Facts

- The Sacramento area provides a wide variety of resources to supplement the formal classroom education of students enrolled in the concentrations offered by the Department.
- Sacramento County, the City of Sacramento, and a variety of smaller cities and special districts have numerous park and recreation programs, and facilities.
- The State Capitol offers opportunities to observe state government in operation and numerous state and federal agencies have central or regional offices within the urban area.
- Faculty and students work closely with a variety of natural resource agencies that include: California State Parks, the U.S. Forest Service, Bureau of Land Management, and the National Park Service.
- Students completing necessary coursework in the Recreation Therapy and Recreation and Park Management Concentrations are eligible for both state and national certifications (e.g. CTRS, MPI, CHA, and CPRP).
- California has more National Parks than any other state in the country.
- Both clinical and community based recreation therapy programs provide services to a variety of special populations.
- Leisure businesses of all types abound in the immediate area, and in the Sierra Nevada and California Coastal regions within a 90 mile radius of the campus.
- California is one of the world's most-visited tourism destinations, and Sacramento provides access to the Central Valley, the mountains, the coast, wine country, and numerous adventure recreation and recreational sporting opportunities.
- The RPTA program at Sacramento State is the oldest COAPRT accredited program in Recreation Administration in California.

Career Possibilities

Recreation Therapist · Recreation Administrator · Event Planner · Conference Center Manager · Campus Recreation Facilities Manager · Recreation Program Planner · Intramural Sports Coordinator · Environmental Interpreter · Hotel Manager · Park Manager · Park Ranger · Outdoor Recreation Specialist · Camp Supervisor · Recreation Resources Manager · Community Center Director · ADA/Inclusion Consultant · Employee Recreation Manager · Fitness Club Manager · Vacation Resort Manager · Ski Resort Manager · Water Park Manager · Amusement Park Manager · Entertainment Facility Manager · Leisure Products · Resort

Sales Representative · Recreation Specialist · Recreation Supervisor · Leisure Educator

RPTA 1. Orientation to Recreation, Parks and Tourism Administration. 1 Unit

Prerequisite(s): RPTA majors only or instructor permission.
Term Typically Offered: Fall, Spring

Introduction to the RPTA major with an emphasis on degree options, major advising, referrals to GE for general advising, information about the RPTA undergraduate student association, other local, statewide and national professional associations, scholarship opportunities, the 600-hour volunteer/paid placement prior to the internship, an overview of the internship process and a discussion about producing work in core and non-core RPTA courses for the portfolio requirement.
 Credit/No Credit

RPTA 21. First Year Seminar: Becoming an Educated Person. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only

Freshman seminar intended to provide students with an introduction to the nature and possible meanings of higher education and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provide students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

RPTA 30. Recreation, Parks and Tourism in Contemporary Society. 3 Units

Term Typically Offered: Fall, Spring

Orientation to the nature, scope and significance of the recreation, park and tourism in today's world. Analyzes philosophical and related elements essential to the effective delivery of leisure services, including the role of affective, cognitive and social motivations and outcomes.

RPTA 32. Leadership and Group Development. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

The purpose of this course is for students to develop an understanding of the theory and practice of leadership in various recreational organizational settings. The course will allow students the opportunity to develop leadership skills through lectures, self-assessments, experiential exercises, class discussions and case studies. Students are exposed to diverse theories and perspectives on leadership and are encouraged to apply critical thinking skills to develop their own working philosophy of the leadership that will serve them in their career contexts.

RPTA 33. Race, Class Gender and Leisure. 3 Units

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of the role of leisure in the social construction of markers of identity across gender, race, class, sexuality and disability; and leisure's role in the construction of institutional oppressions such as racism, sexism, homophobia and discrimination based on class and disability.

RPTA 34. The Outdoor Recreation Experience. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Encourages the student to identify and demonstrate an understanding of the value, meaning and benefits of outdoor recreation experiences and to explore a variety of outdoor adventure experiences. Outing skills such as trip planning, meal preparation, camp selection and set-up, equipment and clothing, map and compass, hygiene and first aid will be discussed and practiced. Students will also develop an awareness of and appreciation for minimum impact wilderness travel techniques and environmental responsibility and ethics.

RPTA 42. Recreation and Parks: Natural, Cultural, and Heritage Resources. 3 Units

Prerequisite(s): RPTA majors and minors only, or instructor permission.
Term Typically Offered: Fall, Spring

Examines the use of natural, cultural, and heritage resources for recreation, tourism and leisure purposes in a variety of settings and under the auspices of various agencies. Includes study of various protected areas and facilities, including parks, forests, museums, and cultural sites and how they are influenced by social trends, conflicting use demands, agency responsibilities, environmental considerations, and fiscal implications.

RPTA 50. Introduction to Rock Climbing.**1 Unit****Term Typically Offered:** Fall, Spring

Designed to provide students with the basic knowledge, skills, and techniques of modern rock climbing. Students will learn skills pertaining to indoor top-rope and lead climbing, indoor and outdoor bouldering, and outdoor sport climbing. Students will also learn and discuss outdoor ethics and environmental impact in relation to rock climbing.

RPTA 60. Budgeting for Recreation Services.**3 Units****Prerequisite(s):** RPTA major and minors only, or instructor permission.**Term Typically Offered:** Fall only

Introduces students to budget topics in Recreation, Parks, and Tourism, through the use of theoretical readings, case studies, and a series of professional speakers. Students will gain a broad understanding of the planning and implementation of the budget process for a leisure service agency, primarily those that are non-profit or tax-supported.

Note: Only one of RPTA 60 or RPTA 61 may be counted for credit**RPTA 61. Cost Management for Hospitality.****3 Units****Prerequisite(s):** RPTA major and minors only, or instructor permission.**Term Typically Offered:** Spring only

Introduces students to a broad range of topics related to cost management in hospitality, and teaches students to analyze numerical data for decision-making in hospitality operations. Considers systems, techniques, information types, and presentational forms commonly used by hospitality managers. Additional topics include, financial statements and ratio analysis, various pricing methods, types of costs in hospitality and service industries, cost-volume-profit techniques, and the application of standard cost controls used in hospitality.

Note: Only one of RPTA 60 or RPTA 61 may be counted for credit**RPTA 62. Introduction to Recreation Law.****3 Units****Prerequisite(s):** RPTA majors and minors only, or instructor permission.**Term Typically Offered:** Fall, Spring

Introduces students to legal topics and regulations in Recreation, Parks and Tourism industries. Students are given a practical knowledge of the law, operation of the legal system, contracts, and legal applications to agency management, human rights and personnel. Course uses text book readings, case law from actual published decisions in the field of Recreation law, courtroom visitations, and professional speakers.

RPTA 80. Introduction to Hospitality and Tourism.**3 Units****Term Typically Offered:** Fall only

Hospitality and tourism are vitally important to California's image and economy, and these two related industries are among the world's top employment providers. This course provides an introductory overview of the broad hospitality and tourism industries, covering several topics, including growth and development, trends and current concerns, and professional employment sectors.

RPTA 96B. Budgeting for Recreation Services.**3 Units****Prerequisite(s):** RPTA majors or minors only**Term Typically Offered:** Fall, Spring

Introduces students to budget topics in Recreation, Parks, and Tourism, through the use of theoretical readings, case studies, and a series of professional speakers. Students will gain a broad understanding of the planning and implementation of the budget process for a leisure service agency, primarily those that are non-profit or tax-supported.

RPTA 100. Recreation and Leisure Lifestyle Development.**3 Units****General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

Broad general overview of the recreation and leisure movement followed by a specific examination of changing leisure lifestyles and their impact on the individual's choice of recreation and leisure patterns. Also examine the impact that the choice of leisure lifestyles has on other aspects of the individual's life as well as the negative effects of restrictive or inadequate leisure involvement.

RPTA 101. Senior Seminar.**1 Unit****Prerequisite(s):** RPTA 1 and senior status**Term Typically Offered:** Fall, Spring

Students will focus on identifying potential internships, refining resumes and writing cover letters for securing internships. Complete their portfolio requirement for graduation and learn about the alumni association for RPTA graduates.

Credit/No Credit

RPTA 102. Recreation Therapy Professional Practice.**1 Unit****Prerequisite(s):** RPTA 1, RPTA 106, RPTA 115, RPTA 116, RPTA 117, RPTA 118 and senior level.**Corequisite(s):** RPTA 115, RPTA 116, and/or RPTA 118 may be taken concurrently.**Term Typically Offered:** Fall, Spring

This senior level course is intended to build upon a student's previous coursework in recreation therapy, and link the theoretical foundation with day-to-day practical applications. Students will fine-tune skills and interests in recreation therapy, learn methods for effective networking, and develop interviewing techniques in order to identify appropriate internships and employment opportunities.

Credit/No Credit

RPTA 105. Management in Recreation, Parks and Tourism.**3 Units****Prerequisite(s):** RPTA 30 or instructor permission**Term Typically Offered:** Fall, Spring

Analyzes the functions of managers including planning, organizing, staffing, leading and controlling. Also examines basic principles, techniques and tools associated with these functions. Consideration of internal and external environments which influence the managerial process and the manager's role in various areas of enterprise activity.

RPTA 106. Introduction to Inclusive Recreation and Recreation Therapy.**3 Units****Prerequisite(s):** RPTA majors and minors only or instructor permission.**Term Typically Offered:** Fall, Spring

Addresses the etiology and nature of common disabling conditions and examines issues of leisure participation and inclusion for underrepresented populations. Topics include: attitudinal barriers, advocacy, normalization, universal design, activity analysis and modification, and legislation. Emphasis on leadership, supervision and organizational development of inclusive and recreation therapy programs.

RPTA 107. Grant Writing for Leisure Organizations. 3 Units**Prerequisite(s):** Senior status or instructor permission.**Term Typically Offered:** Spring only

A detailed examination of grant writing as a means of augmenting agency revenues for specific recreation projects, programs and research. An in-depth assessment of techniques used to source funding opportunities relevant to recreation and leisure agencies. A review of budget preparation and grant management.

RPTA 109. Computer Applications in Recreation, Parks and Tourism. 2 Units**Term Typically Offered:** Fall, Spring

Introduces the student to the use of micro-computers in recreation, park and leisure services enterprises. Emphasis will be on the application of word processing, data bases, spread sheets and graphics to the work of professionals within the field. Consideration will also be given to telecommunications, interactive video and desktop publishing.

RPTA 110. Research and Evaluation in Recreation, Parks and Tourism. 3 Units**Prerequisite(s):** RPTA 1 and RPTA 30.**Term Typically Offered:** Fall, Spring

Provides students with tools to analyze leisure behavior, interests and the motivational basis of leisure as they apply to the field of recreation and leisure services. Emphasizes applied research techniques including qualitative, descriptive and analytical methods, and program evaluation.

RPTA 115. Recreation Therapy Assessment and Documentation. 3 Units**Prerequisite(s):** CHDV 30, PSYC 168, RPTA 30, RPTA 106 and RPTA 117; or instructor permission.**Term Typically Offered:** Fall, Spring

Assessment procedures and instruments used to assure competence in assessment of client function in leisure. Documentation, assessment, regulations in different settings (i.e., community hospital, and clinical settings), protocols and development of individual treatment plans. Students are exposed to the Recreation Therapy process (APIE) in a variety of clinical and community settings.

RPTA 116. Recreation Therapy Principles and Practices and the Recreation Therapy Process. 3 Units**Prerequisite(s):** CHDV 30, RPTA 30, RPTA 106 and RPTA 117; or instructor permission. RPTA 117 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Philosophy and principles underlying the work performed by the recreation therapist are studied including assessment, individual program planning, interpersonal interaction skills, and working with families.

RPTA 117. Recreation Therapy and Contemporary Aspects of Disability. 3 Units**Prerequisite(s):** RPTA 106; RPTA 106 may be taken concurrently.**Term Typically Offered:** Fall, Spring

In-depth exploration of a variety of disabilities and diseases, including physical disabilities, developmental disabilities, intellectual disabilities, mental health, hearing and vision impairments, and disabilities related to aging. Content will focus on etiology, prognosis, symptomatic conditions, prescription drugs, and recreation therapy interventions. Medical terminology will be covered.

RPTA 118. Recreation Therapy Facilitation Techniques. 3 Units**Prerequisite(s):** CHDV 30, PSYC 168, RPTA 30, RPTA 106 and RPTA 117; or instructor permission.**Term Typically Offered:** Fall, Spring

Covers basic concepts, methods and techniques associated with the practice of recreation therapy. Students will understand and apply the recreation therapy process through intervention and facilitation methods that are critical to helping clients in health and human service settings. The goal is to assist students in developing the ability to use recreation, leisure and play in recreation therapy programs as interventions in the treatment process.

RPTA 119. Recreation Therapy Management and Advancement of the Profession. 3 Units**Prerequisite(s):** BIO 25, CHDV 30, PSYC 168, RPTA105, RPTA 106, RPTA 115, RPTA 116, RPTA 117 and RPTA 118; or instructor permission.**Term Typically Offered:** Fall, Spring

Examination of existing recreation programs in clinical settings (acute care hospitals, rehabilitation centers, state hospitals, skilled nursing facilities, intermediate care facilities, etc.); review of standards and regulations pertaining to recreation programs, development of recreation therapy programs, review of the roles of practitioners in related disciplines. Review of intervention techniques, program organization, management, and advancement of the profession and professional ethics.

RPTA 120. Leisure Education. 3 Units**Prerequisite(s):** RPTA 106.**Term Typically Offered:** Fall, Spring

History, scope and process of leisure education. A survey of guidance theories and procedures, including assessment techniques, program development, implementation and evaluations. The role of leisure education in diverse leisure delivery systems and with diverse populations. Legal, ethical, and professional aspects of leisure education.

RPTA 122. Perspectives On Leisure. ✍️ 3 Units**Prerequisite(s):** GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Understanding Personal Development (E), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer

Basic philosophical, historical, psychological and scientific foundations and developments in leisure and recreation theory; review of the cultural forces, institutions and theories that affect individuals and society.

RPTA 128. Recreation Services for Diverse, Underserved and Underrepresented Populations. 3 Units**Term Typically Offered:** Spring only

Examines how recreation service providers work with diverse segments of the community. Class will examine a variety of populations that have been underserved and that may be at risk. Examines the impact of factors such as racism, sexism, classism, ageism, ableism and heterosexism that affect access to programs and services for diverse populations.

RPTA 129. Youth Development in Recreation, Parks & Tourism. 3 Units
Term Typically Offered: Fall, Spring

This course will focus on examining contemporary issues and trends related to young people and youth development in recreation, parks and tourism. Students will learn about youth development frameworks and how to apply those frameworks to recreation-based settings. Students will learn about the importance of engaging youth in the process of program planning and development.

RPTA 130. Community Sport Programming. 3 Units

This course emphasizes sport as a program component of community-based recreation services in both public and private settings. Students will develop skills related to successful sport program development, implementation and evaluation, through in-class lecture, site visits, and student developed projects. Additional topics will include promotion, funding, staffing, purchasing, and maintenance as related to managing sport programs.

RPTA 131. Morale Welfare and Recreation (MWR): Military Recreation Services. 3 Units

Term Typically Offered: Fall, Spring

Students develop an understanding of the administration and programming of Morale, Welfare and Recreation Services for individuals serving in the military and their families. Recreation facilities and programs for all branches of the military, including the US Army, US Navy, US Marines, US Air Force and US Coast Guard, are covered. The course utilizes lectures, experiential exercises, class discussions and onsite visits to military installations.

RPTA 132. Campus Recreation. 3 Units
Term Typically Offered: Fall, Spring

This course introduces students to campus recreation programs. Students will be introduced to theories of student development in these recreational settings; the organizational context and history of recreational programs within a college setting; and the range of programming, facilities, and managerial duties within campus and base recreation. This will provide a great starting point for students preparing for a profession on campus, institutional and/or military recreation, or students wanting to broaden their knowledge in the overall field.

RPTA 136. Program and Event Planning in Recreation, Parks and Tourism. 3 Units

Prerequisite(s): RPTA 32.

Term Typically Offered: Fall, Spring

The program/event planning process will be described and explained. Relevant principles and methods will be identified. Students will develop a program/event plan for a local organization. Field trips may be required. Field trip(s) may be required.

RPTA 137. Community Organization. 3 Units
Term Typically Offered: Fall, Spring

Study of institutions and leisure service systems within the community, and the dynamics of community organization practices and actions. The role of the recreation and leisure service practitioner in bringing about community changes. Defining and promoting citizen participation through advisory council membership, survey applications, and public hearing attendance.

RPTA 139. Conference and Meeting Planning. 3 Units

Prerequisite(s): Restricted to declared RPTA majors and minors or instructor permission

Term Typically Offered: Fall only

Analyzes this varied, growth industry. Considers the range of conferences and meetings, from small corporate retreats to international conventions. Topics include: the scope of the industry, the role of convention centers, hotel and resort based meeting facilities, organizations that hold meetings and the nature of those meetings, meeting planning and the role of the professional planner and industry related careers. Field trips may be required.

Field trip(s) may be required.

RPTA 148. Experiential Education in Outdoor Recreation Settings. 3 Units

Term Typically Offered: Spring only

Exposes the students to theoretical and philosophical concepts of experiential education and provides a means through which they can put theory into practice in outdoor recreation settings. Using methods such as demonstrations, observation, presentations, and discussions, the course will explore the history and current trends of experience-based learning.

RPTA 149. Developing and Programming Adventure Experiences. 3 Units

Term Typically Offered: Fall only

Provides students with the working knowledge needed to produce enriching and fulfilling adventure leisure experiences. In order to most effectively aid and assist others in the process of maximizing their leisure experiences, the student of leisure must first know how to maximize these experiences for and within themselves. Therefore, students will be participating in leisure adventure experiences so they can be as effective as possible when developing and programming leisure adventure experience opportunities for others.

RPTA 150. Ecology Of Resource Areas. 3 Units
Term Typically Offered: Fall, Spring

Study of the fundamentals of ecology, silvics, soil science and manipulations of an ecosystem with emphasis on the whole biota as it relates to outdoor recreation areas. Designed to provide an understanding of the scientific basis for and the operational rationale of manipulation of natural resources for a variety of recreation uses.

RPTA 151. Visitor Management in Recreation Areas. 3 Units
Term Typically Offered: Fall, Spring

Visitor safety in recreation areas as it relates to the role and functions of management. Emphasis is given to principles and current legislation in hazard reduction, deviant behavior, liability, law enforcement, and other related topics.

RPTA 152. Law Enforcement for Forest and Park Rangers. 3 Units
Term Typically Offered: Spring only

State, county and federal park rangers and wardens differ from other peace officers in that they are trained to protect visitors and cultural and natural resources on our public lands. This course offers a survey of topics related to the Peace Officer level of rangers across America's diverse public land systems, with an emphasis on career opportunities in park, forest, and wildlife management.

- RPTA 153. Environmental Interpretation. 3 Units**
Term Typically Offered: Fall, Spring
- Connecting visitors to natural, cultural, and historic resources is the primary focus of this course. Theories, principles and techniques are covered focusing on interpreting park and protected area values to people during their leisure. Personal and non-personal communication techniques will be practiced. Field sites in and around the Sacramento region will be visited to understand the diverse nature of the practice of interpretation. Designed for ranger naturalists, park interpretive staff, teachers, camp leaders, outdoor educators, and recreation program staff.
- RPTA 154. Management of Recreation Facilities. 3 Units**
Term Typically Offered: Fall only
- An introduction to aspects of recreation facility administration for several facility types, including campus recreation facilities, health clubs, community centers, park facilities and aquatic centers. Course topics include administration techniques related to staffing and outsourcing, the roles of the facility manager, analyzing financing sources, best practices in facility maintenance, and issues related to facility design. The course utilizes class discussions, guest speakers and facility site visitations on and off campus.
- RPTA 164. Leadership and Fundraising for Non-profit Organizations. 3 Units**
Term Typically Offered: Spring only
- Introduces students to principles and concepts of nonprofit leadership. This course will explore and provide an understanding of historical and philosophical foundations of nonprofit organizations; board/committee development and operation; and volunteer management. Students will also learn about fundraising methods and strategies. The course will consist of lecture, readings, discussion, guest speakers, nonprofit agency visitations, active learning exercises, and a community-learning component.
- RPTA 165. Volunteer Management in Recreation, Parks and Tourism. 3 Units**
Term Typically Offered: Fall only
- This course will focus on examining issues and trends related to volunteer management in recreation, parks and tourism-related organizations. Students will begin to understand the role of volunteerism and develop the skills necessary for effective volunteer management through: assessing program needs for volunteers, screening, orientation, training, placement, supervision, motivation, retention and celebration of volunteers.
- RPTA 166. Administration in Recreation, Parks and Tourism. 3 Units**
Prerequisite(s): RPTA 105.
Term Typically Offered: Fall, Spring
- Designed to provide the student with various in-depth perspectives regarding the use of management/administrative process in recreation, parks and tourism.
- RPTA 167. Professional Organization Leadership. 3 Units**
Prerequisite(s): RPTA 30, RPTA 32, and RPTA 105, or instructor permission
Term Typically Offered: Fall, Spring
- This course is designed to introduce students to the historical and philosophical foundations of professionalism, and provide the necessary conceptual and technical competencies to organize and lead a successful professional organization/association. Political, legal and ethical issues will be discussed as well as the functions and roles of professional organizations/associations. The relationship between professionalism and advocacy will be examined.
- RPTA 180. Foundations of Commercial Recreation. 3 Units**
Term Typically Offered: Fall only
- Overview of the historical and philosophical foundations of the commercial recreation field. Identification of providers of commercial recreation goods and services. Analyzes current functions and trends in the operation of commercial leisure enterprises.
- RPTA 182. Travel And Tourism. 3 Units**
Term Typically Offered: Fall only
- Examination of the history, significance and nature of travel and tourism in the world with emphasis on the U.S. Analyzes economic, cultural and social factors underlying development and growth of travel and tourism and a review of related research. Identification and description of travel and tourism service providers including their organization, financing and management practices. Prerequisite: Declared RPTA majors and minors only or instructor permission
- RPTA 183. Marketing Recreation Services. 3 Units**
Prerequisite(s): RPTA 30 or instructor permission
Term Typically Offered: Fall, Spring
- Fields of recreation (including therapeutic, commercial, municipal, etc.), tourism and hospitality, while diverse, all offer products that are primarily intangible. The management and marketing of such service products can differ profoundly from those of goods products (often the focus of traditional business programs). Addresses the nature of the service product and services marketing in the people intensive, experiential world of recreation.
- RPTA 184. Hospitality Administration. 3 Units**
Prerequisite(s): Restricted to declared RPTA major and minors or instructor permission
Term Typically Offered: Spring only
- Introduces students to resorts and hotels and their position within the tourism and hospitality industries. The scope of the hospitality industry and various issues concerning the successful development of a hospitality product will be discussed. Prepares students to engage in an internship or employment in this or a related industry, including restaurants and retail. It also helps these and other students to reinforce concepts and skills learned elsewhere by providing concrete, real-world examples of marketing and management methods.

RPTA 185. Advanced Seminar in Commercial Recreation Administration. 3 Units

Prerequisite(s): RPTA 180, RPTA 105 and RPTA 183; RPTA 183 may be taken concurrently; or instructor permission.

Term Typically Offered: Fall, Spring

In-depth analysis of the management of recreational business on a for-profit basis. Focuses on advanced topics, analytical skills, and problem solving in the management arena.

RPTA 188. Sacramento Region Craft Beer Tourism. 1 Unit

Prerequisite(s): Declared RPTA major or minor, or instructor permission

Term Typically Offered: Fall, Spring

Introduction to visitation and tourism related to California's craft beer industry, specifically in the Sacramento region. This course will provide students with a basic knowledge of craft beer as one of several local products that combine to create a unique agritourism selling proposition for Sacramento. Tourism-related products (beer festivals and contests, beer trails, beer bikes, and beer apps), hospitality (brewery tasting rooms and beer retail), as well as beer laws, and beer pairings will also be discussed.

Note: This course contains required field trips.

Field trip(s) may be required.

RPTA 189. California Wine and Agri-Tourism. 3 Units

Prerequisite(s): Restricted to declared RPTA majors and minors or instructor permission

Term Typically Offered: Spring only

Introduction to the wine tourism and agri-tourism industries, specifically in the region surrounding Sacramento. Emphasis on wine regions, wineries as event stages, wine mythology and wine in popular culture. Additionally, the course will cover the role of agricultural festivals, related agri-tourism products, slow-food, specialty crop tourism, winery and farm retail, culinary destinations, wine list creation, ag natural tourism products and the role of agri-tourism as part of Sacramento's cultural identity.

RPTA 191. Service Learning Option for Recreation, Parks and Tourism Administration Courses. 1 Unit

Term Typically Offered: Fall, Spring

Individual goals, activities, and academic requirements for community service work and the service-learning credit option are outlined in a Service Learning Option/Contract agreed upon and signed by the student, instructor, and agency sponsor. Enrolled students are required to attend mid-semester and final learning assessment workshops and to complete written evaluations. Credit for the course awarded only if contract and course requirements are completed.

Credit/No Credit

RPTA 195B. Partial Internship: Recreation and Park Management. 4 Units

Prerequisite(s): RPTA 1, RPTA 30, RPTA 32, RPTA 42, RPTA 101, RPTA 105, RPTA 106, RPTA 109, RPTA 110, RPTA 136 and approval of academic advisor and internship coordinator.

Term Typically Offered: Fall, Spring

Supervised part-time or short-term internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by personnel at the host site.

Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195C. Partial Internship: Recreation and Park Management. 6 Units

Prerequisite(s): RPTA 1, RPTA 30, RPTA 32, RPTA 42, RPTA 101, RPTA 105, RPTA 106, RPTA 109, RPTA 110, RPTA 136 and approval of academic advisor and internship coordinator.

Term Typically Offered: Fall, Spring

Supervised part-time or short-term internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by personnel at the host site.

Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195D. Recreation Therapy Internship. 10 - 15 Units

Prerequisite(s): BIO 25, CHDV 30, PSYC 168, RPTA 1, RPTA 30, RPTA 102, RPTA 106, RPTA 110, RPTA 115, RPTA 116, RPTA 117, RPTA 118, RPTA 119, and RPTA 136; completion of required administrative paperwork in the semester prior to internship, approval of major advisor.

Term Typically Offered: Fall, Spring

Supervised full-time therapeutic internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by certified personnel at the host site. Meets the professional certification requirements at the national or state levels.

Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 195E. Internship: Recreation and Park Management. 10 - 15 Units

Prerequisite(s): RPTA 1, RPTA 30, RPTA 32, RPTA 42, RPTA 101, RPTA 105, RPTA 106, RPTA 109, RPTA 110, RPTA 136 and approval of academic advisor and internship coordinator.

Term Typically Offered: Fall, Spring

Supervised, full-time internship in a recreation, park or tourism organization or business. Supervision is provided by faculty and also by personnel at the host site.

Note: Refer to the RPTA Internship Manual for procedures and requirements.

RPTA 196E. Introduction to Posttraumatic Growth. 3 Units

Term Typically Offered: Fall, Spring

Traumatic life events affect individuals, families and communities. This course is designed to assist professionals working with survivors of traumatic events. Posttraumatic growth (PTG) is a positive focus, viewed from the perspective of the individual, secondary survivor, and the community. Clinical application illuminating a pathway toward PTG is also studied and discussed. The course incorporates current research, films, books, poems, plays, and interviews with survivors, will be used to profile individuals, families, communities, and organizations.

RPTA 196G. Gastronomic Tourism. 3 Units

Term Typically Offered: Spring only

Tourists are increasingly motivated to travel for food and drink. Visiting the location and touring the production facilities is also important. This course provides an overview of the global culinary and gastronomic tourism industry, focusing on the ability of a destination to market itself (both people and place) through food. The various social and cultural contexts in which gastronomic tourism takes place are discussed as well as positive and negative impacts of global and local gastronomic tourism. Field trip(s) may be required.

Field trip(s) may be required.

RPTA 196H. Revenue Management for Hospitality. 3 Units

Prerequisite(s): RPTA 96C, RPTA majors and minors only
Revenue management is critical to the hospitality industry due to the perishable nature of a service based product. This course introduces students to topics related to revenue management in hospitality and teaches students techniques to manage revenue in a dynamic hospitality environment. Capacity management, demand and revenue forecasting, discounting, overbooking practices, channel management, and pricing execution for the hospitality operations are discussed.

RPTA 196L. Hotel and Lodging Operations. 3 Units

Term Typically Offered: Spring only

This course is designed to provide a required knowledge of hotel and lodging operations. Students will acquire a solid understanding of how a variety of lodging types, specially hotels, operate by detailed examination of the departments common to most lodging properties, including the front office, sales and marketing, housekeeping, maintenance, and others. Additionally, topics relevant to operations like green initiatives and revenue optimization will be discussed in this course.

RPTA 196M. Human Resources Management in the Hospitality Industry. 3 Units

Term Typically Offered: Spring only

Comprehensive study of personnel management in today's hospitality profession, familiarizing students with many of the functions related to recruiting, selecting, orienting, training, and retaining outstanding lodging industry staff. Additionally, the course familiarizes students with the effects of rising labor costs, increasing competition for quality staff, changing employees attitudes, evolving guest expectations, and a proliferation of new laws that impact human resources policies and activities.

RPTA 198. Co-Curricular Activities. 1 - 3 Units

Prerequisite(s): Approval of an instructor and the Department chair.

Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and professional concerns of Recreation and Leisure Studies. For example, students may earn credit by participating as a tutor or discussion leader for recreation and leisure studies classes or a teacher or leader in programs offered by community organizations.

Note: The course may be repeated three times for a maximum total of 3 units. Students can enroll for a class that counts as 1, 2 or 3 units.

No more than 3 units of RPTA 198 may be used to meet the major requirements.

Credit/No Credit

RPTA 199. Special Problems. 1 - 3 Units

Prerequisite(s): Approval of an instructor and the Department chair.

Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. Can be repeated six times for a maximum total of 6 units. Students can enroll for a class that counts as 1, 2 or 3 units. No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet major requirements.

Credit/No Credit

RPTA 200. Foundations of Leisure Concepts and Application. 3 Units

Term Typically Offered: Fall, Spring

Provides a comprehensive awareness of the historical, philosophical, psychological, experiential, and behavioral foundations of leisure. Global leisure perspectives examined in relationship to cultural diversity, current trends, future perspective, and economic implications. The art and science of providing fulfilling leisure experiences through private entrepreneurial recreations and public delivery systems explored.

RPTA 200A. Orientation to Graduate Studies in RPTA. 1 Unit

Prerequisite(s): Restricted to MS in Recreation Administration majors.

Term Typically Offered: Fall only

Course covers several topics related to the MS degree program in Recreation, Parks & Tourism Administration. Students will understand requirements and expectations of the program, develop a tentative degree plan and timeline, and learn about different options for the Culminating Experience. Course will review several other aspects important to graduate students, including deadlines and paperwork, library and research resources, Office of Graduate Studies resources, scholarships, life-school balance, graduate school terminology, and financial aid and funding resources, etc.

Credit/No Credit

RPTA 201. Advanced Studies in Leisure, Recreation, Parks and Tourism. 3 Units

Prerequisite(s): RPTA 200

Term Typically Offered: Fall, Spring

The purpose of this course is to move students beyond conceptual foundations of leisure, recreation, parks and tourism administration to more theoretically advanced aspects of the field. In this course, students will pursue an in-depth exploration of the theories and research related to leisure, recreation, parks and tourism.

RPTA 202. Policies, Issues, and Problems in Recreation, Parks and Tourism. 3 Units

Term Typically Offered: Fall, Spring

Major environmental and recreational issues and problems affecting the recreation, parks and tourism field are discussed, analyzed, and evaluated. Ramifications involving policy making and planning processes of major federal, state, and local agencies involved with recreation, parks and tourism delivery services are also covered.

RPTA 203. Advanced Administration in Recreation, Parks and Tourism. 3 Units

Term Typically Offered: Fall, Spring

Examination of contemporary resources, techniques, and tools available to administrators in various types of recreation, parks and tourism delivery systems.

RPTA 204. Advanced Research Methods in Recreation, Parks and Tourism. 3 Units

Prerequisite(s): RPTA 200, RPTA 202, and graduate advisor approval.

Term Typically Offered: Fall, Spring

Provides an analysis of major research methods used in recreation, parks and tourism administration. Addresses basic and applied research orientations, research designs, research proposals, data collection tools and methods, data analysis, and reporting of research findings.

RPTA 206. Liability and Risk Management in Recreation, Parks and Tourism. 3 Units**Prerequisite(s):** Graduate status or instructor permission.**Term Typically Offered:** Fall, Spring

In-depth analysis of the principles of legal liability as they pertain to recreation, parks and tourism administration. An examination of the pervasive nature of risk as it pertains to the provision of recreation, parks and tourism programs and opportunities, and the concepts and methods of risk management. Includes field trips, mock trials or other related activities.

Field trip(s) may be required.

RPTA 207. Grant Writing for Recreation, Parks and Tourism Organizations. 3 Units**Prerequisite(s):** Graduate status or instructor permission.**Term Typically Offered:** Fall, Spring

A detailed examination of grant writing as a means of augmenting agency revenues for specific recreation projects, programs and research. An in-depth assessment of techniques used to source funding opportunities relevant to recreation and leisure agencies. A review of budget preparation and grant management.

Note: Students may not take both RPTA 107 and RPTA 207 for credit.**RPTA 209. Seminar in Advanced Leisure Education. 3 Units****Term Typically Offered:** Fall, Spring

Surveys current and historical perspectives of leisure education from a multicultural and life span viewpoint. Current modes of service delivery will be discussed as they relate to leisure theories. Methods of leisure education provision in diverse settings from school-park collaboratives, retirement and rehabilitation centers, to corporate wellness will be investigated. Development, implementation and management of viable leisure education services will be covered as well presentation, training and consultation skills.

RPTA 295. Practicum. 3 - 6 Units**Prerequisite(s):** Approval of major advisor.**Term Typically Offered:** Fall, Spring

Graduate internship experiences in a practical setting.

Note: Open only to graduate students. Can be repeated two times for a maximum total of 6 units. Students can enroll for a class that counts as 3, 4, 5 or 6 units. No more than 6 units of RPTA 295 and RPTA 299 in combination may be used to meet degree requirements.

Credit/No Credit

RPTA 299. Individual Study. 1 - 6 Units**Prerequisite(s):** Approved petition filed in the department office.**Term Typically Offered:** Fall, Spring

Individual project, problem, practical study, survey, and/or directed reading on the graduate level.

Note: Can be repeated six times for a maximum total of 6 units. Students can enroll for a class that counts as 1, 2, 3, 4, 5 or 6 units. No more than six units of RPTA 295 and RPTA 299 in combination may be used to meet major requirements.

Credit/No Credit

RPTA 500A. Culminating Experience: Thesis. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy and permission of graduate coordinator.**Term Typically Offered:** Fall, Spring

Successful completion of a thesis approved for the Master's degree. Student must have approval from first reader.

Credit/No Credit

RPTA 500B. Culminating Experience: Project. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy and permission of graduate coordinator.**Term Typically Offered:** Fall, Spring

Successful completion of a project approved for Master's degree. Student must have approval from the first reader.

Credit/No Credit

RPTA 500C. Culminating Experience: Comprehensive Exam. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy and permission of the graduate coordinator.**Term Typically Offered:** Fall, Spring

Successful completion of a comprehensive examination approved for Master's degree.

Credit/No Credit

BS in Recreation Administration (Recreation and Park Management)

Units required for Major: 57-59

Total units required for BS: 120

Program Description

The BS in Recreation Administration with a Concentration in Recreation and Park Management allows students flexibility in the selection of courses related to department certificate programs in:

- **Community Recreation Management and Non-Profit Administration.** These courses focus on skills needed for working with **public recreation and park agencies** at the city, county, regional, and state levels (e.g., city or county Department of Parks and Recreation), **special districts** (e.g., East Bay Regional Park District) and/or **non-profit agencies** (e.g., after-school programs, fundraising events, programs for seniors, summer camps, etc.). Students who take courses in this area are being trained for positions that involve planning, implementing, managing, and evaluating comprehensive recreation programs in public and nonprofit settings.
- **Natural Resource, Experiential Education, and Outdoor Recreation.** These courses focus on skills needed for working with agencies that provide opportunities for outdoor recreation (e.g., the Forest Service), agencies that manage natural resources (e.g., the National Park Service), and agencies that plan for and manage outdoor recreation experiences and resources (e.g., the California Department of Parks and Recreation, Planning Division). Students who take courses in this area are being trained for positions as park rangers and managers, interpreters of natural and cultural history, managers of visitors to parks, and outdoor recreation planners.
- **Hospitality and Tourism Management, Commercial Recreation, and Event Planning.** These courses focus on **the basics of entrepreneurial businesses**, and the skills needed for working with **for-profit**, commercial recreation and experience industry agencies (e.g., resorts, hotels, conference and meeting facilities, cruise lines, event

planners, destination marketing agencies, and travel agencies). Students who take courses in this area are being trained for positions in enterprises which offer leisure services and/or products for a profit. Examples include clubs and spas, resorts, ski areas, theme parks, and the hospitality industry.

Note:

- Students graduating with a Bachelor of Science Degree in Recreation Administration: Recreation and Park Management are not be subject to the University’s Foreign Language Graduation Requirement. Students who change major may be subject to the University’s Foreign Language Graduation Requirement.
- No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet program requirements. No more than 3 units of RPTA 198 may be used to meet major requirements.
- RPTA 21, RPTA 100 and RPTA 122 may **not** be used to meet program requirements.

Minimum Grade Requirement

Grade of "C-" or better required in all courses applied to the major.

Additional Graduation Requirement

Majors are required to compile and consistently maintain an assessment portfolio. The portfolio is a cumulative collection of individual assignments designed to demonstrate competency in specific areas such as written communication, oral communication, group interaction, research and analysis, and computer literacy. Each competency may be assessed at more than one level (e.g., beginning, advanced) and adequate opportunities for completion of all required demonstrations of competency are available within the required major coursework. Additionally, opportunities for specific competency level demonstrations may be made available in supportive coursework within the major (e.g., RPTA 153, RPTA 182). In individual course-based assignments, learning outcomes, and competencies are assessed based upon specified criteria. Continuing instructor feedback and self-assessment exercises are intended to create a process that improves learning outcomes, as well as facilitates the student’s ability to demonstrate those outcomes and competencies both before and after graduation.

It is the responsibility of the student, in consultation with their portfolio advisor, to maintain the portfolio and to insure that all requirements have been successfully completed prior to graduation. The completed portfolio is presented in RPTA 101 for Recreation and Park Management Concentration students.

Program Requirements

Code	Title	Units

Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		0

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Note: Students with a declared major of BS in Recreation Administration (Recreation Therapy) or BS in Recreation Administration (Recreation and Park Management) are exempt from the Foreign Language Graduation Requirement.

BS in Recreation Administration (Recreation Therapy)

Units required for Major: 70-71

Total units required for BS: 120

Program Description

The BA in Recreation Administration with a Concentration in Recreation Therapy focuses on recreation services for individuals who are ill, disabled, elderly, or incarcerated. It can be applied in clinical, transitional, and community based settings. Emphasis is on therapeutic recreation as it applies to children and adults who are physically, mentally, socially, and/or emotionally challenged.

Note:

- Students graduating with a Bachelor of Science Degree in Recreation Administration: Recreation and Park Management/Recreation Therapy will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.
- No more than 6 units of RPTA 198 and RPTA 199 in combination may be used to meet program requirements. No more than 3 units of RPTA 198 may be used to meet major requirements.
- RPTA 100 and RPTA 122 may **not** be used to meet program requirements.

Minimum Grade Requirement

Grade of "C-" or better required in all courses applied to the major.

Additional Graduation Requirement

Majors are required to compile and consistently maintain an assessment portfolio. The portfolio is a cumulative collection of individual assignments designed to demonstrate competency in specific areas such as written communication, oral communication, group interaction, research and analysis, and computer literacy. Each competency may be assessed at more than one level (e.g., beginning, advanced) and adequate opportunities for completion of all required demonstrations of competency are available within the required major coursework (as listed above). Additionally, opportunities for specific competency level demonstrations may be made available in supportive coursework within the major (e.g., RPTA 153, RPTA 182). In individual course-based assignments, learning outcomes, and competencies are assessed based upon specified criteria. Continuing instructor feedback and self-assessment exercises are intended to create a process that improves learning outcomes, as well as facilitates the student's ability to demonstrate those outcomes and competencies both before and after graduation.

It is the responsibility of the student, in consultation with their portfolio advisor, to maintain the portfolio and to insure that all requirements have been successfully completed prior to graduation. The completed portfolio is presented in RPTA 101 for Recreation and Park Management Concentration students, or RPTA 102 for Recreation Therapy Concentration students.

Program Requirements

Code	Title	Units
Required Lower Division Courses (10 Units)		
RPTA 1	Orientation to Recreation, Parks and Tourism Administration	1

Certificate in Event Planning

Units required for Certificate: 12

Program Description

The certificate program in Event Planning is designed for students interested in working for both private and public agencies in the areas of event planning, wedding planning, meeting planning, and recreational programming. Course work includes classes that teach the essentials in successful event management, including volunteer management, fundraising, sponsorships and leadership.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student's transcript and may be listed on a student's resumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Program Requirements

Certificate in Hospitality and Tourism Administration

Units required for Certificate: 12

Program Description

The certificate program in Hospitality and Tourism Administration is for students interested in careers in hospitality and tourism, two of the world's most vital and dynamic industries. Coursework includes foundational classes in both hospitality and tourism, with elective options

designed to develop higher-level problem solving skills and provide more in-depth knowledge into a specific commercial recreation area.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student's transcript and may be listed on a student's résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Total Units		12

Certificate in Natural Resources Administration

Units required for Certificate: 9

Program Description

The certificate program in Natural Resource Administration prepares students to work in outdoor recreation agencies such as California State Parks, National Parks, National Forests, and other agencies that manage our natural, cultural and heritage resources. Through an informative coursework, students will receive a strong foundation in recreation management related to providing the public with high-quality outdoor recreational opportunities.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student's transcript and may be listed on a student's résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Program Requirements

Certificate in Non-Profit Administration

Units required for Certificate: 12

Program Description

The Non-profit and tax-supported agencies are increasingly under pressure to secure their own funding and provide evidence of the impact of their programs. The certificate program in Non-Profit Administration provides students with solid skills to lead agencies in the public sector with course work in grant writing, fundraising, volunteer management and several other aspects of management for non-profit agencies. Non-RTPA majors can declare the Minor in Non-Profit Administration.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student's transcript and may be listed on a student's résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in

the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Certificate in Outdoor Adventure Administration

Units required for Certificate: 12

Program Description

The certificate program in Outdoor Adventure Administration is for students wanting to provide the public with experiences and programs to play and learn in the great outdoors. Students will extend the general park and recreation management foundation of the Recreation Administration core with courses that teach adventure recreation programming and experiential education skills.

Completion of any of the program entitles a student to receive a certificate for that program in addition to the Bachelor of Science diploma. Certificates are officially recognized by the university and will appear on a student's transcript and may be listed on a student's résumé.

Students must be declared RPTA majors or minors in order to enroll in the certificate programs. If a student fails to complete the major or minor, the certificate will not be awarded. All units must be taken in Recreation, Parks & Tourism Administration.

Bachelor of Science students: In addition to complete the requirements for the Bachelor of Science degree in Recreation Administration, students may also complete one or more of the certificate programs. Units in

the certificates may overlap with required and supportive courses in the major.

Minor students: With advisor approval, students in the RPTA Minor Program may take courses in the certificate programs to partially fulfill the requirements of the minor (please read all of the minor requirements above). Students must complete all of the requirements for the minor to receive the certificate.

Minimum Grade Requirement

A grade of "C-" or better is required in all courses applied to the certificate.

Minor in Non-Profit Administration

Units required for Minor: 21

Program Description

The Minor Programs in Non-Profit Administration and Recreation Administration are 21-unit programs designed for non-RPTA majors (RPTA majors cannot complete a minor program, and should see the link for RPTA Certificate Programs). The Minor in Non-Profit Administration will give students a solid background in grant writing and fundraising for non-profit agencies of all types, as well as the management skills to successfully lead in the non-profit sector.

All units must be taken in Recreation, Parks & Tourism Administration. At least 12 units must be upper division, with at least 9 upper division units taken in residence.

Minimum Grade Requirement

A grade of "C-" or better is required in all upper division courses applied to the minor.

Minor in Recreation Administration

Units required for Minor: 21

Program Description

The Minor in Recreation Administration is designed for students in other majors interested in learning about career areas within the recreation, parks, and tourism fields. Minor students may enroll in department certificates (see Recreation, Parks, and Tourism in catalog (<http://catalog.csus.edu/colleges/health-human-services/recreation-parks-tourism-administration>)) with advisor approval. The minor must be completed for the certificate to be awarded.

The minor requires 21 units, all of which must be taken in Recreation, Parks, and Tourism Administration. At least 12 units must be upper division, with at least 9 upper division units taken in residence at Sacramento State.

Minimum Grade Requirement

A grade of "C-" or better is required in all upper division courses applied to the minor.

Program Requirements

Total Units		21

¹ Only one of RPTA 30, RPTA 100 or RPTA 122 may be counted toward the minor.

² Minor electives in Recreation, Parks, and Tourism Administration must be chosen in conjunction with a minor advisor. Students are encouraged to follow the courses for one of the Certificate Programs as part of their 21 units.

³ Only one of RPTA 96B or RPTA 96C may be counted toward the minor.

⁴ Minor electives may not include RPTA 1, RPTA 21, RPTA 101, RPTA 102, RPTA 109, RPTA 110, RPTA 115, RPTA 116, RPTA 117, RPTA 118, RPTA 119, RPTA 195 series courses (B, C, D, or E), RPTA 198, or one-unit courses (e.g. RPTA 50 or RPTA 118).

⁵ With minor advisor approval, up to 3 units of RPTA 199 may be applied to the minor.

MS in Recreation Administration

Total units required for MS: 30

Program Description

The graduate program leading to the Master of Science degree in Recreation Administration offers diversified opportunities for study. Through individual counseling, graduate students are able to develop a course of study for advanced work in areas which complement previous experience and training. There is sufficient flexibility in the program to allow students to pursue their individual areas of interest.

Core program objectives are designed to encourage a climate of inquiry and research. Specifically, all students should gain the ability to:

- critically analyze and identify problems;
- develop and utilize appropriate research or inquiry methods of problem solving;
- report clearly and succinctly the results of problem-focused research or inquiry;
- understand the philosophical, historical, and scientific foundations and developments in leisure service systems; and
- identify and demonstrate the values of leisure and recreation to the individual, the community, and society at large.

Career competencies are dependent upon the professional goal of each student. Hence, these vary. After career objectives have been clarified, individual students usually will be educated to:

- develop valid and reliable measures of program evaluation based on theoretical constructs and practical field requirements;
- develop efficient, effective, and meaningful procedures for assessing recreation needs and for allocating resources;
- identify and demonstrate effective decision making processes in leisure service systems; and
- demonstrate an effective interpretation of leisure and recreation data, findings, and procedures, and communicate these in personal and professional environments.

Admission Requirements

Admission as a classified graduate student in Recreation, Parks & Tourism Administration requires:

- a baccalaureate degree in Recreation Administration;
- a minimum 2.75 GPA overall and a minimum 3.0 GPA in the major;
- a detailed resume;
- three letters of recommendation; and
- a writing sample/personal statement.

A student with a baccalaureate degree from another discipline may be admitted to conditionally classified standing and complete certain designated courses in Recreation Parks & Tourism Administration, totaling 15 additional units (as determined by a faculty advisor), in order

to acquire the academic background necessary to qualify for classified standing. A student from another discipline who wishes to qualify for state and/or national registration as a therapeutic recreation specialist may need to take additional coursework.

Admission Procedures

Applications are accepted as long as room for new students exists and the Office of Graduate Studies is still accepting applications. Prospective students should be aware that there is no spring admission. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470, www.csus.edu/gradstudies/ (<http://www.csus.edu/gradstudies/>):

- an online application for admission; and
- one set of official transcripts from each college and/or university attended, *other than Sacramento State*.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

At the same time each applicant must send to the Graduate Coordinator in Recreation, Parks & Tourism Administration:

- a detailed resume, including education and employment histories;
- unofficial transcripts of all previous academic work; and
- 3 recent letters of reference that address academic ability and professionalism.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree:

Units required for the MS: 30

Minimum Cumulative GPA: 3.0; as an exception to university policy a maximum of two "B-" grades may be counted towards the degree.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA;
- obtained advisor's preliminary approval of thesis or project proposal (thesis and project students only); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Recreation Parks & Tourism Administration advisor. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

RPTA 500B	Culminating Experience: Project	
RPTA 500C	Culminating Experience: Comprehensive Exam	
Total Units		30

- ¹ Elective coursework is selected with the prior consent of the student's academic advisor to satisfy the following:
- No more than 6 units of any combination of RPTA 295 and RPTA 299 may be counted towards the degree.
 - No more than 6 units of coursework may be taken outside of RPTA (students who have not previously completed an undergraduate major in Recreation, Parks & Tourism Administration must have the prior consent of the Graduate Coordinator before taking coursework outside RPTA).
 - At least 6 units of elective coursework must be at the 200 level (for a total of at least 18 units of 200 level coursework in the degree program).

Social Work

College of Health and Human Services

Program Description

Social Work is a profession that strives to enhance the well-being of all people while attending specifically to the needs and empowerment of those in vulnerable life conditions. The Sacramento State program focus embraces the interdependent interests of both the individual and society, with particular attention to the social context that creates, contributes to, and addresses obstacles and resources for individual and community growth and development.

Social Workers seek to help people address their own needs and influence the responsiveness of organizations, communities, and other social institutions, thus promoting social justice and social change. Towards these ends, multilevel Social Work activities include group work, community organization, supervision, individual and family counseling, consultation, administration, advocacy, social and political action, policy development and implementation, education, research and evaluation. In practice, Social Workers are sensitive to cultural and ethnic diversity, and work to combat discrimination, oppression, poverty, and other forms of social injustice.

The principle objective of the Bachelor of Arts in Social Work degree program is to educate beginning professional practitioners as generalists. The Master of Social Work degree program supports advanced specialized professional practice.

Degree Programs

BA in Social Work (p. 710)

Master of Social Work (p. 712)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts in Social Work and Master of Social Work are also individually accredited by Council of Social Work Education (CSWE).

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The Bachelor of Arts in Social Work and the Master of Social Work degree programs are accredited by the Council on Social Work Education.
- Many required classes will have at least one section scheduled during evening hours.
- Social Work students earn academic credit for professionally supervised field experience in a human service agency. The practicum is two to three days per week.
- All BA and MSW students receive academic and career planning advisement. Employment information for students is updated continuously.
- Graduate and undergraduate Social Work students maintain active student organizations including a chapter of Phi Alpha, a national honor society for Social Work.
- The MSW degree fulfills most of the educational requirements for California licensure as Licensed Clinical Social Worker (LCSW) and the Pupil Personnel Services Credential for School Social Work.

Career Possibilities

Geriatric Social Worker · Forensic Social Worker · Medical Social Worker · Mental Health Social Worker · Social Planner · Substance Abuse Counselor · Social Service Administrator · Community Organizer · Child and Family Counselor · Child Protective Worker · Adult Protective Worker · Occupational/Industrial Social Worker · Employee Assistance Counselor · Adoptions Worker · School Social Worker · Agency Director Program Evaluator · Family Therapist · Individual, Child & Family Therapist

SWRK 95. Introduction to Social Work. 3 Units
Term Typically Offered: Fall, Spring

Provides an overview of the social work profession and of social welfare systems especially in relation to marginalized populations. Also introduces a generalist perspective to social work practice with emphasis on professional development. Students are exposed to the values and ethics of social work, as well as the important ideologies that have shaped social welfare and social work.

Note: Includes a 30 hour volunteer experience to aid in assessing student's appropriateness for the profession. A grade of "C" or better is required before taking SWRK 140A.

SWRK 102. Crosscultural Theory and Practice: Issues of Race, Gender and Class. 3 Units

General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D

Term Typically Offered: Fall, Spring, Summer

Increase student awareness of social, political, economic, and cultural diversity. Addresses patterns and consequences of discrimination and oppression as well as theoretical and practice content and strategies for social change.

SWRK 110. Statistics and Research for Social Workers. 3 Units
Term Typically Offered: Fall, Spring, Summer

Descriptive and inferential statistics, sampling, probability distribution, introduction to research methods, relationship of statistics to research methods; illustrations drawn from the field of human services.

SWRK 111. Research Methods and Program Evaluation. 3 Units

Prerequisite(s): SWRK 110.

Corequisite(s): SWRK 140B or SWRK 140C.

Term Typically Offered: Fall, Spring

User oriented research methods focusing on locating, understanding, and using the professional research literature relevant to the development of skills for the human service practitioner; and methods of evaluating ones own practice and agency programs.

SWRK 118. Chemical Dependency and Social Work Practice. 3 Units
Term Typically Offered: Fall, Spring

Introduction to social work practice with the alcoholic/addicted individual or family. The ecological framework will be utilized for studying alcohol and drug dependence and its prevention/intervention. Emphasis will be placed on addiction as a biopsychosocial problem with a special focus on oppressed and marginalized populations.

SWRK 125A. Human Behavior and the Social Environment: Theory. 3 Units

Prerequisite(s): SWRK Majors only with Junior status; completion of pre-major BIO 1, BIO 10, BIO 20 or ANTH 1; and ECON 1A, ECON 1B or SOC 1; and CRJ 1, GERO 100, SOC 3 or SOC 10.

Term Typically Offered: Fall only

Theory forms the foundation of all social work practice, attempting to explain complicated human behavior in interaction with diverse environments. This course examines core theories of human behavior, families, small groups, organizations, social movements, and human society from a variety of social science disciplines. Each theory will be critically examined in respect to application towards diverse groups and the vulnerable populations that social workers serve.

- SWRK 125B. Human Behavior and the Social Environment: The Life Course.** 3 Units
Prerequisite(s): SWRK majors only and SWRK 125A
Term Typically Offered: Spring only
- This course examines growth and development with special focus on lifespan from birth through old age in the context of family, community, complex organizations, and society. With technological, economic, political and ecological systems rapidly changing, the course will also examine the effects on the interplay between human life and the environment.
- SWRK 126. Theories of Criminal Behavior.** 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer
- Analyzes various theories in terms of their logic, historical origins, and policy implications. Focus on developing a critical framework.
- SWRK 129. Human Sexuality in Social Work Perspectives.** 3 Units
Term Typically Offered: Fall only
- Examines psycho-social-cultural influences on sexual identity and sexual behavior; analyzes problems confronting the victims of sex-discrimination and oppression; considers education and treatment programs.
- SWRK 132. Social Work and Spirituality.** 3 Units
Term Typically Offered: Spring only
- This course examines how spirituality serves as a liberating, and at times constricting force in the lives of our clients and communities. Competencies for both assessing and engaging in discussions about our clients' spiritual world as well as self-awareness regarding social work practitioner spiritual orientations are emphasized. Diverse spiritual and religious backgrounds (including those who consider themselves non-spiritual or non-religious) are welcomed and celebrated in the classroom.
- SWRK 134. Crimes Without Victims.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
- Focuses on the study of particular behavior defined as criminal, including addiction, pornography, homosexuality, prostitution and abortion. The role of morality is examined.
- SWRK 136. Poverty and Homelessness in America.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Analyzes social theory and its relationship to the generation and retention of institutional poverty. Within this context, public and private welfare programs serving low-income populations will be examined.
- SWRK 137. The Child and the Law.** 3 Units
Term Typically Offered: Spring only
- Both civil and criminal aspects of the relationship of the applicability and effect of the law on minors, including juvenile court, wardship and dependency, liability for torts, the child and divorce.
- SWRK 138. Violence In The Family.** 3 Units
Term Typically Offered: Fall only
- Provides basic information on victims and perpetrators of violence in the family. The focus is on child maltreatment, spouse/partner battering, abuse of the elderly, and the roles and responsibilities of social workers responding to family violence.
- SWRK 140A. Social Work Practice.** 3 Units
Prerequisite(s): SWRK 95 and SWRK 125A; SWRK majors only; Junior standing and a grade of "C" or better in all previous SWRK courses
Corequisite(s): SWRK 125B
Term Typically Offered: Fall, Spring
- Provides an introduction to the profession and generalist social work practice with individuals, families, groups, organizations, and communities. Practice skills focus on application of the planned changed process from an empowerment approach.
- SWRK 140B. Social Work Practice.** 3 Units
Prerequisite(s): SWRK 95, SWRK 102, SWRK 125B, SWRK 140A, SWRK 150; SWRK majors only; senior standing; Minimum grade of "C" in all previously completed SWRK courses; GWAR certification or having met university writing requirements
Corequisite(s): SWRK 195A
Term Typically Offered: Fall, Spring
- Generalist practice through a cross-cultural lens. Focuses on culturally competent relationship building, assessment, and intervention with individuals, organizations and communities.
- SWRK 140C. Social Work Practice.** 3 Units
Prerequisite(s): SWRK 195A and SWRK 140B.
Corequisite(s): SWRK 195B
Term Typically Offered: Fall, Spring
- Focuses on family intervention through an emphasis on strengths-based case management and children and youth issues. Group work processes and intervention examined through experiential and formal learning.
Corequisite: SWRK 195B.
- SWRK 150. Welfare In America.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Examines the history, purpose, structure and costs of current American social welfare policy and programs and the role of social work in policy and program development.
- SWRK 151. Health Services and Systems.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Examines the delivery of health and mental health service with a focus on problems experienced by economically disadvantaged and oppressed populations.
- SWRK 153. Child Welfare Services.** 3 Units
Term Typically Offered: Fall, Spring
- Provides basic information on the recognition and treatment of problems of children in the home, school and community, and on the public and private social services and laws which promote and protect the welfare of children.

SWRK 191. Exploration of Veteran Studies: An Ethnographic Approach. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Through the review of ethnographic works, qualitative research articles and other significant recent literature on veterans' issues, students are introduced to the qualitative research process. Most significantly students simultaneously gain knowledge of the issues and challenges faced by veterans returning from combat as they transition to civilian life as well as the best practices in supporting positive transitions from combat to civilian life. Students will develop analytical thinking skills and writing skills for preparing literature reviews.

SWRK 195A. Field Instruction. 6 Units

Prerequisite(s): SWRK 102, SWRK 125A, SWRK 125B, SWRK 140A and SWRK 150 and permission of the Field Director (or designee).

Corequisite(s): SWRK 140B.

Term Typically Offered: Fall, Spring

Two semester sequence of instruction that takes place in a human service organization in the community wherein students demonstrate, under the auspices of a certified field instructor, their ability to apply the knowledge, practical skills, critical thinking/reasoning abilities, and interpersonal communication skills required of undergraduate level social works. Students must provide their own transportation to and from field sites, purchase malpractice insurance through the Division of Social Work.

Credit/No Credit

SWRK 195B. Field Instruction. 6 Units

Prerequisite(s): SWRK 102, SWRK 125A, SWRK 125B, SWRK 140A, SWRK 140B, SWRK 195A and SWRK 150; permission of the Field Director required.

Corequisite(s): SWRK 140C.

Term Typically Offered: Fall, Spring

Two-semester course sequence that takes place in a human service organization. Students demonstrate their ability to apply social work knowledge and practical skills. Students must provide their own transportation and purchase malpractice insurance through the Division of Social Work.

Note: Enrollment is limited to students who have secured an approved Field placement.

Credit/No Credit

SWRK 196. Working with LGBTQ Communities. 3 Units

Prerequisite(s): admitted to the Bachelor's in Social Work major in good academic standing; or other Bachelor's major with permission and available space.

This elective course is designed to provide students with an intermediate and critical understanding to conduct work with individuals who are LGBTQ, and with their kinship networks and communities. Various perspectives (e.g., historical, political, psychological, critical) are examined throughout the course to assist students in understanding the complexity and dynamics of the person-in-environment. The course builds on BSW content and upper division coursework, integrating that through applied assignments and increasing self-awareness.

SWRK 198. Co-Curricular Activities. 1 - 3 Units

Prerequisite(s): Permission of the Undergraduate Social Work Coordinator.

Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns of the Division of Social Work, including service on division policy-making committees and participation in ASI approved organizations.

Credit/No Credit

SWRK 199. Special Problems. 1 - 3 Units

Prerequisite(s): Approval of the faculty sponsor of the project and Division Chair.

Term Typically Offered: Fall, Spring

Independent research, project or directed reading.

Note: Open to students who are capable of independent work.

Credit/No Credit

SWRK 202. Social Work and Diverse Populations. 3 Units

Term Typically Offered: Fall, Spring

Prepares students to understand cultural and social diversity. Addresses theoretical and practice dimensions of social work with diverse and oppressed and vulnerable people for personal and social empowerment in behalf of human dignity and social justice.

SWRK 204A. Social Work Practice I. 3 Units

Corequisite(s): SWRK 295A.

Term Typically Offered: Fall, Spring

Building on the liberal arts framework and using the ecological model, this course introduces students to generalist social work practice with individuals, families, small groups, organizations, disadvantaged populations, communities, and society.

SWRK 204B. Social Work Practice II. 3 Units

Prerequisite(s): SWRK 204A, SWRK 295A.

Corequisite(s): SWRK 295B.

Term Typically Offered: Fall, Spring

Broadens the ecological perspective to address economic and political issues, social stratification, and racism as they impact practice with at-risk populations; promoting change at multiple levels of intervention.

SWRK 206A. Multi-Level Practice for Behavioral Health. 3 Units

Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, and advancement to candidacy.

Corequisite(s): SWRK 296A

Builds upon content of SWRK 204B and provides advanced knowledge and skills for mental health assessments, diagnosis and treatment and to provide long-term and acute mental health treatment, respond to acute trauma and indigent populations.

Note: Enrollment is limited to students who have secured an approved Field placement.

- SWRK 206B. Multi-Level Practice for Behavioral Health. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 206A, SWRK 296A, and advancement to candidacy.
Corequisite(s): SWRK 296B
 Builds upon content of SWRK 204B and provides advanced knowledge and skills for mental health assessments, diagnosis and treatment and to provide long-term and acute mental health treatment, respond to acute trauma and indigent populations.
Note: Enrollment is limited to students who have secured an approved Field placement.
- SWRK 207A. Multi-Level Practice for Children & Families. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, and advancement to candidacy.
Corequisite(s): SWRK 297A
 Builds upon content of SWRK 204B and provides advanced knowledge and skills in areas affecting children and families with a specific focus on training students in Child Protective Services, abuse, neglect and human trafficking.
Note: Enrollment is limited to students who have secured an approved Field placement.
- SWRK 207B. Multi-Level Practice for Children & Families. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 207A, SWRK 297A, and advancement to candidacy.
Corequisite(s): SWRK 297B
 Builds upon content of SWRK 204B and provides advanced knowledge and skills in areas affecting children and families with a specific focus on training students in Child Protective Services, abuse, neglect and human trafficking.
Note: Enrollment is limited to students who have secured an approved Field placement.
- SWRK 208A. Multi-Level Practice for Health & Aging. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B and advancement to candidacy.
Corequisite(s): SWRK 298A
 Builds upon content of SWRK 204B and provides advanced knowledge and skills for hospital and hospice care, respond to the needs of Baby Boomers, support diversity in aging choices while assisting clients with management of health care, housing and quality of life optimization.
Note: Enrollment is limited to students who have secured an approved Field placement.
- SWRK 208B. Multi-Level Practice for Health & Aging. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 208A, SWRK 298A, and advancement to candidacy.
Corequisite(s): SWRK 298B
 Builds upon content of SWRK 204B and provides advanced knowledge and skills for hospital and hospice care, respond to the needs of Baby Boomers, support diversity in aging choices while assisting clients with management of health care, housing and quality of life optimization.
Note: Enrollment is limited to students who have secured an approved Field placement
- SWRK 210. Methods of Social Research. 3 Units**
Prerequisite(s): Undergraduate social statistics course.
Term Typically Offered: Fall, Spring
 Examination of quantitative and qualitative methods of social work research. Includes problem formulation, selection of various conceptual frameworks, research designs, sampling, collecting data, experimental design and computer technology.
- SWRK 213. Public Child Welfare Practice. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B.
Term Typically Offered: Fall, Spring
 Integrates the concepts and skills learned in Advanced Practice, Advanced Policy, and Research courses of the MSW program and applies to the specific client population of public child welfare agencies. Required for Title IV-E stipend students; open to others on basis of space availability.
- SWRK 215. Mediation & Restorative Justice. 3 Units**
Term Typically Offered: Fall, Spring
 The course examines the principles, policies, goals, and practice of mediation and restorative justice in social work settings including the adult and juvenile criminal justice systems, family court, child welfare, schools, mental health, health, and community dispute resolution centers. Students will learn mediation and restorative justice practice skills to work effectively with individuals as both clients and providers of services, as well as within various institutions, systems, and communities.
- SWRK 218. Chemical Dependence: Strategies and Tactics for Social Work Practice. 3 Units**
Term Typically Offered: Fall, Spring
 Designed to increase the sensitivity of graduate social work students to the major intervening variables contributing to the problem of chemical dependence in contemporary American society.
- SWRK 219. Social Work Practice in Health Care Settings. 3 Units**
Term Typically Offered: Fall, Spring
 Provides intervention strategies useful in health care settings. Individual, family and group practice strategies are presented as well as discharge planning, advocacy, ethnically sensitive issues, and collaboration practice within hospital settings.
- SWRK 221. Community Organizing Practice. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B or instructor permission.
Term Typically Offered: Fall, Spring
 Focuses on intervention at the community level with a special emphasis on grass roots organizing and advocacy.
- SWRK 223. DSM New Developments in Psychodiagnosis. 3 Units**
Term Typically Offered: Fall, Spring
 Designed to give practitioners and students hands-on experience in using the DSM IV Manual. Videotapes, case vignettes, and small group discussions used.
- SWRK 224. Advanced Mental Health Practice. 3 Units**
Prerequisite(s): SWRK 204A, SWRK 204B or instructor permission.
Term Typically Offered: Fall, Spring
 Examines a variety of theoretical views on adaptations of childhood and adulthood with accompanying models for assessment and treatment. Explores current views on intra-psychic and interpersonal functioning utilized in mental health settings.
- SWRK 225. Advanced Group Work Methods: Process and Intervention Strategies. 3 Units**
Term Typically Offered: Fall, Spring
 Covers small group theory and process, and group method in a variety of settings, with emphasis on group development.

- SWRK 226. Family Intervention: Contemporary Issues in Social Work Practice.** 3 Units
Term Typically Offered: Fall, Spring
 Critically addresses the origins and contemporary context and models of interventions with families.
- SWRK 228. Clinical Intervention in Sexual Abuse.** 3 Units
Term Typically Offered: Fall, Spring
 Presents an intervention system that can assist professionals to work with sexually abusive families and victims of sexual abuse. Assessment, planning, and treatment are described and methods of intervention demonstrated.
- SWRK 232. Spirituality and Social Work.** 3 Units
Term Typically Offered: Fall, Spring
 Considers the role of spirituality in the socialization process of the professional as well as the client by examination of spirituality, values, ethics, principles, and philosophies as influences on personal and professional interactions.
- SWRK 235A. Theoretical Bases of Social Behavior.** 3 Units
Term Typically Offered: Fall, Spring
 Examines the growth, change and interaction of individuals, families and groups, organizations, and communities with special attention to lifespan development and systems theory.
- SWRK 235B. Theoretical Bases of Social Behavior.** 3 Units
Prerequisite(s): SWRK 235A.
Term Typically Offered: Fall, Spring
 Focuses on major personality theories; principal theories of health, illness and disordered behavior; child and family dynamics; and theories of group and organizational behavior.
- SWRK 238A. Issues and Practice in Schools.** 3 Units
Prerequisite(s): Admission to the College of Social Work Program.
Corequisite(s): SWRK 204C, SWRK 295C.
Term Typically Offered: Fall, Spring
 Introduces the student to the field of school social work in its dynamic social, educational, legal, political, and human complexity. Examines the challenges of rapid social and demographic change in California as well as the need for restructuring education and innovative responses.
Note: Required for Pupil Personnel Services Credential.
- SWRK 238B. Issues and Practice in Schools.** 3 Units
Prerequisite(s): SWRK 204C, SWRK 238A, SWRK 295C.
Corequisite(s): SWRK 204D, SWRK 295D.
Term Typically Offered: Fall, Spring
 Continuation of SWRK 238A, course examines classroom management, case assessment, alternative education practices, discipline and attendance law, impediments to individual development as well as case studies, interagency collaboration, new community partnerships, and media and high technology uses.
Note: Required for Pupil Personnel Services Credential.
- SWRK 245. Death, Grief And Growth.** 3 Units
Term Typically Offered: Fall, Spring
 Death and the process of terminating life seen from the social, cultural, personal and medical perspectives. Comparisons of competing, contradictory or complementary views of death among specific religions, social classes, ethnic groups and superstitions and taboos connected with the dead.
- SWRK 250. Social Welfare Policy and Services.** 3 Units
Term Typically Offered: Fall, Spring
 Analyzes contemporary social welfare policy and the ways in which policy is carried out through a broad spectrum of agencies and services, in a historical and philosophical context relevant to professional social workers. This course meets the foundation competencies of social welfare policies and services within the specific context of thinking, reading and writing in social work policy practice.
Note: Graduate Writing Intensive (GWI) course.
- SWRK 252. Advanced Policy for Behavioral Health.** 3 Units
Prerequisite(s): SWRK 250 and advancement to candidacy.
 Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on Behavioral Health policy and services, involuntary commitment, access to care and patients' rights, financing and organization of Behavioral Health services, legislation and community engagement around Behavioral Health issues.
- SWRK 253. Advanced Policy for Children & Families.** 3 Units
Prerequisite(s): SWRK 250 and advancement to candidacy
 Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on sociopolitical issues, laws and court decisions, history and role of government in public child welfare practice, children's and parents' rights, child custody, sexual abuse laws, and emancipation.
- SWRK 254. Advanced Policy for Health & Aging.** 3 Units
 Builds on the foundation content of SWRK 250 with deeper knowledge of diverse theoretical and practical approaches to policy analysis, development, implementation, and evaluation to empower communities and individuals, to advance and protect human rights, and to optimize social justice. Focuses on the policies and services for meeting the health, economic, psychological, and the social needs of the older adults and those in health care settings.
- SWRK 258. Advanced Policy - Children and Families.** 3 Units
Prerequisite(s): SWRK 251.
Term Typically Offered: Fall, Spring
 Building upon SWRK 251, this course examines the history of child and family services, introduces the students to theories and methods of policy analysis, and focuses on analysis of selected federal, state, and local policies specifically relevant to children and families, as well as how social workers influence policy formulation and implementation.
Note: Required for title IV-E students.
- SWRK 259. International Social Work.** 3 Units
Term Typically Offered: Fall, Spring

SWRK 261. Grant Writing and Resource Development. 3 Units
Term Typically Offered: Fall, Spring

Prepares students for resource and grant proposal development as well as grant project management and evaluation. Students will develop various skills including how to identify and communicate with appropriate funding sources conceptualize, write and submit a grant proposal prepare a grant budget; administer a grant funded program; and evaluate program outcomes, and peer reviews of grant proposals.

SWRK 262. Social Work Practice in Rehabilitation. 3 Units
Prerequisite(s): Admission to MHSA cohort and instructor permission.
Term Typically Offered: Fall, Spring

Reflects the current best practices of psychosocial rehabilitation, and pays particular attention to the nuances of those practice expectations within the context of the Mental Health Services Act of 2004. The course requirement for all students who are recipients of the mental health stipend in the Division of Social Work.

SWRK 268. Advanced Clinical Social Work with Older Adults. 3 Units
 The focus of this course is on specialized practice with aging clientele. The curriculum is intended to help students adapt social work theory (person-in-environment), practice principles, standards and values to practice with older adults. This course includes a critical analysis of the theoretical underpinnings of gerontological thought and assists students to view aging through multiple perspectives with an examination of physiological, psychological and sociological phenomenon.

SWRK 295A. Field Instruction. 3 Units
Prerequisite(s): Must be classified graduate Social Work student and approval of the Field Director or designee.
Corequisite(s): SWRK 204A.
Term Typically Offered: Fall, Spring

Field Instruction

Note: Enrollment is limited to students who have secured an approved Field placement

Credit/No Credit

SWRK 295B. Field Instruction. 4 Units
Prerequisite(s): SWRK 204A and 295A; Must be classified graduate Social Work student and approval of the Field Director or designee.
Corequisite(s): SWRK 204B.
Term Typically Offered: Fall, Spring

Field Instruction

Note: Enrollment is limited to students who have secured an approved Field placement.

Credit/No Credit

SWRK 295E. Post Master's Pupil Personnel Services Fieldwork. 3 Units
Prerequisite(s): Admission to Post Master's PPS program.
Term Typically Offered: Fall, Spring

School based sites for the development of Pupil Personnel Services skills. Two days per week.
 Credit/No Credit

SWRK 295F. Post Master's Pupil Personnel Services Fieldwork. 3 Units
Prerequisite(s): Admission to Post Master's PPS program.
Term Typically Offered: Fall, Spring

School based sites for the development of Pupil Personnel Services skills. Two days per week.
 Credit/No Credit

SWRK 296. Social Work with LGBTQ Communities. 3 Units
Prerequisite(s): admitted to the Master's in Social Work program in good academic standing; or other Master's program with permission and available space.

This elective course is designed to provide students with an in-depth and critical understanding to conduct social work with individuals who are LGBTQ, and with their kinship networks and communities. Various perspectives (e.g., historical, political, psychological, and critical theory) are examined throughout the course to assist students in understanding the complexity and dynamics of the person-in-environment perspective. The course builds on first year MSW content, integrating that through assignments as well as deepening self-awareness in service of professional development.

SWRK 296A. Field Instruction for Behavioral Health. 5 Units
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, and advancement to candidacy.

Corequisite(s): SWRK 206A

Field Instruction for Behavioral Health

Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 296B. Field Instruction for Behavioral Health. 5 Units
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 206A, SWRK 296A, and advancement to candidacy
Corequisite(s): SWRK 206B

Field Instruction for Behavioral Health

Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 296D. Advanced Social Work Practice with Persons with a Developmental Disability. 3 Units

The definition, incidence, etiology, and prevention of developmental disabilities will be presented. This course also examines the life course needs of people with developmental disabilities including the collaboration of families and community, the role of social workers and other health professionals in the California Regional Center System and the Department of Developmental Disabilities, as well as presenting general issues related to service delivery systems, advocacy movements, criminal justice system involvement, mental health, sexuality issues as well as social policy issues.

SWRK 297A. Field Instruction for Children & Families. 5 Units
Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, and advancement to candidacy.

Corequisite(s): SWRK 207A

Field Instruction for Children & Families

Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 297B. Field Instruction for Children & Families. 5 Units

Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 207A, SWRK 297A, and advancement to candidacy.

Corequisite(s): SWRK 207B

Field Instruction for Children & Families

Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 298A. Field Instruction for Health & Aging. 5 Units

Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, and advancement to candidacy.

Corequisite(s): SWRK 208A

Field Instruction for Health & Aging

Note: Enrollment is limited to students who have secured an approved field placement.

Credit/No Credit

SWRK 298B. Field Instruction for Health & Aging. 5 Units

Prerequisite(s): SWRK 204A, SWRK 204B, SWRK 295A, SWRK 295B, SWRK 208A, SWRK 298A, and advancement to candidacy

Field Instruction for Health & Aging

Note: Enrollment is limited to students who have secured an approved field placement.

SWRK 299. Special Problems. 1 - 3 Units

Prerequisite(s): Approval by faculty sponsor and division director.

Term Typically Offered: Fall, Spring

Individual research and directed reading. Written report required.

Credit/No Credit

SWRK 500. Culminating Experience. 2 - 4 Units

Prerequisite(s): Advanced to candidacy. SWRK 210.

Term Typically Offered: Fall, Spring

Completion of either: A. Thesis (an original contribution to knowledge) OR B. Research Project (addition to technical/professional knowledge or application of knowledge through case study, field study, documentary report, substantial annotated bibliography, or article of publishable quality) OR C. Directed Study and Comprehensive Examination (seminar, portfolio, examination).

SWRK 501. Advanced Research Methods. 2 Units

Prerequisite(s): SWRK 202, SWRK 204A, SWRK 204B, SWRK 210, SWRK 250 and Advancement to Candidacy

Term Typically Offered: Fall, Spring

This course offers a classroom structure to project-based research education. Class includes both qualitative and quantitative study design, theory construction, advanced methods of data analysis. This course expands on the knowledge gained from SWRK 210 (Methods of Research). Students will experience a mixture of advanced research content including: quantitative research designs, sampling, data collection and analysis, advanced quantitative research designs, sampling, data collection and analysis.

SWRK 502. Integrative Capstone Project. 2 Units

Prerequisite(s): SWRK 501

Term Typically Offered: Fall, Spring

This course is designed to reflect the student's proficiency in the core competencies of the social work profession. The focus of this course is the identification of a social work problem, developing a research design which appropriately addresses the problem, and presentation of the findings. Students demonstrate professional competencies in: ethics, communication, diversity, theory, research, direct and indirect and indirect practice, leadership and organizational processes and evidence of a professional self.

BA in Social Work

Units required for Major: 48

Total units required for BA: 120

Program Description

The Bachelor of Arts in Social Work is a 48-unit program that prepares students for beginning, generalist Social Work practice. All lower division general education courses must be completed prior to beginning the Social Work major. The curriculum consists of 42 units in professional foundation/beginning generalist requirement, 6 units of Social Work electives. Grades of "C" or better are required in all 48 units of the major. The student must agree to abide by the Code of Ethics of the National Association of Social Workers and engage in ethical practice in conformity with the Professional Code of Ethics.

Undergraduate students enroll in one academic year of field instruction (internship) during their senior year after successfully completing all prerequisites in their junior year. Field instruction is 16 hours per week for 32 weeks during two semesters for a total of 512 hours. Field instruction takes place between the hours of 8:00 a.m. - 5:00 p.m. on either Mondays/Wednesdays or Wednesdays/Fridays. Placements only begin in the fall semester and are arranged by the Director of Field Education during the preceding spring semester through an application and interview process. Students are placed in a social services agency and practice under the supervision of an experienced MSW Social Worker. Since Social Work is an applied profession, the student is expected to be able to put into practice the knowledge gained in the classroom in order to receive the BA degree in Social Work.

Students must be capable of meeting field site/organization eligibility requirements which normally include obtaining a Department of Justice clearance (passing a criminal background), being free of communicable diseases, having a valid driver's license, and automobile insurance. In addition to the prerequisites and corequisites noted below, other eligibility requirements are delineated in the Field Curriculum and Policy Guide which is accessible from the Division's field website (<http://www.hhs.csus.edu/swrk/field>). Declaration of Social Work as the student's major does not guarantee enrollment in field instruction.

Pre-Major Requirements for Social Work Undergraduate Program

The Pre-Major is a total of 9 units from G.E. Area B2, 3 units in Area D (Part A) and 3 units in Area D (Part B).

Students who want to become a Pre-Major in Social Work are required to take the courses from the following three G.E. areas, and earn a "B"

grade or better ("B-" is not accepted). Students must also have at least 2.5 GPA to declare the major.

Code	Title	Units
Area B2 Life Forms (3 Units)		
<i>Select one of the following:</i>		3
BIO 1	Biodiversity, Evolution and Ecology	
BIO 10	Basic Biological Concepts	
BIO 20	Biology: A Human Perspective	
ANTH 1	Introduction to Biological Anthropology	
Area D The Individual and Society (Part A) (3 Units)		
<i>Select one of the following:</i>		3
ECON 1A	Introduction to Macroeconomic Analysis	
ECON 1B	Introduction to Microeconomic Analysis	
PSYC 2	Introductory Psychology	
SOC 1	Principles of Sociology	
Area D The Individual and Society (Part B) (3 Units)		
<i>Select one of the following:</i>		3
CRJ 1	Introduction to Criminal Justice and Society	
GERO 100	Aging Issues in Contemporary America	
SOC 3	Social Problems	
SOC 10	Issues in Crime and Social Control	
Total Units		9

Recommended Lower Division Preparation

Completion of all lower division General Education requirements is a prerequisite for taking courses in the Social Work major. Lower division courses in the following areas are strongly recommended and most can be taken as part of completing GE requirements. These courses provide the basis for a Liberal Arts perspective which is required by the Council on Social Work Education, the accrediting organization for the professional Social Work degree: written communication; critical thinking; physical science; a biology course with human anatomy content; quantitative reasoning; world civilizations; introduction to the arts; humanities; psychology; sociology; cultural diversity; American Institutions; and foundations in social and behavioral sciences. Community college transfer students should consult a counselor to identify courses which qualify for General Education transfer credit.

Minimum Grade Requirement

Grades of "C" or better are required in all 48 units of the major.

Program Requirements

Code	Title	Units
Required Lower Division Courses (3 Units)		
SWRK 95	Introduction to Social Work	3
Required Upper Division Courses (45 Units)		
<i>Professional Foundation/Beginning Generalist</i>		
SWRK 102	Crosscultural Theory and Practice: Issues of Race, Gender and Class ¹	3
SWRK 110	Statistics and Research for Social Workers	3
SWRK 111	Research Methods and Program Evaluation	3
SWRK 125A	Human Behavior and the Social Environment: Theory	3
SWRK 125B	Human Behavior and the Social Environment: The Life Course	3

SWRK 140A	Social Work Practice	3
SWRK 140B	Social Work Practice	3
SWRK 140C	Social Work Practice	3
SWRK 150	Welfare In America ¹	3
SWRK 195A	Field Instruction	6
SWRK 195B	Field Instruction	6
<i>Social Welfare Policy and Human Behavior</i>		
<i>Select two of the following:</i>		6
SWRK 118	Chemical Dependency and Social Work Practice	
SWRK 126	Theories of Criminal Behavior ¹	
SWRK 129	Human Sexuality in Social Work Perspectives	
SWRK 132	Social Work and Spirituality	
SWRK 134	Crimes Without Victims	
SWRK 136	Poverty and Homelessness in America	
SWRK 137	The Child and the Law	
SWRK 138	Violence In The Family	
SWRK 151	Health Services and Systems	
SWRK 153	Child Welfare Services	
SWRK 191	Exploration of Veteran Studies: An Ethnographic Approach ¹	
Total Units		48

¹ Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (13 Units)		
B1	Physical Science	3
B2	Life Forms ²	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)	1
B4	Math Concepts	3
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (0-6 Units)		
Area D Course ³		0-3
Area D Course ⁴		0-3
Area D Course ⁵		0
Area D Course - Take upper-division course to complete Area & upper division requirements. ⁵		0

Area E: Understanding Personal Development (3 Units)

Area E Course	3
Total Units	37-43

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Department recommends BIO 1, BIO 10, BIO 20, or ANTH 1 to meet Area B2.

³ Department recommends ECON 1A, ECON 1B, PSYC 2, or SOC 1 to meet Area D (Part A).

⁴ Department recommends CRJ 1, GERO 100, SOC 3, or SOC 10 to meet Area D (Part B).

⁵ Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (6-9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI) ²		0 - 3
Graduation Requirements (required by Sacramento State) (9 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE) ³		0
Foreign Language Proficiency Requirement ⁴		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Department recommends SWRK 126 or SWRK 191 to meet the Writing Intensive (WI) Graduation Requirement.

³ Required in Major; also satisfies Graduation Requirement.

⁴ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Master of Social Work

Total units required for MSW: 60

Program Description

The Master of Social Work program is a 60-unit program that prepares students for advanced, autonomous Social Work practice. The curriculum is composed of two semesters of professional foundation and two semesters of a specialized curriculum. In the foundation part of the

program, all students take a core of courses designed to provide them with the knowledge and skills expected of all professional Social Workers. The advanced curriculum prepares graduates for specialized practice in 1 of 3 areas; behavioral health; child, adolescent and family; or health and aging. The curriculum consists of a generalist practice foundation year and an advanced practice second year. Also required are advanced courses in Social Work practice and policy, and specialized practice electives are recommended.

Graduate students enroll for two years of field instruction. In the first year, they are assigned to a social service agency for two days a week (8 a.m. to 5 p.m., Thursday and Friday). First year students must be available Thursdays and Fridays (8 a.m. to 5 p.m.) for field instruction in order to complete the concurrent program. In the second year, they are assigned to an agency in their specialized practice area for three days a week (8 a.m. to 5 p.m., Monday, Tuesday, and Wednesday). These field instruction requirements may only be fulfilled during regular working hours. Students are responsible for their own transportation to field instruction sites and for required professional liability insurance.

Students must be capable of meeting field site/organization eligibility requirements which include obtaining a Department of Justice clearance (passing a criminal background), being free of communicable diseases, having a valid driver's license, and automobile insurance. In addition to the prerequisites and corequisites noted below, other eligibility requirements are delineated in the Field Curriculum and Policy Guide which is accessible from the Division's field website (<http://csus.edu/hhs/sw/fieldeducation>). Admission into the graduate program does not guarantee enrollment in field instruction.

Students should develop a realistic plan for financial support for the period of time they are in school. Information about Financial Aid is included in the University's Application for Admission booklet. The Division of Social Work cannot guarantee courses on days and times that will not conflict with employment hours. The program offers some courses on weekends and all required courses have at least one evening section. In addition to the two-year full time program, the division also offers a three-year program option, a weekend cohort program, and advanced placement.

Note: Please contact the Division of Social Work for a copy of the evaluation criteria for admission to the Master of Social Work program.

Admission Requirements

To be considered for admission to the Master of Social Work program, applicants must have:

- a baccalaureate degree from an accredited college or university;
- passed an approved course in statistics with a grade of "C" or better;
- completed a course with human biology content with a grade of "C" or better;
- a minimum GPA of 2.8 for the last 60 units of coursework;
- demonstrated writing proficiency; and
- completed the Liberal Arts foundation (GE requirements).

The Graduate Record Exam (Analytical Writing Score) is required.

The Analytical Writing score is weighted and combined with the last 60 unit GPA and the application review scores. There is no minimum score requirement for the GRE Analytical Writing Portion.

If admitted applicant scores less than 4.5 on the GRE Writing exam, she/he would not necessarily be eliminated from the pool, however, would be required to take and pass a writing intensive course in the summer, prior to Fall enrollment.

All applications are reviewed by Faculty Reviewers. Previous academic work, experience in human services, personal development, and potential for successful professional practice are important considerations in the evaluation of applicants.

Admission Procedures

Application materials are available from the Division of Social Work's admissions office and our Web site at <http://www.csus.edu/hhs/sw/msw/mswapplication.html>. For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

All applicants must complete an online university application for admission and a Sacramento State Division of Social Work Application.

Students rank their preferred specializations based upon the three options:

- Behavioral Health
- Children & Families
- Health & Aging.

All prospective graduate students, including Sacramento State graduates, must submit the following to the Division of Social Work Admissions Office:

- an application for admission and supplemental information needed by the Division of Social Work; including the choice of Specialized Area of practice in order of priority.
- an indication whether the application is for the two- or three-year program;
- three letters of recommendation from academic or employment references; and
- one set of unofficial transcripts from all colleges and universities attended, *other than Sacramento State*.

Applicants must submit the following to the Sacramento State Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and
- one set of official transcripts from all college and universities attended, *other than Sacramento State*.

Attendance at an advising session prior to the beginning of classes is required. Students unable to attend must make special arrangements for the initial advising prior to the beginning of courses.

Advanced Standing Program

The Advanced Standing Program is available to a limited number of students who have a baccalaureate degree in Social Work from a Social Work program accredited by the Council on Social Work Education. The minimum GPA is 3.3 in the Social Work major. Minimum grades of "B +" must have been earned in undergraduate professional foundation coursework. Students who have a GPA of 3.5 or higher but have **ONE** of their equivalent undergraduate courses with the grade of "B" may apply for advanced standing. The degree must have been awarded within five years prior to application for admission to the graduate program. Submission of a letter of recommendation from a field instructor and from a Social Work faculty member of the college from which graduated

and an acceptable research prospectus for a thesis/research project is required before awarding advanced placement. Advanced placement students take 32 units in the second year of the MSW program. Advanced placement is determined only during the admissions process.

Minimum Units and Grade Requirement for the Degree

Units require for the MSW: 60

Minimum Cumulative GPA: 3.0

Students must take all required courses in a prescribed, sequential order to advance to the next level of courses. The program is normally completed in four semesters of full time study, beginning in the fall semester (a three-year program is also available; requirements are the same). The program consists of 28 units of professional foundation common courses that all students must take and 32 units of the concentration curriculum which consists of advanced content and nine units of electives. **Graduate students who achieve a grade of "C-" or lower will not be able to credit that course toward their degree; and, must maintain a minimum 3.0 GPA to remain in the program. A student could receive two "C" grades in the Master's program and continue as long as their GPA does not go below a 3.0.**

Note: The faculty of the Division of Social Work may require a student to leave under specified terms, terminate a student's enrollment, or decline to award a degree if the Director of the Division, upon the recommendation of faculty, determines that this is in the best interests of the division or the community which it serves or that a student is not qualified for admission to the Social Work profession because of factors other than academic standing. Determination about factors other than academic standing are made in accordance with the NASW Code of Ethics and the Division of Social Work's Student Performance Standards.

All professional Social Work programs are required to provide foundation content that consists of the knowledge, values, and skills that are basic for practice in any setting situation, and which prepare one for more advanced, specialized learning. Six areas of study are introduced in the foundation: Social Work research, Social Work practice, human behavior in the social environment, social welfare policy, multicultural theory, practice, and field instruction.

In the second year of the program students will be asked to select from three specializations

- Behavioral Health
- Children & Families
- Health & Aging

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any grade deficiencies;
- completed at least 28 units; graduate students who achieve a grade of "C-" or lower will not be able to credit that course toward their degree
- a minimum 3.0 GPA required
- obtained approval of culminating experience; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within

the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with his/her Advisor. The completed form is approved by the Division of Social Work, Graduate Director and the Office of Graduate Studies.

Program Requirements

Code	Title	Units
Professional Foundation Requirements (28 Units)		
SWRK 202	Social Work and Diverse Populations	3
SWRK 204A	Social Work Practice I	3
SWRK 204B	Social Work Practice II	3
SWRK 210	Methods of Social Research	3
SWRK 235A	Theoretical Bases of Social Behavior	3
SWRK 235B	Theoretical Bases of Social Behavior	3
SWRK 250	Social Welfare Policy and Services ✍	3
SWRK 295A	Field Instruction	3
SWRK 295B	Field Instruction	4
Specialized Practice Requirements (19 Units)		
<i>Select one area of specialization from the three listed below</i>		19
Behavioral Health Specialization		
SWRK 206A	Multi-Level Practice for Behavioral Health	
SWRK 206B	Multi-Level Practice for Behavioral Health	
SWRK 252	Advanced Policy for Behavioral Health	
SWRK 296A	Field Instruction for Behavioral Health	
SWRK 296B	Field Instruction for Behavioral Health	
Children and Families Specialization		
SWRK 207A	Multi-Level Practice for Children & Families	
SWRK 207B	Multi-Level Practice for Children & Families	
SWRK 253	Advanced Policy for Children & Families	
SWRK 297A	Field Instruction for Children & Families	
SWRK 297B	Field Instruction for Children & Families	
Health and Aging Specialization

SWRK 228	Clinical Intervention in Sexual Abuse
SWRK 232	Spirituality and Social Work
SWRK 245	Death, Grief And Growth
SWRK 258	Advanced Policy - Children and Families
SWRK 259	International Social Work
SWRK 261	Grant Writing and Resource Development
SWRK 262	Social Work Practice in Rehabilitation

Culminating Experience Choices (for all three specialized practice areas) (4-6 Units)

SWRK 500	Culminating Experience	2 - 4
or SWRK 501	Advanced Research Methods	
SWRK 502	Integrative Capstone Project	2
Total Units		32-34

Every effort is made to match the second year specialized area of practice student with a SWRK 500, SWRK 501 or SWRK 502 experience that is designed as an advanced research experience within the student's selected area of specialized practice.

College of Natural Sciences and Mathematics

College Overview

The College of Natural Sciences and Mathematics emphasizes hands on experience and interaction with professors. Students in the classroom have access to state-of-the art instruments and unique facilities such as the two-story anechoic chamber for measuring sound and the well field for monitoring ground water. The College offers strong academic programs in Biological Sciences, Chemistry, Geography, Geology, Mathematics and Statistics, and Physics and Astronomy.

The College's six academic departments collectively offer thirteen baccalaureate degree programs, eight minor concentrations, four teaching credential programs, four certificate programs, and six Master's degree programs, including the Professional Science Master's. Unique strengths of programs within the College include the following:

Program Descriptions

Program Descriptions

Biology

The Department of Biological Sciences offers a wide array of educational opportunities in biology. Students may enroll in programs designed to give broad training across the biological sciences and earn a Bachelor of Arts or Bachelor of Science degree in General Biology. Students wishing to specialize in a sub-discipline of biology may enroll in several concentrations within the Bachelor of Science Program. Available

concentrations include Biomedical Sciences, Cell and Molecular Biology, Clinical Laboratory Science, Forensic Biology, Microbiology, and Ecology, Evolution and Conservation. The Department also offers the Minor in Biological Sciences to students from other Departments. The location of Sacramento State is ideal for diverse field trip experiences from the Sierra to the Pacific as well as both laboratory and field internship opportunities with County, State, and Federal agencies. The Department also offers state-of-the-art laboratory facilities including students access to the Advanced Cell Analysis Laboratory, the Center for Interdisciplinary Molecular Biology, and Moss Landing Marine Laboratory.

At the Graduate level, the Department of Biological Sciences offers both general and specialized Masters of Arts and Masters of Science degree programs in Biological Sciences. This includes a Masters of Arts degree in Stem Cell Biology, funded by the California Institute of Regenerative Medicine in collaboration with the University of California, Davis. The Department also offers Masters of Science concentrations in General Biology, Cell and Molecular Biology, and Ecology, Evolution and Conservation.

Graduates from the Department of Biological Sciences may pursue a variety of professions, including health and medicine, biotechnology and other laboratory-based research, and work with state and federal agencies. Many also pursue graduate education within one of the many sub-disciplines of biology.

Chemistry

Chemistry prepares students for a wide variety of careers in areas such as environmental chemistry and toxicology, materials science, government and industry labs, biotechnology, high school science teaching, medicine and related health sciences, pharmacy and pharmacology, patent law, computational chemistry, forensic analysis, and many more. The Department of Chemistry offers the BS in Chemistry (certified by the American Chemical Society), a BS in Biochemistry, and BA degrees including concentrations in Biochemistry and Forensic Chemistry. A Chemistry Minor is also offered. The Department offers an MS in Chemistry and an MS in Chemistry, Biochemistry concentration. A signature feature of our programs is the extensive, hands-on experience with modern instrumentation. Our graduates are known in the region for their knowledge and ability to operate instruments. Every undergraduate degree program includes a capstone laboratory research experience in one or more upper division labs which further prepares students for industry employment and preparation for PhD programs.

Geography

Geography prepares students to do mapping and spatial analysis, international work, planning, and environmental management. The Department of Geography offers a BA degree that provides each student both breadth and specialization. Four concentrations are available: Geographic Information Systems (GIS) and Analysis, Human Geography, Metropolitan Area Planning, and Physical Geography. The Department also offers minors in Geography and GIS. Strengths of the program include numerous opportunities for field work and internships.

Geology

Geology is an interdisciplinary science that examines the processes that shape Earth's resources, hazards and environments. The Geology Department offers BA, BS, and MS degrees in Geology; a BA in Earth Science, and a Minor in Geology. This Department, in conjunction with the on-campus staff of the United States Geological Survey, offers excellent preparation for careers in Geology and graduate study.

Mathematics and Statistics

The Department of Mathematics and Statistics offers a variety of options to cater to the particular interests of its majors. The flexibility of the major allows students to pursue their BA degree in pure mathematics, applied mathematics and statistics, or the teaching program. Graduates have met with much success in finding employment in both the public and private sectors, particularly in high school teaching and local private industry. The Department also offers Minors in Mathematics and Statistics, and a MA degree for those who wish to pursue advanced study that can open opportunities to teach at the community college level, to pursue a PhD in mathematics, or to take jobs in industry or government.

Physics and Astronomy

The Department of Physics and Astronomy offers several degree options in Physics. The BS in Physics is suited for those planning to earn an advanced degree in physics or a related field. The BS with the Applied Physics Concentration combines advanced physics coursework with practical skills such as instrumentation and computing for careers in the high technology sector. Our traditional BA degree in physics provides a flexible, yet rigorous program in the liberal arts tradition, while those electing the BA with the Teacher Preparation Concentration will be very well prepared for a career as a high school or middle school educator. The Department also offers Minors in Physics and Astronomy and Certificates in Scientific Instrument Development and Scientific Computing and Simulation.

The College also supports a number of college-wide programs. Some of the larger ongoing programs are:

Center for Science and Math Success

The Center for Science and Math Success (Success Center) serves as an umbrella for several existing programs in the College of Natural Sciences and Mathematics with the goal of providing innovative and comprehensive student and academic support services to students in math and science courses. Programs include:

- Science Education Equity (SEE) (<http://csus.edu/nsm/see>)
- Peer Assisted Learning (PAL) (<http://csus.edu/nsm/pal>)
- PASS Advising (<http://csus.edu/nsm/successcenter/pass/pass%20advising/pass%20advising.html>)
- Commit to Study (<http://www.csus.edu/indiv/p/paradisj/studyskills.htm>)

The Success Center focuses on the implementation of interventions designed to contribute to overall student success, leadership, and engagement. In essence, the Success Center is a one-stop shop for students to obtain help to be a successful student as well as leadership opportunities within Center programs. For more information, contact Center Director Kelly McDonald via email (mcdonald@csus.edu). For more information about the Center for Science and Math Success, please click here (<http://csus.edu/nsm/successcenter>).

Center for Mathematics and Science Education

The mission of the MASE Center at Sacramento State is to improve the quality of mathematics and science teaching and learning in the schools of the Sacramento region. The MASE Center supports faculty from the Colleges of Natural Sciences and Mathematics and Education to develop and administer professional development projects for K-12 teachers and education research grants to improve the teaching of math and science at all levels. The MASE Center houses the Sacramento Area Science Project and the Sacramento State Mathematics Project,

and hosts monthly short courses for teachers such as Science in the River City (SIRC) and Mathematics Saturday Seminars. For more information, contact Director Rich Hedman at (916) 278-5487 or via email (hedmanrd@csus.edu). For more information about the Center for Mathematics and Science Education, please click here (<http://www.csus.edu/mase>).

Moss Landing Marine Laboratories

Moss Landing Marine Laboratories are located on Monterey Bay. The facility is operated by a consortium of six California State University campuses and offers upper division and graduate courses in marine sciences.

Premedical and Preprofessional Programs

The College of Natural Sciences and Mathematics offers coursework which allows students to prepare for medical, dental, optometry, podiatry, pharmacy, and veterinary school. Information on the preparation necessary for entry into these health professions is found in the Premedical pages of this catalog.

Subject Matter Preparation (Pre-Credential Preparation)

California State University, Sacramento has programs for students who are interested in becoming high school or middle school teachers in science or mathematics. These programs consist of two parts: subject matter preparation programs (in which students learn the background in the subject matter they will teach) and credential programs (in which students develop the knowledge and skills related to how to teach). The College of Natural Sciences and Mathematics offers subject matter preparation programs in Biological Sciences, Chemistry, Mathematics, and Physics. Single Subject Teaching Credential programs are offered by the California State University, Sacramento College of Education. Additionally, California State University, Sacramento offers a blended program in mathematics, in which students work on their subject matter preparation and teaching credential at the same time. Information on subject matter programs in Biological Sciences, Chemistry, and Physics is found in the Science Subject Matter Program pages in this catalog. Information on the subject matter program in mathematics and the blended program in mathematics is found in the Mathematics and Statistics pages.

Departments/Programs

- Biological Sciences
- Chemistry
- Geography
- Geology
- Mathematics and Statistics
- Physics and Astronomy

Contact Information

- Joanna Mott, Dean
- Lisa Hammersley, Associate Dean (Student Success)
- Yinfa Ma, Associate Dean (Research & Engagement)

Biological Sciences

College of Natural Sciences and Mathematics

Program Description

The Department of Biological Sciences offers both undergraduate and graduate degree programs. At the undergraduate level, students are able to earn a Bachelor of Arts degree, a Bachelor of Science degree, or a Minor in Biological Sciences. Within the Bachelor of Science degree program students may focus their work by selecting one or more of the following concentrations: Biomedical Sciences, Cell and Molecular Biology, Clinical Laboratory Sciences, Ecology, Evolution and Conservation, Forensic Biology, or Microbiology; or students may choose to obtain the Bachelor of Science in General Biology.

At the Graduate level, students may earn a Master of Arts or Master of Science degree in Biological Sciences and may also focus their work by pursuing a concentration in Ecology, Evolution, and Conservation or in Molecular and Cellular Biology within the Master of Science in Biological Sciences.

Degree Programs

BA in Biological Science (p. 733)

BS in Biological Science (p. 745)

BS in Biological Science (Biomedical Sciences) (p. 735)

BS in Biological Science (Cell and Molecular Biology) (p. 737)

BS in Biological Science (Clinical Laboratory) (p. 739)

BS in Biological Science (Ecology, Evolution, and Conservation) (p. 741)

BS in Biological Science (Forensic Biology) (p. 743)

BS in Biological Science (General Biology) (p. 745)

BS in Biological Science (Microbiology) (p. 747)

Biological Sciences Honors Program (p. 734)

Minor in Biological Science (p. 753)

Subject Matter Program (Pre-Credential Preparation) (p. 760)

Certificate in Issues in Natural Resource Management (p. 749)

Cooperative Education Program (Work Experience) (p. 750)

MA in Biological Science (General) (p. 750)

MA in Biological Science (Stem Cell) (p. 751)

MS in Biological Science (Ecology, Evolution, and Conservation) (p. 753)

MS in Biological Science (General) (p. 755)

MS in Biological Science (Molecular and Cellular Biology) (p. 757)

Special Features

- An Academic Achievement Certificate in *Issues in Natural Resource Management* may be earned with coursework beyond the B.S.

- Laboratory experiences are included with most major's courses, giving students an exceptional level of on-hands training during the degree program.
- The Department maintains a large collection of thousands of living and preserved plants and animals that are used for instruction, research, and public outreach. A complete list of the Department's current collections can be found on the Department's webpage (www.csus.edu/bios).
- Students have the opportunity to engage in research in a wide range of projects with individual faculty and through two University-recognized centers, each of which is composed of a cross-disciplinary interdepartmental group of faculty: CREST (the Center for Regional Environmental Science and Technology) and CIMERA (the Center for Interdisciplinary Molecular Biology Education, Research and Advancement).
- The Sierra Nevada and the Pacific Coast are equally accessible from Sacramento, providing field biology students the opportunity to study an extraordinary number of varied habitats.
- Sacramento State is one of the seven participating CSU campuses at Moss Landing Marine Laboratories (MLML) near Monterey.
- Located in the State Capital, Sacramento State provides a unique opportunity for students to become involved with various State and Federal agencies through biological internships and part-time employment.
- Public agencies, hospitals, clinics, and private health practices in the Sacramento area provide opportunities for students interested in the health care fields.

WRIGHT, T. MICHAEL

BIO 1. Biodiversity, Evolution and Ecology. 5 Units**General Education Area/Graduation Requirement:** Life Forms (B2), Laboratory (B3)**Term Typically Offered:** Fall, Spring, Summer

Introduction to properties of life and cells leading to genetic and biological diversity. Survey of biological diversity emphasizing variation leading to natural selection; introduction to ecological concepts within an evolutionary framework; a survey of ecosystems and global climate change. Development of scientific skills will be emphasized. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours; fee course.

Note: Field trips may be required.

Fee course.

Field trip(s) may be required.

BIO 2. Cells, Molecules and Genes. 5 Units**Prerequisite(s):** BIO 1 and CHEM 1A.**Term Typically Offered:** Fall, Spring

Introduction to molecular and cellular biology and genetics. Topics include biomolecules, cell structure and function, cellular energetics, molecular flow of information, cell division, and genetic inheritance. Development of scientific skills and a scientific mindset will be emphasized throughout the course, particularly in lab exercises and activities. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours.

BIO 7. Introduction to the Science of Biology. 4 Units**General Education Area/Graduation Requirement:** Laboratory (B3), Life Forms (B2)**Term Typically Offered:** Fall, Spring

Introduction to major concepts of biology, including properties of living things, cells and their molecular constituents, the unity and diversity of organisms, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Satisfies requirements in biology for students planning to obtain the Multiple Subject Teaching Credential. Lecture three hours; laboratory three hours. Fee course.
Fee course.

BIO 9. Our Living World: Evolution, Ecology and Behavior. 3 Units**General Education Area/Graduation Requirement:** Life Forms (B2)**Term Typically Offered:** Fall, Spring

Designed for non-majors, this course is an introduction to the biological science behind important issues that face us today, such as those surrounding evolution, endangered species, conservation of ecosystems, and the behavior of organisms. By gaining an understanding of the scientific approach and the principles of evolution, ecology and behavior, students will be equipped to evaluate scientific developments and arguments in these and other issues as informed citizens. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.**BIO 10. Basic Biological Concepts. 3 Units****General Education Area/Graduation Requirement:** Life Forms (B2)**Term Typically Offered:** Fall, Spring

An intensive introductory course for non-majors who will take additional course work in biology or related disciplines, including the allied health sciences. Introduction to the biological sciences with strong emphasis on cellular structure and metabolism, molecular biology and genetics, as well as concepts and principles common to all living systems including ecology and evolution. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.**BIO 15L. Laboratory Investigations in Biology. 1 Unit****Prerequisite(s):** BIO 9, BIO 10 or BIO 20.**Corequisite(s):** BIO 9, BIO 10 or BIO 20.**General Education Area/Graduation Requirement:** Laboratory (B3)**Term Typically Offered:** Fall, Spring

Introductory laboratory investigation of the major principles of biology, including properties of all living things, the unity and diversity of organisms, structure and function of cells, energy and metabolism, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Laboratory three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.**BIO 20. Biology: A Human Perspective. 3 Units****General Education Area/Graduation Requirement:** Life Forms (B2)**Term Typically Offered:** Fall, Spring

Introduction to biological concepts with emphasis on their application to humans. Topics include: Evidenced-based decision making with respect to food, nutritional supplements, drugs, pathogens, and biotechnology. How heredity and evolution contribute to our understanding of personality, sex, behavior, addiction, disease, and aging is also discussed. Lecture three hours.

Note: Not open to majors in biological sciences and/or students who have received credit for BIO 10.**BIO 22. Introductory Human Anatomy. 4 Units****Prerequisite(s):** BIO 1, BIO 2 or BIO 10**Term Typically Offered:** Fall, Spring

Introduction to the study of the gross and microscopic structure of the human body using a systemic approach. Lecture three hours; laboratory three hours. Fee course.
Fee course.

- BIO 25. Human Anatomy and Physiology I. 4 Units**
Term Typically Offered: Fall, Spring
- BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 25 offers basic terminology and concepts pertaining to the disciplines of anatomy and physiology, including structure/function relationships, homeostasis, and organizational levels; and provides an introduction to the structure and function of the muscular and nervous systems.
Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.
- Fee course.
- BIO 26. Human Anatomy and Physiology II. 4 Units**
Prerequisite(s): BIO 25 or instructor permission.
Term Typically Offered: Fall, Spring
- BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 26 provides an introduction to the structure and function of the cardiovascular, respiratory, renal and digestive systems, and emphasizes homeostatic control mechanisms.
Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.
- Fee course.
- BIO 30. Anatomy & Physiology - Brief Course. 4 Units**
Prerequisite(s): Physical Education majors only
Term Typically Offered: Fall, Spring
- An overview of the basic anatomy and physiology of all systems. Designed to meet the standards for the Physical Education Subject Matter Program, but may also may prepare students for study in other health-related fields.
- BIO 39. Microbiology for Allied Health Students. 4 Units**
Prerequisite(s): BIO 10; CHEM 5 or CHEM 6A and CHEM 6B or equivalent.
Term Typically Offered: Fall, Spring
- Introduction to micro-organisms, particularly bacteria and viruses, with emphasis on health care-related applications of microbiology using case studies. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, demonstration of microbial properties and will provide practice with basic microbiological skills. Lecture three hours; laboratory three hours. Fee Course.
Note: Does not satisfy microbiology requirement for Biological Sciences majors.
- Fee course.
- BIO 100. Introduction to Scientific Analysis. 2 Units**
Prerequisite(s): BIO 1, BIO 2, and STAT 1; declared Biological Sciences majors only or instructor consent
Term Typically Offered: Fall, Spring
- Covers anatomy of scientific literature, reading and writing scientific papers, proper citation formats, basic interpretation of tables and figures, graphical analysis, basic statistical analysis, experimental design to effectively test a hypothesis, and effective presentation of an experiment. Lecture one hour. Activity two hours.
Note: Course cannot be taken concurrently with or after taking BIO 167
- BIO 102. The Natural History of Plants. 3 Units**
Prerequisite(s): A college course in biology or instructor permission.
Term Typically Offered: Fall, Spring
- Major plant communities of California provide a framework for understanding the interrelationships of natural environments and the dominant trees and shrubs of these areas. Identification of these species and the wildflowers of the communities are emphasized in the lab and field trips. Designed for minors in biology or for those with an interest in their natural surroundings, but is acceptable for majors who have not completed BIO 112. Lecture one hour; laboratory six hours. Fee course.
 Fee course.
 Field trip(s) may be required.
- BIO 103. Plants and Civilization. 3 Units**
Prerequisite(s): BIO 10 or equivalent.
Term Typically Offered: Fall, Spring
- Study of the significance of plants in the development of human civilization. Emphasis will be placed on the botanical, sociological and economic aspects of plants useful to humans. Lecture three hours.
- BIO 104. Physiology of Human Reproduction. 3 Units**
Prerequisite(s): BIO 1, BIO 2 or BIO 10.
Term Typically Offered: Spring only
- Study of the physiology of human reproduction. Topics to be covered include: gametogenesis, the basis of fertility, conception, prenatal development, parturition, lactation and the physiology of contraception. Lecture three hours.
- BIO 105. Life in the Ocean. 3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
- Study of marine life and ocean ecosystems. Exploration of the unique adaptations of marine life, how marine organisms interact with their environment, diversity of marine habitats from coral reefs to deep sea, and conservation. Does not count toward the Biological Sciences Major.
- BIO 106. Genetics: From Mendel to Molecules. 3 Units**
Term Typically Offered: Fall, Spring
- Introduction to the principles of genetics and scientific approaches used to define those principles. The physical basis of heredity, the impact of selective breeding and genetic engineering will be discussed. Lecture two hours; discussion one hour.
Note: BIO 10 recommended.

- BIO 109. Biology of Dinosaurs.** **3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
 Introduction to the biology of the dinosaurs. Dinosaurs came in a vast array of shapes and sizes and exemplify biodiversity. This course will examine the dinosaurs in an evolutionary framework, discussing their origin, the major lineages, phylogeny and what they look like today. The course will take advantage of the recent surge in scientific investigations into the biology of dinosaurs, such as parental care, sexual selection, group living, flight and feathers. Does not count toward the Biological Sciences Major.
- BIO 112. Plant Taxonomy.** **4 Units**
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only
 Spring flora of central California is used as the focus of study in the classification and identification of native vascular plants. Lecture two hours; laboratory six hours. Field trips may be required. Fee course. Field trip(s) may be required.
- BIO 113. Evolution and Speciation in Flowering Plants.** **3 Units**
Prerequisite(s): BIO 1 and BIO 2 or equivalent.
Term Typically Offered: Fall only – even years
 A survey of the important tools and mechanisms used to study speciation in plants. Topics include the molecular basis of evolutionary change, intraspecific genetic variation at both the local and landscape levels, theory regarding mechanisms of speciation, and the importance of polyploidy. Readings will be from both a text and from the primary literature, and will include in-depth discussions of historical and modern studies in plant evolution. Lecture three hours.
- BIO 115. Introduction to Neuroscience.** **4 Units**
Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.
Term Typically Offered: Fall, Spring
 Investigation of the structure and function of the central nervous system including neuroanatomy and neurophysiology, sensorimotor integration. The lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory exercises focus on gross- and micro- neuroanatomy, models of membrane electrophysiology and motor system function. Lecture/discussion three hours; laboratory three hours. Cross Listed: PSYC 115; only one may be counted for credit.
- BIO 118. Natural Resource Conservation.** **3 Units**
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only – odd years
 Introduction to the principles and practices of biological conservation. Historical development of conservation philosophy; current issues in conservation of renewable natural resources; conservation administration. Lecture three hours.
- BIO 120. Biology of Aging.** **3 Units**
Prerequisite(s): BIO 1, BIO 2, BIO 10 or BIO 20.
Term Typically Offered: Fall, Spring
 Theories of aging, cellular aging and aging effects on the various human body systems. Lecture three hours.
Note: Not open for credit to students who have previously taken BIO 131.
- BIO 121. Molecular Cell Biology.** **3 Units**
Prerequisite(s): BIO 184
Term Typically Offered: Fall, Spring
 Comparison of the cellular and molecular biology of prokaryotic and eukaryotic cells. Emphasis will be placed on membrane structures, transport phenomena, cell to cell communication, cellular reproduction, genetic architecture, gene expression and metabolism, as well as the eukaryotic endomembrane, cytoskeleton and extracellular matrix systems. Lecture three hours.
- BIO 122. Advanced Human Anatomy.** **4 Units**
Prerequisite(s): BIO 22.
Term Typically Offered: Spring only
 Gross structure of the human body using a regional approach. Lecture three hours; laboratory three hours. Fee course.
- BIO 123. Neuroanatomy.** **3 Units**
Prerequisite(s): BIO 22.
Term Typically Offered: Fall only
 Gross and microscopic structures of the central, peripheral and autonomic nervous systems. The lectures are correlated with laboratory exercises and demonstrations using human prosected cadaver specimens, audio-visual slide projected materials, charts and models. Lecture two hours; laboratory three hours. Fee course.
- BIO 124. Clinical Hematology.** **3 Units**
Prerequisite(s): CHEM 161 and BIO 184
Term Typically Offered: Spring only
 Basic principles and current clinical laboratory procedures used in the study of blood; emphasis on morphological and chemical changes in the disease processes. Lecture two hours; laboratory three hours. Fee course.
- BIO 125. Body Fluid Analysis.** **1 Unit**
Prerequisite(s): CHEM 161 or instructor permission.
Term Typically Offered: Fall only
 Production of body fluids (e.g., urine, cerebrospinal, pleural, peritoneal, pericardial, and synovial fluids); their normal characteristics and pathological changes will be discussed. A description of the laboratory tests used in the clinical evaluation of body fluids will also be presented.
- BIO 126. Comparative Vertebrate Morphology.** **3 Units**
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only
 Study of the anatomical systems of vertebrates in an evolutionary and functional context. Covers vertebrate form, function, development and phylogeny, overviews of organ systems, and how their modification founded the major events of vertebrate evolution including metamorphosis, water-to-land transition, tetrapodal locomotion, feeding and reproduction. Labs complement lectures with dissections of three representative species (shark, salamander, cat), and surveys of specializations in other forms. Lecture two hours; laboratory three hours. Fee course.

<p>BIO 127. Developmental Biology. 4 Units Prerequisite(s): BIO 2. Term Typically Offered: Fall only</p> <p>This course examines the progression of fertilized eggs of vertebrate organisms through embryonic development. This progression will be studied at biochemical, molecular, genetic, morphological and physiological levels, with an emphasis on the progressive changes that occur within cells, tissues and organs in the embryo. We will use a comparative approach between a variety of model organisms to understand similarities and differences among vertebrate and selected invertebrate species. Fee course.</p> <p>Note: Prerequisite will be enforced by instructor.</p> <p>Fee course.</p>	<p>BIO 132. Neurophysiology. 3 Units Prerequisite(s): BIO 131 or both BIO 25 and BIO 26. Term Typically Offered: Fall, Spring</p> <p>Organization and function of the nervous system will be explored. Topics include mechanisms of communication between neurons, integration of sensory and motor systems, and functional brain systems. Diseased states will be introduced, as appropriate. Lecture 3 hours.</p> <p>BIO 133. Cardiovascular, Respiratory and Renal Physiology. 3 Units Prerequisite(s): BIO 131. Term Typically Offered: Spring only</p> <p>Advanced consideration of the integrated physiology of the cardiovascular, respiratory, and renal systems, including acid-base physiology. Advanced problem-solving, analysis of case studies, and interpretation of experimental findings will be included. Lecture three hours.</p>
<p>BIO 128. Plant Anatomy and Physiology. 4 Units Prerequisite(s): BIO 1 and BIO 2. Term Typically Offered: Spring only</p> <p>An integrative examination of our current understanding of plant structure and function. Students will apply fundamental principles of cell and molecular biology, evolution, and ecology to understand the relationships between plant anatomy and plant physiology that have enabled plants to achieve such a high level of success as primary producers on our planet. Lecture three hours, laboratory three hours. Fee course.</p> <p>Fee course.</p>	<p>BIO 134. Medical Mycology. 3 Units Prerequisite(s): BIO 139. Term Typically Offered: Spring only – even years</p> <p>Study of the morphology, cultural characteristics and classification of fungi which are pathogenic for humans, as well as fungi which appear as common contaminants. Lecture two hours; laboratory three hours. Fee course.</p> <p>Fee course.</p>
<p>BIO 130. Histology. 3 Units Prerequisite(s): BIO 22 Term Typically Offered: Spring only</p> <p>Study of the morphology and physiology of cells in primary normal human tissues and the arrangement and adaptations of tissues in organs and organ systems. The characteristics and properties of abnormalities in human tissues will be covered if time permits. Lecture two hours; laboratory three hours.</p>	<p>BIO 135. Endocrinology. 3 Units Prerequisite(s): BIO 121. Term Typically Offered: Fall only</p> <p>Advanced consideration of the principles of endocrinology with special emphasis on the role of hormones in growth, metabolism, stress (including the hormonal interactions during exercise) and disease. Various endocrine disorders, will serve as the model for case studies, current literature analysis and advanced problem-solving activities. Lecture three hours.</p>
<p>BIO 131. Systemic Physiology. 4 Units Prerequisite(s): CHEM 1B or CHEM 6B and BIO 1 or BIO 2 or BIO 10 or BIO 22. Term Typically Offered: Fall, Spring</p> <p>Physiology of organ systems with emphasis on control and integration of system function. Experiments using humans and selected vertebrate animal models are performed in the laboratory to illustrate functional characteristics of organ systems discussed in lecture and to provide direct experience with techniques, recording systems, and methods of data analysis commonly used in physiology and related fields. Lecture three hours; laboratory three hours. Fee course.</p> <p>Fee course.</p>	<p>BIO 139. General Microbiology. 4 Units Prerequisite(s): BIO 184; CHEM 20 or CHEM 24 Term Typically Offered: Fall, Spring</p> <p>Introduction to microorganisms, particularly bacteria and viruses, their physiology and metabolism. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, and demonstration of microbial properties. Lecture three hours; laboratory three hours. Fee course.</p> <p>Fee course.</p>
<p>BIO 131A. Advanced Problems in Physiology. 1 Unit Corequisite(s): BIO 131 Term Typically Offered: Fall, Spring</p> <p>Advanced problem-solving in physiology designed for students concurrently enrolled in BIO 131. Students explore solutions to challenging problem sets under the direct supervision of an experienced section leader. Discussion: two hours.</p> <p>Credit/No Credit</p>	<p>BIO 140. Medical Microbiology and Emerging Infectious Diseases. 3 Units Prerequisite(s): BIO 39 or BIO 139. Term Typically Offered: Spring only</p> <p>Lectures, discussions, and readings regarding infectious viruses, bacteria, fungi, and parasites, with an emphasis on highly relevant pathogens including emerging infectious agents and microbes that are regionally endemic. The clinical syndrome, along with the molecular and cellular aspects of the course of infection of each pathogen will be discussed. Additionally, the history of microbiology and medicine as well as a brief overview of laboratory methods used for diagnosis will also be covered. Lecture three hours.</p> <p>Note: BIO 140 cannot substitute for BIO 144 in the CLS concentration in Biological Sciences.</p>

BIO 143. General Virology.**Prerequisite(s):** BIO 121 and BIO 139**Term Typically Offered:** Spring only

Lectures and demonstrations on the fundamental characteristics and properties of plant, animal and bacterial viruses. Lecture three hours.

BIO 144. Pathogenic Bacteriology.**Prerequisite(s):** BIO 139.**Term Typically Offered:** Fall, Spring

Morphological, physiological and immunological characteristics of pathogenic bacteria. In the laboratory, pure culture studies are emphasized. Lecture two hours; laboratory six hours. Fee course. Fee course.

BIO 145. The Diversity of Microorganisms.**Prerequisite(s):** BIO 139.**Term Typically Offered:** Spring only

Isolation, cultivation and characterization of a wide variety of soil and water microbes from natural habitats using a variety of culture and non-culture based techniques; natural habitats also will be examined directly for the numbers and varieties of microbes which are present using bioinformatic and statistical tools. Lecture two hours; laboratory six hours.

BIO 149A. Immunology.**Prerequisite(s):** BIO 121 and BIO 139**Term Typically Offered:** Fall, Spring

Nature of antigens, antibodies and their reactions. The development of the immune response and its role in immunity and pathology. Lecture two hours.

BIO 149B. Immunology and Serology Laboratory.**Prerequisite(s):** BIO 139, BIO 149A.**Term Typically Offered:** Fall, Spring

Laboratory exercises designed to provide familiarity with common clinical laboratory procedures in serology. Laboratory three hours. Fee course. Fee course.

BIO 149C. Advanced Problems in Immunology.**Prerequisite(s):** BIO 139 and CHEM 161.**Corequisite(s):** BIO 149A.**Term Typically Offered:** Fall only

Advanced problem-solving in immunology designed for students concurrently enrolled in BIO 149A. Discussions and problem sets are focused on the medical, clinical, and biotechnology applications of immunology. Discussion one hour.

Credit/No Credit

BIO 150. Forensic Biology.**Prerequisite(s):** BIO 1, BIO 2 and BIO 184.**Term Typically Offered:** Spring only

Principles governing the application of biology and biological statistics to solve crimes. Topics include evidence examination and preservation, presumptive and confirmatory serological tests, hair comparison, generation and statistical analysis of mitochondrial and nuclear DNA profiles, structure and administration of the modern crime laboratory, and the role of the criminalist in the U.S. court system. Lecture two hours; laboratory three hours.

Note: Not offered every semester**BIO 151. Advanced Laboratory Techniques in Forensic Biology. 2 Units****Prerequisite(s):** BIO 150 or instructor permission.**Term Typically Offered:** Fall only

Laboratory exercises focusing on current research problems and skills in forensic serology, DNA typing, and court testimony. Topics will include DNA mixture and low copy number interpretation, advanced techniques in serological testing, research ethics, as well as skills for effective communication in the courtroom. Topics may also include Y-STR typing, animal and plant DNA identification and typing, microbial forensics, somatic mosaicism, ELISA specificity and sensitivity testing, and other current areas of active inquiry. Designed to prepare students for entry level positions as DNA analysts in federal, state, and local crime laboratories. Laboratory six hours. Fee course. Fee course.

BIO 152. Human Parasitology.**Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only

Examines, in detail, the most important species of protozoans, flukes, tapeworms and roundworms that infect humans. Life cycles, pathology and prophylaxis constitute the principal topics in lectures. Morphology, physiology, taxonomy and diagnosis constitute the principal topics in the laboratory. Lecture two hours; laboratory three hours. Fee course. Fee course.

BIO 156. Food Microbiology.**Prerequisite(s):** BIO 139.**Term Typically Offered:** Fall, Spring

Microbiology of food fermentations, food preservation and spoilage. Lecture two hours; laboratory three hours. Fee course. Fee course.

BIO 157. General Entomology.**Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Fall only

Biology of insects and a brief consideration of other terrestrial arthropods. Includes structure, physiology, ecology, classification, economic importance, collection and preservation of insects. Lecture three hours; laboratory three hours. Fee course. Fee course.

BIO 160. General Ecology.**Prerequisite(s):** BIO 1 and BIO 2 or BIO 1 and BIO 10; BIO 100 or ENVS 120. Fee course.**Term Typically Offered:** Fall, Spring

Examination of the interrelationships among organisms and their environments. Designed for the major in Biological Sciences or related fields. Topics include the structure and function of terrestrial and aquatic ecosystems, population and community dynamics and human effects on ecosystems. Projects and field trips required. Lecture two hours; laboratory three hours.

Fee course.

Field trip(s) may be required.

BIO 162. Ichthyology: The Study of Fishes.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Fall only – even years

Biology of fishes: structure, physiology, ecology, economic importance, propagation and classification. Methods of identification, life history study, propagation, collection and preservation. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 164. Amphibians and Reptiles: An Introduction to Herpetology.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only – even years

Taxonomy, natural history, ecology and distribution of amphibians and reptiles with emphasis on local forms. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 166. Ornithology.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only – odd years

Biology of birds: structure, physiology, ecology, behavior, and classification. Methods of life history study, ecological studies, laboratory and field identification. Lecture two hours; laboratory three hours. Field trips required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 167. Quantitative Methods in Biology.**3 Units****Prerequisite(s):** STAT 1 and BIO 100 or graduate status**Term Typically Offered:** Spring only

Focuses on statistical hypothesis testing and experimental design in the biological sciences. Topics include the development of a hypothesis, study design and implementation, management and presentation of data, identification of data types, and appropriate use of statistical procedures. General application to a wide range of biological disciplines and will emphasize the scientific process, critical thinking skills, and the interpretation of statistical results, which will include a project culminating a scientific paper and presentation. Lecture two hours; laboratory three hours.

BIO 168. Mammalogy.**4 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Fall only

Biology of mammals: structure, physiology, ecology, behavior, classification. Methods of life history, laboratory and field identification, collection and preservation. Lecture three hours; laboratory three hours. Field trips required. Fee course.

Fee course.

Field trip(s) may be required.

BIO 169. Animal Behavior.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only

Introduction to the fascinating world of why animals do the things that they do. Focus is on the evolution and function of animal behavior through understanding the costs and benefits of different behavior including foraging, fighting and reproduction. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 170. Advanced Nutrition and Metabolism.**3 Units****Prerequisite(s):** CHEM 161, FACS 113; or instructor permission.**Term Typically Offered:** Spring only – odd years

Study of the physiologic function of carbohydrates, lipids, protein and micronutrients including integrated metabolism, transport, regulation and relation to inborn errors/chronic disease. Introduction to gene-nutrient interaction.

Cross Listed: FACS 170; only one may be counted for credit.

BIO 173. Principles of Fisheries Biology.**3 Units****Prerequisite(s):** BIO 160, STAT 1.**Term Typically Offered:** Fall only – odd years

Introduction to the biological principles basic to fisheries science, including enumeration, recruitment, growth, abundance and mortality. Mathematics, computer modeling, and field methods will be used to understand natural populations and the impact of fishing on those populations in keeping with modern approaches to fisheries science which are grounded in population ecology and conservation biology. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 178. Molecular Ecology.**4 Units****Prerequisite(s):** BIO 184**Corequisite(s):** BIO 188**Term Typically Offered:** Fall, Spring

A survey of the use of molecular tools to understand ecological questions. Lecture will focus on the background and history of the use of molecular tools in ecological settings, including application of molecular tools to conservation of natural resources. Laboratory will include techniques for both wet lab and analysis of molecular data, including interpretation of results. Students will complete a capstone-style project that will culminate in the production of a research proposal.

BIO 179. Conservation Biology & Wildlife Management.**3 Units****Prerequisite(s):** BIO 100. BIO 160 recommended.**Term Typically Offered:** Spring only – odd years

Study of human effects and management of ecological systems, including populations, communities, and ecosystems. Topics include population and biodiversity responses to human activities, endangered species management, reserve design, and restoration.

Note: Lecture two hours; laboratory and fieldwork three hours. Fee course.

Fee course.

- BIO 180. Advanced Molecular Biology.** **4 Units**
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall, Spring
- Examination of the structure of genes and genomes, the mechanisms by which they change, and the use of evolutionary relationships to understand function. Mechanisms of the regulation of gene expression from gene to phenotype and the tools used to study these processes. Applications of molecular tools in medicine and biotechnology and the ethics around these approaches. Lecture two hours, laboratory six hours.
- BIO 183. Cancer Biology.** **3 Units**
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall only
- Study of cancer from the molecular level to the effect on whole tissues and organs. Topics to be covered include the classification and nomenclature of cancers, the process leading up to the formation of a cancer, the possible causes of cancer, and possible treatment. Lecture two hours.
- BIO 183A. Advanced Problems in Cancer Biology.** **1 Unit**
Prerequisite(s): BIO 121 and BIO 184 and BIO 183 or instructor permission; BIO 183 may be taken concurrently
Term Typically Offered: Fall, Spring
- Literature searches and discussions are focused on medical, clinical, and biotechnological applications of Cancer Biology.
- BIO 184. General Genetics.** **4 Units**
Prerequisite(s): BIO 1 and BIO 2; declared major in Biological Sciences, Biochemistry, Chemistry or instructor consent
Term Typically Offered: Fall, Spring, Summer
- Principles of inheritance as they relate to microorganisms, plants, animals and humans. Genetic mechanisms are analyzed according to evidence derived from both classical and current research. The nature, structure, and function of the genome are considered at the molecular level. Lecture three hours; laboratory three hours. Fee course. Fee course.
- BIO 185. Topics in Biology.** **3 Units**
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2; CHEM 20.
Term Typically Offered: Fall, Spring
- Current topics in cellular, developmental and/or molecular biology. Topics will vary. May be taken more than once provided that topics are different. Lecture three hours.
- BIO 186A. Cell and Molecular Biology Seminar.** **1 Unit**
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall, Spring
- Series of at least 10 seminars in cell and molecular biology. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement.
- Credit/No Credit
- BIO 186B. Ecological and Environmental Issues Seminar.** **1 Unit**
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall only
- Series of at least 10 seminars in ecological and environmental issues. Topics within each seminar will vary each semester.
Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement. Cross Listed: ENVS 186B; only one may be counted for credit.
- Credit/No Credit
- BIO 186C. Introduction to Health Careers Seminar.** **1 Unit**
Term Typically Offered: Fall, Spring
- Designed for pre-health professional students who are in the process of researching traditional and non-traditional health professions and careers. This course consists of at least 10 seminars presented by various practicing health professionals, health professional students, and health professional school admissions officers. Topics vary each semester. One hour per week.
 Credit/No Credit
- BIO 187. Advanced Cell Biology.** **4 Units**
Prerequisite(s): BIO 121 and BIO 184.
Term Typically Offered: Fall, Spring
- Advanced cellular and molecular biology of eukaryotic cells. Comparison to prokaryotic organism will be made as needed to illustrate key concepts. Emphasis will be placed on cellular functions and utilize two or more cellular systems; including cell to cell communication, regulation of gene expression, uptake and secretion, regulation of cytoskeletal configuration, cell migration and cellular reproduction. Lecture two hours, laboratory six hours.
- BIO 188. Evolution.** **3 Units**
Prerequisite(s): BIO 184 or instructor permission.
Term Typically Offered: Fall, Spring
- General survey of evolutionary processes: mechanisms of evolutionary change, adaptation and history of life. Designed for biological sciences majors. Lecture three hours.
- BIO 194. Biology-Related Work Experience.** **6 - 12 Units**
Term Typically Offered: Fall, Spring
- Supervised employment in a biology or biology-related company or agency arranged through the Department of Biological Sciences and the Cooperative Education Program office. Requires preparation of application packet, completion of a three to six month, full-time or part-time work assignment, and a written report.
Note: Open only to upper division or graduate students with appropriate preparation. Consent of Department Cooperative Education Committee required, and Committee will determine the number of units to be granted. Students may enroll for no more than 12 total units, and units may not be used to meet biology major or graduate course work requirements.
- Credit/No Credit

BIO 195. Biological Internship.**1 - 2 Units****Prerequisite(s):** Department chair and instructor (representing the appropriate biological discipline) permission.**Term Typically Offered:** Fall, Spring

Supervised work-learn experience in biology with a public or private organization. Up to 4 units may be taken. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

BIO 195D. Dental Internship.**1 - 2 Units****Prerequisite(s):** Department chair and instructor (representing the appropriate preprofessional discipline) permission.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in the medical-related and business-related aspects of dentistry. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Note: 1 unit = 40 hours of participation/semester and 2 units = 80 hours of participation/semester; May be repeated for up to 4 units of credit .

Credit/No Credit

BIO 195M. Medical Internship.**2 Units****Prerequisite(s):** Department Chair, Instructor and Placement Agency's permission required.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in multiple aspects of health care. Includes a volunteer experience in the community, supplemental readings, and a presentation on current issues in medicine and health education. No more than 2 units of BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Note: 80 hours of participation/semester

Credit/No Credit

BIO 195P. Pharmacy Internship.**1 - 2 Units****Prerequisite(s):** Department Chair, Instructor, and Placement Agency permission required.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in pharmacy. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and Bio 199 combined can be applied to the biological sciences upper division major requirement. May be repeated for up to 4 units of credit. 1.0-2.0 units (40-80 hours of participation/semester).

Credit/No Credit

BIO 195T. Teaching Internship.**1 - 2 Units****Prerequisite(s):** Department chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in K-12 teaching. Includes regular meetings with supervising teacher and submission of a field experience journal. May be repeated for credit.

Note: No more than 2 units from BIO 195, 197 and 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

BIO 197A. Laboratory Teaching Assistant.**1 - 2 Units****Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised experiences will include aspects of laboratory preparation and aspects of teaching biology laboratory courses. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.**BIO 197B. Laboratory Techniques.****1 - 2 Units****Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised laboratory experiences for advanced students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197C. Co-curricular Activities in Biology.**1 - 2 Units****Term Typically Offered:** Fall, Spring

Students may earn BIO 197C credit by participating as tutors and/or section or discussion leaders for biological sciences classes or teaching as voluntary instructors or tutors in K-12 courses or programs offered by other community organizations. Participation requires four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197D. Advanced Laboratory Exploration.**1 - 2 Units****Prerequisite(s):** BIO 197A and instructor permission.**Term Typically Offered:** Fall, Spring

Advanced, supervised experiences that explore the science behind laboratory experiences and discussion regarding aspects of specific laboratories that promote understanding of scientific content. Conferences and laboratory experiences four to eight hours weekly; written assignments and/or oral presentations required. Admission requires approval of professor and Department Chair.

Note: No more than 2 units from BIO 195, BIO 197, BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 197E. Intermediate Lab Techniques. 1 - 2 Units
Prerequisite(s): BIO 197B and instructor or Department Chair permission
Term Typically Offered: Fall, Spring

Supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197F. Advanced Lab Techniques. 1 - 2 Units
Prerequisite(s): BIO 197B and instructor permission.
Term Typically Offered: Fall, Spring

Advanced supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 198A. Honors Proseminar and Research. 2 Units
Prerequisite(s): Open only to honors students in biological sciences who have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses (at least six units of upper division biology excluding BIO 106, BIO 108, BIO 194, BIO 195, BIO 197 and BIO 199).
Term Typically Offered: Fall, Spring

Contemporary topics in biology selected by students in the course will form the basis for an introduction to scientific journals, the scientific method, and research as a professional pursuit. Each student develops a refined research proposal and prepares a seminar summarizing the proposal and the current state of knowledge in the topic area. Students will develop and refine their methodology under the direction of a faculty sponsor.

BIO 198B. Honors Research and Seminar. 2 Units
Prerequisite(s): BIO 198A.
Term Typically Offered: Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

Note: Open only to honors students in Biological Sciences. Fee course.

Fee course.

BIO 199A. Introductory Undergraduate Research. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Student conducts introductory, independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once, no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199B. Directed Readings. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Directed Readings on a topic in Biology culminating in a research paper. Admission requires submission of a prospectus approved by the faculty member under whom the work is to be conducted and the Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

BIO 199C. Intermediate Undergraduate Research. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Student conducts independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199D. Advanced Undergraduate Research. 1 - 2 Units
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring

Advanced laboratory or field research on an original question. The research must culminate in a formal report. Weekly meetings may be required. Students must have a prospectus approved by the faculty member and the Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 214. Advanced Plant Ecology. 3 Units
Prerequisite(s): BIO 160.
Term Typically Offered: Fall, Spring

Fundamental properties of plant populations; population regulation; community productivity and structure; a study of ecotypic and ecocline variation in plant populations. Lecture one hour; laboratory and field six hours.

- BIO 220. Introduction to Scientific Inquiry.**  **2 Units**
Term Typically Offered: Fall, Spring
- Graduate level introduction to scientific inquiry in the biological sciences. Students learn to apply the scientific method, critically evaluate the scientific literature, initiate their graduate project, and develop written and oral scientific presentation skills. Lecture two hours.
Note: Graduate Writing Intensive (GWI).
- BIO 221A. Cell and Molecular Methods and Techniques.** **2 Units**
Prerequisite(s): BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring
- Introduction to research methods in molecular and cellular biology. Students learn both cell and molecular techniques in the context of hypothesis-driven research to answer questions relating to a specific gene and cellular system. Experimental design and commonly used laboratory techniques will be explored. Two three hour laboratory periods.
 Fee course.
 Fee course.
- BIO 221B. Methods in Ecology, Evolution and Conservation.** **2 Units**
Prerequisite(s): BIO 167, BIO 220 (may be taken concurrently).
Term Typically Offered: Fall, Spring
- Introduction to research methods in ecology, evolution and conservation biology. Students learn field and laboratory techniques with a variety of taxa in a range of local ecosystems. Students will work with several faculty conducting research projects. Topics will include developing hypotheses, experimental design, study implementation, and statistical analyses. Students will be expected to present findings in oral and written form. Two three hour laboratory periods. Fee course.
 Fee course.
- BIO 221C. Exploration of Biological Methodology.** **3 Units**
Term Typically Offered: Fall, Spring
- Intended for students in the MA grant proposal track, this course explores a selected topic from multiple scientific perspectives. A discovery-based laboratory project using cell and molecular techniques complimented with lectures, discussions and field trips that investigate the ecological, environmental, and evolutionary aspects of the same topic. The laboratory project will focus on a current biological topic (such as genetically modified organisms) in accordance with the instructor's interests and expertise. One hour lecture, six hours lab per week.
Note: Not open to students in the Master of Science in Molecular and Cellular Biology Concentration.
- Field trip(s) may be required.
- BIO 222. Molecular Biology.** **3 Units**
Prerequisite(s): BIO 184, CHEM 161.
Term Typically Offered: Fall, Spring
- Processes and control of DNA replication, transcription, and translation developed from a consideration of the current literature. Lecture three hours.
- BIO 223. Human Molecular Genetics.** **3 Units**
Prerequisite(s): BIO 184 and CHEM 161.
Term Typically Offered: Fall, Spring
- In-depth study of the molecular basis of human disease, emphasizing current experimental approaches and technologies. Topics include the isolation and analysis of disease genes, the influence of teratogens and random environmental events on human embryonic development, the molecular and biochemical consequences of mutagenesis, and ethical issues that currently surround the field. Lecture 3 hours.
- BIO 224. Genomics, Proteomics, and Bioinformatics.** **3 Units**
Prerequisite(s): BIO 184, BIO 222 and graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Examination of current approaches in structural genomics, functional genomics and proteomics, and the bioinformatics tools utilized to understand genome organization, the regulation of gene expression, gene function and the evolutionary relationships within and between genomes. Lecture two hours; laboratory 3 hours.
- BIO 225. Stem Cell Biology and Manufacturing Practices.** **1 Unit**
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
- Graduate level introductory course in human stem cell biology with specific emphasis on adult, embryonic, and induced pluripotent stem cells. Topics will include how stem cells are isolated or generated, how they are cultured, and how they are used for regenerative therapies. In addition, students will learn about Good Manufacturing Practice (GMP) and how to manufacture human stem cells.
- BIO 227. Development and Regenerative Medicine.** **3 Units**
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
- Examines the processes of cellular development in the embryo and adult with a focus on stem cells. Stem cells will be studied at the biochemical, molecular, genetic, epigenetic, cellular and physiological level, with an emphasis on their roles in promoting organismal health and disease. Current research and clinical applications will be examined, along with the bioethics, policies and politics of their use.
- BIO 245. Host/Pathogen Interactions.** **3 Units**
Prerequisite(s): BIO 121, BIO 139, BIO 184. Courses recommended but not required: BIO 144, BIO 149, BIO 180.
Term Typically Offered: Fall, Spring
- Critical reading and discussion of current literature on host/pathogen interactions. Topics to be covered include: alteration of host intracellular trafficking, subversion of cell cytoskeleton for invasion, intracellular survival mechanisms, pathogen-induced cell killing, and evasion and subversion of the host immune system.
- BIO 247. Contemporary Topics in Immunology.** **2 Units**
Prerequisite(s): BIO 149A or instructor permission.
Term Typically Offered: Fall, Spring
- Readings and discussions of current literature emphasizing new field developments and controversies. Lecture two hours.

- BIO 260. Advanced Ecology.** **3 Units**
Prerequisite(s): BIO 160 or equivalent.
Term Typically Offered: Fall, Spring
- Principles and applications of theoretical and field ecology as they apply to populations, communities and ecosystems.
- BIO 269. Behavioral Ecology.** **3 Units**
Prerequisite(s): BIO 160 or instructor permission.
Term Typically Offered: Fall, Spring
- Advanced study of animal behavior focusing on the life history consequences of social organization, spacing systems, sexual behavior, reproductive ecology, feeding ecology, competitive interactions and predator-prey interactions.
- BIO 273. Advanced Fishery Biology and Management.** **3 Units**
Prerequisite(s): BIO 173 or instructor permission.
Term Typically Offered: Fall, Spring
- Critical review and evaluation of current techniques and concepts relating to the management, protection, and improvement of fishery resources. Lecture three hours.
- BIO 279. Conservation Biology and Wildlife Management.** **3 Units**
Prerequisite(s): BIO 160, BIO 179; or instructor permission.
Term Typically Offered: Fall, Spring
- Critical review of applications of ecological and wildlife-orientated theory in conservation biology research. Exploration of key topics and issues in conservation of organisms, with emphasis on vertebrate animals and plants. Lecture/discussion three hours.
- BIO 282. Evolution.** **3 Units**
Term Typically Offered: Fall, Spring
- Process of evolution throughout the taxonomic hierarchy and factors responsible for the generation of variability of the gene, cell, organism and population levels are explored through lectures, text readings and a survey of current periodical literature. Lecture 3 hours.
- BIO 283. Biogeography.** **3 Units**
Term Typically Offered: Fall, Spring
- Study of the past and present plant and animal distributions, and the geologic, climatic and ecologic factors involved in their migration, establishment and extinction. Lecture/discussions three hours.
- BIO 285. Topics in Biology.** **3 Units**
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Readings and discussions of current literature emphasizing new developments and controversies in a comparatively narrow range of biological topics. Topics will vary with each offering, encompassing one recognized specialty in biology. May be repeated for credit when the topics vary.
- BIO 293. Research Conference.** **2 Units**
Prerequisite(s): Department Chair and instructor permission.
Term Typically Offered: Fall, Spring
- Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques.
Note: Discussion two hours. May be taken twice for credit. Only two units may be applied to the University's requirement for 200-level courses; May be repeated for up to 4 units of credit.
- Credit/No Credit
- BIO 294A. Seminar in Molecular and Cellular Biology.** **1 Unit**
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring
- Review and discussion of scientific literature in cell and molecular biology. Seminar topics will vary by semester.
Note: May be repeated for up to 4 units of credit.
- Credit/No Credit
- BIO 294B. Seminar in Ecology, Evolution and Conservation.** **1 Unit**
Prerequisite(s): Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.
Term Typically Offered: Fall, Spring
- Review and discussion of scientific literature in ecology, evolution, and conservation biology. Seminar topics will vary by semester.
Note: May be repeated for up to 4 units of credit.
- Credit/No Credit
- BIO 297A. Teaching Biology Seminar.** **1 Unit**
Prerequisite(s): Acceptance in the GTA Program or instructor permission.
Term Typically Offered: Fall, Spring
- Training for graduate students who wish to participate in the Department's Graduate Teaching Associate (GTA) Program and others interested in teaching biology. Weekly seminar session covering aspects of teaching biology laboratories. Lecture/discussion. Not applicable toward 18 unit 200-level course work requirement.
- Credit/No Credit
- BIO 297B. Laboratory Teaching.** **1 Unit**
Prerequisite(s): Acceptance in the GTA Program or instructor permission.
Term Typically Offered: Fall, Spring
- Training for graduate students admitted to the Graduate Teaching Associate (GTA) Program. Students assist in teaching three hours of biology laboratory weekly under the supervision of a laboratory instructor. Laboratory three hours. Not applicable toward 18 unit 200-level coursework requirement.
- Credit/No Credit
- BIO 299. Problems in Biological Sciences.** **1 - 4 Units**
Term Typically Offered: Fall, Spring
- Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.
- Credit/No Credit

BIO 500. Master's Thesis.**4 Units**

Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.

Term Typically Offered: Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 502. Master's Project.**2 Units**

Prerequisite(s): Advanced to candidacy and chair permission of his/her committee.

Term Typically Offered: Fall, Spring

Completion of a written project based on a research problem in biology approved for the Master of Arts Degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 633. Human Gross Anatomy for Physical Therapists.**3 Units**

Prerequisite(s): BIO 22 or instructor permission.

Corequisite(s): PT 600, PT 602, PT 608, PT 630.

Term Typically Offered: Fall, Spring

Study of the gross anatomy of selected regions of the human body. Emphasis will be placed on musculoskeletal, neurovascular and anatomy of the joints of the back, thoracic wall, abdominal wall, upper limb and lower limb. Anatomical relationships will be reinforced through study of cross-sectional anatomy. Lecture two hours; lab three hours.

Note: Course designed for students enrolled in the Doctor of Physical Therapy Program.

Department of Biological Sciences

Program Description

Moss Landing Marine Laboratories (MLML) at Moss Landing, California, is operated year round by the California State University. This marine facility functions as an extension of seven participating State Universities (Fresno, Hayward, Monterey Bay, Sacramento, San Francisco, San Jose, Stanislaus) and offers full-time coursework in marine biology, oceanography, marine geology, and other marine sciences.

Enrollment is open to properly qualified upper division and graduate students from each of the participating colleges. New students may qualify through normal matriculation procedures at one of the home campuses. With approval of academic advisors, students may satisfy a part of their requirements in Biological Sciences through courses offered at the Moss Landing Laboratories. The Master of Science degree in Marine Science is offered as an interdepartmental degree through Biological Sciences in cooperation with Moss Landing Marine Laboratories.

Degree Program

MS in Marine Science (p. 759)

Special Features

- Most courses are field-oriented, taking advantage of a diversity of nearby coastal and marine habitats, including Monterey Submarine Canyon, subtidal kelp forests, Elkhorn Slough, and rocky and sandy intertidal zones.
- Field activities are facilitated by the MLML fleet, the 135' R/V POINT SUR, the 35' R/V ED RICKETTS, two Boston Whalers, and a number of inflatable rafts.

- Ongoing research by faculty and graduate students further enhances the MLML learning experience.

MSCI 103. Marine Ecology.**4 Units**

Prerequisite(s): Ecology, statistics; or concurrent registration in MSCI 104.

Term Typically Offered: Fall, Spring

Field-oriented introduction to the interrelationships between marine and estuarine organisms and their environment with emphasis on quantitative data collection and analysis. Lecture two hours; laboratory six hours.

MSCI 104. Quantitative Marine Science.**4 Units**

Prerequisite(s): College mathematics.

Term Typically Offered: Fall, Spring

Mathematical methods for the analysis of biological, chemical and physical data from the marine environment; experimental design, parametric and nonparametric statistics. Lecture three hours; laboratory three hours.

Note: Not for major credit.

MSCI 105. Marine Science Diving.**3 Units**

Prerequisite(s): Upper division science major status, thorough physical examination, ability to pass swimming test.

Term Typically Offered: Fall, Spring

Skin SCUBA diving course, pool-training culminates in ten ocean dives. Topics covered included diving physics, physiology, diving environments, night diving and research diving. Successful completion gives NAUI and MLML certification. Lecture one hour; laboratory six hours.

Note: Not for major credit.

MSCI 112. Marine Birds and Mammals.**4 Units**

Prerequisite(s): Upper division college vertebrate zoology or instructor permission; MSCI 103 recommended.

Term Typically Offered: Fall, Spring

Systematic, morphology, ecology and biology of marine birds and mammals. Lecture two hours; laboratory six hours.

MSCI 113. Marine Ichthyology.**4 Units**

Prerequisite(s): College zoology or equivalent or instructor permission; MSCI 103 recommended.

Term Typically Offered: Fall, Spring

Description of the taxonomy, morphology, and ecology of marine fishes. Both field and laboratory work concentrate on the structure, function and habits of marine fishes and the ecological interactions of these fishes with their biotic and abiotic surroundings. Lecture two hours; laboratory six hours.

- MSCI 124. Marine Invertebrate Zoology I.** 4 Units
Prerequisite(s): College zoology or instructor permission; MSCI 103 recommended.
Term Typically Offered: Fall, Spring
- Field oriented introduction to the structure, systematics, evolution, and life histories of the major and minor marine phyla. Lecture two hours; laboratory and six hours.
- MSCI 125. Marine Invertebrate Zoology II.** 3 Units
Prerequisite(s): College zoology or instructor permission; MSCI 103 and MSCI 124 recommended.
Term Typically Offered: Fall, Spring
- Field oriented introduction to the structure, systematics, evolution and life histories of the minor marine invertebrate phyla. Lecture one hour; laboratory and field six hours.
- MSCI 131. Marine Botany.** 4 Units
Prerequisite(s): MSCI 103 recommended.
Term Typically Offered: Fall, Spring
- Introduction to the plants of the sea, marshes, and dunes, with emphasis on the morphology, taxonomy and natural history of seaweeds and vascular plants. Lecture two hours; laboratory six hours.
- MSCI 135. Physiology of Marine Algae.** 4 Units
Prerequisite(s): MSCI 103, MSCI 131, and MSCI 144. Lecture two hours; laboratory six hours.
Term Typically Offered: Fall, Spring
- Physiological basis for understanding the adaptation of marine algae to their environment. Topics include respiration, enzyme activity, and biochemical composition. Hands-on experience in basic electronic instrumentation, chemical separations, optical measurements, culturing methods, and radioisotope techniques.
- MSCI 141. Geological Oceanography.** 4 Units
Prerequisite(s): MSCI 142, MSCI 143; may be taken concurrently.
Term Typically Offered: Fall, Spring
- Study of the structures, physiography and sediments of the sea bottom and shoreline. Lecture two hours; laboratory and field six hours.
- MSCI 142. Physical Oceanography.** 4 Units
Prerequisite(s): College algebra, college physics recommended.
Term Typically Offered: Fall, Spring
- Introduction to the nature and causes of various oceanic motions including currents, waves, tides, and mixing and the Physical properties of seawater. Limited use of calculus. Lecture three hours; laboratory three hours.
- MSCI 143. Chemical Oceanography.** 4 Units
Prerequisite(s): One year of college chemistry.
Term Typically Offered: Fall, Spring
- Introduction to the theoretical and practical aspects of the chemistry of the oceans, including major salts, dissolved gases, nutrient ions, carbonate system, transient tracers, and shipboard sampling techniques. Lecture two hours; laboratory six hours.
- MSCI 144. Biological Oceanography.** 4 Units
Prerequisite(s): General biology, general chemistry.
Term Typically Offered: Fall, Spring
- Ocean as an ecological system. Emphasis will be on the complexity of organismal-environmental interaction of the plankton, the transfer of organic matter between trophic levels and nutrient cycles. Laboratory sessions will include methods in sampling, shipboard techniques, identification of the plankton, and current analytical techniques. Lecture two hours; laboratory six hours.
- MSCI 175A. Coastal Geol Processes.** 1 Unit
Term Typically Offered: Fall, Spring
- MSCI 175B. Intro To Marine Science.** 1 Unit
Term Typically Offered: Fall, Spring
- MSCI 180. Independent Study.** 1 - 4 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Faculty-directed study of selected research problems; open to undergraduate students with adequate preparation. Three hours work per unit.
- MSCI 201. Library Research Methods.** 1 Unit
Prerequisite(s): Graduate standing in the Marine Science M.S. program and instructor permission.
Term Typically Offered: Fall, Spring
- Students will gain advanced understanding of the nature of scientific information. Provides the framework for using and evaluating a variety of information sources in marine and ocean sciences. Strong emphasis will be placed on developing critical skills to interweave knowledge of the history of science into the context of bibliographic tools including the digital realm. Lecture: three hours.
- MSCI 202. Oceanographic Instrumentation.** 4 Units
Prerequisite(s): MSCI 141, MSCI 142 and instructor permission.
Term Typically Offered: Fall, Spring
- Principles of instruments used in oceanographic research, introduction to electronics, and applications of instrument measurements. Emphasis will vary from CTD profilers, current meters, radiometry and chemical measurement. Lecture two hours; laboratory six hours.
- MSCI 204. Sampling and Experimental Design.** 4 Units
Prerequisite(s): MSCI 103, MSCI 104.
Term Typically Offered: Fall, Spring
- Discussion of random sampling, systematic sampling, subsampling, survey techniques, and design of single and multifactorial experiments using randomized and block experimental designs: basic design of experiments and field sampling will be covered. Biases and problems of sampling marine biota will be presented and discussed by critiquing relevant literature. Lecture four hours.

<p>MSCI 208. Molecular Ecology: Concepts and Methods. 4 Units Prerequisite(s): Basic cellular/molecular biology course; consent of instructor. Term Typically Offered: Fall, Spring</p> <p>Use of genetic information affecting interactions of organisms with environment. Lectures on molecular markers used to assess diversity in communities, characterize spatial/temporal variation in species composition, assess genetic variability in populations, discriminate/reveal kinship among individuals, and detect/quantify gene expression important in organismal responses to environmental fluctuation. Basic molecular methods (DNA and RNA isolation/amplification/cloning/sequencing) taught. Students projects as budget permits. Enrollment limited. Lecture 2 hours; laboratory 6 hours.</p>	<p>MSCI 231. Biology Of Seaweeds. 4 Units Prerequisite(s): MSCI 131 or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Lecture-discussions in algal development, reproduction, and ecology. Extensive reading of original literature. Ecologically oriented individual research projects involving laboratory culture and field experimentation. Lecture two hours; laboratory six hours.</p>
<p>MSCI 211. Ecology of Marine Birds and Mammals. 4 Units Prerequisite(s): MSCI 103, MSCI 104, MSCI 112. Term Typically Offered: Fall, Spring</p> <p>Community approach to the ecology of marine birds and mammals using experimental and sampling methodology; examine the distribution, abundance, trophic ecology, and behaviors of birds and mammals in Elkhorn Slough and Monterey Bay. Lecture two hours; laboratory six hours.</p>	<p>MSCI 233A. Adv Marine Ecology. 4 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 233B. Sampling+Expermntl Design. 4 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 233C. Coastal Ecology-Gulf of California. 3 Units Prerequisite(s): MSCI 103, MSCI 104, MLML SCUBA certified, graduate status, instructor permission. Term Typically Offered: Fall, Spring</p> <p>Field-oriented examination of the interrelationships between intertidal and shallow subtidal organisms and their environment in the Gulf of California, Mexico. Information from lectures and review of primary literature on the ecology of the region will be used to write a research proposal. 1 hour lecture, 6 hours laboratory.</p>
<p>MSCI 212. Advanced Topics in Marine Vertebrates. 4 Units Prerequisite(s): MSCI 112 or MSCI 113 and instructor permission. Term Typically Offered: Fall, Spring</p> <p>Advanced consideration of the ecology, physiology and phylogeny of fishes, birds, reptiles or mammals, emphasizing current literature and research. Topics and emphasis will vary with term and instructor. Lecture two hours; laboratory six hours. Note: May be repeated once for credit.</p>	<p>MSCI 233D. Immune Respn Marine Orgns. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 234. Advanced Biological Oceanography. 4 Units Prerequisite(s): MSCI 144. Term Typically Offered: Fall, Spring</p> <p>Experimental techniques in biological oceanography with emphasis on problems important to plankton ecology. Includes lectures, labs, and discussions of current research problems. An individual research project involving analytical tools will be required. Lecture two hours; laboratory six hours.</p>
<p>MSCI 212A. Adv Ichthyology. 4 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 212B. Ichthyoplankton. 4 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 212C. Marine Bird+Mammal Ecology. 4 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 212D. Sampling+Expermntl Design. 4 Units Term Typically Offered: Fall, Spring</p>	<p>MSCI 242. Plate Tectonics. 3 Units Prerequisite(s): MSCI 141 or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Historical background, modern theory, and geo-physical evidence of continental drift sea floor spreading and plate tectonics. Examinations of the impact of the recent revolution in historical geology. Lecture three hours.</p>
<p>MSCI 221. Advanced Topics in Marine Invertebrates. 4 Units Prerequisite(s): MSCI 124 and instructor permission. Term Typically Offered: Fall, Spring</p> <p>Advanced considerations of the ecology, physiology and phylogeny of the various invertebrate phyla emphasizing current literature and research. Topics will vary from term to term. Lecture two hours; laboratory six hours. Note: May be repeated for credit when topics change.</p>	<p>MSCI 248. Marine Benthic Habitat Techniques. 4 Units Prerequisite(s): Graduate standing and instructor permission. Term Typically Offered: Fall, Spring</p> <p>Collection and interpretation of geophysical data used to characterize marine benthic habitats. Basic geophysical principles will be reviewed. Application of techniques to identify and characterize marine benthic habitats, including echosounders, multibeam bathymetry and backscatter, sidescan sonar, seismic profiling, and GIS. Lecture two hours; laboratory six hours.</p>
<p>MSCI 221A. Marine Symbioses. 4 Units Term Typically Offered: Fall, Spring</p>	<p>MSCI 251. Marine Geochemistry. 4 Units Prerequisite(s): MSCI 143, quantitative analysis, one year calculus or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Geochemical processes in the oceans: thermodynamics of low temperature aqueous reactions, processes occurring at the sea floor and air-sea interface. Lecture two hours; laboratory six hours.</p>

<p>MSCI 261. Ocean Circulation and Mixing. 4 Units Prerequisite(s): MSCI 142; college physics strongly recommended or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Mathematical description of the distribution of properties (salinity density, etc.) in the oceans relating to physical and biochemical processes. Equations of motion, geotropic method, and theory of distribution of variables. Lecture two hours; laboratory six hours.</p>	<p>MSCI 280. Scientific Writing. 3 Units Prerequisite(s): Graduate status and instructor permission. Term Typically Offered: Fall, Spring</p> <p>Techniques and strategies of scientific writing used for proposals, journal submissions, and abstracts for meetings. Students will develop their writing skills by preparing, editing, and rewriting manuscripts. Lecture three hours.</p>
<p>MSCI 262. Satellite Oceanography. 4 Units Prerequisite(s): MSCI 142, MSCI 144, or instructor permission. MSCI 263 strongly recommended. Term Typically Offered: Fall, Spring</p> <p>Physical principles of remote sensing with application to the oceans including satellite image processing methods. Labs involve use of PC and Unix workstation. Lecture two hours; laboratory six hours.</p>	<p>MSCI 281. Coastal Dynamics. 4 Units Prerequisite(s): Graduate standing and MSCI 141 or MSCI 142. Term Typically Offered: Fall, Spring</p> <p>Addresses the oceanographic dynamics of coastal environments, within an emphasis on eastern boundary current systems influenced by coastal upwelling. Focuses on how physical and geological oceanography interact with each other and how both affect coastal ecosystem dynamics.</p>
<p>MSCI 263. Application of Computers in Oceanography. 4 Units Prerequisite(s): College math and instructor permission. Term Typically Offered: Fall, Spring</p> <p>Lecture, discussion and technical programming with MATLAB for computation and visualization with applications in marine sciences. Use of existing program libraries for data I/O and analysis. Semester project required. Lecture two hours; laboratory six hours.</p>	<p>MSCI 285. Seminar in Marine Biology. 2 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p> <p>Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. Lecture two hours. Note: May be repeated once for credit.</p>
<p>MSCI 271. Population Biology. 3 Units Prerequisite(s): MSCI 103, MSCI 104; or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Principles of the interaction among marine organisms that result in the alteration of population structures. Techniques for assessment and management of populations. Lecture two hours; laboratory three hours.</p>	<p>MSCI 285A. Social Biology. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 285B. Repro+Dev Marine Organism. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 285C. Recent Adv Deep-Sea Bio. 2 Units Term Typically Offered: Fall, Spring</p>
<p>MSCI 272. Subtidal Ecology. 4 Units Prerequisite(s): MLML diver certification and marine ecology (knowledge of marine algae, invertebrates, and statistics recommended). Term Typically Offered: Fall, Spring</p> <p>Ecology of nearshore rocky subtidal populations and communities with emphasis on kelp forests. Lectures and discussions of original literature. Field work with SCUBA including group projects on underwater research techniques and community analysis, and individual research on ecological questions chosen by the student. Lecture two hours; laboratory six hours.</p>	<p>MSCI 285D. Controversies Modern Biol. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 285E. Paradigms In Commun Ecol. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 285F. Appl Moleclr Tech Mar Bio. 2 Units Term Typically Offered: Fall, Spring</p> <p>MSCI 285G. Aspects Of Deep-Sea Biol. 2 Units Term Typically Offered: Fall, Spring</p>
<p>MSCI 274A. Electron Micros+Microanl. 3 Units Term Typically Offered: Fall, Spring</p>	<p>MSCI 286. Seminar in Marine Geology. 2 Units Term Typically Offered: Fall, Spring</p> <p>Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. Note: May be repeated once for credit.</p>
<p>MSCI 274B. Geol Central Ca Margin. 4 Units Term Typically Offered: Fall, Spring</p>	<p>MSCI 287. Seminar In Oceanography. 2 Units Term Typically Offered: Fall, Spring</p> <p>Seminar will be held on topics changing each semester. Each student will be required to give at least one seminar. Note: May be repeated once for credit.</p>
<p>MSCI 274C. Chem Of Marine Pollution. 4 Units Term Typically Offered: Fall, Spring</p>	
<p>MSCI 274D. Global Change. 3 Units Term Typically Offered: Fall, Spring</p>	

MSCI 298. Research in the Marine Sciences. 1 - 4 Units**Prerequisite(s):** Graduate standing and instructor permission.**Term Typically Offered:** Fall, Spring

Independent investigations of an advanced character for the graduate student with adequate preparation.

Note: CSUH students must file a petition with their home campus department before admission to this class. CSU Stanislaus students must file Individual Study forms. CSUF students must file Research Approval forms.

MSCI 299. Master's Thesis. 1 - 4 Units**Term Typically Offered:** Fall, Spring

BA in Biological Science

Units required for Major: 62-66**Total units required for BA: 120**

Program Description

The Department of Biological Sciences offers both undergraduate and graduate degree programs. At the undergraduate level, students are able to earn a Bachelor of Arts degree, a Bachelor of Science degree, or a Minor in Biological Sciences.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology (or equivalent)	5
BIO 2	Cells, Molecules and Genes (or equivalent)	5
CHEM 1A	General Chemistry I (or equivalent)	5
STAT 1	Introduction to Statistics (or equivalent)	3
ENGL 5	Accelerated Academic Literacies (or equivalent)	3

2. Overall GPA of 2.5 based on the pre-major courses listed above.
3. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Courses (37-41 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
Select one of the following:		3 - 6
CHEM 20	Organic Chemistry Lecture–Brief Course ²	
CHEM 24 & CHEM 124	Organic Chemistry Lecture I & Organic Chemistry Lecture II	
Select one of the following:		3 - 4
MATH 26A	Calculus I for the Social and Life Sciences	
MATH 30	Calculus I	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Courses (22 Units)		
BIO 100	Introduction to Scientific Analysis	2
BIO 121	Molecular Cell Biology	3
BIO 139	General Microbiology	4
BIO 160	General Ecology	3
BIO 184	General Genetics	4
BIO 188	Evolution	3
CHEM 161	General Biochemistry ³	3
Elective Courses (3 Units)		
Select one course from the following Structure and Function Electives:		3
BIO 104	Physiology of Human Reproduction	
BIO 122	Advanced Human Anatomy	
BIO 123	Neuroanatomy	
BIO 126	Comparative Vertebrate Morphology	
BIO 127	Developmental Biology	
BIO 128	Plant Anatomy and Physiology	
BIO 130	Histology	
BIO 131	Systemic Physiology	
BIO 132	Neurophysiology	
BIO 133	Cardiovascular, Respiratory and Renal Physiology	
BIO 135	Endocrinology	
Total Units		62-66

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 24 upper division unit requirement in the major.)

³ CHEM 160A and CHEM 160B may be taken in lieu of CHEM 161. Only three units of the package may be counted toward the upper division major requirement.

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional section of this catalog.

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects (6 Units)		
A1	Oral Communication	3
A2	Written Communication ²	0
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		36

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI)	3
Graduation Requirements (required by Sacramento State) (12 Units)		
	English Composition II	3

Race and Ethnicity in American Society (RE)	3
Foreign Language Proficiency Requirement ²	6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required."

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Biological Sciences Honors Program Program Description

Biological Sciences Honors Program provides undergraduate students with an in-depth research experience. An undergraduate research experience is highly recommended for entry into many graduate and professional programs. Culmination of the Honors Program will consist of an undergraduate thesis and an undergraduate seminar.

Admission Requirements

To enter this program, students must have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses with at least 15 units of biology and have completed at least 6 units of upper division biology courses, excluding the following:

Code	Title	Units
BIO 106	Genetics: From Mendel to Molecules	3
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Program Requirements

The curriculum of the Honors Program is designed to be coupled with the **BA or BS degree** programs. The Honors Program requires the following courses, completed with a grade of "B" or better, for the BA or BS degree:

Code	Title	Units
BIO 198A	Honors Proseminar and Research (Open only to honors students in Biological Sciences as defined above)	2
BIO 198B	Honors Research and Seminar	2

BS in Biological Science (Biomedical Sciences)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The concentration in Biomedical Sciences is designed to prepare students for graduate study in the anatomical and physiological sciences or for health professional training (Medical, Veterinary, Physical Therapy, Nursing, Pharmacy, or other health professions).

Note:

- CHEM 24 and CHEM 124 are required instead of CHEM 20 for the Biomedical Sciences Concentration.
- Additional units may be required to meet the Sacramento State foreign language requirement.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

- 1 Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (37-41 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
Select one of the following:		3 - 6
CHEM 20	Organic Chemistry Lecture–Brief Course ²	
CHEM 24 & CHEM 124	Organic Chemistry Lecture I & Organic Chemistry Lecture II	
Select one of the following:		3 - 4
MATH 26A	Calculus I for the Social and Life Sciences	
MATH 30	Calculus I	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Core Courses (6 Units)		
BIO 100	Introduction to Scientific Analysis	2
BIO 184	General Genetics	4
Concentration (30-38 Units)		
Select from the following concentrations:		30 - 38
General Biology		
Biomedical Sciences		
Cell and Molecular Biology		
Clinical Laboratory Sciences		
Ecology, Evolution, and Conservation		
Forensic Biology		
Microbiology		
Total Units		73-85

- 1 Course also satisfies General Education (GE)/Graduation Requirement.

- 2 CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 36 upper division unit requirement in the major except in the Biomedical Sciences Concentration.)

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.
- With approval, up to six units of upper division coursework from related fields may be applied as electives in the major.
- No more than 2 units from the following combined can be applied to the Biological Sciences upper division major requirement.

Code	Title	Units
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Concentration in Biomedical Sciences (34 units)

Code	Title	Units
Required Courses (21 Units)		
BIO 22	Introductory Human Anatomy	4
BIO 121	Molecular Cell Biology	3
BIO 131	Systemic Physiology	4
BIO 139	General Microbiology	4
CHEM 25	Organic Chemistry Laboratory	3
CHEM 161	General Biochemistry	3
Elective Courses (13 Units)		
Select one of the following Structure and Function electives:		3
BIO 104	Physiology of Human Reproduction	
BIO 122	Advanced Human Anatomy	
BIO 123	Neuroanatomy	
BIO 126	Comparative Vertebrate Morphology	
BIO 127	Developmental Biology	
BIO 128	Plant Anatomy and Physiology	
BIO 130	Histology	
BIO 132	Neurophysiology	
BIO 133	Cardiovascular, Respiratory and Renal Physiology	
Select one of the following Ecology, Evolution, and Biodiversity electives:		3
<i>Part A: Biodiversity Electives</i>		
BIO 103	Plants and Civilization	
BIO 112	Plant Taxonomy	
BIO 145	The Diversity of Microorganisms	
BIO 152	Human Parasitology	
BIO 157	General Entomology	
BIO 162	Ichthyology: The Study of Fishes	
BIO 164	Amphibians and Reptiles: An Introduction to Herpetology	
BIO 166	Ornithology	
BIO 168	Mammalogy	
<i>Part B: Ecology and Evolution Electives</i>		
BIO 113	Evolution and Speciation in Flowering Plants	
BIO 118	Natural Resource Conservation	
BIO 160	General Ecology	
BIO 169	Animal Behavior	
BIO 173	Principles of Fisheries Biology	

BIO 179	Conservation Biology & Wildlife Management	
BIO/ENVS 186B	Ecological and Environmental Issues Seminar	
BIO 188	Evolution	
Select additional electives in consultation with an advisor to total 13 upper division elective units		7
Total Units		34

Note: Students in Biomedical Sciences concentration must take CHEM 24 and CHEM 124 instead of CHEM 20.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6 Units)

BS in Biological Science (Cell and Molecular Biology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The concentration in Cell and Molecular Biology is designed for students interested in advanced studies at the Masters or Ph.D. level, students pursuing career working in biotechnology, or pre-health professions majors pursuing a fundamental understanding of the bimolecular basis of disease. Students completing the degree requirements for the Cell and Molecular Biology concentration also fulfill the requirements for a minor in Chemistry.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (37-41 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
Select one of the following:		3 -
		6
CHEM 20	Organic Chemistry Lecture–Brief Course ²	
CHEM 24	Organic Chemistry Lecture I	
& CHEM 124	Organic Chemistry Lecture II	
Select one of the following:		3 -
		4
MATH 26A	Calculus I for the Social and Life Sciences	
MATH 30	Calculus I	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Core Courses (6 Units)		
BIO 100	Introduction to Scientific Analysis	2
BIO 184	General Genetics	4
Concentration (30-38 Units)		
Select from the following concentrations:		30
		-
		38
General Biology		
Biomedical Sciences		
Cell and Molecular Biology		
Clinical Laboratory Sciences		
Ecology, Evolution, and Conservation		
Forensic Biology		
Microbiology		
Total Units		73-85

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 36 upper division unit requirement in the major except in the Biomedical Sciences Concentration.)

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.
- With approval, up to six units of upper division coursework from related fields may be applied as electives in the major.
- No more than 2 units from the following combined can be applied to the Biological Sciences upper division major requirement.

Code	Title	Units
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Concentration in Cell and Molecular Biology (35 units)

Code	Title	Units
Required Courses (25 Units)		
BIO 121	Molecular Cell Biology	3
BIO 180	Advanced Molecular Biology	4
BIO 187	Advanced Cell Biology	4
BIO 188	Evolution	3
CHEM 20L	Introductory Organic Chemistry Laboratory	1
CHEM 31	Quantitative Analysis	4
CHEM 161	General Biochemistry ¹	3
CHEM 162	General Biochemistry Laboratory ²	3
Elective Courses (10 Units)		
Select one of the following:		4
BIO 126	Comparative Vertebrate Morphology	
BIO 127	Developmental Biology	
BIO 128	Plant Anatomy and Physiology	
BIO 131	Systemic Physiology	
Select one of the following Ecology, Evolution, and Biodiversity electives:		3
<i>Part A: Biodiversity Electives</i>		
BIO 103	Plants and Civilization	
BIO 112	Plant Taxonomy	
BIO 145	The Diversity of Microorganisms	
BIO 152	Human Parasitology	
BIO 157	General Entomology	
BIO 162	Ichthyology: The Study of Fishes	

BIO 164	Amphibians and Reptiles: An Introduction to Herpetology	
BIO 166	Ornithology	
<i>Part B: Ecology and Evolution Electives</i>		
BIO 113	Evolution and Speciation in Flowering Plants	
BIO 118	Natural Resource Conservation	
BIO 160	General Ecology	
BIO 169	Animal Behavior	
BIO 173	Principles of Fisheries Biology	
BIO 179	Conservation Biology & Wildlife Management	
BIO/ENVS 186B	Ecological and Environmental Issues Seminar	
Select additional upper division electives in consultation with an advisor to total 10 units.		3
Total Units		35

¹ CHEM 160A and CHEM 160B may be taken in lieu of CHEM 161. Only three units of the package may be counted toward the upper division major requirement.

² CHEM 162 is included in the 36 upper division unit requirement for this concentration.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6 Units)		
A1	Oral Communication	3
A2	Written Communication ²	0
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course - Take upper-division course to complete Area & upper division requirements.		3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		36

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Biological Science (Clinical Laboratory Sciences)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The curriculum in Clinical Laboratory Sciences meets the undergraduate coursework requirements of the State of California for eligibility to take a Clinical Laboratory Scientist (CLS) licensure examination. Eligibility to take a licensure examination also requires a one year (CLS) internship training program at a state approved clinical laboratory. Completion of BS degree requirements in the Clinical Laboratory Sciences concentration does not guarantee admission to a CLS internship training program. Information on admission criteria and application procedures for the various CLS internship training programs throughout the state is available through the California Association for Medical Laboratory Technology (CAMLT) at their website (<http://www.camlt.org/cls>).

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the

large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (37-41 Units)

BS in Biological Science (Ecology, Evolution, and Conservation)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The concentration in Ecology, Evolution, and Conservation is designed for students interested in wildlife management conservation biology, or pursuing graduate study in ecological and evolutionary approaches in the Biological Sciences. By choosing the Conservation Biology advising track, students get necessary training for a career working with local, state, or federal agencies as a biologist or environmental scientist. The Ecology and Evolution advising track is designed to prepare students for graduate study in the Biological Sciences.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Biological Science (Forensic Biology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The curriculum in Forensic Biology is designed to prepare students for careers as criminalist specializing in the analysis and interpretation of serological and DNA evidence. This curriculum meets the educational requirements for entry level career positions with city, county, and federal agencies. Students selecting this concentration are urged to pursue internship opportunities (BIO 195), such as those available through the Sacramento County Coroner's Office, and/or directed research (BIO 199A or BIO 199B) with a faculty member in Biological Sciences or Chemistry who utilizes molecular biology techniques and instrumentation. Students completing the requirements for a concentration in Forensic Biology also fulfill the requirements for a minor in Chemistry.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (37-41 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
Select one of the following:		3 - 6
CHEM 20	Organic Chemistry Lecture–Brief Course ²	
CHEM 24 & CHEM 124	Organic Chemistry Lecture I & Organic Chemistry Lecture II	
Select one of the following:		3 - 4
MATH 26A	Calculus I for the Social and Life Sciences	
MATH 30	Calculus I	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Core Courses (6 Units)		
BIO 100	Introduction to Scientific Analysis	2

BIO 184	General Genetics	4
Concentration (30-38 Units)		
Select from the following concentrations:		30
		-
		38
General Biology		
Biomedical Sciences		
Cell and Molecular Biology		
Clinical Laboratory Sciences		
Ecology, Evolution, and Conservation		
Forensic Biology		
Microbiology		
Total Units		73-85

- ¹ Course also satisfies General Education (GE)/Graduation Requirement.
- ² CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 36 upper division unit requirement in the major except in the Biomedical Sciences Concentration.)

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.
- With approval, up to six units of upper division coursework from related fields may be applied as electives in the major.
- No more than 2 units from the following combined can be applied to the Biological Sciences upper division major requirement.

Code	Title	Units
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Concentration in Forensic Biology (38 units)

Code	Title	Units
Required Courses (32 Units)

CHEM 162	General Biochemistry Laboratory ²	3

CRJ 4	General Investigative Techniques	3
CRJ 154	Introduction to Physical Evidence	3
Select one of the following:		
CRJ 112	Gangs and Threat Groups in America	
CRJ 114	Sexual Offenses and Offenders	
CRJ 118	Drug Abuse and Criminal Behavior	

Elective Courses (6 Units)

Select one of the following Structure and Function electives:		
BIO 104	Physiology of Human Reproduction	
BIO 122	Advanced Human Anatomy	
BIO 123	Neuroanatomy	
BIO 126	Comparative Vertebrate Morphology	
BIO 127	Developmental Biology	
BIO 128	Plant Anatomy and Physiology	
BIO 130	Histology	
BIO 131	Systemic Physiology	
BIO 132	Neurophysiology	
BIO 133	Cardiovascular, Respiratory and Renal Physiology	

Select one of the following Ecology, Evolution, and Biodiversity electives:

Part A: Biodiversity Electives

BIO 103	Plants and Civilization	
BIO 112	Plant Taxonomy	
BIO 145	The Diversity of Microorganisms	
BIO 152	Human Parasitology	
BIO 157	General Entomology	
BIO 162	Ichthyology: The Study of Fishes	
BIO 164	Amphibians and Reptiles: An Introduction to Herpetology	
BIO 166	Ornithology	
BIO 168	Mammalogy	

Part B: Ecology and Evolution Electives

BIO 113	Evolution and Speciation in Flowering Plants	
BIO 118	Natural Resource Conservation	
BIO 160	General Ecology	
BIO 169	Animal Behavior	
BIO 173	Principles of Fisheries Biology	
BIO 179	Conservation Biology & Wildlife Management	
BIO/ENVS 186B	Ecological and Environmental Issues Seminar	
BIO 188	Evolution	

Total Units 38

- ¹ CHEM 160A and CHEM 160B may be taken in lieu of CHEM 161. Only three units of the package may be counted toward the upper division requirement.
- ² CHEM 162 can be included in the 36 upper division unit requirement for this concentration.

Note: Students with a declared concentration in Forensic Biology do not need to take CRJ 1, CRJ 2 or CRJ 102 as prerequisites for the CRJ courses required in this concentration.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6 Units)		
A1	Oral Communication	3
A2	Written Communication ²	0
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5 ²)	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area Course C	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		36

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Biological Science (General Biology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The general biology concentration is intended to give students a broad training in the Biological Sciences and an opportunity to explore a wide range of elective courses. It also provides necessary preparation for most graduate programs and selected entry level technical positions in industry and government. The BS in Biological Sciences meets requirements leading to the Biology Subject Matter Competency Teaching Credential (with three supplemental geoscience and environmental studies courses) and also satisfies requirements for admission to health professional schools (with additional coursework in Math and Chemistry).

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5

STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.
2. Minimum of 30 units completed at the college level.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (37-41 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
Select one of the following:		3 - 6
CHEM 20	Organic Chemistry Lecture–Brief Course ²	
CHEM 24 & CHEM 124	Organic Chemistry Lecture I & Organic Chemistry Lecture II	
Select one of the following:		3 - 4
MATH 26A	Calculus I for the Social and Life Sciences	
MATH 30	Calculus I	
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Core Courses (6 Units)		
BIO 100	Introduction to Scientific Analysis	2
BIO 184	General Genetics	4
Concentration (30-38 Units)		
Select from the following concentrations:		30 - 38
General Biology		
Biomedical Sciences		
Cell and Molecular Biology		
Clinical Laboratory Sciences		
Ecology, Evolution, and Conservation		
Forensic Biology		
Microbiology		
Total Units		73-85

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² CHEM 24 and CHEM 124 may be taken in lieu of CHEM 20. (CHEM 124 is not counted toward the 36 upper division unit requirement in the major except in the Biomedical Sciences Concentration.)

Notes:

- Pre-Health Professional students should take the Chemistry and Math requirements as stated in the Pre-Health Professional Program section of this catalog.
- With approval, up to six units of upper division coursework from related fields may be applied as electives in the major.
- No more than 2 units from the following combined can be applied to the Biological Sciences upper division major requirement.

Code	Title	Units
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

BS in Biological Science (Microbiology)

Units required for Major: 73-85, includes units of study in chosen concentration (see below).

Total units required for BS: 120

Program Description

The concentration in Microbiology is designed to prepare students for entry level technical positions in the industry and graduate programs in Microbiology leading to careers in research and teaching. This curriculum meets the educational requirements for various entry level career positions for biotechnology, environmental, pharmaceutical, wastewater treatment, and agricultural areas of microbiology. Concentration includes a minor in Chemistry.

Pre-Major Requirements

The Biological Sciences program at Sacramento State is one of the most highly sought after programs in Northern California. Due to the large number of applications, the program is now officially impacted. Students wishing to become Biological Science majors must complete a series of required lower division and then must apply for admission to the program. Check the department website for requirements, and it is highly recommended that interested students speak with an advisor at the Natural Sciences Advising Center (NSAC) as soon as possible.

Freshmen interested in the major are admitted as pre-Biological Science majors.

To change to the Biological Sciences major, pre-major students are required to complete the following courses and grade requirements and submit a Declaration of Major form to the Biological Science Department Office along with transcript copies.

1. Completion of the following lower division "pre-major" courses with a minimum "C" or better. Only first or second attempt will be considered:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
STAT 1	Introduction to Statistics	3
ENGL 5	Accelerated Academic Literacies ¹	3

1. Overall GPA of 2.5 based on the pre-major courses listed above.

Certificate in Issues in Natural Resource Management

Units required for Certificate: 15, in addition to requirements for BS

Program Description

The Academic Achievement Certificate in *Issues in Natural Resource Management* is designed to provide an interdisciplinary perspective on the conflicts, controversies, and biopolitical issues that natural resource biologists must deal with in their careers, and to introduce students to the non-biological considerations that influence decision making processes in natural resource utilization and management.

A minimum of 15 units selected from the following list in addition to requirements for the BS in Biological Sciences with a concentration in Biological Conservation. The certificate may also be awarded to students completing the BS in General Biology with the approval of the Biological Conservation advisors.

Program Requirements

Code	Title	Units
Select a minimum of 15 units from the following: 15		
ECON 120	Economics and Environmental Degradation	
ECON 123	Resource Economics	
ENVS 110	Contemporary Environmental Issues	
ENVS 112	International Environmental Problems 	
ENVS/POLS 128	Environment and the Law	
GEOG 161	California's Water Resources 	
GEOL 140	Geology and the Environment 	
POLS 170	Public Policy Development	
Total Units		15

Cooperative Education Program (Work Experience)

Program Description

Biology majors can participate in the University's Cooperative Education Program. This program provides biology-related, paid, off-campus work experience in government agencies or private industry. The experience can enhance the student's employment prospects upon graduation. Participants in this program will complete at least one six-month period. During the work period, the participant generally will not attend classes on the Sacramento State campus but will enroll in BIO 194, Biology-Related Work Experience. (BIO 194 units do not replace the curricular requirements of the Biological Sciences degree programs.)

Students interested in this program should contact the Biological Sciences Department or the campus Cooperative Education Program Office for further information.

MA in Biological Science (General)

Units required for MA: 30 includes units required in areas of concentration.

Program Description

The graduate programs in Biological Sciences lead to either a Master of Arts (MA) or a Master of Science (MS) degree and provides an opportunity for students to receive advanced training and to pursue independent investigations in particular fields of biology. It allows students to upgrade their qualifications for educational advancement to doctoral programs or for professional advancement in teaching, laboratory work, or fieldwork. The MA degree requires the completion of a project which is a Grant Proposal, unless the student is in the Stem Cell Concentration which requires an Internship Project Report. The MS degree requires completion of a thesis which has concentrations in Ecology, Evolution and Conservation and in Molecular and Cellular Biology so as to provide advanced training and research experience in these fields.

All students are required to complete a project or thesis involving field, laboratory, or literature research. The project or thesis research may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student's research must make a new contribution to the field of biology. If the research is conducted off campus, a biology faculty member must be identified as the student's graduate advisor. Following admission to the program, students are advised by a temporary graduate advisor or by the faculty member who has agreed to supervise the student in their project/thesis research. Students should plan their academic programs in consultation with a graduate advisor as early as possible, preferably prior to enrollment in the program.

For additional information regarding the Biological Sciences Graduate Program, students may contact the Biological Sciences Department Office, Biological Sciences website (<http://www.csus.edu/bios>), or consult the Biological Sciences Graduate Program Handbook, available through the Department's Web site.

Admission Requirements

Admission as a classified graduate student to the MA or MS program in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
- GRE General Test scores;
- a faculty member who has agreed to serve as their graduate advisor;
- two letters of recommendation from persons qualified to judge the applicant's potential for successful graduate study; and
- a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation, or who have not been accepted by a graduate advisor, may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying. :

- an online application for admission; and
- two sets of **official** transcripts from **all** colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

- an online departmental application for admission;
- one set of **unofficial** transcripts from **all** colleges and universities attended, *other than Sacramento State*;
- GRE General Test scores (**NOTE: GRE General Test scores will be accepted after the application deadline but only if the test was taken prior to the deadline**);
- two letters of recommendation; and
- a statement of purpose.

Departmental applications for admission are due February 1. There is currently **no general call for admission for students to begin in the spring semester**. However a student may **petition** the department to begin the **spring**. Please contact your potential graduate advisor (i.e., a faculty member in your area of interest) to discuss this option. Approximately eight to ten weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

No units from the following are acceptable toward the master's degree:

Code	Title	Units
BIO 106	Genetics: From Mendel to Molecules	3
BIO 194	Biology-Related Work Experience	6 - 12
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 198A	Honors Proseminar and Research	2
BIO 198B	Honors Research and Seminar	2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Minimum Units and Grade Requirement for the Degree

Units required for MA: 30 (includes units required in areas of concentration).

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master's degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
- begun a preliminary study for the thesis or project; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies Web site and the Department of Biological Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student's thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

All requirements for the Master of Arts degree must be completed within seven (7) years starting from the time the first course is used to meet the master's degree requirements.

Program Requirements¹

No Concentration (30-32 units)

Code	Title	Units
Required Core Courses (8-9 Units)		
BIO 220	Introduction to Scientific Inquiry 	2
BIO 294A	Seminar in Molecular and Cellular Biology ²	1
	or BIO 294B Seminar in Ecology, Evolution and Conservation	
BIO 299	Problems in Biological Sciences	1 - 4
Select one of the following:		2 - 3
BIO 221A	Cell and Molecular Methods and Techniques	
BIO 221B	Methods in Ecology, Evolution and Conservation	
BIO 221C	Exploration of Biological Methodology	
Culminating Requirement (2 Units)		
BIO 502	Master's Project	2
Additional Requirements (20-21 Units)		
Select 20-21 units of electives ¹		20 - 21
Total Units		30-32

¹ Approved electives in Biological Sciences or supporting fields. Electives must be selected in consultation with the graduate advisor and approved at the Advancement to Candidacy meeting. Up to six units of upper division (100-level) coursework taken as a graduate student in the program may be applied to the MA degree. Up to an additional 2 units of BIO 299 may be applied to meet coursework requirements.

² Students must take BIO 294 two times to fulfill degree requirements.

MA in Biological Science (Stem Cell)

Units required for MA: 30 includes units required in areas of concentration.

Program Description

The graduate programs in Biological Sciences lead to either a Master of Arts (MA) or a Master of Science (MS) degree and provides an opportunity for students to receive advanced training and to pursue independent investigations in particular fields of biology. It allows students to upgrade their qualifications for educational advancement to doctoral programs or for professional advancement in teaching, laboratory work, or fieldwork. The MA degree requires the completion of a project which is a Grant Proposal, unless the student is in the Stem Cell Concentration which requires an Internship Project Report. The MS degree requires completion of a thesis which has concentrations in Ecology, Evolution and Conservation and in Molecular and Cellular Biology so as to provide advanced training and research experience in these fields.

All students are required to complete a project or thesis involving field, laboratory, or literature research. The project or thesis research may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student's research must make a new contribution to the field of biology. If the research is conducted off campus, a biology faculty member must be identified as the student's

graduate advisor. Following admission to the program, students are advised by a temporary graduate advisor or by the faculty member who has agreed to supervise the student in their project/thesis research. Students should plan their academic programs in consultation with a graduate advisor as early as possible, preferably prior to enrollment in the program.

For additional information regarding the Biological Sciences Graduate Program, students may contact the Biological Sciences Department Office, Biological Sciences website (<http://www.csus.edu/bios>), or consult the Biological Sciences Graduate Program Handbook, available through the Department's Web site.

Admission Requirements

Admission as a classified graduate student to the MA or MS program in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
- GRE General Test scores (*note: the GRE is not required for the Stem Cell Program*);
- a faculty member who has agreed to serve as their graduate advisor;
- two letters of recommendation from persons qualified to judge the applicant's potential for successful graduate study; and
- a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation, or who have not been accepted by a graduate advisor, may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying. :

- an online application for admission; and
- two sets of **official** transcripts from **all** colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

- an online departmental application for admission;
- one set of **unofficial** transcripts from **all** colleges and universities attended, *other than Sacramento State*;

- GRE General Test scores (**NOTE:** GRE General Test scores will be accepted after the application deadline but only if the test **was taken prior to the deadline; GRE scores are not needed for the MA Stem Cell Program**);
- two letters of recommendation; and
- a statement of purpose.

Departmental applications for admission are due February 1. There is currently **no general call for admission for students to begin in the spring semester**. However a student may **petition** the department to begin the **spring**. Please contact your potential graduate advisor (i.e., a faculty member in your area of interest) to discuss this option. Approximately eight to ten weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

No units from the following are acceptable toward the master's degree:

Code	Title	Units
BIO 106	Genetics: From Mendel to Molecules	3
BIO 194	Biology-Related Work Experience	6 - 12
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 198A	Honors Proseminar and Research	2
BIO 198B	Honors Research and Seminar	2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Minimum Units and Grade Requirement for the Degree

Units required for MA: 30 (includes units required in areas of concentration).

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master's degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;
- begun a preliminary study for the thesis or project; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies Web site and the Department of Biological

Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student's thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

All requirements for the Master of Arts degree must be completed within seven (7) years starting from the time the first course is used to meet the master's degree requirements.

Program Requirements ¹

Concentration in Stem Cell (30 units)

Code	Title	Units
Required Core Courses (25 Units)		
BIO 220	Introduction to Scientific Inquiry 	2
BIO 221A	Cell and Molecular Methods and Techniques	2
BIO 222	Molecular Biology	3
BIO 224	Genomics, Proteomics, and Bioinformatics	3
BIO 225	Stem Cell Biology and Manufacturing Practices	1
BIO 227	Development and Regenerative Medicine	3
BIO 293	Research Conference	2
BIO 294A	Seminar in Molecular and Cellular Biology	1
BIO 299	Problems in Biological Sciences (course taken twice for a total of 8 units)	1 - 4
Culminating Requirement (2 Units)		
BIO 502	Master's Project ²	2
Additional Requirements (3 Units)		
Select one of the following:		3
BIO 223	Human Molecular Genetics	
BIO 245	Host/Pathogen Interactions	
BIO 247	Contemporary Topics in Immunology	
BIO 282	Evolution	
CHEM 230	Separation Methods in Chemistry	
CHEM 145/245	Applications of Computational Chemistry	
CHEM 260	Protein Biochemistry	
CHEM 261	Nucleic Acid Chemistry	
Total Units		30

¹ The 30 units must include a minimum of 18 units of 200-level courses.

² No more than 2 units of BIO 502 may be applied toward the 30 unit requirement.

Each student who receives a Master of Arts degree from the Department of Biological Sciences must submit a written project based on a research problem in biology under the supervision of a graduate advisor. A project can be based on either of the following:

- Grant Proposal: a research proposal in the format required by a state or federal granting agency (e.g., National Science Foundation, National Institutes of Health) based on a novel hypothesis that addresses a biological problem; **OR**
- Internship Project Report: a project report on the student's internship experience.

Minor in Biological Science

Units required for Minor: 20

Program Description

The minor in Biological Sciences is designed to provide students in other majors with the opportunity to broaden their exposure to and understanding of the biological sciences. The minor complements several majors that require coursework in biological sciences, including Chemistry, Nursing, Environmental Studies, Health Science, Kinesiology, and Family and Consumer Sciences.

The minor requires 20 units. The 20 units must include a minimum of 10 upper division units at least one of the upper division courses must have a laboratory component. Three units of biochemistry may be counted toward the minor. Six upper division units must be earned in residence.

Program Requirements

No more than two units of the following may be counted toward the minor.

Code	Title	Units
BIO 186A	Cell and Molecular Biology Seminar	1
BIO/ENVS 186B	Ecological and Environmental Issues Seminar	1
BIO 194	Biology-Related Work Experience	6 - 12
BIO 195	Biological Internship	1 - 2
BIO 197A	Laboratory Teaching Assistant	1 - 2
BIO 197B	Laboratory Techniques	1 - 2
BIO 197C	Co-curricular Activities in Biology	1 - 2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Note: All prerequisites for all courses will be enforced.

MS in Biological Science (Ecology, Evolution, and Conservation)

Total units required for MS: 30 includes units required in areas of concentration.

Program Description

The graduate programs in Biological Sciences lead to either a Master of Arts (MA) or a Master of Science (MS) degree and provides an opportunity for students to receive advanced training and to pursue independent investigations in particular fields of biology. It allows students to upgrade their qualifications for educational advancement to doctoral programs or for professional advancement in teaching, laboratory work, or fieldwork. The MA degree requires the completion of a project which is a Grant Proposal, unless the student is in the Stem Cell Concentration which requires an Internship Project Report. The MS degree requires completion of a thesis which has concentrations

in Ecology, Evolution and Conservation and in Molecular and Cellular Biology so as to provide advanced training and research experience in these fields.

All students are required to complete a project or thesis involving field, laboratory, or literature research. The project or thesis research may be conducted on campus with a biology faculty member or at an off-campus location. In either case, the student's research must make a new contribution to the field of biology. If the research is conducted off campus, a biology faculty member must be identified as the student's graduate advisor. Following admission to the program, students are advised by a temporary graduate advisor or by the faculty member who has agreed to supervise the student in their project/thesis research. Students should plan their academic programs in consultation with a graduate advisor as early as possible, preferably prior to enrollment in the program.

For additional information regarding the Biological Sciences Graduate Program, students may contact the Biological Sciences Department Office, Biological Sciences website (<http://www.csus.edu/bios>), or consult the Biological Sciences Graduate Program Handbook, available through the Department's Web site.

Admission Requirements

Admission as a classified graduate student to the MA or MS program in Biological Sciences requires:

- a baccalaureate degree;
- completion of a major in biological sciences or closely related field; or completion of 24 units of upper division biological sciences courses or courses in closely related fields, each of which must be passed with a "C-" or better;
- a minimum GPA of 2.75 in all biology courses and a minimum GPA of 3.0 in upper division biology courses;
- GRE General Test scores;
- a faculty member who has agreed to serve as their graduate advisor;
- two letters of recommendation from persons qualified to judge the applicant's potential for successful graduate study; and
- a statement of purpose.

It is important to note that meeting all admission requirements does not guarantee acceptance into the graduate program. Students who have deficiencies in admission requirements that can be removed by specified additional preparation, or who have not been accepted by a graduate advisor, may be admitted with conditionally classified graduate status. Admission as a conditionally classified graduate student does not guarantee fully classified status. Fully classified graduate status is conferred when all deficiencies identified at the time of admission are removed and a biology faculty member has agreed to serve as their thesis advisor. Any deficiencies in admissions requirements will be noted on a written response to the admission application.

Admission Procedures

Applicants must complete a university application by the posted application deadline date for the term applying. :

- an online application for admission; and
- two sets of **official** transcripts from **all** colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>.

In addition, all prospective graduate students must submit the following application materials directly to the Department of Biological Sciences:

- an online departmental application for admission;
- one set of **unofficial** transcripts from **all** colleges and universities attended, *other than Sacramento State*;
- GRE General Test scores (**NOTE:** GRE General Test scores will be accepted after the application deadline but only if the test **was taken prior to the deadline**);
- two letters of recommendation; and
- a statement of purpose.

Departmental applications for admission are due February 1. There is currently **no general call for admission for students to begin in the spring semester**. However a student may **petition** the department to begin the **spring**. Please contact your potential graduate advisor (i.e., a faculty member in your area of interest) to discuss this option. Approximately eight to ten weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

No units from the following are acceptable toward the master's degree:

Code	Title	Units
BIO 106	Genetics: From Mendel to Molecules	3

BIO 198B	Honors Research and Seminar	2
BIO 199A	Introductory Undergraduate Research	1 - 2
BIO 199B	Directed Readings	1 - 2

Minimum Units and Grade Requirements for the Degree

Units required for the MS: 30 includes units required in areas of concentration

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

The Advancement to Candidacy process serves to ensure that a student is qualified for and making good progress toward successfully completing the Master's degree. Each classified graduate student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least one course at the 200-level;

- begun a preliminary study for the thesis or project; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

An Application for Advancement to Candidacy forms are available on the Office of Graduate Studies website and the Department of Biological Sciences Web site. The student fills out the form after planning a degree program in consultation with his/her Biological Sciences graduate advisor. After approval by the Biological Sciences Graduate Committee and the student's thesis committee, the completed form is returned to the Office of Graduate Studies for approval.

Note:

Supporting Fields: A maximum of 10 units from an approved supporting field (e.g., Chemistry, Physics, Environmental Studies, Geology, Physics) may be counted toward the degree, with graduate advisor and graduate committee approval obtained **before** taking the course(s).

No more than 10 units of BIO 299 and BIO 500 may be applied toward the 30 unit requirement.

Each student who receives a Master's of Science degree from the Department of Biological Sciences must submit a thesis based on original research in biology. A thesis can be based on either of the following sources of data:

- data generated by the student's original research in which the student performs the fieldwork or laboratory experiments and/or
- data obtained from sources other than the student's own fieldwork or laboratory experiments, provided the data are analyzed in an original way.

The use of data must result in an original contribution to the problem being investigated.

All requirements for the Master's degree must be completed within seven (7) years starting from the time the first course is used to meet the master's degree requirements.

Program Requirements ¹

Code	Title	Units
Required Core Courses (10 Units)

Note:

Supporting Fields: A maximum of 10 units from an approved supporting field (e.g., Chemistry, Physics, Environmental Studies, Geology, Physics) may be counted toward the degree, with graduate advisor and graduate committee approval obtained **before** taking the course(s).

No more than 10 units of BIO 299 and BIO 500 may be applied toward the 30 unit requirement.

Each student who receives a Master's of Science degree from the Department of Biological Sciences must submit a thesis based on original research in biology. A thesis can be based on either of the following sources of data:

- data generated by the student's original research in which the student performs the fieldwork or laboratory experiments and/or
- data obtained from sources other than the student's own fieldwork or laboratory experiments, provided the data are analyzed in an original way.

The use of data must result in an original contribution to the problem being investigated.

All requirements for the Master's degree must be completed within seven (7) years starting from the time the first course is used to meet the master's degree requirements.

Program Requirements ¹

Code	Title	Units
Required Core Courses (10 Units)		
BIO 220	Introduction to Scientific Inquiry 	2

BIO 294A	Seminar in Molecular and Cellular Biology ²	1
or BIO 294B	Seminar in Ecology, Evolution and Conservation	
BIO 299	Problems in Biological Sciences ³	1 - 4
Culminating Requirement (4 Units)		
BIO 500	Master's Thesis	4
Additional Requirements for Concentrations (16 Units)		
Select a concentration from the following:		16
No Concentration		
Ecology, Evolution and Conservation		
Molecular and Cellular Biology		
Total Units		30

¹ The 30 units must include a minimum of 18 units of 200-level seminar courses.

² Students must take BIO 294 two times to fulfill degree requirements.

³ Students must complete 6 units of BIO 299 to fulfill degree requirements.

Concentration in Molecular and Cellular Biology (16 units)

Code	Title	Units
BIO 221A	Cell and Molecular Methods and Techniques	2
BIO 222	Molecular Biology	3
BIO 224	Genomics, Proteomics, and Bioinformatics	3
Select 8 units of approved electives ¹		8
Total Units		16

¹ Approved electives in Biological Sciences or supporting fields. Electives must be selected in consultation with the graduate advisor and approved at the Advancement to Candidacy meeting. Up to two additional units of BIO 294A (up to 4 total) coursework taken as a graduate student in the program may be applied to the MS degree.

MS in Marine Science

Total units required for MS: 31-34

Program Description

The Master of Science degree in Marine Science is offered as an interdepartmental degree through Biological Sciences in cooperation with Moss Landing Marine Laboratories.

Admission Requirements

The Master of Science degree in Marine Science program is administered through MLML and the Biological Sciences Department. The prospective student must meet the entrance requirements for the program and will be accepted into unclassified or conditionally classified graduate status by normal procedures. The student will become classified upon completion of MLML's requirements.

A conditionally classified student may become fully classified in the Marine Science program as follows:

- obtain an advisor at MLML and one from the department of the student's choice at the home campus. Each new student in the MS

program at MLML will be assigned an advisor who may or may not be the final thesis advisor;

- make up any coursework deficiencies at either the home campus department (see their regulations) and/or MLML. MSCI 104, and three of the following five courses are prerequisites for classified graduate standing:

Code	Title	Units
MSCI 103	Marine Ecology	4
MSCI 141	Geological Oceanography	4
MSCI 142	Physical Oceanography	4
MSCI 143	Chemical Oceanography	4
MSCI 144	Biological Oceanography	4

These courses may be waived by the graduate committee upon certification that equivalent courses have been satisfactorily completed. MSCI 104 is a prerequisite and cannot be counted toward the 30-unit degree requirement;

- students who do not receive a GPA of 3.0 or better in the courses listed above taken at MLML, or who wish to substitute equivalent courses taken elsewhere regardless of the grade(s) received, must pass a written qualifying examination given by the faculty at MLML. Contact MLML for further information.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 31-34

Minimum Cumulative GPA: 3.0

A student becomes eligible for the MS degree in Marine Science after satisfying the following requirements:

- the student has been advanced to candidacy;
- the student has satisfied MLML's requirements for the degree; and
- the student has completed the following curriculum requirements.

Advancement to Candidacy

To be advanced to candidacy, the student must have:

- attained classified standing;
- selected a thesis problem and a thesis advisory committee. The thesis committee will be composed of at least three members, including one faculty member from MLML (who is ordinarily the thesis advisor) and, at the discretion of the home campus, a representative from that campus. The other member or members of the thesis committee may also be from MLML, or from the home campus, or elsewhere, with the approval of the thesis advisor; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Notes:

- The student must have submitted a thesis approved by the thesis advisory committee. The thesis must conform to the rules set forth by the home campus.
- The student must successfully give an oral thesis defense in the form of a seminar open to the general public. The thesis advisory

committee must be present, may require further oral questioning after the seminar, and will evaluate the success of the presentation.

Program Requirements

Code	Title	Units
Required Courses (7-10 Units)		
MSCI 285	Seminar in Marine Biology	2
MSCI 286	Seminar in Marine Geology	2
MSCI 287	Seminar In Oceanography	2
MSCI 299	Master's Thesis	1 - 4
Electives (24 Units)¹		
Select 9 units of electives from MSCI 200-level courses		9
Select 15 units of electives from MSCI 100-level or above courses as approved by the thesis committee. The following courses may be used:		15
MSCI 112	Marine Birds and Mammals	
MSCI 113	Marine Ichthyology	
MSCI 124	Marine Invertebrate Zoology I	
MSCI 125	Marine Invertebrate Zoology II	
MSCI 131	Marine Botany	
MSCI 201	Library Research Methods	
MSCI 202	Oceanographic Instrumentation	
MSCI 211	Ecology of Marine Birds and Mammals	
MSCI 212	Advanced Topics in Marine Vertebrates	
MSCI 221	Advanced Topics in Marine Invertebrates	
MSCI 231	Biology Of Seaweeds	
MSCI 234	Advanced Biological Oceanography	
MSCI 242	Plate Tectonics	
MSCI 248	Marine Benthic Habitat Techniques	
MSCI 251	Marine Geochemistry	
MSCI 261	Ocean Circulation and Mixing	
MSCI 271	Population Biology	
MSCI 272	Subtidal Ecology	
MSCI 280	Scientific Writing	
MSCI 298	Research in the Marine Sciences	
Total Units		31-34

¹ Other electives, including courses from home campus departments, may be included after consultation with the thesis advisory committee. See course descriptions for prerequisites.

Subject Matter Program (Biology)

Units required for Subject Matter Program: 62-63

Total units required for BA: 120

Program Description

The Science Subject Matter Program (SSMP), with emphases in Biological Sciences, Chemistry, and Physics, leads to a BA degree in the area of emphasis. It also meets the latest California Commission on Teacher Credentialing (CCTC) subject-matter requirement to enter a teaching credential program in California. In order to obtain a California K-12 Teaching Credential, a program of professional education preparation (a teaching credential program) is required in addition to

completing the SSMP. Completing the SSMP and teaching credential program allows graduates to teach all four sciences (biology, chemistry, geoscience, and physics) at the general/integrated 7th-12th grade science level, in addition to the student's area of concentration at the advanced high school level. A typical credential might read, for example, SCIENCE: Chemistry.

The Biology SSMP provides the minimum preparation for biology students interested in the single subject teaching credential in the sciences with a concentration in biology. This program meets the standards for academic preparation set by the California Commission on Teacher Credentialing and qualifies students to teach general science covering all four natural sciences and biology at the high school level.

A grade of at least a "C-" in all required Science Subject Matter Program courses is necessary in order to meet subject matter requirements for admission to a teaching credential program. If a grade of "C-" is not achieved in all SSMP courses, then the current CTC approved subject matter exam must be successfully passed in order to be eligible for admission to a teaching credential program (the current exam is the CSET, tests I, II, and III). At least 15 units of the coursework or equivalent work experience must be current, i.e., completed within the past six years.

It is also possible to obtain admission to the Professional Education Program by passing a series of subject-matter examinations specified by the CTC in lieu of this Science Subject Matter Program. For information about this option contact the Teacher Preparation Program Office, Eureka Hall 216, (916) 278-6403.

Special Features

- At Sacramento State all of the departments in the College of Natural Sciences and Mathematics have strong BA and BS programs supported by an active faculty and with modern laboratory facilities. The College is committed to the education and development of new science teachers and have a solid record of providing professional activities and support for local experienced teachers through the work of the Center for Mathematics and Science Education.
- This subject matter program is based on the concept that, if well-educated science majors pursue teaching careers in K-12 education, science instruction will improve. To this end, the Sacramento State Science Subject Matter Program embodies the following features.

The program:

- emphasizes breadth in sciences.
- requires depth of study in one of the natural sciences. All credential candidates must complete the BA requirements in one of the emphases. Through deeper study of science, credential candidates become learners in the discipline and develop the ability to be creative teachers and models for their students.
- emphasizes laboratory and field work so that credential candidates learn to use the many tools of science including computers. This will enable them to develop laboratory programs and structure field experiences for students in their schools.
- emphasizes science for all students. The College recognizes the need for programs that address the needs of underrepresented groups in science.

Notes:

- Credential candidates who complete the SSMP will have gained the confidence and ability to do science. They will understand that science is a creative and dynamic process which, when applied, can

lead to understanding and appreciation of the natural world. This attitude will be reflected in their classrooms and will make them good models for pre-college students.

- Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so as early as it is critical that their science coursework be carefully planned and coordinated with the professional teacher preparation program. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, and visiting schools; all experiences that can be arranged through your advisor.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (36-37 Units)		
ASTR 4A	Introduction to the Solar System ¹	3
or ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
or ASTR 4C	Introduction to Astrobiology	
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
CHEM 20	Organic Chemistry Lecture–Brief Course	3
ENVS 10	Introduction to Environmental Science ¹	3
GEOL 10	Physical Geology ¹	3
GEOL 10L	Physical Geology Lab ¹	1
	Select one of the following:	3 -
		4
MATH 26A	Calculus I for the Social and Life Sciences ¹	
MATH 30	Calculus I ¹	
PHYS 5A	General Physics: Mechanics, Heat, Sound ¹	
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	
Required Upper Division Core Courses (26 Units)		
BIO 100	Introduction to Scientific Analysis	2
BIO 121	Molecular Cell Biology	3
BIO 131	Systemic Physiology	4
BIO 139	General Microbiology	4
BIO 160	General Ecology	3
BIO 184	General Genetics	4
BIO 188	Evolution	3
CHEM 161	General Biochemistry ²	3
Total Units		62-63

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² CHEM 160A and CHEM 160B may be taken in lieu of CHEM 161. Three units may be counted toward the 24 upper division unit requirements for the major.

Note:

- BIO 195T is highly recommended for students interested in pursuing a credential in the CSU system; 45 hours of documented work with

the target school age is required prior to admission in a credential program.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3-6 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ³	0 -
		3
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
	Area D Course	3
	Area D Course	3
	Area D Course	3
	Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
	Area E Course	3
Total Units		39-42

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students a "select from the following" option:

- If student chooses to take MATH 30 or MATH 31, they will meet Area B4.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI)	3
Graduation Requirements (required by Sacramento State) (12 Units)		
	English Composition II	3

Race and Ethnicity in American Society (RE)	3
Foreign Language Proficiency Requirement ²	6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Chemistry

College of Natural Sciences and Mathematics

Program Description

Chemistry is the area of science in which the composition, structure, properties, and reactions of substances are studied. The Chemistry Department at Sacramento State offers a BS in Chemistry, a BS in Biochemistry, a BA in Chemistry (including concentrations in Biochemistry or Forensic Chemistry), and the MS degree in Chemistry (including a concentration in Biochemistry).

The BS degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas. The BS Chemistry degree is approved by the American Chemical Society.

The BA degree is more flexible in terms of upper division electives and is recommended for students interested in professional health degrees, forensic chemistry, or other programs with a major component of chemistry. Students planning to teach Chemistry at the secondary school level are advised to obtain a BA in Chemistry.

The graduate program in Chemistry leads to a Master of Science (MS) degree. It provides students an opportunity to receive advanced training in chemistry, biochemistry, and chemical education and to pursue independent research. The MS program enhances a student's overall knowledge in chemistry and experimental skills and prepares students for careers in industry and teaching and for entry into PhD and professional programs.

Degree Programs

BA in Chemistry (Biochemistry) (p. 768)

BA in Chemistry (Forensic Chemistry) (p. 770)

BA in Chemistry (General) (p. 771)

BS in Biochemistry (p. 773)

BS in Chemistry (p. 775)

Chemistry Honors Program (p. 776)

Minor in Chemistry (p. 777)

Subject Matter Program (Pre-Credential Preparation) (p. 780)

MS in Chemistry (p. 777)

MS in Chemistry (Biochemistry) (p. 779)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts and the Bachelor of Science in Chemistry are also individually accredited by the American Chemical Society.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- The Department of Chemistry is accredited by the American Chemical Society, and students graduating with the BS Chemistry degree will receive a certificate from the Society.
- Extensive available instrumentation includes two Agilent 7890 GC-Mass spectrometers; an Agilent 1260/6460 LC-Mass spectrometer (triple quadrupole); a Bruker Avance-500 NMR; a Bruker Avance-300 NMR; a Bruker MSL 300MHz wide bore NMR; a Nicolet IS-50 FTIR; a Shimadzu UV-2401 PC spectrometer; two Shimadzu spectrofluorometers (RF 6000 and RF5301PC); numerous uv-vis diode array spectrophotometers; a Beckman L2-50 ultracentrifuge; numerous Agilent/HPLC systems; a Perkin-Elmer atomic absorption spectrometer; a thermoanalyzer; a QuantumCube computational system; Spartan and Gaussian computational chemistry software; numerous gas chromatographs.
- Several science computing labs are available to students.
- The Chemistry faculty strongly believe that students majoring in Chemistry should have an opportunity to participate in basic or applied research and to work closely with faculty in developing their chemical skills and knowledge. Bachelor of Science and Bachelor of Arts majors are strongly encouraged to complete an independent research project. All graduate students must enroll in a graduate research course.
- All faculty serve as advisors to students and have a strong commitment to helping students find jobs or gain admission to graduate programs or professional schools.
- Our department environment is very similar to a small college liberal arts experience.

Career Possibilities

Students in our program learn both fundamental theory and practical application in all areas of chemistry (inorganic, analytical, organic, physical, biochemical) and they gain substantial experience operating highly sophisticated instrumentation. This prepares students for a wide variety of careers. Examples include: environmental chemistry, toxicology, materials science, government and industry laboratories, biotechnology, agricultural technology, high school science teaching, medicine, dentistry, optometry and other related health sciences, pharmacy and pharmacology, patent law, computational chemistry, forensic analysis, sales representative for instrument, chemical and pharmaceutical companies, art restoration and more.

CHEM 1A. General Chemistry I. 5 Units

Prerequisite(s): High school chemistry and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or a minimum grade of "C" in CHEM 4.

General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)

Term Typically Offered: Fall, Spring

Fundamental principles and concepts of chemistry, including stoichiometry; thermochemistry; atomic and molecular structure; solution chemistry, including acid-base chemistry; quantum theory; bonding and intermolecular forces; and chemical kinetics. Lecture three hours, laboratory three hours, discussion one hour.

Note: Not open to enrollment by engineering majors, who should take CHEM 1E, General Chemistry for Engineering.

CHEM 1B. General Chemistry II. 5 Units

Prerequisite(s): CHEM 1A with a passing grade of C or better.

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall, Spring

Continuation of the development of fundamental principles of chemistry and application of principles developed in CHEM 1A. The laboratory work emphasizes applications of equilibrium principles, including some qualitative analysis, coordination chemistry and bioinorganic chemistry. Lecture three hours, laboratory six hours. Knowledge of word processing and spreadsheet software is recommended.

CHEM 1E. General Chemistry for Engineering. 4 Units

Prerequisite(s): High school chemistry; Math 30 or eligibility to take MATH 30 as evidenced by the calculus readiness diagnostic exam; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or minimum grade of "C" in CHEM 4

Term Typically Offered: Fall, Spring, Summer

A one-semester chemistry course for engineering students covering the fundamental principles and concepts of chemistry important to engineering applications. Lecture topics include atomic and molecular structure, solution chemistry, equilibrium, oxidation-reduction, thermochemistry; intermolecular forces; electrochemistry; radiochemistry; polymers; metallic bonding and alloys; chemical diffusion and kinetics. Lecture three hours, Lab three hours.

Note: Enrollment in this course is restricted to engineering majors.

CHEM 4. Chemical Calculations. 3 Units

Prerequisite(s): High school algebra and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent.

Term Typically Offered: Fall, Spring, Summer

Introductory chemistry for students who plan to major in a scientific field. Appropriate for students desiring to prepare themselves for Chemistry 1A. Emphasizes chemical nomenclature and techniques of chemical problem solving. Topics covered include: dimensional analysis; conversions between measuring units; weight, mole and chemical equations; density; elementary gas laws; heat and temperature; elementary acid and base chemistry; oxidation and reduction; solutions. Three hours lecture.

- CHEM 5. Chemistry for Nurses. 5 Units**
Prerequisite(s): One year high school algebra, high school chemistry .
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring
- One-semester chemistry survey course for pre-nursing students, covering the areas of general chemistry, organic chemistry and biochemistry. Major lecture topics include atomic and molecular structure and bonding, nomenclature of relevant inorganic and organic compounds, states of matter and intermolecular forces, solutions and solubility, reactions of inorganic, organic, and biological molecules, stereochemistry, structure and function of biological macromolecules, nutrition and metabolism. Emphasize chemistry as it appears in a practical nursing context. Lecture four hours, laboratory three hours.
- CHEM 6A. Introduction to General Chemistry. 5 Units**
Prerequisite(s): One year high school algebra; high school chemistry recommended.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring
- Structure of atoms, molecules and ions; their interactions including stoichiometry, equilibria, and oxidation-reduction. Does not fulfill the requirements for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours, discussion one hour, laboratory three hours.
- CHEM 6B. Introduction to Organic and Biological Chemistry. 5 Units**
Prerequisite(s): CHEM 1A or CHEM 6A, or a high school chemistry course and passing a qualifying exam given in the first laboratory period.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Introduction to structure and properties of the major classes of organic compounds; introduction to nomenclature and to the fundamental concepts of reaction mechanisms and stereochemistry; the chemistry and metabolism of carbohydrates, lipids, proteins (including enzymes); the chemistry of nucleic acids. Does not fulfill the requirement for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours; discussion one hour; laboratory three hours.
- CHEM 20. Organic Chemistry Lecture--Brief Course. 3 Units**
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
- Basic principles of organic chemistry. Recommended for students majoring in life-sciences, but not recommended for preprofessional students.
- CHEM 20L. Introductory Organic Chemistry Laboratory. 1 Unit**
Prerequisite(s): CHEM 20; CHEM 20 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Basic organic experimental techniques. Experimental topics include: melting points, purification of solids, distillation, chromatography, extraction, and functional group qualitative analysis. Specifically designed for Biological Sciences majors and others who want to meet the Chemistry minor requirements for a lower division organic laboratory. Laboratory three hours.
- CHEM 24. Organic Chemistry Lecture I. 3 Units**
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring, Summer
- Introduction to the basic principals of organic chemistry, including nomenclature, properties and reactions of various classes of organic compounds. Reaction mechanisms will be emphasized.
Note: Required for chemistry majors and recommended for preprofessional students.
- CHEM 25. Organic Chemistry Laboratory. 3 Units**
Prerequisite(s): CHEM 24, CHEM 124; CHEM 124 may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer
- Basic organic experimental techniques including the preparation, separation, purification and identification of organic compounds. Discussion one hour, laboratory six hours.
- CHEM 31. Quantitative Analysis. 4 Units**
Prerequisite(s): CHEM 1B.
Term Typically Offered: Fall, Spring
- Chemical measurements including associated statistics, chemical equilibrium in aqueous solutions, volumetric analysis, and an introduction to spectrophotometry and chromatography. Lecture two hours, laboratory six hours.
- CHEM 89. Introduction to Undergraduate Research. 1 - 3 Units**
Term Typically Offered: Fall, Spring
- Introduction to undergraduate research which requires students to become familiar lab safety policies, SDSs, and SOPs in the research lab (if applicable), attend group meetings (if applicable) and learn methods of experimental, educational and/or computational design. Students must show proficiency in these requirements in order to receive a final grade. Credit/No Credit
- CHEM 106. Chemical Concepts. 3 Units**
Prerequisite(s): GEOL 8 or BIO 7 and ENGL 20 or an equivalent second semester composition course.
Term Typically Offered: Fall, Spring
- Principles and concepts of chemistry with applications in the home and environment. Satisfies the upper division chemistry requirement for the multiple-subject teaching credential. Lecture one hour, discussion and activity four hours. Does not fulfill credit requirements for the major or minor in chemistry.
- CHEM 110. Inorganic Chemistry Lecture. 3 Units**
Prerequisite(s): CHEM 125, CHEM 140B or CHEM 142 instructor permission; CHEM 140B may be taken concurrently, however, students are encouraged to complete CHEM 140B and CHEM 141 first.
Corequisite(s): CHEM 110L.
Term Typically Offered: Fall only
- Application of atomic structure, the periodic law, molecular structure and bonding principles, electrochemical principles and other selected models and concepts to theoretical and descriptive inorganic chemistry. Physical and chemical properties of selected elements and inorganic compounds are studied.

CHEM 110L. Advanced Inorganic Chemistry Laboratory. 2 Units

Prerequisite(s): CHEM 125, ENGL 20 or an equivalent second semester composition course.

Corequisite(s): CHEM 110.

Term Typically Offered: Fall only

Preparation, purification and instrumental studies of inorganic compounds. Instrumental and experimental techniques will include EPR, magnetic susceptibility, FTIR, UV-VIS spectroscopy and inert atmosphere techniques.

CHEM 124. Organic Chemistry Lecture II. 3 Units

Prerequisite(s): CHEM 24 or instructor permission; concurrent enrollment in CHEM 25 recommended.

Term Typically Offered: Fall, Spring, Summer

Continued discussion of the principals of organic chemistry, including nomenclature, properties, and reactions of various classes of organic compounds and spectroscopic analysis. Reaction mechanisms will be emphasized.

CHEM 125. Advanced Organic Chemistry Laboratory. 3 Units

Prerequisite(s): CHEM 25, CHEM 124, ENGL 20 or an equivalent second semester composition course.

Term Typically Offered: Fall, Spring

Focuses on advanced organic laboratory techniques and instrumental methods of analysis. Not intended for pre-health professional majors. Discussion one hour, laboratory six hours.

CHEM 126. Physical Organic Chemistry. 3 Units

Prerequisite(s): CHEM 124, and CHEM 140B or CHEM 142, or instructor permission.

Corequisite(s): CHEM 140B or CHEM 142 may be taken concurrently.

Term Typically Offered: Fall, Spring

Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.

Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.

CHEM 128. Organic Synthesis. 3 Units

Prerequisite(s): CHEM 124.

Term Typically Offered: Spring only

Application of functional group reactions to multistep syntheses. Recently developed synthetic methods and literature searching will be emphasized.

CHEM 133. Chemical Instrumentation. 4 Units

Prerequisite(s): CHEM 31, concurrent enrollment in CHEM 140B or completion of CHEM 142; ENGL 20 or an equivalent second semester composition course. Graded: Graded Student. Units: 4.0

Term Typically Offered: Fall, Spring

Modern instrumentation and methods for chemical analysis. Function of electronics and computers in instruments. Theory and use of instruments in the areas of electrochemistry, spectroscopy, mass spectrometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 140A. Physical Chemistry Lecture I. 3 Units

Prerequisite(s): CHEM 1B, CHEM 24, CHEM 31, MATH 32, PHYS 5A, PHYS 5B, or PHYS 11A, PHYS 11B, PHYS 11C; PHYS 11C may be taken concurrently.

Term Typically Offered: Fall only

Introduction to chemical thermodynamics and kinetics.

CHEM 140B. Physical Chemistry Lecture II. 3 Units

Prerequisite(s): CHEM 140A.

Term Typically Offered: Fall, Spring

Introduction to molecular quantum chemistry, structure of matter, molecular spectroscopy, and statistical thermodynamics.

CHEM 141. Physical Chemistry Laboratory. 3 Units

Prerequisite(s): ENGL 20 or an equivalent second semester composition course; CHEM 140A, CHEM 140B or CHEM 142, instructor permission; CHEM 140B may be taken concurrently.

Term Typically Offered: Fall, Spring

Selected exercises in the practice of physio-chemical laboratory methods. Lecture one hour, laboratory six hours.

CHEM 142. Introduction to Physical Chemistry. 4 Units

Prerequisite(s): CHEM 1B, CHEM 24, PHYS 5A, PHYS 5B, MATH 31.

Term Typically Offered: Fall, Spring

Introductory presentation of the theoretical and practical aspects of thermodynamics, quantum chemistry, spectroscopy, and kinetics. As time permits, other topics will be: solution chemistry, hydrodynamics, electrochemistry, and crystallography.

Note: Not acceptable for the BS or the BA without concentration.

CHEM 145. Applications of Computational Chemistry. 3 Units

Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.

Term Typically Offered: Fall only – odd years

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/computational software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.

Note: CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145. Cross-listed: CHEM 245.

CHEM 160A. Structure and Function of Biological Molecules. 3 Units

Prerequisite(s): CHEM 124; MATH 26A or MATH 30 is recommended. Fall only.

Term Typically Offered: Fall only

The chemistry and biochemistry of amino acids, proteins, nucleic acids, lipids and carbohydrates. Also includes enzyme kinetics, the structure and function of biological membranes and discussion of some common laboratory methods. Lecture three hours.

CHEM 160B. Metabolism and Regulation of Biological Systems.**3 Units****Prerequisite(s):** CHEM 160A or equivalent course; one year of organic chemistry. Spring only.**Term Typically Offered:** Spring only

The bioenergetics and regulation of anaerobic and aerobic metabolic pathways. Major topics include glycolysis, Krebs' cycle, fatty acid and amino acid oxidation, lipid biosynthesis and photosynthesis. Particular emphasis is given to pathway regulation and integration. Lecture three hours.

CHEM 161. General Biochemistry.**3 Units****Prerequisite(s):** CHEM 20 or CHEM 124; one year of biological science is recommended.**Term Typically Offered:** Fall, Spring, Summer

Introduction to the structure and function of biological molecules (carbohydrates, lipids, proteins, nucleic acids, enzymes and hormones), enzyme kinetics, the structure and function of membranes, and the bioenergetics and regulation of major anaerobic and aerobic metabolic pathways.

CHEM 162. General Biochemistry Laboratory.**3 Units****Prerequisite(s):** CHEM 31; CHEM 160A or CHEM 161 (either CHEM 160A or CHEM 161 may be taken concurrently); ENGL 20 or an equivalent second semester composition course.**Term Typically Offered:** Fall, Spring

Introduction to fundamental laboratory techniques for the purification and analysis of biological molecules, including chromatographic separation of amino acids and proteins, electrophoretic separation of proteins and nucleic acids, enzyme kinetics, and basic bioinformatics. Discussion one hour, laboratory six hours.

CHEM 164. Advanced Biochemistry Laboratory.**3 Units****Prerequisite(s):** CHEM 162 or equivalent; ENGL 20 or an equivalent second semester composition course.**Term Typically Offered:** Fall, Spring

Capstone course which emphasizes biochemical laboratory experimental design and trouble-shooting skills. Common biochemistry laboratory techniques are applied in semester-long individual student projects. Discussion one hour, laboratory six hours.

CHEM 189A. Undergraduate Research.**1 - 3 Units****Prerequisite(s):** ENGL 20 or equivalent**Term Typically Offered:** Fall, Spring

Directed undergraduate research involving a project that requires use of chemical literature and experimental design. A comprehensive written report and/or scientific poster must be submitted to receive a final grade. **Note:** Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189B. Intermediate Undergraduate Research.**1 - 3 Units****Prerequisite(s):** ENGL 20 or equivalent and CHEM 189A**Term Typically Offered:** Fall, Spring

Continuing directed undergraduate research involving a project with emphasis on experimentation and data analysis. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189C. Advanced Undergraduate Research.**1 - 3 Units****Prerequisite(s):** ENGL 20 and CHEM 189B**Term Typically Offered:** Fall, Spring

Culminating directed undergraduate research with emphasis on comprehensive data analysis and formulation of conclusions. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189D. Culminating Advanced Undergraduate Research.**1 - 3 Units****Prerequisite(s):** ENGL 20 and CHEM 189C**Term Typically Offered:** Fall, Spring

Extension of culminating undergraduate research with emphasis on finalizing data analysis and writing experimental methods for potential publication. A comprehensive written report (if a scientific poster was completed in 189C) and/or scientific poster (if a written report was completed in 189C) must be submitted to receive a final grade. Credit/No Credit

CHEM 194. Chemistry-Related Work Experience.**6 - 12 Units****Prerequisite(s):** Open only to upper division students and consent of Department Chair. Units may not be applied toward a major in Chemistry or Biochemistry.**Term Typically Offered:** Fall, Spring

Supervised employment in a Chemistry related company or agency. Placement is arranged through the Department and the Cooperative Education Program office. Requires completion of a 3-6 month work assignment and a written report. Credit/No Credit

CHEM 198. Senior Research.**3 Units****Prerequisite(s):** One upper division chemistry laboratory class, ENGL 20 or an equivalent second semester composition course and instructor and department chair permission.**Term Typically Offered:** Fall, Spring

The student will conduct an independent study of a chemical research topic that is based on experimental techniques or advanced computer modeling. Significant use of chemical literature and information retrieval is required. A well-written, comprehensive, and well-documented final report must be submitted to receive a final grade. A weekly seminar is required. Seminar one hour, laboratory activities are a minimum of six hours per week.

CHEM 198H. Chemistry Honors Thesis.**3 Units****Prerequisite(s):** Open only to students who meet the Chemistry Honors Program criteria; CHEM 198 may be taken concurrently.**Term Typically Offered:** Spring only

Completion of an undergraduate honors thesis and attendance at chemistry seminars. Students will develop a written thesis containing background, methodology, results, and discussion of an experimental or computational research project involving their own original data.

CHEM 200. Research Methods in Chemistry.  3 Units

Prerequisite(s): Must be a Chemistry graduate student or have instructor permission

Term Typically Offered: Fall, Spring

This course is designed to improve the ability of graduate students to research and interpret the chemical literature. Students work through a series of exercises in preparation for a major writing project such as a thesis proposal or a thesis chapter/section. Exercises include analysis of primary research articles, peer review of student writing samples, and presentation of scientific information. These activities will improve students' understanding of how scientific questions are developed and posed through proposals and dissemination of research results.

CHEM 220. Spectrometric Identification of Compounds. 3 Units

Term Typically Offered: Fall, Spring

Interpretation of ultraviolet, infrared, nuclear magnetic resonance, and the mass spectra for the elucidation of chemical structures, with emphasis on problem solving.

CHEM 226. Physical Organic Chemistry. 3 Units

Prerequisite(s): Enrollment in Chemistry master's degree program or instructor permission

Term Typically Offered: Fall, Spring

Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.

Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.

CHEM 230. Separation Methods in Chemistry. 3 Units

Term Typically Offered: Fall, Spring

Theoretical and practical aspects of separation sciences. Methods of separations that are included are liquid-liquid extraction and ion exchange, gas, and liquid chromatography. Lecture three hours.

CHEM 245. Applications of Computational Chemistry. 3 Units

Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.

Term Typically Offered: Fall, Spring

Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/instruction of software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.
Note: CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145. Cross-listed: CHEM 145.

CHEM 250. Selected Topics in Chemistry. 3 Units

Prerequisite(s): Enrollment in MS Chemistry graduate program or instructor permission.

Term Typically Offered: Fall, Spring

Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.

Note: May be team-taught. May be repeated once for credit if topics are different.

CHEM 251. Topics in Interdisciplinary Chemistry. 3 Units

Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.

Term Typically Offered: Fall, Spring

Lecture course focusing on interdisciplinary topics in chemistry and related fields. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 252. Topics in Synthetic Chemistry. 3 Units

Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.

Term Typically Offered: Fall, Spring

Lecture course focusing on synthetic chemistry. Focus may be on biochemical, inorganic, or organic synthetic chemistry. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 253. Topics in Applied Chemistry. 3 Units

Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.

Term Typically Offered: Fall, Spring

Lecture course focusing on applications of chemistry to a variety of fields. Areas of focus may include biological, environmental, materials, and pharmaceutical applications. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 254. Topics in Physical Chemistry. 3 Units

Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.

Term Typically Offered: Fall, Spring

Lecture course focusing on topics in physical chemistry. Areas of focus may include content areas such as quantum mechanics, physical/organic or biophysical chemistry, an/or in-depth treatment of structure analysis and determination. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.

CHEM 255. Topics in Chemistry Education. 3 Units

Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.

Term Typically Offered: Fall, Spring

Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed, including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.

CHEM 260. Protein Biochemistry.**3 Units** Total units required for BA: 120**Prerequisite(s):** One semester of biochemistry.**Term Typically Offered:** Fall, Spring

Provides a comprehensive review of proteins, with emphasis on protein structure and structure/function relationships. Topics include methods for structure determination, stability and folding, catalysis and denovo protein design. Topical examples from the literature, particularly those related to disease states, are used to illustrate fundamental principles of protein structure and function.

CHEM 261. Nucleic Acid Chemistry.**3 Units****Prerequisite(s):** Undergraduate course in biochemistry.**Term Typically Offered:** Fall, Spring

The recent biochemical literature will be used to study the structural, chemical, and physical properties of nucleic acids. Chemical mechanisms of mutation, protein-nucleic acid interactions, and DNA-drug interactions will be used to illustrate these properties.

CHEM 294. Seminar In Chemistry.**0.5 Units****Term Typically Offered:** Fall, Spring

Student presentations of topics from the chemical literature and their thesis research.

Note: Grade of C/NC will be based on attendance and successful presentation of a seminar. May be repeated for a total of 2 units

Credit/No Credit

CHEM 296. Experimental Offerings in Chemistry.**1 Unit****Prerequisite(s):** Instructor approval.**Term Typically Offered:** Fall, Spring

Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques. One hour discussion.

Note: May be taken up to four times for credit, but only one unit may be applied to the University's requirement for 200-level courses.

Credit/No Credit

CHEM 299. Special Problems.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Graduate research. Approval must be obtained from a departmental committee and the faculty member under whom the work is to be conducted. Written report must be submitted before a final grade is given.

Credit/No Credit

CHEM 500. Culminating Experience.**2 - 4 Units****Prerequisite(s):** Advanced to candidacy and chair permission of his/her thesis committee.**Term Typically Offered:** Fall, Spring

Completion of a thesis or project approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree. Number of units of credit is determined by the candidate's master's degree advisory committee.

Contact Lenses

For department policies, including safety policies, please visit our webpage www.csus.edu/chem (<http://www.csus.edu/chem>).

BA in Chemistry (Biochemistry)

Units required for Major: 64-77

Program Description

Three BA programs are available: One without a concentration (general) and two with concentrations (Biochemistry or Forensic Chemistry). The common requirements of the three programs are shown below under "Core Requirements."

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (<http://www.csus.edu/chem/safety.html>). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Contact Lenses

Chemistry Department policy states that contact lenses are prohibited in all chemistry laboratories; prescription glasses should be worn instead. In addition, safety goggles are required in all laboratories. Laboratory aprons are recommended.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student's expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student will have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.

Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

Program Requirements

Code	Title	Units
Core Requirements (39-43 Units)		
CHEM 1A	General Chemistry I ^{1,2}	5
CHEM 1B	General Chemistry II	5
CHEM 24	Organic Chemistry Lecture I	3
CHEM 25	Organic Chemistry Laboratory	3
CHEM 31	Quantitative Analysis	4
CHEM 124	Organic Chemistry Lecture II	3
MATH 30	Calculus I ¹	4
MATH 31	Calculus II	4
Select one of the following sequences:		8 - 12
PHYS 5A & PHYS 5B	General Physics: Mechanics, Heat, Sound General Physics: Light, Electricity and Magnetism, Modern Physics	
PHYS 11A & PHYS 11B & PHYS 11C	General Physics: Mechanics General Physics: Heat, Light, Sound, Modern Physics General Physics: Electricity and Magnetism	
Total Units		39-43

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² Passing a placement exam or obtaining a passing grade of "C" or better in CHEM 4 is required to enroll in CHEM 1A.

Concentration in Biochemistry (32-34 units)

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	5
Select one of the following:		4 - 6
CHEM 140A & CHEM 140B	Physical Chemistry Lecture I Physical Chemistry Lecture II	
CHEM 142	Introduction to Physical Chemistry	
CHEM 160A	Structure and Function of Biological Molecules	3
CHEM 160B	Metabolism and Regulation of Biological Systems	3
CHEM 162	General Biochemistry Laboratory	3
CHEM 164	Advanced Biochemistry Laboratory	3
Select 6 units of Electives in Biological Sciences (must be from the following courses):		6
BIO 121	Molecular Cell Biology	
BIO 131	Systemic Physiology	
BIO 139	General Microbiology	
BIO 180	Advanced Molecular Biology	
BIO 184	General Genetics	
Total Units		32-34

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Note: Students may also complete a BA with a concentration in Biochemistry by taking the general BA curriculum and completing the following additional courses:

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 160A	Structure and Function of Biological Molecules	3
CHEM 160B	Metabolism and Regulation of Biological Systems	3
CHEM 162	General Biochemistry Laboratory	3
CHEM 164	Advanced Biochemistry Laboratory	3
Select 6 units of upper division Biology courses from the approved list		6
Total Units		28

General Education Requirements ¹

Code	Title	Units

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Biochemistry

Units required for Major: 81-85

Total units required for BS: 120

Program Description

The Bachelor of Science degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (<http://www.csus.edu/chem/safety.html>). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Contact Lenses

Chemistry Department policy states that contact lenses are prohibited in all chemistry laboratories; prescription glasses should be worn instead. In

addition, safety goggles are required in all laboratories. Laboratory aprons are recommended.

Advising

The Department believes advising of students is an important function. Members of the Chemistry Department who have a strong interest in advising have been selected to serve as advisors for students wishing to major in chemistry. Each represents a particular area of chemistry: analytical, inorganic, biochemistry, organic, and physical. Each Chemistry major will be assigned to one of these advisors when entering the Chemistry Department, coordinated to the area of each student's expressed interest.

Prerequisite Requirements

When enrolling in a course, it is required that the student will have met the specific prerequisites listed. A course listed as a prerequisite may have its own set of prerequisites. All must be met prior to enrolling in a chemistry course. Students not meeting the prerequisite requirements for a course will be administratively removed from the class.

Minimum Grade Requirements

In all courses required for the Chemistry major and minor, a minimum grade of "C-" must be earned with the exception of CHEM 1A which requires a grade of C or better. A minimum grade of "C-" is required in all prerequisite courses with the exception of CHEM 1A which requires a grade of C or better to meet the prerequisite requirement for CHEM 1B if a student has not achieved a "C-" in all prerequisite courses for a particular chemistry course, the instructor of the course will administratively remove the student from class.

Transfer Majors and Minors

Transfer students majoring in Chemistry must complete at least three of the required courses in chemistry while fulfilling the residence requirements of California State University, Sacramento. Transfer students seeking a minor in Chemistry must complete at least one upper division chemistry course at the University.

Note: Students graduating with a Bachelor of Science Degree in Biochemistry will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Program Requirements

BS in Chemistry

Units required for Major: 77

Total units required for BS: 120

Program Description

The Bachelor of Science degrees are recommended for students intending to pursue graduate work in Chemistry or Biochemistry or those desiring a strong technical background for work in the chemical or biotechnology industry or other highly technical areas. The BS Chemistry degree is approved by the American Chemical Society.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (<http://www.csus.edu/chem/safety.html>). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the program.

Chemistry Honors Program

Program Description

The purpose of the Chemistry Honors Program is to recognize and support the academic progress of our highest achieving students through undergraduate research culminating in a Chemistry Honors thesis. The Honors Concentration must be combined with one of the five undergraduate chemistry degrees: BA in Chemistry, BA in Chemistry (Biochemistry), BA in Chemistry (Forensic Chemistry), BS in Chemistry, or BS in Biochemistry. In order to fulfill the research requirement, students may engage in two semesters of research with a Chemistry faculty member at Sacramento State (e.g. enroll in CHEM 189A followed by CHEM 198) or they may use a summer research experience either on campus (e.g. NSM SURE, Russell-Forkey Research Award) or off campus (e.g. NSF-REU) in Chemistry or Biochemistry in place of CHEM 189A. All Honors students must enroll in CHEM 198H and complete a Chemistry Honors Thesis.

Eligibility Requirements

"Native" Students:

- Declared as a Chemistry/Biochemistry major;
- Junior standing;
- Minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses;
- Complete CHEM 1A and MATH 30 with a "B" grade or higher; and
- Maximum of one repeated Math/Science course (in college career).

Transfer Students:

- Declared as a Chemistry/Biochemistry major;
- Junior standing;
- Entering minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses (all institutions combined);
- Completed CHEM 1A and MATH 30 (or equivalents) with a "B" grade or higher;
- Maximum of one repeated Math/Science course (in college career); and

- Completed at least 9 units at Sacramento State with a minimum 3.33 GPA, including any one chemistry class which counts towards your chosen degree.

Admission Requirements

Admission to the program for eligible students requires nomination by a faculty member and review and approval by a department committee.

Minimum GPA and Additional Requirements

For students to remain in the program, they must:

1. maintain a minimum 3.5 GPA overall and a minimum 3.33 GPA in Math/Science courses; and
2. have no repeats in Math/Science courses.

Program Requirements

The curriculum of the Honors Program is designed to be coupled with the BA or BS degree programs. The Honors Program requires the following courses:

Code	Title	Units
Required Upper Division Courses (6 Units)		
CHEM 198	Senior Research	3
CHEM 198H	Chemistry Honors Thesis	3

Minor in Chemistry

Units required for Minor: 24

Program Description

Chemistry is the area of science in which the composition, structure, properties, and reactions of substances are studied.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Chemistry minor.

Program Requirements

In consultation with an advisor, choose 24 units of chemistry coursework, 6 units must be upper division courses in chemistry.

Note: A course in quantitative analytical chemistry and a lower division organic laboratory course must be completed as part of the minor.

MS in Chemistry

Total units required for MS: 30

Program Description

The graduate programs in the Department of Chemistry provide students with advanced study in synthesis, separation, and analysis of molecules with an emphasis on developing research skills in experimental and computational chemistry and in chemistry education. The graduate curriculum prepares students for careers in industry and teaching and for entry into PhD and professional programs.

Admission Requirements

Admission as a classified graduate student in the Department of Chemistry requires:

- a BA degree in chemistry, biochemistry or its equivalent as determined by the graduate committee;
- a minimum 2.5 GPA overall, in the last 60 units, and in chemistry, biochemistry, math, and physics courses;
- two letters of recommendation from persons qualified to judge the applicant's potential for successful graduate study
- a personal statement describing the applicant's motivation for seeking a master's degree, why the Sacramento State Chemistry department was selected for pursuing this degree, and the area of advanced study within chemistry, biochemistry or education research the applicant plans to focus

Students desiring to apply to the chemistry graduate program should first examine the chemistry department's web page for basic requirements and deadlines and then contact the Chemistry department graduate coordinator or department Chair for further information if needed. International students should also contact the Office of Global Education for specific application requirements for international applicants.

Admission Procedures

Students desiring to apply to the chemistry graduate program should first contact the Chemistry Department Graduate Coordinator or Department Chair. Information about the graduate program will be discussed with you.

In addition to a Departmental application, applicants must also complete a separate university application by the posted application deadline for the term applying. For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>. The university application requires:

- an online application for admission; and
- two sets of **official transcripts from all colleges and universities attended**, other than Sacramento State.

Approximately six weeks after receipt of all items listed, an admission decision will be mailed to the applicant.

Placement Examinations

All new graduate students must take two placement exams, in organic and physical chemistry, administered at the beginning of each semester. These exams cover topics commonly found in undergraduate courses. Exam results are used to determine undergraduate deficiencies in these areas of chemistry. All deficiencies must be removed by either taking and passing with a grade of "B" an appropriate undergraduate course or by taking again and passing the placement exam. A placement exam can be taken only twice; if the exam is not passed after the second attempt, the appropriate undergraduate course must be completed with a minimum grade of "B" in the first attempt.

Course Requirements

The program centers on a core of four courses designed to increase a student's knowledge and skills in applications of analytical techniques, general instrumentation techniques, chemical separation techniques, and analysis of spectra with applications in the field of biochemistry and organic chemistry primarily. Electives are offered to permit students to expand further their knowledge and skills in chemistry. A minimum

overall and semester GPA of 3.00 must be maintained to sustain good standing in the graduate program. A grade of "C" or better in individual courses is required for graded work to be credited toward fulfillment of the master's degree. Students not meeting these requirements are subject to probationary status and potential disqualification from the program. In addition, students must regularly attend seminars offered approximately once a week each semester. Each student will give one seminar during his/her tenure as a graduate student that is on a literature topic not related to his/her thesis topic and another on his/her thesis results. Participation in seminar expands a student's knowledge of current research in chemistry and also assists in developing his/her oral presentation skills.

Thesis/Research

All students are required to complete a thesis involving original research.

The research may be conducted on campus with a chemistry faculty member or at an employer's work site providing the work involves producing a new contribution to the field of chemistry. Research conducted at a work site requires a supervising chemistry faculty member. The work site mentor and project must be approved by the Graduate Committee.

Advising

Following admission to the chemistry graduate program, students are advised by the graduate coordinator and by the faculty thesis supervisor.

Students must consult with three faculty members before deciding on a thesis advisor. Students who are fully qualified upon admission and make the expected progress can normally finish the degree in two years.

Financial Aid

Financial aid is available. Please contact the Financial Aid Office for more information (1006 Lassen Hall, www.csus.edu/faid (<http://www.csus.edu/faid>)).

Employment

Qualified graduate students may be hired for a limited number of positions as teaching associates (TA). TAs teach undergraduate chemistry laboratories and discussions. Eligibility requirements include: classified status, minimum cumulative GPA 3.0, good English communication skills, passing score on a general chemistry examination. Continuing students desiring support as a TA will be evaluated on the basis of past performance as a TA and academic record as a graduate student in the program. Contact the Department Chair for current employment information.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (<http://www.csus.edu/chem/safety.html>). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the graduate program.

Contact Lenses

Chemistry Department policy states that contact lenses are prohibited in all chemistry laboratories; prescription glasses should be worn instead. In addition, safety goggles are required in all laboratories. Laboratory aprons are recommended.

Laboratory Fees

Students enrolling in chemistry laboratory courses or supervisory courses involving laboratory research are required to pay a laboratory fee for each course. In addition, if a student breaks an item in a laboratory, s/he is required to replace it or pay a breakage cost. An administrative hold is placed on a student's academic record if either is not paid. Details are given at the first class meeting.

Repeating a Chemistry Course

Students repeating a chemistry course must repeat an equivalent course in both units and content.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

After completing at least 40 percent of the graduate degree coursework with an overall GPA of 3.0 or higher, a student may submit an application for Advancement to Candidacy, which indicates the proposed program of graduate study is acceptable to the student, faculty advisor, thesis committee, and the Chemistry graduate coordinator. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements
- met English proficiency requirements
- completed at least 12 units of 200-level courses (including CHEM 200) with a minimum 3.0 GPA;
- obtained approval of the thesis project by the thesis advisor and thesis committee. Students obtain thesis project approval through submission of a formal thesis project proposal and an oral presentation of the project to the thesis committee.
- successfully completed a literature seminar presentation

Program Requirements

Code	Title	Units

In addition to a Departmental application, applicants must also complete a separate university application by the posted application deadline for the term applying. For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>. The university application requires:

- an online application for admission; and
- two sets of **official transcripts from all colleges and universities attended**, other than Sacramento State.

Approximately six weeks after receipt of all items listed, an admission decision will be mailed to the applicant.

Placement Examinations

All new graduate students must take two placement exams, in organic and physical chemistry, administered at the beginning of each semester. These exams cover topics commonly found in undergraduate courses. Exam results are used to determine undergraduate deficiencies in these areas of chemistry. All deficiencies must be removed by either taking and passing with a grade of "B" an appropriate undergraduate course or by taking again and passing the placement exam. A placement exam can be taken only twice; if the exam is not passed after the second attempt, the appropriate undergraduate course must be completed with a minimum grade of "B" in the first attempt.

Course Requirements

The program centers on a core of four courses designed to increase a student's knowledge and skills in applications of analytical techniques, general instrumentation techniques, chemical separation techniques, and analysis of spectra with applications in the field of biochemistry and organic chemistry primarily. Electives are offered to permit students to expand further their knowledge and skills in chemistry. A minimum overall and semester GPA of 3.00 must be maintained to sustain good standing in the graduate program. A grade of "C" or better in individual courses is required for graded work to be credited toward fulfillment of the master's degree. Students not meeting these requirements are subject to probationary status and potential disqualification from the program. In addition, students must regularly attend seminars offered approximately once a week each semester. Each student will give one seminar during his/her tenure as a graduate student that is on a literature topic not related to his/her thesis topic and another on his/her thesis results. Participation in seminar expands a student's knowledge of current research in chemistry and also assists in developing his/her oral presentation skills.

Thesis/Research

All students are required to complete a thesis involving original research.

The research may be conducted on campus with a chemistry faculty member or at an employer's work site providing the work involves producing a new contribution to the field of chemistry. Research conducted at a work site requires a supervising chemistry faculty member. The work site mentor and project must be approved by the Graduate Committee.

Advising

Following admission to the chemistry graduate program, students are advised by the graduate coordinator and by the faculty thesis supervisor.

Students must consult with three faculty members before deciding on a thesis advisor. Students who are fully qualified upon admission and make the expected progress can normally finish the degree in two years

Financial Aid

Financial aid is available. Please contact the Financial Aid Office for more information (1006 Lassen Hall, www.csus.edu/faid (<http://www.csus.edu/faid>)).

Employment

Qualified graduate students may be hired for a limited number of positions as teaching associates (TA). TAs teach undergraduate chemistry laboratories and discussions. Eligibility requirements include: classified status, minimum cumulative GPA 3.0, good English communication skills, passing score on a general chemistry examination. Continuing students desiring support as a TA will be evaluated on the basis of past performance as a TA and academic record as a graduate student in the program. Contact the Department Chair for current employment information.

Safety

Due to the potential hazards some chemicals may present, safety is an essential element of all Chemistry laboratory classes, including independent research. All students must adhere to the Department of Chemistry Laboratory Safety Policies (<http://www.csus.edu/chem/safety.html>). Failure to adhere to the Safety Policies may constitute grounds for withdrawal from a course and/or dismissal from the graduate program.

Contact Lenses

Chemistry Department policy states that contact lenses are prohibited in all chemistry laboratories; prescription glasses should be worn instead. In addition, safety goggles are required in all laboratories. Laboratory aprons are recommended.

Laboratory Fees

Students enrolling in chemistry laboratory courses or supervisory courses involving laboratory research are required to pay a laboratory fee for each course. In addition, if a student breaks an item in a laboratory, s/he is required to replace it or pay a breakage cost. An administrative hold is placed on a student's academic record if either is not paid. Details are given at the first class meeting.

Repeating a Chemistry Course

Students repeating a chemistry course must repeat an equivalent course in both units and content.

Minimum Units and Grade Requirement for the Degree

Units required for the MS: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

After completing at least 40 percent of the graduate degree coursework with an overall GPA of 3.0 or higher, a student may submit an application for Advancement to Candidacy, which indicates the proposed program of graduate study is acceptable to the student, faculty advisor, thesis committee, and the Chemistry graduate coordinator. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements
- met English proficiency requirements
- completed at least 12 units of 200-level courses (including CHEM 200) with a minimum 3.0 GPA;
- obtained approval of the thesis project by the thesis advisor and thesis committee. Students obtain thesis project approval through submission of a formal thesis project proposal and an oral presentation of the project to the thesis committee.
- successfully completed a literature seminar presentation

Program Requirements

Code	Title	Units
Required Courses (11 Units)		
CHEM 200	Research Methods in Chemistry 	3
CHEM 260	Protein Biochemistry	3
CHEM 261	Nucleic Acid Chemistry	3
<i>Seminar in Chemistry - Semester 1</i>		
CHEM 294	Seminar In Chemistry	0.5
<i>Seminar in Chemistry - Semester 2</i>		
CHEM 294	Seminar In Chemistry	0.5
<i>Seminar in Chemistry - Semester 3</i>		
CHEM 294	Seminar In Chemistry	0.5
<i>Seminar in Chemistry - Semester 4</i>		
CHEM 294	Seminar In Chemistry	0.5
Electives (9 Units)		
Select 9 units from the following: ¹		9
CHEM 220	Spectrometric Identification of Compounds	
CHEM 230	Separation Methods in Chemistry	
CHEM 145/245	Applications of Computational Chemistry	
CHEM 250	Selected Topics in Chemistry	
CHEM 251	Topics in Interdisciplinary Chemistry	
CHEM 252	Topics in Synthetic Chemistry	
CHEM 253	Topics in Applied Chemistry	
CHEM 254	Topics in Physical Chemistry	
CHEM 255	Topics in Chemistry Education	
Completion Requirements (10 Units)		
CHEM 299	Special Problems	6
CHEM 500	Culminating Experience	4
Total Units		30

¹ Graduate or upper division courses in appropriate areas (BIO, GEOL, PHYS, ENVS) may be used upon graduate advisor and department chair. A maximum of 2 units of upper division undergraduate coursework may be used toward fulfilling electives.

Subject Matter Program (Chemistry)

Units required for the Subject Matter Program: 84

Program Description

The Science Subject Matter Program (SSMP), with emphases in Biological Sciences, Chemistry, and Physics, leads to a BA degree in the area of emphasis. It also meets the latest California Commission on Teacher Credentialing (CCTC) subject-matter requirement to enter a teaching credential program in California. In order to obtain a California K-12 Teaching Credential, a program of professional education preparation (a teaching credential program) is required in addition to completing the SSMP. Completing the SSMP and teaching credential program allows graduates to teach all four sciences (biology, chemistry, geoscience, and physics) at the general/integrated 7th-12th grade science level, in addition to the student's area of concentration at the advanced high school level. A typical credential might read, for example, SCIENCE: Chemistry.

The Chemistry SSMP provides the minimum preparation for chemistry majors interested in pursuing the single subject teaching credential in the sciences with a concentration in chemistry. This program meets the standards for academic preparation set by the California Commission on Teacher Credentialing and qualifies students to teach general science in all the four natural sciences and chemistry at the high school level.

A grade of at least a "C-" in all required Science Subject Matter Program courses is necessary in order to meet subject matter requirements for admission to a teaching credential program. If a grade of "C-" is not achieved in all SSMP courses, then the current CTC approved subject matter exam must be successfully passed in order to be eligible for admission to a teaching credential program (the current exam is the CSET, tests I, II, and III). At least 15 units of the coursework or equivalent work experience must be current, i.e., completed within the past six years.

It is also possible to obtain admission to the Professional Education Program by passing a series of subject-matter examinations specified by the CTC in lieu of this Science Subject Matter Program. For information about this option contact the Teacher Preparation Program Office, Eureka Hall 216, (916) 278-6403).

Special Features

- At Sacramento State all of the departments in the College of Natural Sciences and Mathematics have strong BA and BS programs supported by an active faculty and with modern laboratory facilities. The College is committed to the education and development of new science teachers and have a solid record of providing professional activities and support for local experienced teachers through the work of the Center for Mathematics and Science Education.
- This subject matter program is based on the concept that, if well-educated science majors pursue teaching careers in K-12 education, science instruction will improve. To this end, the Sacramento State Science Subject Matter Program embodies the following features.

The program:

- emphasizes breadth in sciences.
- requires depth of study in one of the natural sciences. All credential candidates must complete the BA requirements in one of the emphases. Through deeper study of science, credential candidates become learners in the discipline and develop the ability to be creative teachers and models for their students.
