- emphasizes laboratory and field work so that credential candidates learn to use the many tools of science including computers. This will enable them to develop laboratory programs and structure field experiences for students in their schools.
- emphasizes science for all students. The College recognizes the need for programs that address the needs of underrepresented groups in science

Notes:

- Credential candidates who complete the SSMP will have gained the confidence and ability to do science. They will understand that science is a creative and dynamic process which, when applied, can lead to understanding and appreciation of the natural world. This attitude will be reflected in their classrooms and will make them good models for pre-college students.
- Science majors who intend to pursue a teaching credential should see a faculty advisor or the department chair in the department of their academic major. It is recommended that they do so as early as it is critical that their science coursework be carefully planned and

coordinated with the professional teacher preparation program. In addition, students are encouraged to become involved with education related activities like grading, assisting in labs, tutoring K-12 students, and visiting schools; all experiences that can be arranged through your advisor.

Minimum Grade Requirement

A minimum grade "C-" is required in all courses required for the Chemistry major. Grades below "C-" in prerequisite courses do not satisfy prerequisite requirement.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (60 Units)		
ASTR 4A	Introduction to the Solar System ¹	3
or ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
or ASTR 4C	Introduction to Astrobiology	
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes ¹	5
CHEM 1A	General Chemistry I ¹	5
CHEM 1B	General Chemistry II	5
CHEM 24	Organic Chemistry Lecture I	3
CHEM 25	Organic Chemistry Laboratory	3
CHEM 31	Quantitative Analysis	4
ENVS 10	Introduction to Environmental Science ¹	3
GEOL 10	Physical Geology ¹	3
GEOL 10L	Physical Geology Lab ¹	1
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
PHYS 5A	General Physics: Mechanics, Heat, Sound ¹	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics ¹	4
Required Upper Division Courses (24 Units)		
CHEM 124	Organic Chemistry Lecture II	3
CHEM 140A	Physical Chemistry Lecture I	3
CHEM 140B	Physical Chemistry Lecture II	3
Select additional courses to a minimum of 24 upper division units in Chemistry including at least two lecture courses and two laboratory courses. ²		15
Total Units		84

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² Elective courses should be selected in consultation with an advisor.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0

B2 - Life Forms ²	0
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4 - Math Concepts ²	0
B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)	
C1 - Arts	3
C2 - Humanities	3
C1/C2 - Area C Course	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)	
Area D Course	3
Area D Course	3
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)	
Area E Course	3
Total Units	39

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Geography

College of Natural Sciences and Mathematics

Program Description

Geography students at Sacramento State explore Earth's natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography's approach emphasizes Earth's spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

Students work with quantitative and qualitative data from a variety of sources, including published censuses and maps, aerial imagery, field and lab work, surveys, and interviews. They use a variety of tools, including Global Positioning Systems (GPS), Geographic Information Systems (GIS), and other computer applications to collect, display, and analyze spatial data. Geography students study and address complex issues, especially those with a human-environment interface, such as climate change, resource management, urban growth and design, globalization, immigration, ethnic identity, and territorial conflict. Geographical understanding is applied at different scales, from the local to the global, and regional expertise is cultivated.

Lower division offerings in physical geography, cultural geography, and geographical techniques introduce students to the discipline. At the upper division level, students can choose among regional classes, topical classes on subjects from meteorology to transportation, and technique classes that include GIS, map making, quantitative methods, remote sensing, and field work. Majors select a concentration in a geographic subfield. Although not required, the department encourages students to take elective courses and/or pursue a minor complementary to their geographical interests. It also encourages and facilitates students going on Education Abroad.

Degree Programs

BA in Geography (Geographic Information Systems and Analysis) (p. 787)

BA in Geography (Human Geography) (p. 789)

BA in Geography (Metropolitan Area Planning) (p. 791)

BA in Geography (Physical Geography) (p. 792)

Minor in Geography (p. 795)

Minor in Geographic Information Systems (p. 794)

Certificate in Pre-Planning (Metropolitan Planning or Resource Planning) (p. 794)

Special Features

- Numerous internships and jobs in the Sacramento area, including many with state and local government
- Many opportunities for field work in a variety of settings
- A senior project class in which each student conducts his/her own research

- A small major allowing for lots of interaction with faculty and fellow students, including attendance at state and regional professional meetings
- Various pathways to complete the major, providing flexibility and the opportunity to make efficient progress toward graduation

Career Possibilities

Geographer · Cartographer · Climatologist · Resource Scientist · Meteorologist · Geospatial Intelligence Professional · Environmental Scientist · Geographic Information System Specialist · Geographic Consultant · Surveyor · Sustainability Coordinator · Water Resources Analyst · Redevelopment Specialist · Environmental Planner · Energy Analyst · Foreign Area Specialist · Land Economist · Recreation Planner · Locational Analyst · Environmental Education Specialist · Conservationist · Urban Planner · Transportation Planner · Aerial Photo Interpreter · Remote Sensing Specialist · Community Development Specialist · Land Use Planner · Demographer · Cultural Resources Manager · Air Resources Specialist · Real Estate Research Analyst · Pedestrian and Bicycle Advocate · Teacher · Recycling Coordinator · Route Planner · Habitat Manager

GEOG 1. Physical Geography: The Distribution of Natural Phenomena. **3 Units**

General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

Introductory study of the distribution over the face of the earth of selected aspects of climate, plant cover, soils, and landforms and of processes and conditions giving rise to these distributions. The use of maps as communicative devices in comparative analysis and study of distribution and processes.

GEOG 2. Cultural Geography. **3 Units**

General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Consideration of the diversity of patterns of land use, settlement and movement established and evolved by humans as a result of the interaction of cultural and physical factors; emphasis on student use of maps and other tools of geographic presentation for analyzing the nature, variation and distribution of cultural features of the earth's surface.

GEOG 2H. Cultural Geography - Honors. **3 Units**

Prerequisite(s): Open to Honors students only.
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Consideration of the diversity of patterns of land use, settlement and movement established and evolved by humans as a result of the interaction of cultural and physical factors; emphasis on student use of maps and other tools of geographic presentation for analyzing nature, variation and distribution of cultural features of the earth's surface.

Note: This is a special offering designed as part of the G.E. Honors program.

GEOG 3. Introduction to Maps and Geographic Technologies. **3 Units**

Term Typically Offered: Spring only

Introduction to maps, map concepts, and geographic technologies. Maps are the most effective way to communicate spatial data, and introduces students to the quickly changing world of maps (both hard-copy and digital) and geographic technologies including map and aerial photograph interpretation, spreadsheet operations, introductory statistics, global positioning systems (GPS), Internet mapping, satellite and aerial images, and geographic information systems (GIS) that aid in data collection, analysis, and presentation. Lecture two hours; laboratory two hours.

GEOG 5. Violent Weather/Changing Atmosphere. **3 Units**

General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Introduction to meteorological and climatological principles and concepts. These principles will be used to examine severe atmospheric phenomena, including hurricanes, tornadoes, thunderstorms, lightning, destructive winds, severe storms, heat waves, droughts and floods, particularly in relation to human-caused climate change and the effects of these phenomena on humanity.

GEOG 11. Laboratory in Physical Geography. **1 Unit**

Prerequisite(s): GEOG 1; may be taken concurrently.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

Makes the ideas and relationships of introductory physical geography more clear by observation and experiment. Use is made of maps, globes, models, meteorological instruments and records, satellite photos and observations of the local scene. Laboratory, three hours.

GEOG 100. Themes In World Geography. **3 Units**

Prerequisite(s): Junior or Senior class standing or instructor permission.
Term Typically Offered: Fall, Spring

Study of the content of geography with a consideration of basic concepts and methods. Emphasis is on patterns and relationships of the elements and manifestations of physical and cultural geography, including both topical and regional discussions.

- GEOG 102. Ideas and Skills in Geography.** 3 Units
Prerequisite(s): GEOG 1 or GEOG 2 or GEOG 3 or GEOG 11.
Term Typically Offered: Fall only
- Study and discussion of geographic ideas, including the history of the discipline. Introduction to library resources appropriate to geographic inquiry. Practice in geographic descriptive and analytical writing and research. Extensive use of maps. Required of Geography majors in the junior year. Lecture three hours.
- GEOG 105. Computer Cartography.** 3 Units
Prerequisite(s): GEOG 109 or instructor permission.
Term Typically Offered: Fall only
- Preparation of maps and diagrams, emphasizing thematic map design using various mapping and design programs. Detailed study of important map projections. Passing score on ELM exam recommended. Lecture one hour, laboratory six hours.
- GEOG 107. Remote Sensing.** 3 Units
Term Typically Offered: Spring only
- Aerial photographs and scanned satellite images, emphasis on the former. Topics include the electromagnetic spectrum, cameras, films, image geometry as related to planimetric and topographic mapping, multispectral techniques, and interpretation of imagery, emphasizing land use and landforms. Lecture two hours; laboratory three hours.
- GEOG 109. Geographic Information Systems.** 3 Units
Term Typically Offered: Fall, Spring, Summer
- Introduction to GIS, including history and overview of current applications; the nature of spatial data; geographic data structures, acquisition, analysis, and display of geographic data. Lab exercises use various computers and include both raster- and vector-based GIS systems. Lecture two hours; laboratory three hours.
- GEOG 110. Advanced Geographic Information Systems.** 3 Units
Prerequisite(s): GEOG 109 or instructor permission.
Term Typically Offered: Fall only
- Builds on the introduction to the hardware, software and operations of GIS offered with the previous courses, providing the essentials required by a beginning GIS analyst or applications support specialist. Emphasis will be placed on problem solving strategies in the context of GIS projects.
- GEOG 111. Elements Of Meteorology.** 3 Units
Prerequisite(s): GEOG 1 or instructor permission.
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring
- Basic concepts of weather and weather elements: structure and general circulation of the atmosphere, earth's heat and water balance, precipitation, air masses and fronts, air pollution meteorology. Some micrometeorological concepts with application to air pollution, agriculture, and similar problems.
- GEOG 113. Climate.** 3 Units
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall only
- Study of the distribution of heat and moisture over the earth's surface. Basic processes by which heat and moisture acquire unequal distributions in space and time. Classification of climate. Climatic change. Climate models.
- GEOG 115. Biogeography.** 3 Units
Prerequisite(s): GEOG 1 or instructor permission
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall only
- Introduction to the geographic distribution of life. Communities and biomes, changing continents and climates, dispersal, colonization, extinction, life on islands, and past and present human impacts are examined.
Note: Field trip required.
- Field trip(s) may be required.
- GEOG 116. Global Climate Change.** 3 Units
Prerequisite(s): GEOG 1 or instructor permission.
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Spring only
- Study of past climate change and the techniques with which they are reconstructed. Focus on the various temporal scales at which climate change operates. Spatial variability of past, present and future climate changes. Anthropogenic climate change in the context of natural climate variability.
- GEOG 117. Landforms.** 3 Units
Prerequisite(s): GEOG 1 or instructor permission.
Term Typically Offered: Fall only
- Study of the surface forms of the land with particular attention to their distribution and to the accompanying distribution of natural forces and processes which have brought the landforms into being. Study of landforms in the context of Quaternary environmental change. Identification and analysis of landforms using maps and other spatial data. Lecture three hours.
- GEOG 118. Earth Transformed.** 3 Units
Term Typically Offered: Fall, Spring
- Explores the evolving human role in transforming Earth's physical environments. Topics range from prehistoric extinction's to modern environmental problems in select regions. Emphasis is placed on wide-ranging effects of resource use and disposal, with particular reference to atmosphere and biological problems and sustainable solutions.

- GEOG 119. Visualizing Global Environments. 3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Using current geospatial technologies, such as remote sensing and GIS, the course provides an introduction to the distributions of climate, plant cover, soils, and landforms over the face of the earth. While examining processes and conditions that cause these distributions, students will also explore the methods and techniques that let us visualize these distributions, and use maps as communicative devices in our explorations of these topics.
- GEOG 121. United States and Canada. 3 Units**
Term Typically Offered: Fall, Spring
- Present distribution and historical development of population, land use and industry in the U.S. and Canada in relation to regional variations in the physical environment and cultural heritage.
- GEOG 125. Geography Of East Asia. 3 Units**
Term Typically Offered: Fall, Spring
- Geographic setting and nature of Far Eastern civilization; origins, development and present outlines of settlement; cultures, resource use, economic structures, population, levels of technological achievement, and land use in China, Japan and Korea.
- GEOG 127. Geography Of Africa. 3 Units**
Term Typically Offered: Spring only – odd years
- Emphasis is on sub-Saharan Africa with consideration given to selected topics such as population problems, industrialization, regional groupings, transportation, and internal and external relationships.
- GEOG 128. Geography Of Europe. 3 Units**
Term Typically Offered: Spring only – even years
- Survey of Europe with emphasis on its physical environment, contemporary demographic, economic, and ethnic patterns, and the changing political landscape. Consideration will also be given to Europe's historic and present-day links with other world regions, and to the geographic basis for many of the social, political, economic, and environmental challenges facing contemporary Europe.
- GEOG 129A. Special Topics in Regional Geography A. 3 Units**
Term Typically Offered: Fall only
- Geographic survey of a selected region with emphasis on its physical environment and selected economic, demographic, political, and cultural patterns. Consideration may include its connection to other world regions and its role in current events. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129B and GEOG 129C may be taken for up to 9 units.
- GEOG 129B. Special Topics in Regional Geography B. 3 Units**
 Geographic survey of a selected region with emphasis on its physical and human geography. Topics may include climate, landforms, vegetation, economics, demographics, culture, and the region's connection to other world regions and its role in current events. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129A and GEOG 129C may be taken for up to 9 units.
- GEOG 129C. Special Topics in Regional Geography C. 3 Units**
 A selected world region is the focus of this course that geographically surveys the region's physical and human environment. Potential topics include climate, landforms, vegetation, economics, demographics, culture, and more. The specific region is identified by the Geography Department at scheduling. This course and GEOG 129A and GEOG 129B may be taken for up to 9 units.
- GEOG 131. California. 3 Units**
Term Typically Offered: Fall only
- Study of landforms, climate, vegetation, population distribution and change, industry, transportation, water, energy, and agriculture in California.
- GEOG 141. Geography of Economic Activity. 3 Units**
Term Typically Offered: Fall only – even years
- Spatial organization of man's activities related to production, exchange and consumption. Attention is given to resource development and the areal variations of factors affecting it, to concepts of spatial interaction and to spatial aspects of agricultural, industrial and urban land use. An examination of problems related to regional economic development. Changing perceptions of spatial organization of economic activities is also considered. Emphasis is on both theoretical framework and case study applications.
- GEOG 143. Environmental Hazards and Society. 3 Units**
Term Typically Offered: Spring only – odd years
- Focuses on how a place's social systems and physical systems intersect to create hazards. Considers the development of various theoretical approaches to hazards; risk perception and societal responses to hazard events; the history of U.S. disaster response; and approaches to risk/vulnerability assessment.
- GEOG 145. Population Geography. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
- Spatial patterns of population numbers and characteristics; migration and spread of ideas; potential for economic and cultural developments.
- GEOG 147. Urban Geography. 3 Units**
Term Typically Offered: Fall only – odd years
- Consideration of cities as centers of human activity from the rise of urban life in the Old and New Worlds to the present day patterns of metropolis and megalopolis. The functions and interactions of cities in Earth's limited space and on Earth's limited resources are studied historically and crossculturally. Also examined are changing perceptions of the urban phenomenon and attempts to enhance the quality of urban life.
- GEOG 148. Urban and Regional Planning. 3 Units**
Term Typically Offered: Fall, Spring
- Introduction to the theory and practice of urban and regional planning. Topics include the history of planning, the development of comprehensive and land use plans, growth management, and transportation and environmental planning. Includes guest speakers from the planning community as well as the opportunity to work on a project with a community organization or government agency to put into practice what is discussed in class.

- GEOG 149. Transportation Geography.** 3 Units
Prerequisite(s): GEOG 141, GEOG 147, or GEOG 148 or instructor permission.
Term Typically Offered: Spring only – odd years
- Explores the geography of transportation using both theory and applications, quantitative and qualitative methods. Topics include the history and economic importance of transportation systems for all major modes; their political, social, and environmental aspects; and basic analytical methods, including accessibility dynamics, network analysis, and spatial interaction models. Focus will be on the U.S., with frequent reference to local issues, though material will be drawn on from around the world.
- GEOG 150. Programming for GIS.** 3 Units
Prerequisite(s): GEOG 109
Term Typically Offered: Fall, Spring
- This course is an introduction to programming and scripting for intermediate GIS users, using an object-oriented programming approach. You will develop and write clearly documented and structured geoprocessing programs using the Python programming language and ArcPy, a site package (library) for ArcGIS geoprocessing tools.
- GEOG 161. California's Water Resources.** 3 Units
Term Typically Offered: Spring only
- Study of the location and nature of the state's surface and underground water, including development by government agencies, water needs of cities, farms, recreation and wildlife, implications of water rights, water marketing and conservation, and management of floods, droughts and pollution.
- GEOG 163. Applied GIS.** 3 Units
Prerequisite(s): GEOG 109.
Term Typically Offered: Fall only
- Introduction to developing a GIS project, including planning, database research, proposal writing, analysis and evaluation. Lecture 2 hours; Laboratory 3 hours.
- GEOG 181. Quantitative Methods in Geography.** 3 Units
Term Typically Offered: Spring only
- Introduction to techniques useful in the analysis of spatial distributions and other geographic phenomena: basic aspatial descriptive and inferential techniques, correlation, regression, and spatial inferential techniques.
- GEOG 182. Qualitative Methods in Geography.** 3 Units
Prerequisite(s): GEOG 102
- Students learn and conduct an array of observational and qualitative research techniques used in human geography, including landscape observation, participant observation, interviews, surveys and questionnaires, group discussions (focus groups, charrettes, etc.), visual methods, archival research, and analyzing some of the writing styles commonly used in qualitative research. One learns the relative strengths and weaknesses of these techniques, their appropriate applications, ways to combine them in mixed-methods research, and how to analyze and represent the data.
- GEOG 190. Senior Research Seminar in Geography.** 3 Units
Prerequisite(s): GEOG 1, GEOG 2, GEOG 3, GEOG 102; senior standing, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X; instructor permission.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Spring only
- Writing-intensive capstone course requiring students to complete independent research projects displaying their mastery of geography's content and methods. Projects undertaken in a given semester share a common thematic and/or regional focus. Students use bibliographic, field, spatial analytic, graphic, and verbal skills. Context for projects is provided by a review of the recent history of the discipline. Lecture/discussion three hours.
- GEOG 192A. Geography Field Experience A.** 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
- A particular geographical area is explored and studied via beginning-level field observation. Emphasis may be placed on physical features, cultural features, or both.
 Credit/No Credit
- GEOG 192B. Geography Field Experience B.** 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
- A particular geographical area is explored and studied via intermediate-level field observation. Emphasis may be placed on physical features, cultural features, or both.
 Credit/No Credit
- GEOG 192C. Geography Field Experience C.** 1 - 2 Units
Prerequisite(s): one geography course or instructor permission.
Term Typically Offered: Fall, Spring
- A particular geographical area is explored and studied via advanced-level field observation. Emphasis may be placed on physical features, cultural features, or both.
 Credit/No Credit
- GEOG 193A. Field Geography: Urban-Metropolitan.** 3 Units
Prerequisite(s): Instructor permission
Term Typically Offered: Spring only – odd years
- Examines the internal structure and external relations of Sacramento as a metropolitan center and of nearby urban communities through field observation and exercises. Emphasis is placed on mapping and interviewing as ways of gaining useful information on urban patterns.
- GEOG 193B. Field Geography: Suburban-Rural.** 3 Units
Prerequisite(s): Instructor permission.
- Examines competition for land use in suburban Sacramento as urban sprawl overruns less intensive uses. Small towns in the lower Sacramento Valley also examined. Group field trips, interviews, field mapping and discussions.
 Field trip(s) may be required.

<p>GEOG 193C. Field Geography: Physical. 3 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall only</p>	<p>GEOG 198. Co-Curricular Activities. 1 - 6 Units Prerequisite(s): Consent of faculty Sponsor and department chair. Term Typically Offered: Fall, Spring</p>
<p>Survey of selected areas with systematic examination of elements of the natural landscape. Group field trips and individual preparation of reports and consultation with instructor. Field trip(s) may be required.</p>	<p>Co-curricular activities related to subject matter and concerns of the Geography Department, e.g. students may qualify for credit by providing special tutorial assistance to EOP students or others in introductory courses. Note: May be repeated for up to 6 units of credit.</p>
<p>GEOG 194. Geography - Related Work Experience. 6 - 12 Units Prerequisite(s): Consent of supervising faculty and Department Chair. Term Typically Offered: Fall, Spring</p>	<p>Credit/No Credit GEOG 199. Special Problems. 1 - 3 Units Prerequisite(s): Approval of the faculty sponsor and Department chair. Term Typically Offered: Fall, Spring, Summer</p>
<p>Supervised employment in a company or agency doing geography-related work, arranged through the Department of Geography and the Cooperative Education Program office. Requires preparation of application packet, completion of a 3-6 month full- or part-time work assignment, and a written report. Units not applicable to the Geography major. Credit/No Credit</p>	<p>Individual projects or directed reading. Note: Open only to students competent to carry on individual work. Credit/No Credit</p>
<p>GEOG 195A. Geography Internship A. 1 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>GEOG 199A. Geography Special Problems A. 1 - 3 Units Prerequisite(s): Approval of the faculty sponsor and department chair. Term Typically Offered: Fall, Spring</p>
<p>Supervised work experience at the beginning level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit</p>	<p>Individual projects or directed reading at a beginning level. Graded (CR/NC Available) Units: 1.0 - 3.0 Note: Open only to students competent to carry on individual work. Credit/No Credit</p>
<p>GEOG 195B. Geography Internship B. 1 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>GEOG 199B. Geography Special Problems B. 1 - 3 Units Prerequisite(s): Approval of the faculty sponsor and department chair. Term Typically Offered: Fall, Spring</p>
<p>Supervised work experience at an intermediate level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit</p>	<p>Individual projects or directed reading at an intermediate level, ordinarily taken following completion of GEOG 199A. Graded (CR/NC Available) Units: 1.0 - 3.0 Note: Open only to students competent to carry on individual work. Credit/No Credit</p>
<p>GEOG 195C. Geography Internship C. 1 - 3 Units Term Typically Offered: Fall, Spring</p>	<p>GEOG 199C. Geography Special Problems C. 1 - 3 Units Prerequisite(s): Approval of the faculty sponsor and department chair. Term Typically Offered: Fall, Spring</p>
<p>Supervised work experience at an advanced level in an approved professional environment, working with professionals in public or private organizations. Supervision supplied by a geography faculty member and on-site supervisor. Placements require 4-12 hours per week, depending on units. Note: Open to all Geography majors and minors with permission of supervising faculty member and Department Chair. GEOG 195A, GEOG 195B, and GEOG 195C may be taken for up to 6 total units. Credit/No Credit</p>	<p>Individual projects or directed reading at an advanced level. Ordinarily taken following completion of GEOG 199A and GEOG 199B. Graded (CR/NC Available) Units: 1.0 - 3.0 Note: Open only to students competent to carry on individual work. Credit/No Credit</p>
<p>Credit/No Credit</p>	<p>GEOG 299. Special Problems. 1 - 3 Units Prerequisite(s): Approval of the faculty sponsor and Department Chair. Term Typically Offered: Fall, Spring</p>
<p>Credit/No Credit</p>	<p>Individual projects or directed reading. Note: Open only to students competent to carry on individual work. Credit/No Credit</p>

BA in Geography (Geographic Information Systems and Analysis)

Units required for Major: 46
Total units required for BA: 120

Program Description

The Bachelor of Arts in Geography with a concentration in Geographic Information Systems and Analysis emphasizes student development of geospatial skills. Geographic Information Science, cartography, remote sensing, and quantitative methods prepare students to tackle any problem with a spatial dimension—from advising an individual firm on good locations for a new branch or supplier to modeling the spread of wildfires across a region to analyzing the global spread of diseases or new technologies.

Note:

- Every candidate must complete **all** of the Geography Core and **one** Concentration.
- Courses *cannot* double count for the core and the concentration.
- Students must take at least **FOUR** courses, with at least one each from Data Analysis and Data Output categories.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (10 Units)		
GEOG 1	Physical Geography: The Distribution of Natural Phenomena ¹	3
GEOG 2	Cultural Geography ¹	3
GEOG 3	Introduction to Maps and Geographic Technologies	3
GEOG 11	Laboratory in Physical Geography	1
Required Upper Division Core Courses (9 Units)		
GEOG 102	Ideas and Skills in Geography	3
GEOG 118	Earth Transformed	3
GEOG 190	Senior Research Seminar in Geography  ¹	3
Geography Core (12 Units)		
Select one course from each of the following four areas:		12
<i>Geographic Techniques</i>		
GEOG 105	Computer Cartography	
GEOG 107	Remote Sensing	
GEOG 109	Geographic Information Systems	
GEOG 110	Advanced Geographic Information Systems	
GEOG 163	Applied GIS	
GEOG 181	Quantitative Methods in Geography	
GEOG 193A	Field Geography: Urban-Metropolitan	
GEOG 193B	Field Geography: Suburban-Rural	
GEOG 193C	Field Geography: Physical	
<i>Human Geography</i>		
GEOG 141	Geography of Economic Activity	
GEOG 145	Population Geography	
GEOG 147	Urban Geography	
GEOG 148	Urban and Regional Planning	
GEOG 149	Transportation Geography	
GEOG 163	Applied GIS	
<i>Physical Geography</i>		
GEOG 111	Elements Of Meteorology	
GEOG 113	Climate	
GEOG 115	Biogeography	

GEOG 116	Global Climate Change	
GEOG 117	Landforms	
GEOG 161	California's Water Resources	
<i>Regional Geography</i>		
GEOG 121	United States and Canada	
GEOG 125	Geography Of East Asia	
GEOG 128	Geography Of Europe	
GEOG 131	California	
Concentrations (15 Units)		
Select a concentration from the following:		15
Geographic Information Systems and Analysis Concentration		
Human Geography Concentration		
Metropolitan Area Planning Concentration		
Physical Geography Concentration		
Total Units		46

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Concentration in Geographic Information Systems and Analysis (15 units)

Code	Title	Units
GEOG 109	Geographic Information Systems	3
Select four of the following, with at least one each from both groups:		12
<i>Group 1: Data Analysis</i>		
GEOG 107	Remote Sensing	
GEOG 110	Advanced Geographic Information Systems	
GEOG 181	Quantitative Methods in Geography	
<i>Group 2: Data Output</i>		
GEOG 105	Computer Cartography	
GEOG 163	Applied GIS	
GEOG 199	Special Problems	
Total Units		15

It is recommended that students take the following to satisfy their Geographic Techniques core area requirement:

Code	Title	Units
GEOG 193A	Field Geography: Urban-Metropolitan	3
GEOG 193B	Field Geography: Suburban-Rural	3
GEOG 193C	Field Geography: Physical	3

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1 - Oral Communication		3
A2 - Written Communication		3
A3 - Critical Thinking		3
Area B: Physical Universe and Its Life Forms (9 Units)		
B1 - Physical Science ²		0
B2 - Life Forms		3
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²		0
B4 - Math Concepts		3

B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements. 3

Area C: Arts and Humanities (12 Units)

C1 - Arts 3

C2 - Humanities 3

C1/C2 - Area C Course 3

C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements. 3

Area D: The Individual and Society (9 Units)

Area D Course 3

Area D Course 3

Area D Course ² 0

Area D Course - Take upper-division course to complete Area & upper division requirements. 3

Area E: Understanding Personal Development (3 Units)

Area E Course 3

Total Units 42

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (6 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI) ²		0
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Geography (Human Geography)

Units required for Major: 46

Total units required for BA: 120

Program Description

The Bachelor of Arts in Geography with a concentration in Human Geography examines how diverse human cultures and economies interact with natural environments to create distinctive places with unique achievements, challenges, and conflicts. Students acquire cross-cultural perspectives and knowledge relevant to globalization, international development, energy and other natural resource issues, hazards and disasters, migration and demography, and geopolitical situations.

Note:

- Every candidate must complete **all** of the Geography Core and **one** Concentration.
- Courses *cannot* double count for the core and the concentration.
- Students must take at least **FOUR** courses, with at least one each from Data Analysis and Data Output categories.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (10 Units)		
GEOG 1	Physical Geography: The Distribution of Natural Phenomena ¹	3

BA in Geography (Metropolitan Area Planning)

Units required for Major: 46

Total units required for BA: 120

Program Description

The Bachelor of Arts in Geography with a concentration in Metropolitan Area Planning helps students understand how cities have evolved, with an emphasis on spatial patterns and the role of transportation in structuring settlements. The concentration provides students with skills for designing cities that address important issues such as sustainability, affordable housing and transportation, a strong civic life, and public health and safety.

Note:

- Every candidate must complete **all** of the Geography Core and **one** Concentration.
- Courses *cannot* double count for the core and the concentration.
- Students must take at least **FOUR** courses, with at least one each from Data Analysis and Data Output categories.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (10 Units)		
GEOG 1	Physical Geography: The Distribution of Natural Phenomena ¹	3

BA in Geography (Physical Geography)

Units required for Major: 46

Total units required for BA: 120

Program Description

The Bachelor of Arts in Geography with a concentration in Physical Geography focuses on earth systems and human impacts on them, including global climate change. Students interested in natural science and environmental management study weather and climate, plant and animal communities, landforms, and water resources, emphasizing the growing human role in influencing and managing these complex interrelated systems.

Note:

- Every candidate must complete **all** of the Geography Core and **one** Concentration.
- Courses *cannot* double count for the core and the concentration.

- Students must take at least **FOUR** courses, with at least one each from Data Analysis and Data Output categories.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (10 Units)		
GEOG 1	Physical Geography: The Distribution of Natural Phenomena ¹	3

Certificate in Pre-Planning

Units required for Certificate: 15-16

Program Description

The Pre-Planning program consists of 15-16 units in addition to the major and culminates in a certificate. Select *either* the Metropolitan or Resource Planning Concentration below. No more than two courses may be taken in any one department.

Students must have an advisor and will not be allowed to proceed in the program without an advisor's signature. In some cases courses may

be accepted that have already been completed. There can be no double counting from among courses used in the major.

Program Requirements

Metropolitan Planning

Code	Title	Units
Select five of the following:		
ECON 104	Introduction to the United States Economy	15
ECON 120	Economics and Environmental Degradation	
GEOG 109	Geographic Information Systems	
GEOG 145	Population Geography	
GEOG 147	Urban Geography	
GEOG 148	Urban and Regional Planning	
GEOG 149	Transportation Geography	
GEOG 161	California's Water Resources

GEOG 161	California's Water Resources	
GEOL 10	Physical Geology	
HROB 101	The Management of Contemporary Organizations	
POLS 170	Public Policy Development	
POLS 180	California State and Local Government	

Total Units 15-16

Minor in Geographic Information Systems

Units required for Minor: 18

Program Description

Geography students at Sacramento State explore Earth's natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography's approach emphasizes Earth's spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

Program Requirements

Code	Title	Units
Required Courses (18 Units) ¹		
GEOG 3	Introduction to Maps and Geographic Technologies	3
GEOG 109	Geographic Information Systems	3
GEOG 110	Advanced Geographic Information Systems	3
Select three of the following:		9
GEOG 105	Computer Cartography	
GEOG 107	Remote Sensing	
GEOG 163	Applied GIS	
GEOG 181	Quantitative Methods in Geography	
Three units of upper division GIS coursework from another department with permission of the GIS Minor advisor.		
Total Units		18

¹ Courses must be selected in consultation and approved by a faculty advisor in Geography. A minimum of 6 upper division units must be earned in residence.

Minor in Geography

Units required for Minor: 18

Program Description

Geography students at Sacramento State explore Earth's natural and cultural environments using methods from the natural sciences and the social sciences. They study climate, weather, landforms, water resources, and plants and animals, as well as peoples, societies, economies, and cities. These phenomena overlap in intricate ways, giving rise to distinctive places and regions. Geography's approach emphasizes Earth's spatial relationships and patterns, and the processes that govern them, whether found in nature or in human behavior.

Program Requirements

Code	Title	Units
Select two of the following lower division courses: ¹		
GEOG 1	Physical Geography: The Distribution of Natural Phenomena	6
GEOG 2	Cultural Geography	
GEOG 3	Introduction to Maps and Geographic Technologies	
Select a minimum of 9 upper division Geography units, excluding the following: ¹		9
GEOG 193C	Field Geography: Physical	
GEOG 194	Geography - Related Work Experience	
GEOG 198	Co-Curricular Activities	
GEOG 199	Special Problems	
Select three additional units in Geography, either lower division or upper division ¹		3
Total Units		18

¹ Courses must be selected in consultation with and approved by a faculty advisor in Geography. A minimum of 6 upper division units must be earned in residence.

Geology

College of Natural Sciences and Mathematics

Program Description

Geology is the study of the earth, its environments, and its history. It is an interdisciplinary science that combines geological observations and concepts with those of biology, chemistry, physics, and mathematics. Its goals are to study rocks, minerals, fossils, and energy and water resources, and to understand geologic principles and processes that shape the earth and its environments.

The Sacramento State Geology program has three objectives:

1. to encourage students to think scientifically,
2. to provide students with the knowledge base to make progress in geology after leaving Sacramento State, and
3. to teach students basic skills such as using a petrographic microscope and field equipment, how to construct a geologic map, and how to write a technical geologic report.

The BA degree program is designed as a shorter, more flexible preparation for some geology jobs, earth science teaching in high school (see Teaching Credential), and jobs such as park naturalist, environmentalist, geologic planning specialist, or in geology-related businesses. The BA degree can be used in dual-track majors combining geology with biological sciences, chemistry, physics, or engineering.

The BS degree program is designed to be the best possible preparation for advanced work in geology in graduate school or for professional employment as a geologist. The Geology program offers a strong background in the major areas of geology including: mineralogy, petrology, paleontology, stratigraphy, structural geology, field mapping, hydrogeology, and report writing.

Degree Programs

BA in Earth Science (p. 801)

BA in Geology (p. 803)

BS in Geology (p. 804)

Minor in Geology (p. 805)

MS in Geology (p. 805)

Special Features

- Among the greatest attractions for studying geology at Sacramento State is the University's location in a dynamic geologic environment; just 70 miles to the west is the San Francisco Bay Area and the San Andreas fault. About equidistant to the east is the magnificent Sierra Nevada mountain range. The active geology faculty conducts field trips in almost every course in the Geology major, providing excellent opportunities for students to learn field skills and to apply classroom knowledge to field situations.
- A small student/teacher ratio, plus a rigorous course of study, contributes to the excellent reputation of the Sacramento State Geology Department with employers and graduate schools. Contact the Department office for assistance in obtaining a faculty advisor.
- The Geology Department operates the largest on-campus well field in the nation, with twenty engineered wells for teaching and student research. The well field is complemented by a comprehensive

collection of state-of-the-art geophysical and hydrological field equipment.

- The Geology Department shares Placer Hall with the United States Geological Survey (USGS). Students benefit from this unique collaborative enterprise between a university and a federal agency because of the educational, research, and employment opportunities provided by the combined scientific and educational resources of the Geology Department and the USGS.
- Students interested in marine geology may take courses at Moss Landing Marine Laboratories at Moss Landing, CA, 180 miles from the Sacramento State campus. The labs and available courses are described under the Marine Sciences section of this catalog. A program including Moss Landing courses may be formulated with a Geology advisor. Such a program usually requires living in or near Moss Landing for one or more semesters.

Career Possibilities

Geologist · Geophysicist · Groundwater Geologist · Oil and Gas Geologist · Mineralogist · Paleontologist · Marine Geologist · Environmental Geologist · Photogeologist · Seismologist · Consulting Geologist · Soils Engineer · Land Use Planner · Volcanologist · Astrogeologist · Geochemist · Economic Geologist · Mining Geologist · Hydrologist · Government Geologist · Coal Geologist · Glacial Geologist · Vertebrate Paleontologist · Geology Professor · Earth Science Teacher

GEOL 5. Geology Of Mexico. 4 Units
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring

Introduction to Geology through examination of aspects of the geology of Mexico. Emphasizes problem-based approach to learning Geology and the process of scientific investigation. Topics include a wide range of geological concepts including plate tectonic setting of Mexico, living with volcanoes: the Mexican volcanic belt, the Mexico City earthquake, issues of water supply, flooding and atmospheric pollution in Mexico City, the Chicxulub crater and geologic time, ore deposits of Mexico. Lecture three hours; laboratory three hours.

GEOL 5A. Geology of Mexico Field Trip. 2 Units
Prerequisite(s): GEOL 5
Term Typically Offered: Fall, Spring

Focuses on fundamental geologic concepts as seen from real world examples in Mexico that will be visited during several strategic field stops. Field stops will emphasize a problem-based approach to learning geology and the process of scientific investigation. Topics include a wide range of geological concepts including plate tectonic setting of Mexico, living with volcanoes, the Mexico City earthquake, issues of water supply, flooding, climate change and atmospheric pollution in Mexico City, the Chicxulub meteor impact crater, geologic time, ore deposits of Mexico, and natural hazards. Field trip ten days. Field trip(s) may be required.

GEOL 7. Natural Disasters. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Examination of earth materials and earth processes through the study of natural disasters. Topics include earthquakes, volcanoes, landslides, floods, tsunamis, hurricanes, tornadoes and meteorite impacts. Examination of causes, effects and mitigation of natural disasters.

GEOL 8. Earth Science. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

Earth and its neighbors in space. Scientific method and discovery in the study of stars, planets, weather, rivers, glaciers, oceans, rocks, volcanoes, earthquakes, landslides, mountains, drifting continents, the earth in time. **Note:** Students contemplating a geology major or minor in geology should enroll in GEOL 10, not in GEOL 8. No credit for those who have taken GEOL 10 or equivalent.

GEOL 8L. Earth Science Lab. 1 Unit
Prerequisite(s): GEOL 8; may be taken concurrently.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring

Emphasizes scientific methods and systematic laboratory procedures. Includes weather analysis, rock and mineral identification, study of geologic concepts by means of topographic maps, and exercises in astronomy and oceanography. Laboratory three hours.

GEOL 8T. Earth Science Lab for Teachers. 1 Unit
Prerequisite(s): GEOL 8; may be taken concurrently.
Term Typically Offered: Fall, Spring

Exploration of the solid Earth, its atmosphere and oceans, and the Earth's place in the solar system. Emphasizes learning Earth science through investigation, and uses Earth science to understand the processes of science. Laboratory three hours.

GEOL 10. Physical Geology. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Rocks and their mineral constituents, geological processes such as weathering, erosion, glaciation, mountain building, etc., volcanoes, earthquakes, folds, faults, the earth's interior, plate tectonics and earth resources. Field trip. Fee course. Fee course. Field trip(s) may be required.

- GEOL 10L. Physical Geology Lab.** **1 Unit**
Prerequisite(s): GEOL 10; may be taken concurrently.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring
 Laboratory supplement to GEOL 10. Emphasizes scientific method and systematic laboratory procedures. Identification of common minerals and rocks. Introduction to and analysis of topographic and geologic maps. Field trip. Laboratory three hours. Fee course.
 Fee course.
 Field trip(s) may be required.
- GEOL 103. Sedimentology/Stratigraphy.** **4 Units**
Prerequisite(s): GEOL 12, GEOL 12L, and GEOL 100
Term Typically Offered: Spring only
 Compositions, textures, classification, origins and structures of sediments and sedimentary rocks. Hand specimen observation and interpretation. Facies models, classification and correlation of stratigraphic units, subsurface techniques. Lab emphasizes hand specimen and microscope identification and subsurface techniques. Field trip. Lecture three hours; laboratory three hours. Fee course.
 Fee course.
 Field trip(s) may be required.
- GEOL 12. Historical Geology.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
 Origin and geological history of the earth and the evolution of its animal and plant inhabitants. Fee course.
Note: Lecture 3 hours.
 Fee course.
- GEOL 105. Paleontology.** **4 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, GEOL 12 and GEOL 12L.
Term Typically Offered: Spring only
 Biology, evolution, classification and paleoecology of important groups of fossil organisms. Uses of fossils in solving geologic problems.
Note: Lecture = 3 units; Lab = 1 unit. Fee Course. Field Trip.
 Fee course.
 Field trip(s) may be required.
- GEOL 12L. Historical Geology Lab.** **1 Unit**
Prerequisite(s): GEOL 12; and GEOL 5 or GEOL 10 and GEOL 10L. GEOL 12 may be taken concurrently.
Term Typically Offered: Fall, Spring
 Supplements GEOL 12. Use of sedimentary rocks, fossils, geologic maps, and structural sections in interpreting ancient environments, tectonic settings, and geologic history. Age relations and correlation of rock and time-rock units. Introduction to fossil identification and biostratigraphy. Laboratory three hours.
- GEOL 110A. Structural Geology and Tectonics.** **4 Units**
Prerequisite(s): GEOL 111A and GEOL 111B, PHYS 5A or PHYS 11A, MATH 26A or MATH 30.
Term Typically Offered: Fall, Spring
 Description, analysis and interpretation of geologic structures and tectonic settings. Theory of stress and strain as it pertains to the origin of folds, faults, joints, cleavage, and other structural elements. Laboratory includes techniques of structural analysis such as orthographic projections, stereonet, structure contours, Mohr diagrams, interpretation of maps and cross sections. Lecture three hours, laboratory three hours.
 Fee Course.
 Fee course.
- GEOL 100. Mineralogy.** **4 Units**
Prerequisite(s): CHEM 1A; and either GEOL 5 or GEOL 10 and GEOL 10L.
Term Typically Offered: Fall only
 Introduction to mineral identification by physical and optical properties. Techniques and theory of optical mineral analysis, crystallography and mineral formation. Lecture three hours; laboratory three hours.
- GEOL 110B. Structural Geology Field.** **1 Unit**
Prerequisite(s): GEOL 103, GEOL 111A, GEOL 111B, and GEOL 110A. It is recommended that GEOL 110A be taken concurrently.
Term Typically Offered: Fall, Spring
 Field description, mapping and interpretation of geologic structures. Includes techniques of taking detailed field notes, field photography measurement of structures using a pocket transit, geologic map and cross section construction, stereonet analysis, and report writing. Consists of off-campus fieldwork. Fee course.
 Fee course.
- GEOL 102. Igneous and Metamorphic Petrology.** **4 Units**
Prerequisite(s): GEOL 100 and GEOL 103
Term Typically Offered: Fall, Spring
 Study of the origin, evolution, occurrence, geochemistry, dynamics and physical characteristics of igneous and metamorphic systems. The laboratory will focus on both hand-specimen and petrographic-microscope studies. Lecture three hours, laboratory three hours. Fee course.
 Fee course.
- GEOL 111A. Field Geology.** **2 Units**
Prerequisite(s): GEOL 12L and GEOL 100
Corequisite(s): GEOL 111B
Term Typically Offered: Spring only
 Science and art of recognizing, describing and interpreting geologic features in the field. Lecture and laboratory course on the preparation and use of topographic and geologic maps, stratigraphic and cross sections, compass and GPS instrument. Lecture one hour; laboratory three hours.
 Fee course.
 Fee course.

- GEOL 111B. Field Techniques.** **2 Units**
Prerequisite(s): GEOL 100 and GEOL 103. GEOL 103 may be taken concurrently.
Corequisite(s): GEOL 111A
Term Typically Offered: Spring only
- Introduction to geologic field methods including descriptions of rocks, geologic mapping, observation, interpretation and geologic report writing. Detailed mapping techniques will also be covered; these may include the use of plane table, total station theodolite and global position systems. Consists of off-campus fieldwork. Fee course.
 Fee course.
- GEOL 112. Geophysics For Geologists.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, PHYS 5A, PHYS 5B which may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to the principal geophysical concepts and techniques useful to geologists in the study of tectonics, the Earth's interior and resource exploration. Includes the study of seismology, heat flow, gravity, borehole geophysics, electromagnetism and geodynamics. Fee Course/Field Trip. Fee course.
 Field trip(s) may be required.
- GEOL 114. Volcanology.** **3 Units**
Prerequisite(s): GEOL 100; May be taken concurrently.
Term Typically Offered: Fall, Spring
- An advanced exploration of physical volcanic processes, chemistry of magmas, interpretation of volcanic deposits, historic eruptions and volcanic hazard assessment.
Note: Field trip. Weekend field trip to volcanic areas (typically in California). Fee course. Field trip student fee.
- Fee course.
 Field trip(s) may be required.
- GEOL 115. Volcanoes: An Introduction.** **3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- An introductory to volcanoes including volcanic landforms, eruption styles, properties of magma, and volcanic hazards/ mitigation.
- GEOL 120. Surficial Processes.** **4 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L; GEOL 12, GEOL 12L.
Term Typically Offered: Fall, Spring
- Focused study on the basic forces that drive surficial processes such as wind water and gravity and the role of weathering, sediment transport and deposition on landform and landscape development. A laboratory component will enhance student understanding by solving applied problems as well as develop proficiencies with various geologic tools.
Note: 150 minutes Lecture = 3 units, 150 minutes Lab = 1 unit. Fee Course.
 Fee course.
- GEOL 121. Geology of California.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10.
Term Typically Offered: Fall, Spring
- Regional study of California and certain surrounding areas with regard to geologic development, plate tectonics, economic resources and geologic hazards. Lecture and field trip(s). Fee course.
 Fee course.
 Field trip(s) may be required.
- GEOL 123. Geochemistry.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, CHEM 1A.
Term Typically Offered: Fall, Spring
- Fundamentals of the geochemistry of Earth materials. Thermodynamics and kinetics of geological environments, silicates and carbonates, major element geochemistry, trace and rare earth element geochemistry, stable and radiogenic isotopes. Applications to studies of aqueous, pedogenic, igneous, sedimentary, and metamorphic environments. Analysis of geochemical aspects of contemporary resource, environmental, and paleoenvironmental problems.
- GEOL 125. Metallic Ore Deposits.** **3 Units**
Prerequisite(s): GEOL 100, CHEM 1A.
Term Typically Offered: Fall, Spring
- Origin, geology, and distribution of metallic ore deposits. Introduction to ore minerals. Exploration methods. Field trip. Fee course.
 Fee course.
 Field trip(s) may be required.
- GEOL 126. Environmental Field Methods.** **3 Units**
Prerequisite(s): GEOL 10 or GEOL 10L or instructor permission.
 Field analysis of the local environment, including soil and water systems. Students will learn monitoring design, sample collections, sample analysis, data interpretation, and presentation methodologies for environmental geology applications.
- GEOL 127. Hydrogeology.** **4 Units**
Prerequisite(s): CHEM 1A, GEOL 10, GEOL 10L, PHYS 5A, and MATH 26A or MATH 30, or instructor permission.
Term Typically Offered: Spring only
- Presents fundamentals of groundwater flow, as influenced by topography and geology; geological aspects of groundwater supply, contamination, remediation, and protection of hydrogeological regions of the U.S. and their critical groundwater issues. Lecture three hours; laboratory three hours. Lecture three hours.
- GEOL 130. Oceanography.** **3 Units**
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring, Summer
- Survey of geological, physical, chemical and biological oceanography including the sea floor; waves, tides, currents; the physical and chemical properties of seawater and their distribution in the sea; planktonic life and its relation to nutrients.

- GEOL 132. Marine Geology.** **3 Units**
Prerequisite(s): GEOL 10 and GEOL 10L or GEOL 12 and GEOL 12L
Term Typically Offered: Spring only
 Origin, structure and evolution of the ocean basins and their margins. Topics covered will include marine sediments, seafloor bathymetry, seismic stratigraphy, sea level history, and marine micropaleontology. Fee course. Field trip: Weekend trip to Moss Landing, California to collect marine samples. Fee course. Field trip(s) may be required.
- GEOL 140. Geology and the Environment.** **3 Units**
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D
Term Typically Offered: Fall, Spring
 Applies geologic data and principles to situations affecting our environment. The geologic study of earthquakes, volcanoes, floods, landslides, groundwater and similar topics supplies the background data for lectures on land use and other social choices. Topics such as geopolitics and mineral supply provide a basis for understanding international politics, social costs, and world economics. Fee course. Fee course.
- GEOL 150. Computer Mapping in Geology.** **3 Units**
Prerequisite(s): GEOG 109 or instructor permission
Term Typically Offered: Fall, Spring
 This course is designed to enhance the mapping skills of geology majors by providing them an opportunity to learn modern computer aided mapping techniques - methods and tools widely used across industry, government, and academe. The course is designed to teach students how to effectively use various tools and mapping software by applying their developing skills in solving a variety of geological problems. This course strategy will help develop both student technical map making and innovative problem solving skills.
- GEOL 170. Age of Dinosaurs.** **3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
 Applies to the fundamental principles of geology, biology, and ecology to understanding the evolution of the Mesozoic world. Emphasis is placed on the nature and evolution of dinosaurs in the context of global regional changes in the Mesozoic ecosystem. Included are considerations of the data, methods, and uncertainties in paleontology and other historical sciences.
- GEOL 171. Petroleum Geology.** **3 Units**
Prerequisite(s): PHYS 5A & GEOL 103. GEOL 103 may be taken concurrently.
Term Typically Offered: Fall, Spring
 Introduction to the origin, migration, and accumulation of hydrocarbons in the context of stratigraphic and structural systems. Exploration and production of both conventional and unconventional resources. Lecture three hours. Field trip. Fee Course. Fee course. Field trip(s) may be required.
- GEOL 177. Hawaii Volcanic Field Trip.** **2 Units**
Prerequisite(s): Geology 10 or another physical geology course approved by instructor; Field Trip, 2 units. Fee course.
Term Typically Offered: Fall, Spring
 An investigation and visit to the many interesting volcanic features and eruption activities of Hawaiian volcanism. Topics include tectonics, physical volcanology, and volcanic monitoring techniques. Credit/No Credit Fee course.
- GEOL 184. Geological Field Trip.** **2 Units**
Term Typically Offered: Fall only
 10-day field trip to a region of outstanding geology. Attendance at preliminary meetings is required. Analyzes and interpretation of geologic features is emphasized. Fee course.
Note: Student should consult the Geology Department during the semester before planning to take the course. May be taken more than once for credit.
 Credit/No Credit
 Fee course.
 Field trip(s) may be required.
- GEOL 188. Advanced Geologic Mapping.** **6 Units**
Prerequisite(s): GEOL 102, GEOL 103, GEOL 110A, GEOL 110B, GEOL 111A, GEOL 111B and instructor permission.
Term Typically Offered: Fall, Spring
 Advanced principles/methods of geologic mapping, interpretation and geologic report writing for selected field areas in the western United States. Mapping techniques include the use of aerial photographs and global position systems. Consists of on-campus field preparation and off-campus fieldwork. Fee course. Fee course.
- GEOL 190A. Geology and Tectonic Development of California Seminar.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10, GEOL 12; GEOL 110A recommended.
Term Typically Offered: Fall, Spring
 Seminar in the geologic and tectonic development of California.
- GEOL 193C. Engineering Geology.** **3 Units**
Prerequisite(s): GEOL 5 or GEOL 10 and GEOL 10L, GEOL 12, PHYS 5A or PHYS 11A, MATH 29 or high school trigonometry.
Term Typically Offered: Fall, Spring
 Investigates the engineering properties of earth materials, the engineering considerations required to build safe and durable structures on and within the Earth, and problems associated with structures designed and built neglecting physical environmental conditions. Designed to introduce engineering concepts to students who have a competent grasp of general geologic principles and processes. Lecture 3 hours.
- GEOL 195. Geology Internship.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
 Supervised unpaid work experience in government or industry. Supervision is provided by the faculty instructor and responsible officials in the work situations.
Note: Open to all upper division Geology majors with instructor permission. Number of units earned depends on number of hours worked.
 Credit/No Credit

- GEOL 197. Advanced Laboratory Techniques for Geology.** 1 - 3 Units
Prerequisite(s): Appropriate upper division courses and instructor permission.
Term Typically Offered: Fall, Spring
- Supervised individual instruction on techniques applied in geology laboratories for advanced research in mineralogy, petrology, geochemistry, geophysics, and paleontology.
 Credit/No Credit
- GEOL 198A. Senior Research Preparation.** 1 Unit
Prerequisite(s): Senior status and appropriate courses as determined by a Departmental faculty committee. The proposed project must be approved by a Department committee; instructor permission.
Term Typically Offered: Fall, Spring
- Selection and design of an independent research project. A final written report is required and includes: research proposal, bibliography, and results of preliminary review of the literature. Student must choose a supervising instructor.
- GEOL 198B. Senior Research Project.** 2 Units
Prerequisite(s): Senior status and appropriate courses as determined by a Departmental faculty committee. The proposed project must be approved by the Department committee; instructor permission.
Term Typically Offered: Fall, Spring
- Completion of an independent research project. A final written report is required. Progress reports may be required by the supervision instructor. Presentation of an oral report on the research project during the same semester is required.
- GEOL 199A. Beginning Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or special studies at a beginning level, including fieldwork, lab work, library study, or other learning activities.
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available.
- GEOL 199B. Intermediate Special Problems.** 1 - 3 Units
 Individual projects or special studies at an intermediate level, including fieldwork, lab work, library study, or other learning activities.
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available.
- GEOL 199C. Advanced Special Problems.** 1 - 3 Units
 Individual projects or special studies at an advanced level, including fieldwork, lab work, library study, or other learning activities.
Note: Open only to students judged competent to carry on individual work. Credit/noncredit grading also available.
- GEOL 200. Graduate Research Methods Seminar.** ✍ 3 Units
Term Typically Offered: Fall, Spring
- Developing a research proposal, library and internet searches, seeking external funding, presentation graphics, and publication formats. Students will develop a research project in preparation for thesis requirement. Seminar three hours.
Note: Graduate Writing Intensive (GWI).
- GEOL 202. Aqueous Geochemistry.** 3 Units
Prerequisite(s): CHEM 1B; instructor permission.
Term Typically Offered: Fall, Spring
- Low temperature geochemical reactions in aqueous environments. Chemical kinetics, thermodynamics, mixing and dilution, mineral stability, chemical composition of surface water, stable isotopes. Three hours lecture.
- GEOL 204. Contaminant Hydrogeology.** 3 Units
Prerequisite(s): CHEM 1B and CHEM 6B or CHEM 20, GEOL 202.
Term Typically Offered: Fall, Spring
- Contaminants and contaminant transport in near-surface environments. Fluid-sediment interaction, fluid partitioning, common geochemical reactions, stability and mobility of groundwater contaminants, multi-phase systems, sampling considerations and overview of analytical techniques.
- GEOL 208. Groundwater Modeling.** 3 Units
Prerequisite(s): GEOL 127, MATH 45.
Term Typically Offered: Fall, Spring
- Computer modeling of groundwater systems using 2 and 3 dimensional numerical solutions and common software packages. Topics will include data acquisition, constructing a numerical model, model calibration, flow paths, particle tracking and model output.
- GEOL 212. Geologic Remote Imaging.** 3 Units
Prerequisite(s): PHYS 5B or PHYS 11B; GEOL 102, GEOL 110A; and proficiency using a personal computer.
Term Typically Offered: Fall, Spring
- Use of remote imaging in geologic applications. Types of imagery, acquisition, production, processing, and interpretation are covered.
- GEOL 213. Advanced Structural Geology and Tectonics.** 3 Units
Prerequisite(s): GEOL 110A and MATH 30
Term Typically Offered: Fall, Spring
- An advanced treatment of deformation of the lithosphere of the earth over short and long timescales. Construction of 2D and 3D models of the crust. Use of software packages to solve problems in tectonics and related disciplines.
- GEOL 214. Advanced Volcanology.** 3 Units
Term Typically Offered: Fall, Spring
- Analyzes volcanic eruption processes. Interpretation of volcanic deposits in the evaluation of volcanic hazards, risk, eruption processes, and geologic history. Field trip. Field trip(s) may be required.
- GEOL 218. Applied Geophysics.** 3 Units
Prerequisite(s): PHYS 5B or PHYS 11C and GEOL 112.
Term Typically Offered: Fall, Spring
- Advanced field techniques used for geophysical exploration. Data collection and problem solving using resistivity, conductivity, seismic reflection, seismic refraction, gravity, magnetics and borehole geophysical techniques. Lecture two hours, laboratory three hours.

GEOL 220. Surficial Processes.**3 Units****Prerequisite(s):** GEOL 120 or equivalent.**Term Typically Offered:** Fall, Spring

Dynamics of geological processes and the landscapes they carve. System thresholds, linked processes, data generation and evaluation that characterize landscape development.

GEOL 223. Geochemistry.**4 Units****Prerequisite(s):** CHEM 1A, MATH 30, GEOL 100, or instructor permission.**Term Typically Offered:** Fall, Spring

Fundamentals of the geochemistry of Earth materials. Thermodynamics and kinetics of geological environments, silicates and carbonates, major element geochemistry, trace and rare earth element geochemistry, stable and radiogenic isotopes. Applications to studies of aqueous, pedogenic, igneous, sedimentary, and metamorphic environments. Analysis of geochemical aspects of contemporary resource, environmental, and paleoenvironmental problems.

Note: Lecture 3 hours = 3 units; laboratory 170 minutes = 1 unit.**GEOL 227. Advanced Hydrogeology.****3 Units****Prerequisite(s):** GEOL 127, graduate level status in Geology.**Term Typically Offered:** Fall, Spring

Water budgets, theories of groundwater flow to wells, hydrogeologic regimes, fracture flow, dewatering, salt water intrusion, dating and chemical identification of water. Lecture 3 hours.

GEOL 230. Seminar In Geology.**3 Units****Term Typically Offered:** Fall, Spring

Reading, analysis and discussion of the geologic literature on selected topics in geology. Student presentations and reports are required.

Note: May be taken twice for credit.**GEOL 240. Special Topics.****1 - 3 Units****Prerequisite(s):** Will vary with each special topic course.**Term Typically Offered:** Fall, Spring

Advanced special topics in Geology that may include structural geology, volcanology, hydrogeology, engineering geology or other specialized topics selected to meet student demand or respond to industry trends in geology.

GEOL 275. Quantitative and Numerical Research Methods.**3 Units****Prerequisite(s):** MATH 31**Term Typically Offered:** Fall, Spring

Introduction to quantitative and numerical methods of solving geologic problems using high level programming.

GEOL 290. Regional Geology of the Western US.**3 Units****Prerequisite(s):** GEOL 100, GEOL 102, GEOL 103 and GEOL 110A.**Term Typically Offered:** Fall, Spring

Application of advanced geological concepts in tectonics, stratigraphy, sedimentology, petrology, and volcanism to the geologic evolution of the Western United States from Precambrian to present. Field trip. Course Fee.

Field trip(s) may be required.

GEOL 293. Engineering Geology.**3 Units****Prerequisite(s):** GEOL 193C.**Term Typically Offered:** Fall, Spring

Takes a geological approach to evaluating engineering issues associated with building with or on natural earthen materials. Rock and soil mechanics, slope stability, geophysical investigation of rock and soil properties.

Note: 150 minutes Lecture = 3 units.**GEOL 299. Special Problems in Geology.****1 - 4 Units****Prerequisite(s):** Graduate-level status in geology, approval of project by a faculty sponsor and Department Chair; instructor permission.**Term Typically Offered:** Fall, Spring

Graduate research. Independent research in geology that may include library research, short-term original research, technique development, fieldwork, or laboratory research. May include research toward thesis proposal. Culminating experience will be in the form of a written report, oral presentation, or scientific paper.

GEOL 500. Master's Thesis.**6 Units****Prerequisite(s):** Advanced to candidacy and chair permission of his/her thesis committee.**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in the final semester prior to the completion of all requirements for the degree.

GEOL 596. Comprehensive Examination.**0 Units****Term Typically Offered:** Fall, Spring

A written comprehensive examination administered by a committee of three faculty members. Assesses the student's ability to integrate knowledge from core and elective courses, show critical and independent thinking, and demonstrate mastery of the subject matter. Required for the non-thesis option. Graded: CR/NC. May be retaken one time after 4 calendar months. Units: 0.

Credit/No Credit

BA in Earth Science

Units required for Major: 62-64

Total units required for BA: 120

Program Description

The BA degree program is designed as a shorter, more flexible preparation for some geology jobs, earth science teaching in high school (see Subject Matter Program (p. 838)), and jobs such as park naturalist, environmentalist, geologic planning specialist, or in geology-related businesses. The BA degree can be used in dual-track majors combining geology with biological sciences, chemistry, physics, or engineering.

Program Requirements

Code	Title	Units
Required Lower Division Courses (37-38 Units)		
Select one of the following introductory Geology lecture-lab combinations:		4
GEOL 5	Geology Of Mexico ¹	
GEOL 7 & GEOL 8L	Natural Disasters Earth Science Lab ¹	

GEOL 8 & 8L	Earth Science Earth Science Lab ¹	
GEOL 10 & 10L	Physical Geology Physical Geology Lab ¹	
<i>Each of the remaining courses as follows:</i>		
ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	3
ASTR 6	Astronomical Observation Laboratory	1
BIO 1 & BIO 2 or BIO 7	Biodiversity, Evolution and Ecology Cells, Molecules and Genes ¹ Introduction to the Science of Biology	9- 10
CHEM 1A or CHEM 6A	General Chemistry I Introduction to General Chemistry	5
GEOL 12	Historical Geology	3
GEOL 12L	Historical Geology Lab	1
MATH 26A	Calculus I for the Social and Life Sciences ¹	3
PHYS 5A & PHYS 5B	General Physics: Mechanics, Heat, Sound General Physics: Light, Electricity and Magnetism, Modern Physics	8
Required Upper Division Courses (26 Units)		
GEOG 111	Elements Of Meteorology	3
GEOL 103	Sedimentology/Stratigraphy	4
GEOL 111A	Field Geology	2
GEOL 111B	Field Techniques	2
GEOL 130	Oceanography ¹	3
Select 6 units from the following:		6
GEOL 105	Paleontology	
GEOL 110A	Structural Geology and Tectonics	
GEOL 114	Volcanology	
GEOL 120	Surficial Processes	
GEOL 121	Geology of California	
GEOL 140	Geology and the Environment 	
GEOL 184	Geological Field Trip	
Select 6 units not taken previously from the following:		6
ANTH 124	Environmental Archaeology	
ANTH 151	Human Paleontology	
ENGL 120P	Professional Writing 	
GEOG 113	Climate ²	
GEOG 116	Global Climate Change	
GEOG 117	Landforms	
GEOG 161	California's Water Resources	
JOUR 131	Data Journalism	
PHIL 125	Philosophy Of Science	
RPTA 153	Environmental Interpretation	
Select 3-5 other upper-division geology courses with permission of instructor		
Total Units		63-64

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² Indicates courses recommended for students wishing to prepare for CSET Exam for teaching high school science.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms

BS in Geology

Units required for Major: 64

Total units required for BS: 120

Program Description

The BS degree program is designed to be the best possible preparation for advanced work in geology in graduate school or for professional employment as a geologist. The Geology program offers a strong background in the major areas of geology including: mineralogy, petrology, paleontology, stratigraphy, structural geology, field mapping, hydrogeology, and report writing.

Notes: Additional units may be required to meet the Sacramento State foreign language requirement. Attendance at 16 colloquia, verified by faculty signature, is required.

Program Requirements

Minor in Geology

Units required for Minor: 18

Program Description

Geology is the study of the earth, its environments, and its history. It is an interdisciplinary science that combines geological observations and concepts with those of biology, chemistry, physics, and mathematics. Its goals are to study rocks, minerals, fossils, and energy and water resources, and to understand geologic principles and processes that shape the earth and its environments.

Program Requirements

Code	Title	Units
GEOL 10	Physical Geology	3
GEOL 10L	Physical Geology Lab	1
GEOL 12	Historical Geology	3
GEOL 12L	Historical Geology Lab	1
Select 10 units of upper division courses in Geology electives ¹		10
Total Units		18

¹ Students wishing to minor in Geology must contact a Geology advisor before beginning upper division work in Geology.

MS in Geology

Total units required for MS: 30

Program Description

The graduate program in Geology offers coursework, fieldwork experience, and research that will lead to a Master of Science degree in Geology. It allows students who successfully complete the program to upgrade their educational qualifications and advance to doctoral programs or professional positions that require an in-depth knowledge of hydrogeology, environmental geology, and geologic hazards. The University's location in the state capital provides direct access to many local, federal, and state agencies through internship and fieldwork opportunities.

Each student should plan a program according to his/her background, interests and objectives, in consultation with a faculty advisor. Students are required to consult with an advisor prior to admission to the program or initiation of graduate study. For information on how to select an advisor, students should contact the Geology Department Office. Graduate students who want to engage in teaching as professionals can apply for an appointment as a Graduate Teaching Associate. Graduate Teaching Associates have the opportunity to teach one to three lower division laboratory courses per semester and are paid at a rate commensurate with their teaching load.

All work toward the degree must be completed within a seven-year period. The general University requirements for graduate degrees are explained in the "Graduate Studies" section of this Catalog or visit the Geology Department's website (<http://www.csus.edu/geology>).

Admission Requirements

Admission as a classified graduate student in Geology requires:

- a degree in Geology, or 24 units of equivalent upper-division coursework in Geology which must have been passed with a grade of "C-" or better and includes:

Code	Title	Units
GEOL 10	Physical Geology	3
GEOL 10L	Physical Geology Lab	1
GEOL 100	Mineralogy	4
GEOL 102	Igneous and Metamorphic Petrology	4
GEOL 103	Sedimentology/Stratigraphy	4
GEOL 110A	Structural Geology and Tectonics	4
GEOL 111A	Field Geology	2
GEOL 111B	Field Techniques	2
Total Units		24

These core undergraduate courses cannot be used as graduate electives by students who do not hold a degree in Geology or equivalent;

- a minimum 2.75 GPA in all Geology, Chemistry, Math and Physics courses, and a minimum 3.0 GPA in upper division Geology courses;
- three letters of recommendation from persons familiar with your academic record and professional capabilities, sent directly to the Department;
- a brief statement of interest, faculty sponsorship, area of specialty and long-term goals;
- two semesters of inorganic Chemistry with a lab (CHEM 1A and CHEM 1B);
- two semesters of Physics with a lab (PHYS 11A and PHYS 11B or PHYS 5A and PHYS 5B); and
- two semesters of Math (MATH 30 and MATH 31).

Students who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any deficiencies will be noted on a written response to the admission application. You must be admitted to the degree program before graduate level courses will count toward the degree.

Admission Procedures

All prospective classified graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies:

- an online application for admission;
- an application for admission to the Geology Graduate Program; and
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines please visit the Office of Graduate Studies website (<http://www.csus.edu/gradstudies>).

Applications are accepted as long as space for new students exists. A decision regarding admission will be mailed to the applicant upon receipt of all items listed above.

Minimum Units and Grade Requirement for the Degree

Units for the MS: 30

Minimum Cumulative GPA: 3.0

- Students must maintain an overall GPA of 3.0 or better in the Program. This means that students who earn a "C" grade in a course can count it towards advancement to candidacy (and count it towards graduation) as long as the overall cumulative GPA remains

a 3.0 or better. No more than 6 units of "C" grade will be accepted for graduate credit.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA, including at least two courses at the 200-level; Students must maintain an overall GPA of 3.0 or better in the Program. This means that students who earn a "C" grade in a course can count it towards advancement to candidacy (and count it towards graduation) as long as the overall cumulative GPA remains a 3.0 or better. No more than 6 units of "C" grade will be accepted for graduate credit.
- obtained the graduate committee's acceptance of the thesis proposal; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student must fill out the form after planning a degree program in consultation with his/her faculty advisor. After approval by the Geology Department Graduate Committee, the completed form is returned to the Office of Graduate Studies for approval.

Program Requirements

Code	Title	Units
Required Core Courses (9 Units)		9
GEOL 200	Graduate Research Methods Seminar 	3
GEOL 275	Quantitative and Numerical Research Methods	3
GEOL 290	Regional Geology of the Western US	3
Graduate electives (15-21 Units)		
Select 15-21 units of the following: ¹		15
		-
		21
GEOL 202	Aqueous Geochemistry	
GEOL 204	Contaminant Hydrogeology	
GEOL 208	Groundwater Modeling	
GEOL 212	Geologic Remote Imaging	
GEOL 213	Advanced Structural Geology and Tectonics	
GEOL 218	Applied Geophysics	
GEOL 220	Surficial Processes	
GEOL 227	Advanced Hydrogeology	
GEOL 230	Seminar In Geology	
GEOL 240	Special Topics	
GEOL 293	Engineering Geology	
GEOL 299	Special Problems in Geology	
Culminating Requirements (0-6 Units)		
Select one of the following plans:		0 -
		6
Plan A		
GEOL 500	Master's Thesis	
Plan B		

GEOL 596	Comprehensive Examination
Total Units	30-36

¹ Courses taken to meet the graduate core requirement will not count as elective courses. Elective courses (including GEOL 299) will be selected with prior approval of the student's faculty advisor in the area of interest. In addition to 200-level courses, these may also include up to 6 units of approved technical electives (but not the required courses) from the undergraduate curriculum. Not more than 3 units of GEOL 299 may be taken without prior approval of the Graduate Coordinator.

Mathematics and Statistics

College of Natural Sciences and Mathematics

Program Description

In today's highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student's field.

The program consists of sequences of courses that lead to a Bachelor of Arts with a major in Mathematics, with emphasis in Pure Mathematics, Applied Mathematics, Statistics, or a Teacher Preparation Program. A minor in Mathematics or Statistics and a Master of Arts in Mathematics is also offered.

Degree Programs

Minor in Mathematics (p. 818)

Minor in Statistics (p. 819)

BA in Mathematics (p. 813)

Integrated Mathematics Major/Single Subject Credential Program (p. 816)

MA in Mathematics (p. 818)

Special Features

- The study of mathematics at Sacramento State has several strong advantages. The flexibility of the major gives students enough freedom to mold their degree along their particular interest.
- An excellent computer facility gives mathematics students easy access to the campus computer resources.
- Currently there is a demand for majors in mathematics with training in applied mathematics and statistics. Program graduates have had success in finding employment in public and private sectors.
- Since there is presently a need for high school mathematics teachers, some majors pursue a secondary teaching career. Graduate students in mathematics are finding opportunities for public and private employment in jobs requiring more advanced training in mathematics and statistics. Sacramento State Master's Degree graduates now teach at community colleges throughout the state. Upper division majors may check with the mathematics administrative support coordinator on the possibility of applying for paid positions as student assistants.
- Student assistants work from 10-20 hours per week in math-related duties on campus.

Note: Students interested in a major or minor in mathematics should contact the Department secretary for an advising appointment with a mathematics advisor.

Career Possibilities

Mathematics Teacher · Mathematician · Encryption Analyst · Quantitative Analyst · Engineering Analyst · Systems Analyst · Operations Analyst · Actuary · Risk Analyst · Image Scientist · Technical Writer · Statisticians involved in: Surveying/Polling, Biology/Agriculture, Business/Economics, Physical Sciences/Engineering

MATH 1. Mathematical Reasoning. 3 Units

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring, Summer

Recommended for students whose majors do not include a specific mathematics requirement. Objectives are to show some of the essence and quality of mathematics, and to enhance precision in the evaluation and expression of ideas, thereby developing a student's quantitative reasoning skills. Designed to give students an understanding of some of the vocabulary, methods, and reasoning of mathematics with a focus on ideas.

MATH 10. Essentials of Algebra. 3 Units

Prerequisite(s): Any valid score on ALEKS PPL exam

Term Typically Offered: Fall, Spring

Prepares students for courses requiring fundamental algebra skills. Topics include: review of basic algebra; scientific notation, rounding, and percents; factoring; exponents; linear equations and inequalities with applications; quadratic equations with applications; graphing with applications; absolute value equations and inequalities; systems of linear equations and inequalities; and an introduction to exponential and logarithmic expressions.

MATH 12. Algebra for College Students. 4 Units

Prerequisite(s): Score of 41 or higher on ALEKS PPL exam

Term Typically Offered: Fall, Spring

Prepares students for Pre-calculus and other higher math courses requiring intermediate algebra. Topics include: linear equations and inequalities, absolute value equations and inequalities, systems of linear equations, quadratic equations, polynomial expressions and equations, rational expressions and equations, roots and radicals, and exponential & logarithmic properties and equations.

MATH 15H. Honors Mathematical Reasoning. 3 Units

Prerequisite(s): Open only to Honors students.

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring

Introduction to the composition and interpretation of mathematical ideas and to the mathematical reasoning necessary to derive results in a variety of mathematical topics. Emphasis on developing concepts and analyzing results.

MATH 17. An Introduction to Exploration, Conjecture, and Proof in Mathematics. 3 Units

Prerequisite(s): Score of 46 or higher on ALEKS PPL exam or MATH 10

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring

Prepares students for MATH 107A and MATH 107B. Students will explore mathematical patterns and relations, formulate conjectures, and prove their conjectures. Topics from number theory, probability and statistics, and geometry.

MATH 24. Modern Business Mathematics. 3 Units

Prerequisite(s): Score of 51 or higher on ALEKS PPL exam or MATH 10

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring, Summer

Mathematics for business world, including functions, math of finance, linear programming and rates of change. Applications to economics and business will be emphasized throughout.

MATH 24*AP. AP. Meets MATH 24 + AREA B4. 99 Units**MATH 26A. Calculus I for the Social and Life Sciences. 3 Units**

Prerequisite(s): Score of 61 or higher on ALEKS PPL exam or MATH 12

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring, Summer

Limits, differentiation with applications, integration and applications in the Social Sciences and Life Sciences.

MATH 26B. Calculus II for the Social and Life Sciences. 3 Units

Prerequisite(s): MATH 26A or appropriate high school based AP credit.

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring

Continuation of MATH 26A, integration and applications to the Social Sciences and Life Sciences. Multi-variate analysis including partial differentiation and maximization subject to constraints; elementary differential equations; sequences and series. Calculus of the trigonometric functions as time allows.

Note: Not open to students already having credit for MATH 31 or equivalent.

MATH 29. Pre-Calculus Mathematics. 4 Units

Prerequisite(s): Score of 61 or higher on ALEKS PPL exam or MATH 12

General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)

Term Typically Offered: Fall, Spring, Summer

Designed to prepare students for calculus. Topics: trigonometry, points and lines in the Cartesian plane; lines and planes in space; transformation of coordinates; the conics; graphs of algebraic relations; the elementary transcendental functions.

MATH 29A. Pre-Calculus Mathematics A. 2 Units

Prerequisite(s): Score of 61 or higher on ALEKS PPL exam or MATH 12

Term Typically Offered: Fall, Spring, Summer

First semester of a two semester course that is designed to prepare students for calculus. Topics: functions and graphs, polynomial functions, rational functions and applications. Lecture two hours.

MATH 29B. Pre-Calculus Mathematics B. 2 Units

Prerequisite(s): MATH 29A.

Corequisite(s): MATH 29M.

Term Typically Offered: Fall, Spring, Summer

Second semester of a two semester course that is designed to prepare students for calculus. Topics: exponential and logarithmic functions, trigonometric functions, analytic geometry, and applications. Lecture two hours.

<p>MATH 29L. Lab for Pre-Calculus Math A. 1 Unit Corequisite(s): MATH 29B. Term Typically Offered: Fall, Spring</p>	<p>MATH 32. Calculus III. 4 Units Prerequisite(s): MATH 31. Term Typically Offered: Fall, Spring, Summer</p>
<p>Workshop designed to deepen the understanding of pre-calculus developed in MATH 29A. Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory</p>	<p>Continuation of Calculus II. Algebra and calculus of vectors; functions of several variables; partial differentiation; multiple integration; vector analysis.</p>
<p>MATH 29M. Lab for Pre-Calculus Math B. 1 Unit Corequisite(s): MATH 29B. Term Typically Offered: Fall, Spring</p>	<p>MATH 35. Introduction to Linear Algebra. 3 Units Prerequisite(s): MATH 30 or appropriate high school based AP credit. General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4) Term Typically Offered: Fall, Spring</p>
<p>Workshop designed to deepen the understanding of pre-calculus developed in MATH 29B. Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory</p>	<p>Careful development of matrices, systems of equations, determinants, vector spaces, linear transformations, orthogonality, real and complex eigenvalues; \mathbb{R}^3 viewed as a vector space with generalization to \mathbb{R}^n.</p>
<p>MATH 30. Calculus I. 4 Units Prerequisite(s): Score of 76 or higher on ALEKS PPL exam or MATH 29 or MATH 29B General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4) Term Typically Offered: Fall, Spring, Summer</p>	<p>MATH 45. Differential Equations for Science and Engineering. 3 Units Prerequisite(s): MATH 31. Term Typically Offered: Fall, Spring, Summer</p>
<p>Functions and their graphs; limits; the derivative and some of its applications; trigonometric and hyperbolic functions and their inverses; the integral; the fundamental theorem; some applications of the integral.</p>	<p>First order differential equations, second order differential equations with constant coefficients. Laplace transforms, small systems of linear differential equations, numerical methods, introduction to second order differential equations with variable coefficients.</p>
<p>MATH 30L. Laboratory for First Semester Calculus. 1 Unit Corequisite(s): Enrollment in a designated section of MATH 30. Term Typically Offered: Fall, Spring</p>	<p>MATH 99. Special Problems. 1 - 6 Units Term Typically Offered: Fall, Spring</p>
<p>Workshop designed to deepen the understanding of calculus developed in MATH 30. Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory</p>	<p>Individual projects or directed reading. Note: Open only to students who appear competent to carry on individual work; admission requires the approval of the faculty member under whom individual work is to be conducted, and approval of the advisor and the Department Chair.</p>
<p>Credit/No Credit</p>	<p>Credit/No Credit</p>
<p>MATH 31. Calculus II. 4 Units Prerequisite(s): MATH 30 or appropriate high school based AP credit. General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4) Term Typically Offered: Fall, Spring, Summer</p>	<p>MATH 100. Applied Linear Algebra. 3 Units Prerequisite(s): MATH 26B or MATH 31. Term Typically Offered: Fall, Spring</p>
<p>MATH 30 continuation. Methods of integration; improper integrals; analytic geometry; infinite sequences and series.</p>	<p>Linear algebra and its elementary applications. Topics: Matrix algebra; simultaneous linear equations; linear dependence and vector spaces; rank and inverses; determinants; numerical solution of simultaneous linear equations; linear transformations; eigenvalues and eigenvectors; unitary and similarity transformations; quadratic forms. Note: May not be taken for credit toward a mathematics major.</p>
<p>MATH 31L. Laboratory for Second Semester Calculus. 1 Unit Corequisite(s): Enrollment in a designated section of MATH 31. Term Typically Offered: Fall, Spring, Summer</p>	<p>MATH 101. Combinatorics. 3 Units Prerequisite(s): MATH 31 Term Typically Offered: Spring only</p>
<p>Workshop designed to deepen the understanding of calculus developed in MATH 31. Note: May be taken for workload credit toward establishing full-time enrollment status, but is not applicable to the baccalaureate degree. Laboratory</p>	<p>Introduction to the art of counting. The focus will be on actually listing the objects being counted in small cases and using the knowledge gained in working with small cases to build toward general principles. Sum and product principles, models of counting, permutations and combinations, equivalence relations and partitions, inclusion-exclusion principle, recurrence relations, and generating functions.</p>
<p>Credit/No Credit</p>	<p>MATH 102. Number Theory. 3 Units Prerequisite(s): MATH 31. Term Typically Offered: Fall, Spring</p>
	<p>Theory of divisibility; some number theoretical functions; congruencies (linear and quadratic); some Diophantine equations. Simple continued fractions.</p>

<p>MATH 104. Vector Analysis. 3 Units Prerequisite(s): MATH 32. Term Typically Offered: Spring only</p> <p>Vector and scalar fields, integral theorems, orthogonal curvilinear coordinates, vector spaces and linear transformations, applications to physical fields and operators.</p>	<p>MATH 108. Introduction to Formal Mathematics. 3 Units Prerequisite(s): MATH 31, MATH 35. Term Typically Offered: Fall, Spring</p> <p>Logic of mathematical proof, set theory, relations, functions. Examples and applications from set cardinality, algebra, and analysis.</p>
<p>MATH 105A. Advanced Mathematics for Science and Engineering I. 4 Units Prerequisite(s): MATH 32, MATH 45. Term Typically Offered: Fall only</p> <p>Survey of second order linear differential equations, power series and Fourier series solutions, solution of partial differential equations by separation of variables.</p>	<p>MATH 110A. Modern Algebra. 3 Units Prerequisite(s): MATH 108. Term Typically Offered: Fall, Spring</p> <p>First half of a one-year introductory course in algebraic concepts. Topics include: groups, subgroups, properties of groups, permutation groups, factor groups, homomorphism theorems.</p>
<p>MATH 105B. Advanced Mathematics for Science and Engineering II. 4 Units Prerequisite(s): MATH 105A. Term Typically Offered: Spring only</p> <p>Partial differential equations continued, complex function theory and its applications.</p>	<p>MATH 110B. Modern Algebra. 3 Units Prerequisite(s): MATH 110A. Term Typically Offered: Fall, Spring</p> <p>Continuation of MATH 110A. Note: Topics include</p>
<p>MATH 107A. Fundamental Mathematical Concepts. 3 Units Prerequisite(s): MATH 17 and either a score of 46 or higher on ALEKS PPL exam or MATH 10 Term Typically Offered: Fall, Spring</p> <p>First half of a one-year course in the structure of the real number system and its sub-systems and in the basic properties and concepts of geometry. Topics will include: definitions and properties of set theory and their use in the development of the natural and whole number systems, definitions and properties of the arithmetic relations and operations for the natural numbers, whole numbers, integers. Note: May not be taken for credit toward a mathematics major or minor.</p>	<p>MATH 117. Linear Algebra. 3 Units Prerequisite(s): MATH 110A. Term Typically Offered: Fall, Spring</p> <p>Abstract linear spaces and linear transformations; invariant subspaces; canonical forms.</p>
<p>MATH 107B. Fundamental Mathematical Concepts. 3 Units Prerequisite(s): MATH 107A. Term Typically Offered: Fall, Spring</p> <p>Continuation of MATH 107A. Topics will include: rational numbers, real numbers, measurement, Euclidean Geometry. Note: May not be taken for credit toward a mathematics major or minor.</p>	<p>MATH 121. College Geometry. 3 Units Prerequisite(s): MATH 31; MATH 32 or MATH 35. Term Typically Offered: Fall, Spring</p> <p>Study of the axioms and theorems of Euclidean geometry. A comparison of several geometry axiom systems and their theorems, including those of some non-Euclidean and finite geometries.</p>
<p>MATH 107C. Elementary Mathematics and the Learning Process. 3 Units Prerequisite(s): MATH 17, MATH 107A or MATH 107B, and CHDV 30 or CHDV 35. Term Typically Offered: Fall, Spring</p> <p>Students will build on their understanding of material of Math 17, Math 107A/B by deepening their understanding of the concepts taught in these courses. This will be done by examining these concepts in relationship to theories of learning and development. Students will examine mathematical concepts related to K-8 with respect to the treatment of reasoning, communication, and the perspective of cognitive and social constructivism; and throughout the course will consider the question of "What is mathematics?" and "How is mathematics learned?"</p>	<p>MATH 130A. Functions of a Real Variable. 3 Units Prerequisite(s): MATH 32 and MATH 108. Term Typically Offered: Fall, Spring</p> <p>First half of a one-year upper division course in functions of a real variable. The first semester will consist of a rigorous development of the theory of real-valued sequences and continuity and differentiation for functions of one real variable.</p>
	<p>MATH 130B. Functions of a Real Variable. 3 Units Prerequisite(s): MATH 130A. Term Typically Offered: Fall, Spring</p> <p>Continuation of MATH 130A. This semester will be devoted to a rigorous development of the theory of Riemann integration, infinite series, and sequences and series of functions.</p>
	<p>MATH 134. Functions of a Complex Variable and Applications. 3 Units Prerequisite(s): MATH 32. Term Typically Offered: Spring only</p> <p>Complex plane; analytic functions; integration and Cauchy's Theorem; sequences and series; residue calculus; applications to potential theory; Fourier and Laplace transforms.</p>

<p>MATH 150. Introduction to Numerical Analysis. 3 Units Prerequisite(s): MATH 31 Term Typically Offered: Spring only</p> <p>Numerical solutions of algebraic and transcendental equations; interpolation, inverse interpolation, finite differences, cubic splines, and applications; numerical differentiation and integration; direct and iterative numerical solutions of linear systems; discrete and continuous least squares approximation.</p>	<p>MATH 198. Seminar for Mathematics Tutors. 2 Units Prerequisite(s): Students must be working as tutors in a campus-based program. Term Typically Offered: Fall, Spring</p> <p>Supports Sacramento State students who are working in tutorial and related roles in mathematics programs on campus. Focus on questioning as a fundamental strategy for teaching mathematics, on classroom observation, and on communication among mathematics instructors in support of effective teaching and learning. Note: May be repeated up to two times for credit.</p> <p>Credit/No Credit</p>
<p>MATH 161. Mathematical Logic. 3 Units Prerequisite(s): MATH 108. Term Typically Offered: Fall, Spring</p> <p>Advanced study of logic with special application to mathematics.</p>	<p>MATH 199. Special Problems. 1 - 6 Units Term Typically Offered: Fall, Spring</p> <p>Individual projects or directed reading. Open only to those students who appear competent to carry on individual work. Admission to this course requires the approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor and the Department Chair. Credit/No Credit</p>
<p>MATH 162. Set Theory. 3 Units Prerequisite(s): MATH 108. Term Typically Offered: Fall only</p> <p>Axiomatic study of set theory. Topics usually considered include: relations and functions; set theoretical equivalence; finite and infinite sets; cardinal arithmetic; ordinal numbers and transfinite induction; variants of the Axiom of Choice.</p>	<p>MATH 210A. Algebraic Structures. 3 Units Prerequisite(s): MATH 110B. Term Typically Offered: Fall, Spring</p> <p>General algebraic systems and concepts; groups.</p>
<p>MATH 170. Linear Programming. 3 Units Prerequisite(s): MATH 31; MATH 35 or MATH 100. Term Typically Offered: Fall only</p> <p>Theory of linear programming, duality, simplex method, integer programming, applications.</p>	<p>MATH 210B. Algebraic Structures. 3 Units Prerequisite(s): MATH 210A. Term Typically Offered: Fall, Spring</p> <p>Fields; vector spaces; Galois theory.</p>
<p>MATH 190. History Of Mathematics. 3 Units Prerequisite(s): MATH 31 and upper division status in mathematics. Term Typically Offered: Fall, Spring</p> <p>Study of the development of mathematical ideas and techniques and their impact on the general course of the history of western civilization.</p>	<p>MATH 220A. Topology. 3 Units Prerequisite(s): MATH 130B. Term Typically Offered: Fall, Spring</p> <p>Point set topology, continuity, compactness, connectedness.</p>
<p>MATH 193. Capstone Course for the Teaching Credential Candidate. 3 Units Prerequisite(s): Successful completion of at least five of the following: MATH 102, MATH 110A, MATH 110B, MATH 121, MATH 130A, MATH 130B or MATH 190; MATH 110A or MATH 130A may be taken concurrently. Term Typically Offered: Fall, Spring</p> <p>Reviews the major themes presented in the upper division program in Mathematics, and relates the themes to junior high school and high school curriculum. Required for all subject matter students. Note: Not accepted for credit for non-Teaching Credential students.</p>	<p>MATH 220B. Topics In Topology. 3 Units Prerequisite(s): MATH 220A. Term Typically Offered: Fall, Spring</p> <p>Continuation of MATH 220A with topics selected from: General topology/ Foundations, Geometric Topology, Continuum Theory, Homology Theory, Homotopy Theory, Topological Dynamics. Note: May be taken twice with approval of the graduate coordinator.</p>
<p>MATH 196K. Introduction to Differential Geometry. 3 Units Prerequisite(s): MATH 32, and MATH 35 or instructor's permission Term Typically Offered: Spring only</p> <p>Calculus methods are applied to the study of curves and surfaces in three dimensional space. After an introduction to the geometry of curves (curvature, torsion, and Frenet's formulas), the course explores the geometry of surfaces. Some of the geometrical properties of a surface that will be investigated are its first and second fundamental forms, its various curvatures (normal, principal, mean, and Gaussian curvatures), and its geodesic curves.</p>	<p>MATH 230A. Real Analysis. 3 Units Prerequisite(s): MATH 130B. Term Typically Offered: Fall, Spring</p> <p>Metric topology; the theory of the derivative; measure theory.</p>
	<p>MATH 230B. Real Analysis. 3 Units Prerequisite(s): MATH 230A. Term Typically Offered: Fall, Spring</p> <p>Continuation of MATH 230A, with topics selected from: Theory of the integral, including Riemann, Riemann Stieltjes, and Lebesgue integrals. Note: May be taken twice with approval of the graduate coordinator.</p>

- MATH 234A. Complex Analysis.** **3 Units**
Prerequisite(s): MATH 130B; MATH 105B or MATH 134 is recommended.
Term Typically Offered: Fall, Spring
- Complex numbers, complex functions, analytic functions, complex integration, harmonic functions.
- MATH 234B. Topics in Complex Analysis.** **3 Units**
Prerequisite(s): MATH 234A.
Term Typically Offered: Fall, Spring
- Continuation of MATH 234A with topics selected from: Partial Fractions and Infinite Products, Entire Functions, Riemann Zeta Function, Normal Families, Riemann Mapping Theorem, Conformal Mapping of Polygons, Dirichlet Problem, Analytic Continuation.
Note: May be taken twice with approval of the graduate coordinator.
- MATH 241A. Methods of Applied Mathematics.** **3 Units**
Prerequisite(s): MATH 134 recommended.
Term Typically Offered: Fall, Spring
- Topics from: Hilbert Space Theory, Operators on Hilbert Space, Generalized Functions with Applications to Sturm-Liouville Theory and Partial Differential Equations.
Note: May be repeated for credit provided topic is not repeated.
- MATH 241B. Topics in Applied Mathematics.** **3 Units**
Prerequisite(s): MATH 241A.
Term Typically Offered: Fall, Spring
- Continuation of MATH 241A with topics: Calculus of Variations, Functional Analysis, Dynamical Systems, Integral Equations, Sobolev Spaces, Fourier Analysis, Potential Theory, and Optimal Control Theory.
Note: May be taken twice with approval of the graduate coordinator.
- MATH 299. Special Problems.** **1 - 6 Units**
Term Typically Offered: Fall, Spring
- Any properly qualified student who wishes to pursue a problem may do so if the proposed subject is acceptable to the supervising instructor and to the student's advisor.
 Credit/No Credit
- MATH 316. The Psychology of Mathematics Instruction.** **2 Units**
Prerequisite(s): Admission to the Mathematics Blended Program.
Term Typically Offered: Fall only
- A survey course for students in the Blended Program in Mathematics that relates broad areas of educational psychology and theories of learning to instruction in the secondary mathematics classroom. The focus is on practical applications of theories through the design of lesson and unit plans. Students will design learning activities for diverse classes of learners, including English Language Learners, and build and refine assessment plans that include formative assessments. Lecture two hours.
- MATH 371A. Schools and Community A.** **2 Units**
Corequisite(s): Enrollment in EDTE 470A.
Term Typically Offered: Fall, Spring
- The first of a two-part sequence supporting student teachers in the Mathematics Blended Program. Focus is on strategies for secondary mathematics instruction, the process of reflection on teaching, communication among mathematics teachers in support of effective teaching and learning, strategies for engagement, questioning, creating a safe classroom environment, classroom management, assessment, and familiarity with school and community resources. Emphasis on issues related to English Language Learners, special needs students, and intervention strategies. Seminar two hours.
 Credit/No Credit
- MATH 371B. Schools and Community B.** **2 Units**
Corequisite(s): Enrollment in EDTE 470B.
Term Typically Offered: Fall, Spring
- The second of a two-part sequence supporting student teachers in the Mathematics Blended Program. Focus is on strategies for secondary mathematics instruction, the process of reflection on teaching, communication among mathematics teachers in support of effective teaching and learning, strategies for engagement, questioning, creating a safe classroom environment, classroom management, assessment, and familiarity with school and community resources. Emphasis on issues related to English Language Learners, special needs students, and intervention strategies. Seminar two hours.
 Credit/No Credit
- MATH 500. Culminating Experience.** **1 - 3 Units**
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring
- Directed reading programs for master's candidates preparing for written comprehensive examinations.
- STAT 1. Introduction to Statistics.** **3 Units**
Prerequisite(s): MATH 9 or three years of high school mathematics which includes two years of algebra and one year of geometry; completion of ELM requirement and the Intermediate Algebra Diagnostic Test.
General Education Area/Graduation Requirement: Math Concepts & Quantitative Reasoning (B4)
Term Typically Offered: Fall, Spring
- Descriptive statistics, basic concepts of probability and sampling with the aim of introducing fundamental notions and techniques of statistical inference.
- STAT 10A. Introductory Statistics with Developmental Mathematics.** **3 Units**
Term Typically Offered: Fall, Spring
- Prepares students for STAT 10B that requires background in data analysis process, descriptive statistics and the concept of randomness. Topics include: Summarizing the data distribution graphically and numerically; reasoning about bivariate numerical data; linear correlation and regression; linear, quadratic and exponential functions as a way of modeling a correspondence between two variables; reasoning about bivariate categorical data; basic concepts of probability and the law of large numbers; conditional probability; discrete random variables; binomial distribution; and an introduction to continuous random variables. Lecture three hours.

STAT 10B. Introductory Statistics with Developmental Mathematics.**3 Units****Prerequisite(s):** STAT 10A**General Education Area/Graduation Requirement:** Math Concepts & Quantitative Reasoning (B4)**Term Typically Offered:** Spring only

Continuation of STAT 10A. Stat 10B prepares students for research methods applications/ courses in various disciplines. Topics include: Continuous random variables and normal distribution; sampling distributions and the central limit theorem; confidence intervals and tests of hypotheses for means, proportions, difference in means and difference in proportions; and chi-squared tests for categorical data analysis. Lecture three hours.

STAT 50. Introduction to Probability and Statistics.**4 Units****Prerequisite(s):** MATH 26A, MATH 30, or appropriate high school based AP credit.**General Education Area/Graduation Requirement:** Math Concepts & Quantitative Reasoning (B4)**Term Typically Offered:** Fall, Spring, Summer

Sample spaces, combinatorics, and random variables. Density and distribution functions. Expectation, variance, and covariance. The binomial, uniform, poisson, negative binomial, hypergeometric, exponential, gamma, beta, and normal distributions. Sampling distributions, estimation, and hypothesis tests. Students are given periodic writing assignments which encourage them to think through concepts of the course.

STAT 96. Experimental Offerings in Statistics.**1 - 6 Units****Term Typically Offered:** Fall, Spring

When there is a demand from a sufficient number of qualified students, one of the staff will conduct a seminar on some topic in statistics.

STAT 103. Intermediate Statistics.**3 Units****Prerequisite(s):** STAT 50 or instructor consent**Term Typically Offered:** Spring only – even years

Review of hypothesis testing –one sample. Hypothesis testing –two sample, variance. Regression and correlation. Analysis of variance including two-way. Analysis of categorical data. Non-parametric tests, goodness of fit, and tests for randomness.

STAT 115A. Introduction to Probability Theory.**3 Units****Prerequisite(s):** MATH 31 and either STAT 1 or STAT 50**Term Typically Offered:** Fall only

Probability axioms, discrete and continuous random variables, functions of random variables, joint densities, expectation, moment generating functions. Chebyshev's inequality, transformations, weak law of large numbers, central limit theorem.

STAT 115B. Introduction to Mathematical Statistics.**3 Units****Prerequisite(s):** STAT 115A.**Term Typically Offered:** Spring only

Point Estimation, interval estimation, hypothesis testing, the multivariate normal distribution, non-parametric tests.

STAT 128. Statistical Computing.**3 Units****Prerequisite(s):** (STAT 1 or STAT 50) and (MATH 26A or MATH 30) or consent of the instructor.

Computer methods for accessing, transforming, summarizing, graphing and making statistical inferences from data; focus is on command-line statistical software, but menu-driven software may be introduced; application of computer methods to solve problems selected from the areas of modeling, simulation, inference and statistical learning.

STAT 155. Introduction to Techniques of Operations Research.**3 Units****Prerequisite(s):** MATH 31; STAT 50, STAT 103, or STAT 115A; MATH 31 may be taken concurrently.**Term Typically Offered:** Spring only – odd years

Formulation and analysis of mathematical models with emphasis on real systems applications. Introduction to Queueing theory and Markov Processes for application.

STAT 196J. Statistical Computing.**3 Units****Prerequisite(s):** STAT 1 or STAT 50, and MATH 26A or MATH 30**Term Typically Offered:** Fall only

Computer methods for accessing, transforming, summarizing, graphing, and making statistical inferences from data. Both a command-line statistical software package such as R and menu-driven package such as SAS will be used. Students will learn to apply computer methods to solve problems selected from the areas of modeling, simulation, inference and statistical learning. The intent of this course is to provide students with the software skills needed for statistical work in industry or academia.

STAT 199. Special Problems.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on individual work. Admission to this course requires approval of the instructor in addition to the approval of the advisor and the Department Chair.

Credit/No Credit

STAT 215A. Introduction to Mathematical Statistics.**3 Units****Prerequisite(s):** STAT 115A, STAT 115B; MATH 134 is recommended.**Term Typically Offered:** Fall, Spring

Probability measure, conditional probability and independence, random variables, characteristic and moment-generating functions, modes of convergence.

STAT 215B. Topics in Introduction to Mathematical Statistics.**3 Units****Prerequisite(s):** STAT 215A.**Term Typically Offered:** Fall, Spring

Continuation of STAT 215A with topics selected from: Statistical Inference, Estimation Theory, Testing Hypotheses, Linear Models, Nonparametric Methods, Multivariate Analysis, Computer intensive methods in Statistics and Sampling Theory.

Note: May be taken twice with approval of Graduate Coordinator.**STAT 299. Special Problems.****1 - 6 Units****Term Typically Offered:** Fall, Spring

Any properly qualified student who wishes to pursue a problem may do so if the proposed subject is acceptable to the department committee, the supervising instructor and the student's advisor.

BA in Mathematics

Units required for BA: 48-54

Total units required for BA: 120

Program Description

In today's highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student's field.

Placement - Mathematics Courses

Students who have not completed four years of high school mathematics consisting of

- Beginning Algebra (one year)
- Geometry (one year)
- Intermediate Algebra-Trigonometry (one year)
- Analytic Geometry-Mathematical Analysis (one year)

may need to complete part of this preparation at the University. The following diagram, which is based upon course prerequisites and major objectives, may be of assistance in selecting the necessary coursework.

Satisfactory completion of the Entry Level Mathematics (ELM) requirement is a prerequisite to enrollment in any mathematics or statistics course in Area B-4 (Quantitative Reasoning) of General Education. The mathematics and statistics courses listed in Area B-4 are:

Code	Title	Units
MATH 1	Mathematical Reasoning	3
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics	3
MATH 24	Modern Business Mathematics	3
MATH 26A	Calculus I for the Social and Life Sciences	3
MATH 26B	Calculus II for the Social and Life Sciences	3
MATH 29	Pre-Calculus Mathematics	4
MATH 30	Calculus I	4
MATH 31	Calculus II	4
MATH 35	Introduction to Linear Algebra	3
STAT 1	Introduction to Statistics	3
STAT 50	Introduction to Probability and Statistics	4

Students Planning to take any of the following courses must pass a diagnostic test.

Code	Title	Units
MATH 9		
MATH 11		
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics	3
MATH 24	Modern Business Mathematics	3
MATH 26A	Calculus I for the Social and Life Sciences	3
MATH 29	Pre-Calculus Mathematics	4
MATH 29A	Pre-Calculus Mathematics A	2
MATH 30	Calculus I	4
MATH 107A	Fundamental Mathematical Concepts	3
STAT 1	Introduction to Statistics	3

A brochure describing the diagnostic tests and containing sample questions is available in the campus bookstore. The following table gives the course and appropriate diagnostic test.

Those students who want to prepare for the ELM may purchase the Entry Level Mathematics workbook at the Hornet Bookstore (see Placement Tests section of this catalog).

All students planning to take MATH 30, Calculus I, must take the Calculus Readiness test prior to the semester of enrollment in MATH 30.

Prerequisite Requirements

- Prerequisites must be completed with grade "C-" or better.
- Grade "C-" or better required in all courses applied to Mathematics major or to the Mathematics or Statistics minors.
- PHYS 11A and PHYS 11C are recommended for all Mathematics majors.

Program Requirements

Code	Title	Units
Lower Division Core Courses (21 Units)		
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
MATH 35	Introduction to Linear Algebra	3
MATH 45	Differential Equations for Science and Engineering	3
Select one of the following:		3
CSC 10	Introduction to Programming Logic	
CSC 15	Programming Concepts and Methodology I	
CSC 22	Visual Programming in BASIC	
CSC 25	Introduction to C Programming	
Upper Division Core Courses (15 Units)		
MATH 108	Introduction to Formal Mathematics	3
MATH 110A	Modern Algebra	3
MATH 110B	Modern Algebra	3
MATH 130A	Functions of a Real Variable	3
MATH 130B	Functions of a Real Variable	3
Additional Requirements for Specialized Study (12-18 Units)		
Select an emphasis from the following four options:		12
		-
		18
Emphasis in Pure Mathematics		
Emphasis in Applied Mathematics		
Emphasis in Statistics		
Teacher Preparation Program		
Total Units		48-54

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Emphasis in Pure Mathematics

Code	Title	Units
MATH 117	Linear Algebra	3
MATH 134	Functions of a Complex Variable and Applications	3
Select two of the following:		6 -
		11

MATH 101	Combinatorics
MATH 102	Number Theory
MATH 104	Vector Analysis
MATH 105A	Advanced Mathematics for Science and Engineering I
MATH 105B	Advanced Mathematics for Science and Engineering II
MATH 121	College Geometry
MATH 150	Introduction to Numerical Analysis
MATH 161	Mathematical Logic
MATH 162	Set Theory
MATH 170	Linear Programming
MATH 190	History Of Mathematics
STAT 115A	Introduction to Probability Theory ¹
STAT 115B	Introduction to Mathematical Statistics ¹
STAT 155	Introduction to Techniques of Operations Research ¹
<hr/>	
Total Units	12-17

¹ Has an extra prerequisite that is not in the lower or upper division core.

Emphasis in Applied Mathematics

Code	Title	Units
MATH 105A	Advanced Mathematics for Science and Engineering I	4
MATH 105B	Advanced Mathematics for Science and Engineering II	4
Select two of the following:		6
MATH 101	Combinatorics	
MATH 102	Number Theory	
MATH 104	Vector Analysis	
MATH 117	Linear Algebra	
MATH 134	Functions of a Complex Variable and Applications	
MATH 150	Introduction to Numerical Analysis	
MATH 170	Linear Programming	
STAT 115A	Introduction to Probability Theory ¹	
STAT 115B	Introduction to Mathematical Statistics ¹	
STAT 155	Introduction to Techniques of Operations Research ¹	
<hr/>		
Total Units		14

¹ Has an extra prerequisite that is not in the lower or upper division core.

Emphasis in Statistics

Code	Title	Units
STAT 1	Introduction to Statistics	3 - 4
or STAT 50		Introduction to Probability and Statistics
STAT 115A	Introduction to Probability Theory	3
STAT 115B	Introduction to Mathematical Statistics	3
Select two of the following:		6
MATH 101	Combinatorics	
MATH 117	Linear Algebra	

MATH 134	Functions of a Complex Variable and Applications
MATH 150	Introduction to Numerical Analysis
MATH 170	Linear Programming
STAT 155	Introduction to Techniques of Operations Research

Total Units		46

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Integrated Mathematics Major/Single Subject Credential Program

Units required for Major and Credential: 90

Program Description

Teaching credential candidates must complete the Professional Education Program in addition to other requirements for a teaching credential. Consult the Department credential advisor for details. You may also obtain information about the Professional Education Program from the Teacher Preparation and Credentials Office, Eureka Hall 216, (916) 278-6403.

Students in the Integrated Mathematics Major/Single Subject Credential Program (also called the Blended Program in Mathematics) begin their pedagogical studies while they are completing the mathematics courses required for the Bachelor's degree in Mathematics. The mathematics requirements include all of the courses required for the subject matter program in mathematics (see above), and MATH 198. Students who are interested in being admitted to the Blended Program in Mathematics must plan ahead, and must see their advisor as soon as possible.

Note: Due to continuing policy changes, it is important to consult a credential advisor for current details.

Admission Requirements

Admission requirements for the Blended Program include junior class standing with a minimum overall GPA of 2.67, a grade of "C-" or better in MATH 108, passing the Writing Placement for Juniors Exam (WPJ), spending and documenting at least 45 hours observing classes, tutoring, or teaching in a variety of settings in grades 7-12, taking all three sections of the California Basic Education Skills Test (CBEST), and submitting an application packet to the Department of Mathematics and Statistics. A completed application packet includes:

- an application form;
- an essay outlining reasons for entering a career in teaching;
- two letters of recommendation;
- two sets of transcripts from each college or university attended, *other than Sacramento State*; and
- one complete Sacramento State transcript.

The application packet may be submitted during the semester in which the requirements for admission are being completed, so the application may be submitted during the semester in which enrollment in MATH 108 occurs.

Prerequisite/Corequisite Requirements

There are three courses which are prerequisites or corequisites to the Blended Program and students are encouraged to take these courses prior to formal admission:

Code	Title	Units
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
EDUC 100A	Educating Students with Disabilities in Inclusive Settings	2
EDUC 100B	Educating Students with Disabilities in Inclusive Settings Lab	1
HLSC 136	School Health Education	2

Program Requirements

Code	Title	Units
Lower Division Core Courses (21 Units)		
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
MATH 35	Introduction to Linear Algebra	3
MATH 45	Differential Equations for Science and Engineering	3
Select one of the following:		
CSC 10	Introduction to Programming Logic	3
CSC 15	Programming Concepts and Methodology I	3
CSC 22	Visual Programming in BASIC	3
CSC 25	Introduction to C Programming	3
Upper Division Core Courses (15 Units)		
MATH 108	Introduction to Formal Mathematics	3
MATH 110A	Modern Algebra	3
MATH 110B	Modern Algebra	3
MATH 130A	Functions of a Real Variable	3

MATH 130B	Functions of a Real Variable	3
Additional Requirements for Specialized Study (12-18 Units)		
Select an emphasis from the following four options:		12
		-
		18
Emphasis in Pure Mathematics		
Emphasis in Applied Mathematics		
Emphasis in Statistics		
Teacher Preparation Program		
Total Units		48-54

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Emphasis in Teacher Preparation Program

MA in Mathematics

Total units required for MA: 30, including at least 24 units of approved 200-level courses

Program Description

The Department of Mathematics and Statistics offers a Master of Arts degree in Mathematics. The MA program is designed to provide qualified students with an opportunity to increase the breadth and depth of their mathematical knowledge and understanding. Beyond assuring that successful candidates are proficient in the basic areas of mathematics, the program is sufficiently flexible to permit graduates to pursue individual professional and mathematical interests ranging from teaching at the secondary or community college level to a career in the private sector, to preparation for graduate study beyond the master's degree. Graduate courses are usually offered in the late afternoon to accommodate students who work full-time.

Admission Requirements

Admission as a classified graduate student in Mathematics requires:

- an undergraduate major in Mathematics which includes one year each of Modern Algebra and Advanced Calculus or an undergraduate major in a related field together with one year each of Modern Algebra and Advanced Calculus;
- a minimum 2.5 GPA; and
- a minimum 2.5 GPA in the last 60 units attempted and a 3.0 GPA in Mathematics coursework.

Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any such deficiencies will be noted on a written response to the admission application. No credit will be given towards the MA for the following:

Code	Title	Units
MATH 110A	Modern Algebra	3
MATH 110B	Modern Algebra	3
MATH 130A	Functions of a Real Variable	3
MATH 130B	Functions of a Real Variable	3

Admission Procedures

Applications are accepted as long as room for new students exists. However, students are strongly urged to apply by the posted university application deadline for the fall or spring terms, in order to allow time for admission before registration. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission; and
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

Admission decisions are made approximately six to eight weeks after the application deadline date. Applicants will be notified of an admission decision via e-mail.

Minimum Unit and Grade Requirement for the Degree

Units required for the MA: 30 (including at least 24 units of approved 200-level courses).

Minimum Cumulative GPA: 3.0

Note: A foreign language is not required for the MA degree. However, students who plan further graduate study are encouraged to take coursework in French, German, or Russian since proficiency in two of these languages is usually required in doctoral programs.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 18 units in the graduate program with a minimum 3.0 GPA, including at least 12 units at the 200 level; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Mathematics advisor. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

Code	Title	Units
Required Courses (27 Units)		
MATH 210A	Algebraic Structures ¹	3
MATH 210B	Algebraic Structures ¹	3
MATH 230A	Real Analysis ¹	3
MATH 230B	Real Analysis ¹	3
Select four from the following:		12
MATH 220A	Topology	
MATH 220B	Topics In Topology	
MATH 234A	Complex Analysis	
MATH 234B	Topics in Complex Analysis	
MATH 241A	Methods of Applied Mathematics	
MATH 241B	Topics in Applied Mathematics	
STAT 215A	Introduction to Mathematical Statistics	
STAT 215B	Topics in Introduction to Mathematical Statistics	
Select one of the following with advisor approval:		3
MATH 299	Special Problems	
Electives in mathematics and related disciplines		
Culminating Requirement (3 Units)		
Written Comprehensive Examination		3
Total Units		30

¹ Courses must be completed with grade "B-" or better.

Minor in Mathematics

Units required for Minor: 20-23

Program Description

In today's highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student's field.

All units must be taken in Mathematics or Statistics. A minimum of 8 upper division units is required. At least 6 upper division units must be taken at Sacramento State.

Placement - Mathematics Courses

Students who have not completed four years of high school mathematics consisting of

- Beginning Algebra (one year)
- Geometry (one year)
- Intermediate Algebra-Trigonometry (one year)
- Analytic Geometry-Mathematical Analysis (one year)

may need to complete part of this preparation at the University. The following diagram, which is based upon course prerequisites and major objectives, may be of assistance in selecting the necessary coursework.

Satisfactory completion of the Entry Level Mathematics (ELM) requirement is a prerequisite to enrollment in any mathematics or statistics course in Area B-4 (Quantitative Reasoning) of General Education. The mathematics and statistics courses listed in Area B-4 are:

Code	Title	Units
MATH 1	Mathematical Reasoning	3
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics	3
MATH 24	Modern Business Mathematics	3
MATH 26A	Calculus I for the Social and Life Sciences	3
MATH 26B	Calculus II for the Social and Life Sciences	3
MATH 29	Pre-Calculus Mathematics	4
MATH 30	Calculus I	4
MATH 31	Calculus II	4
MATH 35	Introduction to Linear Algebra	3
STAT 1	Introduction to Statistics	3
STAT 50	Introduction to Probability and Statistics	4

Students Planning to take any of the following courses must pass a diagnostic test.

Code	Title	Units
MATH 9		
MATH 11		
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics	3
MATH 24	Modern Business Mathematics	3
MATH 26A	Calculus I for the Social and Life Sciences	3
MATH 29	Pre-Calculus Mathematics	4
MATH 29A	Pre-Calculus Mathematics A	2
MATH 30	Calculus I	4

MATH 107A	Fundamental Mathematical Concepts	3
STAT 1	Introduction to Statistics	3

A brochure describing the diagnostic tests and containing sample questions is available in the campus bookstore. The following table gives the course and appropriate diagnostic test.

Those students who want to prepare for the ELM may purchase the Entry Level Mathematics workbook at the Hornet Bookstore (see Placement Tests section of this catalog).

All students planning to take MATH 30, Calculus I, must take the Calculus Readiness test prior to the semester of enrollment in MATH 30.

Prerequisite Requirements

- Prerequisites must be completed with grade "C-" or better.
- Grade "C-" or better required in all courses applied to Mathematics major or to the Mathematics or Statistics minors.
- PHYS 11A and PHYS 11C are recommended for all Mathematics majors.

Program Requirements

Select **one** of the **two** following options.

Code	Title	Units
Option 1 (20-21 Units)		
MATH 30	Calculus I	4
MATH 31	Calculus II	4
Select one of the following:		3 -
		4
MATH 32	Calculus III	
MATH 35	Introduction to Linear Algebra	
STAT 50	Introduction to Probability and Statistics	
Select 9 units of upper division Mathematics and/or Statistics courses selected with approval of a Mathematics advisor		9
Total Units		20-21

Code	Title	Units
Option 2 (23 Units)		
MATH 30	Calculus I	4
MATH 31	Calculus II	4
MATH 32	Calculus III	4
MATH 45	Differential Equations for Science and Engineering	3
MATH 105A	Advanced Mathematics for Science and Engineering I	4
MATH 105B	Advanced Mathematics for Science and Engineering II	4
Total Units		23

Minor in Statistics

Units required for Minor: 21

Program Description

In today's highly technological society, the study of Mathematics takes on an increasingly important role. The Sacramento State Mathematics

Department designs its courses with the goal of providing students with the mathematical concepts appropriate to the student's field.

All units must be taken in Mathematics or Statistics. A minimum of 6 upper division units is required. At least 6 upper division units must be taken at Sacramento State.

Placement - Mathematics Courses

Students who have not completed four years of high school mathematics consisting of

Physics and Astronomy

College of Natural Sciences and Mathematics

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The Department of Physics and Astronomy at Sacramento State offers four degree programs: the BS in Physics, a BS in Physics with a concentration in Applied Physics, the BA in Physics, and the BA in Physics, Physics Teacher Concentration. The Department also offers Minor programs in Physics and Astronomy and Certificates in Scientific Instrument Development and Scientific Computing and Simulation. The BS degrees are recommended for students seeking a career in the technology sector or planning to pursue a graduate degree. The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Approximately 40 percent of the graduating physics majors from Sacramento State continue on to graduate school earning advanced degrees in Physics, Mathematics, Engineering, Environmental Science, Medicine, or Business. Another 50 percent find job opportunities in

industrial and government laboratories or agencies. The remaining 10 percent obtain their teaching credential.

Degree Programs

Astronomy (p. 821)

Physics (p. 823)

Special Features

- In addition to providing a broad academic background and facility in analytic thinking, the study of physics fosters and emphasizes independent study experiences. Most physics students at Sacramento State typically spend a year working on a Senior Project, often in conjunction with a faculty member. These independent projects not only provide a vehicle for applying material learned in class and give students experience in electronics, measurement systems, computers, and machine shop work, but also teach students to work and think on their own. Faculty in the Department have been active in research in atomic physics, astrophysics, biophysics, condensed matter physics, high energy physics, instrumentation, liquid crystals, low temperature physics, optics, and physics education research.
- An advising system has been established by the Department of Physics and Astronomy to help students plan their schedules each semester, to discuss independent project possibilities, and to provide career and current job information. Because of the large number of sequential courses in the degree programs, the Department requires that each student contact his/her advisor before registering for classes each semester. Any student without an advisor should contact Professor William DeGraffenreid in Sequoia Hall 230, or call (916) 278-6518.

Career Possibilities

A degree in physics will prepare you for a wide range of careers. The advanced problem solving, technical, and communication skills one develops alongside the physics knowledge in our degrees are highly valued by many industries. Recent graduates from our programs have an extremely diverse range of careers including: faculty members at colleges and universities, employees at National and State Laboratories and Agencies, teachers at middle and high school, engineers, scientific technicians, analysts, technical writers, computer programmers, and science policy.

Astronomy

College of Natural Sciences and Mathematics

Program Description

Astronomy has played an important role in the development of modern science. Recent advances in technology and space exploration have made possible many remarkable new discoveries in astronomy. For both these reasons, the study of astronomy is an excellent way for the liberal arts student to gain an appreciation of scientific knowledge and methods, and is especially recommended for students who are preparing for a teaching career. The minor in astronomy, in combination with a major in a physical science, can help prepare students for graduate study in astronomy or astrophysics, or for a career in this field. More information about these possibilities is available from advisors in the Department of Physics and Astronomy.

Degree Program

Minor in Astronomy (p. 822)

Special Features

- Observation sessions are held in our facility on the roof of Amador Hall with a 14-inch Schmidt-Cassegrain instrument.
- Portable 10-inch Schmidt-Cassegrain telescopes, a solar telescope and a radio telescope are also available for use in courses and student projects
- A modern computing facility is used for digital image analysis and data reduction, providing access to all major astronomical analysis software.
- Occasional off-campus sessions make use of observatory and planetarium facilities at neighboring institutions.

ASTR 4A. Introduction to the Solar System. 3 Units

Prerequisite(s): One year of high school geometry or instructor permission.

General Education Area/Graduation Requirement: Physical Science (B1)

Term Typically Offered: Spring only

Description and explanations of astronomical phenomena and measurements related to the Solar System and exoplanets. Structure and evolution of planetary systems. Formation of solar systems and planets. Occasional observation periods.

ASTR 4B. Introduction to Stars, Galaxies, and Cosmology. 3 Units

Prerequisite(s): One year high school geometry or instructor permission.

General Education Area/Graduation Requirement: Physical Science (B1)

Term Typically Offered: Fall, Spring

Description and explanations of astronomical phenomena related to stars, galaxies, and cosmology. Structure and evolution of stellar and galactic systems. Occasional observation periods.

ASTR 4C. Introduction to Astrobiology. 3 Units

Prerequisite(s): One year high school geometry or instructor permission.

General Education Area/Graduation Requirement: Physical Science (B1)

Term Typically Offered: Fall only

Nature and history of scientific inquiry into life outside the Earth. Definitions of life. Habitability of planets and moons in our Solar System and of extrasolar planets. Likelihood of intelligent life outside Earth and rationale for the Search for Extra-Terrestrial Intelligence.

ASTR 6. Astronomical Observation Laboratory. 1 Unit

Prerequisite(s): ASTR 4A, ASTR 4B, or ASTR 4C with C- or better; may be taken concurrently.

General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)

Term Typically Offered: Fall, Spring, Summer

Study and use of various telescopes; field observation of planets, stars, meteors, asteroids, the moon and sun; laboratory activities relevant to astronomy. Lab three hours.

ASTR 131. The Solar System and Space Exploration. 3 Units

Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall only

Planets and satellites, including their composition, structure, and atmospheres, with emphasis on modern techniques and observations. Solar surface phenomena and their influence on planets through the solar wind. Comets, meteorites, and their implications for the origin and evolution of planets. Physical effects governing feasible forms of space exploration and colonization.

Note: This course is approved as a Writing Intensive course.

ASTR 132. Stars, Galaxies and Cosmology. 3 Units

Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Spring only

Types and evolution of stars; structure and evolution of galaxies; overall structure of the universe; current developments in astronomy.

Note: This course is approved as a Writing Intensive course.

ASTR 150. Dark Matter and Dark Energy. 3 Units

Prerequisite(s): PHYS 106

Corequisite(s): PHYS 110

Term Typically Offered: Spring only – odd years

Introduction to historical, observational and theoretical principles of dark matter and dark energy in the Universe. Topics will include dark matter in galaxies (rotation curves, stellar motions), dark matter in clusters (virial theorem, x-ray observations), MACHOs and WIMPs as dark matter candidates, as well as the discovery of dark energy through supernovae observations, and additional probes of dark energy. Dark matter and dark energy will be discussed in the cosmological context of the Big Bang theory.

ASTR 199. Special Problems. 1 - 2 Units

Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students competent to assume individual work on approval of the instructor. Up to 2 units may be taken for a grade.

Credit/No Credit

Units required for Minor: 18

Program Description

Astronomy has played an important role in the development of modern science. Recent advances in technology and space exploration have made possible many remarkable new discoveries in astronomy. For both these reasons, the study of astronomy is an excellent way for the liberal arts student to gain an appreciation of scientific knowledge and methods, and is especially recommended for students who are preparing for a teaching career.

The minor in astronomy, in combination with a major in a physical science, can help prepare students for graduate study in astronomy or astrophysics, or for a career in this field. More information about these possibilities is available from advisors in the Department of Physics and Astronomy.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
Select one of the following:		
ASTR 4A	Introduction to the Solar System	3

ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
ASTR 4C	Introduction to Astrobiology	
ASTR 6	Astronomical Observation Laboratory	1
ASTR 131	The Solar System and Space Exploration 	3
ASTR 132	Stars, Galaxies and Cosmology 	3
ASTR 199	Special Problems ¹	2
Elective Courses (6 Units)		
Select two of the following:		6
CHEM 142	Introduction to Physical Chemistry	
CSC 25	Introduction to C Programming	
GEOG 107	Remote Sensing	
GEOG 113	Climate	
GEOG 116	Global Climate Change	
GEOL 114	Volcanology	
PHIL 125	Philosophy Of Science	
PHSC/HIST 107	History of the Physical Sciences	
PHYS 136	Electrodynamics of Waves, Radiation, and Materials	
PHYS 145	Optics	
PHYS 162	Scientific Computing: Basic Methods	
STAT 50	Introduction to Probability and Statistics	
STAT 115A	Introduction to Probability Theory	
Total Units		18

¹ Substitutions of up to 4 units of Physics and Physical Science courses are possible; consult a Department of Physics and Astronomy advisor.

Physics

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

Approximately 40 percent of the graduating physics majors from Sacramento State continue on to graduate school earning advanced degrees in Physics, Mathematics, Engineering, Environmental Science, Medicine, or Business. Another 50 percent find job opportunities in industrial and government laboratories or agencies. The remaining 10 percent obtain their teaching credential.

Degree Programs

BA in Physics (p. 827)

BA in Physics (Teacher Preparation) (p. 829)

BS in Physics (p. 831)

BS in Physics (Applied Physics) (p. 832)

Minor in Physics (p. 835)

Certificate in Scientific Computing and Simulation (p. 834)

Certificate in Scientific Instrument Development (p. 834)

Special Features

- In addition to providing a broad academic background and facility in analytic thinking, the study of physics fosters and emphasizes independent study experiences. Most physics students at Sacramento State typically spend a year working on a Senior Project, often in conjunction with a faculty member. These independent projects not only provide a vehicle for applying material learned in class and give students experience in electronics, measurement systems, computers, and machine shop work, but also teach students to work and think on their own. Faculty in the Department have been active in research in atomic physics, astrophysics, biophysics, condensed matter physics, high energy physics, instrumentation, liquid crystals, low temperature physics, optics, and physics education research.
- An advising system has been established by the Department of Physics and Astronomy to help students plan their schedules each semester, to discuss independent project possibilities, and to provide career and current job information. Because of the large number of sequential courses in the degree programs, the Department requires that each student contact his/her advisor before registering for classes each semester. Any student without an advisor should contact Professor William DeGraffenreid in Sequoia Hall 230, or call (916) 278-6518.

Career Possibilities

A degree in physics will prepare you for a wide range of careers. The advanced problem solving, technical, and communication skills one develops alongside the physics knowledge in our degrees are highly valued by many industries. Recent graduates from our programs have an extremely diverse range of careers including: faculty members at colleges and universities, employees at National and State Laboratories and Agencies, teachers at middle and high school, engineers, scientific technicians, analysts, technical writers, computer programmers, and science policy.

TAYLOR, CHRISTOPHER L.

PHYS 1. Physical Reasoning and Calculation. 2 Units
Term Typically Offered: Fall, Spring

Introduction to the analytical skills needed for the study of Physics. The focus is to prepare students to take PHYS 11A, however, PHYS 1 is also suitable as preparation for PHYS 5A. Emphasis is on reasoning and problem-solving, including conceptualization, visualization, and interpretation of written descriptions of physical situations, and on the connection of physical laws to the mathematical techniques used in their solution.

PHYS 2. Topics in Elementary Physics. 4 Units
Prerequisite(s): A recent one year course in high school algebra and one year of plane geometry or a college course in algebra (MATH 9).
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

One semester introductory physics course including a laboratory. Covers the fundamental concepts of physics with an emphasis on everyday life situations and applications. The range of material includes mechanics, waves, electricity and optics. One hour lecture, two hour discussion, and a three hour laboratory session.

PHYS 5A. General Physics: Mechanics, Heat, Sound. 4 Units
Prerequisite(s): Recently completed three years of high school algebra and geometry; and a college course in algebra and trigonometry (MATH 9 recommended) for those having an inadequate mathematics background.
General Education Area/Graduation Requirement: Laboratory (B3), Physical Science (B1)
Term Typically Offered: Fall, Spring, Summer

PHYS 5A-B sequence is a two-semester course in introductory physics in which fundamental concepts are emphasized including some physiological applications. Lecture two hours; discussion one hour; laboratory three hours.

PHYS 5B. General Physics: Light, Electricity and Magnetism, Modern Physics. 4 Units
Prerequisite(s): PHYS 5A or instructor permission.
Term Typically Offered: Fall, Spring, Summer

Lecture two hours; discussion one hour; laboratory three hours.

PHYS 10. Physics In Our World. 3 Units
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Introductory course designed for non-science students completing general education requirements. Students will be introduced to basic concepts in Physics through the study of astronomy, atomic nature of matter, electromagnetic waves, energy, sound and earthquake waves, current electricity, magnetism, and nuclear processes. Development of reasoning and quantitative skills and applying them to scientific and technological topics of current importance will be emphasized.

PHYS 10L. Physics in Our World Laboratory. 1 Unit
Prerequisite(s): PHYS 10; may be taken concurrently.
Term Typically Offered: Fall, Spring

Laboratory course complements PHYS 10 and satisfies the general education science lab requirement. Emphasis is placed on the nature of scientific observation and measurement and their relationship to general physical concepts. Students will be given a concrete, hands-on sense of observing and interpreting data from a variety of experimental environments.

PHYS 11A. General Physics: Mechanics. 4 Units
Prerequisite(s): MATH 30, MATH 31; or equivalent certificated high school courses. MATH 31 may be taken concurrently.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring, Summer

PHYS 11 A, B, and C is a three semester course in introductory physics requiring elementary calculus. This course satisfies the lower division physics requirement for a major in physics, chemistry, geology, or engineering. PHYS 11A covers the basics of classical mechanics, including kinematics, Newton's laws, conservation laws and rotational dynamics. Lecture two hours; discussion one hour; laboratory three hours.

PHYS 11B. General Physics: Heat, Light, Sound, Modern Physics. 4 Units
Prerequisite(s): PHYS 11C.
Term Typically Offered: Fall, Spring

PHYS 11 A, B, and C is a three semester course in introductory physics requiring elementary calculus. This course satisfies the lower division physics requirement for a major in physics, chemistry, geology, or engineering. PHYS 11B covers the basics of thermodynamics, light propagation, sound, and an introduction to modern physics. Lecture two hours; discussion one hour; laboratory three hours.

PHYS 11C. General Physics: Electricity and Magnetism. 4 Units
Prerequisite(s): MATH 31, PHYS 11A.
Term Typically Offered: Fall, Spring, Summer

PHYS 11 A, B, and C is a three semester course in introductory physics requiring elementary calculus. This course satisfies the lower division physics requirement for a major in physics, chemistry, geology, or engineering. PHYS 11C covers the basics of electricity and magnetism. Lecture two hours; discussion one hour; laboratory three hours.

- PHYS 30. Science and Pseudoscience. 3 Units**
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring
- Examination of the methodology of science. Comparison of legitimate investigations with others that do not meet high scientific standards, including both science poorly done and nonsense posing as science. Examples will be drawn primarily from the physical sciences. Analyzes will require study of basic skills of reasoning, types of logical argument, structure and validity of arguments, common reasoning fallacies, critical evaluation of evidence, and understanding of the scientific thinking process.
- PHYS 99. Special Problems. 1 - 3 Units**
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open only to students who appear competent to assume individual work on the approval of the instructor. For students with lower division status. Up to 4 units may be taken for grade.
- Credit/No Credit
- PHYS 105. Mathematical Methods in Physics. 3 Units**
Prerequisite(s): MATH 32; PHYS 11A, PHYS 11B, PHYS 11C or PHYS 5A, PHYS 5B.
Term Typically Offered: Spring only
- Linear algebra and linear vector spaces, linear transformations and eigenvectors, differential and integral vector calculus, with applications to physical problems.
- PHYS 106. Introduction to Modern Physics. 3 Units**
Prerequisite(s): MATH 31; PHYS 11A, PHYS 11B, PHYS 11C or PHYS 5A, PHYS 5B.
Term Typically Offered: Fall, Spring
- Basic concepts of special relativity and quantum theory of matter. Phenomenological study of atomic and molecular energy states and spectra. Elements of solid-state and nuclear physics.
- PHYS 107. Conceptual Physics and Scientific Inquiry. 4 Units**
Prerequisite(s): BIO 7, CHEM 106, GEOL 8, MATH 17.
Corequisite(s): CHEM 106
Term Typically Offered: Fall, Spring
- Concepts include matter, waves and energy, force and motion, electricity and magnetism, and scientific inquiry. Emphasizes hands on cooperative learning engaging students in scientific inquiry by posing testable scientific questions, conducting experiments, and analyzing and presenting findings to their peers. Appropriate for Liberal Studies and Blended Multiple Subject Credential students. Weekly activity and discussion sessions.
- PHYS 110. Classical Mechanics. 3 Units**
Prerequisite(s): MATH 45, PHYS 11C, PHYS 105.
Term Typically Offered: Spring only
- Fundamental principles of statics and dynamics, including Newton's equations and conservation laws, damped and forced oscillations, central force motion, accelerated coordinate systems, coupled oscillations, normal modes, Lagrangian and Hamiltonian methods, introduction to nonlinear systems and chaos theory.
- PHYS 115. Electronics and Instrumentation. 4 Units**
Prerequisite(s): PHYS 11C or PHYS 5B with instructor permission.
Term Typically Offered: Fall only
- Linear and non-linear circuits, operational amplifiers, transducers, basics of digital circuitry, and an introduction to computerized data acquisition. Lecture two hours; laboratory six hours.
- PHYS 116. Advanced Electronics and Instrumentation. 3 Units**
Prerequisite(s): PHYS 115.
Term Typically Offered: Spring only – even years
- Noise reduction techniques, signal recovery, frequency analysis, computerized instrument control, and instrument development. Lecture one hour; laboratory six hours.
- PHYS 124. Thermodynamics and Statistical Mechanics. 3 Units**
Prerequisite(s): MATH 45, PHYS 11A, PHYS 11B, PHYS 11C.
Term Typically Offered: Spring only
- Basic concepts and laws of thermodynamics and thermal properties of matter; kinetic theory of gases; use of distribution functions and ensembles in statistical mechanics; connection of probability and entropy; quantum statistics; applications to various systems.
- PHYS 130. Acoustics. 3 Units**
Prerequisite(s): MATH 45, PHYS 11A, PHYS 11B, PHYS 11C.
Term Typically Offered: Fall, Spring
- Theoretical and experimental study of sound sources, sound waves and sound measurement. Basic properties of waves in continuous media; spectral analysis of vibrations; use of acoustic impedance and circuit analogies; applications to environmental noise analysis, room acoustics, and loudspeaker and microphone design and use; experience with acoustic instrumentation. Lecture two hours; laboratory three hours.
- PHYS 135. Electricity And Magnetism. 3 Units**
Prerequisite(s): MATH 45, PHYS 11C, PHYS 105.
Term Typically Offered: Fall, Spring
- Development of electromagnetic theory from basic experimental laws; electrostatics, electric currents, magnetostatics, electric and magnetic properties of matter, induction, Maxwell's equations, conservation laws, introduction to electromagnetic waves.
- PHYS 136. Electrodynamics of Waves, Radiation, and Materials. 3 Units**
Prerequisite(s): PHYS 135.
Term Typically Offered: Fall only
- Electromagnetic waves, wave propagation in material media, reflection and refraction, polarization, cavities and waveguides, optical fibers, simple radiating systems, radiation from an accelerated charge and special relativity. Introduction to plasma physics and electromagnetic properties of superconductors.
- PHYS 142. Applied Solid State Physics. 3 Units**
Prerequisite(s): MATH 45, PHYS 106.
Term Typically Offered: Fall, Spring
- Elementary treatment of crystal structure and lattice and electron dynamics. Physics of semiconductor junctions, diodes, transistors and MOSFETS, solar cells, lasers, electro-optic and acousto-optic devices. Introduction to basic physical properties such as electrical conduction of selected amorphous solids and their applications. Laboratory experience.

- PHYS 145. Optics.** **3 Units**
Prerequisite(s): MATH 45, PHYS 11A, PHYS 11B, PHYS 11C.
Term Typically Offered: Spring only – even years
- Theoretical and experimental treatment of wave optics; interference, diffraction, absorption, scattering, dispersion, polarization. Selected topics from contemporary optics: Fourier optics, coherence theory, lasers, holography. Lecture two hours; laboratory three hours.
- PHYS 150. Quantum Mechanics.** **3 Units**
Prerequisite(s): MATH 45, PHYS 106, PHYS 110.
Term Typically Offered: Fall, Spring
- Foundations of wave mechanics, including wave packets, superposition, and the uncertainty principle. The Schrodinger equation and its relation to operators and eigenstates. Symmetric systems and conserved quantities. Introduction to matrix mechanics, spin, scattering, and perturbation theory.
- PHYS 151. Advanced Modern Physics.** **3 Units**
Prerequisite(s): PHYS 150.
Term Typically Offered: Fall, Spring
- Structure of matter including basic elements of atomics, molecular, solid state, nuclear and particle physics. Topics will also include photon and electron gases, lasers, superconductivity, Bose-Einstein condensation and superfluidity.
- PHYS 156. Classical and Statistical Mechanics.** **3 Units**
Prerequisite(s): PHYS 110, PHYS 124.
Term Typically Offered: Fall only
- Review of classical mechanics, Lagrangian and Hamiltonian formulations, rigid body motion, small vibrations and normal modes, nonlinear dynamics and chaos. Review of the laws of thermodynamics, principles of classical statistical mechanics, ensemble formulations and applications, principles of quantum statistical mechanics, ideal quantum gases, applications to Fermi-Dirac and Bose-Einstein systems.
- PHYS 162. Scientific Computing: Basic Methods.** **3 Units**
Prerequisite(s): MATH 26A or MATH 30 and PHYS 5A, or MATH 30 and PHYS 11A, or MATH 105A concurrently.
Term Typically Offered: Fall, Spring
- Basic methods and skills of applying computers to the solution of scientific problems. Numerical calculation methods, numbers and data, algebraic equations, rate processes, iterative techniques, approximation methods, statistical analysis and data fitting, relaxation methods, and use of software and other programming resources on the web. Practical experience emphasized throughout.
- PHYS 163. Scientific Computing: Modeling, Simulation, and Visualization.** **3 Units**
Prerequisite(s): PHYS 162.
Term Typically Offered: Spring only
- Application of computer modeling, simulation, and visualization to the solution of scientific problems. Projects drawn from various scientific disciplines will be used to develop the necessary skills, including a capstone project. Examples include projectile motion with air drag, time development of a biological population, chemical reactions with several reactants, and random walk and Monte Carlo methods. Practical experience emphasized throughout.
- PHYS 175. Advanced Physics Laboratory.** **2 Units**
Prerequisite(s): 12 units of upper division physics, including PHYS 106 and either PHYS 115 or PHYS 145 and a satisfaction of the Advanced Writing requirement.
Term Typically Offered: Fall, Spring
- Advanced experiments chosen from several of the major areas of physics, performed usually on an individual basis. Laboratory six hours.
- PHYS 181. Modern Physics for Everyone.** **3 Units**
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
A conceptual course in the topics of modern physics including Quantum Mechanics, Special Relativity, and other contemporary topics for a general audience. This course meets General Education Area B5 (Further Studies in Physical Science, Life Forms, and Quantitative Reasoning) and satisfies the upper-division Area B requirement.
- PHYS 182. Physics of Sports.** **3 Units**
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring
- A conceptual course in the application of the laws of physics in the context of sport. Focusing mainly on classical physics, we will cover topics such as force, energy, momentum, collisions, pressure, and fluids to explain what we see on the court, field, pool, and road. This course meets General Education Area B5 (Further Studies in Physical Science, Life Forms, and Quantitative Reasoning) and satisfies the upper-division Area 8 requirement.
- PHYS 186. Musical Acoustics: Science and Sound.** **3 Units**
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Physical principles of vibration and wave motion, with illustrations involving musical instruments and concert hall acoustics; principles of electronic synthesis, recording, and reproduction of sound; operation of the human ear and brain in receiving and analyzing sound; relation of the harmonic series to sound quality, harmony and scales; proper roles for science in explaining music as an artistic activity.
Note: No technical background required; course cannot be used to meet Physics BS program requirements. It is recommended that student have already completed their B1 and B4 requirement prior to enrollment. Some experience with music is also helpful.
- PHYS 187. Seeing the Light.** **3 Units**
Prerequisite(s): Completion of GE Area B1 and B4.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall only
- An extensive study of light, mostly in the context of applications. Topics include basics of light and natural phenomena, optics, color, light and energy (solar power), and holography; as well as more advanced topics such as wave/particle model of light, diffraction and polarization. The course will also cover optical instrumentation such as cameras, microscopes, telescopes, displays, and photoreceptors.

- PHYS 190. Physics Seminar.** 1 - 2 Units
Term Typically Offered: Fall, Spring
- Special lecture series on announced topics by local and visiting speakers, emphasizing current research developments, with related reading assignments.
Note: May be taken for credit in sequential semesters for a maximum of two units total.
- Credit/No Credit
- PHYS 191. Senior Project.** 1 - 2 Units
Prerequisite(s): Department chair permission.
Term Typically Offered: Fall, Spring
- Research Project under faculty supervision. Project may consist of laboratory or theoretical research project, instrumentation/demonstration development, or literature research project. Projects require written and oral reports.
Note: May be taken for credit in sequential semesters for a maximum of four units total. Grade assigned upon completion of the project.
- PHYS 194. Physics Related Work Experience.** 6 - 12 Units
Prerequisite(s): Upper-division status and Department Chair permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a physics or astronomy related company or agency. Placement is arranged through the department and the Cooperative Education Program office. Requires completion of a three-to-six month work assignment and a written report.
Note: PHYS 194 may not be used to meet major requirements in Physics; May be taken for credit in sequential semesters
- Credit/No Credit
- PHYS 195. Teaching Internship.** 1 - 2 Units
Prerequisite(s): Completion of all math and physics lower division courses for the B.A. in Physics. Approval from the Teacher Preparation Concentration Coordinator.
Term Typically Offered: Fall, Spring
- Supervised teaching internship for high school physics class, or for one of the following courses: PHYS 2, 5A-B, 10, 11A-C, 107, or ASTR4. The students will meet weekly with the faculty teaching this class, and with their supervisor or mentor to help prepare and teach the class.
Note: May be taken for credit in sequential semesters for a maximum of six units total.
- PHYS 197. Laboratory Teaching Assistant.** 1 - 2 Units
Prerequisite(s): Completion of all physics and math lower division courses required for the B.A. in Physics. Completion of the same course in which the student will take this class with a grade higher than B and/or consent from the Teacher Preparation Concentration program coordinator.
Term Typically Offered: Fall only
- Student will be a supervised laboratory teaching assistant for one of the following courses: PHYS 2, 5A-B, 10, 11A-C, 107, or ASTR 6. The student will meet weekly with the faculty teaching this class, and with their supervisor or mentor to help prepare and teach the laboratory.
Note: May be taken for credit in sequential semesters for a maximum of six units total.
- PHYS 198. Co-Curricular Activities.** 1 - 3 Units
Term Typically Offered: Spring only
- Students may provide special tutoring to students taking physics courses, participate in community oriented projects, assist in activity sessions for teacher training courses, or engage in activities related to the subject matter and concerns of the Physics and Astronomy Department. Up to 4 units may be taken.
 Credit/No Credit
- PHYS 199. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading. Open only to students who appear competent to assume individual work on the approval of the instructor. Up to 4 units may be taken for grade.
 Credit/No Credit
- PHSC 75. Introduction to Machine Shop Practices.** 2 Units
Term Typically Offered: Fall, Spring
- Safe machine operation techniques on common fabrication equipment. Study of materials and methods used to build testing and measuring equipment. Reading and calibrating measuring devices, gauging and optical gauging. Study of measuring conventions and understanding of precision. Interpretation of drawings, tolerances and tactics for maintaining tolerances. Jigs and mounts for dynamic data collection equipment. Prototype manufacturing. Students completing this course qualify to perform work in the shop with minimum supervision. Lecture one hour; Laboratory three hours.
- PHSC 107. History of the Physical Sciences.** 3 Units
General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5
Term Typically Offered: Fall, Spring
- Study of the development of the major physical laws presently used in describing our physical world. Some considerations of the influences of these developments on other areas of knowledge and on society in general.
 Cross Listed: HIST 107; only one may be counted for credit.
- PHSC 199. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open only to students who appear competent to assume individual work on the approval of the instructor. Up to 4 units may be taken for grade.
- Credit/No Credit

BA in Physics

Units required for Major: 65-67
 Total unites required for BA: 120

Program Description

The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Program Requirements

Code	Title	Units
Required Lower Division Courses (37 Units)		
CHEM 1A	General Chemistry I	5
CHEM 1B	General Chemistry II	5
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
MATH 45	Differential Equations for Science and Engineering	3
PHYS 11A	General Physics: Mechanics ¹	4
PHYS 11B	General Physics: Heat, Light, Sound, Modern Physics	4
PHYS 11C	General Physics: Electricity and Magnetism	4
Required Upper Division Courses (20-22 Units)		
PHYS 105	Mathematical Methods in Physics	3 - 4
	or MATH 105A Advanced Mathematics for Science and Engineering I	
PHYS 106	Introduction to Modern Physics	3
PHYS 110	Classical Mechanics	3
PHYS 115	Electronics and Instrumentation	3 - 4
	or PHYS 145 Optics	
PHYS 124	Thermodynamics and Statistical Mechanics	3
PHYS 135	Electricity And Magnetism	3
PHYS 175	Advanced Physics Laboratory	2
Elective Upper Division Requirements (8 Units)		
Select 8 units of Physics electives in consultation with a Physics advisor ²		8
Physics Colloquium Attendance		
Fulfill a minimum attendance requirement ³		
Total Units		65-67

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² See list below for a list of Department approved electives.

³ Majors must fulfill a minimum attendance requirement at Department Colloquia. Students should consult with their advisor (and/or Department Chair) during their mandatory advising appointments to find out the number of colloquia that are required to satisfy this requirement.

Elective List

Code	Title	Units
PHYS 115	Electronics and Instrumentation ⁴	4
PHYS 116	Advanced Electronics and Instrumentation	3
PHYS 130	Acoustics	3
PHYS 136	Electrodynamics of Waves, Radiation, and Materials	3
PHYS 145	Optics ⁴	3
PHYS 150	Quantum Mechanics	3
PHYS 151	Advanced Modern Physics	3
PHYS 156	Classical and Statistical Mechanics	3
PHYS 162	Scientific Computing: Basic Methods	3

PHYS 163	Scientific Computing: Modeling, Simulation, and Visualization	3
PHYS 195	Teaching Internship	1 - 2
PHYS 196 Series		
PHYS 197	Laboratory Teaching Assistant	1 - 2
PHYS 199	Special Problems	1 - 3
ASTR 150	Dark Matter and Dark Energy	3
MATH 105B	Advanced Mathematics for Science and Engineering II	4

⁴ If not used to satisfy other requirement of the degree (Example: PHYS 115 or PHYS 145 are required for the Bachelor of Science. If both are taken, one will count as an elective).

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (6 Units)		
B1	Physical Science ²	0
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	- Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		42

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Physics (Teacher Preparation)

Units required for Major: 86-87

Total units required for BA: 120

Program Description

The Science Subject Matter Program (SSMP), with emphases in Biological Sciences, Chemistry, and Physics, leads to a BA degree in the area of emphasis. It also meets the latest California Commission on Teacher Credentialing (CCTC) subject-matter requirement to enter a teaching credential program in California. In order to obtain a California K-12 Teaching Credential, a program of professional education preparation (a teaching credential program) is required in addition to completing the SSMP. Completing the SSMP and teaching credential program allows graduates to teach all four sciences (biology, chemistry, geoscience, and physics) at the general/integrated 7th-12th grade science level, in addition to the student's area of concentration at the advanced high school level. A typical credential might read, for example, SCIENCE: Chemistry.

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these

interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The BA degree is recommended for students who are interested in teaching Physics in high school or who want a liberal arts education with an emphasis in Physics. Physics majors are encouraged to take additional mathematics and to develop skills in the use of computers.

Currently there is a serious need in public school education for well-educated science teachers. Physics majors who have an interest in teaching should see the credential advisor in the Department (Dr. Vera Margoniner (<http://catalog.csus.edu/colleges/natural-sciences-mathematics/physics-astronomy-physical-science/physics/ba-in-physics-teacher-preparation/%20mailto:Vera.Margoniner@csus.edu>)) to plan an academic program and to explore ways to get involved in teaching-related activities such as tutoring, grading, and working in the schools.

Currently there is a great need for K-12 teachers educated in science. Changes in State Board of Education Standards and increasing interest in Biological Sciences have created significant demands for students with this credential. Biological Sciences majors who have an interest in teaching should contact one of the credential advisors in the Biological Sciences Department, Melanie Loo.

Note:

- It is also possible to obtain admission to the Professional Education Program by passing a series of subject-matter examinations specified by the CTC in lieu of this Science Subject Matter Program. For information about this option contact the Teacher Preparation Program Office, Eureka Hall 216, (916) 278-6403.
- Due to policy changes from the California Commission on Teacher Credentialing and the federal No Child Left Behind mandate, the Science Subject Matter program was under review at the time of this catalog printing and is subject to revision. As a result it is important to consult a credential advisor for current details.

Minimum Grade Requirement

A grade of at least a "C-" in all required Science Subject Matter Program courses is necessary in order to meet subject matter requirements for admission to a teaching credential program. If a grade of "C-" is not achieved in all SSMP courses, then the current CTC approved subject matter exam must be successfully passed in order to be eligible for admission to a teaching credential program (the current exam is the CSET, tests I, II, and III).

Note: It is recommended that all coursework for the SSMP be completed before starting the Teacher Education Program. At least 15 units of the coursework or equivalent work experience must be current, i.e., completed within the past six years.

Program Requirements

Code	Title	Units
Required Lower Division Courses (58 Units)		
ASTR 4A	Introduction to the Solar System	3
or ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
or ASTR 4C	Introduction to Astrobiology	
ASTR 6	Astronomical Observation Laboratory	1
BIO 1	Biodiversity, Evolution and Ecology ¹	5

BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
CHEM 1B	General Chemistry II	5
ENVS 10	Introduction to Environmental Science	3
GEOL 10	Physical Geology	3
GEOL 10L	Physical Geology Lab	1
MATH 30	Calculus I ¹	4
MATH 31	Calculus II ¹	4
MATH 32	Calculus III	4
MATH 45	Differential Equations for Science and Engineering	3
PHYS 11A	General Physics: Mechanics ¹	4
PHYS 11B	General Physics: Heat, Light, Sound, Modern Physics	4
PHYS 11C	General Physics: Electricity and Magnetism	4
Required Upper Division Courses (22-23 Units)		
PHYS 105	Mathematical Methods in Physics	3
PHYS 106	Introduction to Modern Physics	3
PHYS 110	Classical Mechanics	3
PHYS 115	Electronics and Instrumentation	4
PHYS 124	Thermodynamics and Statistical Mechanics	3
PHYS 135	Electricity And Magnetism	3
PHYS 175	Advanced Physics Laboratory	2
PHYS 191	Senior Project	1 - 2
Elective Upper Division Requirements (6 Units)		
Select 6 units of upper-division coursework chosen in consultation with physics advisor ²		6
Physics Colloquium Attendance		
Fulfill a minimum attendance requirement ³		
Total Units		86-87

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² See list below for a list of Department approved electives.

³ Majors must fulfill a minimum attendance requirement at Department Colloquia. Students should consult with the Department for details.

Elective List

Code	Title	Units
PHYS 115	Electronics and Instrumentation ⁴	4
PHYS 116	Advanced Electronics and Instrumentation	3
PHYS 130	Acoustics	3
PHYS 136	Electrodynamics of Waves, Radiation, and Materials	3
PHYS 142	Applied Solid State Physics	3
PHYS 145	Optics ⁴	3
PHYS 150	Quantum Mechanics	3
PHYS 151	Advanced Modern Physics	3
PHYS 156	Classical and Statistical Mechanics	3
PHYS 162	Scientific Computing: Basic Methods	3
PHYS 163	Scientific Computing: Modeling, Simulation, and Visualization	3
PHYS 195	Teaching Internship	1 - 2

PHYS 196 Series		
PHYS 197	Laboratory Teaching Assistant	1 - 2
PHYS 199	Special Problems	1 - 3
ASTR 150	Dark Matter and Dark Energy	3
MATH 105B	Advanced Mathematics for Science and Engineering II	4

⁴ If not used to satisfy other requirement of the degree (Example: PHYS 115 or PHYS 145 are required for the Bachelor of Science. If both are taken, one will count as an elective).

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking ³	3
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		39

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department recommends PHYS 30 to meet Area A3.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Physics

Units required for Major: 74-76

Total units required for BS: 120

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

The BS degrees are recommended for students seeking a career in the technology sector or planning to pursue a graduate degree.

Note: Students graduating with a Bachelor of Science Degree in Physics will not be subject to the University's Foreign Language Graduation Requirement. Students who change major may be subject to the University's Foreign Language Graduation Requirement.

Program Requirements

Code	Title	Units
Required Lower Division Courses (37 Units)		
CHEM 1A	General Chemistry I	5
CHEM 1B	General Chemistry II	5

Certificate in Scientific Computing and Simulation

Units required for Certificate: 14 minimum

Program Description

A certificate program in Scientific Computing and Simulation designed for science and engineering majors is offered by the Department of Physics and Astronomy. It focuses on the basic skills of applying the computer to the solution of scientific problems which today encompass a broad range of applications in science and technology. Such skills include modeling and formulating the problem, solving the resulting equations, and displaying the results graphically. Students that earn this certificate will acquire a good grounding in such skills and be better prepared for today's industrial and academic careers.

Eligibility Information

To receive the certificate in Scientific Computing and Simulation, students must:

- achieve a 2.5 GPA in the certificate program courses;
- must be working towards a degree at Sacramento State or have special approval from the Chair of the Department of Physics and Astronomy.

Program Requirements

Code	Title	Units
Background Courses (8 Units)		
Select one of the following pairs:		8
PHYS 11A & PHYS 11B	General Physics: Mechanics General Physics: Heat, Light, Sound, Modern Physics	
PHYS 11A & PHYS 11C	General Physics: Mechanics General Physics: Electricity and Magnetism	
MATH 105A & MATH 105B	Advanced Mathematics for Science and Engineering I Advanced Mathematics for Science and Engineering II	
PHYS 5A & PHYS 5B	General Physics: Mechanics, Heat, Sound General Physics: Light, Electricity and Magnetism, Modern Physics	
Computing Courses (6 Units)		
PHYS 162	Scientific Computing: Basic Methods	3
PHYS 163	Scientific Computing: Modeling, Simulation, and Visualization	3
Total Units		14

Certificate in Scientific Instrument Development

Units required for Certificate: 11 minimum

Program Description

A certificate in Scientific Instrument Development is available through the Department of Physics and Astronomy. The Scientific Instrument Development certificate program focuses not only on using scientific instruments, but also will teach the fundamentals of electronics, computer interfacing, and machining. Students that earn this certificate will be prepared to design, prototype, and construct instruments for a wide range of scientific applications.

Eligibility Information

To receive the certificate in Scientific Instrument Development, students must:

- achieve a 2.5 GPA in the certificate program courses;
- must be working towards a degree at Sacramento State or have special approval from the Chair of the Department of Physics and Astronomy.

Program Requirements

Code	Title	Units
PHSC 75	Introduction to Machine Shop Practices	2
PHYS 115	Electronics and Instrumentation	4
PHYS 116	Advanced Electronics and Instrumentation	3

Select one of the following:	2 -
	4
CHEM 133	Chemical Instrumentation
CHEM 141	Physical Chemistry Laboratory
GEOL 197	Advanced Laboratory Techniques for Geology
PHYS 175	Advanced Physics Laboratory
Total Units	11-13

- PHYS 106 plus three other upper division Physics courses **OR**
- PHYS 106 plus PHYS 11B plus two other upper division Physics courses.

Prehealth Professional Program

College of Natural Sciences and Mathematics

Program Description

Students planning to attend medical (allopathic or osteopathic), dental, pharmacy, veterinary, or optometry school are not required to complete a particular undergraduate major. In fact, most health professional schools state that students can be admitted after completing 90 semester units of college credit that includes a set of specified courses. However, the reality is that most students who are accepted to health professional schools earn a bachelor's degree prior to admission. A majority of students applying to health professional schools major in biological sciences or chemistry. However, the most important criterion in selecting a major is that you have a real interest in the field.

The pre-health professional advising patterns described in this section are not majors. For example, Sacramento State does not offer a "Pre-med major." Instead, the advising patterns identify the set of courses that must be completed before admission to particular types of health professional schools. In the case of some majors (e.g., Biological Sciences and Chemistry) there is considerable overlap in course requirements. However, the courses can be taken along with any major (e.g., English, Philosophy, Psychology, etc.) and used to satisfy General Education or elective requirements for the baccalaureate degree.

The common set of courses recommended for all of the medical-related professional schools covered in this section are listed below. Additional requirements for specific health professional schools follow the list of recommended core curriculum. It is important to note that requirements for a particular type of professional school (e.g., Dental School) may differ from one university to another, and that requirements are subject to change. The requirements listed in this section are those identified by most universities offering the identified professional program. Therefore, the lists may include courses that are not required by a particular university and may omit a course that is required by another university. It is strongly recommended that students interested in applying to professional schools contact one of the advisors listed in this section for assistance in planning their programs. It is also strongly recommended that students visit the Web sites of the universities they plan to apply to in order to be sure that they meet all requirements.

All health professional schools require strong academic ability and a good foundation in the sciences. In addition, good problem solving ability, effective oral and written communication skills, an awareness of interpersonal dynamics, an appreciation for cultural diversity, and an understanding of health care issues are important. Therefore, in addition to science courses, pre-health professional students should take general education courses that will enrich their non-science preparation in these areas.

It is also crucial that students have volunteer experience related to their professional goals. Such experience will provide more insight into how well suited you are to the work setting you are considering. Academic credit may be received for volunteer work by seeing an advisor and registering for BIO 195.

Minor in Physics

Units required for Minor: 21, all of which must be taken in Physics, and a minimum of 9 upper division units is required¹

¹ Written approval from a Physics faculty advisor is required.

Program Description

Physics is the most fundamental science and underlies our understanding of nearly all areas of science and technology. In a broad sense, physics is concerned with the study of energy, space, and matter, and with the interactions between matter and the laws that govern these interactions. More specifically, physicists study mechanics, heat, light, electric and magnetic fields, gravitation, relativity, atomic and nuclear physics, and condensed matter physics.

Program Requirements

Code	Title	Units
Required Lower Division Courses (12 Units)		
PHYS 11A	General Physics: Mechanics	4
PHYS 11B	General Physics: Heat, Light, Sound, Modern Physics	4
PHYS 11C	General Physics: Electricity and Magnetism	4
Required Upper Division Courses (3 Units)		
PHYS 106	Introduction to Modern Physics	3
Additional Upper Division Requirements (6 Units)		
Select 6 units of electives in consultation with an advisor.		6
PHYS 105	Mathematical Methods in Physics	
PHYS 110	Classical Mechanics	
PHYS 115	Electronics and Instrumentation	
PHYS 124	Thermodynamics and Statistical Mechanics	
PHYS 130	Acoustics	
PHYS 135	Electricity And Magnetism	
PHYS 136	Electrodynamics of Waves, Radiation, and Materials	
PHYS 142	Applied Solid State Physics	
PHYS 145	Optics	
PHYS 150	Quantum Mechanics	
PHYS 151	Advanced Modern Physics	
PHYS 162	Scientific Computing: Basic Methods	
PHYS 175	Advanced Physics Laboratory	
Total Units		21

Note: PHYS 5A, PHYS 5B may be substituted for PHYS 11A, PHYS 11C, but the 21-unit minimum must be met by additional courses in one of two ways:

Recommended Core Curriculum

Units required: 46

Note: Core courses should be taken by all students who plan to attend a medically related professional school, regardless of major.

Code	Title	Units
BIO 1	Biodiversity, Evolution and Ecology	5
BIO 2	Cells, Molecules and Genes	5
CHEM 1A	General Chemistry I	5
CHEM 1B	General Chemistry II	5
CHEM 24	Organic Chemistry Lecture I ¹	3
CHEM 25	Organic Chemistry Laboratory ¹	3
CHEM 124	Organic Chemistry Lecture II ¹	3
ENGL 5	Accelerated Academic Literacies	3
ENGL 20	College Composition II	3
PHYS 5A	General Physics: Mechanics, Heat, Sound	4
PHYS 5B	General Physics: Light, Electricity and Magnetism, Modern Physics	4
PSYC 2	Introductory Psychology	3
Total Units		46

¹ Some Dental Schools and Optometry Schools require only one semester of Organic Chemistry with lab. This can be satisfied by taking CHEM 20 (Organic Chemistry Lecture Brief Course) (3 units) and CHEM 20L (Introductory Organic Chemistry Laboratory) (1 unit) instead of CHEM 24, CHEM 25 and CHEM 124.

Note: In addition to the courses listed above, most health professional schools require that students complete 6-12 units of humanities coursework and 6-12 units of coursework in the social and behavioral sciences. Courses included in areas C and D, respectively, of the Sacramento State General Education program satisfy these requirements. A few schools specifically require an English literature course as one of the humanities courses, and a few schools specifically require Sociology (SOC 1) as one of the courses from the social and behavioral sciences.

Recommended Field Specific Curricula

Allopathic Medical Schools

When most people use the term "Medical School," they are usually referring to Allopathic Medical Schools that grant the M.D. (Doctor of Medicine) degree. There is, however, another type of Medical School, called Osteopathic Medical School (described below) that grants the D.O. (Doctor of Osteopathic Medicine) degree. Both M.D.'s and D.O.'s are eligible for licensure to practice medicine as physicians and surgeons in the State of California.

Applicants do not need a 4.0 GPA to get into an allopathic medical school. However, GPA is a reflection of your ability to handle university work and is an important part of your application. A successful applicant must be able to offer more than a good GPA. The attributes of motivation,

social concern, communication skills, and maturity are given great weight in the selection process.

All students applying to allopathic medical schools must complete the recommended course requirements listed above. In addition to the common courses, most allopathic medical schools require one semester to one year of college mathematics. In general, the mathematics requirement can be satisfied by taking a full year of calculus. However, some medical schools specify that one of the courses must be statistics. Therefore, if you want to be sure that you have completed the math requirement for the greatest number of medical schools, you should take the following courses:

Code	Title	Units
MATH 26A	Calculus I for the Social and Life Sciences	3 - 4
or MATH 30	Calculus I	
MATH 26B	Calculus II for the Social and Life Sciences	3 - 4
or MATH 31	Calculus II	
STAT 1	Introduction to Statistics	3
Total Units		9-11

It should be noted that there are variations in medical school admission requirements. For example, some schools also require or recommend one or more of the following courses:

Code	Title	Units
BIO 127	Developmental Biology (embryology)	4
BIO 184	General Genetics (genetics)	4
BIO 121	Molecular Cell Biology (cellular or molecular biology)	3
or BIO 180	Advanced Molecular Biology	
CHEM 161	General Biochemistry (biochemistry)	3

And/or one year of a foreign language

For information on requirements for specific schools, contact your pre-health advisor or visit the Web site of the school you are interested in attending.

Applicants must take the Medical College Admissions Test (MCAT). The test should be taken after completing the recommended core curriculum. You should allow at least 10 months between taking the exam and the date of planned matriculation. The schedule for the MCAT is currently under review. It is expected that beginning January 2007, the MCAT will become computer based and will be offered two to four times per year. For more information about dates, students should go to: www.aamc.org (<http://www.aamc.org>). To ensure timely submission of all application materials (including letters of recommendation), students are strongly advised to take the exam no later than April of the year preceding planned matriculation. Your MCAT scores, especially your verbal reasoning score, are an important part of your application.

Most Allopathic Medical Schools subscribe to an application service called The Association of Medical Colleges Application Service (AMCAS). What this means is that you will have to complete a single (but very lengthy and complicated) initial application and submit a single set of transcripts and MCAT scores to AMCAS. In turn, AMCAS, for a fee, will distribute the materials to the medical schools you identify on the application. The AMCAS application is usually available in June of the year preceding the year you wish to matriculate. For example,

the AMCAS application for admission in fall 2007 is available in June 2006. Participating medical schools set their own deadlines for receipt of application materials from AMCAS. The earliest deadline is usually November 1 of the year preceding planned admission. It is strongly recommended that you complete your AMCAS application soon after it becomes available, even if you plan to take the August MCAT.

The medical schools will review your AMCAS application and MCAT scores. After this review, the school will either reject your application or invite you to submit a school specific secondary application and letters of recommendation. Following a review of these materials, the school will either reject your application or invite you for an interview.

Osteopathic Medical School

Doctors of Osteopathic Medicine (D.O.'s) are "complete physicians." This means that they are fully trained and licensed to diagnose illness, prescribe medication, and perform surgery. D.O.'s and allopathic physicians (M.D.'s) are the only two types of complete physicians in the United States. In California, as in most other states, the law accords holders of the D.O. and M.D. equal professional status and privileges as licensed physicians and surgeons. D.O.'s may practice all branches of medicine, including specialties like Pediatrics, Obstetrics and Gynecology, and Emergency Medicine.

To become a D.O., you must attend a School/College of Osteopathic Medicine. At the time of this catalog, 19 schools/colleges offered programs leading to the D.O. degree. The main difference between the training of osteopathic and allopathic physicians is that osteopathic medical students must take additional training in osteopathic manipulative medicine. To learn more about osteopathic medicine, students should visit the Web site of The American Association of Colleges of Osteopathic Medicine (AACOM).

To be admitted to a School/College of Osteopathic Medicine, a student must complete the recommended core curriculum listed above. As is the case for most health professional schools, students may be admitted without a baccalaureate degree. However, 97% of students enrolled in Osteopathic Medical Schools hold at least a baccalaureate degree. Most osteopathic medical schools do not specify a college mathematics requirement. However, it is recommended that students complete the same math courses that are required for admission to an allopathic medical school. In addition, like allopathic medical schools, some osteopathic medical schools also recommend or require upper division courses in biology and biochemistry.

Students seeking admission to osteopathic medical school must also take the Medical College Admissions Test (MCAT). Most osteopathic medical schools subscribe to an application service called The American Association of Colleges of Osteopathic Medicine Application Service (AACOMAS). Therefore, applicants file one application, a single set of transcripts, and one set of MCAT scores to AACOMAS, and the service distributes these materials to each of the colleges designated on the application.

Like allopathic medical schools, osteopathic medical schools require letters of recommendation at some stage in the process. However, it is important to note that one of the letters must be from a practicing doctor of osteopathic medicine. Therefore, students thinking about applying to osteopathic medical school should try to make contact with a D.O. early in their undergraduate studies.

Dental Schools

To become a dentist, students must complete a program leading to the D.D.S. (Doctor of Dental Surgery) or D.M.D. (Doctor of Dental Medicine) degree. Most dental school programs are four-year programs. However, a few dental schools (e.g., University of the Pacific) offer a three-year program. To be admitted to dental school, students must complete the recommended core curriculum listed above. In addition, many dental schools recommend or require that students complete one or more of the following courses:

Code	Title	Units
BIO 22	Introductory Human Anatomy (anatomy)	4
BIO 131	Systemic Physiology (physiology)	4
BIO 184	General Genetics (genetics)	4
BIO 127	Developmental Biology (embryology)	4
CHEM 161	General Biochemistry (biochemistry)	3
STAT 1	Introduction to Statistics (statistics)	3

Dental school applicants must take the Dental Aptitude Test (DAT) which is given year-round by appointment on computers. The test should be taken at least 10 months prior to matriculation.

Most dental schools subscribe to an application service called the Associated American Dental Schools Application Service (AADSAS). Therefore, students applying to participating schools must complete a single initial application and submit a single set of transcripts and DAT scores to AADSAS. However, after reviewing a student's AADSAS application and DAT scores, most participating dental schools will require that students submit secondary applications and letters of recommendation.

Pharmacy Schools

To become a pharmacist, students must complete a program leading to the Doctor of Pharmacy (Pharm.D.) degree. Some, but not all, schools require the Pharmacy College Admission Test (PCAT). Prerequisite coursework also varies by school. Therefore, you should check with your pre-health advisor and the school's Web site for information about standardized test and course requirements. Completion of the recommended core curriculum plus the following courses will satisfy course requirements for most pharmacy schools:

Code	Title	Units
BIO 22	Introductory Human Anatomy	4
BIO 131	Systemic Physiology	4
BIO 139	General Microbiology	4
COMS 4	Introduction to Public Speaking	3
ECON 1A	Introduction to Macroeconomic Analysis	3
MATH 26A	Calculus I for the Social and Life Sciences ¹	3 - 4
or MATH 30	Calculus I	4
MATH 26B	Calculus II for the Social and Life Sciences	3 - 4
or MATH 31	Calculus II	4
Total Units		24-26

¹ Some schools require only one semester of calculus (MATH 26A or MATH 30).

Veterinary Schools

To become a veterinarian, students must complete a program of study leading to the Doctor of Veterinary Medicine (D.V.M.) degree. Although it is becoming less difficult to gain admission to any U.S. veterinary school without being a resident of the state in which the school is located, residents of California most often attend the School of Veterinary Medicine at UC Davis. Applicants to the UC Davis Veterinary School must take the Graduate Record Examination (GRE) General Aptitude Test. The GRE must be taken no later than October 1 of the year preceding planned matriculation. Applicants to other veterinary schools are usually required to take the Veterinary College Admission Test (VCAT). Applicants to veterinary school must have formal animal/veterinary experience.

In addition to the recommended core curriculum listed above, students planning to attend the School of Veterinary Medicine at UC Davis should take the following courses:

Code	Title	Units
BIO 127	Developmental Biology	4
BIO 131	Systemic Physiology	4
BIO 184	General Genetics	4
CHEM 161	General Biochemistry	3
STAT 1	Introduction to Statistics	3
Total Units		18

Optometry Schools

To become an optometrist, students must complete a program of study leading to the Doctor of Optometry (O.D.) degree. Applicants must take the Optometry Admissions Test (OAT). The OAT is administered twice a year, once in October and once in February. The test should be taken no later than the fall of the year preceding the intended date of matriculation (e.g., in Fall 2009 for admission in Fall 2010). Prerequisite course requirements vary by school. However, completion of the recommended core curriculum plus the following courses will satisfy course requirements for most optometry schools:

Code	Title	Units
BIO 22	Introductory Human Anatomy	4
BIO 131	Systemic Physiology	4
BIO 139	General Microbiology	4
CHEM 161	General Biochemistry	3
MATH 26A	Calculus I for the Social and Life Sciences ¹	3 - 4
or MATH 30	Calculus I	4
MATH 26B	Calculus II for the Social and Life Sciences	3 - 4
or MATH 31	Calculus II	4
STAT 1	Introduction to Statistics	3
Total Units		24-26

¹ Some schools require only one semester of calculus (MATH 26A or MATH 30).

Science Subject Matter

College of Natural Sciences and Mathematics

College of Social Sciences and Interdisciplinary Studies

College Overview

The College of Social Sciences and Interdisciplinary Studies (SSIS) provides a curriculum that examines human society in all aspects. The College focuses on such topics as relationships among individuals and groups, the functioning of the political system and economy, the nature and influence of culture, relationships among nations, and the relation of human society to the natural environment.

The College offers Bachelor's degree programs in Anthropology, Asian Studies, Economics, Environmental Studies, Ethnic Studies, Family and Consumer Sciences, Gerontology, Government, Liberal Studies, Psychology, Social Science, Sociology, and Women's Studies. Additionally, SSIS offers minors in most of the above disciplines as well as African Studies, Asian American Studies, Chicano Latino Studies, Middle East and Islamic Studies, Native American Studies, Peace and Conflict Resolution, Military Studies, California Studies, and Labor Studies. The College also has several Master's degree programs including those in Anthropology, Economics, Government, Psychology, Public Policy and Administration, Sociology, Urban Land Development and a Special Masters in Gerontology and Public Policy and Administration. The University's Educational Doctorate Program reflects a partnership between a SSIS department (Public Policy and Administration) and the College of Education. Finally, units within the College offer various academic certificates (e.g., Pan African Studies, Collaborative Governance).

The programs in the College use and teach skills in critical thinking and problem solving; finding and using information; oral and written communication; policy analysis; adaptation to a variety of situations; and sensitivity to and understanding of other peoples and their customs, problems, values, and aspirations. The College is further dedicated to developing a sense of responsibility to participate in and contribute to the human community and a healthy natural environment.

The knowledge and skills developed by the College's programs are applicable to a wide variety of careers. Students should consult with

individual departments for further career and graduate and professional school opportunities.

For more information about the College of Social Sciences and Interdisciplinary Studies, please click here (<http://www.csus.edu/ssis>).

Program Descriptions

Anthropology

Located at the nexus of Natural Sciences, Social Sciences, and Humanities, Anthropology integrates diverse forms of knowledge into practical indexes for engagement with our everyday concerns. The program provides students "hands-on" experience to complement their in-class learning. Undergraduate and graduate students can participate in various projects including archaeological excavations, community engagement programs, and intern at various governmental and non-governmental agencies.

Asian Studies

At a time when Pacific Rim developments are highly important to U.S. interests, the Asian Studies undergraduate major offers students a coherent introduction to the cultures of selected Asian societies. The major emphasizes are Japanese, Chinese, and South and Southeast Asian Studies.

Economics

The Economics major is designed to provide students with a liberal education with special emphasis on the economic aspects of society and familiarization with techniques for the analysis of contemporary economic problems. A graduate degree is also offered.

Environmental Studies

The B.A. or B.S. in Environmental Studies degree can help students gain an interdisciplinary understanding of issues like pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

Ethnic Studies

Ethnic Studies offers an undergraduate degree through an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the contributions made by these groups to world civilization and to American society.

Family and Consumer Sciences

The Family and Consumer Sciences Department offers a Bachelor of Science degree with a choice of four concentrations: Family Studies, Fashion Merchandising and Design, Nutrition and Food/Dietetic Emphasis, and Family and Consumer Sciences Education (Pre-credential Single Subject Program). Our majors study relationships between people and their diverse environments, focusing on the integration of physical, biological, cultural, economic and social influences on human behavior, lifespan development, and health.

Gerontology

Gerontology is an applied interdisciplinary program offering courses from a variety of departments and colleges. The Program prepares students to address challenges and positive life transitions related to individual and

family health and illness in an aging society. Students apply concepts and theories in several service learning courses and two academically structured internships which aids in providing a solid knowledge and experiential base for careers in a wide variety of settings serving elders.

Government

Ideally located in the state capital, the Department offers students unique opportunities to integrate their studies of politics and theory through an extensive range of internships in state and local government. A graduate degree is also available.

Liberal Studies

Students enjoy a wide-ranging selection of courses in different disciplines as they prepare for careers in K-12 education or in business and government.

Psychology

The undergraduate and graduate programs in Psychology allow students to develop a scientific understanding of the biological, cognitive, cultural, developmental, and social aspects of human behavior.

Public Policy Administration

The Department of Public Policy and Administration focuses on professional training for graduate students. It offers a Master of Public Policy and Administration and a Master of Science in Urban Land Development. As well, the Department collaborates with Gerontology to provide a Special Masters in Gerontology and Public Policy and Administration. Additionally, the Department offers a Certificate in Collaborative Governance for matriculated graduate students, a Certificate in Judicial Administration through the College of Continuing Education, and participates in the Doctorate in Educational Leadership Program.

Social Science

The Social Science Program provides a major and concurrent subject matter preparation for the Single Subject Teaching Credential in Social Science.

Sociology

The undergraduate and graduate sociology programs allow students to understand and explain the way people are by examining the social, historical, cultural and organizational contexts in which they live. Neither individuals nor society can be understood without such a perspective.

Urban Land Development

The Master of Urban Land Development is a professional degree opportunity for graduate students interested in a public and/or private sector career in land development in an urban setting. The program provides both the business finance/real estate knowledge and public policy skills necessary to be successful in this endeavor.

Women's Studies

One of the earliest programs in the country, Women's Studies at Sacramento State is a dynamic interdisciplinary field which draws undergraduate majors and minors from diverse backgrounds, offering courses on a wide range of topics drawn from the Social Sciences and Humanities. Juxtaposing knowledge of feminist theory with political projects, internships and personal experiences, the department facilitates political activism through active community involvement.

Departments/Programs

- African Studies: Certificate; Minor
- Anthropology: BA; MA; Minor
- Asian Studies: BA; Minor
- California Studies: Minor
- Economics: BA; Certificate; MA; Minor

- Social Science: BA
- Sociology: BA; MA; Minor
- Urban Land Development: MS
- Women's Studies: BS; Minor

Centers/Institutions

The College of Social Sciences and Interdisciplinary Studies has a long history of involvement in social policy-oriented scholarship and instruction. That history, and the College's current roster of talented researchers and instructors, has placed SSIS at the forefront of the University's efforts to diverse community needs, consistent with the stated values of the University's strategic plan. Many of these efforts are channeled through centers and institutes that are under the College's purview. Such centers include the following:

- Archaeological Curation Facility
- Archaeological Research Center
- Anthropology Museum
- Center for Pacific Asian Studies
- Cooper-Woodson College Enhancement Program
- Educational Insights Center (EdInsights)
- Institute for Social Research (ISR)
- Iranian and Middle Eastern Studies Center
- Longevity Center

African Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Minor and Certificate in African Studies are identical programs. The Minor is recommended for students undertaking completion of a Bachelor's degree. The Certificate is recommended for students who have already completed a Bachelor's degree.

The program is intended to improve students' understanding of modern Africa. As a significant part of the world community, Africa merits focused and sustained study. This program provides a cohesive, directed effort to develop students' knowledge and appreciation for Africa's peoples, geography, institutions, arts, customs, languages, traditions, resources, politics, and social structures. The program is designed and structured in a way that will be useful to the student, both professionally and academically. The Minor is of particular relevance for students interested in acquiring an integrated perception and understanding of Africa. The program provides different options: a specific emphasis in international relations; interests in a particular aspect of African life such as art, history, or society; or general intellectual curiosity.

The CSU International Programs provide opportunities for students at Sacramento State to study and live in Africa. This constitutes a valuable adjunct to African Studies on the campus. Students are strongly urged to take at least one year of a language used in Africa other than English. Course selection for each student is worked out with an advisor from the African Studies faculty in conjunction with the Director of Pan African Studies.

Anthropology

College of Social Sciences and Interdisciplinary Studies

Program Description

Anthropology is the study of humans, past and present. Anthropologists take a broad approach to understanding the varieties of human experience, which uniquely places us at the juxtaposition of the social sciences, natural sciences and the humanities. Anthropology is traditionally organized into four subfields that offer distinctive skills.

Cultural and Social Anthropology deals with the social lives of people around the world, including our own society: economic systems, legal practices, kinship, religions, medical practices, folklore, arts and political systems, as well as the interrelationship of these systems in environmental adaptation and social change. Anthropological Linguistics deals with varied aspects of human language and the characteristics of nonhuman communication systems, to achieve an understanding of past and present human language systems and their significance in social life.

Biological Anthropology is a biological science that deals with adaptations, variability and evolution of humans, and our living and fossil relatives. It is also a social science because biological anthropologists study human biology within the context of culture and behavior. Simply put, they study humans from a biocultural perspective across space and time. Physical Anthropology describes and compares world human biology. Focuses on humans and their primate order, and seeks to document and understand the interplay of culture and biology in the course of human evolution and adaptation.

Archaeology focuses on the material remains of human societies from the remote and recent past with emphasis on reconstructing and understanding past modes of human cultural adaptation and change.

While maintaining exposure to these four subfields, the Anthropology program allows students to sharpen their skills in specific domains of anthropological thought and practice. Students may choose from three concentrations that share a common foundation.

- Archaeology and Biological Anthropology (ABA): emphasizes a scientific approach to anthropology. Studying diverse topics including; evolutionary processes, human variation, ecology, skeletal analysis and zoo-archaeology, it prepares students for careers in the anthropological sciences in both the public and private sectors, such as cultural resources management, forensic science; collections management, and advanced graduate studies in anthropological sciences or related disciplines.
- Culture, Language and Society (CLS): introduces students to knowledge and skills necessary for a nuanced understanding and engagement with the world we live in. It prepares students for graduate studies in socio-cultural and linguistic anthropology, professional careers in government, business, law, healthcare and any contexts that require attention to cultural, social and linguistic dynamics
- General Anthropology (GA): constitutes a solid liberal arts foundation that prepares students for careers and graduate studies in fields that call for a broad exposure to anthropological knowledge. Students, under the guidance of a faculty advisor, can also choose to customize a program of study to pursue individualized academic or professional interests.

Degree Programs

BA in Anthropology (General Anthropology) (p. 857)

BA in Anthropology (Archaeology and Biological Anthropology) (p. 854)

BA in Anthropology (Culture, Language and Society) (p. 855)

Minor in Anthropology (p. 860)

MA in Anthropology (p. 859)

Special Features

- Diverse faculty who are widely published and enjoy national reputes in their specializations.
- Regular activities include Faculty Colloquia, the Sacramento Anthropological Society sponsored brown bag discussions and annual symposium.
- Extensive ethnographic and archaeological collections, housed in the Museum of Anthropology and the Archaeological Curation Facility, afford students opportunities to learn all phases of museum and collections management work. The Department exhibit hall displays an excellent collection of museum artifacts.
- The Department maintains a computer lab, as well as several computer stations in the Archaeology lab.
- Course related fieldwork in California and the Great Basin and archaeological laboratory opportunities are offered through internships at the Archaeological Research Center (ARC) and the Archaeological Curation Facility (ACF). Paid fieldwork and laboratory opportunities may also be available for qualified students through the ARC and ACF.

- Professional journals and the updated Human Relations Area File are housed in the University Library.

WALKER, MICHAEL M.

ZEANAH, DAVID W.

Career Possibilities

Anthropology equips students with the necessary knowledge to engage with the political, economic, cultural, and social complexities of the world. In addition to providing students analytical and critical thinking skills, anthropology exposes students to the intersection of culture, biology, and history on peoples' lived experiences. Majoring in Anthropology provides students a solid foundation for advanced studies in diverse fields such as anthropology, business, cultural resources management, law, journalism, medicine, communication, social work, urban studies, public policy, informatics, and any other profession that calls for the sustained engagement with cultural diversity, critical thinking, analytical abilities and people skills. Given the training they receive, anthropologists are increasingly sought by the business world, government agencies and non-government organizations. Traditionally Anthropology majors have pursued careers in primary and secondary teaching; consumer market research; human resource development; local, state, and federal governmental agencies; non-governmental organizations (NGOs); archaeological field or laboratory technicians; forensic analysis, community development organizations; trade union organizations and allied fields. The globalized world economy has expanded this horizon to include career opportunities in communication, health care, entertainment, information technology, consumer product development, etc.

ANTH 1. Introduction to Biological Anthropology. 3 Units

General Education Area/Graduation Requirement: Life Forms (B2)

Term Typically Offered: Fall, Spring, Summer

Covers the concepts, methods of inquiry, and theory of biological evolution and their application to the human species. There is a specific focus on molecular, Mendelian and population genetics, mechanisms of evolution, primatology, paleoanthropology, biocultural adaptations, and human variation. The scientific method serves as the foundation to the course.

ANTH 1A. Biological Anthropology Laboratory. 1 Unit

Prerequisite(s): ANTH 1 (may be taken concurrently)

General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2)

Term Typically Offered: Fall, Spring

Designed to familiarize the student with the materials and techniques of physical anthropology. Includes human and other primate osteology, anthropometric techniques, and allied methods in the gathering and analysis of physical anthropological data. Through working with the departmental collection of fossil casts and a wide variety of charts and models, the student also becomes familiar with the stages of human and primate evolution.

ANTH 2. Introduction to Cultural Anthropology. 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, the course contributes to a critical understanding of continuity and diversity in peoples' lifestyles, social institutions, and cultural practices in different societies around the world. The course also examines the impact of political, economic, and social changes, such as colonization, decolonization, and globalization on people and cultures over the last century.

ANTH 2H. Introduction to Cultural Anthropology - Honors. 3 Units

Term Typically Offered: Fall only

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, contributes to a critical understanding of the continuity and diversity in peoples' lifestyles, social institutions, and cultural practices in different societies around the world. Examines the impact of political, economic, and social changes, such as colonization, decolonization, globalization, etc., on people and cultures over the last century. Intended for students enrolled in the University's GE Honors Program.

Note: Students must be admitted to the GE Honors Program.

ANTH 3. Introduction to Archaeology. 3 Units

General Education Area/Graduation Requirement: GE AREA D

Term Typically Offered: Fall, Spring

Introduces students to the methods and theories used by archaeologists to find, recover, and interpret such remains in an effort to reconstruct and understand the lives of earlier peoples. The class uses archaeological case studies, films, and hands-on examples of tools and other artifacts produced by simple stone age hunters and more complex civilizations that lived in California and other parts of the world.

ANTH 4. Language, Culture, and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduction to the abstract and formal structures of language and cultural dimensions of human communication via major linguistic anthropological concepts, theoretical assumptions, and methodologies. Addresses the logical, formal relationship between underlying rules of natural languages while critically analyzing how speakers from different cultures use language to convey complex social and cultural information. Course illuminates how language is used to create and reinforce relationships of power (race, class, gender); develops ability to recognize linguistic fallacies; and instructs in basic critical thinking skills.

ANTH 13. Magic, Witchcraft and Religion. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Cross-cultural study of the forms and functions of supernatural beliefs and associated rituals in various societies of Africa, Asia, aboriginal Australia, Oceania, South America, native North America and elsewhere. Emphasis is on understanding beliefs and rituals within given social contexts, and using broad comparisons to derive insight into the general functions of beliefs and rituals in human life.

ANTH 16. Comparative Early Civilizations. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Examines the emergence and development of early civilizations. Studies state formation, urbanization, market system development, and other processes relevant to the evolution of early civilizations from the standpoints of cross-cultural comparison and modern anthropological theory. The goal is to identify cross-cultural regularities as well as critical differences that can explain the various evolutionary trajectories of these societies. The civilizations that will be contrasted include societies from Mesopotamia, Egypt, the Indus Valley, China, Mesoamerica, Andean South America, and other regions.

ANTH 21. Freshman Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

ANTH 101. Cultural Diversity. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), United States History
Term Typically Offered: Fall, Spring, Summer

Focuses on analyzing the historically conditioned political, economic and social factors that have contributed to cultural diversity in the U.S.; a critical anthropological approach is developed to explore the intersection of race, class, gender, ethnicity and sexuality; the political economy of institutions and ideas, such as racism, classism, sexual stereotyping, family, religion, state, color-blindness, multiculturalism, etc.; and, discourses of cultural diversity in the U.S.

ANTH 102. The Nature of Culture. 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D
Term Typically Offered: Fall, Spring

An upper division general introduction to cultural anthropology. Divided into two major parts: a survey of theories, methods and concepts of cultural anthropology, and an introduction to applied cultural anthropology.

ANTH 103. Psychological Anthropology. 3 Units
Prerequisite(s): ANTH 2 or ANTH 102.
Term Typically Offered: Fall, Spring

Cross-cultural comparative approach to human cognition, child-training practices, personality development, deviant behavior, cultural psychiatry, and data gathering techniques.

ANTH 104. The History of Anthropology. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological theory in historical perspective.

ANTH 105. Anthropology of War. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examination of the nature of war, primarily as it occurs in pre-industrial societies, and a survey of the kinds of explanations of this phenomenon current in anthropology. Emphasis is on understanding the complexity, variability, and cultural imbeddedness of war as it occurs around the world.

ANTH 106. Culture and Personality of the Chicano Child. 3 Units
Term Typically Offered: Fall, Spring

Study of child growth and development patterns universal to all children with focus on the pressures and effects of the Mexican and Anglo cultures on the development of the Chicano child.

ANTH 107. Anthropology of Hunters and Gatherers. 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring

Survey of the rapidly disappearing life way which anthropologists call hunting and gathering, with economies based on the use of wild plant and animal resources. Using ethnographic examples from the Arctic, southern Africa, rainforests in South America, deserts of Australia, and western North America, explores variation in hunter-gatherer societies with respect to differences in environment, technology, social organization, and the historical effects of interaction with more complex cultural groups. Models that attempt to explain long-term changes in this life way are also explored.

ANTH 108. Economic Anthropology.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Examines the fundamentals of economic anthropology through a focus on production, exchange, and consumption in a range of historical and ethnographic contexts. Introduces different frameworks for theorizing the economy and explaining human behavior and decision-making. Addresses central questions and issues in cultural anthropology on the origins of value, wealth and social stratification, the meanings of work, gift exchange and reciprocity, property regimes, morality and debt, marketing and desire.

ANTH 109. Ecological and Evolutionary Approaches to Anthropology.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Survey of anthropological research regarding the relationships between human behavior, ecology, and evolution. Reviews historic development of research in this field, and contrasts approaches based in ecological and evolutionary theory. Reviews and evaluates of case studies. Topics include hunter-gatherer and hominid economy and social organization, foraging theory, work effort, population growth and regulation, origins of agriculture, warfare, ritual and resource conservation, and origins of complex society.

ANTH 110. Archaeological Method and Theory.**3 Units****Prerequisite(s):** ANTH 3.**Term Typically Offered:** Fall, Spring

Traces the development of archaeology from its inception in the eighteenth century up to the present time. Readings, lectures, and class assignments follow the evolution of archaeological method and theory in relation to changing ideas about the role of culture, environment, and technology within the broader discipline of anthropology.

ANTH 111. California Archaeology.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Pre-contact California encompassed some of the most extensive environmental and cultural diversity ever to exist on the planet, containing widely divergent biota, many distinct languages and cultures, and among the densest hunter-gatherer populations ever recorded. At least 11,000-12,000 years of human occupation have been marked by multiple migrations and major shifts in technological and social organization. Explores long-term trends in cultural development across the state, and examines models used to explain why semi-permanent settlements, intensive subsistence strategies, and complex social institutions arose in some times/places and not others.

ANTH 112. Great Basin Archaeology.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Explores the cultural and natural history of the Great Basin from the last glacial maximum into the historic era. Though largely arid, this region in fact manifests considerable environmental variability and has seen significant climatic alterations since the Pleistocene. Human occupation of the Great Basin witnessed major changes in demography, technology, subsistence practices, and sociopolitical organization over the last 10-12,000 years. The course looks to understand cultural and environmental variability across the region through examination of the long-term material record and consideration of anthropological and biological models.

ANTH 113. Prehistory of the Southwest.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Survey of the prehistory of the Arizona, New Mexico, Western Colorado, Utah, and adjacent regions of Nevada, Texas and northwestern Mexico. Major prehistoric cultures of the Southwest (Hohokam, Anasazi, Mogollon, Fremont) are covered in detail. Focus on major transitions in subsistence and social organization emphasizing current issues of archaeological research. Cultural influences from outside areas are also considered.

ANTH 114. North American Prehistory.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Familiarizes students with the archaeological record of North America, and provides an analytical framework through which it may be understood in anthropologically meaningful terms. This will be accomplished by considering some of the explanations that have been proposed to account for the prehistory of the continent, and by examining the archaeological remains and cultural sequences found in various areas, including the North and Southeast, Great Plains, Pacific Northwest, and arctic/subarctic regions.

ANTH 115. Origins of Agriculture.**3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Surveys and evaluates worldwide anthropological perspectives of the origins of agriculture and the rise of complex society. Traces the development of major archaeological theories for the inception and spread of agriculture and civilization, acquainting students with groundbreaking archaeological research associated with each theoretical perspective. Current archaeological research is reviewed in-depth, providing a context for critique of the theories. Examples from North America, Latin America, the Middle East, India and China are compared and contrasted using movies, readings, and lectures.

ANTH 116. Old World Prehistory: Paleolithic Archaeology.**3 Units****Term Typically Offered:** Fall, Spring

Old World Paleolithic archaeology from the emergence of hominids until the development of agriculture and civilization. Cultural developments in Africa, Asia, Europe and Australia are examined with the aim of highlighting similarities and differences in the process of technological, demographic, and sociopolitical change within each region. Explanatory models are offered to account for cultural evolution in various parts of the Old World are explored and assessed.

ANTH 117. World Prehistory and the Evolution of Modern Humanity. 3 Units**Prerequisite(s):** Any lower-division Area B2 GE course**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Covers human prehistory, from the emergence of culture through the domestication of plants and animals, and the origins of complex societies. Included are major cultural developments on every continent, emphasizing similarities and differences in the nature and timing of key technological, cultural, and sociological changes. Methodologies for learning about the past, major archaeological discoveries, important personalities, and contributions to the modern world are discussed in the context of understanding the strengths of a scientific approach to understanding the human past.

ANTH 119. Analysis of Faunal Remains. 4 Units**Prerequisite(s):** ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Seminars on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

ANTH 120. Introductory Statistics for Anthropologists. 3 Units**Prerequisite(s):** Anthropology (Archaeological and Biological Anthropology) concentration.**Term Typically Offered:** Fall, Spring

Covers the conceptual framework involved in quantitative methods of data analysis commonly employed in anthropology. The emphasis is primarily on understanding concepts and secondarily on learning techniques of data analysis. Topics include data description and distributions, estimation procedures, hypothesis testing, and model fitting. Illustration of concepts in lecture are made with data from archaeology, physical anthropology, and social/cultural anthropology.

ANTH 121. Archaeology of Mexico. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Provides an upper division introduction to the archeology of Mesoamerica for students not majoring in anthropology. Discusses the evolution of the ancient civilizations of Mesoamerica, including Mexico, Guatemala, Belize, Honduras, and El Salvador. Examines the development of societies from the earliest inhabitants to the growth of empires. Includes coverage of the Olmecs, Monte Alban, Teotihuacan, the Classic Maya, the Toltecs, and the Aztecs.

Note: Cannot be used to meet the requirements of the Anthropology major; interested majors should take ANTH 122.**ANTH 122. The Evolution of Early Mesoamerican States. 3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Traces the emergence of pre-hispanic state societies in Mesoamerica from the growth of the earliest settlements to the collapse of the Aztec empire. Analyzes how complex societies evolved in Mesoamerica, focusing on such evidence as household and village social organization, craft specialization and interregional exchange, religion and ideology, and the logistics of state management and imperial expansion.

ANTH 123. Ancient Technology. 3 Units**Term Typically Offered:** Fall, Spring

Examines the importance of various preindustrial technologies, and the techniques and methods involved in their manufacture and use. Topics include stone, bone, wood, and hide working, ceramics, weaving, metallurgy, and other crafts essential to human survival in ancient and contemporary societies around the world.

ANTH 124. Environmental Archaeology. 3 Units**Prerequisite(s):** ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.**Term Typically Offered:** Fall, Spring

All human societies depend on their natural surroundings, and so the reconstruction of prehistoric environments is an essential part of archaeological interpretation. Three interrelated aspects of environmental archaeology are considered: (1) general approaches to paleoenvironmental reconstruction, employing various biological and geological indicators; (2) the analysis of human plant and animal food remains; and (3) the geological and other processes that are responsible for the formation of archaeological deposits.

ANTH 125. Historical Archaeology. 3 Units**Term Typically Offered:** Fall, Spring

Written history only records a small portion of human activities that occurred in the recent past. Explores the numerous methods of investigation, analysis and interpretation that are available to aid the historical archaeologist in discovering missing information and in some cases correcting erroneous statements, assumptions and interpretations about the past.

ANTH 126. Techniques of Archaeological Analysis. 3 Units**Prerequisite(s):** ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.**Term Typically Offered:** Fall, Spring

Introduces students to various approaches to archaeological analysis, focusing on how different classes of data are collected, classified, and interpreted to resolve research issues. Includes such topics as the handling, treatment, and analysis of flaked and ground stone tools, plant and animal food remains, and other types of archaeological materials. Lecture one hour, laboratory six hours.

Note: May be repeated once for credit.**ANTH 127. Cultural Resource Management in Theory and Practice. 3 Units****Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Takes a wide-ranging look at how cultural resources are managed and preserved in California, the greater U.S., and other parts of the world. More than just a review of applicable laws and regulations, it is designed to offer a history of historic preservation, examine its role in our society, and explore the prospects for its continued presence. Practical aspects of Cultural Resource Management (CRM) are reviewed with respect to designing, budgeting, and performing archaeological surveys, site evaluation studies, and data recovery or mitigation programs.

ANTH 128. Indians of California.**3 Units****Term Typically Offered:** Fall, Spring

Provides a survey of the traditional cultures of California Native American groups as they existed immediately after Western contact. Exploration of the ecological linguistic, economic, social, political, and religious diversity of California Native American groups provides a background for analysis of current anthropological theories of hunter-gatherer adaptations, subsistence intensification, political economy, cultural complexity, and California prehistory.

ANTH 129. Human Use of Caves From An Archaeological Perspective.**3 Units****Prerequisite(s):** ANTH 3.**Term Typically Offered:** Fall, Spring

Unique character of caves and their deposits present many challenges that cannot always be met with conventional archaeological, methodological and theoretical approaches. Students will be exposed to investigative techniques that facilitate the understanding of these unique archaeological resources. The investigation of the human use of caves through a worldwide perspective provides students with a thorough introduction to the study of these significant resources.

ANTH 130. Social Justice in Interdisciplinary Perspective.**3 Units****Prerequisite(s):** Sophomore standing or instructor permission.**Term Typically Offered:** Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice.

Cross listed as ID 124, ENVS 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ANTH 131. Europe in the Ethnographic Imagination.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

More than a place or "continent," Europe is a social and ideological construction employed to unite diverse linguistic and cultural communities. Focuses on major themes in contemporary Europeanist anthropology, including transformations within and between local communities and regions (especially with regards to Northern Ireland, the former Society bloc, and Yugoslav federation), immigration, neo-nationalist extremism, the changing character of religious institutions, and the European Union as a framework for organizing identity and society.

ANTH 134. Japanese Culture and Society.**3 Units****General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Culture of the Japanese: traditional and modern, rural and urban, cultural and social institutions; village and urban organization; and family structure. Aspects of social change in contemporary rural and urban Japan.

ANTH 135. Indians of North America.**3 Units****Term Typically Offered:** Fall, Spring

Provides a survey of traditional Native American societies and culture areas north of Mexico. Readings, lectures, and discussions emphasize primary ethnographic and historic data that provide the richest accounts of Amerindian cultures at the time of European contact and shortly thereafter.

ANTH 140. Social Anthropology.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Cross-cultural comparisons of the structures and functions of non-literate and complex societies; the diversity of social and territorial units, their analysis and classification; and the study of social organization and control and social change in relation to kinship, marriage and family, lineage and clan, law, politics, economics and religion in diverse societies.

ANTH 141. Culture Theory.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Exploration of the concepts, dimensions and dynamics of culture theory, viewing culture as an adaptive, comparative, cognitive, structural and symbolic system.

ANTH 142. Political Anthropology.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Explores political anthropology as a specialized field of anthropological inquiry. Analyzes the articulation of power, authority, and legitimacy in non-state and state based societies. Contributes to an understanding of the transforming powers of modernity and resistance to it and develops a critical appreciation of how age, status, class, ethnicity, race, gender and religious ideologies shape political order within various societies around the world.

ANTH 143. Culture and Society in Mexico.**3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Introduction to the cultural and social institutions of the Mexican people. The changing patterns of family, economic, political, religious, and educational systems in Mexico.

ANTH 144. Contemporary American Culture in Anthropological Perspective.**3 Units****Prerequisite(s):** ANTH 146**Term Typically Offered:** Fall, Spring

Anthropological analysis of contemporary American culture viewed from the perspective of both internal and external observers, with emphasis on such subjects as cultural myths and social realities, values, ideology and world view, family and cultural transmission, social institutions and structures, religious ceremonies and magical rituals, and other customs and practices that establish American culture as one of the more bizarre and exotic in the world ethnographic literature.

- ANTH 145. Peoples and Cultures of Latin America.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Exploration of diversity of peoples and cultures in Latin America and the common experiences such as colonialism, ethnicity, and economy that shape their lives. Aspects of culture examined include: race and ethnicity, colonialism and its implications, the state and political institutions, religious systems, kinship and social organization, gender, economic processes, and issues pertaining to environment, urbanization, globalization, nationalism, and transnationalism.
- ANTH 146. Ethnographic Analysis.** 3 Units
Prerequisite(s): ANTH 2.
Term Typically Offered: Fall, Spring
- Introduces students to current techniques, theories, and debates in ethnographic research and analysis through the use of ethnographies and related works. Critically examines the production of ethnographic knowledge in socio-cultural anthropology from historical and contemporary perspectives.
- ANTH 147. Peoples of Southeast Asia.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Survey of the native peoples of Southeast Asia (Laos, Vietnam, Thailand, Philippines, Malaysia, Indonesia, Burma and Singapore). Emphasis is on examining the forms of social and cultural pluralism in contemporary Southeast Asian societies.
- ANTH 148. Anthropology of Chinese Societies.** 3 Units
Term Typically Offered: Fall, Spring
- Exploration of the cultures of three Chinese societies (Taiwan, Hong Kong, and the People's Republic of China) in each of their unique historical contexts. A comparison and contrast of how these societies, though sharing a common cultural heritage, have had different paths of development in recent times. Aspects of culture examined include: the state and political institutions; religious systems; kinship and social organization; economic processes; and issues of regional integration, nationalism and transnationalism.
- ANTH 149. Cultures of South Asia.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Exploration of cultural practices in different South Asian societies. Analyzes the impact of colonialism, post-colonialism and discourses of modernity on South Asian societies. Examines the process of state formation, nation-building, communal conflict, economic transformations and the politics of caste, gender and class in contemporary South Asia.
- ANTH 150. Human Osteology.** 4 Units
Prerequisite(s): ANTH 1 and ANTH 1A, or BIO 22; and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall only
- Provides students a hands-on, in-depth study of human osteology. Learn growth and development of the skeletal tissues and identification of the individual skeletal elements, and practice basic measurements, sexing and aging of skeletal material. A prerequisite for advanced techniques in forensic anthropology. Students will work with the department's osteological materials.
- ANTH 151. Human Paleontology.** 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring
- Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and relationships of the extinct forms of humans.
- ANTH 152. Primate Adaptations.** 3 Units
Term Typically Offered: Spring only
- Covers the significant dental, skeletal, and soft-anatomical adaptations of the major living families and/or subfamilies within the Order Primates. In the process of surveying the adaptations, the student will become familiar with evolutionary theory, taxonomy, embryology, ecology, social systems, biomechanics, effects of size, and the functional morphology of the skeletal system in primates. Three-hour seminar, with some lecture and hands-on experience with skeletons and casts.
- ANTH 153. Evolutionary Medicine.** 3 Units
Term Typically Offered: Fall, Spring
- Introduction to the application of evolutionary theory to human health and disease. Evolutionary medicine is a rapidly growing interdisciplinary specialization utilizing insights from evolutionary theory and human evolutionary ecology to inform understandings of human health, development and disease; and also to critique existing biomedical theory about the human condition. Topics include reproduction, child birth, lactation, growth and development, infectious diseases, parasites, diet and nutrition, mental and behavioral disorders, and substance use and addiction.
Note: ANTH 1, BIO 10, BIO 11, or PSYC 2 recommended.
- ANTH 154. Primate Behavior.** 3 Units
Term Typically Offered: Fall, Spring
- Survey of the genetic, ecological and social influences on non-human primate behavior from an evolutionary perspective; covers the major non-human primate groups, including their taxonomy, major adaptations, and their present geographic distribution. The history and development of primate behavior also will be considered with an emphasis on various models for interpreting behavior.
- ANTH 155. Fundamentals of Biological Anthropology.** 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring
- Survey of the development of method and theory in physical anthropology from its origins in zoology, anatomy, and medicine, to the various approaches currently used in the study of human biology and evolution. Concepts considered include the scientific method, modern genetics, evolutionary theory, the race concept and other approaches to explaining human variation, taxonomy and systematics, and macro-evolutionary models. Critical reading and analytical skills will be emphasized.

ANTH 156. Evolution of Human Behavior.**3 Units****Prerequisite(s):** ANTH 1, BIO 10, or PSYC 2 recommended.**Term Typically Offered:** Fall, Spring

Introduction to the application of evolutionary theory to human behavior and psychology. Reviews and contrasts contemporary perspectives of human behavioral evolution with emphasis on insights from the emerging field of evolutionary psychology. Topics include human behavior and cognition as adaptations, "selfish genes," game theory, evolution of social behavior, evolution of altruism, human mating strategies, parenting, behavioral disorders, evolution of the life cycle, human behavioral ecology, Darwinian medicine, and evolutionary psychology.

ANTH 157. Human Variation.**3 Units****Prerequisite(s):** ANTH 1, BIO 10, or instructor permission.**Term Typically Offered:** Fall, Spring

Survey of the basic principles of human genetics with emphasis on the mechanisms that shape human evolution and the development of human races. Analyzes the laws of heredity as exhibited in modern human populations and human adaptability to climatic extremes. Historical development of concepts. Discussion of most current research.

ANTH 158. Human Skeletal Analysis.**4 Units****Prerequisite(s):** ANTH 150.**Term Typically Offered:** Spring only

Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ethnicity; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.

ANTH 159. Forensic Anthropology.**3 Units****Prerequisite(s):** Any lower-division GE Area B2 course.**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5**Term Typically Offered:** Fall, Spring

Overview of forensic anthropology - an applied field of biological anthropology that works with law enforcement, medical examiners, and human rights agencies. Forensic anthropologists answer questions of medico-legal significance by applying techniques designed for analysis of human skeletal remains. Includes determining time since death, the biological profile, trauma analysis and the role of the forensic anthropologist in human rights investigations.

ANTH 160. Linguistic Anthropology.**3 Units****Prerequisite(s):** ANTH 4 or instructor permission.**Term Typically Offered:** Fall, Spring

Introduction to language and linguistics for anthropologists with emphasis on the role of linguistic anthropology in the development of theory and method within the discipline; non-human communication systems, language acquisition, and culture theory; the fundamentals of descriptive and structural linguistics; types of human languages; the diversity and distribution of languages from prehistoric to modern times; fundamentals of historical linguistics and proto-cultural studies.

ANTH 161. African Cultures and Societies.**3 Units****Prerequisite(s):** ANTH 146 or instructor approval**Term Typically Offered:** Fall, Spring

Explores the cultural richness and regional variation of African societies. Engages students with central issues and debates pertaining to Africa in relation to the deepening global interconnectedness of the human socio-cultural worlds. Topical discussions include: colonial legacy, the postcolonial state and traditional authority; ethnic identity and cultural diversity; family, kinship and the African youth; masculinity, sexuality and women; Islam, Christianity and indigenous spirituality; health, poverty and development; migration and globalization; ecotourism and African cultures.

ANTH 162. Language and Culture.**3 Units****Prerequisite(s):** ANTH 4 or instructor permission.**Term Typically Offered:** Fall, Spring

Relationship between language and culture; historical relationships between languages; language families and major cultural traditions; cross-cultural studies of how the language influences perception and the organization of reality; the ways in which language is embedded in social life and practices, and the ways in which various cultural patterns and values are reflected in language.

ANTH 163. Urban Anthropology.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Overview of both anthropological method and theory applied to research of urban environments and a survey of significant anthropological studies that have been conducted in these settings. Examines such topics as the urbanization process, the culture of cities, urban sub-cultures, social problems in urban areas, social networks and adaptive kinship strategies in cities, and the concentration and exercise of power, wealth and influence in urban centers.

ANTH 164. Culture Change.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Anthropological study of mechanisms and process of social and culture change; basic theories of ecological adaptation and cultural evolution; action chains and cultural patterns; technological innovation, migration, acculturation, cultural dissonance, conflict, and cultural revitalization; analysis of case studies emphasizing contemporary conditions and problems; rapid technological innovation, population control, immigration and acculturation, social diversification, ethnic conflict.

ANTH 165. Applied Anthropology.**3 Units****Prerequisite(s):** ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176; and Anthropology (Culture, Language, and Society) concentration.**Term Typically Offered:** Fall, Spring

Provides tools for exploring the application of an anthropological paradigm to various aspects of culture change and conflict. Content is organized into a series of critical topical areas such as modernization, economic development, human services, and urbanization.

ANTH 166. Rise of Religious Cults. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring, Summer

Examination of cult movements, involving comparisons of the ideals, objectives and symbolic processes common to ecstatic religious movements throughout the world -- from Melanesian cargo cults to the Peoples' Temple. Anthropological perspectives are used to examine religious cults as conscious attempts to perpetuate traditional values and social goals or to radically change the status quo; millenarian movements, crisis cults, nature communes, exotic religious importations, and cult characteristics of modern secular movements.

ANTH 167. Religion and Culture. 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring

Examines ethnographic perspectives on the character and intersections of religion, ritual, and culture. Surveys the thought of "classical" social theorists (e.g., Durkheim, Tylor, Weber, and Evans-Pritchard), and concentrates on central topics in the anthropology of religion. Including the political nature of embodiment and trance, religion and nationalism, the significance of language and performance, the gendered character of many religious phenomena, and science and religion as competing epistemologies.

ANTH 168. Folklore in Anthropological Perspective. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring

Anthropological contributions to the study of folklore; survey of oral literature and other folklore forms, such as myth, folktale, legend, proverb, riddle, and games, in their social contexts; folklore as "autobiographical ethnography;" folklore in everyday life, survey and comparison of folklore traditions in several culture areas.

ANTH 169. Research Methods in Linguistic Anthropology. 3 Units
Prerequisite(s): ANTH 160 or ANTH 162, and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring

Consideration of language in its social context: language and power, language and gender, interethnic communication, language and race, pidgins and creoles, multilingualism, standardization, language ideology. Instruction in ethnographic and linguistic methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory.

ANTH 170. The Religious Landscape of the Sacramento Valley. 3 Units
Prerequisite(s): GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring

Introduction to the field study of religious communities. Addresses the nature of religious pluralism in the U.S. today. The practice and belief systems of at least five different religious communities will be studied each semester. Students are required to do an in-depth term project based on research in one or more religious communities.
 Cross Listed: HRS 170; only one may be counted for credit.

ANTH 171. Bioarchaeology: Analyzing Human Remains from Archaeology Sites. 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A or instructor permission
Term Typically Offered: Fall, Spring

An exploration of research conducted on human remains from archaeological sites, including historical and ethical perspectives. Examines the effects of funerary context and preservation on skeletal remains. Demonstrates relevance of human skeletal analysis to understanding demography, causes of human skeletal variation, dietary patterns, and relevant themes in paleopathological research. Special emphasis placed on infectious disease, growth and development, activity patterns, injury and trauma, craniofacial adaptations, and methods for identifying genetic relationships in human skeletal remains.

ANTH 172. Anthropologies of Music. 3 Units
Prerequisite(s): ANTH 146 or Instructor Permission.
Term Typically Offered: Fall, Spring

Introduces students to current anthropological research on social groups and cultural practices that orient around and draw inspiration from music, wherever and however it is conceived. Course focus is not on music theory or structure; rather, it critically examines anthropological and ethnographic works that focus on the relations among such social domains and features as visual and aural aesthetics, political belief, gender, ritual, religion, race, and ethnicity.

ANTH 173. Anthropology of Contemporary Asia. 3 Units
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ANTH 174. Anthropology of Food. 3 Units
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.

ANTH 175. Anthropology of Globalization. 3 Units
Prerequisite(s): ANTH 146 or instructor permission
Term Typically Offered: Fall, Spring

The course introduces students to major themes that inform anthropological understanding of globalization. This course will explore theoretical perspectives, topics, and methods of analysis developed in anthropology to capture the effects of intermingling global/local cultural forces and the diverse relations of power that structure them and in which they are embedded.

- ANTH 176. Museums, Culture, and Society.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Provides an introduction to museum anthropology. Surveys the emergence of modern anthropology from its origins in 17th century natural history to its late 19th century institutionalization in museums. Explores the role of collectors, curators and financial patrons in the development of museums and social theory. Examines the contemporary poetics and politics of museums and cultural interpretation, including cultural property rights, cultural self-representation, collaborative exhibit development, and the ethnography of museums.
- ANTH 177. Museum Methods.** 3 Units
Prerequisite(s): ANTH 176 and Anthropology (Culture, Language, and Society) concentration.
Term Typically Offered: Fall, Spring
- Combined lecture and laboratory course designed to teach basic museum methods. Surveys contemporary issues and practices in museum governance, management, interpretation, and evaluation. Provides hands-on collections and exhibit experience, including participation in the design, fabrication and installation of an exhibition.
- ANTH 178. Internship.** 3 - 4 Units
Term Typically Offered: Fall, Spring
- Practical experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.
Note: May be repeated for credit.
- Credit/No Credit
- ANTH 181. Anthropology of Human Rights.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Examines multiple dimensions of human rights from an anthropological perspective. Explores the history and development of human rights ideas and legal conventions, and how these ideas and conventions are appropriated, adapted, contested or rejected in different cultural and political contexts. Using ethnographic case studies from around the world, addresses how the human rights discourse mediates the relationship between specific groups of people, their national states and international conventions and institutions.
- ANTH 183. Women Cross-Culturally.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Position of women in various societies, preliterate through contemporary industrial; the evolution of women's roles and rights cross-culturally.
- ANTH 186. Culture and Poverty.** 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
- Analyzes poverty in American society: the cross-cultural context, social inequality in the U.S., theoretical perspectives and their influence on policy, present trends and implications for the future.
- ANTH 188. Anthropology of the Body.** 3 Units
Term Typically Offered: Fall, Spring
- Study of the diverse ways that humans explain and attempt to alter the human body. Focus is on the meanings and implications of our own bodily experiences through objective comparison of the experiences, explanations and techniques found in our society with those in others.
- ANTH 190. Advanced Topics in Linguistic Anthropology.** 3 Units
Prerequisite(s): ANTH 160 or ANTH 162 or instructor permission.
Term Typically Offered: Fall, Spring
- Seminar examining contemporary developments in theories and methods of linguistic anthropology.
Note: May be repeated for credit providing the topic and instructor are not the same.
- ANTH 191. Anthropology Practicum.** 3 Units
Prerequisite(s): ANTH 165 or ANTH 169 or ANTH 177 or ANTH 192B; and senior level
Term Typically Offered: Fall, Spring
- Students work 3-6 hours per week off campus in one of several research institutions under the supervision of institutional personnel. Students are required to become familiar with the scholarly literature relevant to their placement, to participate in on-campus meetings, and to write a research paper integrating the research and fieldwork aspects of the practicum. Permission of instructor and ANTH coordinator required prior to registration. Open to seniors only.
- ANTH 192A. Laboratory Work in Archaeology.** 1 Unit
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 195A; may be waived with instructor permission.
Term Typically Offered: Fall, Spring
- Introduces methods used in the basic laboratory preservation, cataloging, and initial analysis of various materials recovered through ANTH 195A survey and excavation projects; always offered in conjunction with ANTH 195A.
Note: May be repeated for credit.
- ANTH 192B. Laboratory in Ethnographic Techniques.** 1 Unit
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 195B.
Term Typically Offered: Fall, Spring
- Design and discussion of research strategies, primary ethnographic techniques, the development of interviewing skills, and practice in the use of various recording technologies.

- ANTH 195A. Fieldwork in Archaeology.** 2 Units
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring
- Introduction to archaeological field methods, covering practical aspects of how to identify and investigate isolated artifact finds, particular sites and features, and entire landscapes. Covering survey and excavation techniques, basic approaches to sampling, mapping and navigation, stratigraphic excavation, artifact and feature recording, and recovery methods.
Note: May be repeated for credit.
- ANTH 195B. Fieldwork in Ethnology.** 2 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring
- Directed team fieldwork in ethnology.
- ANTH 195C. Fieldwork in Physical Anthropology.** 2 - 3 Units
Term Typically Offered: Fall, Spring
- Individual or group fieldwork in various areas of physical anthropology, under the supervision of individual faculty members; may involve related supervised laboratory work.
- ANTH 196S. Senior Seminar in Anthropology.** 3 Units
Prerequisite(s): Anthropology majors with senior standing
Term Typically Offered: Fall, Spring
- Anthropology approaches knowledge about the human condition from multidisciplinary perspectives. This senior seminar synthesizes fundamental themes from among the sub-disciplines. Students will engage with concepts and issues from different anthropological perspectives, and then work to identify common historical, methodological and theoretical anthropological themes. On completion of the course, students will have learned to seek and interpret anthropological knowledge in a holistic fashion.
- ANTH 196T. Zooarchaeology.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- An examination of past and recent research conducted on animal remains from archaeological sites. Discussion and survey of the primary literature in evaluating the role animal exploitation plays in human evolution and among small scale foraging, pastoralist, and complex societies. Emphasis on vertebrate taphonomy, reconstruction of diet from faunal remains, and ecological and evolutionary theory to understand human-animal relationships through time.
- ANTH 199. Special Problems.** 1 - 3 Units
Prerequisite(s): Approval of the faculty member under whom the individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work. May be repeated for credit.
- Credit/No Credit
- ANTH 200. General Methods in Anthropology.** 3 Units
Term Typically Offered: Fall, Spring
- Explores uses of scientific methodology in anthropology through the examination of specific case studies in the various specialties. Focus is on the relationship among techniques, methods, and methodology; hypothesis and theory; units of analysis and comparison; deductive and inductive reasoning; inferential processes; various types of comparison (casual, controlled, hologicistic); limitations of, and objections to, "the comparative method."
- ANTH 201. Anthropological Theory.** 3 Units
Prerequisite(s): Graduate status in anthropology or instructor permission.
Term Typically Offered: Fall, Spring
- Intensive reading and seminar discussion in topics on anthropological theory and research.
Note: May be repeated for credit provided topic is not repeated.
- ANTH 202. Biological Anthropology Seminar.** 3 Units
Term Typically Offered: Fall, Spring
- Survey of contemporary issues in physical anthropology.
- ANTH 203. Archaeology.** 3 Units
Term Typically Offered: Fall, Spring
- Explores the intellectual development of archaeological method and theory; examines the history of archaeological thought from its advent to the present day, looking in detail at pre-scientific, culture-historical, processual, and post-processual approaches to the discipline; emphasis is placed on the role of archaeology as a branch of anthropology and as a historical, humanistic, and/or scientific enterprise.
- ANTH 204. Current Problems in Archaeological Method and Theory.** 3 Units
Term Typically Offered: Fall, Spring
- Explores recent methodological and theoretical developments within archaeology; focus is on contemporary debates within the discipline; topical coverage varies; examines conceptual and practical concerns, highlighting possibilities and limitations of new approaches to archaeological problems.
Note: May be repeated for credit provided topic and instructor are not repeated.
- ANTH 205. Ethnology.** 3 Units
Term Typically Offered: Fall, Spring
- Seminar is designed for students to develop a working knowledge of anthropological approaches to a number of major issues in ethnology. The focus is on the analysis of case studies.
Note: May be repeated once for credit with different instructor.
- ANTH 207. Language and Culture.** 3 Units
Term Typically Offered: Fall, Spring
- Critical examination of contemporary studies in the relationship between language and culture; nonhuman primate communication and the origin of speech; non-verbal communication; historical linguistics; comparative semiology; ethnosemantics; applications of linguistic models of analysis in the study of culture.
Note: May be repeated for credit given that the instructor changes.

ANTH 210. Research Design in Anthropology Seminar. 3 Units
Prerequisite(s): Graduate student status or instructor permission
Term Typically Offered: Fall, Spring

Emphasizes research design in anthropology with a focus on proposal writing in the discipline. Centers on the development of the thesis research proposal while gaining insight on the process of acquiring competitive funding from government agencies and private foundations. Covers the fundamentals of identifying a research question, developing hypotheses, comprehensive literature reviews, intellectual merit and broader impacts of research, and budget justification.

ANTH 222. Bioarchaeology Seminar. 3 Units
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring

Provides an intensive, detailed discussion of method and theory in the skeletal biology of past human populations. Topics discussed include: demography, dietary analysis, mortuary dimensions, health and disease, biological distance and DNA analysis. Focuses on the interaction of biology and behavior, particularly the influence of culture and the environment on the skeletal and dental tissues.

ANTH 223. Areal Archaeology. 3 Units
Term Typically Offered: Fall, Spring

Provides an intensive examination of archaeological problems within a selected regional or topical area. Through general readings and case studies, students will critically assess how current perspectives regarding relevant issues have evolved and determine how contemporary viewpoints might be improved or expanded.

Note: May be repeated for credit provided topic and instructor are not repeated.

ANTH 226. Advanced Techniques of Archaeological Analysis. 3 Units
Prerequisite(s): ANTH 126 or instructor permission.
Term Typically Offered: Fall, Spring

Examines more refined approaches to archaeological analysis, focusing on how various classes of data are collected, classified, and interpreted to resolve directed research problems. Emphasis is on such topics as sampling procedures and statistical assessment of data rather than descriptive analysis and interpretation. Lecture one hour; laboratory six hours.

ANTH 251. Human Paleontology. 3 Units
 Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and the relationships of the extinct forms of humans.

ANTH 258. Human Skeletal Analysis. 4 Units
Prerequisite(s): ANTH 150 or instructor permission.
Term Typically Offered: Spring only

Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ancestry; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Course format is a three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.

Cross listed: ANTH 158

ANTH 274. Environmental Anthropology. 3 Units
Term Typically Offered: Fall, Spring

Examines the mutual constitution of nature-culture, society-environment in diverse ethnographic settings. Demonstrates that ideas about nature and material engagements with it are shaped by the dynamics of social, political, and economic relations in historical contexts. Surveys a range of environmental issues and the cultural politics of environmental struggles through different conceptual, theoretical, analytical approaches in cultural anthropology.

ANTH 276. Museum Anthropology. 3 Units
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring

Surveys the practical, theoretical, and historical dimensions of museum anthropology and material culture studies, with particular emphasis on the U.S. and California. Situates contemporary issues related to the collection, exhibition, and repatriation of ethnographic and archaeological materials within the sociopolitical context of the globally based indigenous rights movement.

Note: Recommended for graduate students who plan to intern in the Anthropology Museum.

ANTH 278. Internship. 3 - 4 Units
Term Typically Offered: Fall, Spring

Practical graduate level experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.

Note: May be repeated for credit given that topic and instructor changes.

Credit/No Credit

ANTH 292A. Laboratory Work in Archaeology. 1 Unit
Prerequisite(s): ANTH 192A.
Corequisite(s): ANTH 295A.
Term Typically Offered: Fall, Spring

Laboratory preservation, cataloging and initial analysis of materials recovered through archaeological fieldwork. Graduate students are expected to help supervise undergraduate students and complete a self-directed project under the supervision of the instructor.

Note: Participant must have already completed ANTH 192A or its equivalent. May be repeated once for credit.

ANTH 295A. Fieldwork in Archaeology. 2 Units
Prerequisite(s): ANTH 195A or equivalent.
Corequisite(s): ANTH 292A.
Term Typically Offered: Fall, Spring

Students will assist the instructor in supervising undergraduate students or complete an assigned project in addition to the required fieldwork.
Note: May be repeated given that the topic and instructor changes.

ANTH 295B. Fieldwork in Ethnology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Supervised graduate level fieldwork in ethnology and ethnography.

ANTH 295C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Supervised graduate level fieldwork in physical anthropology. May include laboratory research.

ANTH 299. Special Problems. 1 - 3 Units

Prerequisite(s): Approval of faculty member under whom individual work is to be conducted and the Department chair.

Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work at the graduate level; May be repeated given that topic and instructor changes; May be taken twice in the same semester.

Credit/No Credit

ANTH 500. Master's Thesis. 3 Units

Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.

Term Typically Offered: Fall, Spring

Completion of a thesis approved for the master's degree. Number of units of credit is determined by the candidate's Master's degree advisory committee. Should be taken in final semester prior to the completion of all requirements for the degree.

BA in Anthropology (Archaeology and Biological Anthropology)

Units required for Major: 52, includes units of study in chosen concentration

Total units required for BA: 120

Program Description

The Archaeological and Biological Anthropology concentration provides students with the knowledge, skills and perspectives of scientific anthropology. It prepares students for careers in the anthropological sciences, such as cultural resources management, skeletal identification, zoological or museum technicians, or for graduate training.

Minimum Grade Requirement

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (13 Units)		
ANTH 1	Introduction to Biological Anthropology ¹	3
ANTH 1A	Biological Anthropology Laboratory ¹	1
ANTH 2	Introduction to Cultural Anthropology	3
ANTH 3	Introduction to Archaeology ¹	3
ANTH 4	Language, Culture, and Critical Thinking ¹	3
Upper Division Core Requirements (12 Units)		
ANTH 146	Ethnographic Analysis	3
ANTH 162	Language and Culture	3
Select one of the following:		3
ANTH 111	California Archaeology	
ANTH 112	Great Basin Archaeology	

ANTH 113	Prehistory of the Southwest	
ANTH 114	North American Prehistory	
ANTH 122	The Evolution of Early Mesoamerican States	
Select one of the following:		3
ANTH 151	Human Paleontology	
ANTH 155	Fundamentals of Biological Anthropology	
ANTH 157	Human Variation	
Additional Requirement (3 Units)		
Anthropology majors select one statistics course ^{1,2}		3
Additional Requirements for Concentrations (24 Units)		
Select one of the following:		24
Archaeology & Biological Anthropology Concentrations		
Culture, Language & Society Concentration		
General Anthropology Concentration		
Total Units		52

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² e.g. STAT 1, or one approved by the Department.

Concentration in Archaeology & Biological Anthropology (24 units)

Code	Title	Units
Required Upper Division Courses (18 Units)		
<i>Archaeology Theory</i>		
Select one of the following:		3
ANTH 107	Anthropology of Hunters and Gatherers	
ANTH 109	Ecological and Evolutionary Approaches to Anthropology	
ANTH 110	Archaeological Method and Theory	
ANTH 115	Origins of Agriculture	
<i>Theory in Biological Anthropology</i>		
Select one of the following:		3
ANTH 151	Human Paleontology (If not taken as a core course)	
ANTH 154	Primate Behavior	
ANTH 156	Evolution of Human Behavior	
ANTH 157	Human Variation (If not taken as a core course)	
<i>Laboratory Methods</i>		
Select one of the following:		3
ANTH 119	Analysis of Faunal Remains	
ANTH 120	Introductory Statistics for Anthropologists	
ANTH 124	Environmental Archaeology	
ANTH 126	Techniques of Archaeological Analysis	
ANTH 150	Human Osteology	
ANTH 192A	Laboratory Work in Archaeology	
ANTH 195A	Fieldwork in Archaeology	
<i>Breadth Requirement</i>		
Select three from all the upper division courses listed above plus the following:		9
ANTH 116	Old World Prehistory: Paleolithic Archaeology	
ANTH 123	Ancient Technology	

ANTH 127	Cultural Resource Management in Theory and Practice	
ANTH 128	Indians of California	
ANTH 135	Indians of North America	
ANTH 152	Primate Adaptations	
ANTH 153	Evolutionary Medicine	
ANTH 158	Human Skeletal Analysis	
ANTH 171	Bioarchaeology: Analyzing Human Remains from Archaeology Sites	
General Electives (6 Units)		
Select any two upper division courses from Anthropology or any related discipline with approval from Major Advisor.		6
Total Units		24

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6 Units)		
A1 - Oral Communication		3
A2 - Written Communication		3

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Anthropology (Culture, Language and Society)

Units required for Major: 52 units, includes units of study in chosen concentration

Total units required for BA: 120

Program Description

The Culture, Language & Society concentration develops knowledge, skills and perspectives to understand and engage with our diverse, interconnected world. It is designed to meet the needs of students who wish to pursue graduate work or post-baccalaureate careers in government, the non-profit sector, education, healthcare or other contexts that require attention to cultural and linguistic dynamics.

Minimum Grade Requirement

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ²		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Anthropology (General Anthropology)

Units required for Major: 52-53 units, includes units of study in chosen concentration

Total units required for BA: 120

Program Description

The General Anthropology concentration introduces students to the fundamentals of archaeological, biological, sociocultural and linguistic anthropology. It constitutes a good liberal arts foundation that will help students pursue advanced studies and/or careers in diverse fields.

Minimum Grade Requirement

Except for General Electives, all requirements must be completed with a grade of "C-" or better.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (13 Units)		
ANTH 1	Introduction to Biological Anthropology ¹	3
ANTH 1A	Biological Anthropology Laboratory ¹	1
ANTH 2	Introduction to Cultural Anthropology	3
ANTH 3	Introduction to Archaeology ¹	3
ANTH 4	Language, Culture, and Critical Thinking ¹	3

MA in Anthropology

Total units required for MA: 30

Program Description

The Master of Arts program in Anthropology is designed for students who plan to continue their graduate studies in Anthropology at the Ph.D. level as well as for students who plan to pursue any of the numerous opportunities for graduate anthropologists, such as in private research, cultural resource management, private foundations, Foreign Service, education, and government.

The program provides general graduate-level training in four interrelated fields: sociocultural anthropology, archaeology, biological anthropology, and linguistic anthropology. Beyond this foundation, each student designs a plan of coursework specific to their post-graduate goals in one of the four subfields. Students are then expected to demonstrate mastery of their subfield by preparing a thesis of original scholarly research.

Following admission to classified standing, each student is assigned a temporary advisor to determine the scope of his/her interests and academic background and to establish the plan for elective coursework. After the graduate interview, the student forms a Thesis Committee composed of a graduate advisor and at least one additional member of the Anthropology faculty. The responsibility of the Thesis Committee is to provide general academic advice and to guide the student in conducting research, preparation for the preliminary exam, developing the thesis proposal, and writing the thesis.

Students may develop their special interests through individual arrangements with their faculty advisors, or they may take advantage of opportunities for special training in such areas of Applied Anthropology as cultural resource management, museology, Anthropology in education, and medical Anthropology through participation in ongoing informal programs which may include special field work or intern placement with local agencies. Prospective students should visit the department website or contact the Graduate Coordinator for updated information on special opportunities.

Admission Requirements

Admission to classified graduate standing in Anthropology requires:

- a baccalaureate degree;
- a minimum 3.0 GPA for the last 60 units attempted.

Applicants lacking an undergraduate degree in anthropology may be conditionally accepted upon satisfactorily completing a set of prerequisite upper-division coursework based on the applicant's interests and goals in anthropology.

Admission Procedures

Graduate students are considered twice a year for admission for the fall and spring semester. To apply, applicants must complete a university application and a separate departmental application by the posted application deadline dates. Please submit the following to the Sacramento State Office of Graduate Studies:

- an online application for admission via CalState Apply;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*, should be sent to:

Office of Graduate Studies
River Front Center 215
6000 J Street
Sacramento, CA 95819-6112

- official Graduate Record Exam (GRE) official scores

For more admissions information and application deadlines, please visit <http://www.csus.edu/gradstudies/>.

At the same time, each applicant must file online with the Anthropology Department:

- a completed Supplemental Application Form
- a statement of intent describing academic background and present interests
- two signed letters of recommendation on official letterhead from individuals who can assess the applicant's potential for graduate study

For more information regarding the department supplemental application, please visit <https://www.csus.edu/anth/>

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level Anthropology courses with a minimum 3.0 GPA;
- completed an approved draft of the thesis research proposal; and
- successfully passed a preliminary exam in their area of study
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Students should contact the Graduate Coordinator for current deadlines.

Note: Students may not enroll in ANTH 500 until Advanced to Candidacy, successful completion of thesis research proposal, and chair permission of his/her thesis committee. Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a program of study in consultation with his/her Anthropology faculty advisors. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

Code	Title	Units
Core Seminars (6 Units) ¹		
Select the seminar below in your area of study plus one additional core seminar:		6
ANTH 202	Biological Anthropology Seminar	
ANTH 203	Archaeology	
ANTH 205	Ethnology	

ANTH 207	Language and Culture	
Elective Graduate Seminars (9 Units)		
Select three of the following graduate seminars or additional core seminars listed above (with thesis advisor approval): ²		9
ANTH 200	General Methods in Anthropology	
ANTH 201	Anthropological Theory	
ANTH 204	Current Problems in Archaeological Method and Theory	
ANTH 222	Bioarchaeology Seminar	
ANTH 223	Areal Archaeology	
ANTH 258	Human Skeletal Analysis	
ANTH 274	Environmental Anthropology	
ANTH 276	Museum Anthropology	
Elective Graduate Course (3 Units)		
Select any additional 200-level course or seminar with the exception of ANTH 278, ANTH 292, ANTH 295, and ANTH 299.		3
General Electives (9 Units)		
Select any three elective graduate courses listed above or any upper division courses from the Anthropology major or a related discipline with approval from thesis advisor. ³		9
Culminating Requirement (3 Units)		
ANTH 500	Master's Thesis ⁴	3
Total Units		30

¹ Grade "B-" or better required in each course listed.

² ANTH 200, 201, 204, and 223 may be repeated under different instructor or topic.

³ Specific electives must be approved in advance by the student's Thesis Committee. For paired undergraduate-graduate lecture courses, graduate students must enroll at the 200-level. Graduate students who completed the 100-level paired course as an undergraduate may not retake the same course at the 200-level. No more than six semester units of paired coursework may count towards the degree. No more than six semester units of approved course credit from another department may be accepted towards general electives. No more than 3 units of ANTH 278 or ANTH 299 may be applied to the MA. ANTH 278 and ANTH 299 courses that have passed the seven-year University limit may not be applied to the MA.

⁴ Students may not enroll in ANTH 500 until Advancement to Candidacy, successful completion of the thesis research proposal, and chair permission of his/her thesis committee. Students who do not finish their thesis within the semester of enrollment in ANTH 500 must enroll in ANTH 599 for up to three consecutive semesters to sustain their graduate standing. Students must re-enroll in ANTH 500 if they do not complete the thesis within four semesters.

Minor in Anthropology

Units required for Minor: 18, twelve of which must be in upper division

Program Description

Anthropology is the study of humans, past and present. Anthropologists take a broad approach to understanding the varieties of human experience, which uniquely places us at the juxtaposition of the social sciences, natural sciences and the humanities. Anthropology is traditionally organized into four subfields that offer distinctive skills.

Program Requirements¹

Code	Title	Units
ANTH 178	Internship	3 - 4
ANTH 195A	Fieldwork in Archaeology	2
ANTH 195B	Fieldwork in Ethnology	2
ANTH 195C	Fieldwork in Physical Anthropology	2 - 3
ANTH 199	Special Problems	1 - 3

¹ There are no specific course requirements. However, no more than 3 units of the courses below may be counted toward the minor.

Asian Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training. Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

The minor offers students a framework to explore one or more Pacific Asian societies from an interdisciplinary perspective. It is particularly relevant for students in various academic or applied disciplines who have a regional interest in Pacific Asia.

Degree Programs

BA in Asian Studies (Chinese Studies) (p. 862)

BA in Asian Studies (Japanese Studies) (p. 864)

BA in Asian Studies (Korean Studies) (p. 866)

BA in Asian Studies (South and Southeast Asian) (p. 868)

Minor in Asian Studies (p. 871)

Special Features

- The program of Asian Studies is administered through the Center for Pacific Asian Studies. The Center is composed of designated faculty in the departments of Anthropology, Art, Education, Ethnic Studies, World Languages and Literatures, Government, History, Humanities and Religious Studies, Philosophy, and Psychology.

- A program committee, comprised of the director of the center and four members of the Asian Studies faculty, oversees the Asian Studies Program.
- The Center also serves to support and facilitate various university activities related to furthering our understanding of the Pacific Asian region (as well as the Indian subcontinent and other regions of Asia): faculty research, sponsoring summer training institutes, travel and residential programs in Pacific Asia, seminars for faculty, students and the community, and establishing collaborative links with institutions and community groups.

ASIA 96. The Way of Chanoyu: An Interdisciplinary Approach to the Japanese Tea Gathering. **3 Units**
Term Typically Offered: Fall, Spring

This course traces the development of a multifaceted cultural practice integrating architecture, garden design, art, painting, and calligraphy into a carefully constructed hospitality ritual. Students explore multiple aspects of Japanese Chado via hands-on learning including aesthetic, economic, scientific, socio-political and cultural dimensions associated with tea. The course is taught in the Nakatani Tea Room, including weekly classroom lectures and discussions, demonstrations, on-line learning modules, a group project, and typically, a day field trip to San Francisco. Field trip(s) may be required.

ASIA 110. Anthropology of Contemporary Asia. **3 Units**

Prerequisite(s): ANTH 146 or instructor permission

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ASIA 134. History of Korea: Antiquity to Present. **3 Units**

Term Typically Offered: Fall only

This course traces the historical development of Korean culture from the period the Three Kingdoms to the present. In addition to the texts and records, other sources such as literature, religion, and art will be examined to gain an understanding of and appreciation for the longevity of Korea as a culture and a polity.

ASIA 135. Contemporary Korean Culture. **3 Units**

Term Typically Offered: Spring only

This course provides a comprehensive understanding of Korean culture and society through the analysis of contemporary Korean popular media. By critically examining the particular cultural phenomenon of the Korean Wave, this course upholds various Korean popular media (film drama, documentaries, and music) as significant forms of visual culture, which reflect as well as shape the reality of people's everyday lives both within and outside Korea.

ASIA 136. Korean Development and Behavior. **3 Units**

This course examines critical issues in Korean human development and behavior with particular attention given to current theoretical perspectives within a fast developing society. Topics include identity, cognitive development, mental health, tiger parenting, gender roles, socio-emotional development, body image, and transracial adoptions. This course integrates an interdisciplinary approach and includes indigenous discourse on Confucianism and Eastern and Western thought to understand the underlying processes of the Korean heritage person as an individual and as a member of a larger society.

ASIA 140. Modern East Asian Cinema. ✎**3 Units**

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Arts (Area C1), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring, Summer

Survey of the development of cinema in Asia, focusing primarily on cinematic masterpieces from China, Hong Kong, and Japan. Focuses on directors, actors, and studios that left a lasting mark on cinema history. Also focuses on how the Asian aesthetic sense differs from the Hollywood norm.

Cross-Listed: HIST 140; only one may be counted for credit.

ASIA 151. Genocide in Southeast Asia.**3 Units**

Term Typically Offered: Fall, Spring

Survey of human rights abuses and genocides that have occurred in post-colonial Southeast Asia. Focuses on mass killings in Indonesia and Cambodia and communal riots often targeting the ethnic Chinese community, religious minorities, or highland peoples like the Hmong. Topics include cultural genocide, ideological pressure, and ethnic intolerance. An interdisciplinary literature will interpret the causes and conditions while introducing students to the diverse societies and cultures of Southeast Asia.

ASIA 195. Internship: Asian Studies.**1 - 3 Units**

Term Typically Offered: Fall, Spring

Supervised work experience on topics related to the study of Asia's art, culture, economics, geography, environment, politics, and government and social issues.

Credit/No Credit

ASIA 198. Asia in the World Today.**3 Units**

Prerequisite(s): Instructor permission.

Term Typically Offered: Spring only

Senior seminar in recent scholarship and current issues concerning Asia in the world today. A capstone course for Asian Studies majors, as well as graduate students interested in Asia.

ASIA 199. Special Problems.**1 - 3 Units**

Term Typically Offered: Fall, Spring

Individual research projects, including directed readings, under the direction of an Asian Studies faculty person.

Credit/No Credit

BA in Asian Studies (Chinese Studies)

Units required for Major: 36¹

Total units required for BA: 120

¹ These 36 units include 12 units of study in a student's chosen concentration and units equivalent to the last two semesters of an Asian language appropriate to student's concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages (see below)

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreaes, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training.

Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Asian Studies (Japanese Studies)

Units required for Major: 361

Total units required for BA: 120

¹ These 36 units include 12 units of study in a student's chosen concentration and units equivalent to the last two semesters of an Asian language appropriate to student's concentration by coursework or a language proficiency examination provided by the Department of Foreign Languages (see below)

Program Description

Pacific Asia, including the nation states on the Asian shores of the Pacific Rim, the Koreas, Japan, China, Taiwan, the Philippines, Vietnam, Cambodia, Thailand, Myanmar, Laos, Malaysia, Singapore, Brunei Darussalam, and Indonesia, is a region of great economic, political and strategic importance, possessing immense natural and human resources.

The major is designed to provide students with a coherent introduction to the language, history, and culture of Asian societies on the western rim of the Pacific Basin. While focusing on Pacific Asia, the program also supports the study of cultures from the Indian subcontinent and other regions of Asia. Each concentration provides an interdisciplinary understanding of the major social and historical forces at work in the region, supported by appropriate language training.

Graduates of the program either continue their studies at graduate institutions or utilize their knowledge and training through employment in government, business or education relating to this increasingly important region of the world.

Minor in Asian Studies

Units required for Minor: 24, twelve of which must be in upper division

Program Description

The minor offers students a framework to explore one or more Pacific Asian societies from an interdisciplinary perspective. It is particularly relevant for students in various academic or applied disciplines who have a regional interest in Pacific Asia.

Program Requirements

Code	Title	Units
Course Requirements (12 Units)		
ART 3A	Traditional Asian Art	3
or ART 3B	Modern and Contemporary Asian Art	
ASIA 198	Asia in the World Today	3
or HIST 192C	Seminar in Recent Interpretations of Asian History	
HIST 6	Asian Civilizations	3
POLS 145	Asian Politics	3
or MUSC 119A	World Music: Asia	
Electives (12 Units)		
Select 12 units of electives from four different groupings listed under the major		12
Language Proficiency		
Language proficiency is not required for the minor; however, students are highly encouraged to study an Asian language.		
Total Units		24

California Studies

Department of Public Policy Administration

Program Description

California Studies is an interdisciplinary program designed to provide an understanding of California's institutions, culture, and environment in a manner that will be occupationally and academically useful to students

in a variety of majors. With the state's central role as a gateway to the Pacific basin, substantial knowledge of California will be necessary for those preparing to engage in commerce and international trade. In addition, for students who are planning careers in the public sector, the California Studies minor will furnish background applicable to their future employment.

Economics

College of Social Sciences and Interdisciplinary Studies

Program Description

Economics is a social science that examines the functioning of markets, the determination of prices and distribution of income, and the

determination of the overall level of income and rates of unemployment and inflation. In addition, Economics deals with various social problems. The Economics major at Sacramento State is designed to provide students with a liberal education with special emphasis on the economic aspects of society, on familiarization with techniques for the analysis of contemporary economic problems, developing the ability to think critically, and to conceptualize and to possess the communication and computer skills to evaluate private and public policy issues.

The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Degree Programs

BA in Economics (p. 877)

Minor in Economics (p. 880)

Certificate in Economics Education (p. 879)

MA in Economics (p. 879)

Special Features

- Students in the Sacramento State Economics program benefit from a wide range of opportunities to work in the private and public sectors. The Economics Department offers internships for academic credit to students who are interested in the application of economics in the private and public sectors. This kind of practical experience enhances employment opportunities after graduation.
- Former Sacramento State Economics students are working at all levels of government and in many private businesses in the fields of finance, real estate, professional services, etc. Some are in the teaching profession, K-12 and community colleges, while others have continued their studies toward a Masters degree or a Ph.D. at such institutions as Notre Dame, Washington University at St. Louis, the University of Pittsburgh, University of California, Santa Cruz, Johns Hopkins University, and University of California, Davis.
- The Sacramento State Economics faculty is diverse in areas of specialization and draws upon both its advanced academic training and practical experience. Faculty members have published articles, papers, and books, and enjoy reputations as experts in their fields. Besides providing a reputable and experienced faculty, the Economics Department offers personal advising for students in the planning and meeting of academic and career goals.

Pre-Major Requirements

Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Economics Department along with transcript copies:

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

Career Possibilities

Actuary · Advertising Executive · Auditor · Bank Officer · Bond Trader · Budget Analyst · Business Forecaster · Business Manager · College Professor · Commodity Price Forecaster · Cost Analyst · Credit Analyst/ Loan Officer · Demographer · Economic Forecaster · Energy Economist · Entrepreneur · Estate Planner · Financial Analyst/Planner · Financial Officer · Government Administrator · Healthcare Administrator · Human Resources Administrator · Industrial/Institutional Buyer · Industry Analyst · Information Scientist · Insurance Salesperson · Intelligence Agent · International Trade Specialist · Journalist · Labor Relations Specialist · Lawyer · Litigation Analyst · Management Consultant/Analyst · Market Research · Analyst · Natural Resource Economist · Policy Analyst · Politician · Public Utilities Manager · Real Estate Agent/Broker · Sales Manager · Securities Salesperson/Broker · Statistician · Teacher · Technical Writer Transportation Specialist · Underwriter · Urban/Regional Planner

ECON 1A. Introduction to Macroeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introductory inquiry into the workings and interrelationships of the aggregate economic system. The primary focus is on total production and its distribution, employment and price levels, and the forces influencing them. Other considerations are the roles of government, the monetary sector, and related areas.

ECON 1B. Introduction to Microeconomic Analysis. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introductory microeconomic analysis of the workings of supply and demand in the determination of price, resource allocation, and distribution. Markets are analyzed as they affect economic efficiency and income distribution.

ECON 100A. Intermediate Macroeconomic Theory. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analysis of the determinants of the aggregate level of output, income, employment and prices.

ECON 100B. Intermediate Microeconomic Theory. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analysis of household and firm behavior as the foundation of supply and demand.

ECON 101. History of Economic Thought. 3 Units
Prerequisite(s): ECON 1A, ECON 1B.
Term Typically Offered: Fall, Spring

Analysis of the development of economic theory from the predecessors of Adam Smith through John Maynard Keynes. The contributions made to the discipline by its principal figures are compared and evaluated.

ECON 104. Introduction to the United States Economy. 3 Units
Term Typically Offered: Fall, Spring

One semester survey of the principles of economics, basic methods of economic analysis, and their application to public policy and current events.

Note: Not open to students who have had ECON 1A or ECON 1B or those majoring in economics.

ECON 110. Cost Benefit Analysis. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Examines the rationale for government provision of goods and services and presents cost-benefit analysis as a method to evaluate public participation in a market economy.

ECON 112. European Economic History. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Analysis and evaluation of the economic forces and institutions shaping European economic development through the present period. Attention will be paid to the relationship between changes in the economic environment and attendant cultural, political, and ideological developments in the stages of tribalism, slavery, feudalism, capitalism, and socialism.

ECON 113. Economic History of the United States. 3 Units
Prerequisite(s): ECON 1A or ECON 104.
Term Typically Offered: Fall, Spring

Consideration of the economic growth and development of the U.S. with emphasis on a theoretical analysis of the economic factors shaping the national destiny.

ECON 114. The California Economy. 3 Units
Prerequisite(s): ECON 1A and ECON 1B, or ECON 104.
Term Typically Offered: Fall only

Examination of the process of the development of the State's economy as well as analysis of the various public economic issues that are of contemporary concern to Californians.

ECON 120. Economics and Environmental Degradation. 3 Units
Term Typically Offered: Fall, Spring

Analyzes environmental issues as economic issues. Economics as both a cause and cure for environmental destruction.

ECON 123. Resource Economics. 3 Units
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring

Analyzes the economic based problem of exhaustion in both renewable and non-renewable resources. Emphasis is given to the optimal use of these resources over time and the effects that various market and non-market factors have on their future availability.

ECON 130. Public Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100B recommended.
Term Typically Offered: Fall, Spring

Economic analysis of the public sector and its impact on the allocation of resources and the distribution of income. Emphasis given to the economics of government expenditure and taxation.

ECON 132. State and Local Government Finance. 3 Units
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only

Analysis of the economics of state and local government finance, with an emphasis on California's fiscal system.

- ECON 135. Money and Banking.** **3 Units**
Prerequisite(s): ECON 1A and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
- Examines the role of financial markets, the banking system, and the Federal Reserve System in the economy. Included are an introduction to present value and the behavior of interest rates, analysis of money creation, and evaluation of monetary policy.
- ECON 138. Monetary and Fiscal Policy.** **3 Units**
Prerequisite(s): ECON 1A, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A and ECON 140 recommended.
Term Typically Offered: Spring only
- Analyzes the policies of central banks and fiscal authorities as they relate to the stability and growth of the macroeconomy. Examines the theoretical and empirical literature regarding the conduct of monetary and fiscal policy and applies the tools of economic analysis to understand macroeconomic policy debates.
- ECON 140. Quantitative Economic Analysis.** **3 Units**
Prerequisite(s): ECON 1A, ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
- Examination of the basics of conducting quantitative economic analysis. Included are basic concepts and methods of data analysis and research. Students will examine economic data using spreadsheets, will develop presentation skills, and be introduced to career opportunities.
- ECON 141. Introduction to Econometrics.** **3 Units**
Prerequisite(s): ECON 1A, ECON 1B, ECON 140, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade; ECON 100A or ECON 100B recommended.
Term Typically Offered: Fall, Spring
- Covers the basics of regression analysis, estimation, and forecasting.
- ECON 145. Economic Research Methods.** **3 Units**
Prerequisite(s): ECON 100A, ECON 100B, ECON 140 with a minimum "C" grade; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
- Covers the basics of conducting applied economic research: the selection of topic, literature survey, choice of research method, formulation of hypothesis, testing of hypothesis using empirical analysis, and summary and conclusions. Designed to enhance the students ability to integrate economic theory, quantitative research skills, and research.
- ECON 150. Labor Economics.** **3 Units**
Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
- Economic analysis of labor markets, with special reference to employment, wage determination, and the role of government.
- ECON 152. Economics of Education.** **3 Units**
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
- Introduction to the various aspects of the economics of education. Applies the tools of economic analysis to education policy and problem solving. Topics include cost-benefit analysis of education, the signaling vs. human capital debate, race and gender issues in education, education production functions, and financing education at the elementary, secondary, and post-secondary levels. Emphasis placed on individual and social choice in education.
- ECON 153. Health Economics.** **3 Units**
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall only
- Introduction to the field of health economics. Applies the tools of economics to the production of health and health care. Special emphasis on health care institutions, the role of industry, health care reform, and the role of government, in addition to the public provision of care to the disadvantaged.
- ECON 160. Industrial Organization.** **3 Units**
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
- Analyzes firm decision-making in a variety of market settings. Topics include pricing and output decisions, entry and exit issues, marketing strategies, horizontal mergers, vertical integration, technological change, and U.S. antitrust policy.
- ECON 161. Fundamentals of Game Theory.** **3 Units**
Prerequisite(s): ECON 1B, STAT 1, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
- An analysis of strategic games with sequential or simultaneous moves under complete information and uncertainty. Discussion of theory and techniques is combined with examination of specific classes of games and their application to real-world examples such as markets, voting, auctions, and international relations
- ECON 162. Energy Economics.** **3 Units**
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Fall, Spring
- Analyzes the structure, conduct, and consequences of domestic and international energy markets. Particular emphasis on regulated industries including petroleum, electrical, and other power sources. The economic impact on energy markets of emerging technology is examined.
- ECON 170. Public Economics and Regulation.** **3 Units**
Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade.
Term Typically Offered: Spring only
- Examination of government regulation of industry in the North American context: transportation, communication, energy, and other industries. Issues include deregulation, public ownership, pricing, and investment.

<p>ECON 180. Urban Economics. 3 Units Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade. Term Typically Offered: Spring only</p>	<p>ECON 192. International Finance. 3 Units Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade. Term Typically Offered: Fall, Spring</p>
<p>Economic analysis and appraisal of models of urban development. Includes consideration of the rise of cities, land use, unemployment, poverty, housing, urban renewal, transportation, and the local public sector.</p>	<p>Critical examination of the theories and practices of financing trade among nations. International financial and monetary theories focus on how the world and financial system works, given globalization and international economic integration.</p>
<p>ECON 181. Economics of Racism. 3 Units General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D Term Typically Offered: Spring only</p>	<p>ECON 193. Development Economics. 3 Units Prerequisite(s): ECON 1A, ECON 1B, and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade. Term Typically Offered: Fall, Spring</p>
<p>Economic analysis of the origins and development of racism, focusing mainly on its impact in the U.S. Differing theoretical explanations surrounding racism will be compared and evaluated.</p>	<p>An analysis of the factors involved in the growth of economies. The focus is on the application of development economics and growth theory to the process of economic growth in developing countries. Particular attention is given to variables that explain growth, namely, technological progress, population growth, saving, trade, human capital and education, and the role of institutions.</p>
<p>ECON 184. Women and the Economy. 3 Units Term Typically Offered: Fall only</p>	<p>ECON 195. Economic Internship. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>Investigation of the current economic status of women in the U.S., of past and present economic discrimination experienced by women in the labor market, of the historical reasons for that discrimination and of the means and methods of ending that discrimination.</p>	<p>Supervised economic-related work experience, research, or teaching assistance to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world." Credit/No Credit</p>
<p>ECON 186. Sports Economics. 3 Units Prerequisite(s): ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade. Term Typically Offered: Fall, Spring</p>	<p>ECON 196E. Behavioral and Experimental Economics. 3 Units Prerequisite(s): ECON 100B Term Typically Offered: Fall only</p>
<p>Applies the essential economic concepts and develops them with examples and applications from the sports industry. Covers basic economic concepts: economic principles, supply and demand, perfect competition, and monopoly behavior. It also applies these concepts to a variety of topics: the public finance of sports franchises, the costs/benefits of a sports franchise to a city, labor markets and labor relations, discrimination, and amateurism and college sports.</p>	<p>Introduction to the fields of behavioral and experimental economics. Applies tools of microeconomic theory to the decisions made by individuals. Special emphasis on the utility maximization hypothesis, decision making in the face of risk and uncertainty, intertemporal choice, other regarding preferences, game theory, and neuroeconomics.</p>
<p>ECON 189. Economics at the Movies. 3 Units Term Typically Offered: Fall only</p>	<p>ECON 197A. Economics Exchange Mentee. 1 Unit Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring</p>
<p>Analysis of the use and treatment of economic theory and history in popular American films. Emphasis is placed on the topics of game theory, industrial organization, entrepreneurship, law and economics, labor economics, the stock market, and American economic history. The entertainment industry will also be examined from an economic perspective.</p>	<p>Provides opportunity for lower division students, transfer students, and newly declared majors to be mentored by more advanced upper division students or graduate students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and get integrated into the Economics Department. Note: Units may not be applied towards unit requirement of the Economics major.</p>
<p>ECON 190. International Trade. 3 Units Prerequisite(s): ECON 1A, ECON 1B and MATH 24 or MATH 26A or MATH 30 with a minimum "C" grade. Term Typically Offered: Fall, Spring</p>	<p>Credit/No Credit</p>
<p>Analysis of the causes and results of trade among nations. Introduction to modern trade theory is combined with examination of trade instruments and policy analysis.</p>	

- ECON 197B. Economics Exchange Mentor.** 1 - 3 Units
Prerequisite(s): Upper division or graduate student standing and instructor permission.
Term Typically Offered: Fall, Spring
 Provides opportunity for advanced upper division students or graduate students to mentor lower division students. The peer mentoring will help students meet academic deadlines, achieve academic success, become engaged in campus activities and be integrated into the Economics Department.
Note: Units may not be applied towards unit requirement of the Economics major; May be repeated for up to 3 units credit from ECON 197A & ECON 197B combined.
 Credit/No Credit
- ECON 198. Tutoring in Economics.** 1 - 3 Units
Term Typically Offered: Fall, Spring
 Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.
 Credit/No Credit
- ECON 199. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
 Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.
 Credit/No Credit
- ECON 200A. Advanced Macroeconomic Theory.** 3 Units
Prerequisite(s): ECON 141 and ECON 200M.
Term Typically Offered: Fall, Spring
 Theories of the determinants of aggregate income, employment and prices. May be taken independently of ECON 200B.
- ECON 200B. Advanced Microeconomic Theory.** 3 Units
Prerequisite(s): ECON 200M.
Term Typically Offered: Fall, Spring
 Theories of the consumer, producer, and market structure. May be taken independently of ECON 200A.
- ECON 200C. Advanced Applied Economics.** 3 Units
Prerequisite(s): ECON 200A, ECON 200B, and ECON 241.
Term Typically Offered: Fall, Spring
 Applies empirical analysis to topics in microeconomics and macroeconomics. Topics may include stationarity, vector autoregression, vector error correction models, calibration, fixed effects, instrumental variables, multinomial logit, and duration models. Students implement these models using econometric software. Students will write an empirical paper intended to become a prospectus for the master's thesis.
- ECON 200M. Mathematics for Economists.** 3 Units
Prerequisite(s): ECON 100A, ECON 100B, MATH 26A.
Term Typically Offered: Fall, Spring
 Equips students with the mathematical techniques necessary for the study of economics and econometrics at the graduate level. Covers linear algebra, derivatives, comparative static analysis, optimization, integrals, and differential equations, with specific applications from economic and econometric theory.
- ECON 204. Business Economics.** 3 Units
Term Typically Offered: Fall, Spring
 Intensive one-semester course covering both macroeconomics and microeconomics. Emphasis is on economic analysis and policy. Designed for graduate students who have not taken ECON 1A and ECON 1B or their equivalents.
- ECON 213. U.S. Economic Development in Historical Perspective.** 3 Units
Prerequisite(s): Admission to MA program in Economics.
Term Typically Offered: Fall, Spring
 Introduction and analysis of American economic development from a historical perspective, focusing on the trajectory of American economic development from recent advances in theoretical and empirical economics literature. Cover topics on long-term economic growth, technological change, business cycles and fluctuations, financial markets, labor markets, and economic impacts of social change.
- ECON 230. Public Finance.** 3 Units
Prerequisite(s): ECON 200B.
Term Typically Offered: Fall, Spring
 An analysis of the allocation and distribution effects of government expenditures and taxation.
- ECON 238. Monetary and Fiscal Policy.** 3 Units
Prerequisite(s): ECON 200A.
Term Typically Offered: Fall, Spring
 Analyzes the policies of central bank and fiscal authorities as they relate to full employment and stability of the national economy.
- ECON 241. Applied Econometric Analysis.** 3 Units
Prerequisite(s): ECON 141
Corequisite(s): ECON 200M
Term Typically Offered: Fall, Spring
 Applied econometric analysis with emphasis on the use of econometric techniques in economic research settings, expressing economic theory in the form of econometric models, data collection, estimation, and interpretation of results. Students work individually or as a team on a current research topic from various fields of economics preselected or approved by instructor.
- ECON 251. Urban Problems, Economics and Public Policy.** 3 Units
Term Typically Offered: Fall, Spring
 Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress.
 Cross Listed: PPA 251; only one may be counted for credit.
- ECON 260. Industrial Organization and Performance.** 3 Units
Prerequisite(s): Classified graduate status in Economics or instructor permission.
Term Typically Offered: Fall, Spring
 A modern analysis of industry structure, conduct, and performance. Emphasis is placed on the use of game theory to address firm behavior, including price and output decisions, entry and exit, horizontal mergers, technological change, and marketing issues.

ECON 263. Food Economics.**3 Units****Prerequisite(s):** Graduate standing or instructor permission.**Term Typically Offered:** Fall, Spring

Introduction to advanced economic theory and econometric methods applied to the economics of food with emphasis on food consumption and the complexity of individual food choices. Utilizing cost-benefit analyses and concepts like constrained utility maximization, household production, opportunity costs of time, and information search, implications for a global food system will be derived. We will apply learned concepts to health and environmental concerns by discussing the recent applied economics and policy evaluation literature.

ECON 265. Cost Benefit Analysis.**3 Units****Term Typically Offered:** Fall, Spring

Examination of the theories, foundations, and philosophies of economic welfare. Specifically, the basic techniques of cost-benefit analysis will be presented and applied to various policy issues.

ECON 290. International Trade.**3 Units****Prerequisite(s):** Classified graduate status in Economics or instructor permission.**Term Typically Offered:** Fall, Spring

Analysis of modern trade theories, their empirical relevance, and the role of multinational firms in the evolution of international trade patterns. Discussion focuses on theoretical and empirical evaluation of trade policy instruments. Various trade agreements are also discussed in the context of economic integration and globalization. Attention is also given to foreign direct investment as a vehicle of globalization and the challenges it poses to both multinational firms and host countries.

ECON 295. Economic Internship.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Supervised work experience or research on economic topics in government, financial, business, charitable or other kinds of institutions to provide an opportunity for the student to apply principles and theories learned in the classroom to the "real world." Partial supervision may be supplied by persons in the institution under study.

Credit/No Credit

ECON 298. Tutoring In Economics.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Supervised tutorials at educational institutions including Sacramento State where and when appropriate arrangements can be made. Prior approval for tutoring must be obtained from the Economics Department. Emphasis is on the development of effectiveness in the teaching of economics.

Credit/No Credit

ECON 299. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading. Admission requires approval of the faculty sponsor and the Department Chair.

Credit/No Credit

ECON 500. Master's Thesis.**3 Units****Prerequisite(s):** Advanced to candidacy and chair permission of his/her thesis committee.**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BA in Economics

Units required for Major: 42-45**Total units required for BA: 120**

Program Description

The Economics program is appealing to students due to the quality of its faculty, the breadth of its course offerings, and the amount of choice it offers the student in planning his or her coursework. In addition to training in the traditional economics areas, the program offers such diverse courses as the California economy, state and local finance, energy, environmental and resource economics, and urban economics. Students find the Department of Economics congenial to their educational and career objectives.

Note: Students planning ahead for graduate work in Economics should consult an advisor regarding additional and/or focused coursework in mathematics, statistics, and computer science.

Note: The Department schedules courses so that the upper division requirements for the BA can be completed at night within two academic years. Evening students should contact the Department for assistance in planning a two-year program. Failure to do so may mean a delay in graduation due to scheduling problems.

Pre-Major Requirements

Freshman or transfer students interested in the Economics Major are admitted as Pre-Major Economics students.

To change to an Economics major, all students are required to complete the following grade and course requirements and submit a Declaration of Major form to the Economics Department along with transcript copies:

1. An overall GPA of 2.0 and be in good academic standing.
2. Completion of the Pre-Major Required Courses with a "C" or better in each course. Only first or second attempts will be considered.

Program Requirements

Code	Title	Units
Pre-Major Required Courses (12 Units)		
ECON 1A	Introduction to Macroeconomic Analysis ¹	3
ECON 1B	Introduction to Microeconomic Analysis ¹	3
MATH 24	Modern Business Mathematics	3
STAT 1	Introduction to Statistics ¹	3
Required Upper Division Courses (15 Units)		
ECON 100A	Intermediate Macroeconomic Theory	3
ECON 100B	Intermediate Microeconomic Theory	3
ECON 101	History of Economic Thought	3
or ECON 113	Economic History of the United States	
ECON 140	Quantitative Economic Analysis	3

ECON 145	Economic Research Methods	3
Electives (18 Units)		
Select 18 units of upper division Economics courses ²		18
Total Units		45

¹ Course also satisfies General Education (GE)/Graduation Requirement.

² Additional upper division courses in Economics, selected in consultation with a faculty advisor.

Notes:

- Minimum grade of "C" required in all courses listed above.
- ECON 145 must be completed in the student's graduating semester. The following must be completed prior to enrolling in ECON 145:

Code	Title	Units
ECON 100A	Intermediate Macroeconomic Theory	3
ECON 100B	Intermediate Microeconomic Theory	3
ECON 140	Quantitative Economic Analysis	3

- MATH 24 requirement can be met by completing MATH 26A or MATH 30 or through a challenge exam.
- MATH 26A or MATH 30, or an upper division course in math or statistics, selected in consultation with an advisor, may also substitute for three of the 33 upper division units in Economics.
- ECON 104 does not meet major requirements.
- No more than 3 units total of the following may be included in the 33 total required upper division units:

Code	Title	Units
ECON 195	Economic Internship	1 - 3
ECON 198	Tutoring in Economics	1 - 3
ECON 199	Special Problems	1 - 3

- No more than 3 units from the following set of courses may be used to meet the requirements of the Economics major:

Code	Title	Units
ECON 112	European Economic History	3
ECON 120	Economics and Environmental Degradation	3
ECON 181	Economics of Racism	3
ECON 184	Women and the Economy	3
ECON 189	Economics at the Movies	3

- Students planning graduate work in Economics should consult an advisor regarding additional coursework in mathematics, statistics, and computer science. The following are strongly recommended:

Code	Title	Units
ECON 141	Introduction to Econometrics	3
MATH 26A	Calculus I for the Social and Life Sciences	3
MATH 26B	Calculus II for the Social and Life Sciences	3

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (10 Units)		
B1	Physical Science	3
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)	1
B4	Math Concepts ²	0
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (6 Units)		
	Area D Course	3
	Area D Course ²	0
	Area D Course ²	0
	Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		
	Area E Course	3
Total Units		40

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
	American Institutions: U.S. History	3
	American Institutions: U.S. Constitution & CA Government	3
	Writing Intensive (WI)	3
Graduation Requirements (required by Sacramento State) (12 Units)		
	English Composition II	3
	Race and Ethnicity in American Society (RE)	3
	Foreign Language Proficiency Requirement ²	6

- ¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).
- ² If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Certificate in Economics Education

Units required for Certificate: 15

Program Description

The Economics Education Certificate Program is designed to give participants a solid foundation in economics that will enable them to teach the subject in primary and secondary schools. The Certificate Program is intended for

1. future or practicing teachers who desire credential authorization to teach the one-semester economics course required of all California public high school students; and
2. future or practicing teachers who wish to infuse economics into other K-12 curricula.

Students majoring in Liberal Studies or Social Science or completing a teacher credential program are especially encouraged to participate.

Note: Participants who are not enrolled in Sacramento State may take these courses through the College of Continuing Education.

For more information about the program, contact: Director of the Center for Economic Education, Professor David M. Lang, (916) 278-7077.

Minimum Grade Requirement

A grade of "B" or higher must be obtained in each course for the Certificate.

Program Requirements

Code	Title	Units
Required Core Courses (9 Units)		
ECON 1A	Introduction to Macroeconomic Analysis	3
ECON 1B	Introduction to Microeconomic Analysis	3
ECON 195	Economic Internship ¹	3
Elective Course (6 Units)		
Select any two upper division economics course ²		6
Total Units		15

- ¹ The ECON 195 requirement will enable the student to serve as a Teaching Assistant to a professor teaching either ECON 1A or ECON 1B. Students must receive the permission of the Director of the Center for Economic Education prior to enrolling in ECON 195 for the Certificate program and will be assigned to a professor by the Director.
- ² not including ECON 104

MA in Economics

Total units required for MA: 30

Program Description

The Master of Arts program in Economics is designed to assist students in developing the analytical skills and reflective capacities required to think clearly and coherently about economic matters and to apply their skill and knowledge effectively to problem areas. The program seeks to prepare students for careers in business, government, and education where applied skills are appropriate. To this end, the Department offers coursework and supervised study in economic theory, quantitative analysis, and a number of other fields of interest.

In line with the applied emphasis of the graduate program, the Department maintains a relationship with both the California state government and many private organizations in the Sacramento area. Recent graduates have gone on to jobs in government at all levels as well as to careers in labor unions, banks, manufacturing corporations, and other private organizations.

Admission Requirements

Admission as a classified graduate student in Economics requires:

- a minimum 3.0 GPA in the last 60 units attempted;
- a minimum 3.0 GPA in undergraduate Economics work;
- ECON 100A (Intermediate Macroeconomic Theory) or equivalent; and ECON 100B (Intermediate Microeconomic Theory) or equivalent;
- ECON 141 (Introduction to Econometrics) or equivalent;
- MATH 26A (Calculus I) or equivalent; recommend MATH 26B (Calculus II) or equivalent;
- Graduate Record Examination;
- two letters of recommendation from undergraduate instructors;
- a minimum score of 550 on the TOEFL (this requirement applies only to students earning degrees abroad whose primary language is not English); and
- a baccalaureate degree.

Students not meeting the above requirements may be granted conditionally classified graduate status with permission of the Economics Department Graduate Committee, providing the applicant submits in writing the reasons why he/she desires graduate training and why the Committee should waive one or more of the above requirements. Students accepted on this basis may be required to complete a set of courses prior to beginning the Economics Graduate core, or to fulfill other conditions prior to approval for fully classified status. Failure to conform to this stipulation will result in the revocation of the conditionally classified status.

Admission Procedures

Applicants must complete a university application and also meet departmental requirements by the posted application deadline date for

term applying. For more admission information and application deadlines, please visit <http://www.csus.edu/gradstudies/>. Admission based on the deadlines allows students to meet registration deadlines. Applications submitted after the above-mentioned deadlines will only be reviewed in the event that room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following documents with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*;
- Graduate Record Examination (GRE) scores (verbal, quantitative, and analytical portion); and
- TOEFL scores, if applicable.

In addition to the above documents, arrange for two letters of recommendation to be sent to the Economics Department. Any applicant not meeting the first three admission requirements as specified above should submit to the Department in writing his/her reasons for requesting a waiver of the admission requirements.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy as soon as the graduate student has:

- successfully completed the following, and with a minimum grade of "B":

Code	Title	Units
ECON 141	Introduction to Econometrics	3
ECON 200A	Advanced Macroeconomic Theory	3
ECON 200B	Advanced Microeconomic Theory	3

- be enrolled, or have successfully completed ECON 200C;
- been recommended for advancement by the Graduate Committee; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with the Economics Department Graduate Coordinator. The completed form is then returned to the Office of Graduate Studies for approval.

Program Requirements

The following **cannot** be used as part of the 30 units toward the master's degree:

Code	Title	Units
ECON 112	European Economic History	3
ECON 120	Economics and Environmental Degradation	3
ECON 181	Economics of Racism	3
ECON 184	Women and the Economy	3
ECON 189	Economics at the Movies	3
ECON 195	Economic Internship	1 - 3
ECON 198	Tutoring in Economics	1 - 3
ECON 199	Special Problems	1 - 3
ECON 204	Business Economics	3

All students are required to complete the core course sequence outlined below with a minimum grade of "B" in each course. After completing the core courses, the student selects a thesis plan to finish the degree requirements. The core courses, as well as the thesis, are outlined below.

Code	Title	Units
Core Courses (15 Units)		
ECON 200A	Advanced Macroeconomic Theory	3
ECON 200B	Advanced Microeconomic Theory	3
ECON 200C	Advanced Applied Economics	3
ECON 200M	Mathematics for Economists	3
ECON 241	Applied Econometric Analysis	3
Other Requirements (12 Units)		
Select 12 units of electives ¹		12
Culminating Requirement (3 Units)		
ECON 500	Master's Thesis	3
Total Units		30

¹ Of these 12 units, **six** units (i.e., 2 courses) must come from 200-level courses. Note the following:

- There can be no 100-level/200-level duplication of similar courses (e.g., you cannot receive credit for ECON 130 and ECON 230, ECON 138 and ECON 238, etc.).
- Selected courses (e.g., Math, Statistics, or Computer Science) from other departments may be allowed as substitutes with the approval of the Graduate Coordinator.
- ECON 295 and ECON 298 do not count as electives toward satisfying the 12 unit requirement without the approval of the Graduate Coordinator.

Minor in Economics

Units required for Minor: 21, twelve of which must be upper division Economics units

Program Description

A minor in Economics may be especially attractive to students majoring in Business Administration, Government, and Environmental Studies or in one of the other Social Science disciplines. The Economics minor adds both theoretical and analytical depth. In addition, it provides the historical and institutional background important to an understanding of contemporary economic issues. It offers students in other majors a broader-based undergraduate education while widening the choice of job possibilities. Employers view the minor in Economics favorably.

Program Requirements

Code	Title	Units
ECON 1A	Introduction to Macroeconomic Analysis	3
ECON 1B	Introduction to Microeconomic Analysis	3
Total Units		6

- ¹ STAT 1 may be counted toward the minor.
- ² No more than 3 units of ECON 199 may be used to meet the Economic Minor requirements.
- ³ No more than 6 units from the following courses may be used to meet the Economic Minor requirements: ECON 112, ECON 120, ECON 181, ECON 184, and ECON 189.

Notes: The following cannot be used to meet the requirements of the Economics minor:

Code	Title	Units
ECON 104	Introduction to the United States Economy	3
ECON 195	Economic Internship	1 - 3
ECON 198	Tutoring in Economics	1 - 3

Environmental Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society. The program offers both a major and a minor and also assists students in constructing special majors and identifying programs and individual courses in various departments that concern themselves with environmental questions.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Environmental Studies students find work primarily in research, analysis, and enforcement activities in state, federal, and local governments. Others work for nonprofit organizations such as The Nature Conservancy, Audubon Society, and Sierra Club. Some work as consultants to private firms, and some graduates become teachers in primary schools, secondary schools, and universities. A few have created their own careers in such areas as organic farming, managing cooperatives, and social action.

Environmental Studies students often go on to professional and graduate schools in such fields as law, ecology, engineering, journalism, economics, public health, political science, public administration, special education, environmental policy, and human ecology.

Degree Programs

- BA in Environmental Studies (p. 885)
- BS in Environmental Studies (p. 887)
- Minor in Environmental Studies (p. 888)

Special Features

- Sacramento, as the state capital, offers excellent opportunities for study and employment. One of several ways to incorporate these opportunities into a student's academic program is through Environmental Studies internship experiences.
- The faculty also carries on a field study program to introduce students to as many features as possible of the extraordinarily varied Northern California region.
- Faculty in the Environmental Studies Department represent disciplines including Biology, Ecology, Toxicology, Political Science, Environmental Engineering, among others.

Career Possibilities

Environmental Analyst · Pollution Analyst · Pollution Measurement Technician · Environmental Planner · Naturalist · Environmental Consultant · Energy Conservation Specialist · Environmental Journalist · Environmental Health Specialist · Lobbyist · Environmental Educator · Environmental Economist · Recycling Coordinator · Hazardous Materials Specialist · Legislative Researcher · Water Quality Technician · Park Interpretative Specialist · Transportation Planner · Waste Management Specialist · Levee Management Specialist · Conservation Analyst · Environmental Investigator · Environmental Interpreter · Environmental Resource Planner · Park Ranger · Permitting Officer · Ranger · Habitat Assessment Specialist · Environmental Compliance Officer · Legislative Aide · Air Pollution Specialist · Energy Manager · Game Warden · Wildlife Manager · Hazardous Waste Specialist · Pollution Prevention Specialist · Compliance Program Manager · Community Education Officer · Environmental Health and Safety Officer · Mosquito Control Technician · Public Works Program Manager · Water Conservation Manager · Environmental Impact and Review Assessment · Environmental Scientist · Environmental Policy Analyst

ENVS 10. Introduction to Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Winter

Course looks at the earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate changes, species diversity, and population dynamics.

ENVS 10H. Honors Environmental Science. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring, Summer

The earth as an ecosystem composed of biological, chemical, and physical systems. Focus is on the interaction of these systems with each other and with human population, technology, and production. Students should acquire the fundamentals of a scientific understanding of the ecological implications of human activities. Specific topics treated within the context of the ecosystem analysis include energy flows, nutrient cycles, pollution, resource use, climate change, species diversity, and population dynamics. Students read important original research on topics. All students participate in a semester long project that applies the principles of the course to a real environmental issue.

ENVS 11. Environmental Issues and Critical Thinking. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Examines Western cultural values and personal beliefs toward the environment. Teaches critical thinking skills to analyze issues to make informed choices that may impact the earth, its resources and their management as consumers, leaders, professionals and moral agents.

ENVS 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic and personal support.

ENVS 110. Contemporary Environmental Issues. 3 Units
Term Typically Offered: Fall, Spring

Examination of a variety of environmental issues with emphasis on the social aspects of the problems and solutions. The class is conducted primarily through discussion, with an unusually high degree of student responsibility. Group and individual projects are designed to involve students in community affairs as well as to give them an opportunity to develop a personal perspective on environmental issues.

ENVS 111. Environmental Ethics. 3 Units
Term Typically Offered: Fall, Spring

Consideration of how human beings should act with regard to the non-human natural world in the context of complex societal needs. Students will use critical thinking skills to integrate insights from the sciences, social sciences, and humanities to make ethical decisions.

ENVS 112. International Environmental Problems. 3 Units

Prerequisite(s): GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X. Environmental Studies majors only.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Global perspective on current problems of environmental protection and resource use. Population growth, food production, industrialization, technology and cultural change are considered, with heavy emphasis on the social dynamics of environmental problems. A variety of political views is studied, and an attempt is made to develop a perspective useful to students in personal and political decisions.

Note: PCR/IR students are encouraged to contact the department regarding enrollment into this course.

ENVS 120. Quantitative Methods for Environmental Science. 3 Units

Prerequisite(s): Must be an ENVS major or minor; STAT 1 or instructor permission.

Term Typically Offered: Fall, Spring

Research tools and methods used by environmental professionals including selected statistical procedures, data sources and presentation and interpretation of results. Students will become familiar with the wide range of equipment available to fit their special needs including the computer time-sharing system.

ENVS 121. Field Methods in Environmental Science. 2 Units

Prerequisite(s): Must be an ENVS major or minor

Term Typically Offered: Fall, Spring, Summer

This field course includes the direct observation of human impact on specific environments and examples of mitigation strategies. Students will learn information gathering and data presentation methodologies useful in environmental impact assessment. Lecture three hours per week; one-day and weekend field trips will be arranged.

Note: Course also substitutes for ENVS 175.

Field trip(s) may be required.

ENVS 122. Environmental Impact Analysis: CEQA and NEPA. 3 Units
Term Typically Offered: Fall only

Review of legislative and judicial requirements for environmental impact analysis. Students will be asked to review actual project environmental impact reports, analyze the methods employed, understand the relationship of the report to the planning process, and prepare such a document.

Note: It is recommended that students complete ENVS 128 or have some actual experience with environmental impact documentation before taking this course.

ENVS 124. Social Justice in Interdisciplinary Perspective. 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring

Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ANTH 130, ID 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.

ENVS 128. Environment and the Law. 3 Units
Term Typically Offered: Spring only

Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law, and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system. Cross Listed: GOVT 128; only one may be counted for credit.

ENVS 130. Environmental Toxicology. 3 Units
Prerequisite(s): CHEM 6A or instructor permission.
Term Typically Offered: Spring only

Focuses on the aspects of toxicology which enable us to study and explore environmental issues concerning human and ecosystem health. It will explore the impact of human activity since World War II in contributing to human disease and ecosystem disruption. Risk perception and communication as it concerns environmental toxicology will also be discussed.

ENVS 135. California Water and Society. 3 Units
Prerequisite(s): ENVS 120 or instructor permission
Term Typically Offered: Fall, Spring

This course provides the historical, scientific, legal, institutional, and economic background needed to understand the social and ecological challenges of providing water for California's growing population, agricultural economy, and other uses- all of which are made more complex by climate change. We will look at past and current debates around cases ranging from local issues on the American River to statewide issues that converge in the Sacramento-San Joaquin Delta. Both physical and social science research skills will be developed.

ENVS 137. Conservation and Society. 3 Units
Prerequisite(s): ENVS 10 and BIO 1
Term Typically Offered: Fall, Spring

Course will introduce students to the interdisciplinary field of conservation biology through the lens of modern society. Students will acquire a basic understanding of the history of the field of conservation, and the values that drive our desire to preserve species and natural systems. Students will learn about conservation challenges, will analyze the scientific and social factors that contribute to addressing those challenges, and will learn to appreciate the diverse perspectives that are vital in modern conservation.

ENVS 138. Introduction to Environmental Sociology. 3 Units
Term Typically Offered: Fall, Spring

The study of human society, the natural environment, and their mutual interactions. Examines environmental sociology at several levels, from the micro level of individual communities to the meso level of government policies to macro theoretical considerations. Analyzes environmental issues in a global context also included. Cross Listed: SOC 138.

ENVS 140. Energy, Society, and the Environment. 3 Units
Prerequisite(s): Upper division standing
Term Typically Offered: Fall, Spring

This course covers the concepts and tools necessary to understand society's diverse technology and policy choices around energy production and use. Students will apply both quantitative and qualitative methods to analyze opportunities and impacts of energy systems with consideration for environmental sustainability, international development, and social equity. We will consider a range of energy technologies, their historical trajectories, current drivers, and prospects for addressing energy challenges at different scales, from households to the global climate.

ENVS 144. Sustainability Science & Policy. 3 Units
Prerequisite(s): ENVS 10, BIO 1, or instructor permission
Term Typically Offered: Fall, Spring

Examines issues of environmental, social, and economic sustainability in domestic and international contexts. Students will study the science, policy, and implementation of sustainable practices regarding water, food, and energy resources. Students will learn the history of sustainability, definitions of sustainability, how sustainability is measured, and how sustainability applies to urban and rural landscapes.

ENVS 147. Urban Agriculture and Aquaponics. 3 Units
Term Typically Offered: Fall, Spring

This course uses campus initiatives in food and bio-waste recycling, combined with vermiculture and aquaponics, to address larger topics in urban food production. This subject has significance for addressing concerns about food access, security, quality, and even local economic development. The course will include hands-on activities on campus, projects with local urban agriculture organizations, and reports connecting the specifics of the course with core questions in environmental science and policy

ENVS 149. Agroecology.**3 Units****Term Typically Offered:** Fall, Spring

Ecological aspects of the production of food and fiber, with emphasis on the sustainability and adequacy of the global food supply to meet the needs of a growing, urbanized population. Covers topics basic to all agricultural systems - soil development, fertility, irrigation, nutrient cycles, crop selection - while contrasting methods developed for large-scale industrial food production with traditional and/or organic farming methods.

Note: Required field trips.

Field trip(s) may be required.

ENVS 151. Restoration Ecology.**3 Units****Term Typically Offered:** Spring only

Overview of concepts and practices in restoration ecology, emphasizing the application of ecological principles to restoration design, implementation, and monitoring. Major course topics will include historical ecology, soils and hydrology, plant and animal ecology, exotic species, endangered species concerns, mitigation, monitoring, planning, and assessment as they apply in a restoration context. Students will work in local restoration projects; field trips required.

Field trip(s) may be required.

ENVS 155. Environmental Management and Decision-Making.**3 Units****Prerequisite(s):** ENVS 10 or the equivalent, or instructor permission.**Term Typically Offered:** Fall only

Course investigates the motivations and barriers to engaging in pro-environmental behaviors. Focus on theories from multiple social and behavioral sciences to understand how individuals form judgments and decisions regarding natural resource and ecosystem management. Specific topics may include principal-agent theory, dual-process theory, multi-criteria decision-making, theory of planned behavior, norm-value-belief, community-based social marketing, and structured decision-making. Students will build skills in stakeholder engagement and science communication.

ENVS 158. Wetlands Ecology.**3 Units****Term Typically Offered:** Fall only

Introduces and discusses characteristics of wetland systems; principles of wetland ecology; functions of wetlands; and regulations and permitting process regarding development near and within wetlands. Appropriate for students planning careers in natural resource management. Though not a substitute for professional training in wetlands delineation and functional assessment, students will gain a basis for such assessments. Familiarity with basic principles of chemistry, physics, and biology recommended.

Note: Field trips required.

Field trip(s) may be required.

ENVS 163. Ethnoecology.**3 Units****General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall only

Evaluates sustainable management of ecosystems by local indigenous people, using traditional resource management, traditional ecological knowledge and Western science. Familiarizes students with the fields of ethnobiology, ethnoecology, and historical ecology. Students learn about the relationship between people and plants, with a focus on how traditional plant knowledge reflects and is reflected by environmental perceptions.

Note: Field Trip. Required field trip to Chawse Indian Grinding Rocks State Park. Fee Course. \$15 per student.

Fee course.

Field trip(s) may be required.

ENVS 165. American Environmental History.**3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Traces the development of the changing relationship between human society and the natural environment. Focuses on changing attitudes and behaviors toward the environment from the pre-colonial era through the present. Also examines the relationship between industrialization and the technological revolution and nature and examine past and present conservation and environmental movements.

Cross Listed: HIST 165; only one may be counted for credit.

ENVS 171. Environmental Politics and Policy.**3 Units****Prerequisite(s):** instructor permission.**Term Typically Offered:** Spring only

Politics of human interaction with land, air and water. Political analysis of agenda setting, policy formation and administration (national, state and local) of environmental programs. Focus on contemporary issues such as energy alternatives, management of toxics, land development, and pollution control. Course also substitutes for ENVS 128.

Cross Listed: GOVT 171; only one may be counted for credit.

ENVS 175. Aquatic Pollution Assessment.**3 Units****Prerequisite(s):** BIO 160, CHEM 1A or concurrent enrollment; or instructor permission.**Term Typically Offered:** Fall, Spring

Examines both the negative and positive impacts that anthropogenic effects have on groundwater, streams, and lakes by utilizing the application of field sampling techniques and laboratory analysis currently used to assess pollution impacts. Introduces the interrelationships among plants, animals and environmental factors within polluted aquatic ecosystems. Emphasizes laboratory and field procedures used in strategies taken to assess and manage these impacts.

Note: Course also substitutes for ENVS 121.

ENVS 186B. Ecological and Environmental Issues Seminar. 1 Unit
Prerequisite(s): BIO 10 or both BIO 1 and BIO 2.
Term Typically Offered: Fall, Spring

Series of at least 10 seminars in ecological and environmental issues. Topics with each seminar will vary each semester.

Note: May be repeated for credit. No more than one unit of ENVS 186B may be counted toward the upper division major requirement. Cross Listed: BIO 186B; only one may be counted for credit.

Credit/No Credit

ENVS 187. Environmental Studies Seminar. 1 Unit
Term Typically Offered: Fall, Spring

Students will participate in the semester-long University seminar and will be exposed to a variety of environmental issues and topics presented by speakers from CSUS, the USGS, government and professional organizations, among many others. Topics include issues such as climate change, water use and conservation, environmental sustainability, environmental policy and decision-making, and many important regional issues.

Credit/No Credit

ENVS 190. Senior Thesis. 3 Units
Prerequisite(s): Instructor permission and completion of all lower and upper division Environmental Studies courses.
Term Typically Offered: Fall, Spring

Explores an environmental problem or issue in great depth. It includes a detailed review of the scientific literature, synthesis, and integration of information from the literature, and evaluation of the information leading to conclusions and recommendations that address the problem or issue. Thesis subjects are chosen by the student, and can be from a myriad perspectives addressed in the Environmental Studies curriculum including scientific, social, political, economic, and cultural issues.

ENVS 195. Environmental Studies Internship. 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience in an approved legislative or administrative office at some level of local, state or federal government, or in a public or private organization that is concerned with the environment. Supervision is provided by the faculty instructor and responsible officials in the work situation.

Note: Open to majors only, subject to instructor permission.

Credit/No Credit

ENVS 195M. Mini Internship. 1 Unit
Term Typically Offered: Fall, Spring

This introductory work experience is designed for sophomores and juniors. The student must complete 45 hours of environmentally related work in a volunteer position with an environmental organization or participation in an environmentally focused event. Supervision is provided by the faculty instructor and responsible officials in the work situation.

Note: Open to majors only, subject to instructor permission.

Credit/No Credit

ENVS 196G. Youth Recreation in Camp Settings. 3 Units

This course examines camp programs in a wide variety of settings, for a variety of populations. Topics cover camp theories, camp management, risk-management, activity planning, inclusive programming, and staff training. Includes an emphasis on leadership, supervision, and organizational development of camp programs. Course uses lecture, field experiences, guest speakers, and service learning.

ENVS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who are competent to carry on individual work. Admission requires permission of the Director and the faculty member who will direct the work.

Credit/No Credit

ENVS 295. Practicum. 2 - 6 Units

Prerequisite(s): Permission of faculty advisor and director.

Term Typically Offered: Fall, Spring

Graduate internship experiences in practical setting.

Note: Open only to graduate students specializing in environmental studies.

Credit/No Credit

ENVS 296. Experimental Offerings in Environmental Studies. 1 - 3 Units

Prerequisite(s): Instructor permission.

Term Typically Offered: Fall, Spring

Courses offered on an experimental basis.

ENVS 299. Special Problems: Individual Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Departmental petition required.

Credit/No Credit

BA in Environmental Studies

Units required for Major: 66-69

Total units required for BA: 120

Program Description

The Environmental Studies program can help students use the resources of the entire University to gain an interdisciplinary understanding of such increasingly serious issues as pollution, wildlife and wilderness preservation, land use, biodiversity loss, resource depletion, energy conservation, and a generally healthful relationship between nature and society.

The major is designed to help students understand environmental issues in their political, social, and scientific context. Because dealing with environmental issues requires an interdisciplinary approach, we emphasize the development of strong writing, research, and quantitative skills and a broad liberal arts perspective.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses required for the Environmental Studies B.A. and B.S. majors.

Program Requirements

Code	Title	Units
Required Lower Division Courses (23-24 Units)		
BIO 1	Biodiversity, Evolution and Ecology ¹	5
BIO 2	Cells, Molecules and Genes	4 - 5
or BIO 10 & BIO 15L	Basic Biological Concepts Laboratory Investigations in Biology	
CHEM 1A	General Chemistry I ¹	5
or CHEM 6A	Introduction to General Chemistry	
ECON 1B	Introduction to Microeconomic Analysis ¹	3
ENVS 10	Introduction to Environmental Science	3
GEOG 1	Physical Geography: The Distribution of Natural Phenomena ¹	3
or GEOL 10	Physical Geology	
Required Upper Division Courses (30 Units)		
BIO 160	General Ecology	3
ENVS 111	Environmental Ethics	3
ENVS 112	International Environmental Problems ¹	3
ENVS 120	Quantitative Methods for Environmental Science	3
ENVS 121	Field Methods in Environmental Science	2
ENVS 122	Environmental Impact Analysis: CEQA and NEPA	3
ENVS/POLS 128	Environment and the Law	3
ENVS/POLS 171	Environmental Politics and Policy	3
ENVS 187	Environmental Studies Seminar	1
ENVS 190	Senior Thesis	3
ENVS 195	Environmental Studies Internship	3
Environmental Science Electives (6 Units)		
Select two of the following courses:		6
ENVS 110	Contemporary Environmental Issues	
ENVS 130	Environmental Toxicology	
ENVS 135	California Water and Society	
ENVS 137	Conservation and Society	
ENVS 140	Energy, Society, and the Environment	
ENVS 144	Sustainability Science & Policy	
ENVS 147	Urban Agriculture and Aquaponics	
ENVS 149	Agroecology	
ENVS 151	Restoration Ecology	
ENVS 158	Wetlands Ecology	
ENVS 163	Ethnoecology ¹	
Interdisciplinary Electives (6 Units)		
Select two of the following courses:		6
ECON 110	Cost Benefit Analysis	
ECON 123	Resource Economics	
ECON 162	Energy Economics	
ENVS 124	Social Justice in Interdisciplinary Perspective	
ENVS/HIST 165	American Environmental History	
ENVS/SOC 138	Introduction to Environmental Sociology	
GEOG 147	Urban Geography	
GEOG 148	Urban and Regional Planning	

GEOG 149	Transportation Geography	
GEOG 161	California's Water Resources	
POLS 180	California State and Local Government	
RPTA 148	Experiential Education in Outdoor Recreation Settings	
or RPTA 153	Environmental Interpretation	
Other Electives (permission of instructor) (1-3 Units)		
ENVS 199	Special Problems	1 - 3
Total Units		66-69

¹ Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)

Ethnic Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors. Program advising and other information can be obtained from the Ethnic Studies Office.

Degree Programs

BA in Ethnic Studies (p. 895)

Minor in Ethnic Studies (p. 898)

Minor in Asian American Studies (p. 897)

Minor in Chicana/o Latina/o Studies (<http://catalog.csus.edu/colleges/social-sciences-interdisciplinary-studies/ethnic-studies/minor-in-chicana-o-latina-o-studies>)

Minor in Native American Studies (p. 898)

Certificate in Pan African Studies (p. 897)

Special Features

- A student who majors in Ethnic Studies will not only have a strong background in one of the seven areas of specializations but will also gain broad background knowledge of other ethnic groups. Each program area develops its major focus in coordination with other program areas.

- Ethnic Studies encourages students to actively participate in community service learning projects. These projects afford students such opportunities as working directly with community-based organizations and/or agencies, local high schools, and/or middle schools.
- Ethnic Studies regularly sponsors cultural programs providing an opportunity for learning more about the experiences of the social groups framing the content of the Ethnic Studies program.

Career Possibilities

The rich educational experience of Ethnic Studies majors and minors are excellent preparation for careers and professions in the public and private sectors, as well as graduate school. Ethnic Studies majors and minors enter government service, politics, community/social service, business, public school teaching/administration, higher education teaching/administration, social work, counseling, law, journalism, and much more.

ETHN 1A. Elementary Swahili. 3 Units
Term Typically Offered: Fall, Spring

Introduction to the language of Swahili speaking people. Emphasis is on developing vocabulary and writing skills. Attention will be given to understanding the relationship of language to culture.

ETHN 1B. Elementary Swahili. 3 Units
Prerequisite(s): ETHN 1A or its equivalent; or instructor permission.
Term Typically Offered: Fall, Spring

Continuation of ETHN 1A with more emphasis on developing reading and listening skills along with further developing writing abilities. Provides deeper knowledge of the customs, traditions and experiences of Swahili speaking people.

ETHN 10. Africa: Myths and Realities. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to African Studies. Examines the most common myths found in both popular and academic literature about Africa and its people.

ETHN 11. Introduction to Ethnic Studies. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances of Asian Americans, Mexican Americans, Black Americans, and Native Americans. Designed to introduce students to information presented in upper division courses with ethnic studies content.

ETHN 11H. Introduction to Ethnic Studies (Honors). 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring

Introduces the diverse institutional, cultural, and historical issues relating to the past and present life circumstances of Asian Americans, Mexican Americans, Black Americans, and Native Americans. Focuses may include leadership, identity development, problem solving skills, community organizing and empowerment. Designed to introduce students to information presented in upper division courses with ethnic studies content.

Note: Fulfills the General Education requirements of Area D1A (Foundations in the Social and Behavioral Sciences) as well as the General Education Honors Program.

ETHN 14. Introduction to Asian American Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the basic concepts, theoretical perspectives, and research methodologies in comparison to other social science disciplines. The intersection of class, race/ethnicity, and gender of various Asian American and non-Asian American groups will be explored from a socio-historical perspective.

ETHN 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills.

Note: Only open to students admitted to EOP Learning Communities Program.

ETHN 30. Introduction to Chicano/Latino Studies. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity
 Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Introduction to exploring the Chicano/Latino experience in the U.S. An overview of the diverse and multiple experiences of people of Mexico, Cuba, Puerto Rico, Dominican Republic, Central and South America. From a socio-historical perspective, the intersections of class, race/ethnicity, and gender will be explored.

ETHN 50. Native American Religion and Philosophy. 3 Units
Term Typically Offered: Spring only

In-depth study into the principles of Native American religion and philosophical thought and the resulting impact of European culture upon the Native American societies.

ETHN 53. Introduction to Native American Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Broad overview to the field of Native American Studies, including history, sovereignty, popular imagery, economic development, literature, philosophy, religion, urbanization, gender, social issues, and cultures of native peoples. Introduction to Native American Studies; recognizes intra-tribal, trans-national, and various historical, cultural, and political relationships, and issues through an interdisciplinary approach. The primary focus will be post 1900.

ETHN 70. Introduction to Pan African Studies. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

Introduction to Pan African Studies. It is intended to introduce students to the context from which Pan African Studies arose, including the Western intellectual tradition, and to consider the substantive objections to Pan African Studies as a legitimate academic discipline. It is intended to show humanities and social science emphases of the discipline, and the interdisciplinary character of the discipline as a whole. Upon completion, students should have a broad exposure to the subject matter of the discipline, an acute appreciation of some of its philosophical concerns, a recognition of some of the principal methodologies employed by its scholars, some familiarity with major scholars in the discipline, and the ability to explore these subjects independently.

ETHN 71. Leadership in the African Diaspora. 3 Units
Term Typically Offered: Spring only

Provides students with an understanding of the unique contours of leadership throughout the African Diaspora through an interdisciplinary approach to understanding particular problems, necessities and styles of leadership. Examines leaders and leadership roles within the African Diaspora with an emphasis on a variety of positions and contexts in the areas of politics, religion, art, and education, including the international, national, and local community (grassroots) arenas.

ETHN 72. Black Images in Popular Culture. 3 Units
Term Typically Offered: Fall, Spring

This course is designed as a survey of the Black image within popular culture. Students will interrogate the roots of African American stereotypes within North American culture. Through an understanding of this history, we will assess how these stereotypes have evolved over time and the role they have played in constructing and positioning African Americans in American society. Students examine the ways in which African Americans actively construct images of themselves for a variety of political and social purposes.

ETHN 94. CAMP Transition and Problem Solving. 3 Units
Term Typically Offered: Fall, Spring

Designed for CAMP students new to University life, form and functions. The three hour lecture/discussions per week are focused on assisting students with making a successful transition to the University.
Note: May be repeated once for credit.

Credit/No Credit

ETHN 96B. Contemporary Issues and Social Change. 3 Units
Term Typically Offered: Fall, Spring

Generation after generation, university students have been key constituents in movements for social change. From public demonstrations to research studies, colleges and universities afford countless opportunities for students to advocate for a better world. This course explores how students can utilize university resources to explore interests and concerns, hone academic skills and contribute to social change.

ETHN 98. Co-Curricular Activities. 1 - 3 Units
Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns in Ethnic Studies.

Note: Recommended for students new to the university experience and students having completed fewer than 45 units of course work. May be repeated twice for total credits not to exceed 6 units.

Credit/No Credit

ETHN 100. Ethnic America. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring, Summer

Through an interdisciplinary approach, introduces the four major American ethnic groups -Black, American Indian, Chicano, Asian American. Focuses on themes common to all four groups (racism, economic and political oppression) and demonstrates the varied contributions of each culture to American social and economic life.

- ETHN 110. The Asian American Experience.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Survey of the experiences of various Asian groups in the U.S. from the mid-nineteenth century to present. The historical forces affecting the immigration and settlement patterns of Chinese, Japanese, Filipinos, Koreans, Asian Indians and Southeast Asians (Vietnamese, Cambodians, Laotians) will be compared and contrasted. Students will analyze the problems resulting from limited access to the social, political, and economic institutions of U.S. society.
- ETHN 111. Southeast Asians in the US.** 3 Units
Term Typically Offered: Spring only
- Examine several issues and factors shaping the experiences of recent immigrant groups (Vietnamese, Mien, Hmong, Cambodians, Laotians) from Southeast Asia to the U.S. Focuses on the dynamic relationship between ethnicity, minority assignment and social integration as these effect the experiences of these immigrant groups.
- ETHN 112. Contemporary Asian American Issues.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examines several important social issues such as emerging communities, education, employment and occupations, anti-Asian violence, media images and stereotypes, families and identities, and political empowerment shaping the contemporary experiences of diverse Asian American groups.
- ETHN 113. Asian American Communities.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examination of the historical and contemporary experiences of various Asian American communities through active investigation. The concepts, methods, and theories commonly utilized in community research will be covered.
- ETHN 114. Asian Americans and Globalization.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examination of the Asian American immigration within the context of the larger Asian global migration. Emphasis will be placed on the period from the 16th century to the contemporary Asian global migration. A critical examination of the perspectives on the Pacific region and how the economic, social, political and historical forces affected migration and the formation of Asian global communities.
- ETHN 115. Biracial and Multiracial Identity in the US.** 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Examination of biracial/multiracial populations, their social histories, social experiences and social identities within various sociological and social psychological theoretical frameworks. An exploration of the relationship biracial/multiracial groups have had, and continue to have, with the larger white majority and monoracially identified minorities.
- ETHN 116. Asian American Politics and Public Policy.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Critical examination of the historical and contemporary political experiences of Asian Americans and their pursuits of immigration rights, citizenship, political identity, equality, freedom, and incorporation into the U.S. political system.
- ETHN 117. Black Political Thought.** 3 Units
Term Typically Offered: Spring only
- To systematically and analytically introduce the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew.
 Cross Listed: GOVT 117; only one may be counted for credit.
- ETHN 118. Asian American Women.** 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
- Using an interdisciplinary approach, course offers a broad introduction to the principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Provides comprehensive understanding of principle factors governing Asian American women's lives at the nexus of Asian and American cultures.
 Cross-listed: WOMS 118.
- ETHN 119. The Filipino American Experience.** 3 Units
Term Typically Offered: Fall, Spring
- Overview of the Filipino American experience from the 16th century to the present. Immigration and settlement of Filipinos in the U.S. will be critically examined within the context of historical, social, economic, and political forces in American society. How the Filipino labor market status, race, class, and sex/gender relations affected the evolution and formation of Asian American communities will be critically examined.
- ETHN 121. Hmong American Experience.** 3 Units
Term Typically Offered: Fall only
- Explores the historical and cultural background of Hmong Americans. Major emphasis is on the many experiences of the Hmong Americans including the social, economic, and political conditions that prompted their migration from Laos to the U.S. Explores the complex patterns of Hmong American acculturation in relation with other Asian and non-Asian immigrant groups.
- ETHN 122. Sikh Americans and Globalization.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
- Examines the history and migration of Sikhs throughout the world, including the United States. Topics include the origin of Sikhism, Sikh history/religion/culture/social institutions and social relations, direct and secondary migration, race and ethnic relations, second-generation identity issues, and global diaspora/transnationalism.

ETHN 130. Chicano/Mexican-American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Transmits knowledge and understanding of how racism confronts and divides American society. Attention will be given to the effects of racism on the experiences of Chicanos/Mexican Americans in American society.

ETHN 131. La Raza Studies. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring

Ethnohistorical analysis of La Raza Cosmica designed to convey crosscultural knowledge and understanding of peoples from Mexico, Cuba, Puerto Rico and Central America. Includes a comparative analysis of ethnic identity and a survey of socio-cultural, political and economic changes which have influenced U.S./Latin American policy and immigration patterns of Latinos to the U.S.

ETHN 132. La Mujer Chicana. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Critical analysis of the cultural influence that the family, community, religion, economic status and peers play upon the decisions, the values and roles held by Chicanas. An examination of the processes which have resulted in the change of attitudes, values and roles of the contemporary Chicana.

ETHN 133. Crosscultural Aging in America. 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Examines aging crossculturally among ethnic groups in America. Emphasis will be placed on a review of the current literature on aging and ethnicity. Also examines changing roles and values in Black, Hispanic, Asian and Native American families.

ETHN 136. US Mexican Border Relations. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Contemporary issues affecting the daily lives of people living in the U.S. - Mexico Borderlands. Theories, gender issues, political, economic and social relationships on both sides of the border will be examined.

ETHN 137. Race and Ethnicity in Latin America and Caribbean. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Socio-economic, historical and contemporary issues affecting the various peoples living in the Latin America and the Caribbean. We will examine the intersection of race and ethnicity as well as class, gender, and identity, with attention paid to the contributions and presence of Asians, Africans, Europeans, and Indigenous peoples.

ETHN 140. Native American Experience. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Advanced course in American Indian history, political and social relations, with emphasis upon current movements and problems of Native American life.

ETHN 141. Politics of the African Diaspora. 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall only

Examines the social, political, cultural, and economic factors which have been important to the African diaspora. Examines how African people have responded to those factors, both in terms of formal, political thought, and in terms of political movements and political institutions. Examines thought and proactive, comparability to Africa, U.S., Caribbean, Central and South America.
 Cross Listed: GOVT 141; only one may be counted for credit.

ETHN 142. Native American Tribal Governments. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examines the regulatory powers that American Indian tribes possess over their peoples and territories. Students will acquire an understanding of tribal governmental history, internal affairs, jurisdictional conflicts, government relations, federal Indian public policy and economic development. The political aspects of tribal government administration and the emergence of self-governance as a foundation for self-determination, development and sustainability will be explored.

ETHN 143. American Indians, Film and Popular Culture. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Spring only

Students will examine various ways American Indians are imagined by popular culture through film, including drama, comedy and documentary. Beyond identifying and analyzing images of Indians as well as myths about their historical and contemporary circumstances, students will be challenged to investigate and understand the tenuous relationship between fact and fiction in popular culture.

ETHN 145. Native Voice, Memory, and Biography. 3 Units
Prerequisite(s): GWA certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Humanities (Area C2)
Term Typically Offered: Fall, Spring

Through the genre of biography and autobiography, students will examine the relevance of Native voice and memory in reference to the development of identity, cultural transformation, indigenous knowledge, political activism, and historical consciousness. Students will analyze the political, economic and cultural contexts in which Native voices and memories emerge.

ETHN 150. Native American Oral Tradition and Storytelling. 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Study of how Native American oral tradition and storytelling affect the experience of tribal expression. Examines the foundation of this tradition through an analysis and comparison of traditional and contemporary forms.

ETHN 151. Native American Women.**3 Units****Term Typically Offered:** Fall only

Examination of the traditional, non-traditional, and contemporary roles of Native American women. The relationship of these roles to both Indian and non-Indian societies. An exploration of Native women's issues through histories, literatures, and oral traditions, focusing on Native American women's perspectives. Colonization has drastically impacted native women and the lives of their families, nations and communities. Resistance and de-colonization efforts by Native women will be illuminated and analyzed.

ETHN 152. American Indians, Sovereignty and US Laws.**3 Units****Term Typically Offered:** Spring only

Examines the legal history developed between American Indians and Euro-Americans. Includes an introduction to events, circumstances, and relationships that developed social and legal concepts. There will be an examination of constitutional principles, laws and United State's policies from the early 1800's to the present and the impacts of these doctrines on American Indian sovereign powers. The students will acquire a basic understanding of the sources of political conflict in contemporary American Indian communities and American society.

ETHN 155. Genocide and Holocaust Studies.**3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring, Summer

Examines genocide cases, such as the Armenian genocide, the Jewish Holocaust, the genocide of Roma, the Cambodian "Killing Fields", genocide in East Timor, ethnic cleansing in Bosnia, the genocide of the Tutsi in Rwanda and genocide in the Darfur region of Sudan, as well as the genocide of Native Americans, and other indigenous peoples. Addresses causes of, and responses to, genocide around the world, especially in Africa, Asia and Latin America. This phenomenon is examined historically, descriptively, comparatively and theoretically.

ETHN 156. Indigenous People.**3 Units****Term Typically Offered:** Fall, Spring

Common existential experiences of indigenous people all over the world namely the Batwa and Pygmies in Central Africa, the Khoisan of Southern Africa, the Berber in Northern Africa, the Sami in Northern Europe, the Basque in France and Spain, the Hawaiians in the Pacific, the Ainu of Japan, the Aborigines in Australia, and Native Americans in the Americas.

ETHN 161. Chicano/Latino Politics and Public Policy.**3 Units****Term Typically Offered:** Fall, Spring

Explores the historical and contemporary development of Chicano/Latino political activity in the United States. Will review essential components of the U.S. political system and examines relevant theories and concepts that have impacted public policy debate related to education, employment, health, housing, immigration, and income inequity. Primarily focuses on the political history and present day circumstances of the three largest Latino groups, Mexican Americans, Puerto Ricans, and Cuban Americans.

ETHN 166. American Indigenous Families: Issues and Perspectives.**3 Units****Term Typically Offered:** Fall, Spring

Application of research and theory specific to Latino/Chicano and American Indian families; strategies for applying this knowledge to areas of service, therapy, policy, and education. Lecture/discussion, internet enhancement.

Cross Listed: FACS 166A; only one may be counted for credit.

ETHN 167. Asian American Families: Issues and Perspectives.**3 Units****Term Typically Offered:** Fall, Spring

Family is an adaptable and changing institution of society. Research and theory on Asian American families will be highlighted with an emphasis on applying the information to areas of service, therapy, policy, and education. Experiences of various Asian groups in the U. S. will be compared.

Cross Listed: FACS 166B; only one may be counted for credit.

ETHN 170. Pan African Studies.**3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Investigation into the subjective aspects of Pan African Studies (Black Studies). Covers such topical areas as the struggle by Black Americans for education, the genesis of the Black Studies movement, Black culture, institutional change, etc. The very nature of the course permits the coverage of a broad range of subject matter. Students are encouraged to take specific courses offered by the Pan African Studies program for more extensive investigation.

ETHN 171. African Religions and Philosophies.**3 Units****General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Study of the African's concept of God with particular emphasis on His works, His relationship to His creations, and His worship. Also covers the concepts of evil, ethics, justice and various metaphysical ideas.

ETHN 172. Black Women In America.**3 Units****Term Typically Offered:** Spring only

Examines the historical and social forces that shape the lives of Black women. Examines the Black woman's role in the family, community, work force and society in general.

ETHN 173. The Black Family in the United States.**3 Units****Term Typically Offered:** Fall, Spring

Using the interdisciplinary approach, several institutional factors affecting the structure, evolution, and function of the Black Family unit in the U.S. will be studied. Permits a broad, yet systematic, examination of the Black Family in order to understand the several dynamics affecting the Black Family in particular and Black Americans in general.

ETHN 177. Topics In African Studies.**3 Units****Term Typically Offered:** Fall, Spring

Special topics in African studies.

ETHN 177A. Genocide and Human Rights: Africa. 3 Units

This course focuses on the human rights abuses and Genocides that occurred in colonial and post-colonial Africa. It explores Genocide in Rwanda, Darfur, Namibia, and mass killings in Congo. It examines Campaigns of cultural Genocide, ideological pressure, and the involvement of former colonial powers in mass killings. Different approaches of conflict resolution such as the South African Truth and Reconciliation model will be examined. Causes and conditions of Genocide will be interpreted through interdisciplinary literature.

ETHN 179. Black Music and Black Consciousness. 3 Units

Term Typically Offered: Fall only

Provides students with an understanding of the essential role Black music assumes in the development of people of African descent throughout the Black Diaspora. Major topics include the historical development of Black music, the role of music in Black resistance and other forms of political behavior, the economic exploitation of Black music and the Black musician and the influence of globalization.

ETHN 180A. Forms of African-American Poetry. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Humanities (Area C2), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Focuses on four or more African-American poets, representing a historical succession of literary periods.

ETHN 180B. Forms African-Am Fiction. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), Humanities (Area C2)

Term Typically Offered: Fall, Spring

Focuses on four or more African-American writers of fiction, surveying texts representing a historical succession of literary periods.

ETHN 181. Cinematic Representations of Pan African Identities. 3 Units

This course is designed as an intensive survey of African American cinema that engages questions of history, culture, politics and the overall function of race and representation in American society. Our focus in this class is to understand Pan African filmmakers and their respective films. We will focus on cultural factors intrinsic to Pan African societies and how cinema fits into this context, as well as how issues of gender, sexuality and class impact the films.

ETHN 182. Protest in Hip Hop. 3 Units

This course is designed to be an intensive survey of the evolution of hip hop as a form of social protest that developed into a global cultural movement. The course draws parallels from hip hop's historical function with past and present U.S. social movements advocating for social justice, including the recent #BlackLivesMatter movement. Students will also examine cultural studies theoretical concepts analyzing mainstream's exploitation and marginalization of race, class, gender and sexuality representations in hip hop.

ETHN 194. Research in Ethnic Studies. 3 Units

Prerequisite(s): One upper-division Ethnic Studies course.

Term Typically Offered: Fall, Spring

Designed to provide students with contemporary theoretical knowledge and practical skills for conducting research in the Asian American, Black American, Chicano, and Native American communities. Methodology which addresses issues and research perspectives distinctly germane to researching a targeted community is examined.

ETHN 195A. Ethnic Studies Fieldwork. 1 Unit

Prerequisite(s): Ethnic Studies majors only

Corequisite(s): ETHN 195B

Term Typically Offered: Spring only

Allow students, with faculty supervision, to work closely with the ethnic minority communities. Students may work with a community agency, community organization, or other site with instructor approval.
Credit/No Credit

ETHN 195B. Ethnic Studies Seminar. 2 Units

Prerequisite(s): Ethnic Studies majors only

Corequisite(s): ETHN 195A

Term Typically Offered: Spring only

Seminar discussions designed to synthesize and assess knowledge in Ethnic Studies courses applied to fieldwork experiences.

ETHN 198. Co-Curricular Activities. 1 - 3 Units

Term Typically Offered: Fall, Spring

Co-curricular activities related to the subject matter and intellectual concerns in Ethnic Studies. For example, students may earn ETHN 198 credits by participating in Ethnic Studies classes as tutors and/or section or discussion leaders; teaching as voluntary instructors or tutors in courses offered by community organizations.

Note: May be repeated twice for total credits not to exceed 6 units.

Credit/No Credit

ETHN 199. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects or directed reading. Admission requires approval of the faculty member under whom the individual work is to be conducted, the appropriate program director and the Chair of Ethnic Studies.

Credit/No Credit

ETHN 299. Special Problems/Individual Study. 3 Units

Term Typically Offered: Fall, Spring

Open to classified and unclassified graduate students. Allow qualified students to explore topics, issues, and subjects pertinent to ethnic groups in the U.S.

Credit/No Credit

BA in Ethnic Studies

Units required for Major: 36

Total units required for BA: 120

Program Description

Ethnic Studies is an interdisciplinary approach to the study of the cultures, languages, historical, and contemporary issues relating to African Americans, Asian Americans, Chicana/os-Latina/os, and Native Americans. The program directs students to critically examine the

cultural contributions made by these groups to world civilization and to American society. Ethnic Studies challenges all students to analyze existing generalizations, theories, and concepts about racial and ethnic groups in order to develop valid generalizations, concepts, and theories about the people and their experiences. Students are encouraged to actively work to eliminate problems based on discrimination.

Students are also encouraged to blend professional area studies with Ethnic Studies. For example, a student may major in Ethnic Studies and minor in Business Administration. Similarly, students with a degree in Engineering Technology may minor in Ethnic Studies and emerge well-prepared professionally to assume middle management and supervisory positions in a multicultural society. Ethnic Studies majors and minors enter careers and professions in both the public and private sectors.

Note: Program advising and other information can be obtained from the Ethnic Studies Department.

Family and Consumer Sciences

College of Social Sciences and Interdisciplinary Studies

Program Description

The focus of Family and Consumer Sciences is to enhance the skills and knowledge that will promote the well-being of individuals, families, and communities. Our programs and profession focus on individuals and families in order to achieve an optimum balance between people and their environments. The mission of Family and Consumer Sciences is to empower individuals and families to function interdependently in a global society.

Degree Programs

BS in Family and Consumer Sciences (Family Studies) (p. 902)

BS in Family and Consumer Sciences (Nutrition and Food with an Emphasis in Dietetics) (p. 903)

BS in Fashion Merchandising and Management (p. 905)

BS in Nutrition and Food (p. 906)

Minor in Family and Consumer Sciences (p. 907)

Single Subject Matter Program (Family and Consumer Sciences Education) (p. 907)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Family and Consumer Sciences (Dietetics) is also individually accredited by the American Dietetics Association.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

- Faculty in Family and Consumer Sciences come from diverse educational backgrounds and expertise. Faculty members promote and integrate a holistic approach to understanding individuals and families while preparing students for professional careers or graduate study.
- The Department is equipped with state of the art laboratories for textiles, food, and teacher credentialing preparation courses.
- Support facilities include a Costume Collection gallery. Visit the virtual gallery at <http://www.csus.edu/facs/>.
- The Didactic Program in Dietetics (DPD) and the Nutrition and Dietetics Internship (NDI) programs are accredited by the Accreditation Council for Education in Nutrition and Dietetics (ACEND); the Family Studies program is approved by the National Council on Family Relations; and the Pre-Credential Single Subject Matter program is approved by the California Commission on Teacher Credentialing.
- Through its internship program, the Department provides an opportunity for students to work under the supervision of a professional in business, education, government, or public service settings. Internships (FACS 195C) are planned in advance with an advisor.
- The Department sponsors three student organizations for students to participate in several professional organizations related to their major concentrations.
- In addition to serving majors and minors, the Department provides service and general education courses for other majors including classes that meet the graduation requirements for the writing intensive, and race and ethnicity categories.

Career Possibilities

Fashion Merchandising and Design: Apparel Engineer · Buyer · Clothing Designer · Fashion Coordinator · Distributor · Fashion Editor · Fashion Forecaster · Fashion Reporter · Inventory Specialist · Magazine Editor · Merchandiser · Product Analyst · Quality Control Analyst · Regional Manager · Retail Manager · Sales Representative · Stylist · Technical Designer · Textile Designer · Theater Costuming · Visual Merchandiser

Family Studies: Consumer and Family Resources · Community-Based Social Services · Community Education · Early Childhood Education · Family Life Educator · Family Planning · Family Support Services Provider · Government and Public Policy · Health Care and Family Wellness · Marriage and Family Enrichment · Parenting Educator · Prenatal and Maternity Services · Preschool and Adult Day Care Director · Sexuality Educator · Youth Advisor

Nutrition and Foods/Dietetics Emphasis: Communications/Public Relations/Marketing · Community/Public Health Nutritionist · Degreed Nutritionist · Entrepreneur/Consultant · Food Service Manager/Hospitality · Nutrition and Health Educator · Nutrition Program Representative · University/Research Centers. **Additional careers in Dietetics:** Registered Dietitian · Clinical Dietetics-Hospital/Health Care

Family and Consumer Sciences Education (Pre-Credential Single Subject Program): Teacher in Secondary Education (middle and high school) · Outreach consultant in UCD Extension Services · Consultant in Home Economics careers and Technology, California State Department of Education · FHA-HERO State Advisor

- FACS 50. The Family and Social Issues.** 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
- Family structure, systems and functioning in marriage and other partnerships, parenting, work issues, domestic violence, divorce, and remarriage. Focus on social issues including gender, race, ethnicity, and class. Historical and theoretical perspectives on families in America. Introduction to research in family sciences and public policy implications. Lecture, discussion.
Note: Not open for credit to students who have taken SOC 5.
- FACS 52. The Child In The Family.** 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Physical, social, emotional and cognitive development of the child, conception through adolescence, in relation to the family. Strong theoretical emphasis. Introduction to methods of study, including observation and interview. Lecture, discussion, fieldwork.
Note: Not open for credit to students who have taken CHDV 137, CHDV 138, or PSYC 148.
- FACS 100. Research: Methods and Application in Family and Consumer Sciences.** 3 Units
Prerequisite(s): 6 FACS units completed. FACS majors only
Term Typically Offered: Fall, Spring
- Study of methods and application of research in the field of Family and Consumer Sciences. Focus on scientific inquiry, methodology, evidenced-based practice, interpretation of research results, program and project evaluation, and professional communication. Includes the examination of ethical practices, professional presentation skills, and technical writing skills.
- FACS 108. Family Communication.** 3 Units
Prerequisite(s): COMS 8, FACS 50, SOC 166, or instructor permission.
Term Typically Offered: Fall, Spring
- Study of the family as a small group with emphasis on understanding and interpreting the dynamics of family communication using various communication and social-psychological theories. Opportunity to develop an analytical framework.
 Cross Listed: COMS 108; only one may be counted for credit.
- FACS 128. Consumer Technologies and Environments.** 3 Units
Term Typically Offered: Fall, Spring
- Study and analysis of technologies, durable goods, and environments in home and workplace and their impact on quality of life. Principles of equipment and product design, selection and safety; space planning; consumer decision making. Examination of issues related to energy management, shelter, housing and access to technology. Lecture, field trips two hours; activity two hours.
 Field trip(s) may be required.
- FACS 140. Family Resource Management.** 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Management of resources in family systems. Interaction of families with other societal and environmental systems in acquiring and using resources to meet goals and other demands.
- FACS 141. Family Finance.** 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Economic problems of and financial management by the individual and family. Topics include: income patterns, inflation, credit, contracts, housing, financial services, insurance, taxes, investments, retirement income planning.
- FACS 142. Consumer Issues.** 3 Units
Term Typically Offered: Fall, Spring
- Study of effect of consumer movements on protection of consumer rights. Current issues include marketplace fraud and redress; consumer information, education, and decision-making; privacy and environmental concerns; and advocacy for vulnerable consumer groups.
- FACS 143. Consumer Policy.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150 or instructor permission.
Term Typically Offered: Fall, Spring
- Examination of consumer policy and regulations. Emphasis on consumer products, including food and drugs, housing, and credit. Strategies for promoting consumer advocacy. Lecture, discussion, field trips. Field trip(s) may be required.
- FACS 147. Financial and Legal Aspects of Aging.** 3 Units
Prerequisite(s): FACS 141 or instructor permission.
Term Typically Offered: Fall, Spring
- Economic status, financial and consumer issues, legal rights and responsibilities and resource management for aging persons. Emphasis on financial planning for retirement and estate planning. Lecture, discussion, case studies.
- FACS 148. Fashion Law.** 3 Units
Prerequisite(s): FACS 134
Term Typically Offered: Fall only
- This course provides an overview of legal issues affecting the fashion industry and its professionals with an emphasis on fashion entrepreneurship, design, advertising and promotion, production, sourcing, marketing and retailing. Students will also learn about fashion regulatory and policy issues, intellectual property (copyright, trademarks, patents), contractual agreements, leasing, commercial operations and expansion, and the international development of a fashion business.
- FACS 149. Family Financial Counseling.** 3 Units
Prerequisite(s): FACS 141 and senior status.
Term Typically Offered: Fall, Spring
- Examination of professional issues in family financial planning including ethical considerations, regulations, communication skills, and professional responsibility. Development of skills needed by family financial counselors to counsel families with financial problems. Lecture, discussion, case study, counseling sessions.

FACS 150. Family Stress and Coping: Multicultural Focus. 3 Units

Prerequisite(s): FACS 50 or equivalent with instructor permission, and GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Race & Ethnicity Graduation Requirement (RE), GE AREA D

Term Typically Offered: Fall, Spring, Summer

Study of multicultural families and diverse family forms, with a focus on how families function under stress. Family theory and research are applied to the interpretation and analysis of selected literary work, both in print and film formats.

FACS 152. Adolescent Development. 3 Units

Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission.

Term Typically Offered: Fall only

In-depth study of the achievements and challenges associated with the adolescent stage of development. Focus on understanding the needs and motivations of adolescents and the challenges they face within their socio-cultural environment. Lecture, discussion.

Note: Not open to students who have taken PSYC 149. Previous or concurrent enrollment in CHDV 133 strongly recommended.

FACS 154. Issues in Parenting. 3 Units

Prerequisite(s): CHDV 30, or CHDV 35, or FACS 52, or instructor permission

Term Typically Offered: Fall, Spring

Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.

Note: Previous or concurrent enrollment in CHDV 133 strongly recommended. Cross-listed: CHDV 154; only one may be counted for credit.

FACS 155. Family Life Education. 3 Units

Prerequisite(s): FACS 50; and FACS 100 or CHDV 133; and senior standing.

Term Typically Offered: Fall only

Historical and philosophical perspective on family life education across the lifespan. Practice in curriculum development including content, objectives, and teaching strategies.

FACS 156. Child Life and Family-Centered Care. 3 Units

Prerequisite(s): FACS 52 or CHDV 30 or CHDV 35 or a course in child development/human development, covering at least birth through adolescence with instructor permission.

Term Typically Offered: Summer only

Overview of the Child Life profession and child life practices. Focus on family-centered care for children in the healthcare environment and their families. Major course topics include: scope of practice in child life; ethical and professional practice; impact of illness, injury and health on patients and family; techniques and outcomes of preparation; therapeutic play; grief and bereavement.

Note: This course is designed to meet the specifications set forth by the Association of Child Life Professionals (ACLP) for the child life course required for certification as a Certified Child Life Specialist (CCLS)

FACS 159. Adulthood and Aging in Human Development. 3 Units

Term Typically Offered: Fall, Spring

Analyzes the interrelation between physical, psychological, and social development in the middle and later years of adulthood with attention to personal, family and community challenges and opportunities in their cultural context.

FACS 162. Family Support Services. 3 Units

Prerequisite(s): A minimum of 12 units in FACS upper division family area courses.

Term Typically Offered: Fall, Spring

Application of family science to the development, implementation, and evaluation of family support services. Implications of research for practice with diverse families. Focus on developing skills in family-centered services, family-professional collaboration, and resource-based and asset-based intervention. Lecture two hours; fieldwork in the community three hours.

FACS 166A. American Indigenous Families: Issues and Perspectives. 3 Units

Term Typically Offered: Fall, Spring

Application of research and theory specific to Latino/Chicano and American Indian families; strategies for applying this knowledge to areas of service, therapy, policy, and education. Lecture; discussion, Internet enhancement.

Cross Listed: ETHN 166; only one may be counted for credit.

FACS 166B. Asian American Families: Issues and Perspectives. 3 Units

Term Typically Offered: Fall, Spring

Family is an adaptable and changing institution of society. The course will highlight research and theory on Asian American families with an emphasis on applying the information to areas of service, therapy, policy, and education. A comparison of the experiences between various Asian groups in the U.S. will be stressed. Lecture, discussion, Internet enhancement.

Cross Listed: ETHN 167; only one may be counted for credit.

FACS 168. Senior Seminar.**3 Units****Prerequisite(s):** 21 FACS units.**Term Typically Offered:** Fall, Spring

Designed to synthesize knowledge in Family and Consumer Sciences. Examination of the concentration in the major and career exploration. Analysis of public policy and ethical issues, professionalism and leadership strategies. Includes personal and professional competency assessment and development of an academic and professional portfolio.

FACS 195A. Field Study: Selected Areas in Family and Consumer Sciences.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Guided study and experience in some area within Family and Consumer Sciences in which the student needs orientation or greater depth of study in a specialized field.

Credit/No Credit

FACS 195C. Internship.**1 - 3 Units****Prerequisite(s):** Upper division status; instructor permission obtained in the preceding semester; 2.5 GPA or above.**Term Typically Offered:** Fall, Spring

Directed observation and supervised work experience in an approved business, government, or service agency. Internships are offered for the purpose of increasing student understanding of the nature and scope of agency operations and giving students orientation in occupational specialties. Supervision is provided by authorized persons in the cooperating agencies and collaborative supervision is provided by the Family and Consumer Sciences faculty. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.

Note: Student must make arrangements with a faculty member for a work program one semester prior to admittance to the course. A minimum of three hours per week per unit of credit is required.

Credit/No Credit

FACS 195F. Practicum in Family Life Education.**1 - 3 Units****Prerequisite(s):** senior status; GPA of 2.75 or above; NURS 160 or PSYC 134 or HLSC 134; and FACS 155.**Corequisite(s):** If not taken as a prerequisite, FACS 155 may be taken concurrently with instructor's approval.

Directed observation and supervised work experience in an approved educational setting, service agency, business or government agency that provides family life education. Students will move from observing and assisting to developing, delivering and assessing lessons and programs in family life education. Students will gain experience applying educational and developmental theories, curriculum development, and teaching methods to delivering evidence-based and culturally sensitive lessons in the content areas of family life education: parent education, strengthening relationships, and/or sexuality education.

Note: Students must make arrangements with the supervising faculty member one semester prior to admittance to the course.

Credit/No Credit

FACS 199. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

Note: Departmental petition required.

Credit/No Credit

FACS 280. Teaching Methods in Family and Consumer Sciences/Home Economics.**3 Units****Prerequisite(s):** Current enrollment in a teaching credential program or instructor permission.**Term Typically Offered:** Summer only

This course is designed to provide students with materials, classroom management strategies and methods necessary to successfully teach Family & Consumer Sciences (FCS)/Home Economics Careers and Technology (HECT) at the secondary level. Teacher candidates will become acquainted with legislation, standards, teaching strategies, resources, research and student leadership programs.

BS in Family and Consumer Sciences (Family Studies)

Units required for Major: 51

Total units required for BS: 120

Program Description

The concentration prepares students for careers in various human service fields. The program emphasizes an understanding of human development, family communication, and diverse families. The program is approved by the National Council on Family Relations (NCFR) for academic programs in Family Life Education. (Also see certificate program in Family Life Education.)

Minimum Grade Requirement

A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

Note: Students should consult a Department advisor before choosing a concentration.

Total Units		51

¹ Child, Family, and Society will be accepted as an alternative to comply with the CSU Lower Division Transfer Pattern.

² Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (6-9 Units)		
A1 - Oral Communication		3
A2 - Written Communication		3
A3 - Critical Thinking ^{2,3}		0-3
Area B: Physical Universe and Its Life Forms (10-13 Units)		
B1 - Physical Science		3
B2 - Life Forms		3
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)		1
B4 - Math Concepts ^{2,3}		0-3
B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.		3
Area C: Arts and Humanities (12 Units)		
C1 - Arts		3
C2 - Humanities		3
C1/C2 - Area C Course		3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.		3
Area D: The Individual and Society (9 Units)		
Area D Course		3
Area D Course		3
Area D Course ²		0
Area D Course - Take upper-division course to complete Area & upper division requirements.		3
Area E: Understanding Personal Development		
Area E Course ²		0
Total Units		37-43

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students an "OR" option for SOC 8 and STAT 1:

- If student chooses to take SOC 8, they will meet Area A3 and will still be required to complete an Area B4 course.
- If student chooses to take STAT 1, they will meet Area B4 and will still be required to complete an Area A3 course.

Graduation Requirements ¹

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BS in Family and Consumer Sciences (Fashion Merchandising and Design)

Program scheduled for Discontinuation, please see the BS in Fashion Merchandising and Management (p. 905) for Program Requirements.

BS in Family and Consumer Sciences (Nutrition and Food)

Program scheduled for Discontinuation, please see the BS in Nutrition and Food (p. 906) for Program Requirements.

BS in Family and Consumer Sciences (Nutrition and Food-Dietetics)

Units required for Major: 80

Total units required for BS: 120

Program Description

The focus of Family and Consumer Sciences is to enhance the skills and knowledge that will promote the well-being of individuals, families, and communities. Our programs and profession focus on individuals and families in order to achieve an optimum balance between people and their environments. The mission of Family and Consumer Sciences is to empower individuals and families to function interdependently in a global society.

Note: By completing the required core courses in the Dietetics Emphasis, GE Area B (12 units) requirements are met.

Pre-Major Requirements

To declare the Dietetics Emphasis, freshman or transfer students admitted as Nutrition and Food Concentration are required to complete the following grade and core course requirements (28 units: Section A) and submit a Major Change form to the Family and Consumer Sciences Department Office along with transcript copies:

1. An overall GPA of 2.75
2. Completion of the required core courses (28 units) with a "C" or better. Only first or second attempts will be considered.

Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		40-43

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

³ Department offers students an "OR" option for ECON 1A and PHOT 11:

- If student chooses to take ECON 1A, they will meet one area of Area D and will still be required to complete an Area C1 course.
- If student chooses to take PHOT 11, they will meet Area C1 and will not need this area of Area D which is met through FACS 30.

- ⁴ Department offers students an "OR" option for ECON 1B and GPHD 5:
- If student chooses to take ECON 1B, they will meet one area of Area D and will still be required to complete an Area C1 course.
 - If student chooses to take GPHD 5, they will meet Area C1 and will not need this area of Area D which is met through FACS 30.

BS in Nutrition and Food

Units required for Major: 54

Total units required for BS: 120

Program Description

The major prepares students for careers in the field of nutrition, food management, and food product development and sales. The major emphasizes the role of nutrition and food in individual and family health, cultural and behavioral influences on food selection, and the management of commercial and noncommercial food systems.

Minimum Grade Requirement

A minimum grade of "C-" is required for all prerequisite courses within and outside the Department.

Program Requirements

Code	Title	Units
Required Core Courses (29 Units)		
BIO 10	Basic Biological Concepts ¹	3
CHEM 1A	General Chemistry I ¹	5
or CHEM 6A	Introduction to General Chemistry	
or CHEM 5	Chemistry for Nurses	
NUFD 9	Food Safety and Sanitation	3
NUFD 10	Nutrition And Wellness ¹	3
NUFD 11	Principles of Food Preparation	3

Family Life Education

College of Social Sciences and Interdisciplinary Studies

Program Description

The goal of the program is to prepare students to provide family life education in schools, churches, youth programs, family service agencies, and other areas of the community. The certificate program is designed to cover the ten family life substance areas delineated by the National Council on Family Relations NCFR. (See list below). A Sacramento State certificate is awarded upon graduation provided all certificate and degree requirements have been fulfilled.

Note: This program is taken concurrently with established degree requirements. The majority of courses for the certificate program are applicable toward course requirements for a degree in Family and Consumer Sciences. The certificate is not a teaching credential. In conjunction with a Bachelor or Master degree or a state teaching credential, it may be helpful in obtaining employment as a Family Life Educator.

Admission Requirements

1. Students must either be in a degree program at Sacramento State or must apply for graduate admission to the University.
2. Both undergraduates and graduate students must have a GPA of at least 2.5.
3. Students must apply for entry into the program through the certificate coordinator.

Program Requirements

1. Complete a baccalaureate degree program with a major in Family and Consumer Sciences or a related field.

2. A GPA of 3.0 (B grade or higher) must be attained for all courses taken in the program.
3. At least 9 of the 21 required units must be taken in residence at Sacramento State.

FACS 52	The Child In The Family
FACS 152	Adolescent Development
FACS 159	Adulthood and Aging in Human Development
FACS 195C	Internship

National Council on Family Relations Family Life Substance Areas

- Families in Society
- Internal Dynamics of Families
- Human Growth and Development
- Human Sexuality
- Family Resource Management
- Interpersonal Relationships
- Parent Education and Guidance
- Family Law and Public Policy
- Ethics
- Family Life Education Methodology

Career Possibilities

The Sacramento State certificate in Family Life Education can stand alone or serve as a step toward national certification through the National Council on Family Relations (NCFR). Family Life Educators have employment opportunities in a variety of public service areas: social services, health and welfare, recreation, youth programs, community action, preschool/daycare, after school programs, drug/alcohol rehabilitation centers, senior citizens programs, military family support, parent education, community education, extension services, and family service agencies. For information on certification at the national level see www.ncfr.org (<http://www.ncfr.org>).

Gerontology

College of Social Sciences and Interdisciplinary Studies

Program Description

The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

In order to better understand life's complexities, the program guides students to critically examine and explore the issues, impacts, and interventions for elders and their families from an interdisciplinary framework. Throughout coursework, students are exposed to the bio-psycho-social-cultural and gender contexts that exist individually and in aggregate groups within society. Course content challenges all students to identify and analyze existing generalizations, theories, and concepts about aging in order to develop valid understandings based on current research in the discipline. Throughout the program, students are encouraged to actively advocate concerning elder issues.

The program offers a major and minor in Gerontology. Students are encouraged to blend other disciplines of study with Gerontology in order to facilitate varied career alternatives. They are helped in constructing an individual (elective) program of study within their major that reflects their own interests. Using elective courses to begin to build a minor in this area is highly encouraged. The program also assists students in constructing a special master's degree.

Career opportunities for gerontologists are growing rapidly. Employers are realizing the benefits of employing people who have backgrounds in aging along with abilities to address the needs of their older consumers. Gerontology graduates enter careers in both the public and private sectors with healthy and chronically ill elders. The careers are as varied as the goals of the individual and the needs of the organization. Graduates often work in such positions as counselors, advocates, analysts in state agencies for older adults, social workers, nurses, and information and referral specialists. Others have created their own careers in such areas as dental hygiene, human services, food services, travel, and Web design.

Career opportunities for gerontologists are growing rapidly. Employers are realizing the benefits of employing people who have backgrounds in aging along with abilities to address the needs of their older consumers. Gerontology graduates enter careers in both the public and private sectors with healthy and chronically ill elders. The careers are as varied as the goals of the individual and the needs of the organization. Graduates often work in such positions as counselors, advocates, analysts in state agencies for older adults, social workers, nurses, and information and referral specialists. Others have created their own careers in such areas as dental hygiene, human services, food services, travel, and Web design.

Gerontology graduates also often go on to graduate and professional schools in fields such as sociology, psychology, counseling, nursing, criminal justice, family services, and social work.

Degree Programs

BS in Gerontology (p. 912)

Minor in Gerontology (p. 914)

Certificate in Gerontology (Graduate) (p. 914)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Science in Gerontology is also individually accredited by the Association of Gerontology in Higher Education.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Special Features

The focus of the curriculum is upon the biological/psychological/social aspects of aging; social policies; services and research in aging; and practice, administration, and program development, implementation and evaluation skills related to aging.

- An integrated interdisciplinary program of courses and field experiences leads to a Bachelor of Science degree with a Major or Minor in Gerontology.
- Multiple major courses include integrated Service Learning to connect theory, practice, and community service.
- Individuals are prepared for careers in varied gerontological practice areas based upon demographic projections of need for personnel in planning, administering, coordinating, and delivering older adult services.
- Gerontological practitioners' awareness of the effects of social policy on aging individuals and families is emphasized.
- The program helps facilitate students' progression from community colleges to the University when acquiring a BS degree in Gerontology.
- Individuals currently working in the community are afforded opportunities to learn advanced skills and acquire professional training in gerontology.
- The strong relationships between the Gerontology Program and Sacramento area agencies and institutions planning or delivering services for older persons, and their families are key components to this program's success.
- The Gerontology Program helps enhance the interest and commitment of diverse faculty and the University while providing

a vehicle for collaboration regarding community engagement, interdisciplinary study and research in the field of Gerontology.

- The Program provides comprehensive academic preparation for graduate study in Gerontology or other related fields.

Potential Career Possibilities

Counselor · Adult Protective Services · Assessment/Intake Case Worker · California Department of Aging · Case Manager · Consultant · Department of Health Services · Department of Social Services-Older Adult Educator · Guardian/Conservator Staff · Information and Referral Specialist · Legal Aid Assistant · Ombudsman/Advocate · Program Activities Director · Program Specialist · Senior Community Outreach · Geriatric Social Worker · Geriatric Clinical Nurse · Rehabilitation/Job Training Agencies · Senior Retirement/Adult Day Care Centers · Area Agencies on Aging

GERO 21. First Year Seminar: Becoming an Educated Person. 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provide students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support, as well as explore gerontological concepts needed to respond to demographic changes in today's world.

GERO 100. Aging Issues in Contemporary America. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer

Introduction to the field of Gerontology and how the discipline addresses society's aging needs. An examination of current issues in gerontology using a life span perspective focusing on older adults' needs/concerns along life's continuum in various environments. Major topics include implications of the demographic imperative, common aging changes/conditions, myths and stereotypes, effects of health/illness on individual and family roles, basic social issues and policies arising from the graying of America, and media, cultural and gender influences.

- GERO 101. Elder Care Continuum Services and Strategies. 3 Units**
Term Typically Offered: Fall, Spring
- Exploration and analysis of the "elder care service continuum" within the context of changing diverse societal needs, service availability and accessibility, current public policy, and administrative and management issues facing care providers. A multidisciplinary examination of the spectrum of services and programs targeted for older adults and their families. Includes information and referral processes and agencies, recreational and social options, housing alternatives, in-home, residential and skilled care options, health care eligibility criteria, funding sources, and adult protective services.
Note: This is a service learning course.
- GERO 102. Social Policy for an Aging Society. 3 Units**
Prerequisite(s): GOVT 1 or GOVT 150 or equivalent.
Term Typically Offered: Fall, Spring
- Explores context and process for policy making by national and California state governments including ethical dimensions. Applications are developed from students' and instructor's areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicare/Medicaid. Provides background and skills for entry level positions in public or non-profit organizations.
 Cross Listed: PPA 100; only one may be counted for credit.
- GERO 103. Applied Care Management in Gerontological Practice. 3 Units**
Prerequisite(s): GERO 101
Term Typically Offered: Fall, Spring
- Students will analyze issues, services, and interventions related to care management with older adults. They will apply strategies for identifying and accessing services targeted for older adults, their families/caregivers. Students will develop an understanding of unique characteristics/needs of elders, the system approach to working with elders, issues affecting service delivery to this population, and basic practice skills for effective service delivery to elders and families/caregivers. Students will develop an understanding of unique characteristics/needs of elders, the systems approach to working with elders, issues affecting service delivery to this population, and basic practice skills for effective service delivery to elders and families/caregivers.
Note: This is a service learning course.
- GERO 121. Strategies for Optimal Aging. 3 Units**
Term Typically Offered: Fall, Spring
- This course is an in-depth, interdisciplinary, and holistic exploration of health promotion and adaptation paradigms that facilitate optimal and productive longevity. Hardiness and self-efficacy theories along with expectations and experiences enhancing quality of life are explored. Interactions among such variables as activity, diet, exercise, work/leisure, attitudes/beliefs, humor, living environments, spirituality, and social networks are investigated within the contexts of gender, economic, and cultural perspectives.
 Cross listed: GERO 221
- GERO 122. Managing Disorders in Elders. 3 Units**
Prerequisite(s): GERO 121
Term Typically Offered: Fall, Spring
- Study and analysis of prevalent pathophysiological-based diseases and psychological disorders commonly experienced by older adults and frail elder populations. Disease/disorder causes and the effects of chronic illness on individuals' activities of daily living, sexuality, relationships, and coping abilities with changing lifestyles are examined using a life course framework and evidenced-based research. Assessment tools, lab value changes, medication needs, complications/disabilities, traditional/alternative treatments and ethical issues rising from meeting needs are investigated along with implications for caregivers.
- GERO 123. Research on Aging & the Life Course. 3 Units**
Prerequisite(s): Minimum of one GERO upper division course or instructor permission.
Term Typically Offered: Fall, Spring
- Analysis, evaluation, and application of existent gerontological research. Hands-on practice carrying out aging-related research projects, including defining the research question, selecting data collection tools, collecting and analyzing quantitative and qualitative data, and presenting results in narrative and visual formats. Special emphasis on connecting gerontological theory, research, and interdisciplinary practice, accommodating participants with sensory, physical, or cognitive limitations, and ethical issues.
- GERO 124. Perspectives on Death and Dying. 3 Units**
Prerequisite(s): Student's academic level must be Junior or higher to enroll in this class.
Term Typically Offered: Fall, Spring
- Examination of the beliefs, attitudes, and behaviors associated with death and dying. Topics covered include children's and adults' concepts of dying and death; causes and types of death; self-destructive behavior; grief and mourning in the dying person and their survivors; physicians' aid in dying and other legal and ethical issues; and cross-cultural and historical perspectives on death.
 Cross listed: PSYC 151
- GERO 130. Gerontology Practicum. 3 Units**
Prerequisite(s): 24 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122 and instructor permission.
Term Typically Offered: Fall, Spring
- Supervised practicum experience in a community agency planning for or delivering professional services to older adults. This practicum experience is part of two culminating courses for the major and focuses on application of the interdisciplinary nature of the discipline while affording students direct, hands on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontological concepts derived from all gerontology courses and are applied to each student's specific practicum area.
Note: This is a service learning course.
- Credit/No Credit

GERO 131. Gerontology Capstone Practicum. 3 Units
Prerequisite(s): 36 Major units including GERO 101, GERO 102, GERO 103, GERO 121, GERO 122, GERO 130 and instructor permission.
Term Typically Offered: Fall, Spring

Supervised internship experience in a community agency planning for or delivering professional services to older adults. This capstone practicum experience builds on the first internship course and is the final culminating course for the major and focuses on advanced application of the interdisciplinary nature of the discipline while affording students direct, hands on experiences. Includes a field seminar. Seminar discussions focus on the application of gerontologic concepts derived from all gerontology courses and are applied to each student's specific Practicum area.

Note: This is a service learning course. Minors may take this course without taking GERO 130

Credit/No Credit

GERO 199. Special Problems. 1 - 3 Units
Prerequisite(s): Advanced approval of project goal and objectives by program director.
Term Typically Offered: Fall, Spring

Independent research, project, or directed reading.

Note: Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements.

Credit/No Credit

GERO 200. Adaptation To Age Related Changes, Illnesses and Caregiving. 3 Units
Term Typically Offered: Fall, Spring

Exposure to and analysis of positive and negative functional consequences arising from age related changes and illnesses in elders. Content elucidates changes and their effects on elders' levels of wellness using interdisciplinary research and holistic, life course frameworks. Screening assessments, interventions, community resources and services, and ethical issues are addressed for each topic. Caregiving issues and solutions are explored within life span and problem solving frameworks.

GERO 221. Strategies for Optimal Aging. 3 Units
Term Typically Offered: Fall, Spring

This course is an in-depth, interdisciplinary, and holistic exploration of health promotion and adaptation paradigms that facilitate optimal and productive longevity. Hardiness and self-efficacy theories along with expectations and experiences enhancing quality of life are explored. Interactions among such variables as activity, diet, exercise, work/leisure, attitudes/beliefs, humor, living environments, spirituality, and social networks are investigated within the contexts of gender, economic, and cultural perspectives.

Cross listed: GERO 121

GERO 222. Managing Disorders in Elders. 3 Units
Prerequisite(s): GERO 221
Term Typically Offered: Fall, Spring

Offers in-depth study/analysis of prevalent pathophysiological-based diseases and psychological disorders commonly experienced by older adults and frail elder populations. Disease/disorder causes and the effects of chronic illness on individuals' activities of daily living, sexuality, relationships, and coping abilities with changing lifestyles are examined using a life course framework and evidenced-based research. Assessment tools, lab value changes, medication needs, complications/disabilities, traditional/alternative treatments and ethical issues rising from meeting needs are investigated along with implications for caregivers.

Cross Listed: GERO 122; only one may be counted for credit.

GERO 295. Internship/Project. 3 Units
Prerequisite(s): GERO 200, GERO 221, GERO 222.
Term Typically Offered: Fall, Spring

Supervised fieldwork internship or project that is a culminating experience and applies learned gerontological theories and concepts in a community setting where planning, developing, or delivering services to older adults or their families occurs. Students choose an area of practice and negotiate their learning experiences or project with their faculty advisor and field supervisor. Advanced approval of project goal and objectives by program director are required.

Credit/No Credit

GERO 299. Special Problems. 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring

Independent research, project, or directed reading. Open to students who are capable of independent work. A maximum of 3 units may count toward elective major requirements. Advanced approval of project goal and objectives by program director.

Credit/No Credit

BS in Gerontology

Units required for Major: 48
 Total units required for BS: 120

Program Description

The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders and their families.

Minimum Grade Requirement

Students must receive a "C" or better in all major and multidisciplinary core/elective courses.

Program Requirements

Code	Title	Units
Required Major Core Courses (21 Units)		
GERO 101	Elder Care Continuum Services and Strategies	3

GERO 102/ PPA 100	Social Policy for an Aging Society	3
GERO 103	Applied Care Management in Gerontological Practice	3
GERO 121	Strategies for Optimal Aging	3
GERO 122	Managing Disorders in Elders	3
GERO 130	Gerontology Practicum	3
GERO 131	Gerontology Capstone Practicum	3
Research Elective (see advisor) (3 Units)		
Select one of the following: 3		
ECON 140	Quantitative Economic Analysis	
ETHN 194	Research in Ethnic Studies	
GERO 123	Research on Aging & the Life Course	
NURS 170	Foundations for Evidence-Based Nursing Practice ¹	
RPTA 110	Research and Evaluation in Recreation, Parks and Tourism ¹	
SOC 102	Research Methods in Sociology ¹	
SWRK 111	Research Methods and Program Evaluation ¹	
Interdisciplinary Core (15 Units)		
ETHN 133	Crosscultural Aging in America 🌐	3
FACS 141	Family Finance	3
PSYC 151	Psychological Aspects of Death and Dying	3
RPTA 117	Recreation Therapy and Contemporary Aspects of Disability ²	3
SWRK 151	Health Services and Systems ³	3
Electives (9 Units)		
Select 9 units of the following: 9		
GERO 199	Special Problems	
HLSC 116	Public Health Administration and Policy	
HLSC 134	Understanding Human Sexuality	
HROB 101	The Management of Contemporary Organizations	
KINS 136	Sport And Aging	
ENGL 120S	Writing in the Social Sciences	
FACS 113	³	
FACS 119		
FACS 150	Family Stress and Coping: Multicultural Focus 🗍🌐 ³	
FACS 159	Adulthood and Aging in Human Development	
GERO 100	Aging Issues in Contemporary America ³	
HLSC 150	Aging and Health	
PSYC 150	Psychological Aspects of Aging	
PSYC 152	Psychological Aspects of Health, Wellness, and Illness	
SOC 146	Sociology of Aging	
Total Units		48

¹ Gerontology students will be allowed to enroll without prerequisites but need senior status.
² Gerontology students will be permitted to enroll without prerequisites
³ Course also satisfies General Education (GE)/General Education Requirement.

Notes:

- **Additional optional courses** which are recommended to support the Gerontology major are the following:

Code	Title	Units
GERO 21	First Year Seminar: Becoming an Educated Person	3
BIO 20	Biology: A Human Perspective	3
CHDV 30	Human Development	3
FACS 50	The Family and Social Issues 🌐	3
FACS 113		3
NURS 10	Health Care: Issues and Delivery Systems	3
PSYC 2	Introductory Psychology	3
PSYC 8	Methods of Psychology	3
RPTA 106	Introduction to Inclusive Recreation and Recreation Therapy	3
SOC 1	Principles of Sociology	3
SOC 101	Introduction to Statistics for Sociologists	4
STAT 1	Introduction to Statistics	3
SWRK 110	Statistics and Research for Social Workers	3

- **Major Core courses** have the potential of offering a one unit Service Learning (SL) option for each of the three theory courses (GERO 102, GERO 121 and GERO 122 that do not already include SL. These units could be combined and serve as one elective (GERO 199) if there is an approved written plan by the student and academic advisor prior to enrolling in the course.

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3
A2	Written Communication	3
A3	Critical Thinking	3
Area B: Physical Universe and Its Life Forms (13 Units)		
B1	Physical Science	3
B2	Life Forms	3
B3	Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)	1
B4	Math Concepts	3
B5	Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)		
C1	Arts	3
C2	Humanities	3
C1/C2	Area C Course	3
C1/C2	Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (12 Units)		
Area D Course		3
Area D Course		3
Area D Course		3
Area D Course	Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)		

Area E Course	3
Total Units	49

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

Graduation Requirements ¹

American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (9 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE) ²		0
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Certificate in Gerontology

Units required for Certificate: 18¹

Program Description

The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

Candidates must maintain an overall GPA of 3.0 in courses submitted for the certificate.

¹ Graduate students wishing to pursue independent study focusing on aspects of Gerontology are encouraged to also take GERO 299: Special Problems.

Eligibility Information

Students must either be in a graduate degree program at Sacramento State or must apply for graduate admission to the University.

Program Requirements

Code	Title	Units
Required Courses (18 Units)		
GERO 101	Elder Care Continuum Services and Strategies	3
GERO 200	Adaptation To Age Related Changes, Illnesses and Caregiving	3
GERO 221	Strategies for Optimal Aging	3
GERO 222	Managing Disorders in Elders	3
GERO 295	Internship/Project	3
GERO 102/ PPA 100	Social Policy for an Aging Society	3
or GERO 103	Applied Care Management in Gerontological Practice	
Total Units		18

Minor in Gerontology

Units required for Minor: 21

Program Description

The Gerontology Program provides an applied interdisciplinary approach to studying the human aging process and the challenges encountered by older adults and their families as they interact in contemporary society. The curriculum is anchored in life course and humanistic theory, and concentrates on the needs of both healthy and chronically ill elders.

Minimum Grade Requirement

Students must receive a "C" or better in all Gerontology Minor courses.

Program Requirements

Code	Title	Units
Required Lower Division Courses		
There are no specific lower division course requirements ¹		
Required Upper Division Courses (21 Units)		
ETHN 133	Crosscultural Aging in America 🌐	3
Select one of the following:		
FACS 159	Adulthood and Aging in Human Development	3
GERO 121	Strategies for Optimal Aging	3

GERO 131	Gerontology Capstone Practicum	3
Total Units		21

¹ Students must complete at least 45 units of college or university work before becoming eligible to enroll in the program. Students are also encouraged to meet with the Program Director for advising *prior* to enrolling in any Gerontology classes.

Interdisciplinary Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

This program recognizes that some subject matter is more thoroughly explored by drawing on various perspectives and methodologies from more than one discipline. Students, with faculty supervision, engage learning opportunities that encourage combining a range of information and experiences into a challenging individualized learning project. The office administering, guiding, reviewing, and monitoring the interdisciplinary efforts, when they cross College or Divisional lines, is that of the Dean of the College of Social Sciences and Interdisciplinary Studies. Offerings are listed under the heading Interdisciplinary (ID) in the *Class Schedule*. Questions pertaining to the establishment and "equivalency" of courses should be directed to the Dean of the College of Social Sciences and Interdisciplinary Studies

Labor Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Labor Studies Program is concerned with the world of work, workers, and their organizations. It investigates the cultural, economic, and political forces which provide the environment in which people make a living. It is an inter-disciplinary program which combines broad perspectives with specific skills.

The program emphasizes the world of work from the view of the individual in the workplace, the labor market, and as a member of a work group or labor union. The roles of employers, government, and labor unions, as adversaries and cooperators in an increasingly competitive world, are covered. Courses combine analytical and practical elements, bridging academia with the world of work.

Degree Program

Minor in Labor Studies (p. 915)

LBRS 100. Labor and the American Social Structure.  **3 Units**

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.

Cross Listed: SOC 176; only one may be counted for credit.

LBRS 195. Labor Studies Internship. **1 - 3 Units**

Term Typically Offered: Fall, Spring

Supervised work experience or research in relevant institutions providing an opportunity to apply classroom theories and principles to the "real world." Partial supervision may be supplied by host institution. Requires approval of the Labor Studies Coordinator.
Credit/No Credit

LBRS 199. Special Problems. **1 - 3 Units**

Term Typically Offered: Fall, Spring

Individual projects or directed reading open to students competent to carry on individual work under the direction of a faculty sponsor. Admission requires approval of the faculty sponsor and the Labor Studies Coordinator.
Credit/No Credit

Minor in Labor Studies

Units required for Minor: 21

Program Description

The Labor Studies Program is concerned with the world of work, workers, and their organizations. It investigates the cultural, economic, and political forces which provide the environment in which people make a living. SOC 164	Sociology of Globalization
<hr/>	
Total Units	21

Note: Electives may be substituted for some required courses with approval of the Labor Studies Coordinator.

Liberal Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program: Pre-credential and General.

- The Pre-Credential program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The major comprises the core section, with courses in reading, language and literature, mathematics, natural science, history and social sciences, visual and performing arts, physical education, human development, and health. The pre-credential program requires a 12-unit area of focus.
- The General program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers. The Liberal Studies major is an excellent preparation for careers in government service, public administration, business, management, community service, counseling, law, librarianship, public health, as well as professional or graduate school. This major requires students to include a minor.

The Liberal Studies major is a complex program requiring early and continuing contact with an advisor. Advisors meet with an advisor at least once each semester with students to provide a hands-on approach to learning. Students must complete 120 units and meet the University foreign language requirement in order to earn a Bachelor of Arts degree. Students are urged to obtain advice as early as possible to avoid delays in the completion of these requirements. The Liberal Studies program director and faculty and staff advisors are located in Lassen Hall 2008, (916) 278-6342.

BA in Liberal Studies (Theatre) (p. 942)

BA in Liberal Studies (United States History) (p. 944)

BA in Liberal Studies (World History) (p. 946)

Accreditation

In addition to California State University, Sacramento's full accreditation by the Western Association of Schools and Colleges, the Bachelor of Arts in Liberal Studies (pre-credential) is also individually accredited by the California Commission on Teacher Credentialing (CCTC). Early planning is strongly advised to prepare students to apply to the professional education program. Details about multiple subject credential programs and regular information sessions are provided by the Teaching Credentials Office in Eureka Hall 401, (916) 278-6639.

Licensure and Credentialing Disclosure

Admission into programs leading to licensure and credentialing does not guarantee that students will obtain a license or credential. Licensure and credentialing requirements are set by agencies that are not controlled by or affiliated with the CSU and requirements can change at any time. For example, licensure or credentialing requirements can include evidence of the right to work in the United States (e.g., social security number or tax payer identification number) or successfully passing a criminal background check. Students are responsible for determining whether they can meet licensure or credentialing requirements. The CSU will not refund tuition, fees, or any associated costs, to students who determine subsequent to admission that they cannot meet licensure or credentialing requirements. Information concerning licensure and credentialing requirements are available from the Dean of Undergraduate Studies, Sacramento Hall 234, (916) 278-5344.

Career Possibilities

The Liberal Studies major provides students with a wide variety of career opportunities and options. Liberal Studies provides essential learning employers want for workforce readiness: knowledge of human cultures and the physical and natural world, intellectual and practical skills, personal and social responsibility, and integrated learning.

RECHS, ADAM

SEO, MI-SUK

ANDEREGG, KRISTEN

ELCE, KIMBERLY

LBST 110. California Studies.**3 Units****Prerequisite(s):** GOVT 1 or equivalent.**Term Typically Offered:** Fall, Spring

Multidisciplinary, analytical view of California that identifies its ethnic and racial diversity within the political, economic and social development of the state. Examines the environmental and geographic dimensions of the state as well as the demographic and land-use trends that have contributed to California's uniqueness.

LBST 194. Liberal Studies Cooperative Education Experience. 3 Units**Prerequisite(s):** Upper division status, and instructor permission.**Term Typically Offered:** Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in schools or related settings. Students gain field experience through supervised employment in school districts and other education-related settings.

Note: May be repeated once for credit.

Credit/No Credit

BA in Liberal Studies (American Studies)

Units required for Major: 100-103**Total units required for BA:** 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for

a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Liberal Studies (California Studies)

Units required for Major: 100-103

Total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration.

There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Liberal Studies (Linguistics/Composition)

Units required for Major: 100-103

Total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

Program Requirements

BA in Liberal Studies (Multicultural Studies)

Units required for Major: 100-103

Total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

Program Requirements

Code	Title	Units
Core Requirements for traditional program (88 Units) ¹		
<i>Reading, Language and Literature</i>		
COMS 5	The Communication Experience ²	3
ENGL 5	Accelerated Academic Literacies ²	3
ENGL 16	Structure Of English	3
ENGL 20	College Composition II ^{2,3}	3
ENGL 116A	Studies in Applied Linguistics	3
ENGL 116B	Children's Literary Classics	3
<i>Mathematics ⁴</i>		
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics ²	3
MATH 107A	Fundamental Mathematical Concepts	3
MATH 107B	Fundamental Mathematical Concepts	3
<i>Natural Science</i>		
BIO 7	Introduction to the Science of Biology ²	4
CHEM 106	Chemical Concepts	3
GEOL 8	Earth Science ²	3
GEOL 8T	Earth Science Lab for Teachers	1
PHYS 107	Conceptual Physics and Scientific Inquiry	4
<i>Social Science and Humanities</i>		
GEOG 100	Themes In World Geography	3
GOVT 1	²	3
HIST 17A	United States History, 1607-1877 ²	3
HIST 50	World Civilizations, Beginnings-1600 ²	3
HIST 132	Topics In World History	3
HIST 187	Topics in United States History 1600-1900	3
or ECON 104	Introduction to the United States Economy	
LBST 110	California Studies	3
<i>Visual and Performing Arts</i>		
ART 133	Art Education for Children	3
MUSC 101	Experiences In Music	3
THEA 118	Children's Theatre	3
<i>Physical Education</i>		
KINS 172	Movement Education	3
<i>Health Science</i>		

HLSC 136	School Health Education	2
<i>Human Development</i>		
CHDV 35	Child and Adolescent Development	3
<i>Integrative Study</i>		
HRS 162	American Space and Identity	3
or MATH 107C	Elementary Mathematics and the Learning Process	
<i>Field Experience</i>		
CHDV 35F	Human Development and Elementary Field Experience	2
Select one of the following:		3
EDUC 194	Cooperative Education Experience	
EDUC 124A	Tutoring Children in Mathematics	
& EDUC 124B	Tutoring Children in Mathematics: Practicum	
EDUC 125A	Tutoring Children in Reading	
& EDUC 125B	Tutoring Children in Reading Practicum	
Summative Assessment Requirement		
Students who complete the Liberal Studies major must pass the California Subject Examination for Teachers (CSET) ⁵		
Requirements for Concentrations (for traditional program) (12-15 Units)		
Select one of the following concentrations:		12
		-
		15
	Linguistics/Composition	
	Literature	
	Foreign Language	
	United States History	
	World History	
	California Studies	
	American Studies	
	Multicultural Studies	
	Mathematics	
	Natural Science	
	Art	
	Music	
	Theatre	
	Physical Education	
	Human Development	
Total Units		100-103

- ¹ The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.
- ² Course also satisfies General Education (GE)/Graduation Requirement.
- ³ Course to meet critical thinking requirement. See advisor for specific options.
- ⁴ Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements. In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.

⁵ In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major **must** pass the California Subject Examination for Teachers (CSET).
Note: Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

Concentration in Multicultural Studies

Code	Title	Units
EDUC 170	Bilingual Education: Introduction to Educating English Learners	3
ETHN 11 or ETHN 100	Introduction to Ethnic Studies ¹ Ethnic America ¹	3
Select two from any of the following categories or one from each of two categories: ²		
<i>Chicano/Latino Emphasis</i>		
ANTH 106	Culture and Personality of the Chicano Child	
ETHN 30	Introduction to Chicano/Latino Studies ¹	
ETHN 130	Chicano/Mexican-American Experience ¹	
ETHN 131	La Raza Studies ¹	
ETHN 132	La Mujer Chicana	
HIST 178	Mexican-American History ¹	
<i>Asian American Emphasis</i>		
ETHN 110	The Asian American Experience ¹	
ETHN 111	Southeast Asians in the US	
<i>African American Emphasis</i>		
ETHN 170	Pan African Studies ¹	
HIST 177	The African-American Experience, 1603-Present ¹	
<i>Native American Emphasis</i>		
ETHN 140	Native American Experience ¹	
HIST 171		
<i>Women's Studies Emphasis</i>		
HIST 167	History of American Women ¹	
WOMS 115	Introduction to Women's Studies ¹	
WOMS 136	Gender, Race, and Class ¹	
WOMS 137	Women Of Color ¹	
Total Units		12

¹ Course also satisfies General Education (GE)/Graduation Requirement.
² If planning to pursue a multiple subject credential with a Bilingual Emphasis (BCLAD) in Spanish or Asian languages, students must take two courses from Chicano/Latino Emphasis or Asian American Emphasis, respectively.

Note: There is no overlap with core course requirements in this concentration.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects		
A1 - Oral Communication ²		0
A2 - Written Communication ²		0
A3 - Critical Thinking ²		0

Area B: Physical Universe and Its Life Forms (3 Units)

B1 - Physical Science ²	0
B2 - Life Forms ²	0
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4 - Math Concepts ²	0
B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3

Area C: Arts and Humanities (9 Units)

C1 - Arts	3
C2 - Humanities ²	0
C1/C2 - Area C Course ⁰	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.	3

Area D: The Individual and Society

Area D Course ²	0
Area D Course ²	0
Area D Course ²	0
Area D Course - Take upper-division course to complete Area & upper division requirements. ²	0

Area E: Understanding Personal Development (3 Units)

Area E Course	3
Total Units	15

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (3 Units)		
American Institutions: U.S. History ²		0
American Institutions: U.S. Constitution & CA Government ²		0
Writing Intensive (WI)		3
Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II ²		0
Race and Ethnicity in American Society (RE) ²		0
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Liberal Studies (Music)

Units required for Major: 100-103

Total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

Total Units		100-103

¹ The Core Requirements for the nontraditional program are similar to the Core Requirements for the traditional program except there are a number of substitutions that can be made. Please see an advisor for more information.

² Course also satisfies General Education (GE)/Graduation Requirement.

- ³ Course to meet critical thinking requirement. See advisor for specific options.
- ⁴ Students who complete a mathematics concentration may substitute MATH 30, MATH 31, and MATH 35 for the above requirements. In addition, there are other ways of completing a concentration in mathematics. For further information on a concentration in mathematics, please consult the mathematics advisor in Liberal Studies.
- ⁵ In compliance with California Commission on Teacher Credentialing standards, in order to receive subject matter competency certification, students who complete the Liberal Studies major **must** pass the California Subject Examination for Teachers (CSET). **Note:** Students will need to meet the foreign language graduation requirement in effect as per their catalog year.

Concentration in Physical Education

Code	Title	Units
Fundamental and Creative Movement Skills (6 Units)		
KINS 138	Teaching Strategies in Physical Education	3
KINS 172	Movement Education	3
Human Movement, Motor Development and/or Motor Learning (3 Units)		
Select one from the following:		3
KINS 150	Exercise and Sport Physiology	
KINS 176	Perceptual Motor Development	
KINS 177	Introduction to Adapted Physical Education	
Team Sport (3 Units)		
KINS 145	Pro Act III - Team Sports	3
Individual, Dual, Nontraditional, Global Sport and Games (1-2 Units)		
Select one from the following:		1 - 2
KINS 141	PRO ACT I - Dual Sports	
KINS 146	PRO ACT IV Individual Sports	
KINS 148	ProAct V - Nontraditional Games and Sports	
KINS 149	Professional Activities of Health and Skill Related Fitness	
Total Units		13-14

Note: Students must complete the above classes for this concentration. A total of 10 upper division units (one in each category) must be completed for the supplemental authorization credential for Physical Education. (This allows teachers to teach physical education in grades K-9.) A grade of "C" or higher is required in every course to meet this requirement for a California Commission on Teacher Credentialing approved Supplementary Authorization (if still available).

General Education Requirements¹

Code	Title	Units
Area A: Basic Subjects		
A1	Oral Communication ²	0
A2	Written Communication ²	0
A3	Critical Thinking ²	0
Area B: Physical Universe and Its Life Forms (3 Units)		
B1	Physical Science ²	0
B2	Life Forms ²	0

B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5) ²	0
B4 - Math Concepts ²	0
B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.	3
Area C: Arts and Humanities (12 Units)	
C1 - Arts	3
C2 - Humanities	3
C1/C2 - Area C Course	3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.	3
Area D: The Individual and Society (6 Units)	
Area D Course ²	0
Area D Course ²	0
Area D Course	3
Area D Course - Take upper-division course to complete Area & upper division requirements.	3
Area E: Understanding Personal Development (3 Units)	
Area E Course	3
Total Units	24

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies GE.

Graduation Requirements¹

Code	Title	Units
Graduation Requirements (required by CSU) (3 Units)

Graduation Requirements (required by Sacramento State) (6 Units)		
English Composition II ²		0
Race and Ethnicity in American Society (RE) ²		0
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).
Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Required in Major; also satisfies Graduation Requirement.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

BA in Liberal Studies (Theatre)

Units required for Major: 100-103

Total units required for BA: 120

Program Description

The Liberal Studies program is an interdisciplinary major, which encompasses a wide variety of areas of knowledge in a multidisciplinary curriculum. The program provides a broad academic program that encourages academic excellence, diversity, community, and collaboration. There are two tracks in the Liberal Studies Program, the traditional program, and the nontraditional program. The traditional program is a multidisciplinary major designed for students who intend to become K-8 or special education teachers in California, and it has been approved by the California Commission on Teacher Credentialing. Its purpose is to provide beginning teachers with a strong grounding in the wide ranging subject matter that will be needed to be effective teachers. The nontraditional program is designed for students who are interested in a multidisciplinary major, but who do not necessarily plan to become teachers.

Advisors meet at least once each semester with students to provide a hands-on approach to learning. The Liberal Studies major is also an excellent preparation for careers in public service, management, counseling, law, librarianship, medicine, and professional or graduate education in business.

Minimum Grade Requirement

A minimum grade of "C-" is required in all courses applied to the Liberal Studies major.

Requirements for Concentrations (Traditional Program)

All concentrations require a minimum of 12 units, 3 of which may overlap with the core course requirements (except for concentration in multicultural studies). Students who wish to complete requirements for a supplementary authorization in any CCTC-approved discipline, which allows them to teach that subject in grades K-9, should see an advisor for important information.

Requirements for Non-traditional Program

Students who are following the nontraditional program will complete a minor instead of a concentration. Please talk to an advisor for more information.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Military Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The Military Studies Minor is an appropriate and timely course of study for any student interested in defense policy, the military's role in society, and military history. The successful completion of the minor will provide additional recognition for students wishing to understand these important subjects.

The Military Studies Minor is an interdisciplinary minor of 21 units which provides a broad range perspective on a vital contemporary issue. The program focuses on the nature of human conflict, conflict resolution, international power relations, historical battles and campaigns, the military in domestic society, and myriad sub-topics. It enhances student exposure to, and understanding of, relevant military subjects. The Military Studies Minor is compatible with, and complements, several majors, i.e., Economics, Geography, Government, and History.

Peace and Conflict Resolution

College of Social Sciences and Interdisciplinary Studies

Program Description

Peace and Conflict Resolution is an interdisciplinary minor with most of its courses drawn from the Social Sciences. The courses introduce students to the processes of understanding and changing social conditions in order to lead to a more peaceful, just, and conflict-free society and world.

We find that war and oppression are subject to study and to change, and the university is an appropriate setting for the study and pursuit of alternate means of resolving conflicts.

The minor complements a number of majors, including many in the Humanities, Social Sciences, and Professional Schools.

Degree Program

Minor in Peace and Conflict Resolution (p. 949)

Special Features

- A philosophy basic to the study of Peace and Conflict Resolution is praxis, the creative combination of analysis and action. Students in the program are encouraged to develop the knowledge base, skills, and political courage necessary for effective leadership in a democratic society.
- The program's faculty is widely published and active in a number of fields related to peace and conflict resolution.
- The goal of the program is to educate adults to be responsible and courageous citizens, and, if the students choose, to become professional peace workers. To achieve this end we practice an interdisciplinary approach, drawing upon courses and faculty in several academic areas including anthropology, communication studies, economics, education, government, environmental studies, ethnic studies, and women's studies.

Work Sector Field Experience (1-15 Units)

Complete at least 50 hours of field experience in the same work sector in which you took coursework. There are three options for satisfying the field experience requirement

- a) Service learning course(s) where the service is related to your chosen work sector (must be pre-approved by the program advisor)
- b) (1-6) ID 195 Field Experience (must be related to your chosen work sector, pre-approved by the program advisor, and supervised by the faculty)
- c) An approved internship course in your chosen work sector listed below

Options may be combined if necessary to achieve the required number of hours of field experience. The Student Handbook lists possible field experience sites.

*Approved Internship Courses**Agriculture Work Sector*

The following courses may only be taken by Peace Corps Prep students who are Geography Majors

GEOG 195A	Geography Internship A
GEOG 195B	Geography Internship B
GEOG 195C	Geography Internship C

The following courses may only be taken by Peace Corps Prep students who are in the Honors Program

HONR 195	Community Fieldwork and Internship

Political Science

College of Social Sciences and Interdisciplinary Studies

Program Description

Political Science, or Government, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

The Government major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Government, two concentrations, and the minor in Government. The Government major is structured to provide students with a background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

Students should select a faculty advisor who shares the student's academic interests. For students who wish to pursue graduate work in Government, a Master of Arts degree is offered.

Degree Programs

BA in Political Science (p. 976)

BA in Political Science (International Relations) (p. 977)

BA in Political Science and Journalism (p. 979)

Minor in Political Science

MA in Political Science (California and its Political Environment) (p. 980)

MA in Political Science (International Relations/Comparative Government) (p. 982)

MA in Political Science (Political Theory) (p. 983)

Capital Fellows Certificate in Applied Policy and Government (p. 980)

Special Features

- Located in the state capital, the Sacramento State program offers unusual opportunities for the study of government and politics and especially for internships. Students have served internships with state legislators, legislative committee staffs, special interest and lobbying groups, and administrative agencies. Placement is also possible in local government executive agencies and with county supervisors, city council members, and selected political campaigns. Students applying for internships should have had (or be taking in the same semester) POLS 180, California State and Local Government, and must have passed the Writing Placement for Juniors Examination.
- Sacramento State students may apply for the Sacramento Semester Program, which brings students from all California State University campuses to Sacramento for one semester to take advantage of the unique learning experience at the State Capitol. The heart of this program is six units of internship with the legislature or other state offices. An accompanying 6 unit seminar course in state government and politics allows students to integrate their practical internship experience with academic work.
- Students who work in the day will be interested to know that class scheduling permits completion of the general Government major in the late afternoon and evening hours.

Career Possibilities

Government majors enter careers in government at the local, state, or federal level, political campaigns, non-profit and non-governmental organizations, lobbying, urban planning, or policy-related fields of all kinds. Others go into teaching at all levels, journalism, business, and Government, of course, is a popular major for students interested in pursuing legal careers. Examples of possible careers include: policy analyst, specialist in legislative and governmental relations, budget analyst, campaign manager, Foreign Service officer, attorney, paralegal, high school teacher.

POLS 1. Essentials Of Government.

3 Units

General Education Area/Graduation Requirement: GE AREA D, U.S.

Constitution + California State & Local Govt

Term Typically Offered: Fall, Spring, Summer

Examines the U.S. Constitution, the U.S. system of governments and the ideas and values on which they are based. Fulfills state code requirements for U.S. Constitution and California State and Local Government. Students who believe they have a good fundamental knowledge of the institutions of American Government are encouraged to consider a designated upper division course to fulfill the state requirement.

- POLS 1H. Honors Government.** **3 Units**
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring
- Explores some of the most influential works of politics and political writing in American history, and challenges contemporary analysis of political institutions and processes. Examines the structure of the Constitution, issues of federalism, the growth of civil rights, and the processes of government, with a comparative element. Explores the unique characteristics of California state politics.
- POLS 10. The Meaning of Government: An Introduction to Political Ideas.** **3 Units**
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall only
- Examination of the ideas of various authors about governing and being governed. Topics include: the scope and limits of freedom, the causes and characteristics of the state, the content of politics, the nature of authority, the problems of power and the duty to obey.
- POLS 35. World Politics.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Basic introduction to global politics focusing on a broad range of issues and problems relating to conflict and cooperation among nations, and on similarities and differences among nations' governmental institutions, structures and processes.
- POLS 96. California Constitution & Government.** **1 Unit**
Prerequisite(s): Instructor approval required.
Examines the California state constitution, the structure and role played by both the state government and local governments in California. Students who pass the course will petition the Dean of Undergraduate Studies for credit in meeting the California Government portion of the American Institution requirement.
Note: Experimental course.
Credit/No Credit
- POLS 100. Introduction to Research Methods in Political Science.** **3 Units**
Term Typically Offered: Fall, Spring
- Examines the foundations of scientific research methodology in political and social science. Designed to introduce students to the basic conceptual, observational and analytical methods of empirical research in political science and related social sciences.
- POLS 110. Political Thought I.** **3 Units**
Term Typically Offered: Fall, Spring
- History of political theory, covering some important thinkers and topics during the Ancient, Medieval and Early Modern periods.
- POLS 111. Political Thought II.** **3 Units**
Term Typically Offered: Fall, Spring
- History of political theory, covering some important thinkers and topics from the Early Modern period to the early 20th century.
- POLS 112. Current Political Thought.** **3 Units**
Term Typically Offered: Fall, Spring
- Current issues in political thought, with emphasis upon developments in the political philosophies of democracy, fascism, communism, conservatism, liberalism. Ideas are analyzed with reference to assumptions on which they are based and their relevance for political institutions and problems.
- POLS 113. American Political Thought.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D, U.S. Constitution + California State & Local Govt
Term Typically Offered: Fall, Spring
- Assessment of ideas that are central to the development of an American political tradition, as those ideas influence government at the federal, state and local levels. Meets the state requirements in U.S. Constitution and California State and Local Government.
- POLS 115. Democratic Theory.** **3 Units**
Term Typically Offered: Spring only
- Introduction to basic questions of democracy. Draws on classical and contemporary writings to explore what democracy means and various forms of democratic government, politics, and culture: direct, representative, liberal, republican, pluralist, elitist. Specific topics may include: definitions of democracy, justifications for democracy, arguments for increasing or limiting democratic participation, tasks of political representatives, democratization of social institutions, and the relationship between globalization and democracy.
- POLS 117. Black Political Thought.** **3 Units**
Term Typically Offered: Spring only
- Systematically and analytically introduces the predominant political trends and concepts presently entertained and harbored in the Black Community. A necessary adjunct to this dialogue is the racist theme in American society since on balance this is the matrix out of which the political alternatives and concepts grew.
Cross Listed: ETHN 117; only one may be counted for credit.
- POLS 118. Just War, Natural Right, and the Law of Nations.** **3 Units**
Term Typically Offered: Fall only
- Examines fundamental conceptual questions about morality, law, and international relations through great works of political theory. Topics will cover natural right, sovereignty, just war, imperialism, national security, and international obligations. Authors read will include Thucydides, Aristotle, Aquinas, Machiavelli, Grotius, Montesquieu, Kant, Hegel, Marx, Mill and Nietzsche.
- POLS 119A. Socialism Marxism-Communism.** **3 Units**
Term Typically Offered: Fall only
- Analyzes the basic writings and ideas of Socialist and Marxist writers and the implications of their ideas.

<p>POLS 119B. Greek Political Thought. 3 Units Term Typically Offered: Fall only</p>	<p>POLS 123. Elements Of Law. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Fall only</p>
<p>Study of the political thought of Greece from Homer to Demosthenes, including Plato, Thucydides, Sophocles, and other Greek thinkers. Topics include the birth of democracy, the sciences and philosophy, Athens' rise to prominence, its defense of freedom against Persia, and its own development of an empire. Examination of Greek thoughts about justice, authority, freedom, equality, and culture. The events that shaped ideas and ideas that shaped events, as well as our understanding of the modern world, will be covered.</p>	<p>Current legal thought in the U.S. with special emphasis on the relationship of law to history, economics, anthropology, and government; the nature of law; the role of legislators, lawyers, and judges in making the legal system.</p>
<p>POLS 119D. Shaping of the Modern World. 3 Units Term Typically Offered: Spring only</p>	<p>POLS 126. Politics and Lawyers. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Fall, Spring</p>
<p>This course examines major problems that have shaped the modern world, the historical and intellectual roots of the modern world, and debates over the meaning of modernity. Considers how both advocates and critics of modernity have understood the relation of history, philosophy, politics, nature, religion, economics, and other key concepts. Specific topics may include: the development of modern science, technological progress, democratic institutions, capitalism, colonialism, secularization, religious tolerance, and individual freedom.</p>	<p>Examines and analyzes the pervasiveness of lawyers and their activities in political realities; what do lawyers do; politics of prosecution and defense; politics within the profession; professional mobility; politics of the judiciary; lawyers in government.</p>
<p>POLS 120A. Constitutional Law. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Fall, Spring</p>	<p>POLS 127. Elements of International Law. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Spring only</p>
<p>Basic junior level course in Public Law. A study of leading decisions of the U.S. Supreme Court and other materials pertaining to the power of Congress, the President and the Judiciary; relations between states and nation; and civil rights. Considers such topics as the separation of powers, judicial review, Congress, and the President.</p>	<p>While tracing the evolution of historical antecedents, centers upon modern literature in the field. The scope is broad and the problems vary, but among the areas to be studied are: 1) Is international law really law?; 2) historical foundations; 3) international legal institutions and structures; 4) supra-legal international orders, structures, and institutions and their meaning to international law; 5) world order and world law; and 6) an international "Bill of Rights.</p>
<p>POLS 120B. Constitutional Rights and Liberties. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Fall, Spring</p>	<p>POLS 128. Environment and the Law. 3 Units Term Typically Offered: Spring only</p>
<p>Basic junior level course in Public Law. A study of rights and immunities under the U.S. Constitution: examines leading decisions of the U.S. Supreme Court and other materials pertaining to freedom of expression, freedom of association, equality and due process of law.</p>	<p>Introduction to environmental law, including: the evolution of environmental legislation, environmental issues in the court system, environmental regulation and administrative law and environmental torts. Emphasis is on understanding legal process and the special challenges environmental problems present to the legal system. Cross Listed: ENVS 128; only one may be counted for credit.</p>
<p>POLS 121. American Legal History. 3 Units Term Typically Offered: Fall only</p>	<p>POLS 130. International Politics. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Examines the interaction of law, society, and politics in America from the colonial period to the present with special emphasis on law as an arena of social and cultural conflict. Major topics include the development of the common law in early America; the law of slavery and its impact on constitutional development; the role of the law in defining controversies over race and gender; legal thought and education; and the role of the Supreme Court in 20th Century America. Cross Listed: HIST 180; only one may be counted for credit.</p>	<p>Basic junior-level course in International Relations. Current international tensions; the motivating forces influencing world politics; and the role of diplomacy and international organizations in resolving conflicts.</p>
<p>POLS 122. The Law and Bureaucracy. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Not offered</p>	<p>POLS 131. International Organization. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Spring only</p>
<p>Examines constitutional and statutory limits of bureaucratic power in the American political system.</p>	<p>Examines human efforts to create supranational organizations to promote world peace and prosperity. The focus will be on social, political, and economic activities and problems which have developed and proliferated since the end of the second World War.</p>
<p>POLS 123. Elements Of Law. 3 Units Prerequisite(s): GOVT 1 or GOVT 150 Term Typically Offered: Fall only</p>	<p>POLS 132. War and Peace in the Nuclear Age. 3 Units Term Typically Offered: Not offered</p>
<p>Study of the political thought of Greece from Homer to Demosthenes, including Plato, Thucydides, Sophocles, and other Greek thinkers. Topics include the birth of democracy, the sciences and philosophy, Athens' rise to prominence, its defense of freedom against Persia, and its own development of an empire. Examination of Greek thoughts about justice, authority, freedom, equality, and culture. The events that shaped ideas and ideas that shaped events, as well as our understanding of the modern world, will be covered.</p>	<p>Covers the discovery of atomic fission, the development of the atomic bomb and the evolution of U.S. nuclear weapons and strategy from 1945 to the present. It examines political, strategic, bureaucratic, economic and cultural forces that have shaped U.S. nuclear policy since Hiroshima. The problem of international security in the Nuclear Age is also addressed.</p>

- POLS 133. American Defense and National Security.** **3 Units**
Term Typically Offered: Spring only
 Analyzes U.S. security policy, looking at the structure and ideologies of the security system, the requirements of national defense, and the roles played by conventional and nuclear weapons in protecting and promoting American security.
- POLS 134. War, Peace and the Mass Media.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring, Summer
 Concerned with the relationship of mass media to war and the possibilities for peace, with emphasis on recent concepts of political communication.
 Cross Listed: JOUR 134; only one may be counted for credit.
- POLS 135. American Foreign Policy.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
 Institutions, practices and development of American foreign policy; the interaction of domestic and foreign factors on the formulating of American foreign policy since World War II.
- POLS 136. International Political Economy.** **3 Units**
Term Typically Offered: Fall, Spring
 Analyzes the interaction between politics and economics at the international level. Covers basic theoretical approaches; historical evolution of international economy; creation and role of international financial institutions; development issues; globalization and integration.
- POLS 137. Nationalism.** **3 Units**
Prerequisite(s): GOVT 35 or GOVT 130 or instructor permission.
Term Typically Offered: Fall, Spring
 Focuses on major theories of nationalism. Examines the literature dealing with theories explaining the emergence of nationalism and its political consequences; develops a comprehensive set of empirical indicators of nationalism, together with several working hypotheses regarding political manifestations of nationalism; provides the analytic frame for understanding nationalism; and applies theories to explain political behaviors of nations.
- POLS 138. UN Simulation.** **3 Units**
Prerequisite(s): Junior status or above, a minimum 3.0 GPA in the major, GOVT 130 and/or GOVT 140, or instructor permission.
Term Typically Offered: Fall, Spring
 Seminar experience for upper level Government and International Relations concentration majors. Students will prepare for and participate in a national intercollegiate model UN conference.
Note: Course repeatable with instructor permission.
- POLS 139A. Globalization.** **3 Units**
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall only – odd years
 Explores the nature of, and issues in, globalization. It does so in five parts. Part I examines alternative conceptions of globalization. Part II identifies and examines the primary forms of economic globalization. Part III considers globalization's effects on the territorial state, the welfare state, organized violence, culture, immigration, gender, and the environment. Part IV investigates the politics of the anti-globalization backlash. Part V concludes with an assessment of the shape and future of contemporary globalization.
- POLS 139B. International Politics and International Development.** **3 Units**
Prerequisite(s): GOVT 130 or Instructor Permission
Term Typically Offered: Fall only – even years
 This course examines the origins and evolution of the theory and practice of international development; considers the meaning of international development; examines theoretical models and approaches to understanding the conditions, effects, and processes of international development. It explores the history and current state of theories and approaches to international development and addresses contemporary and essential issues in the field.
- POLS 139G. Intelligence and Espionage.** **3 Units**
Term Typically Offered: Fall only
 Involves students in the study of the field of intelligence, as it relates to national security, foreign policy, law and ethics. Comparative analysis of the practice and experience of the U.S., the former Soviet Union and other nations will be emphasized.
- POLS 139S. Topics in Human Security.** **3 Units**
Term Typically Offered: Spring only
 This course introduces students to the broad field of the study of human security and many essential current topics in that field, such as access to food and water, security against personal violence, and economic security. Students will examine how international forces and structural elements of society can endanger or ensure the security of groups and individuals within the borders of nation-states. Students will learn to research, analyze, and address the connections between international forces and their affects upon human beings around the world.
- POLS 140. Comparative Politics.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring
 Survey of the field of comparative government and politics including a review of historic uses of comparison in political science research but with emphasis on the methods of study and analytical means of research currently employed. The subject matter of study: national political systems of all types and the component parts of political systems will be an integral feature.

- POLS 141. Politics of the African Diaspora.** 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall only
- Examines the social, political, cultural, and economic factors which have been important to the African diaspora. Examines how African people have responded to those factors, both in terms of formal, political thought, and in terms of political movements and political institutions. Examines thought and practice, comparability to Africa, U.S., Caribbean, Central and South America.
 Cross Listed: ETHN 141; only one may be counted for credit.
- POLS 142. Government and Politics in Africa.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only – even years
- Deals with the politics and governments of Africa. The most important themes concern precolonial African systems, colonialism, nationalism and nation-building. Previous exposure to African Studies is desired but not required.
- POLS 143. Causes of War, Causes of Peace.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
- Explores the entire conflict process associated with war from a variety of theoretical and methodological angles, including rationalist and behavioral models. Examines the concept of war and why wars begin. Looks at how violent international conflict is resolved. Investigates the role of the international community in the management of violent conflict, how peace processes are implemented, what leads to successful negotiations, and how war crimes and post-conflict reconciliation issues are resolved.
- POLS 144. European Politics.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
- Study of national and regional politics, governmental institutions and public problems in Europe since 1945. In different semesters there may be investigation of several, but varying, national systems, of cross-national political behavior, or of regional integration processes. May be taken more than once if there are different topics and instructor permission.
- POLS 145. Asian Politics.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
- Survey of governmental institutions and political processes in East and Southeast Asia. Focuses on the region's politics, dynamic economic growth, complex security context, resurgence of nationalism, and attempts to build multilateral institutions.
- POLS 147. Latin American Government and Politics.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
- Two-part examination of government, politics, political change and political groups in Latin America. Part one examines the development of government, politics, political change and political groups. Part two presents national case studies.
- POLS 148. Governments and Politics in the Middle East.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Spring only
- Survey of the governmental institutions and the political processes in the region, with emphasis on the problems of social change. Focuses on the colonial situation, the growth of nationalism, the revolution of rising expectations, Islamic political theory and its contemporary manifestations, the role of the military, and the current regional conflicts.
- POLS 149A. Original Research in Comparative Politics.** 3 Units
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall only
- Students will engage in a cross-national research agenda. Students will conduct original research in comparative politics, which requires an appreciation for distinct learning cultures in different countries. Countries acceptable for comparison will vary with instructor.
- POLS 149R. Comparative Revolutions.** 3 Units
Term Typically Offered: Fall, Spring
- This course is primarily concerned with the causes, trajectories, and consequences of major revolutions and revolutionary movements of the 20th and 21st centuries. The course addresses the questions: what defines a revolution? What are the causes of revolutionary social change? Why do some revolutions fail to achieve their intended objectives and others succeed? How can political scientists investigate the possibility of objectively assessing revolutionary success or failure?
- POLS 150. American Governments.** 3 Units
General Education Area/Graduation Requirement: U.S. Constitution + California State & Local Govt, GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Federal system of government; the U.S. Constitution; legislative, executive, and judicial processes; political parties, interest groups, and the relationships and obligations of citizens to their government(s). Fulfills the California state graduation and credential requirements for U.S. Constitution and California State and Local Government. May be substituted for GOVT 1, but may not be used as an elective toward the major.
- POLS 151. Bureaucracy.** 3 Units
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Not offered
- Evaluation of the role and background of a professionalized bureaucracy with references to American national, state and local administrative systems as well as non-American administrative systems.
- POLS 152. Political Psychology.** 3 Units
Term Typically Offered: Fall, Spring
- Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.
 Cross Listed: PSYC 153

- POLS 153. The American Presidency.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only
- Examines the development of the Presidency as an institution; sources and uses of presidential power in contemporary politics; the President's relationship with Congress and the bureaucracy; and current issues relating to the office.
- POLS 154. Political Parties in America.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall, Spring
- Examination and analysis of American political parties. An exploration of the nature and functions of political parties including party organization, electorate, and government. Topics include the various historical party systems, the two-party system, elections, and campaign financing. Includes discussion of the presidential nominating process.
- POLS 155. The Legislative Process.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only
- Examination and analysis of the institutions, the people and the behavior that make up the legislative process. Considers the nature of representation and the role and impact of such factors as committee structure, political parties, interest groups, and others on public policy. Focus is on both the U.S. Congress and the California State Legislature.
- POLS 156. Interest Groups.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only – odd years
- Examination and analysis of interest groups in American political systems. The nature, role, formation, organization and activities of interest groups; how interest groups influence the public, political campaigns, public policy-making, and policy implementation. Representative interest groups will be studied.
- POLS 157. Politics, Opinion, and Participation.** **3 Units**
Term Typically Offered: Fall only
- How we learn and change our political beliefs, including the influence of media, religion and social standing. The various forms of political participation; who participates and who doesn't and why. The meaning and conduct of elections in the modern era.
- POLS 158. Mass Media and American Politics.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
- Focuses on the role the mass media plays in the political life of our democracy. Five primary topics are covered: the proper media role in a democracy; the relationship between the media, public opinion and agenda setting; the effects of media coverage on campaigns, elections, and voting; how elected officials influence and "spin" coverage; and the impact of media on policy-making. Students will develop critical analysis skills and emerge as more savvy media consumers and citizens.
- POLS 159A. Campaigns and Elections.** **3 Units**
Term Typically Offered: Fall only – even years
- Exploration of American campaigns and elections. Topics include the electoral process, voting behavior, the role of political parties, the media, interest groups, and candidate and campaign strategies. Focus will be on contemporary/current campaigns and elections.
- POLS 159B. American Politics Seminar: Problems in Democratic Institutions.** **3 Units**
Term Typically Offered: Not offered
- Examines the concept of representation and how it functions in the U.S. Congress and in state legislatures. In the first section different meanings of representation are discussed. In the second section interactions between legislators and their constituents are explored. Finally, the tradeoffs to different designs of representative institutions are studied.
- POLS 159D. Politics, Immigration, and Citizenship.** **3 Units**
Prerequisite(s): GOVT 1
Term Typically Offered: Fall, Spring
- This course will provide an overview of the political discussions and decisions related to immigration and citizenship in the US. More specifically, this course examines: (1) key political and policy actors in the development of immigrant admissions and immigrant integration policies, (2) the nature and consequences of immigration at the national, state, and local levels, (3) evolving racial and ethnic relations in the US, (4) public opinion and immigration-immigrants participation in American political life, and (5) contemporary issues.
- POLS 162. American Film and Culture in the Nuclear Age.** **3 Units**
Term Typically Offered: Fall only
- Explores the impact of the revolutionary change represented by the atomic bomb on forms of cultural response and expression in America. Attempts to analyze the bomb-culture relationship by reviewing important films, television programs, novels, essays, music and poetry that revealed, and helped shape, the hopes and anxieties that have characterized life in the nuclear age.
- POLS 163. Introduction to Black Politics in the U.S..** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Examines historically and currently the political life of black people in the U.S. Emphasis on understanding underlying conditions.
- POLS 164. History of American Capitalism.** **3 Units**
Term Typically Offered: Spring only
- Traces the development of the relationship between business and government in the U.S., especially in relation to state and federal regulations of those industries. Examines how individual entrepreneurs and regulators have contributed to the development of the modern American political economy.
 Cross Listed: HIST 164; only one may be counted for credit.

- POLS 165. Politics of the Underrepresented.**  **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150; and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring, Summer
- Examines the phenomenon of political underrepresentation in the U.S.A. It will identify significant affected groupings, examine the conditions which have resulted in such underrepresentation, evaluate the effects of underrepresentation on the lives of affected groups, and consider relevant political strategies. Emphasis on particular groups may vary with instructor.
- POLS 166. Gender and Politics.** **3 Units**
Term Typically Offered: Spring only
- This course examines the influence of socially constructed meanings of femininity and masculinity on the political participation of women, candidate selection, election campaigns, and electoral outcomes in executive and legislative offices in the U.S. and worldwide. Students will develop a rich understanding of the relationship between gender and women's political representation and analyze and discuss institutional, structural, cultural, and historical conditions associated with women's voting behavior, political advancement, leadership styles, and impacts of political representation on women.
 Cross Listed: WOMS 166; only one may be counted for credit.
- POLS 167. American Political Development.** **3 Units**
Term Typically Offered: Fall only
- Focuses on key transformative sequences in American political history and their consequences. Topics include the nature of American political culture and its role in shaping U.S. political institutions and public policy; the process of government growth or "state building"; the role of political institutions in channeling societal demands and influencing public policy; the nature of American party systems or "regimes" and the electoral "realignments" that link them; and connections between long-term economic and political cycles.
- POLS 168. Gay and Lesbian Politics.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Spring only
- Provides a broad overview of the politics of gay rights in the United States. Particular emphasis is placed on gay rights at the state level (where the vast majority of policy is made) and major legal strategies and court rulings affecting the gay rights movement, since judiciaries have been the main venue for advancing gay rights arguments.
- POLS 169A. Science, Technology, and Politics.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
- Social and political dimensions of science and technology. Examines how science and technology both shape politics and are shaped by politics. Considers the role of scientific advisors in government and society; dilemmas of expert authority and bias; relations between experts and non-experts; science and technology in popular culture; science and technology policy; implications of emerging technologies such as genetic engineering and the Internet for civil rights, moral values, and democracy.
- POLS 169D. Latino/a Politics.** **3 Units**
Prerequisite(s): GOVT 1
Term Typically Offered: Fall, Spring
- Systematically and analytically examines the predominant political trends, concepts, and policies presently impacting Latino/a communities. Includes such topics as an examination of Latino/a identity, immigration and citizenship, political organization and participation, and relationships with other minority groups in the United States.
- POLS 170. Public Policy Development.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150 and GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.
Term Typically Offered: Fall, Spring
- Examines the policy development process in the U.S. by exploring the ideological predispositions of the American public, the analytical approaches applied to policy development and assessment, and the institutional and political environment in which policy is made. Typically, the understanding derived from this examination is applied to several policy issues of current interest.
- POLS 171. Environmental Politics and Policy.** **3 Units**
Term Typically Offered: Spring only
- Politics of human interaction with land, air and water. Political analysis of agenda setting, policy formation and administration (national, state, and local) of environmental programs. Focus on contemporary issues such as energy alternatives, management of toxics, land development, and pollution control.
 Cross Listed: ENVS 171; only one may be counted for credit.
- POLS 180. California State and Local Government.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D, California State & Local Government
Term Typically Offered: Fall, Spring, Summer
- California state, city and county politics and government. Comparisons with governments in other states. Meets State requirements in California State and Local Governments. Permits students who have fulfilled U.S. Constitution requirement in another state to meet graduation requirements for California State and Local Governments.
- POLS 181. Comparative State Government.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150.
Term Typically Offered: Spring only
- Examines the political diversity of the fifty states, with special attention paid to variations in state governing institutions. Topics covered include legislatures, governors, judiciaries, political parties, interest groups, elections, direct democracy, and state budget procedures.
- POLS 182A. Sem Calif Govt+Politics.** **3 Units**
Term Typically Offered: Spring only
- Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.

- POLS 182B. Sem Calif Govt+Politics.** **3 Units**
Term Typically Offered: Spring only
- Open to selected students from each of the 20 CSU campuses, the Sacramento Semester program provides students with an opportunity to spend the semester studying and working directly in California State government. Participating students work as interns at the State Capitol for 25 or more hours each week. Interns are placed in legislators' offices, with legislative committees, party caucuses, lobbyists and interest groups, or in various executive, administrative, and judicial agencies. In addition to the internships, students participate in an academic seminar, California Government and Politics. The seminars frequently include as resource persons individuals who work in key policy-making positions in the state government.
- POLS 184. Introduction to Urban Politics.** **3 Units**
Prerequisite(s): GOVT 1 or GOVT 150
Term Typically Offered: Fall only
- Problems of urban areas and proposed solutions; politics and government. May be offered as lecture-discussion class or as a seminar. Field study may be required.
- POLS 195A. Internship.** **1 - 6 Units**
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W. Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Fall, Spring, Summer
- Credit/No Credit
- POLS 195B. Internship Sacramento Semester.** **1 - 6 Units**
Prerequisite(s): Minimum GPA of 2.5 (both in the major and overall).
Term Typically Offered: Spring only
- Credit/No Credit
- POLS 195D. Internship - Washington DC.** **6 Units**
Prerequisite(s): GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Fall, Spring
- Credit/No Credit
- POLS 198A. Odyssey Peer Advisers.** **1 - 3 Units**
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
- Provides individualized learning opportunities (1-3 units per semester) for engaging in peer advising along with elective activities such as tutoring, assisting faculty with research, event planning and other activities of a comparable nature. Students should be upper division students or graduate students. The units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism.
Note: This course may be repeated up to a total of six units.
- Credit/No Credit
- POLS 198B. Peer Advising by Odyssey.** **1 Unit**
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
- Provides opportunity for lower division students, students on probation, and newly declared majors to be mentored by more advanced upper division students or graduate students. This peer advising will help students meet academic deadlines, achieve academic success, become engaged in campus activities and integrated into the Government Department. Units may not be applied towards unit requirement of the Government major, Government IR and Government/Journalism
Note: This course may be repeated one time only for unit credit.
- Credit/No Credit
- POLS 199. Independent Studies.** **1 - 3 Units**
Prerequisite(s): GOVT 1 or equivalent, and nine units upper division government courses.
Term Typically Offered: Fall, Spring
- Permits a student to pursue study and research in an area not otherwise available through the regular curriculum. Open only to upper division Government majors with at least a 3.0 GPA in the major.
 Credit/No Credit
- POLS 200. Method and Scope in Political Science.** **3 Units**
Prerequisite(s): STAT 1 or its equivalent.
Term Typically Offered: Fall, Spring
- Introduction to the philosophy of science, and the scope and methods of empirical research in political, social and policy science. In the area of philosophy of science, focuses on the logic of scientific inquiry, theory testing and confirmation and causal explanation. In the area of scope and methods, critically examines the scientific merits of several competing approaches to the study of politics and policy, as well as some of the major methodological controversies and debates in the literature.
- POLS 210. Political Theory.** **3 Units**
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
- Historical and social roots, democratic or authoritarian ideologies; the conflict of ideologies; philosophic approaches.
Note: May be repeated for credit with permission of Graduate Coordinator.
- POLS 213. Special Topics in American Political Thought.** **3 Units**
Term Typically Offered: Fall, Spring
- A class examining the historical and philosophical discourse in America on central topics of debate, such as the meaning of citizenship, civil society, democracy, federalism, religion, and civil rights open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 113 or an equivalent course.

- POLS 218. Special Topics in International Political Thought. 3 Units**
Term Typically Offered: Fall, Spring
- A class examining the philosophical underpinnings and the theatrical problems of central concepts and problems in international relations, including human rights, intercultural dialogue, problems of just war and international justice through a study of historical and contemporary texts open to both advanced undergraduates and graduate students.
Note: Undergraduates are strongly encouraged to have completed GOVT 118 or an equivalent course.
- POLS 219. Specialized Studies in Political Theory. 3 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Makes it possible for political theory students to deal with questions which theorists have asked, and to attempt to answer such questions for themselves.
Note: May be repeated for credit with permission of Graduate Coordinator.
- POLS 230. Theories of International Relations. 3 Units**
Prerequisite(s): Upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
- Examination of the theory and practice of international relations including such subfields as international law, international organization, foreign policy and national security policy.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 210; only one may be counted for credit.
- POLS 236. Seminar in International Political Economy. 3 Units**
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
- This seminar is a graduate-level introduction to the theory and substance of international political economy (IPE). It examines the various theoretical approaches to IPE; considers the role of trade, money, and finance in the international political economy; analyzes the pattern and structure of global production, with an emphasis on multinational corporations; surveys international development issues, including Third World economic development strategies, the debt crises, structural adjustment, and economies in transition; and investigates the politics of globalization.
 Cross Listed: IA 221; only one may be counted for credit.
- POLS 239. Globalization and International Relations. 3 Units**
Prerequisite(s): An upper division course in international relations or instructor permission.
Term Typically Offered: Fall, Spring
- Introduction to the theories and substance of globalization. It examines alternative theories of globalization; considers globalization's political impact on the territorial state, regionalism, the welfare state, the military, immigration, and the environment; investigates the politics of the anti-globalization backlash; and concludes with an assessment of the future political trends of globalization.
 Cross Listed: IA 230; only one may be counted for credit.
- POLS 240. Comparative Government and Politics. 3 Units**
Prerequisite(s): Advanced course in the field.
Term Typically Offered: Fall, Spring
- Advanced study of some of the world's governmental and political systems. May focus on single countries, groups of countries or general categories of systems. Considers theoretical concept and methodology.
Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: IA 222; only one may be counted for credit.
- POLS 249A. Middle East Politics and the United States. 3 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Graduate introduction to politics and governments of the Middle East and the impact of the United States foreign policy in the region. Relies on a comparative frame to tease out the causes of intrastate and interstate conflicts in the region, as well as the effects of the American foreign policy on the contemporary political trends in the Middle East, including those relating to the Arab-Israeli conflict, Islamic political resurgence, and terrorism.
- POLS 250. Basic Issues of American Government. 3 Units**
Prerequisite(s): An upper division course in the field and/or instructor permission.
Term Typically Offered: Fall, Spring
- Exploration in-depth of topics such as federalism, executive-legislative relationships, problems of representation, government reorganization, congressional reform, the electoral process.
Note: May be repeated for credit with permission of Graduate Coordinator.
- POLS 270. Political Behavior and Political Processes: California and Beyond. 3 Units**
Term Typically Offered: Fall, Spring
- Course will explore public opinion, voting behavior, representation and political psychology with special focus on California.
Note: Undergraduates may take the course with instructor permission.
- POLS 280. California Politics. 3 Units**
Term Typically Offered: Fall, Spring
- Advanced study of California's state and local governments, with emphasis on political history, political institutions, and the role of direct democracy on the state's government, budget and politics. Demographic and geographic elements will be scrutinized through a political focus. California's policy and political process will also be examined, as well as discussion of various political reforms.
Note: Undergraduates may take the course with instructor permission. Prerequisite
- POLS 281. Comparative State Government. 3 Units**
Term Typically Offered: Fall, Spring
- Examines state political institutions and processes. Special attention will be paid to how the political variation among the states shapes processes and outcomes. Topics covered will include governors, legislatures, interest groups, public opinion, political parties, and elections.

POLS 284. Urban Politics. 3 Units
Term Typically Offered: Fall, Spring

In-depth exploration of the socio-economic problems of urban and metropolitan areas and an evaluation of proposed political and governmental solutions.

Note: May be repeated for credit with permission of Graduate Coordinator. Cross Listed: PPA 284; only one may be counted for credit.

POLS 293A. Senate Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring

Critical analysis and examination of the operation of the State Capitol and the larger political environment of political parties, interest groups, and public opinion.

Note: Open only to students admitted to the California Senate Fellows Program.

POLS 293B. Senate Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring

Seminar will analyze procedural issues and public policy questions within the State Senate, legislature, and contemporary California politics.

Note: Open only to students admitted to the California Senate Fellows Program.

POLS 294A. Assembly Fellows Introductory Seminar. 3 Units
Term Typically Offered: Fall, Spring

Critical examination of state and local governmental institutions and processes. Seminar will impart an advanced understanding of the structures and processes of California's political institutions, government and legislature.

Note: Open only to students admitted to the Jesse M. Unruh Assembly Fellowship Program.

POLS 294B. Assembly Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring

Seminar focuses on current California policy issues and the lawmaking process.

Note: Open only to students admitted to the Jesse M. Unruh Assembly Fellowship Program.

POLS 295. Government Internship. 1 - 6 Units
Term Typically Offered: Fall, Spring

Supervised work experience in an approved legislative or administrative office at some level of local or state government, or in a politically-related organization that is concerned with government. Supervision is provided by the faculty instructor and responsible officials in the work situation.

Note: Open to all graduate students, subject to instructor permission. No more than 3 units of GOVT 295 may be counted toward the Master's degree.

Credit/No Credit

POLS 299. Independent Study. 1 - 3 Units
Term Typically Offered: Fall, Spring

For advanced graduate students who have demonstrated their ability to carry on advanced, independent research. Permits a student to pursue study and research in an area not otherwise available through the regular curriculum. Student must be advanced to candidacy.

Credit/No Credit

POLS 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy.
Term Typically Offered: Fall, Spring

Should be taken after completion of all other requirements for the degree. Students may choose from the following options, which they must declare when they advance to candidacy: Thesis, Project, or Comprehensive Examination.

BA in Political Science

Units required for Major: 39
Total units required for BA: 120

Program Description

The Political Science major complements a student's liberal arts education with an emphasis on understanding the theoretical and practical aspects of government and politics. The department offers a BA in Political Science, two concentrations, and the minor in Government. The Government major is structured to provide students with a background in the basic fields of political science, as well as to permit them a range of choice in completing the program. The Political Science Department offers several courses integral to interdisciplinary programs such as California Studies, Environmental Studies, Ethnic Studies, Peace and Conflict Resolution Studies, and Women's Studies.

The department emphasizes its expectation that students seek faculty advice when planning their program. Students may ask any faculty member's assistance initially. As specific interests are developed, students may wish to seek the advice of faculty sharing their interests.

Note: Although it is not a requirement of the major, the department **strongly recommends** that students take an introductory statistics course as part of their undergraduate work. A course in statistics may be used to satisfy the GE requirement in mathematics.

Minimum GPA Requirement

Students are required to maintain a minimum 2.0 GPA in the Major.

Program Requirements

Code	Title	Units
Required Lower Division Courses (3 Units)		
POLS 1	Essentials Of Government ^{1,2}	3
Required Upper Division Courses (15 Units) ³		
POLS 100	Introduction to Research Methods in Political Science	3
POLS 110	Political Thought I	3
or POLS 111	Political Thought II	
POLS 120A	Constitutional Law	3
or POLS 120B	Constitutional Rights and Liberties	
POLS 130	International Politics	3
POLS 170	Public Policy Development ⁴	3
Electives (21 Units)		
Select 21 units ⁵		21
Total Units		39

- ¹ POLS 150 may be used in place of POLS 1 to satisfy the requirement
 - ² Course also satisfies General Education (GE)/Graduation Requirement.
 - ³ The Department recommends students take no more than two of these required courses a semester.
 - ⁴ POLS 170 should be taken in the final year of a student's undergraduate work.
 - ⁵ 18 of the 21 elective units must be upper division even though all 21 required elective units may be satisfied with upper division courses. POLS 10 and POLS 35 may be taken to fulfill 3 lower division units of the elective requirement.
Select courses from the following Fields below. A seminar and/or internship is strongly recommended.
 - Political Theory
 - Public Law and Judicial Studies
 - International and Comparative Politics
 - American Governments, Politics and Policy
- These courses **must** be selected in consultation with an advisor from the Political Science Department.
- Notes:**
- POLS 150 may not be counted as an elective toward the major, but may be used in place of POLS 1 or as its equivalent as a prerequisite;
 - Students may take a maximum of 6 units of a GOVT 195 (Internship) within the major, but may use no more than 3 of those units to complete the 33 units of required upper division work.
 - Students should be aware that the Department offers a concentration in International Relations that is distinct from a field emphasis within the major. See complete International Relations Concentration description.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1	Oral Communication	3

Total Units		42

¹ POLS 150 may be used in place of POLS 1 to satisfy the requirement.

² Course also satisfies General Education (GE)/Graduation Requirement.

³ 21 of the 24 elective units must be upper division.

Note:

- POLS 35 may be taken to satisfy 3 elective units all others must be selected from Government courses numbered from 130 through 149. Students may also include POLS 118, POLS 119A, POLS 127 and POLS 162 as electives. Up to twelve (12) units of work in other disciplines that have an international relations/comparative politics content can be used to satisfy the requirements of the major, as long as approval by an International Relations advisor is obtained.
- The Department strongly recommends that students select elective courses that include both *thematic* areas, such as globalization, internal organizations, and security studies, as well as *regional concentrations* such as Africa, Asia, Europe, Latin America, and the Middle east.
- If a student has not taken POLS 1 or its equivalent, then POLS 150 may count as the prerequisite for the major.
- These courses **must** be selected in consultation with an advisor from the Government Department.

BA in Political Science and Journalism

Units required for Major: 51

Total units required for BA: 120

Program Description

A unique interdisciplinary program that spans the combined areas of Political Science and Journalism.

The University's association with the Washington Center makes it possible for California State University, Sacramento students to undertake an internship in Washington, D.C. There are many opportunities for Government-Journalism majors to do an internship to meet their unique interests through this program.

Note: Political Science and Journalism majors should have both an advisor in the Political Science Department and a Journalism Advisor in the Communication Studies Department.

Minimum Grade Requirement

Majors must complete each required lower and upper division Journalism course with a grade of "C-" or better.

Capital Fellows Certificate in Applied Policy and Government

Units required for Certificate: 6

Program Description

Political Science, or Government, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

Admission Requirements

Accepted to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

Program Requirements

Code	Title	Units
Required Courses		6
<i>Select the two courses applicable to your program</i>		
For Senate Fellows:		
POLS 293A	Senate Fellows Introductory Seminar	
POLS 293B	Senate Fellows Policy Seminar	
For Assembly Fellows:		
POLS 294A	Assembly Fellows Introductory Seminar	
POLS 294B	Assembly Fellows Policy Seminar	
For Executive Fellows:		
PPA 297A	Executive Fellows Introductory Seminar	
PPA 297B	Executive Fellows Policy Seminar	
For Judicial Administration Fellows:		
PPA 298A	Judicial Administration Fellows Introductory Seminar	
PPA 298B	Judicial Administration Fellows Policy Seminar	
Total Units		6

MA in Political Science (California and its Political Environment)

Total units required for MA: 30

Program Description

The Master of Arts program in Political Science is designed to orient the student toward critical investigation of problems in government and politics, and to improve the student's ability for independent study. This program is of special value to teachers of government in the public schools, to persons who contemplate public service or politics as a career, and to persons planning additional graduate study leading to the doctorate. The Political Science Department Graduate Coordinator acts as advisor to graduate students and should be consulted early in each student's program of graduate study.

Note: Because most graduate students work during the day, graduate courses are offered in the evening hours.

Admission Requirements

Admission as a classified graduate student in Political Science requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted and 3.0 GPA in the major;
- a satisfactory score on the aptitude portion of the Graduate Record Examination (the Department expects the student to achieve at least the 50th percentile in the combined verbal/analytic score);
- three letters of recommendation from individuals who can evaluate the applicant's potential for successful graduate study;
- a written statement explaining the applicant's purposes and goals in pursuing a master's degree in Political Science; and
- an example of written work which the applicant considers evidence of his/her best scholarship regardless of the grade received.

Applicants who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted

to the degree program with conditionally classified graduate status. Students with an undergraduate major in **any** subject may be accepted; no minimum number of units in Government/Political Science is required. However, if a student's preparation in the field of government or political science is not adequate preparation for graduate study, he/she may be asked to complete some additional coursework before becoming classified. Any deficiencies will be noted on a written response to the student's admission application. No upper division prerequisite courses required as a condition of classification can be counted towards the degree requirement.

Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6740:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- Graduate Record Examination scores, aptitude portion only.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

At the same time, each applicant should forward to the Graduate Coordinator in Political Science the following:

- the three letters of recommendation;
- the applicant's written statement of purposes and goals; and
- the example of the applicant's best written work.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0 with no grade below a "C" (not a "C-").

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed STAT 1 or its approved equivalent, a prerequisite to the program (does not count towards the degree) which must be taken before POLS 200;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA;
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver; and
- submitted a thesis prospectus (if the student elects to do a thesis).

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Political Science Department advisor. The

completed form is then returned to the Office of Graduate Studies for approval.

POLS 500	Culminating Experience ²	3
Total Units		30

¹ **Three** additional courses which may be completed from graduate seminars in the Department, from 200-level courses in related fields (6 units allowed with graduate coordinator's prior approval), from POLS 295 (3 units allowed), and/or from POLS 299 (6 units allowed). However, a maximum of 6 units of POLS 295 and/or POLS 299 may be applied to the MA.

Of these twelve units, up to 6 units may be in 100-level courses within the Political Science Department, chosen from a pre-approved list compiled by the graduate coordinator. Up to six units of coursework from the graduate fellows programs (Assembly Fellow, Executive Fellow or Senate Associates Program) can be counted towards the degree.

² By the time of Advancement to Candidacy, students must enroll in POLS 500 and choose either of the following options:

- Plan A: Masters Thesis
- Plan B: Comprehensive Exam (Students will take one exam in their area of emphasis and demonstrate a general comprehensive in that area)

Note: Students are not permitted to enroll in the culminating experience until they have Advanced to Candidacy, obtained a sponsor for their thesis, and received the approval of the Graduate Coordinator.

Note: Upper division undergraduate courses (100-level courses) which may be used towards the MA program must be individually approved by the Graduate Coordinator and will involve an additional work component

over-and-above what is required for undergraduate students. A list of approved 100-level courses will be available semester-by-semester.

Concentration in California and its Political Environment¹

Code	Title	Units
POLS 250	Basic Issues of American Government	3
POLS 270	Political Behavior and Political Processes: California and Beyond	3
POLS 280	California Politics	3
POLS 281	Comparative State Government	3
POLS/PPA 284	Urban Politics	3

¹ Students emphasizing in California and its Political Environment must take POLS 270 and POLS 280 as well as one other course. It is recommended you take four courses.

MA in Political Science (International Relations/Comparative Government)

Total units required for MA: 30

Program Description

The Master of Arts program in Political Science is designed to orient the student toward critical investigation of problems in government and politics, and to improve the student's ability for independent study. This program is of special value to teachers of government in the public schools, to persons who contemplate public service or politics as a career, and to persons planning additional graduate study leading to the doctorate. The Political Science Department Graduate Coordinator acts as advisor to graduate students and should be consulted early in each student's program of graduate study.

Note: Because most graduate students work during the day, graduate courses are offered in the evening hours.

Admission Requirements

Admission as a classified graduate student in Political Science requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted and 3.0 GPA in the major;
- a satisfactory score on the aptitude portion of the Graduate Record Examination (the Department expects the student to achieve at least the 50th percentile in the combined verbal/analytic score);
- three letters of recommendation from individuals who can evaluate the applicant's potential for successful graduate study;
- a written statement explaining the applicant's purposes and goals in pursuing a master's degree in Political Science; and
- an example of written work which the applicant considers evidence of his/her best scholarship regardless of the grade received.

Applicants who have deficiencies in Admission Requirements that can be removed by specified additional preparation may be admitted to the degree program with conditionally classified graduate status. Students with an undergraduate major in **any** subject may be accepted; no minimum number of units in Government/Political Science is required. However, if a student's preparation in the field of government or political science is not adequate preparation for graduate study, he/she may

be asked to complete some additional coursework before becoming classified. Any deficiencies will be noted on a written response to the student's admission application. No upper division prerequisite courses required as a condition of classification can be counted towards the degree requirement.

Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6740:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- Graduate Record Examination scores, aptitude portion only.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

At the same time, each applicant should forward to the Graduate Coordinator in Political Science the following:

- the three letters of recommendation;
- the applicant's written statement of purposes and goals; and
- the example of the applicant's best written work.

Approximately six weeks after receipt of all items listed above, a decision regarding admission will be mailed to the applicant.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA GPA: 3.0 with no grade below a "C" (not a "C-").

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed STAT 1 or its approved equivalent, a prerequisite to the program (does not count towards the degree) which must be taken before POLS 200;
- completed at least 12 units in the graduate program with a minimum 3.0 GPA;
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver; and
- submitted a thesis prospectus (if the student elects to do a thesis).

Advancement to Candidacy forms are available on the Office of Graduate Studies website. The student fills out the form after planning a degree program in consultation with a Political Science Department advisor. The completed form is then returned to the Office of Graduate Studies for approval.

Code	Title	Units
POLS 210	Political Theory	3
POLS 213	Special Topics in American Political Thought	3

POLS 218	Special Topics in International Political Thought	3
POLS 219	Specialized Studies in Political Theory	3

¹ Students emphasizing Political Theory must take **three** of the four listed courses in political theory. It is recommended you take four courses.

Minor in Political Science

Units required for Minor: 21, 15 of which must be in upper division

Program Description

Government, or Political Science, is devoted to study of the theory and practice of government and politics. The Political Science Department at Sacramento State offers courses in several fields of study, including: Political Theory; American Politics; Public Law; International Relations; Comparative Politics; and Public Policy. Over 70 courses cover all the major aspects of political science. Lower division courses satisfy General Education requirements and help to prepare students for advanced work.

Minimum Grade Requirement

A "C" average is required in the Minor.

Program Requirements

Code	Title	Units
Select two of the following:		6
POLS 110	Political Thought I	
POLS 111	Political Thought II	
POLS 120A	Constitutional Law	
POLS 120B	Constitutional Rights and Liberties	
POLS 130	International Politics	
POLS 170	Public Policy Development	
Select 15 units of political science courses ¹		15
Total Units		21

¹ No more than six units may be lower division. Students may count as many as (6) units of a GOVT 195, or (3) units of a GOVT 195 and (3) units of POLS 199 toward completion of the minor.

POLS 1 (or its equivalent) or POLS 150 may count as the prerequisite for the minor; however, if POLS 150 is used as the prerequisite, it will not count toward the 15 units of upper division government courses required. POLS 150 cannot count as an elective for the minor.

Note: Students are permitted to repeat upper division courses a maximum of two times.

Psychology

College of Social Sciences and Interdisciplinary Studies

Program Description

Psychology is the scientific study of human and animal behavior, cognition, and emotion. It is a broad discipline that includes both basic research and the application of research findings to everyday life. The Sacramento State Psychology Department offers an undergraduate major and minor in Psychology and an undergraduate certificate in Applied Behavior Analysis. In addition, there are graduate programs in Applied Behavior Analysis, Industrial-Organizational Psychology, and General

Psychology (which comprises a range of interests, including doctoral program preparation). At both the undergraduate and graduate levels, students may choose coursework, fieldwork, and research experiences that allow them to emphasize such areas as Applied Behavior Analysis, Clinical Psychology, Cognitive Psychology, Community Psychology, Cultural Psychology, Developmental Psychology, Industrial/Organizational Psychology, Neuroscience, Quantitative Methods, Personality, and Social Psychology.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is now officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Degree Programs

Certificate in Behavior Analysis (p. 997)

Minor in Psychology (p. 1002)

BA in Psychology (p. 995)

MA in Psychology (Applied Behavior Analysis) (p. 997)

MA in Psychology (General Psychology) (p. 999)

MA in Psychology (Industrial-Organizational Psychology) (p. 1000)

Special Features

- The Psychology Department is housed in Amador Hall and contains extensive human and animal research facilities.
- The Psychological Services Center provides excellent learning opportunities for students in Applied Behavior Analysis. The six-room suite is equipped for audio and video recording of research sessions and a kitchenette for studies with children diagnosed with feeding difficulties.
- Available facilities support operant and neuroscience research with animals, including a rodent colony as well as equipment for behavioral procedures, histological techniques, and neurophysiological recordings.
- Computer labs are available for data collection, analysis, and teaching.
- The Psychology Department maintains close ties with the Sacramento community. Each year students conduct research projects or fieldwork in various community organizations and state agencies.
- Students are able to take independent study courses in Applied Behavior Analysis, Clinical Psychology, Cognition Cultural Psychology, Developmental Psychology, Industrial/Organizational Psychology, Neuroscience, Perception, Quantitative Methods, and Social Psychology.
- The Prospects Peer Mentoring and Advising Program allows students to give and receive information and support regarding academic and career planning.
- Our Annual Psychology Department Research Conference showcases student and faculty research projects for the campus community, providing professional development opportunities for students.
- Several student organizations are involved in extracurricular activities: Psi Chi, Psychology Society, and the Student Association for Applied Behavior Analysis.

Career Possibilities

Individuals with a Bachelor of Arts

Administrative Service Manager · Admissions Counselor · Behavior Specialist · Community Service Manager · Employee Assistance Program Associate · Health Educator · Human Factors Specialist · Management Analyst · Market Research Analyst · Mental Health Worker · Public Relations Specialist · Sales Manager · Sales Representative · Victim Advocate.

Individuals with a Master of Arts

Autism Specialist · Behavior Analyst · Behavioral Consultant · Case Manager · Career Counselor · Community College Instructor · Human Resource Specialist · Mental Health Counselor · Personnel Analyst · Private Sector Consultant · Program Director · Psychometric Specialist · Personnel Selection Consultant · Research Analyst · Research Program Manager · Research Technician · School Consultant · Test Validation Specialist · Training and Development Specialist

PSYC 2. Introductory Psychology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Provides a general overview of theory and research concerning psychological processes at the basic, individual and social levels. Topics will include physiological psychology, comparative psychology, learning, motivation, sensation and perception, developmental psychology, personality, social psychology, maladaptive behavior, individual differences, and selected other topics. Requires three hours of participation as a research subject.

PSYC 4. Navigating Psychology: The Major and Careers. 1 Unit
Prerequisite(s): PSYC 2 and Psychology majors only.
Term Typically Offered: Fall, Spring

Covers requirements for the major and career options in psychology and related fields. Students learn to design plans of study to meet requirements for the major and enhance career objectives. Introduces career options in various areas such as academic psychology, applied behavior analysis, counseling and mental health, education, industrial-organizational psychology and related fields. Class activities clarify students' career goals and develop skills for job seeking and graduate education. Requires participation as a research subject.
Credit/No Credit

PSYC 8. Methods of Psychology. 3 Units
Corequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring

Introduction to methods of the science of psychology. The topics include psychology as a way of knowing, the role of science in psychology, the nature of psychological research, research ethics, psychological literature and report writing, psychological measurement, and the design and analysis of case studies, survey research, field studies, correlational methods, and experimental methods. Requires three hours of participation as an experimental subject.

- PSYC 9. Introductory Statistics for Psychology.** 3 Units
Prerequisite(s): PSYC 2, may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.
- PSYC 100. Cross-Cultural Psychology.** 3 Units
Prerequisite(s): PSYC 2, PSYC majors only.
Corequisite(s): PSYC 8.
Term Typically Offered: Fall, Spring
- Examination of similarities and differences in human behavior, cognition, and emotion across cultures. Empirical evidence from cross-cultural research in the various areas of psychology, including biological, clinical, cognitive, developmental, social, personality, and industrial/organizational psychology, is evaluated with the purpose of developing a global perspective on the psychological processes underlying human behavior, cognition, and emotion.
- PSYC 101. Statistics for Psychology.** 3 Units
Prerequisite(s): Passing score on ELM; PSYC 2, PSYC 4, PSYC 8. PSYC majors only. PSYC 4 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to descriptive and inferential statistics as tools for evaluating data from Psychological research. Topics include: measures of central tendency, measures of variability, correlation and regression, sampling distributions, hypothesis testing procedures including t-tests and analysis of variance, and selected other topics. Application of hand computation will be emphasized to include the interpretation and significance of the statistical findings.
- PSYC 102. Advanced Methods and Statistics in Psychological Research.** 4 Units
Prerequisite(s): PSYC 121; Psychology majors only.
Term Typically Offered: Fall, Spring
- Plan and conduct projects using experimental, quasi-experimental and correlational methods. Evaluate published research and write proposals with attention to such issues as the reliability and validity of methods, the degree to which statistical assumptions are met, the adequacy of statistical power, and the internal and external validity of the project. Contemporary research design, measurement, and analysis techniques are examined, including the use of statistical software, for varieties of univariate and multivariate research designs. Lecture-discussion three hours; laboratory three hours.
- PSYC 103. Perception.** 3 Units
Prerequisite(s): PSYC 2, PSYC or CRJ majors only. PSYC 8 and PSYC 9 are recommended.
Term Typically Offered: Fall, Spring
- Examination of how information about the outside world is sensed and how that information is organized and interpreted to form perceptions. Vision and audition will be primarily examined, along with some coverage of the other senses. Topics may include psychophysical methods, basic physiology and function of sensory systems, perception of color and form, motion, distance, auditory patterns, body and limb position, temperature, pain, perceptual constancies, attention, perceptual learning, adaptation, and perceptual development.
- PSYC 104. Learning Theories.** 3 Units
Prerequisite(s): PSYC 2, PSYC 8, PSYC 9, and PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring
- Examination of classical and contemporary theories of learning, and a sampling of experimental findings which bear directly on the theories. Some attention is given to theory construction in psychology.
- PSYC 106. Motivation.** 3 Units
Prerequisite(s): PSYC 2; PSYC majors only or instructor permission.
Term Typically Offered: Fall, Spring
- Study of theories and experimental findings related to basic processes in animal and human motivation.
- PSYC 107. Controversial Issues in Psychology.** 3 Units
Prerequisite(s): PSYC 121; Psychology majors only
Term Typically Offered: Fall, Spring
- Consideration of unresolved issues of interest to psychology and the general public, such as the use of animals in research and mind and health. Emphasis is on critical analysis (but not solution) of the issues as they are presented in public discourse. Discussion format, written reports and evaluations.
- PSYC 108. Organizational Psychology.** 3 Units
Term Typically Offered: Fall, Spring
- This course will provide an overview of the dynamics of human behavior in organizations, using the lens of psychological theory. Students will explore individual-, group-, and systems-level phenomena in organizations, with the overriding goal of understanding how to maximize performance, well-being, and satisfaction at work. Topics may include job attitudes, teams, organizational culture, individual differences, leadership, employee development, organizational change, occupational stress, fairness and diversity, and more.
- PSYC 110. Cognitive Psychology.** 3 Units
Prerequisite(s): PSYC 2; PSYC majors only. PSYC 8 and PSYC 9 are recommended.
Term Typically Offered: Fall, Spring
- Examination of the basic concepts of cognitive psychology, including sensory storage, pattern recognition, attention, short-term memory, long-term memory, visual imagery, semantic memory structure, text processing, problem solving and decision-making. The relations among artificial intelligence, mental modeling, and the simulation of cognitive processes will also be explored.

PSYC 111. Foundations of Behavioral Neuroscience. 3 Units

Prerequisite(s): PSYC 2; PSYC majors and PSYC minors only. PSYC 8 and PSYC 9 are recommended.

Term Typically Offered: Fall, Spring

Introductory overview of the neurobiology of behavior. Emphasis is on the central and autonomic nervous systems and the endocrine system. Topics include physiological, biological and genetic factors involved in sensation and perception, motivation, learning and memory, emotion, social behavior, and mental disorders.

PSYC 115. Introduction to Neuroscience. 4 Units

Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.

Term Typically Offered: Spring only

Introduction to the structure and function of the nervous system including neuroanatomy, neurophysiology, and systems neuroscience. Lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory activities focus on nervous system structure and some of the specialized techniques used within the fields of cellular, systems, and behavioral neuroscience. Lecture-discussion three hours; laboratory three hours. Cross Listed: BIO 115; only one may be counted for credit.

PSYC 116. Animal Behavior. 3 Units

Prerequisite(s): PSYC 2; PSYC majors only or instructor permission.

Term Typically Offered: Fall, Spring

Basic principles of animal behavior including the genetic, evolutionary and ecological mechanisms underlying courtship, reproduction, aggression, territoriality, communication and parental behavior; applied aspects of animal behavior; innate or naturally occurring behavior patterns necessary for survival in the natural environment; physiological, social and acquired aspects of animal and, secondarily, human behavior.

PSYC 117. Drugs and Behavior. 3 Units

Prerequisite(s): PSYC majors only or instructor permission.

Term Typically Offered: Fall, Spring

Examination of the classification of psychoactive drugs and their mode of action. Covers effects of psychoactive drugs on central nervous system structure and function and on behavior; use, abuse, effects, and dangers of therapeutic and recreational drugs; motivational aspects of drug use, and methods for treating addiction.

PSYC 118. Cognitive Neuroscience. 3 Units

Prerequisite(s): PSYC 111 or PSYC 115 or PSYC 117 or BIO 132.

Term Typically Offered: Fall, Spring

Examines how the nervous system accomplishes cognitive functioning. Brain mechanisms of higher functions such as memory, attention, sensorimotor integration, decision making, and language will be covered.

PSYC 119. Human Factors Psychology. 3 Units

Prerequisite(s): PSYC 2

Term Typically Offered: Fall, Spring

Study of the scientific application of psychology and human performance to the design of products and complex systems. Applications of perception, cognition, and human physical limitations are covered, with an emphasis on understanding how they relate to design. Topics include perception, attention, decision making, memory, action, and how they related to areas such as product design, human-machine interaction, health and medicine, aviation and aerospace, ergonomics of the workplace, and designing for special populations.

PSYC 120. Psychological Testing. 3 Units

Prerequisite(s): PSYC 121; PSYC majors only.

Term Typically Offered: Fall, Spring

Construction, application, interpretation and evaluation of psychological tests. Tests used to measure general mental ability, specific abilities and aptitudes, personality, interests and attitudes are surveyed.

PSYC 121. Methods and Statistics in Psychological Research. 3 Units

Prerequisite(s): PSYC 4 (may be taken concurrently), PSYC 8, and PSYC 9; PSYC majors only.

Term Typically Offered: Fall, Spring

Project-based experience of Psychology. Study of scientific processes in research such as literature reviews; developing testable hypotheses; design; IRB review; data collection, analysis, and interpretation; critical analysis of studies; APA paper preparation; and issues in dissemination. Study of some advanced statistical processes such as factorial ANOVAs, planned and post hoc comparisons, and multiple regression. Study of statistical software programs used in the analysis of data.

PSYC 122. Qualitative Research in Psychology. 3 Units

Prerequisite(s): PSYC 121 and PSYC majors only.

Term Typically Offered: Fall, Spring

Examines the philosophy underpinning the use of qualitative research and the methods and analyses strategies used in qualitative research. Methods may include interviews, focus groups, participant observation, and behavioral observation. Analyses strategies may include grounded theorizing, negative case analyses, developing case studies, and content coding. Issues pertaining to data accuracy and consistency will be examined, and the researcher's role in interpreting results. Students will complete research projects involving the collection and/or analyses of qualitative data.

PSYC 129. Behavioral Research Methods. 3 Units

Prerequisite(s): PSYC 121 and PSYC 171, PSYC majors only or ABA certificate students

Term Typically Offered: Fall, Spring, Summer

Covers evaluating and thinking critically about behavioral research (i.e., data collection, logic, designs). Topics include: comparing group and single-case designs; observational strategies and measuring inter-observer reliability; displaying and interpreting behavioral data; single-case experimental design including reversal, multiple-baseline, alternating treatments, changing-criterion, and combinatory designs; research ethics; identifying characteristics of pseudoscience; and disseminating behavioral research. The versatility of single-case designs will be discussed by including a wide range of case examples from multiple disciplines in the social and behavioral sciences and education.

PSYC 130. Personality Theories. 3 Units

Prerequisite(s): PSYC 2.

Term Typically Offered: Fall, Spring

Detailed examination of classic and contemporary personality theories such as those of Freud, Jung, Adler, Horney, Fromm, Skinner, Dollard and Miller, Rotter, Bandura, Kelly, Rogers, Maslow and May. Theories will be considered with respect to content, conceptual image of the individual, and current status.

- PSYC 134. Psychology of Human Sexuality.** 3 Units
Prerequisite(s): PSYC 2.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Covers the inherent biological, as well as the psychological, social and cultural similarities and differences between the sexes. Sexual myths and misconceptions are explored, and the sex roles and patterns of interaction currently practiced in our society are discussed.
- PSYC 135. Psychology of Multicultural Groups.** 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
- Examines the role of culture, race, ethnicity, gender, and social class in human development and behavior within diverse cultural groups. Presents sociocultural and ecological perspectives on human development, i.e., that individuals must be understood in the context of his or her culturally patterned social relations, practices, institutions, and ideas. Explores psychological issues that pertain to the major ethnic minority groups in the U.S.
- PSYC 137. Stress Management.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examination of the causes and manifested effects of various stressors related to acculturation, socio-economic, physical, occupational, and psychological pressures. Techniques for recognizing and coping with stress will be explored. Emphasis is on the development of skills to handle commonly encountered stress-producing situations.
- PSYC 142. Community Psychology.** 3 Units
Prerequisite(s): PSYC 121 and PSYC majors only.
Term Typically Offered: Fall, Spring
- This course is designed to introduce you to the field of community psychology, which is concerned with the scientific study of social problems through collaborative research. This course will provide you with ecological frameworks that aim to reduce social problems (e.g., poverty, mental illness and others) as well as core values of community well-being, empowerment, and collaboration. You will be exposed to prevention and intervention programs employed to solve social concerns as well as potential implications for practice and policy.
- PSYC 143. Practicum in Community Psychology.** 3 Units
Prerequisite(s): academic level of senior, Psychology majors only, and instructor permission.
Corequisite(s): PSYC 142
Term Typically Offered: Fall, Spring
- Classroom and on-site experience in community psychology. Students will work at a community organization for a minimum of six hours per week with supervision by authorized persons at the organization. Students will also attend weekly class meetings to discuss the application of concepts in community psychology to practicum experience. Topics include: ethics, structure and capacity of community organizations, working with diverse populations, and professional relationships.
- PSYC 145. Social Psychology.** 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Empirical examination of the emotion, behavior, and cognition of individuals in social situations. Topics can include: social psychology methods, social perception, social cognition, attitudes, persuasion, social identity, gender identity, prejudice and discrimination, interpersonal attraction, close relationships, conformity, compliance, obedience to authority, helping behavior, aggression, group processes, and social psychology applications. Multiple perspectives discussed.
- PSYC 148. Child Psychology.** 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Examination of behavioral and physiological development during the prenatal period, and behavioral, cognitive and social development during infancy and childhood. Theories, methods and empirical research will be studied.
- PSYC 149. Psychology of Adolescence.** 3 Units
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Growth and development during the adolescent period and the interrelationships between adolescents and their culture are studied. Physical, psychological, social and educational problems and their implications are considered.
- PSYC 150. Psychological Aspects of Aging.** 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring
- Developmental study of human aging emphasizing psychosocial, psychopathological, biological, intellectual and personality processes from a theoretical and research-oriented perspective. Influences including culture, gender, gender identity, race, ethnicity, sexual orientation, and socio-economic status on aging are examined.
- PSYC 151. Psychological Aspects of Death and Dying.** 3 Units
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Examination of the beliefs, attitudes, and behaviors associated with death and dying. Topics covered include children's and adults' concepts of dying and death; causes and types of death; self-destructive behavior; grief and mourning in the dying person and their survivors; euthanasia and other legal and ethical issues; cross-cultural and historical perspectives.
 Cross listed: GERO 124
- PSYC 152. Psychological Aspects of Health, Wellness, and Illness.** 3 Units
Prerequisite(s): PSYC 2 and PSYC 8.
Term Typically Offered: Fall, Spring
- Examines social, psychological, and behavioral factors important for physical health and emotional well-being. Psychological perspectives are applied to such topics as behavioral medicine, health promotion and compromise, the stress-illness relationship, social relations, personality, emotions, chronic illness, death and dying, and health care provider and patient interactions. Explores the development of health problems and the causes of premature death, as well as research on how psychology can help people live longer, healthier lives.

- PSYC 153. Political Psychology.** **3 Units**
Term Typically Offered: Fall, Spring
- Examines the ways in which political behavior is shaped by individual beliefs, personalities, cognitive patterns, biases, and other psychological mechanisms. Students will engage with a wide range of research on topics such as cognitive styles, personality, obedience, psychological roots of terrorism, the psychology of ideology, and the role of emotion in politics.
 Cross Listed: GOVT 152
- PSYC 157. Psychology of Women.** **3 Units**
Prerequisite(s): PSYC 2 or instructor permission.
Term Typically Offered: Fall, Spring
- Contemporary psychological theories and issues related to the psychology of women in America and globally. Psychological theories may include but are not limited to feminism, cognitive-behavioral, self-object relations, humanistic, social learning and existential. Issues may include development, sexuality, mental health, psychotherapy, physical health, education, work, violence against women, gender inequality, multicultural perspectives, aging, parenting, criminal behavior, politics, sexual slavery, reproductive rights, religion, spirituality, and the arts.
Note: A service course for WOMS.
- PSYC 160. Homosexuality.** **3 Units**
Term Typically Offered: Fall, Spring
- Exploration of the psychological world of gay men and lesbians. An examination of psychological theories, empirical research, and phenomenological perspectives. Covers psychological functioning, homophobia, disclosure, relationships, parenting, and aging.
- PSYC 165. Evolutionary Psychology.** **3 Units**
Prerequisite(s): PSYC 2 and PSYC 8; Psychology majors only
Term Typically Offered: Spring only
- Examination of empirical literature on emotion, behavior, and cognition of individuals from an evolutionary perspective. Topics can include: scientific methods in evolutionary psychology, survival strategies, mating strategies, parenting, kinship, cooperation, altruism, aggression, sexual conflict, and social dominance.
- PSYC 167. Psychology in Personnel Training and Development.** **3 Units**
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Application of psychological principles to problems of personnel training and development; techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, and ensuring positive transfer of training to the job situation; personnel development programs.
- PSYC 168. Abnormal Psychology.** **3 Units**
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Detailed consideration of behavior disorders and maladaptive behavior: theories of causation, descriptions of the disorders, and strategies of various therapies.
- PSYC 169. Industrial Psychology.** **3 Units**
Prerequisite(s): PSYC 2, PSYC 8.
Term Typically Offered: Fall, Spring
- Comprehensive overview of various human resources practices and policies, with an emphasis on people's psychological reactions to them. Topics include: recruitment, employee selection, training, employee compensation, legal aspects of employment decisions, and ethics in human resource management.
- PSYC 171. Applied Behavior Analysis.** **3 Units**
Prerequisite(s): PSYC 2 and PSYC majors or posted Behavior Analysis Certificate only, or instructor permission.
Term Typically Offered: Fall, Spring, Summer
- Introduction to theory, historical background, and philosophical assumptions relevant to behavior analysis with individuals. Lectures and laboratory activities in basic principles of behavior and methodology.
- PSYC 181. Experimental Analysis of Behavior.** **4 Units**
Prerequisite(s): PSYC 9, PSYC 171, and PSYC majors only.
Term Typically Offered: Fall only
- Extensive analysis of single subject experimental research on intermittent reinforcement of behavior, including complex schedules, stimulus control, generalization, and verbal behavior. Lecture-discussion three hours; laboratory three hours; laboratory may include a component of self paced instruction.
- PSYC 183. Teaching of Psychology.** **3 Units**
Prerequisite(s): Instructor permission
Term Typically Offered: Fall, Spring
- Study of best practices in the Teaching of Psychology. Selected topics may include, course preparation, skills for fostering student learning, strategies for improving student writing, theories of assessment, using technology in the classroom, sensitivity to diversity, teaching special populations, and the ethical and legal issues faced in the classroom. Students attend scheduled seminars on course topics and course are mentored by a professor in the Department of Psychology (called Faculty Mentor/Sponsor).
 Credit/No Credit
- PSYC 184. Clinical Issues in Applied Behavior Analysis.** **4 Units**
Prerequisite(s): PSYC 2 and PSYC 171, and PSYC majors or ABA Certificate students only
Term Typically Offered: Spring only
- Extensive study of applied behavior analytic methods in the assessment, development, and implementation of treatment programs for a variety of clinical issues including pediatric behavior problems, developmental disabilities, hyperactivity, parent-child difficulties, school-related problems, behavioral safety, brain injury, and dementia. Lecture three hours; laboratory three hours.
- PSYC 185. Psychology of Exceptional Children.** **3 Units**
Prerequisite(s): PSYC 2.
Term Typically Offered: Fall, Spring
- Examines characteristics, special needs, and problems of children who differ from the group norm because of their level of abilities, physical handicaps, or other deviations.

- PSYC 190. History and Systems of Psychology.** 3 Units
Prerequisite(s): PSYC 9 and PSYC majors only.
Term Typically Offered: Fall, Spring
- Covers the development of the various schools and systems of psychology, and their philosophical roots, interrelationships and differences. Normally taught with a seminar or proseminar format.
- PSYC 191. Undergraduate Practicum in Behavior Analysis.** 3 Units
Prerequisite(s): PSYC 171 or PSYC 181.
Term Typically Offered: Fall, Spring
- Classroom and on-site experience in applied behavior analysis. Students will work at an approved agency for a minimum of 10 hours per week under the supervision of a Board Certified Behavior Analyst. Students will also meet in class to present and review their cases. Emphasis will be placed on treatment integrity and ethics.
Note: Requires permission of instructor. May be repeated for credit.
- PSYC 194. Cooperative Research.** 1 - 6 Units
Prerequisite(s): PSYC 2, PSYC 8, and PSYC 9. PSYC 121 recommended.
Term Typically Offered: Fall, Spring
- Opportunity for dedicated students interested in graduate school or a career involving research to work cooperatively on a psychological research project under faculty supervision.
Note: May be repeated once for up to 6 units of credit.
- PSYC 195A. Fieldwork in the Teaching of Psychology.** 1 - 6 Units
Term Typically Offered: Fall, Spring
- Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
- Credit/No Credit
- PSYC 195B. Fieldwork in Child Observation.** 3 Units
Prerequisite(s): PSYC 148 or equivalent.
Term Typically Offered: Fall, Spring
- Supervised observation of preschool children in a formal school setting.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
- Credit/No Credit
- PSYC 195C. Fieldwork in Industrial and Organizational Psychology.** 1 - 6 Units
Term Typically Offered: Fall, Spring
- Supervised work experience at an appropriate level in business and governmental organizations.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
- Credit/No Credit
- PSYC 195F. Fieldwork in Community Psychology.** 1 - 4 Units
Term Typically Offered: Fall, Spring
- Supervised experience in various community and governmental agencies, such as the Suicide Prevention Service, Planned Parenthood, and the California Youth Authority. The experience must be of an applied psychological nature, determined collectively by the agency, the supervising faculty member, and the student.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit and a third time if another agency is involved.
- Credit/No Credit
- PSYC 195G. Fieldwork.** 1 - 6 Units
Term Typically Offered: Fall, Spring
- Projects in contemporary areas of psychology under the supervision of one or more faculty.
Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.
- Credit/No Credit
- PSYC 196S. Psychology of Religion.** 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring
- Introduction to psychological aspects of religion, including its foundations, measurement, and research methods. Selected topic areas include: religious & spiritual development; religion and spirituality in neuroscience, cognitive psychology, emotion, personality, social psychology, and cross-cultural psychology; religion and spirituality in health, mental health, coping, and psychotherapy.
- PSYC 196T. Black Psychology.** 3 Units
Prerequisite(s): PSYC 2
Term Typically Offered: Fall, Spring
- Examines the concepts, issues and theories related to the psychology of the African American experience. Through the exploration of topics related to the African American experience in the United States, including, but not limited to, African philosophy, the US Census, media representations, language, and political enfranchisement, the course utilizes an interdisciplinary approach to interrogate the cultural, historical, political, and social factors influencing Black identity in the US and the creation of Black Psychology.
- PSYC 197A. Advanced Research I.** 1 - 4 Units
Prerequisite(s): PSYC 194 and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall only
- Advanced research opportunity for students who have completed previous research experiences in PSYC 194. Students in the course are expected to develop advanced skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.

- PSYC 197B. Advanced Research II.** 1 - 4 Units
Prerequisite(s): PSYC 197A and permission of instructor and Department Chair. Graded; 1 - 4 units.
Term Typically Offered: Fall, Spring
- Advanced research opportunity for students who have completed previous research experiences in PSYC 197A. Students in the course are expected to demonstrate competence in advanced research skills in research methods, data management, data analysis, and the communication of research findings by conducting research on collaborative projects under the guidance of a psychology faculty supervisor.
- PSYC 198A. Prospects for Success: Peer Mentee.** 1 Unit
Term Typically Offered: Fall, Spring
- Provide psychology majors with information and experiences necessary for developing academic goals, skills, and better understanding of the Psychology major. Weekly meetings with peer mentors to discuss topics that include academic planning, website navigation, preparation for meeting with professors, academic skills, student professionalism and resume/CV development.
Note: May be repeated for credit
- Credit/No Credit
- PSYC 198B. Prospects for Success: Peer Mentor.** 2 - 3 Units
Prerequisite(s): PSYC 4 and permission from instructor
Term Typically Offered: Fall, Spring
- Provide peer mentoring and advising to Psychology majors. Develop peer mentoring knowledge and skills through training and assigned readings. Peer mentors provide psychology majors with information and experiences necessary for developing academic goals, skills, and a better understanding of the Psychology major. Conduct weekly mentee meetings to discuss topics that include academic planning, website navigation, preparations for meetings with professors, academic skills, student professionalism and resume/CV development.
- PSYC 199. Special Problems.** 1 - 6 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Requires permission of instructor and the Department Chair.
- Credit/No Credit
- PSYC 200. Methods in Empirical Psychology.** 3 Units
Prerequisite(s): PSYC 8, PSYC 101, PSYC 102.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
- Philosophy of science, critical thinking in the design of research studies, and professional issues. Topics include: nature of science; observational, experimental, and case study designs; formulating research questions; measurement strategies; scaling and coding; internal and external validity; naturalism in research; quasi-experiments; archival research; physical traces; data collection; interpreting results; program evaluation; professional writing; and ethics.
- PSYC 202. Survey of Contemporary Statistical Methods in Psychological Research.** 3 Units
Prerequisite(s): Graduate standing; PSYC 102 or equivalent
Term Typically Offered: Fall, Spring
- Broad coverage of common univariate and multivariate designs and analyses used in contemporary psychological research. Primary focus is on providing the basic tools for carrying out the analyses in statistical software and interpreting the results, as well as understanding results presented in published research reports. Topics include various ANOVA and multiple regression models and applications including related categorical and multivariate alternatives, such as logistic regression analysis, discriminant function analysis, MANOVA, path analysis, factor analysis, canonical correlation analysis.
- PSYC 204. Advanced Topics in Statistical Methods for Psychological Research.** 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring
- Advanced treatment of selected research design and analysis methods of psychological research. Applications of the general and generalized linear models (e.g., multiple regression models, structural equation models, multilevel models, and limited dependent variable models) for a variety of research designs and data structures. Intermediate to advanced training in statistical software and data management. Focus is on understanding foundations and assumptions of the methods, understanding interrelationships between the methods, performing specialized and non-routine analyses when needed, and interpreting results in detail.
- PSYC 205. Measurement Methods for Psychological Research and Practice.** 3 Units
Prerequisite(s): PSYC 202
Term Typically Offered: Fall, Spring
- Detailed coverage of classical and modern theories and models of psychological measurement, and their applications in research and professional testing settings. Primary focus is on principles of constructing and analyzing measures, including both paper-and-pencil tests/surveys and performance-based tests that require rater judgment in scoring. Measurement models include classical testing theory, generalizability theory, confirmatory factor analysis, Rasch measurement, and item response theory.
- PSYC 206. Tests and Measurement.** 3 Units
Prerequisite(s): Graduate standing and PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring
- Examines the administration, interpretation, and application of psychological tests used by behavioral scientists in clinical, educational, organizational, and other settings. Test development, reliability and validity, and legal considerations will be discussed.
- PSYC 209. Seminar in Systems of Psychology.** 3 Units
Term Typically Offered: Fall, Spring
- Historical review of the systems of thought which led to modern psychology. An examination of current psychological systems and their development. Factors that differentiate psychological systems will be studied.

- PSYC 210. Theories of Personality.** 3 Units
Prerequisite(s): PSYC 102 or equivalent; PSYC 102 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Study of the role of personality theory in the field of psychology, and an examination of the current theories.
- PSYC 216. Current Literature in Personnel and Organizational Psychology.** 3 Units
Prerequisite(s): Course work in Personnel and Organizational Psychology; PSYC 102 or its equivalent.
Term Typically Offered: Fall, Spring
- Analyzes selected current articles on theory and research in such journals as the Journal of Applied Psychology, Personnel Psychology, and Organizational Dynamics, with written and oral critiques.
Note: May be repeated twice for credit.
- PSYC 216A. Current Literature and Applications in Industrial-Organizational Psychology.** 3 Units
Term Typically Offered: Fall only
- Seminar to review current literature in selected organizational psychology topics, and develop proposals for applied research in industrial-organizational psychology. Literature focus will be centered on personal and interpersonal factors influencing the quality of work life and experiences of employees. Application focus will be centered on identifying organizational problems amenable to research, reviewing literature and common practices to identify potential solutions, designing a research methodology to address the problem and evaluate the solution, and writing research proposals including Human Subjects Review.
- PSYC 216B. Current Literature and Applications in industrial-Organizational Psychology.** 3 Units
Prerequisite(s): PSYC 216A
Term Typically Offered: Spring only
- Seminar to discuss implementation of applied research proposals from the previous semester and review current literature in performance management and workforce planning systems. Application focus will be centered on understanding organizational contexts and constraints for implementing research, obtaining managerial and participant cooperation, maintaining methodological rigor in the field, systematically and objectively recording data, and preparing data for analysis. Literature focus will be centered on methods for measuring employee performance relative to objectives, understanding performance barriers, and identifying human resource needs.
- PSYC 217. Seminar in Social Psychology.** 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring
- Review of classic and contemporary theories and research in social psychology. Topics may include group dynamics, social influence, aggression, helping behavior, attitudes, dissonance and self-justification, prejudice, stereotyping, and discrimination; automaticity and social cognition, motivation, and gender. Emphasis upon the application of social psychological theories and research to social problems.
- PSYC 240. Seminar in Behavioral Neuroscience.** 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring
- Surveys the fundamental principles of Behavioral Neuroscience, the connection between the brain and behavior. Topics may include: neuroanatomy, electrochemical transmission, sites and mechanism of drug action, sensation and perception, motor systems, developmental processes, neuroendocrine systems, learning and memory, attention, emotion, executive function, neurodegenerative disease and the neurobiology of mental illness. Seminal experiments and recent discoveries within the field will be reviewed and discussed with a focus on how these findings impacted and continue to influence past and current theory.
- PSYC 241. Seminar in Cognitive Psychology.** 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring
- Provides a survey of topics in human information processing. Selected topics may include perception, attention, memory, knowledge, categorization, problem solving, reasoning, decision making, and language comprehension and production. Classical theories and experiments in these areas will be reviewed in addition to applications of this work to practical problems.
- PSYC 242. Seminar in Learning and Behavior.** 3 Units
Prerequisite(s): Graduate standing
Term Typically Offered: Fall, Spring
- Surveys the area of Psychology concerned with how people and animals learn and how their behaviors are changed as a result of this learning. Selected topics include: Inmate behaviors, respondent and operant learning, behavioral economics, comparative cognition, theories of imitation, choice and self-control. Classical theories and current experiments in these areas will be reviewed in addition to implications of this work to practical problems.
- PSYC 251. Developmental Processes.** 3 Units
Prerequisite(s): PSYC 148 or PSYC 149.
Term Typically Offered: Fall, Spring
- Study of the psychological processes underlying development throughout the life span. Covers such topics as cognitive, language, emotional, and relationship development in terms of the individual. Attention will be given to functioning of the individual within social units such as the family.
- PSYC 262. Theoretical Foundations of Organizational Psychology.** 3 Units
Prerequisite(s): PSYC 108 or equivalent.
Term Typically Offered: Fall, Spring
- Major theories that made significant theoretical contributions to organizational psychology are covered, along with areas of significant research which have provided the foundations of modern organizational psychology.

PSYC 267. Training & Employee Development.**3 Units****Term Typically Offered:** Fall only

This course will provide an overview of the application of psychological principles to employee training and development, and an in-depth review of common training and development practices. Additional topics include techniques for determining training requirements, motivating trainees, providing feedback on trainee performance, ensuring positive transfer of training to the job environment, and employee development programs.

PSYC 268. Advanced Psychopathology.**3 Units****Term Typically Offered:** Fall, Spring

Covers an advanced and detailed discussion of the description, etiology, development, dynamics and treatment of individuals with mental disorders. Since the DSM-IV is the major classification system used by mental health professionals, it will also be discussed. This manual describes essential features of a variety of disorders and outlines the basis on which an experienced clinician can differentiate one disorder from another.

Note: May substitute EDC 231.**PSYC 269. Analysis of Work and Employee Selection.****3 Units****Term Typically Offered:** Spring only

Survey of work analysis, with emphasis on designing employee selection systems. Topics to include multiple methods for analysis of different types and aspects of work, and applications of the results such as: Explicating the performance construct for a given job; identifying human attributes required for successful performance; evaluating jobs in terms of compensation; selecting appropriate measurement methods for predictor and criterion constructs; evaluating predictor utility; and the legal environment for employee selection practice.

PSYC 271. Advanced Applied Behavior Analysis.**4 Units****Prerequisite(s):** Graduate status and instructor permission.**Term Typically Offered:** Fall, Spring

Designed both for graduate students who are interested in gaining knowledge about the fundamental principles of behavioral psychology and those who are pursuing certification as a Board Certified Behavior Analyst. Students will not only learn behavioral theory and the means by which behavior is increased, decreased, shaped and maintained, but they will learn to apply behavioral principles to more complex topics such as concept formation and novel behaviors.

PSYC 272. Research Methods in Behavior Analysis.**3 Units****Prerequisite(s):** PSYC 171 or PSYC 181.**Term Typically Offered:** Fall, Spring

Covers methods related to single-case research (i.e., data collection, logic, designs). Course content is based primarily on contemporary books and articles from peer-review journals. Topics include: measurement of behavior, methods of assessing inter-rater agreement; experimental design including, reversal designs, changing-criterion designs, alternating treatment designs, and multiple-baseline designs; and displaying and interpreting behavioral data. Current methodological issues will be discussed.

PSYC 274. Theoretical Foundations of Behavior Analysis.**3 Units****Prerequisite(s):** PSYC171 or PSYC181 or equivalent.**Term Typically Offered:** Fall, Spring

Covers major theories that have made significant contributions to behavior analysis, along with areas of significant research providing the foundations of radical behaviorism and contemporary behavior analysis. Topics include history of behaviorism, selection by consequences as a casual mode, pragmatism, determinism, logical positivism, dualism x monism, verbal behavior and private events.

PSYC 275. Applied Behavior Analysis in the Workplace.**3 Units****Prerequisite(s):** Graduate students only**Term Typically Offered:** Fall only

Overview of contemporary research and practice on the use of applied behavior analysis techniques in the workplace. Students will learn to use several performance assessment and improvement tools based on the operant learning literature, as well as learn strategies for effective supervision, training, and management of staff in human service organizations.

PSYC 281. Advanced Experimental Analysis of Behavior.**4 Units****Prerequisite(s):** PSYC 271.**Term Typically Offered:** Fall, Spring

Advanced consideration of small-N research designs. Analysis of complex contingencies of reinforcement and stimulus control as they apply to such topics as perceiving, thinking, abstractions, and concept formation. In-depth examination of behavior analytic principles in relation to choice behavior and verbal behavior.

PSYC 283. Teaching Of Psychology.**3 Units****Term Typically Offered:** Fall, Spring

Covers the historical background of higher education, the social and administrative structure of colleges and universities, and the selection, preparation and planning of undergraduate psychology courses, particularly introductory courses.

PSYC 284. Assessment and Treatment of Behavior Problems.**4 Units****Prerequisite(s):** Graduate status and instructor permission.**Term Typically Offered:** Fall, Spring

Advanced study and practical experience in application and teaching of behavior analytic methods of assessment, data collection, program construction and evaluation for a variety of behavior problems. Students will become proficient in conducting functional analyses, positive programming, and constructing and implementing behavior intervention programs for behavior excesses (consistent with State of California laws) including, antecedent manipulations, differential reinforcement schedules, functional communication training, and response cost. They will be required to develop didactic skills with respect to these various programs. Lecture three hours; Lab three hours.

PSYC 291. Professional Issues in Behavior Analysis.**3 Units****Prerequisite(s):** PSYC 271.**Term Typically Offered:** Fall, Spring

Classroom and on-site experience in applied behavior analysis. Students will work at an approved agency for a minimum of 10 hours per week under the supervision of a Board Certified Behavior Analyst. Students will also meet in class to present and review their cases. Emphasis will be placed on treatment integrity and ethics.

Note: Requires permission of instructor. May be repeated for credit.

PSYC 294. Cooperative Research.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Students work cooperatively on a psychological research project under faculty supervision.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

PSYC 295A. Fieldwork in the Teaching of Psychology.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Supervised experience in various educational and instructionally related tasks, such as leading discussion groups, setting up and presenting demonstrations, constructing and scoring tests, and tutoring, at selected educational institutions in the Sacramento area.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 295C. Fieldwork in Personnel and Organizational Psychology.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Supervised work experience at a professional level in business and governmental organizations.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 295G. Fieldwork.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Projects in contemporary areas of psychology under the supervision of one or more faculty.

Note: Requires permission of instructor and the Department Chair. May be repeated once for credit.

Credit/No Credit

PSYC 299. Special Problems.**1 - 6 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading. Requires approval of instructor and Department Chair.

Credit/No Credit

PSYC 500A. Culminating Experience.**4 Units**

Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.

Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree.

PSYC 500B. Culminating Experience.**2 Units**

Prerequisite(s): PSYC 500A.

Term Typically Offered: Fall, Spring

Continuation of work on thesis or project.

BA in Psychology

Units required for Major: 46-50

Total units required for BA: 120

Program Description

With a Bachelor of Arts in Psychology, graduates can qualify for positions requiring an understanding of human behavior in public service, education, or business. The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies.

The Psychology program at Sacramento State is highly sought after and the undergraduate major is officially impacted. Students wishing to become Psychology majors must meet eligibility requirements before applying for admission to the program. It is highly recommended that interested students speak with a Psychology advisor as soon as possible.

Minimum Grade Requirement

Once admitted to the program, PSYC 2, PSYC 8, AND PSYC 121 must each be completed with a minimum grade of "C-" or better.

Coursework Sequencing

The Psychology Department strongly recommends that Psychology Majors sequence their courses in the following manner to provide them with an optimal learning experience:

Code	Title	Units
Freshmen and Sophomores		
	Lower division GE requirements, CHDV 30, PSYC 2, PSYC 4, PSYC 8, PSYC 9 and electives	
Juniors		
	Upper division GE requirements, PSYC 121 (and PSYC 102 for graduate school aspirants), any upper division Psychology courses and electives	
Seniors		
	Upper division GE requirements, any upper division Psychology courses, Psychology capstone course and electives	

It is important to choose courses in the sequence outlined above. Otherwise, there could be a delay in completion of the major and graduation.

Note: Transfer students must take at least 15 units of Psychology courses in residence at Sacramento State; 12 of those units must be upper division.

Program Requirements

Code	Title	Units
Required Lower Division Courses (13 Units)		
CHDV 30	Human Development ¹	3
PSYC 2	Introductory Psychology ^{1,2}	3

Certificate in Behavior Analysis

Units required for Certificate: 20

Program Description

The undergraduate Behavior Analysis Certificate qualifies students for positions requiring the application of behavior analysis in educational settings and health and human service agencies. Specialized coursework is taken concurrently with established degree requirements. Courses for the Certificate program are applicable toward course requirements for the major.

To receive the Sacramento State certification in Behavior Analysis, students must:

- complete a baccalaureate degree program with a major in Psychology or a related field;
- achieve a passing grade of "C" or better in each of the BA Certificate Program courses.

Additional certification information may be obtained from the Psychology Department Office.

Program Requirements

MA in Psychology (Applied Behavior Analysis)

Total units required for MA: 30

Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

Applied behavior analysis (ABA) is the field of Psychology concerned with understanding the environmental variables that reliably influence human behavior, as well as developing procedures to modify socially significant behavior. The ABA program prepares students to work as behavior analysts in a variety of settings including schools and agencies providing services to individuals with disabilities. The ABA program coursework fulfills the requirements to sit for the national certification exam in Behavior Analysis (BCBA). Students should note that this degree option is also appropriate for those planning to enter doctoral programs in Applied Behavior Analysis, Experimental Analysis of Behavior, or Special Education.

Applied Behavior Analysis is a scientific approach aimed at understanding environmental variables that reliably influence socially significant behavior and developing behavior-change technologies based on this understanding. Applied Behavior Analysis procedures have been used in many areas including developmental disabilities, education, rehabilitation, community psychology, self-management, child management, and sports psychology. The program at Sacramento State prepares students to practice as M.A. level board certified behavior analysts, as well as enter doctoral (Ph.D.) programs in Applied Behavior Analysis or Experimental Analysis of Behavior. Our graduates are extremely marketable in California and are typically employed by school districts, private schools, or agencies providing services to individuals with learning, emotional, or developmental disabilities.

Research and Clinical Opportunities

Our research facilities include human and animal (rats) operant laboratories and research rooms for data collection with children and adults. We have also established research partnerships with different schools and agencies in the region.

Clinical training is also an integral part of our program. There are numerous funded internships and job opportunities for behavior analysis students in Sacramento.

Certification

The ABA option coursework should fulfill the new requirements to sit for the national certification exam in Behavior Analysis. For more information visit www.bacb.com.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department's Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option's additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- an application for admission—via CalState Apply (<https://www2.calstate.edu/apply>)
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:

California State University, Sacramento
Office of Graduate Studies
River Front Center 215
6000 J Street
Sacramento, CA 95819-6112

- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies>

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant's potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—

available from www.csus.edu/psyc/grad-students/graduate-program-dev.html ;

- additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 34-36

Minimum Cumulative GPA: 3.0. All units must be completed with a grade of "B" or better.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student's thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

MA in Psychology (General Psychology)

Total units required for the MA: 30

Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

In the General Psychology option, students can create individual programs in conjunction with the faculty to prepare for employment or further study in doctoral programs in a variety of specialized fields, such as Clinical, Cognitive, Developmental, Educational, Experimental, Industrial/Organizational, Neuroscience, Quantitative, and Social Psychology.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-

year universities must be reviewed and approved for equivalency by the Department's Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option's additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

MA in Psychology (Industrial-Organizational Psychology)

Total units required for MA: 30

Program Description

The Master of Arts program in Psychology is designed to provide specialized education in the field of psychology. With a MA in Psychology, one can qualify for positions similar to those associated with a BA, though at a higher level of responsibility. Advisors play an active role in the planning process, and students are strongly encouraged to consult with faculty on a continual and intensive basis as soon as they begin their studies in the program. MA students can prepare for doctoral study in any area of Psychology or specialize in areas such as Applied Behavior Analysis or Industrial-Organizational Psychology. The Graduate Brochure contains the department application procedures, including GRE requirements and the departmental application form.

Although the program is based on a core set of requirements, the structure of the program allows for flexibility. While much material is covered in regular course offerings, the Department recognizes that specialized study and the development of certain types of skills must take place on a one-to-one student-instructor basis. This includes research activities in the laboratory, field, or library; teaching activities; and volunteer work in community mental health agencies, government agencies, schools, and/or businesses. Academic credit under individualized study or fieldwork designations is available for these purposes.

The Industrial-Organizational Psychology Option is designed for students who wish to develop marketable career skills that allow them to apply psychological principles and research methods to work-related issues. The I-O program at Sacramento State was designed with heavy influence from the 2016 Guidelines for Education and Training in Industrial-Organizational Psychology, published by the Society for Industrial and Organizational Psychology. While we cover all 24 major competency areas in the SIOP Guidelines to some degree, we give more emphasis to some than we do others—a strategy that is common and fully expected in master's programs according to the narrative of the SIOP Guidelines. In consideration of the typical jobs held by master's level I-O practitioners in general and especially in the local employment market for our students and alumni, our program gives primary emphasis to topics in human resource planning and development (e.g., job/work analysis; employee recruitment, testing, and selection; employee training; performance management) and general analytical skills (e.g., research methods; measurement; data analysis). These topics are slanted more toward the "industrial" side of the I-O field. Current literature in organizational psychology topics such as work attitudes and motivation, groups and teams, and occupational health and safety have important implications for the aforementioned human resource planning and development topics, and are covered more briefly in the coursework. In addition to completing the core courses and the culminating requirement for the MA degree, students must also select the Industrial-Organizational Psychology option.

Admission Requirements

Admission to graduate study in Psychology is selective. The Department equally weighs the candidate's overall grade point average (GPA) and scores on the Graduate Record Examination (GRE). An overall GPA of 3.0 is recommended. When making admissions decisions, the Department takes into consideration the candidate's combined GPA and GRE score, letters of recommendation, previous (research and/or practical) experience, the candidate's interest in a particular faculty member's research agenda, and additional materials as required by each program option (ABA, General MA, and I/O).

Applicants are required to have completed upper division undergraduate psychology courses in statistics and research methods, with at least "C" grades in those courses, as well as a balanced and academically strong group of upper division courses covering at least five different core academic areas of psychology (e.g., biological, clinical, cognitive, developmental, social). The upper division psychological research methods/statistics requirement is met by PSYC 121 and PSYC 102 taken at Sacramento State, or their equivalents at other universities. Upper division research methods/statistics courses from other four-year universities must be reviewed and approved for equivalency by the Department's Graduate Coordinator.

Please visit www.csus.edu/psyc/grad-students/graduate-program-dev.html for information on each option's additional requirements.

Admission Procedures

All applicants, including Sacramento State graduates, must apply to both the University and the Psychology Department. Please submit the following to the Sacramento State Office of Graduate Studies:

- an application for admission—via CalState Apply (<https://www2.calstate.edu/apply>)
- two sets of official transcripts from all colleges and universities attended, other than Sacramento State, should be sent to:

California State University, Sacramento
Office of Graduate Studies
River Front Center 215
6000 J Street
Sacramento, CA 95819-6112

- Official Graduate Records Exam (GRE) scores (be aware that it takes approximately six weeks from the test date for scores to be forwarded); for more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies>

At the same time, each applicant must file on-line with the Psychology Department:

- a completed application form;
- one set of unofficial transcripts from all colleges and universities attended, including Sacramento State transcripts;
- unofficial copies of the General GRE scores*;
- three letters of recommendation, from individuals who can evaluate the applicant's potential for successful graduate study. At least two letters from faculty are preferred. See application brochure for link—available from www.csus.edu/psyc/grad-students/graduate-program-dev.html;
- additional materials, as required by each specific option (General MA, ABA and I/O).

*The General GRE must have been taken by the application deadline.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 34-36

Minimum Cumulative GPA: 3.0. All units must be completed with a grade of "B" or better.

The field of Industrial-Organizational Psychology (I-O Psychology) covers all aspects of psychology in the workplace, including such sub-topics as: organizational development, leadership, performance evaluation,

personnel selection, test validation and development, work teams, training, and personality influences.

The Industrial-Organizational Psychology Option at Sacramento State is designed to give broad-based training in the relevant content areas as well as provide a strong methodological background. Students obtaining the Master's degree should be prepared for a career as a personnel manager, a testing specialist, a member of an I-O consulting group; they should also be prepared for further graduate work at the doctoral level. By meeting all of the requirements for the degree, students will have met the master's level educational competencies identified by the Society for Industrial and Organizational Psychology.

Students are strongly advised to keep in contact with professors in the Psychology Department for academic advising.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses in the graduate program with a minimum 3.0 GPA;
- selected a Thesis or Project committee;
- obtained the committee's approval of a proposal for the thesis or project (as indicated by committee members' signatures on the Department's thesis/project approval form); and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

The student will complete the Advancement to Candidacy form after planning a degree program in consultation with a Psychology advisor and members of the student's thesis/project committee. The completed form is then returned to the Office of Graduate Studies for approval.

Public Policy and Administration

College of Social Sciences and Interdisciplinary Studies

Program Description

The graduate programs in the Department of Public Policy and Administration prepare students for a career in public service through

a deeper understanding of how to address complex issues relating to public policy and administration. We serve the State of California and Sacramento Region by developing leaders possessing strong analytical tools, and a deep commitment to public service.

Note: The Department of Public Policy and Administration, in collaboration with the College of Business Administration, also offers an interdisciplinary Master's of Science in Urban Land Development. In addition, it offers an interdisciplinary doctorate in education in collaboration with the College of Education. Both of these programs are listed separately in this catalog.

Special Features

- The proximity of Sacramento State to the State Capitol offers significant advantages to students by providing them with a ready "laboratory" for observing the policy and administrative issues they will confront professionally, and for gaining experience alongside existing practitioners in public policy and administration. In particular, the graduate program's internship feature is greatly strengthened by the placements available in California state government, local government, and related organizations.
- The graduate program's curricular design and scheduling of courses allow students to complete the program in four semesters if enrolled full-time. In addition, part-time students may complete the program after five or a six semesters of attendance. Classes are scheduled in the evening, and sometimes on Saturday, to accommodate the scheduling needs of students who are employed in the daytime, or who have other obligations that require non-traditional schedules.
- As a reflection of the growing interest in collaborative processes to solve public concerns, and the need for mid-level administrators in the judicial system, the PPA Department also offers certificates in Collaborative Governance and Judicial Administration (through the College of Continuing Education).

Career Possibilities

Policy analyst and/or public administrator for state, federal, or local government; private firm or association; or not-for profit organization

WASSMER, ROBERT W.

PPA 100. Introduction to Public Policy and Administration. 3 Units**Prerequisite(s):** GOVT 1 or GOVT 150 or equivalent.**Term Typically Offered:** Fall, Spring

Explores context and process for policy making by national and California state governments, including ethical dimensions. Applications are developed from students' and instructor's areas of interest including K-12 and higher education, land-use policy, and aging issues such as elder advocacy, Social Security, and Medicaid. Provides background and skills for entry level positions in public or non-profit organizations. Cross Listed: GERO 102; only one may be counted for credit.

PPA 200. Introduction to Public Policy and Administration. 3 Units**Term Typically Offered:** Fall, Spring

Examines public policy and administration by exploring major policy processes, particularly in California state and local government. Topics include the emergence and specification of issues, developing and selecting policy options, implementing and administering policies and evaluating and terminating public policies. The course approach is comprehensive, transdisciplinary and human centered – concerned with the interplay of values in shaping policy outcomes. The intent is to provide conceptual frameworks and operational principles required in identifying and resolving issues emerging in public settings.

Note: Satisfies the Graduate Writing Intensive Requirement (GWI).**PPA 205. Research in Public Policy and Administration. 3 Units****Term Typically Offered:** Fall, Spring

Emphasizes fundamental research and management skills necessary in generating accurate and useful decision-related information for policy makers. Topics include conceptualizing and structuring research questions, collecting valid and relevant data and interpreting and presenting results. The course approach is pragmatic, transdisciplinary, and oriented to producers and users of policy research information. The intent is to enhance research skills in analyzing and resolving policy issues.

PPA 207. Quantitative Methods in Public Policy and Administration. 3 Units**Prerequisite(s):** ECON 1B, PPA 205 or instructor permission.**Term Typically Offered:** Fall, Spring

Study of quantitative methods as applied in public policy analysis. Concentrates on interpreting the results of econometric, statistical, and other public policy studies, and on determining the relevance and applicability of quantitative analysis with the larger scheme of public policy decision making.

PPA 210. Political Environment of Policy Making. 3 Units**Prerequisite(s):** PPA 200 or instructor permission.**Term Typically Offered:** Fall, Spring

Assists students in learning to identify the political factors impinging on the policy process and in learning to cope with them. With special emphasis on the California political environment and issues, employs case studies, structured role-playing, and including politically feasible policy alternatives and advice to hypothetical clients. The goal is to equip students to work effectively as politically aware policy analysts.

PPA 220A. Applied Economic Analysis I. 3 Units**Prerequisite(s):** ECON 1B, or instructor permission.**Term Typically Offered:** Fall, Spring

Presents the basic concepts, tools, and models of microeconomics in the context of public sector choices. The standard market demand and supply model is developed and used to analyze the effect of public policies (particularly those of California state and local governments) on consumers and businesses. The principles of welfare economics are presented and used to evaluate economic performance.

Note: Graduate Writing Intensive Course.**PPA 220B. Applied Economic Analysis II. 3 Units****Prerequisite(s):** PPA 220A.**Term Typically Offered:** Fall, Spring

Continuation of PPA 220A which focuses specifically on the role of government in a market-oriented economy with emphasis on market failures including: public goods, externalities, and monopoly. Corrective taxes and expenditure programs are discussed, and the technique of cost-benefit analysis is developed and applied to various state and local government projects.

PPA 230. Public Budgeting and Finance. 3 Units**Term Typically Offered:** Fall, Spring

Enables students to understand, analyze, and evaluate the governmental budget process including revenue and expenditure patterns. The primary emphasis is on California state and local governments. The federal budget process is discussed primarily to reflect the impact that it has on state and local governments. Features both theoretical and practical approaches to budgets, including alternate budget formats. Various perspectives are utilized to explore the political, economic, and policy concerns inherent in the development and implementation of public sector budgets.

PPA 240A. Public Management and Administration I. 3 Units**Prerequisite(s):** 1) graduate standing and 2) completion of PPA program prerequisites, or instructor permission.**Term Typically Offered:** Fall, Spring

Examines concepts and approaches used in analyzing and understanding complex organizations. Organizational theory, management concepts, and behavioral analysis is employed to understand the dynamics and evolution of public sector organizations. Emphasis is placed on applying classic organizational theory and introductory leadership skills and issues.

PPA 240B. Public Management and Administration II. 3 Units**Prerequisite(s):** PPA 240A.**Term Typically Offered:** Fall, Spring

Continuation of PPA 240A. Examines concepts and approaches used in analyzing and understanding complex organizations. Emphasis is placed on ability to intervene and assist public agencies by designing intervention plans, engaging in strategic planning, promoting interdepartmental effectiveness, using advanced leadership issues and techniques, and using advanced organizational development strategies.

PPA 250. California Land Use Policy. 3 Units**Term Typically Offered:** Fall, Spring

Examines public policies that influence land use. Reviews tools of land use planning and development and applies them to issues that dominate California policy choices including urban design, fiscalization of land use, sustained growth, and the challenges of social equity.

PPA 251. Urban Problems, Economics and Public Policy. 3 Units**Prerequisite(s):** PPA 220A or ECON 100B.**Corequisite(s):** ECON 251; only one of these courses may be counted for credit.**Term Typically Offered:** Fall, Spring

Historical development, economics and possible policy solutions of the most pressing problems facing central cities and urban areas in the U.S. are presented. Problems discussed include poverty, crime, urban abandonment/suburban sprawl, edge cities, deteriorating infrastructures, and fiscal stress.

Cross Listed: ECON 251; only one may be counted for credit.

PPA 270. Introduction to Collaborative Policy Making. 3 Units**Prerequisite(s):** PPA 200 and PPA 210, or approval of instructor.**Term Typically Offered:** Fall, Spring

Examines the theory and practice of collaborative policy-making using case studies of major collaborative processes. Topics include interpretative policy analysis, deliberative democracy theory, public participation, collaborative policy networks, the use of dialogue in public policy, resolution of policy controversies, and consensus building.

PPA 272. Collaborative Governance Advanced Practice. 3 Units**Prerequisite(s):** PPA 270 with a grade of B- or better, or instructor permission.**Term Typically Offered:** Fall, Spring

Practice driven, highly participatory course for professionals who require more advanced skills into collaborative methods. Topics include conflict analysis and assessment, analysis of advocacy speech, public participation, working with the media, and interagency networks. Focuses on active learning with practice in a wide variety of collaborative skills.

PPA 284. Urban Policy. 3 Units**Term Typically Offered:** Fall, Spring

Exploration in-depth of the socio-economic problems of urban and metropolitan areas and evaluation of proposed political and governmental solutions.

Cross Listed: GOVT 284; only one may be counted for credit.

PPA 291. Court Governance and Operations. 3 Units**Term Typically Offered:** Fall, Spring

Studies the state judiciary as both independent and interdependent with the legislative and executive branches of government at both the state and local level. The goal is to develop foundational knowledge of the historical and evolving governing and operational principles of the California court system.

PPA 292. Court Management. 3 Units**Prerequisite(s):** PPA 291 or instructor permission.**Term Typically Offered:** Fall, Spring

Provides training in key court administrative areas identified by such organizations as the National Association of Court Management (e.g., case flow management). Drawing from interdisciplinary literature on management theory, court case studies illustrate and provide context.

PPA 293. Court Leadership. 3 Units**Term Typically Offered:** Fall, Spring

Examines leadership in the court environment as distinct from management. Investigates how leadership principles are exercised in pivotal areas of the courts such as: community relations, creativity and innovation, organizational change, workforce development, succession planning, strategic planning and re-engineering.

PPA 294. Emerging Issues in Judicial Administration. 3 Units**Term Typically Offered:** Fall, Spring

Addresses pressing issues in judicial administration (e.g., courts in an electronic world, rising administrative workloads, greater number of self-represented litigants). Specific topics may change from year to year depending on the urgency of topics and nature of policy implications.

PPA 295. Internship in Public Policy and Administration. 3 - 6 Units**Prerequisite(s):** PPA 200.**Term Typically Offered:** Fall, Spring

Supervised work experience in a government or related organization.
Credit/No Credit

PPA 296E. Intergovernmental Relations. 3 Units**Term Typically Offered:** Fall, Spring

A review of the origins of federalism in the U.S. and various theoretical approaches to understanding the relationships between various levels of government, including ways in which the different levels of government relate to one another both vertically and horizontally.

PPA 297A. Executive Fellows Introductory Seminar. 3 Units**Term Typically Offered:** Fall, Spring

Seminar will enhance Executive Fellows' understanding of the state policy making and administrative process, policy implementation, ethical responsibilities of policy and administrative actors.

Note: Open only to students admitted to the Executive Fellowship Program.**PPA 297B. Executive Fellows Policy Seminar. 3 Units****Prerequisite(s):** PPA 297A**Term Typically Offered:** Fall, Spring

Seminar will extend the examination and analysis of the Executive branch of government to include alternative administrative practices, policy implementation strategies, and related administrative issues.

Note: Open only to students admitted to the Executive Fellowship Program.**PPA 298A. Judicial Administration Fellows Introductory Seminar. 3 Units****Term Typically Offered:** Fall, Spring

Critical examination and analysis of the administrative operation of the California judicial system and its structures, policies and practices.

Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 298B. Judicial Administration Fellows Policy Seminar. 3 Units
Term Typically Offered: Fall, Spring

Analyzes procedural issues and policy questions within the California judicial system with emphasis on the interdependence of the judicial, legislative and executive branches.

Note: Open only to students admitted to the Judicial Administration Fellows Program.

PPA 299. Special Problems. 1 - 3 Units
Prerequisite(s): Permission of faculty supervisor and the Department Chair.
Term Typically Offered: Fall, Spring

Supervised independent study in public policy and administration.
 Credit/No Credit

PPA 500. Culminating Experience. 3 Units
Prerequisite(s): Advanced to candidacy and permission of the graduate coordinator.
Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree.

Certificate in Applied Policy and Government

Units required for Certificate: 6

Program Description

The Capital Campus's graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements

Acceptance to one of the four Capital Fellows Programs: Assembly, Judicial Administration, Executive, or Senate.

Program Requirements

Code	Title	Units
Required Courses		6
<i>Select the two courses applicable to your program</i>		
For Senate Fellows:		
POLS 293A	Senate Fellows Introductory Seminar	
POLS 293B	Senate Fellows Policy Seminar	
For Assembly Fellows:		
POLS 294A	Assembly Fellows Introductory Seminar	
POLS 294B	Assembly Fellows Policy Seminar	
For Executive Fellows:		
PPA 297A	Executive Fellows Introductory Seminar	
PPA 297B	Executive Fellows Policy Seminar	
For Judicial Administration Fellows:		
PPA 298A	Judicial Administration Fellows Introductory Seminar	
PPA 298B	Judicial Administration Fellows Policy Seminar	
Total Units		6

Certificate in Collaborative Governance

Units required for Certificate: 6

Program Description

The Capital Campus's graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements

- Enrollment in the Sacramento State MPPA program **OR**
- Enrollment in the Sacramento State MSULD Program and completion of additional set of readings before enrollment in PPA 270

Program Requirements

Code	Title	Units
Required Courses (6 Units)		
PPA 270	Introduction to Collaborative Policy Making	3
PPA 272	Collaborative Governance Advanced Practice	3
Total Units		6

Certificate in Judicial Administration

Units required for Certificate: 12

Program Description

The Capital Campus's graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

The Certificate in Judicial Administration Program is administered by the College of Continuing Education in accordance with guidelines set by the Department of Public Policy and Administration

Admission Requirements

The Baccalaureate degree **AND** application for the Graduate Certificate in Judicial Administration as administered through the College of Continuing Education.

Program Requirements

Code	Title	Units
Required Courses (12 Units)		
PPA 291	Court Governance and Operations	3
PPA 292	Court Management	3
PPA 293	Court Leadership	3
PPA 294	Emerging Issues in Judicial Administration	3
Total Units		12

Master of Public Policy and Administration

Total units required for MPPA: 36-39

Program Description

The Capital Campus's graduate programs in Public Policy and Administration prepare future leaders to address the complex issues that face California. We serve the State and the region by developing leaders with strong analytical tools and a deep commitment to public service.

Admission Requirements

Admission to classified standing in the program requires:

- the baccalaureate degree;
- a GPA of 3.0 for all undergraduate coursework and in the last 60 units;
- results of the Graduate Record Examination (GRE) General Test;
- completion of the following (or their equivalents at other colleges or universities as determined by the Department Chair):

Code	Title	Units
ECON 1B	Introduction to Microeconomic Analysis	3
POLS 1	Essentials Of Government	3

- a written statement of purpose from one to two pages in length (typewritten), addressing the applicant's purpose in pursuing the Master of Public Policy and Administration;
- a minimum score of 560 (220 if computer-based, 83 if internet based) on the TOEFL (this requirement applies only to students earning degrees abroad whose primary language is not English); and
- three letters of recommendation from individuals with knowledge of the applicant's academic and professional potential.

A student with certain deficiencies in the above requirements may be admitted to the program on a conditionally classified status. Admission conditions will be determined on an individual basis.

Admission Procedures

All prospective students must file the following with the Office of Graduate Studies:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- GRE scores.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

The items below should be submitted to the Department office:

- written statement of purpose;
- letters of recommendation;
- program application; and
- TOEFL score, if applicable.

Minimum Units and Grade Requirement for the Degree

Units required for the MPPA: 36-39

Minimum Cumulative GPA: 3.0 with no grade lower than a "B-" in all required courses (and "credit" for PPA 295 and PPA 500).

Advancement to Candidacy

Students must file an application for Advancement to Candidacy listing their program of graduate study. The filing procedure should begin as soon as the student has:

- removed any deficiencies in admission requirements;
- completed at least five of the program's required courses (except PPA 295) with a minimum grade of "B-" in each and a cumulative grade point average of at least 3.0; and
- Satisfy the Graduate Writing Assessment Requirement (GWAR) by completing one of our Departmental Graduate Writing Intensive (GWI) courses with a grade of "B" or better (either PPA 200 or PPA 220A) or meeting one of the other standards set by the Office of Graduate Studies.

Department specific advancement to candidacy forms are available in the Department office.

Program Requirements

Code	Title	Units
Required Courses (30 Units)		
PPA 200	Introduction to Public Policy and Administration 	3
PPA 205	Research in Public Policy and Administration	3
PPA 207	Quantitative Methods in Public Policy and Administration	3
PPA 210	Political Environment of Policy Making	3
PPA 220A	Applied Economic Analysis I 	3
PPA 220B	Applied Economic Analysis II	3
PPA 230	Public Budgeting and Finance	3
PPA 240A	Public Management and Administration I	3
PPA 240B	Public Management and Administration II	3
PPA 295	Internship in Public Policy and Administration ¹	3
Electives (6 Units)		
Select 6 units. Graduate level PPA elective courses include the following: ²		6
PPA 250	California Land Use Policy	
PPA/ECON 251	Urban Problems, Economics and Public Policy	
PPA 270	Introduction to Collaborative Policy Making	
PPA 272	Collaborative Governance Advanced Practice	
PPA/POLS 284	Urban Policy	
Culminating Requirement (3 Units)		
PPA 500	Culminating Experience ³	3
Total Units		39

¹ At the discretion of the Department Chair, PPA 295 may be waived for students with one year of administrative and analytical experience in a full-time professional capacity in the field of Public Policy and Administration.

- ² PPA graduate students are required to take 6 units of elective courses. Ordinarily at least 3 of these units should be chosen from among the graduate level elective courses offered by the Department of Public Policy and Administration. As appropriate, the requirement to take at least 3 units within PPA may be waived with the approval of the student's academic advisor and the Department Chair. Additionally, the Department has offered experimental PPA 296 electives in the past, and will continue to do so.
- ³ Enrollment in PPA 500 is required of students in their last semester of enrollment in the program. Each student will undertake a project or thesis dealing with a policy or administrative issue and complete a significant written work detailing the problem or issue examined, sources of information used in analyzing the issue, and project findings and conclusions.

Social Science

College of Social Sciences and Interdisciplinary Studies

Program Description

The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Political Science, History, and Sociology. It serves both as an interdisciplinary major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

To qualify for a teaching credential, candidates must also complete an approved Professional Education Program and other requirements as specified by the California Commission on Teacher Credentialing. California faces a shortage of qualified teachers. Over the next decade we will need to find 300,000 people to take on the challenging but rewarding job of teaching in California schools.

Since the Social Science program involves work in several departments, and since special rules on overlap with General Education apply to this program, advising is essential to the efficient completion of the program.

Note: On June 1, 2006, the California Commission on Teacher Credentialing approved the program of subject matter preparation for the Single Subject Teaching credential in Social Science submitted by California State University, Sacramento.

Special Features

- The program also provides an opportunity for students to build on the foundation of general education and become familiar with several areas in the Social Sciences. A Social Science major is excellent background for advanced graduate studies and in professional careers. Non-credential students need not complete the pre-credential professional education coursework, and elective courses are available to complete the 120-unit Bachelor of Arts degree.
- As an interdisciplinary major, the Social Science program works closely with the Career Center and the California Interns Network to support internship opportunities that will enhance future professional development and employment.
- Through the Social Science major, graduates will also earn a 24 unit minor in History. Formal submission of a Minor Degree Application is required.
- Social Science majors can also earn a minor in other disciplines including Economics, Ethnic Studies, Geography, Political Science and more. Additional specialized advising is required in these cases.

- Graduates of the Social Science program have distinguished leadership careers in government service, public policy, politics, business, K-12, education, higher education administration, law, law enforcement, counseling, community service, and military service. Several Social Science majors (including two former mayors of Sacramento) are inductees into the College of Social Science and Interdisciplinary Studies Academy of Distinction and Honor.
- The Social Science program works closely with the Career Center on campus to provide proactive and comprehensive career services to students through: career development, experiential learning, on-campus recruitment, and employer relations.

Career Possibilities

Middle School or High School Teacher of Civics, Economics, Geography, and History · Politics · Government and Civil Service · Lobbyist · Attorney · Law Enforcement · Business · Public Relations · Human Relations/ Personnel Specialist · Journalist · Military Service · Community Service · Graduate School

SSCI 193. Integrating History and Social Science. 3 Units

Prerequisite(s): Instructor permission.

Term Typically Offered: Spring only

Capstone seminar that serves as a bridge between academic preparation and entry into a professional teacher credential program. Students will examine social science-history in the State curriculum framework, reflect on subject matter preparation, focus on middle and high school social science teaching and learning, investigate and evaluate resources pertinent to instruction, and explore current issues in education.

SSCI 199. Special Problems. 1 - 3 Units

Prerequisite(s): Approval of instructor or Department chair.

Term Typically Offered: Fall, Spring

Individual projects or directed reading. Requires permission of instructor and department chair.

Credit/No Credit

BA in Social Science

Units required for Major: 60

Units required for Subject Matter Program: 69

Total units required for BA: 120

Program Description

The Social Science major is offered by the departments of Anthropology, Economics, Ethnic Studies, Geography, Government, History, and Sociology. It serves both as a major for the Bachelor of Arts degree and to provide subject matter preparation for the Single Subject Teaching Credential in Social Science.

Minimum Grade Requirement

Minimum grade of "C-" is required in all courses completed toward the Social Science major and pre-credential requirements.

- ² Required in Major; also satisfies Graduation Requirement.
- ³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Sociology

College of Social Sciences and Interdisciplinary Studies

Program Description

Sociology is the group-level analysis of social lives of people, groups, and societies. A sociological perspective helps students understand the relationship between individuals and society, appreciate the meaning about the social world, and become aware of ways to achieve desired collective ends.

Sociology faculty have expertise in the following areas: family and marriage, gender study, social psychology, migration and immigration, ethnic and race relations, inequalities, human sexuality, environment, sports, popular culture, political sociology, medical sociology, sociology of education, and crime and deviance.

Sociology graduates are hired by community-based organizations, government agencies, hospital and healthcare organizations, social

services departments, the criminal justice system, school systems, private businesses, and research firms.

Degree Programs

Minor in Sociology (p. 1019)

BA in Sociology (p. 1017)

MA in Sociology (p. 1018)

Special Features

- Sociology students are encouraged to become involved in the internship program. Though it is not mandatory, internships provide an excellent way to explore the real world of sociology outside of the classroom.
- The Sociology Club's mission is to promote the professional, intellectual, and personal growth of our student members. Alpha Kappa Delta (AKD) is an international honor society for Sociology majors.
- Majors learn statistical analysis of social data, computer processing of data and the SPSS computer program. Students are encouraged to learn several computer languages and the use of census data for social and regional planning. Student research projects may be selected for presentation in programs throughout the state.
- Thematic areas of studies include ethnic and race relation, immigration, crime and deviance, social inequality, socialization and interaction, globalization, and social change.

Career Possibilities

Public Health Statistician · Demographer · Recreational Specialist · Social Worker · Urban Planner · Correctional Counselor · Youth Counselor · Criminologist · Social Ecologist · Public Relations Consultant · Interviewer/Researcher · Statistician · Population Analyst · Public Opinion Analyst · Migration Specialist · Parole/Probation Officer · Employment Counselor · Teacher · Writer/Journalist · Management Analyst · Budget Analyst · Government Research Analyst

SOC 1. Principles of Sociology. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the field of sociology; its basic concepts and principles; the analysis and explanation of culture, personality, social institutions, social change, population, social processes and collective behavior.

SOC 3. Social Problems. 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to major social problems in the U.S., with an emphasis on systemic problems, such as economic, racism and sexism. Problems in major social institutions such as the family, social services, criminal justice and the environment are also addressed.

SOC 5. Exploring Issues Facing Contemporary Families. 3 Units
Term Typically Offered: Fall, Spring

An exploration of social issues that contemporary families face every day with an integration of the life course perspective and sociopsychological viewpoint. Issues covered may include varying family constellations, mate selection, intimacy, communication, adjustment, cohesion, attachment, aging, foster care and adoption, gender, race/ethnic/cultural influences, social stratification, family/partner violence, health, and social policy.

SOC 8. Sense and Nonsense in Social Issues and Research. 3 Units
General Education Area/Graduation Requirement: Critical Thinking (A3)
Term Typically Offered: Fall, Spring

Introduces basic steps in the research process and/or basic steps in critically evaluating discussions on social issues. Students are taught to recognize common errors through the analysis of non-technical applied research and/or through newspapers and sociological articles about social issues and problems. Emphasizes the logical steps involved in thinking critically about social research and/or social problems such as quality of operational definitions, weaknesses in research design, sampling errors, value assumptions, logical consistency between premises and conclusions, and the structure of arguments.

- SOC 10. Issues in Crime and Social Control.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Introduces the concepts utilized by sociologists in the analysis of controversial issues in crime and social control, e.g., norms, roles, subcultures, labeling, social conflict, social stratification, racism, sexism, etc. Particular attention is paid to sources of data and trends over time. Issues covered include, but are not limited to: capital punishment, drugs and drug policy, domestic violence, abortion, driving under the influence, police use of deadly force, private prisons and juvenile justice reform.
- SOC 101. Introduction to Statistics for Sociologists.** 4 Units
Prerequisite(s): Sociology majors only
Term Typically Offered: Fall, Spring, Summer
- Provides students with an overall view of the role and techniques of statistics in the presentation and interpretation of social science data. Lectures emphasize descriptive statistics: measures of central tendency and variability, and association and correlation. Introduction is given to statistical inference: sampling distributions, hypothesis-testing, and estimation. Lab sessions provide demonstrations and training in the practical application of concepts and techniques dealt with in lectures. Students learn to use the computer as an aid in data processing and analysis.
- SOC 102. Research Methods in Sociology.** 4 Units
Prerequisite(s): SOC 101; Sociology majors only
Term Typically Offered: Fall, Spring, Summer
- Students will be introduced to the basic steps in research; problem definition, research design, sampling, data collection methods, and analysis. Laboratory exercises reinforce methodological processes, including finding and evaluating existing research studies, operationalizing concepts, developing questionnaires, and analyzing primary data. Students will learn how to process and analyze both qualitative and quantitative data, including analytic induction, manipulation of computerized data files, bivariate and multivariate analysis, table construction, and preparation of written research reports. Lab exercises reinforce computer and statistical skills.
- SOC 103. Advanced Sociological Analysis.** 3 Units
Prerequisite(s): SOC 101 and SOC 102
Term Typically Offered: Fall, Spring
- An advanced course in research design and analysis. Introduces students to advanced data analysis techniques and how to use them to investigate social problems and issues. Students will build on the knowledge they have accumulated in previous courses in sociological research methods and theory to design and complete a research project. Specific methodological strategies taught will vary, and could include regression analysis, ethnography, comparative-historical methods, qualitative interviewing, evaluation research and longitudinal survey analysis.
Note: May be repeated for credit
- SOC 106. Births, Deaths and Borders.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Studies population including growth and decline, fertility and mortality trends, migration, human ecology, and the interrelationship of population and socioeconomic change.
- SOC 110. Urban Life and Problems.** 3 Units
Term Typically Offered: Fall, Spring
- Takes a political economic approach to urban development, with special emphasis on the roles played by various social groups and institutions. Particular attention is given to the effects of urban growth, oppositional movements to growth and the global developments that affect urban conditions.
- SOC 118. Chicano Community.** 3 Units
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring
- Analyzes the institutions, norms, values, and traditions of the Chicano community. Included is an examination of the Chicano community's progress in mainstream American life with attention to the effect of ethnocentrism, racism and class.
- SOC 120. Ethnic and Race Relations.** 3 Units
General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE)
Term Typically Offered: Fall, Spring
- Analyzes relations among various racial, religious, nationality, and gender groups as they interact with racism, ethnocentrism and class in the U.S. and the world.
- SOC 122. Immigration Studies.** 3 Units
Term Typically Offered: Fall, Spring
- Examines the social phenomena of labor migration, immigration, and transnationalism, and places their origins and development in the context of political-economic national inequalities. Advances an understanding of why societies experience migration, immigration, and transnationalism, and evaluates competing and complementary theoretical frameworks explaining these migratory processes, particularly as they relate to the U.S. Special attention will be given to race, gender, and class relations as impacted by labor migration processes.
- SOC 123. Black Studies in Sociology.** 3 Units
Term Typically Offered: Fall, Spring
- Introduces students to the sociological analysis of Black American life in the U.S. – the complex phenomena of Black issues, emerging theories of race, and the cumulative scholarship on black identity, experience, socio-economic status, and social organization.. Focus is on the original contributions of social scientists to Black Studies in Sociology.
- SOC 124. Social Justice in Interdisciplinary Perspective.** 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring
- Examines the nature and forms of social justice and injustice. Key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies are addressed. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ANTH 130, ID 124, ENVS 124, ETHN 124 and FACS 124. Only one may be counted for credit.

- SOC 125. Social Inequalities.** **3 Units**
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring
- Examination of the ways race, class and gender, as well as the intersection of all three, affect the distribution of valued resources in a society. Other social inequalities such as age, sexual orientation, or nationality, etc. may also be examined. Attention is given to struggles to change or preserve economic and political inequalities.
- SOC 126. Sociology of Gender.** **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examines how gender designation of "male" and "female" impacts an individual's life; explores the social construction of masculinity and femininity in the family, school, workplace, everyday interactions, and within racialized and colonized societies; studies the consequences of gender difference and inequality that result in violence and abuse, sexual harassment, hate crimes, wage differentials and unequal opportunities.
- SOC 127. Men, Masculinity and Society.** **3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Introduces students to the field of men and masculinity. Examines the construction of masculinity in sports, family, work and other social relationships, showing how it affects and is affected by people, institutions and society. Explores the diverse experiences based on race, class, occupation, physical ability and sexuality, and the implications for people from such diverse groups.
- SOC 128. Sociology Of Sexuality.** **3 Units**
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring
- Studies sexuality including historical and cultural differences in sexual attitudes, beliefs and behaviors. Also examines the mutual influence of sexuality and social institutions, such as the family, the economy, politics and religion.
- SOC 130. Political Sociology.** **3 Units**
Prerequisite(s): SOC 1 or equivalent.
Term Typically Offered: Fall, Spring
- Analyzes political order and change from the viewpoint of cultural values and the institutional structure of societies. Examines group behavior patterns related to ideology, elites, masses, classes, movements, parties, and other power groups. Surveys differing theories and methodologies for the study of political processes across cultures and societies.
- SOC 133. Sport in a Global Perspective.** **3 Units**
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall, Spring
- Examines sport in a global context, focusing on the dynamic nature of sports in response to changes in society. Addresses the effect sport has on both the society and the individual, from socialization to nationalism. Focuses on both participants (youth, amateurs, professionals) and spectators (parents, fans, etc.) at all levels of involvement, from community to international competition. Highlights cross-cultural differences in the relationships between sport and other social institutions such as government, corporations, and the media.
- SOC 134. Sociology of Film.** **3 Units**
Term Typically Offered: Fall, Spring
- Introduces the "Sociological Imagination" by linking the personal histories found in films to larger social structures. The evolution of important contemporary global and domestic social issues is discussed by analyzing the sociological content of major motion pictures. The socio-historical development of the American film industry is also examined to explore its ideological role in challenging and perpetuating various forms of class, race, and gender discrimination.
- SOC 135. Sociology of Popular Culture.** **3 Units**
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
- Analyzes social processes that produce popular culture by contrasting interrelationships between institutional power structures and collective behavior. Examines theories of popular culture, mass movements, and individualism; social change, cultural hegemony, sub-cultures, and organizational studies.
- SOC 136. Social Movements.** **3 Units**
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring
- Analyzes old and new social movements – pre-political and political, cultural and identity types – class, labor, feminist, ethnic, environmental, left and right. Challenges by movements to institutional order. Surveys differing theories and methodologies for the study of movements and degree of change (reform, revolutionary) across cultures and societies.
- SOC 137. Sociology of Science.** **3 Units**
Term Typically Offered: Fall, Spring
- Examines paradigm changes of science in society and how views of science and technology are socially constructed. Analyzes the representations of scientists, scientific inquiry, and technological innovation. Explores the ways in which science has driven social change, and vice-versa.
- SOC 138. Environmental Sociology.** **3 Units**
Term Typically Offered: Fall, Spring
- Studies human society, the natural environment, and their mutual interactions. Examines environmental sociology at several levels, from the micro level of individual communities to the meso level of government policies to macro theoretical considerations. Analysis of environmental issues in a global context also included.

<p>SOC 139. Animals in Society. 3 Units General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p>	<p>SOC 156. Delinquency. 3 Units General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p>
<p>Examines social relationships between humans and animals as pets, companions, workers, entertainers, and food. Analyzes the representations of animals. Studies our relationships with animals both on the level of social groups and as individuals. Applies sociological approaches to the study of human-animal relationships, including the social movements around animal rights.</p>	<p>Examines social determinants of juvenile delinquency, including family, urban conditions, social-psychological and sociological factors. Analyzes the juvenile justice system, including law enforcement, the courts and community treatment programs.</p>
<p>SOC 140. Sociology of Education. 3 Units Prerequisite(s): SOC 1 or equivalent. Term Typically Offered: Fall, Spring</p>	<p>SOC 157. Issues in Courts and Prisons. 3 Units Term Typically Offered: Fall, Spring</p>
<p>Examines the organization and functions of educational institutions; the rise of mass education and changes in educational systems to the present; the role of teachers, parents, and schools in education; the impact of gender, race, and class on educational outcomes and processes.</p>	<p>Sociologically analyzes American courts and prisons from prosecutorial intake through sentencing and incarceration. Emphasis is on the role of social factors (in particular race, class and gender) in decision-making practices at each stage of processing. Topics will include, but are not limited to: preventive detention, prosecutorial intake, plea-bargaining, jury selection, pre-sentence investigation reports, sentencing, and legal reconstruction of the American prison in the modern era.</p>
<p>SOC 144. Sociology of Health and Illness. 3 Units Prerequisite(s): SOC 1 or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>SOC 158. Sociology of Deviance. 3 Units General Education Area/Graduation Requirement: Understanding Personal Development (E) Term Typically Offered: Fall, Spring</p>
<p>Examines the social contexts of health, illness, and medical care. Emphasizes the debates and contrasting perspectives that characterize the sociological study of health and illness. Topics include the social, global, environmental, and occupational factors influencing health and illness; the politics surrounding physical and mental illness; the patient's perspective on illness; ethical issues in medicine as they relate to medical technology; and health care reform. The influence of health status on identity and interaction will also be addressed.</p>	<p>Introduces students to the history of attempts to define and explain deviant behavior; explains social conditions and processes associated with careers of deviants; examines relationship of deviance to problems of social control.</p>
<p>SOC 146. Sociology of Aging. 3 Units Term Typically Offered: Fall, Spring</p>	<p>SOC 160. Asian Societies. 3 Units General Education Area/Graduation Requirement: Humanities (Area C2) Term Typically Offered: Fall, Spring</p>
<p>Analyzes the process of aging in the context of social structure and processes. Specifically, it deals with such issues as the age structure of society, social values and norms that define the aged, social stratification and aging, social institutions and the aged, theoretical and methodological issues in social gerontology.</p>	<p>Cross-cultural study focuses on Japanese and Chinese societies and cultures and their influences on other Asian developments. Emphasizes their distinctive institutions, norms, values, and traditions in relation to contemporary social, economic, and political processes.</p>
<p>SOC 150. Social Psychology. 3 Units Term Typically Offered: Fall, Spring</p>	<p>SOC 162. Middle Eastern Societies and Culture. 3 Units General Education Area/Graduation Requirement: Humanities (Area C2) Term Typically Offered: Fall, Spring</p>
<p>Examines major principles governing face to face interaction and their application in understanding the student's own experience: creating and preserving meaning, "realities" and selves through dramaturgy, negotiation and power; the relationship between status and intimacy; the impact of status resources (such as race and gender) on the status assignment process; the self concept; the role of emotions in social life.</p>	<p>Discusses the fundamental aspects of Middle East Societies covering such topics as population, family, women, patterns of living, social stratification, education, economic development, politics and armies in the Middle East.</p>
<p>SOC 155. Criminology. 3 Units General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p>	<p>SOC 163. Conflict, Oil and Development in the Middle East. 3 Units General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p>
<p>Examines social dimensions – causes and characteristics – of adult crime and deviant behavior in American society. Makes some international comparisons. Police, courts and prisons are examined. Special attention is given to current issues in crime and deviance.</p>	<p>Examines in detail the major sources of conflict in the Middle East with special reference to the Arab-Israeli conflict, the arms buildup in the Arabian-Persian Gulf, energy crisis and the multi-national aspect of Middle East oil. Attempts to discuss the impact of these conflicts on the processes of social and economic development.</p>
	<p>SOC 164. Sociology of Globalization. 3 Units General Education Area/Graduation Requirement: GE AREA D Term Typically Offered: Fall, Spring</p> <p>Examines globalization and its effect on local societies, including the impact of globalization on local labor and work practices, the social organization of local firms and business enterprises, local social structures such as gender, class, race/ethnicity, and local social patterns such as consumption and leisure activities.</p>

SOC 166. The Family.**3 Units****Term Typically Offered:** Fall, Spring

Introduces students to the sociology of the family including an examination of the family in various cultures with the emphasis on the American family in all its many forms.

SOC 168. Self and Society.**3 Units**

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Examines the relationship between the individual and society: social interaction, human development, behavior in groups and collectivities, personality and social structure. Theories and empirical studies.

SOC 169. Changing American Family.**3 Units****Term Typically Offered:** Spring only

Analyzes the American family, past, present, and future, focusing on explanation and consequences of changes in child-bearing, courtship, marriage, and the interrelationships between the individual and the family and society. Focuses on connecting course material to real world organizations and programs in the community that are associated with or linked to families. Per week: lecture two hours; fieldwork in the community two to three hours.

SOC 170. Sociology of Children and Adolescents.**3 Units****Term Typically Offered:** Fall, Spring

Introduces students to the sociology of childhood and adolescence, focusing on theoretical foundations, methodological challenges, and empirical examination of youth from preschool through high school. Focuses on peer relations within wider contexts shaped by gender, race, and social class.

SOC 171. Sociology of Religion.**3 Units****Term Typically Offered:** Fall, Spring

Acquaints students with the sociological foundations of religion in society. Emphasis is on the history, development and overall structure of the institution of religion, its relation to social, ethnic and class-based groups and its effect on society in general, and how its social development in America differs from other cultures.

SOC 175. Work and Occupations.**3 Units****Term Typically Offered:** Fall, Spring

Examines the social organization of work and economic organization; the rise of industrial society and changes in workplace relations to the present; the role of technology and ideology in the workplace; industrial reforms and alternative forms of economic organization.

SOC 176. Labor and the American Social Structure.**3 Units**

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Introduction to the study of labor in the U.S., including the nature of work, characteristics of the work force, and an overview of contemporary labor and industrial relations systems within the framework of current U.S. economic and political developments.

Cross Listed: LBRS 100; only one may be counted for credit.

SOC 185. Bullying as a Social Experience.**3 Units****Term Typically Offered:** Fall, Spring

This course educates students on bullying as a social experience, introducing how social forces, environment and context impact the culture of bullying. Students will develop an understanding about how programs and policies impact bullying rates based on social theoretical perspective. Students will gain a better understanding of how research is related to intervention and prevention practices. Then, from a whole school approach, using the resources available to the school, students will implement different components of an anti-bullying program at a school site.

SOC 190. Sociology of Small Groups.**3 Units**

Prerequisite(s): SOC 1 or equivalent.

Term Typically Offered: Fall, Spring

Examines social structure and social determinants of behavior in small groups; socialization, social control, social change, leadership, social ranking, social conflict and morale.

SOC 192. Sociological Theory.**3 Units**

Prerequisite(s): SOC 1.

Term Typically Offered: Fall, Spring

Surveys the history of sociological theory from Comte to the present.

SOC 193A. Mentoring in Sociology.**1 Unit**

Prerequisite(s): Instructor permission.

Term Typically Offered: Fall, Spring

Provides opportunity for freshman, sophomores, and juniors majoring in sociology to be mentored for improved student success and retention. Students receive peer mentoring to facilitate closer integration into campus community through participation in events, organizations, and conferences sponsored by the sociology department. Students learn how to build productive relationships with professors and receive timely advising for better retention and success rates. Course does not count toward sociology major but toward degree requirements.

Note: May be repeated twice for credit; Three times with exception as determined by the instructor.

Credit/No Credit

- SOC 193B. Peer Mentoring in Sociology.** 2 Units
Prerequisite(s): One year of residency at Sac State; 2.8 GPA required; Open only to Sociology majors.
Term Typically Offered: Fall, Spring
- Provides opportunities for junior and senior sociology majors to mentor and gain practical out-of-class experience. Students learn the principles of mentoring and contribute to student retention and success and close the retention gap. Course provides practical orientation and guidance for the best practices in mentoring that contribute to a positive campus culture.
Note: May be repeated twice for credit; Three times with exception to be determined by the instructor.
- Credit/No Credit
- SOC 194. Special Topics in Sociology.** 3 Units
Prerequisite(s): SOC 1 or instructor permission.
Term Typically Offered: Fall, Spring
- Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology, including theory and methodology.
- SOC 195. Internship and Fieldwork.** 1 - 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, and (2) ethnic and/or minority communities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State. Limitations: sociology majors electing a concentration may count a maximum of 3 units in 195 and/or 199 toward the major. Those taking the general sociology pattern may count up to 6 units of 195 and/or 199 toward the major. Sociology minors may take up to 3 units. (See SOC 199 below.)
- Credit/No Credit
- SOC 198. Linking Statistics Education and Practice.** 1 - 2 Units
Prerequisite(s): SOC 101 and instructor permission
Term Typically Offered: Fall, Spring
- Advanced exploration of the scholarship of learning as applied to sociological methods and/or data analysis. Students will work independently on an applied semester project, but will also attend agreed upon number of computer lab hours each week and engage in course activities with a focus on how to best structure learning opportunities and apply content.
Note: Admission requires approval of professor and Department Chair. No more than 3 units from SOC 195, SOC 198, or SOC 199 combined may be applied to the Sociology upper division major requirement.
- SOC 199. Individual Study Projects.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading; open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair. Limitations: sociology majors electing a concentration may count a maximum of 3 units in 195 and/or 199 toward the major. Those taking the general sociology pattern may count up to 6 units of 195 and/or 199 toward the major. Sociology minors may take up to 3 units. (See SOC 195 above.)
- Credit/No Credit
- SOC 200A. Orientation to Graduate Studies in Sociology.** 1 Unit
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
- Describes our graduate program, clearly explains our requirements and standards for successful completion of the M.A., shows students how the profession works and how to work in the profession (public submissions, conference presentations, job searches), and explains how to get through the program in a timely manner with a strong thesis. We will discuss Ph.D. programs and the application process, job opportunities and the role of professional sociologists outside academe.
- SOC 200B. Thesis Prospectus/Project Preparation Seminar.** 2 Units
Prerequisite(s): Completion of a minimum of 6 hours of graduate study. Completion of (or concurrent enrollment in) SOC 214 is recommended.
Term Typically Offered: Fall, Spring
- Provides students with faculty and peer support for the process of developing a draft of a thesis prospectus or project proposal. This includes the clarification of expectations, familiarization with research resources, and support provided through feedback in a structured environment.
- Credit/No Credit
- SOC 210. Urban Sociology.** 3 Units
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
- Critically examines major theories, research, and debates in the field of urban sociology, including social ecology, Marxist, subcultural, and postmodernist perspectives. Course materials will be framed within two main themes; the dynamics of cooperation and conflict under urban conditions, and the tension between private interests and public life in urban settings. Methodological emphasis will be on case studies, ethnographic, and social historical analysis.
- SOC 214. Research Methods.** 3 Units
Term Typically Offered: Fall, Spring
- Deals specifically with such issues as the role of research within the discipline, the ethics of conducting research, the rationale behind field and survey methods, the validity and reliability of data collected through these methods and alternative approaches to data collection.
Note: Open to classified graduate students in sociology, all others by instructor permission only; Graduate Writing Intensive
- SOC 215. Data Analysis.** 3 Units
Prerequisite(s): SOC 101 or equivalent, or instructor permission.
Term Typically Offered: Fall, Spring
- Introduces techniques used to analyze sociological data. Emphasis will be placed on the basic concepts of quantitative models used to explore causality, along with an introduction to software to carry out multivariate analysis. Qualitative analytical techniques and software will also be introduced.

- SOC 220. Seminar: Social Change.** **3 Units**
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring
- Course deals with main theoretical orientations in sociology representing radical, liberal and conservative viewpoints on social change. Examines the historical context of events that affected Western countries such as the Industrial Revolution, French Revolution, and the emergence of nationalism and human rights. Course approach is theoretical, historical and global.
- SOC 225. Social Stratification.** **3 Units**
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring
- Analyzes contemporary issues in stratification literature including class, status, power, sex/gender, identity, ethnicity, mobility, equality/inequality. Discusses differing theories, methodologies, and controversies according to student interests.
- SOC 226. Sociology of Gender.** **3 Units**
Term Typically Offered: Fall, Spring
- Intended to introduce graduate students to diverse theories that explain gender relations in contemporary society. Provides a critical perspective on how we construct men's and women's identities and how the consequences of such a construction affect institutions, culture and society. Broken up in four sections: origins of gender inequality and issues surrounding research, theoretical perspectives, marginalized groups, and gendered issues in society.
- SOC 230. Seminar: Social Organization.** **3 Units**
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Analyzes and critiques institutional structure. Studies shared understanding in groups, corporations, communities, institutions or societies and their hierarchical order.
- SOC 235. Social Psychology.** **3 Units**
Prerequisite(s): Open to classified graduate students in sociology, all others by instructor permission only.
Term Typically Offered: Fall, Spring
- Examines advanced social psychology. Focuses on symbolic interactionism, ethnomethodology and other recent developments in sociological social psychology, phenomenology, humanistic social psychology and critical reflexive sociology.
- SOC 238. Environmental Sociology.** **3 Units**
Term Typically Offered: Fall, Spring
- Examines the complex relationship between human society and its surrounding environment. Theoretical perspectives are complemented by empirical research on environmental issues. Special attention is given to issues relating to the local and regional California environment. Analyzes environmental issues in a global context.
- SOC 240. Seminar: Sociological Theory.** **3 Units**
Prerequisite(s): Classified graduate status in sociology; all others by instructor permission only.
Term Typically Offered: Fall, Spring
- Analyzes and critiques terms and issues in social and sociological theory including levels of social reality and differing perspectives - positivism, idealism, realism, post-modernism, feminism, etc.
- SOC 255. Social Research in Crime and Deviance.** **3 Units**
Term Typically Offered: Fall, Spring
- Comprehensively reviews and evaluates major sociological theories of crime and deviance, methods of studying crime and deviance, current empirical research in crime and deviance, empirical testing of sociological explanations of crime and deviance, and empirical evaluation of crime and deviance control policy.
- SOC 260. Contemporary Issues of the Middle East and North Africa.** **3 Units**
Term Typically Offered: Fall, Spring
- Discusses in-depth several contemporary issues such as the political dimension of Islam, population growth and food security, oil and development, regional conflict, national integration and forces of modernization, etc. The selection of the topics will depend on current events.
- SOC 265. Race and Ethnic Relations.** **3 Units**
Term Typically Offered: Fall, Spring
- Examines the social constructs of race and ethnicity as "central organizing principles" in the making and development of our modern world, particularly in the U.S., and how they have interacted with class and gender to create and maintain cultural and material social inequalities. Evaluates competing and complementary theoretical frameworks explaining how race and ethnicity affect individual and group social-structural location (e.g., class position, educational attainment, and political power).
- SOC 266. Sociology of The Family.** **3 Units**
Prerequisite(s): Classified graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Sociologically examines the family, with an emphasis on the contemporary American family. The numerous stages and variations of the family life cycle will be considered, with an emphasis on changes and the causes and consequences of the changes.
- SOC 294. Special Topics in Sociology.** **3 Units**
Prerequisite(s): Open to classified graduate students in sociology; all other sociology graduate students by instructor permission
Term Typically Offered: Fall, Spring
- Examines contemporary issues and social developments within the research specialization of department faculty. Provides a forum to discuss and evaluate controversies and advancements in the discipline of sociology including theory and methodologies.
Note: May be repeated twice for credit

SOC 295. Internship and Fieldwork.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Supervised internship and fieldwork experience in a variety of settings: (1) public or private agencies in the Sacramento community, (2) ethnic and/or minority communities, and (3) educational institutions including area community colleges and universities. Supervision is provided by authorized persons in the field and collaborative supervision is provided by sociology faculty at Sacramento State.
Credit/No Credit

SOC 299. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work. Admission requires approval of the sponsor of the project and the Department Chair.

Credit/No Credit

SOC 500. Culminating Experience.**3 - 6 Units****Prerequisite(s):** Advancement to candidacy, successful thesis prospectus hearing, and a minimum 3.0 GPA.**Term Typically Offered:** Fall, Spring

Completion of a thesis or a project. Thesis: the 6 unit master's thesis requirement must be completed under the direction of the student's thesis committee. Project: the 6 unit project requirement must be completed under the direction of the student's project committee.

BA in Sociology

Units required for Major: 43

Total units required for BA: 120

Program Description

The sociology major and minor have few specific requirements, allowing the student flexibility in selecting courses in the various subject areas covered in the program. The areas covered are:

1. social theory and methods of inquiry;
2. social institutions, such as the family, education, politics, work, and religion;
3. thematic areas of crime and deviance, diversity and inequality, socialization and interaction, globalization, and social change.

Pre-Major Requirements

Code	Title	Units
Required Lower Division Courses (6 Units)		
SOC 1	Principles of Sociology ¹	3
Select one of the following:		3
SOC 3	Social Problems ¹	
SOC 5	Exploring Issues Facing Contemporary Families	
SOC 8	Sense and Nonsense in Social Issues and Research ¹	
SOC 10	Issues in Crime and Social Control ¹	
Total Units		6

¹ Course also satisfies General Education (GE)/Graduation Requirement.

Program Requirements

Pre-Major Requirements must be completed.

Required Upper Division Courses: 6 units in progress from Group 2 or Group 3 will count toward the Major Requirements.

Code	Title	Units
1. Required Upper Division Courses: (17 Units)		
SOC 101	Introduction to Statistics for Sociologists	4
SOC 102	Research Methods in Sociology	4
SOC 125	Social Inequalities	3
SOC 150	Social Psychology	3
SOC 192	Sociological Theory	3
2. Select one of the following Advanced Study:		
SOC 122	Immigration Studies	3
SOC 130	Political Sociology	
SOC 133	Sport in a Global Perspective 	
SOC/ENVS 138	Environmental Sociology	
SOC 140	Sociology of Education	
SOC 166	The Family	
SOC 171	Sociology of Religion	
3. Additional Upper Division Requirements: (17 Units)		
Select 17 units of the following upper division Sociology courses:		17
<i>Crime and Deviance</i>		
SOC 155	Criminology	
SOC 156	Delinquency	
SOC 157	Issues in Courts and Prisons	
SOC 158	Sociology of Deviance	
<i>Diversity and Inequality</i>		
SOC 118	Chicano Community 	
SOC 120	Ethnic and Race Relations 	
SOC 123	Black Studies in Sociology	
SOC/ID 124	Social Justice in Interdisciplinary Perspective	
SOC 126	Sociology of Gender ¹	
SOC 127	Men, Masculinity and Society	
SOC 160	Asian Societies	
SOC 162	Middle Eastern Societies and Culture	
<i>Socialization and Interaction</i>		
SOC 128	Sociology Of Sexuality	
SOC 134	Sociology of Film	
SOC 135	Sociology of Popular Culture	
SOC 146	Sociology of Aging	
SOC 168	Self and Society 	
SOC 170	Sociology of Children and Adolescents	
SOC 190	Sociology of Small Groups	
<i>Globalization and Social Change</i>		
SOC 106	Births, Deaths and Borders	
SOC 110	Urban Life and Problems	
SOC 136	Social Movements	

SOC 144	Sociology of Health and Illness
SOC 163	Conflict, Oil and Development in the Middle East
SOC 164	Sociology of Globalization
SOC 169	Changing American Family
SOC 175	Work and Occupations
SOC 176/ LBRS 100	Labor and the American Social Structure 
<i>General</i>	
SOC 194	Special Topics in Sociology
SOC 195	Internship and Fieldwork
A 196 Series Course	
SOC 199	Individual Study Projects

Total Units 37

Note: SOC 195 or SOC 199 can be taken for 1-3 units of credit. A maximum of 3 units in SOC 195 or SOC 199 may be counted toward the major. Students may take up to 3 units of upper division courses outside the department in consultation with their undergraduate advisor.

¹ Course also satisfies General Education (GE)/Graduation Requirement.

General Education Requirements ¹

Code	Title	Units
Area A: Basic Subjects (9 Units)		
A1 - Oral Communication		3
A2 - Written Communication		3
A3 - Critical Thinking ²		3
Area B: Physical Universe and Its Life Forms (10 Units)		
B1 - Physical Science		3
B2 - Life Forms		3
B3 - Lab (Note: Lab experience to be taken with one of the following: B1, B2 or B5)		1
B4 - Math Concepts ²		0
B5 - Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper division requirements.		3
Area C: Arts and Humanities (12 Units)		
C1 - Arts		3
C2 - Humanities		3
C1/C2 - Area C Course		3
C1/C2 - Area C Course - Take upper-division course to complete Area & upper division requirements.		3
Area D: The Individual and Society (9 Units)		
Area D Course		3
Area D Course		3
Area D Course ³		0
Area D Course - Take upper-division course to complete Area & upper division requirements.		3
Area E: Understanding Personal Development (3 Units)		
Area E Course		3
Total Units		43

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Department recommends SOC 8 in the Pre-Major Requirements to meet Area A3.

³ Required in Major; also satisfies GE.

Graduation Requirements ¹

Code	Title	Units
Graduation Requirements (required by CSU) (9 Units)		
American Institutions: U.S. History		3
American Institutions: U.S. Constitution & CA Government		3
Writing Intensive (WI) ²		3
Graduation Requirements (required by Sacramento State) (12 Units)		
English Composition II		3
Race and Ethnicity in American Society (RE)		3
Foreign Language Proficiency Requirement ³		6

¹ To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). For further information, please visit the General Education page (p. 1027).

Note: There is no way to list all possible overlaps so please consult with a professional advisor. The Academic Advising Center can be visited online (<http://www.csus.edu/acad>), by phone (916) 278-1000, or email (advising@csus.edu).

² Department recommends SOC Elective that meets the WI Graduation Requirement; see Program Requirements table above.

Note: SOC courses that meet the WI Graduation Requirement are displayed with a pencil icon.

³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

MA in Sociology

Total units required for MA: 30

Program Description

The Master of Arts Program in Sociology is designed to provide a broad academic foundation for a variety of professional opportunities and community needs such as survey research, evaluation research, social problems analysis, career interest in community organizations, and teaching.

The program offers small seminars and allows for close student-faculty contact. The program encourages students to seek internships and fieldwork, and participate in observation experience among the many government, voluntary, and private agencies in the Sacramento area. Students concentrate on theory and research methods as well as areas

of specialization. Following coursework, students write a thesis based on original research.

Some graduates of the program enter Ph.D. programs at a variety of universities throughout the United States and others are employed in many state, local, and city government agencies and private businesses doing evaluation research, systems analysis, social problems analysis, and social impact assessment.

Admission Requirements

Admission as a classified graduate student in Sociology requires:

- a baccalaureate degree;
- a minimum 3.0 GPA in the last 60 units attempted;
- satisfactory completion of a minimum of 18 units of undergraduate work in Sociology, including one course each in theory, statistics, and methodology, with a minimum 3.0 GPA;
- two letters of recommendation from faculty members in Sociology who know the applicant well enough to assess his/her potential for graduate study.

Students who have deficiencies in admission requirements that can be removed by specified additional preparation may be admitted with conditionally classified graduate status. Any such deficiencies will be noted on a written response to the admission application.

Admission Procedures

Applications are accepted as long as room for new students exists. All prospective graduate students, including Sacramento State graduates, must file the following with the Office of Graduate Studies, River Front Center 215, (916) 278-6470:

- an online application for admission;
- two sets of official transcripts from all colleges and universities attended, *other than Sacramento State*; and
- two letters of recommendation from Sociology faculty members to the Graduate Coordinator in the Sociology Department.

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

Minimum Units and Grade Requirement for the Degree

Units required for the MA: 30

Minimum Cumulative GPA: 3.0

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy, indicating a proposed program of graduate study. This procedure should begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 15 units in the graduate program with a minimum 3.0 GPA;
- completed a draft of the thesis prospectus; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Advancement to candidacy forms are available in the Department Office. The student fills out the form after planning a degree program in

consultation with a Sociology Graduate Advisor. The completed form should be returned to the Office of Graduate Studies for approval.

Note: A foreign language is not required for the degree. However, students who plan further graduate study are encouraged to study French, German, or Spanish since proficiency in one of these is sometimes required in doctoral programs.

Urban Land Development

College of Social Sciences and Interdisciplinary Studies

Program Description

The purpose of this program is to bring together the private (decision making) and public (policy) aspects of real estate development and to help students develop skills related to land development in metropolitan areas. The program is interdisciplinary and covers all major aspects of the development process including design, feasibility analysis, land use regulation, market and location analysis, and negotiation. Thus, graduates from the program would bridge the gap between

1. professional training in fields such as city planning and public policy and
2. business administration.

Graduates from the new program should be able to understand the constraints and incentives faced by both the private and public sectors when making land use recommendations and decisions.

MS in Urban Land Development

Total units required for MS: 33

Program Description

The purpose of this program is to bring together the private (decision making) and public (policy) aspects of real estate development and to help students develop skills related to land development in metropolitan areas. The program is interdisciplinary and covers all major aspects of the development process including design, feasibility analysis, land use regulation, market and location analysis, and negotiation. Thus, graduates from the program would bridge the gap between

1. professional training in fields such as city planning and public policy and
2. business administration.

Admission Requirements

The following are required for admission to the Master's Program in Urban Land Development (including admission as a conditional ULD Master's student):

- A BA or BS degree;
- A *minimum* GPA of 3.0 or above in all undergraduate courses;
- Completion of the foundation courses or their equivalents with a *minimum* GPA of 3.0 and no grade lower than a "B-"; and
- A *minimum* score of 550 (213 if computer based) on the Test of English as a Foreign Language (TOEFL) for students whose preparatory education was in a language other than English, taken within three years of the date of application.

Additionally, the following information will be considered in evaluating applications:

- The candidate's overall GPA, GPA in the last 60 units of the bachelor's program, and GPA in foundation courses;
- The candidate's performance on the Graduate Management Admission Test (GMAT) or the Graduate Record Examination (GRE) taken within three years of the date of application;
- The candidate's written statement of purpose; and
- The candidate's letters of recommendation.

Admission Procedures

The Department of Public Policy and Administration in the College of Social Sciences and Interdisciplinary Studies will be responsible for processing applications at the departmental level. The Graduate Office will process applications twice a year: once in the fall semester and once in the spring semester. Candidates for the MS in Urban Land Development will be required to submit the following information to the PPA Graduate Office:

- Any specific application form that may be developed for the program;
- GMAT or GRE scores;
- TOEFL scores (if applicable);
- A written statement of purpose addressing the applicant's purpose in pursuing a Master's in Urban Land Development; and
- Three letters of recommendation from individuals with knowledge of the applicant's academic and professional potential.

Additionally, the candidate shall submit the following information to the University's Office of Graduate Studies:

- The application for graduate school admission (in accordance with any applicable University filing deadlines);
- Two sets of official transcripts from all colleges and universities attended; and
- TOEFL scores (if applicable).

For more admissions information and application deadlines please visit <http://www.csus.edu/gradstudies/>.

Applicants who are approved for admission will receive a letter from the Associate Dean, Office of Graduate Studies. The Graduate Admission

Recommendation (GAR) form will include any relevant information about proficiencies to be addressed and foundation courses that are required.

Students are expected to have demonstrated basic proficiency in statistics and computer usage before enrolling in the foundation courses. Such proficiencies include the following

- Statistics: equivalent to an introductory course in probability and statistics; and
- Computer usage: literacy as demonstrated by coursework or competency examination.

The program director has the discretion to determine if and how such proficiencies may be demonstrated.

Moving from Foundation to Required Courses

Students who have met the above prerequisites can be admitted as conditional ULD Master's students and enroll in the foundation courses. To advance from the foundation to the required courses students must

1. earn a B- or better in all foundation courses and
2. maintain an overall grade point average of 3.0 or better in such courses.

Students in the last semester of the foundation courses must file an Application for Classification with the Graduate Programs Office in the College of Social Sciences. The student's academic status will be reviewed to assure that he or she meets the necessary criteria to be accepted as a classified graduate student. At the discretion of the ULD program director, a student may enroll in required or elective courses while concurrently completing the last of the foundation courses.

Minimum Units and Grade Requirement for the Degree

Units for the MS: 33

Minimum Cumulative GPA 3.0

Advancement to Candidacy

Before enrolling in a 500 level course a student must advance to candidacy. Initiation of advancement is the responsibility of the student. The application for Advancement to Candidacy must be filed no more than four weeks before the opening of the final semester of the program. To be eligible to advance a student must be making satisfactory progress and have completed at least 12 units in the program beyond the foundation courses. Satisfactory progress is defined in part as earning an overall GPA of 3.0, with no grade in a foundation or required course below a "B-". Students with a GPA deficiency cannot advance to candidacy. Students must also satisfy the Writing Placement for Graduate Students (WPG) or take a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Total Units		33

¹ Other courses approved by the program coordinator may be used to meet the elective course requirements. However, a maximum of six (6) units of upper division undergraduate coursework may be used to meet the elective course requirements.

Women's Studies

College of Social Sciences and Interdisciplinary Studies

Program Description

The field of Women's Studies is dedicated to studying women's lives and facilitating political activism and community participation. What makes

Women's Studies such a dynamic field is the conviction that theoretical knowledge is best illuminated when connected to political projects and personal experiences.

Our Women's Studies curriculum is multi-disciplinary and focuses on women, gender, and sexuality in relation to other social and economic forces such as racism, ethnocentrism, capitalism, and militarism. Students have opportunities to examine women's diverse experiences—locally, nationally, and globally—within feminist and social justice frameworks.

The course of study situates gender in specific historical and cultural contexts, and examines how our lives are shaped by social and economic institutions, political movements, and individual experiences. We also place a strong focus on community involvement and activism, and we offer many opportunities for internships and service work credit.

Women's Studies affirms the Preamble and Purpose of the National Women's Studies Association which states:

"Women's Studies owes its existence to the movement for the liberation of women; the women's liberation movement exists because women are oppressed... Feminist aims include the elimination of oppression and discrimination on the basis of sex, race, class, religion, disability, and sexual orientation."

MONI, SUJATHA

WOMS 50. Introduction to Gender & Sexuality. **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to basic concepts and issues informing studies in gender, gay, lesbian, bisexual and transsexual/gender (GLBT) identities. Classic and contemporary texts from different cultures will cover biological, historical and social constructions of gender and sexuality. Transformations in family and society, global and intersectional perspectives on GLBT identity, political activism, cultural and social perceptions of gender and sexuality will be discussed.

WOMS 75. Introduction to Disability Studies. **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

This course is an introduction to disability studies. An intersectional approach to knowledge construction about disability will be examined. This interdisciplinary study draws on humanities and social sciences, feminism, medical and scientific literature, and popular sources. How gender, race, class, sexuality, ethnicity, and nationality intersect with disability to shape experience will be analyzed. Historical and contemporary social movements and activism by people with disabilities will also be discussed.

WOMS 110. Introduction to the Women's Movement in Contemporary Society. **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Examination of women's issues in the current women's movement. Emphasis is on detailed examination of feminist topics important to women today.

WOMS 115. Introduction to Women's Studies. **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring

Introduction to the origins and models of Women's Studies. Explores the significance of a new field of study, and examines the methods of interdisciplinary study. Provides an opportunity to read a number of Women's Studies "classics" and to trace the development of feminist theory.

WOMS 118. Asian American Women. **3 Units**
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Using an interdisciplinary approach, course offers a broad introduction to broad principle values and traditions shaping Asian American women's lives in the U.S. Examines cultural diversity, gender inequality and conflicts between traditions and social practices through critical analysis of literature, film and cultural theories as expressions of identity. Topics covered include: cultural heritage and philosophies, intergenerational conflict, transnationalism, gender roles and socio-economic practices. Comprehensive understanding principle factors governing Asian American women's lives at the nexus of Asian and American cultures. Cross-listed: ETHN 118.

WOMS 120. Mother Woman Person. **3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only

This course applies principles of feminism to the study of motherhood as social institution and private experience. Students explore family, cultural and social values that influenced their mothers and grandmothers, analyzing the impact of social institutions on their own childhood and adulthood. Students develop awareness of the historic evolution of women's social and private roles and the changing emphasis on woman as mother, wife/sexual companion and wage earning person largely through African American women's social movements.

WOMS 121. Women Of The Middle East. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Provides an introduction to historical and contemporary conditions affecting women's lives and contributions to Middle Eastern societies. Readings will be framed with a focus on women within state systems and political life, economic activity, family systems, religious thought and law, health, arts and literature.

WOMS 125. Sex & Gender in South Asia. 3 Units

This course focuses on sex & gender roles in South Asia starting with ancient times to the present. Patriarchal ideals pertaining to social values, traditions and family structures will be examined. Religious, caste and economic class factors contributing to the preservation of gender norms and socially approved sexual behavior, sex roles, stereotypes, and violence against women, transgender youth and sexual minorities will be analyzed. Contemporary social movements and activism by women's groups and LGBTIQ activists will also be discussed.

WOMS 133. Gender & Health. 3 Units**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5**Term Typically Offered:** Fall only

This course explores feminist analyses of medicine. An intersectional approach to how medical science constructs knowledge about health will be examined. This interdisciplinary study draws on humanities and social sciences; feminism; medical, scientific, and clinical literature; popular sources; and web discourses. How gender, race, class, sexuality, ethnicity, nationality, and disability intersect and shape behavior and experience will be analyzed. Contemporary social movements and activism by women and LGBTQIA+ people will also be discussed.

WOMS 136. Gender, Race, and Class. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: GE AREA D, Race & Ethnicity Graduation Requirement (RE), Writing Intensive Graduation Requirement (WI)**Term Typically Offered:** Fall, Spring

Designed to examine the effects of the dynamic interaction of gender, race, and class on women. The social construction of gender, race, and class will also be examined. Other topics to be discussed and researched are the effects of sexism, racism, and classicism on institutions such as academia, business, government, religion, and social movements. Also provides an analysis of effective techniques to end sexism, racism, and classicism.

WOMS 137. Women Of Color. 3 Units**General Education Area/Graduation Requirement:** GE AREA D, Race & Ethnicity Graduation Requirement (RE)**Term Typically Offered:** Fall, Spring

Examines the social, economic, and cultural uniqueness of various ethnic groups in the U.S. Includes discussion of definitions of sexism, racism, economic exploitation, feminism, and the nature and evolution of the women's movement in relation to women of color.

WOMS 138. Women and Work. 3 Units

Prerequisite(s): GVAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D**Term Typically Offered:** Fall, Spring

Explores topics basic to discussion of women's paid and unpaid work from historical and crosscultural perspectives. Consideration is given to popular conceptions and stereotypes of work and "women's issues" in the industrialized world; the private and public lives of women and men with emphasis on work and social realities; and the maintenance of patriarchy under capitalism, socialism and communism, with some possible feminist "solutions."

WOMS 139. Violence Against Women. 3 Units**General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Spring only

Consider from an international feminist perspective the forms of violence directed at women. It will also look at contemporary attitudes towards women, children, power, aggression and sexuality. Topics include sexual assault; child abuse; medical violence; psychiatric violence; economic violence; and military violence. Also examines the ways in which women are individually and collectively combating these various forms of violence.

WOMS 144. Women and Theatre: Staging Diversity. 3 Units**General Education Area/Graduation Requirement:** Arts (Area C1), Race & Ethnicity Graduation Requirement (RE)**Term Typically Offered:** Fall, Spring

Includes study of recent feminist performance theory and criticism and its application to acting, directing, and writing for the theatre. Students will participate in both lecture/discussion and activities, including the creation of a final performance. Lecture two hours; lab two hours. Cross Listed: THEA 144; only one may be counted for credit.

WOMS 145. Feminism and the Spirit. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall only

Provides a critique of traditional patriarchal religions and traces women's participation in the evolution of the human spirit. Consideration is given to the history of Goddess religion and its resurgence in the contemporary world; sexism in institutionalized religions and the current advances women are making in the churches; and dimensions of woman spirit incorporated in today's feminist art and literature.

WOMS 146. Women In Art. 3 Units**General Education Area/Graduation Requirement:** Arts (Area C1)**Term Typically Offered:** Fall, Spring

Study of the unique and important contributions of women to the visual arts (Renaissance to present) and their personal struggle toward success and recognition. The Women's Art Movement and its impact on education, museums and women's status in the arts are important topics of this class.

WOMS 147. Women's Global Issues.**3 Units****Prerequisite(s):** Minimum 45 units completed**Term Typically Offered:** Fall, Spring

Provides a historical overview, as well as in-depth studies of the similarities and differences in feminist developments from an international perspective. Examples will be drawn from industrialized democracies, centrally planned socialist states, and third world countries. Pluralistic trends in feminist development within countries will also be examined with a view to understanding the differential impact of gender based discrimination on different categories of women.

WOMS 150. Introduction to Queer and Trans Studies.**3 Units****Prerequisite(s):** WOMS 50 or instructor permission.**Term Typically Offered:** Fall, Spring

Introduces students to the fields of queer theory and trans theory from a transnational feminist perspective. Includes theoretical approaches to the history of sexuality and the politics of sexual and gender normativity. Places queer and trans studies in conversation with Native studies, dis/ability studies, postcolonial theory, critical race and ethnic studies, and feminist theory.

WOMS 166. Gender and Politics.**3 Units****Term Typically Offered:** Spring only

This course examines the influence of socially constructed meanings of femininity and masculinity on the political participation of women, candidate selection, election campaigns, and electoral outcomes in executive and legislative offices in the U.S. and worldwide. Students will develop a rich understanding of the relationship between gender and women's political representation and analyze and discuss institutional, structural, cultural, and historical conditions associated with women's voting behavior, political advancement, leadership styles, and impacts of political representation on women.

Cross Listed: GOVT 166; only one may be counted for credit.

WOMS 172. LGBTQ Histories.**3 Units****Term Typically Offered:** Spring only

This course provides an introduction to the study of lesbian, gay, bisexual, transgender, and queer (LGBTQ) histories. Uses an interdisciplinary and comparative approach to explore the historical emergence and development of LGBTQ identities, communities, and political movements. Includes theoretical analysis of the history of gender and sexuality and the practice of historical analysis.

Cross Listed: HIST 172; only one may be taken for credit.

WOMS 180. Seminar in Feminist Theory.**3 Units****Prerequisite(s):** WOMS 110 or instructor permission.**Term Typically Offered:** Fall, Spring

Advanced course providing detailed inquiry into specific feminist theories, including their conceptual framework and development, relationship to other political theories and application to the current practices of feminism.

WOMS 195A. Fieldwork in Women's Studies.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Supervised experience in selected women's organizations and projects in the Sacramento area; for example, the Rape Crisis Center, Women Escaping a Violent Environment (WEAVE), Sacramento Women's Center. Credit/No Credit

WOMS 199. Special Problems.**1 - 3 Units****Prerequisite(s):** WOMS 115 and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised individual research projects or directed reading specifically related to Women's Studies topics. Should be taken by students who can work on an individual basis.

Credit/No Credit

WOMS 299. Special Research Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Supervised research projects and directed study specifically related to Women's Studies and taken on an individual basis by Graduate students in the Special Major Graduate Program.

Credit/No Credit

BS in Women's Studies

Units required for Major: 36

Total units required for BS: 120

Program Description

The field of Women's Studies is dedicated to studying women's lives and facilitating political activism and community participation. What makes Women's Studies such a dynamic field is the conviction that theoretical knowledge is best illuminated when connected to political projects and personal experiences.

Our Women's Studies curriculum is multi-disciplinary and focuses on women, gender, and sexuality in relation to other social and economic forces such as racism, ethnocentrism, capitalism, and militarism. Students have opportunities to examine women's diverse experiences—locally, nationally, and globally—within feminist and social justice frameworks.

Minimum total units required for the BS: 120; 40 units should be upper division.

Minimum Grade Requirement

A minimum grade of C- is required of courses applied to the major.

Program Requirements

Code	Title	Units
Required Lower Division Core Courses (3 Units)		
WOMS 50	Introduction to Gender & Sexuality ¹	3
Required Upper Division Courses (9 Units)		
WOMS 110	Introduction to the Women's Movement in Contemporary Society	3
WOMS 115	Introduction to Women's Studies ¹	3
WOMS 180	Seminar in Feminist Theory	3
Required Upper Division Elective Courses (24 Units) ²		
Select at least one course from each of the following categories: 24		
<i>Identities and Intersectionality</i>		
ANTH 183	Women Cross-Culturally

Note: WOMS courses that meet the WI Graduation Requirement are displayed with a pencil icon.
- ³ If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/>

Minor in LGBTQ Studies

Units required for Minor: 18

Program Description

The LGBTQ Studies minor provides students with competency in interdisciplinary scholarship related to the study of lesbian, gay, bisexual, transgender, and queer lives and communities as well as to the study of gender and sexual structures. The minor familiarizes students with the theoretical and methodological tools used to study gender and sexuality from a variety of disciplinary perspectives. Students will gain an understanding of how non-normative sexualities and genders have been organized in previous historical moments and in different cultural and national contexts in the present. The minor equips students with awareness of sexual and gender diversity and how sexuality intersects with and informs other categories of identity and practice, such as race, class, ethnicity, age, and disability.

A minor in LGBTQ Studies prepares students for their pursuit of graduate and professional degrees. Given the increasing demand for nuance around issues of diversity in both the public and private sectors of the job market, this minor also positions Sacramento State graduates well for careers in education, social work, counseling, health care, social services, media, law and policy, and nonprofit advocacy.

Program Requirements¹

Code	Title	Units
Required Core Courses (6 Units)		
WOMS 50	Introduction to Gender & Sexuality	3
WOMS 150	Introduction to Queer and Trans Studies	3
Elective Courses (12 Units)		
Select four from the following:		12
ENGL 170M	Literatures Of Sexuality	
ENGL 190Q	Gay and Lesbian Literature	
HIST 131	History of Sexuality in Comparative Perspective

Office of Academic Affairs

Academic Affairs is the largest administrative unit in the University, encompassing the seven Academic Colleges, the University Library, and the College of Continuing Education.

Our Program Centers include: the Office of Graduate Studies, Research Administration, the Community Engagement Center, the Center for Teaching and Learning, Academic Technology & Creative Services, International Programs & Global Engagement, and the Center for College Readiness. Most important, we ensure quality academic programs for all students and support well qualified faculty to provide excellent teaching and learning.

Programs:

General Education (p. 1027)

General Education Honors (p. 1058)

Peace Corps Prep Certificate (p. 950)

ROTC (p. 1060)

Special Major/Minor (p. 1064)

General Education

General Education Prior to Fall 2018 (p. 1043)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students' development as whole or "educated" people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;

- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one's life,
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university's baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- **Competence in the Disciplines:** The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- **Knowledge of Human Cultures and the Physical and Natural World** through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- **Intellectual and Practical Skills, Including:** inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- **Personal and Social Responsibility, Including:** civic knowledge and engagement—local and global, intercultural knowledge and competence¹, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
- **Integrative Learning², Including:** synthesis and advanced accomplishment across general and specialized studies.

¹ Understanding of and respect for those who are different from oneself and the ability to work collaboratively with those who come from diverse cultural backgrounds.

² Interdisciplinary learning, learning communities, capstone or senior studies in the General Education program and/or in the major connecting learning goals with the content and practices of the educational programs including GE, departmental majors, the co-curriculum and assessments.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

Course Requirements

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least **9 units must be in upper division GE courses (100-199) from Areas B, C, and D** taken after you complete 45 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3. At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

General Education/Graduation Requirements Checklist

Download the checklist (https://www.csus.edu/acaf/ge/PDF%20Files/GE_Worksheet_Spring2019-Sac-State-FINAL.pdf)

General Education Requirements	Units
General Education requirements cover a breadth of areas spanning A. Basic Subjects, B. Physical Universe & Its Life Forms, C. Arts & Humanities, D. The Individual and Society, and E. Understanding Personal Development. For a list of courses that satisfy each Area and Requirement, please see the University Catalog.	
General Education Requirements: (9 48 units must be taken at Sacramento State)	
Lower Division: A total of 39 units of General Education Courses must be taken at the lower-division level (courses numbered 1-99) covering Areas A, B, C, D, and E.	39
Upper Division: A total of 9 units of General Education Courses must be taken at the upper-division level (courses numbered 100-199) from Areas B, C, or D. These units should be completed within the total unit requirements for Areas B, C, or D.	9
Basic Subjects (Include 3 lower-division courses)	9
A1. Oral Communication "C- or better required"	3
A2. Written Communication "C- or better required"	3
A3. Critical Thinking "C- or better required"	3
Physical Universe & Its Life Forms (Must include 1 upper-division course)	12
B1. Physical Science	3
B2. Life Forms	3
B3. Lab NOTE: Lab experience to be taken with one of the following: B1, B2 or B5.	3
B4. Math Concepts "C- or better required"	3

B5. Additional Course (Any B to reach 12 units) - Take upper-division course to complete Area & upper-division requirements. 3

Arts & Humanities (Must include 1 upper-division course) 12

C1. Arts 3

C2. Humanities 3

C1/C2. Any Area Course C. - **Note: recommended (if needed): 6 units of the Foreign Language requirement in C2 which double-counts for the Foreign Language proficiency requirement.** 3

C1/C2. Any Area C Course - Take upper-division course to complete Area & upper-division requirements. 3

The Individual & Society - Minimum of THREE disciplines must be taken in Area D (Must include 1 upper-division course) 12

D. Any Area D Course 3

D. Any Area D Course - Take upper-division course to complete Area & upper-division requirements. 3

D. Any Area D Course - Note: Recommend a U.S. History course which double-counts for the American Institutions Graduation Requirement. 3

D. Any Area D Course - Note: Recommend a U.S. Constitution and CA Government course which double-counts for the American Institutions Graduation Requirement. 3

Understanding Personal Development (Include 1 lower-division course) 3

E. Any Area E course 3

Graduation Requirements Units

Minimum 2.0 GPA required for GE

Graduation Requirements (required by CSU)

American Institutions: U.S. History 3
- The following courses satisfy the **U.S. History** Graduation Requirement and Area D: HIST 17A, HIST 17B, HIST 159, HIST 161, HIST 162, HIST 167, HIST 177, ANTH 101

American Institutions: U.S. Constitution & CA Government 3
- The following satisfy the **U.S. Constitution & CA Government** Graduation Requirement and Area D: POLS 1, POLS 113, POLS 150

Writing Intensive (WI) - May satisfy Upper Division General Education or Major "C- or better required" 3

Graduation Requirements (required by CA State University, Sacramento)

English Composition II: ENGL 20 "C- or better required" 3

Race and Ethnicity in American Society (RE) - May double-count for unit requirements in General Education Areas B, C, or D 3

Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <https://www.csus.edu/wll/flgr/> 6

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). There is no way to list all possible overlaps so please complete this checklist with a professional advisor. We can help you identify the best course of action. Academic Advising Center can be visited online (<http://www.csus.edu/acad>) or please call: (916) 278-1000 or email (advising@csus.edu).

Students must choose their General Education classes from the Areas and classes listed below:

Area A: Basic Subjects (p.) (9 units)

These requirements must be completed before enrollment in upper division GE courses. A grade of "C-" or better is required in all courses taken in Area A.

Code	Title	Units
A1: Oral Communication		3
Select one of the following:		
COMS 4	Introduction to Public Speaking	
COMS 5	The Communication Experience	
A2: Written Communication		3
Select one of the following:		
ENGL 5	Accelerated Academic Literacies	
ENGL 5M	Accelerated Academic Literacies - Multilingual	
ENGL 11	Academic Literacies II	
ENGL 11M	Academic Literacies II-Multilingual	
A3: Critical Thinking		3
Select one of the following:		
ANTH 4	Language, Culture, and Critical Thinking	
COMS 2	Argumentation	
EDUC 10	Critical Thinking and the Educated Person	
EDUC 10H	Critical Thinking and the Educated Person: Honors	
ENVS 11	Environmental Issues and Critical Thinking	
HIST 10	History's Mysteries: Thinking Critically about the Past	

JOUR 50	Media Literacy and Critical Thinking	
PHIL 4	Critical Thinking	
PHYS 30	Science and Pseudoscience	
SOC 8	Sense and Nonsense in Social Issues and Research	
Total Units		9

Area B: The Physical Universe and Its Life Forms (p.) (12 Units)

At least 3 units must be taken in each of Areas B1, B2 and B4. At least one course with a laboratory component must be taken in Area B1 or B2.

Code Title Units

AREA B1: PHYSICAL SCIENCE 3

Select one of the following:

ASTR 4A	Introduction to the Solar System	
ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
ASTR 4C	Introduction to Astrobiology	
ASTR 6	Astronomical Observation Laboratory	
CHEM 1A	General Chemistry I	
CHEM 5	Chemistry for Nurses	
CHEM 6A	Introduction to General Chemistry	
GEOG 1	Physical Geography: The Distribution of Natural Phenomena	
GEOG 5	Violent Weather/Changing Atmosphere	
GEOG 11	Laboratory in Physical Geography

Additional Graduation Requirements (p.)

The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams. With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

Code	Title	Units
CHIN 1B	Elementary Mandarin	5
DEAF 52	American Sign Language 2	3
FREN 1B	Elementary French	4

FREN 2A	Intermediate French	4

American Institutions (p.)

This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government.

For details on challenges exam, please visit the Department of World Languages and Literatures website (<http://csus.edu/wll/for-students/graduation-requirement.html>).

US History

Code	Title	Units
ANTH 101	Cultural Diversity	3
HIST 15H	Major Problems in U.S. History	3

US Constitution and CA Government

Code	Title	Units
POLS 1	Essentials Of Government	3
POLS 113	American Political Thought	3
POLS 150	American Governments	3

CA Government (California State and Local Government does not meet the U.S. Constitution requirement included in other government courses listed above but may be used by students who have taken a U.S. Constitution course outside of California. It fulfills the state and local government requirement only).

Code	Title	Units
POLS 180	California State and Local Government	3

Race & Ethnicity in American Society (p.) (3-unit Supervenient Requirement)

These courses also meet specific GE requirements in Areas C-E. One of these courses is required for students with catalog rights beginning Fall 1990 or later. The course may also be applied to the Area requirements.

Code	Title	Units
ETHN 11	Introduction to Ethnic Studies	3

Lower Division

Writing Intensive (p.) (3-unit Supervenient Requirement)

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

General Education Policies

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
- At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).

- Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of "C-" or higher.
- A 2.0 cumulative GPA is required in General Education.

Overlap Between General Education and Majors/Minors (Fall 1992 - Spring 2013)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*

Note: For Business Administration majors, substitute "College of Business" for "major department." For Social Science majors, substitute "History" for "major department."

Overlap Between General Education and Majors/Minors (Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to seek advising through their College Advising Centers or through an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements

Transfer Students

Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State, meet the foreign language proficiency graduation requirement, meet the state "code" requirements in U.S. History, American

and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student's major department. Students who have not completed an approved course for the "Race and Ethnicity in American Society" category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or higher required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here (<http://www.csus.edu/wll/for-students/graduation-requirement.html%E2%80%8B>).

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

Certificate in Global and Multicultural Perspectives

Units required for Certificate: 12

Program Description

Total Units: 12 units minimum—9 of which must be upper division. All courses in Section A and B are also approved for General Education.

All courses and petitions for substitution will be approved by the Office of Undergraduate Studies and will reflect the criteria and learning outcomes of the Certificate Program.

General Education (Prior to Fall 2018)

One of the principles on which a modern university rests is the assumption that there is an important difference between learning to make a living and building the foundation for a life. While the first goal is important, the second is fundamental.

In focusing on the students' development as whole or "educated" people, a university distinguishes itself from a trade school. The goal of a university education is not simply the acquisition and application of knowledge, but the creation of people who firmly grasp the worth of clear thinking and know how to do it; who understand and appreciate the differences between peoples and cultures as well as their similarities; who have a sense of history and social forces; who can express thought clearly and have quantitative ability; who know something about the arts as well as how to enjoy them; who can talk and think intelligently about the physical and life sciences, the humanities, and literature; and, above all, who have the desire and capability for learning. This goal is why a university degree is so highly valued by individuals, employers, and the community at large.

The Sacramento State General Education Program is designed to educate in this holistic sense. Thus, it is not simply a series of courses to complete or hoops for students to jump through as they complete the courses in their major. Rather, general education lies at the heart of what a university education is all about.

Therefore students should carefully select courses and actively seek subject areas that are new and may challenge their world views or cherished assumptions and offer new experiences, such as inquiry-based or community-based learning. In short, students should not take the easy way out. This is their opportunity to lay the foundation for the rest of their lives, and to define themselves as educated members of the human community. Their time at the university is precious and the General Education Program has been designed to help them begin the process of becoming truly educated people. In deciding to pursue a university degree, they have chosen well and should make the best use of the opportunities open to them.

Objectives

Upon completion of the General Education Program requirements, students will be expected to:

- read, write, and understand relatively complex and sophisticated English prose;

- construct a non-fallacious verbal argument, recognize fallacious arguments, and follow the verbal arguments of others;
- find and use common information resources, engage in specialized library research, use computers, and seek out appropriate expert opinion and advice;
- use mathematical ideas to accomplish a variety of tasks;
- gain a general understanding of current theory, concepts, knowledge, and scientific methods pertaining to the nature of the physical universe, ecosystems, and life on this planet;
- develop an acquaintance and understanding of cultures and major dynamic social institutions which affect one's life,
- possess a significant and useful understanding of peoples from a diversity of cultures and backgrounds, including women and ethnic and other minority groups who have been the objects of prejudice and adverse discrimination within our society.

In addition to these basic skills, courses in the sciences, arts, humanities, and social sciences have been selected to help students attain the university's baccalaureate learning goals and to satisfy particular GE Area Learning Outcomes. The Baccalaureate Learning Goals include:

- **Competence in the Disciplines:** The ability to demonstrate the competencies and values listed below in at least one major field of study and to demonstrate informed understandings of other fields, drawing on the knowledge and skills of disciplines outside the major.
- **Knowledge of Human Cultures and the Physical and Natural World** through study in the sciences and mathematics, social sciences, humanities, histories, languages, and the arts. Focused by engagement with big questions, contemporary and enduring.
- **Intellectual and Practical Skills, Including:** inquiry and analysis, critical, philosophical, and creative thinking, written and oral communication, quantitative literacy, information literacy, teamwork and problem solving, practiced extensively across the curriculum, in the context of progressively more challenging problems, projects, and standards for performance.
- **Personal and Social Responsibility, Including:** civic knowledge and engagement—local and global, intercultural knowledge and competence¹, ethical reasoning and action, foundations and skills for lifelong learning anchored through active involvement with diverse communities and real-world challenges.
- **Integrative Learning², Including:** synthesis and advanced accomplishment across general and specialized studies.

¹ Understanding of and respect for those who are different from oneself and the ability to work collaboratively with those who come from diverse cultural backgrounds.

² Interdisciplinary learning, learning communities, capstone or senior studies in the General Education program and/or in the major connecting learning goals with the content and practices of the educational programs including GE, departmental majors, the co-curriculum and assessments.

Sacramento State General Education courses are designed, selected, and approved by the faculty to meet these program objectives. Students will benefit from consultation with the Academic Advising Center or advisors in their major departments in planning their General Education course choices. Students may search the online Schedule of Classes by Area or other specification(s) for currently available GE courses.

Course Requirements

The following courses have been approved to meet the 48-unit General Education pattern required of Sacramento State students. At least **9 units must be in upper division GE courses (100-199)** taken after you complete 60 units of coursework. Enrollment in upper division GE courses is limited to students who have completed Areas A1, A2, A3, and have taken at least 45 units (not limited to GE classes). At least nine units of GE must be taken in residence (i.e., at Sacramento State). In addition, a second semester composition course and demonstration of proficiency in a foreign language are required for graduation.

General Education/Graduation Requirements Checklist

Download the checklist (http://csus.edu/acaf/ge/pdf%20files/ge_worksheet_summer2016-sac%20state.pdf)

General Education Requirements	Units
General Education requirements cover a breadth of areas spanning A. Basic Subjects, B. Physical Universe & Its Life Forms, C. Arts & Humanities, D. The Individual and Society, and E. Understanding Personal Development. For a list of courses that satisfy each Area and Requirement, please see the University Catalog.	
General Education Requirements: (9 48 units must be taken at Sacramento State)	
Lower Division: A total of 39 units of General Education Courses must be taken at the lower-division level (courses numbered 1-99) covering Areas A, B, C, D, and E.	39
Upper Division: A total of 9 units of General Education Courses must be taken at the upper-division level (courses numbered 100-199) from Areas B, C, D, or E. These units should be completed within the total unit requirements for Areas B, C, D, or E.	9
Basic Subjects	9
A1. Oral Communication "C- or better required"	3
A2. Written Communication "C- or better required"	3
A3. Critical Thinking "C- or better required"	3
Physical Universe & Its Life Forms	12
B1. Physical Science	3
B2. Life Forms	3
B3. Lab NOTE: Lab experience to be taken with one of the following: B1, B2 or B5.	
B4. Math Concepts "C- or better required"	3

B5. Additional Course (Any B to reach 12 units) - Note: Possible upper-division course to complete Area & upper-division requirements.	3
Arts & Humanities	12
C1. Arts	3
C2. Humanities	3
C1/C2. Any Area Course C. - Note: recommended (if needed): 6 units of the Foreign Language requirement in C2 which double-counts for the Foreign Language proficiency requirement.	3
C1/C2. Any Area C Course - Note: Possible upper-division course to complete Area & upper-division requirements.	3
*The Individual & Society - Minimum 12 of THREE disciplines (e.g. ANTH, ECON, ETHN, GOVT, HIST, RPTA, etc.) must be taken in Area D	
D. Any Area D Course	3
D. Any Area D Course - Note: possible upper-division course to complete Area & upper-division requirements.	3
D. Any Area D Course - Note: Recommend a U.S. History course which double-counts for the American Institutions Graduation Requirement.	3
D. Any Area D Course - Note: Recommend a U.S. Constitution and CA Government course which double-counts for the American Institutions Graduation Requirement.	3
Understanding Personal Development	3
E. Any Area E course - Note: Possible upper-division course to complete Area & upper-division requirements.	3

Graduation Requirements	Units
Minimum 2.0 GPA required for GE	
Graduation Requirements (required by CSU)	
American Institutions: U.S. History - The following courses satisfy the U.S. History Graduation Requirement and Area D: HIST 17A, HIST 17B, HIST 159, HIST 161, HIST 162, HIST 167, HIST 177, ANTH 101	3

American Institutions: U.S. Constitution & CA Government - The following satisfy the U.S. Constitution & CA Government graduation requirement Area D: GOVT 1, GOVT 113, GOVT 150	3
Writing Intensive (WI) - May satisfy Upper Division General Education or Major "C- or better required"	3
Graduation Requirements (required by CA State University, Sacramento)	
English Composition II: ENGL 20 "C- or better required"	3
Race and Ethnicity in American Society (RE) - May double-count for unit requirements in General Education Areas C, D, or E	3
Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or better required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: http://www.csus.edu/wll/for-students/graduation-requirement.html .	6

To help you complete your degree in a timely manner and not take more units than absolutely necessary, there are ways to use single courses to meet more than one requirement (overlap). There is no way to list all possible overlaps so please complete this checklist with a professional advisor. We can help you identify the best course of action. Academic Advising Center can be visited csus.edu/acad or please call: (916) 278-1000 or email at advising@csus.edu.

Students must choose their General Education classes from the Areas and classes listed below:

Area A: Basic Subjects (p.) (9 units)

These requirements must be completed before enrollment in upper division GE courses. A grade of "C-" or better is required in all courses taken in Area A.

Code	Title	Units
A1: Oral Communication		3
Select one of the following:		
COMS 4	Introduction to Public Speaking	
COMS 5	The Communication Experience	
A2: Written Communication		3
Select one of the following:		
ENGL 5	Accelerated Academic Literacies	
ENGL 5M	Accelerated Academic Literacies - Multilingual	
ENGL 11	Academic Literacies II	
ENGL 11M	Academic Literacies II-Multilingual	
A3: Critical Thinking		3
Select one of the following:		

ANTH 4	Language, Culture, and Critical Thinking
COMS 2	Argumentation
EDUC 10	Critical Thinking and the Educated Person
EDUC 10H	Critical Thinking and the Educated Person: Honors
ENVS 11	Environmental Issues and Critical Thinking
JOUR 50	Media Literacy and Critical Thinking
PHIL 4	Critical Thinking
PHYS 30	Science and Pseudoscience
SOC 8	Sense and Nonsense in Social Issues and Research

Total Units 9

Area B: The Physical Universe and Its Life Forms (p.) (12 Units)

At least 3 units must be taken in each of Areas B1, B2 and B4. At least one course with a laboratory component must be taken in Area B1 or B2.

Code	Title	Units
AREA B1: PHYSICAL SCIENCE		3
Select one of the following:		
ASTR 4A	Introduction to the Solar System	
ASTR 4B	Introduction to Stars, Galaxies, and Cosmology	
ASTR 4C	Introduction to Astrobiology	
ASTR 6	Astronomical Observation Laboratory	
CHEM 1A	General Chemistry I	
CHEM 5	Chemistry for Nurses	
CHEM 6A	Introduction to General Chemistry	
GEOG 1	Physical Geography: The Distribution of Natural Phenomena	
GEOG 5	Violent Weather/Changing Atmosphere	
GEOG 11	Laboratory in Physical Geography	
GEOL 5	Geology Of Mexico	
GEOL 7	Natural Disasters	
GEOL 8	Earth Science	
GEOL 8L	Earth Science Lab	
GEOL 10	Physical Geology	
GEOL 10L	Physical Geology Lab	
PHYS 5A	General Physics: Mechanics, Heat, Sound	
PHYS 10	Physics In Our World	
PHYS 11A	General Physics: Mechanics	
AREA B2: LIFE FORMS		3
Select one of the following:		
ANTH 1	Introduction to Biological Anthropology	
ANTH 1A	Biological Anthropology Laboratory	
BIO 1	Biodiversity, Evolution and Ecology	
BIO 7	Introduction to the Science of Biology	
BIO 9	Our Living World: Evolution, Ecology and Behavior	
BIO 10	Basic Biological Concepts	
BIO 15L	Laboratory Investigations in Biology	
BIO 20	Biology: A Human Perspective	
ENVS 10	Introduction to Environmental Science	
ENVS 10H	Honors Environmental Science	
AREA B3: LAB		

Select a course from the following:

ASTR 6	Astronomical Observation Laboratory
ANTH 1A	Biological Anthropology Laboratory
BIO 1	Biodiversity, Evolution and Ecology
BIO 15L	Laboratory Investigations in Biology
CHEM 1A	General Chemistry I
CHEM 1B	General Chemistry II
CHEM 5	Chemistry for Nurses
CHEM 6A	Introduction to General Chemistry
CHEM 6B	Introduction to Organic and Biological Chemistry
GEOG 11	Laboratory in Physical Geography
GEOL 5	Geology Of Mexico
GEOL 8L	Earth Science Lab
GEOL 10L	Physical Geology Lab
KINS 150	Exercise and Sport Physiology
PHYS 5A	General Physics: Mechanics, Heat, Sound
PHYS 11A	General Physics: Mechanics

AREA B4: MATHEMATICAL CONCEPTS AND QUANTITATIVE REASONING ¹ 3

Select one of the following:

MATH 1	Mathematical Reasoning
MATH 15H	Honors Mathematical Reasoning
MATH 17	An Introduction to Exploration, Conjecture, and Proof in Mathematics
MATH 24	Modern Business Mathematics
MATH 26A	Calculus I for the Social and Life Sciences
MATH 26B	Calculus II for the Social and Life Sciences
MATH 29	Pre-Calculus Mathematics
MATH 30	Calculus I
MATH 31	Calculus II
MATH 35	Introduction to Linear Algebra
STAT 1	Introduction to Statistics
STAT 10A & STAT 10B	Introductory Statistics with Developmental Mathematics Introductory Statistics with Developmental Mathematics
STAT 50	Introduction to Probability and Statistics

AREA B5: FURTHER STUDIES IN PHYSICAL SCIENCE, LIFE FORMS, AND QUANTITATIVE REASONING ² 3

Select one from the following two categories:

Lower Division

ANTH 15	
ANTH 17	
CHEM 1B	General Chemistry II
CHEM 6B	Introduction to Organic and Biological Chemistry
CSC 1	Introduction to Computer Science
CSC 10	Introduction to Programming Logic
EDUC 18	Mathematical Practices Across Cultures
GEOL 12	Historical Geology
PHIL 60	Deductive Logic I

Upper Division

ASTR 131	The Solar System and Space Exploration 
ASTR 132	Stars, Galaxies and Cosmology 

CHDV 143	Mind and Brain in Developmental Context
FACS 112	
FACS 113	
GEOG 111	Elements Of Meteorology
GEOG 113	Climate
GEOG 115	Biogeography
GEOG 116	Global Climate Change
GEOL 130	Oceanography
HIST/PHSC 107	History of the Physical Sciences
KINS 150	Exercise and Sport Physiology
NURS 168	The Brain and Gender-Related Differences
PHIL 125	Philosophy Of Science

Total Units 12

¹ Completion of the ELM (unless exempt) is a prerequisite for courses in this Area. In addition, passage of course-based diagnostic exams is required. A grade of "C-" or better is required in all courses taken in Area B4.

² Choose a course from this area or another from B1, B2, or B4 to total 12 units in Area B

Area C: The Arts and Humanities (p.) (12 Units)

At least 3 units must be taken from Areas C1 (ARTS) and C2 (HUMANITIES).

Code	Title	Units
AREA C1: ARTS		3 - 9

Select 3-9 units from the following two divisions:

Lower Division

ART 1A	Art in the Western World: From Stone Age to End of Middle Ages
ART 1B	Art in the Western World: From Renaissance to Baroque
ART 1C	Global Modern and Contemporary Art
ART 2	History of Islamic Art
ART 3A	Traditional Asian Art
ART 3B	Modern and Contemporary Asian Art
ART 5	Native American Art
ART 7	Introduction to Art and Visual Culture
ART 20A	Beginning Drawing
ART 22	Beginning Painting
ART 24	Beginning Watercolor
ART 70	Form, Space Vision
ART 74	Beginning Jewelry
ART 75	Beginning Metalsmithing
ART 86	Clay Sculpture
ART 88	Beginning Sculpture
GPHD 5	Introduction to Graphic Design
GPHD 20	History Of Graphic Design
INTD 15	Introduction to Interior Design
INTD 20	Design

MUSC 8	Basic Music
MUSC 9	Music In World Cultures
MUSC 10A	Survey of Music Literature I
MUSC 10B	Survey of Music Literature II
MUSC 18	Music Appreciation
PHOT 11	Digital Imaging
THEA 1	Introduction To Theatre
THEA 2	History of the Theatre: Ancient to Renaissance
THEA 3	Theatre History After 1660
THEA 5	Aesthetics of Theatre and Film
THEA 9	Appreciation Of Acting
Upper Division	
ALS 151	The Studio: Explorations in Arts and Letters
ART 111	Latin American and Latino Art History
ART 117A	Art of India and Southeast Asia
ART 117B	Art of China and Japan
ASIA/HIST 140	Modern East Asian Cinema
DNCE 130	Appreciation and History of Dance
DNCE 131	Dance Cultures Of America
DNCE 132	African-Caribbean Dance
ENGL 130M	Art of Autobiography
ENGL 140M	Modern British Drama, 1889-Present
ENGL 141A	The Essential Shakespeare
ENGL 150J	Twentieth Century American Drama
ENGL 191A	Masterpieces of the Cinema
HRS 180	The Film
HRS 181	Contemporary Issues in Film

Additional Graduation Requirements (p.)

The 48-unit General Education requirement does not include the following two graduation requirements:

- Second semester composition (ENGL 20, ENGL 20M or an approved equivalent) must be completed with a grade of C- or better.
- Foreign language graduation requirement may be met by successfully completing appropriate coursework or passing proficiency exams.

With a grade of "C-" or better, the following second semester or equivalent college-level language courses may satisfy both GE Area C2 units and the Foreign Language Requirement:

Code	Title	Units
CHIN 1B	Elementary Mandarin	5
DEAF 52	American Sign Language 2	3
FREN 1B	Elementary French	4
FREN 2A	Intermediate French	4
GERM 1B	Elementary German	4
ITAL 1B	Elementary Italian	4
JAPN 1B	Elementary Japanese	5
KORN 1B	Elementary Korean 1B	5
PUNJ 1B	Elementary Punjabi	4
RUSS 1B	Elementary Russian	5
SPAN 1B	Elementary Spanish	4

American Institutions (p.)

This requirement may be fulfilled by completing one Government and one US History course from the following list. The courses below also satisfy Area D units. In addition, students have the option of taking challenges in US History, US Constitution and California State and Local Government. For details on challenges exam, see <http://www.csus.edu/ccr/Challenge%20Exams/>.

US History

Code	Title	Units
ANTH 101	Cultural Diversity 🌐	3
HIST 15H	Major Problems in U.S. History 🌐	3
HIST 17A	United States History, 1607-1877 🌐	3
HIST 17B	United States History, 1877-Present 🌐	3
HIST 159	History of US Foreign Relations	3
HIST 161	The American Vision	3
HIST 162	Social History of the United States	3

US Constitution and CA Government

Code	Title	Units
GOVT 1		3
GOVT 113		3
GOVT 150		3

CA Government (California State and Local Government does not meet the U.S. Constitution requirement included in other government courses listed above but may be used by students who have taken a U.S. Constitution course outside of California. It fulfills the state and local government requirement only).

Code	Title	Units
GOVT 180		3

Race & Ethnicity in American Society (p.) (3-unit Supervenient Requirement)

These courses also meet specific GE requirements in Areas C-E. One of these courses is required for students with catalog rights beginning Fall 1990 or later. The course may also be applied to the Area requirements.

Writing Intensive (p.) (3-unit Supervenient Requirement)

One Writing Intensive course, i.e., a course with comprehensive writing assignments (minimum 5,000 words) is required. This requirement may be met either with a specifically marked GE courses or, in certain majors, with a course required for the major. (Writing Intensive courses taken to meet major requirements do not apply to the nine-unit upper division requirement in GE.) Prerequisite: Completion of GE Areas A2, A3, second semester composition (ENGL 20), junior standing, and ENGL 109M/ENGL 109W. Students who take the WPJ instead of initially taking ENGL 109M/ENGL 109W must score 70, 71, or 80. Students with a lower WPJ score will have to complete other prerequisites determined by their score. Successful completion of the writing intensive course with a grade of C- or better certifies the Graduation Writing Assessment Requirement (GWAR).

HONR 102	The Public Good Through the Visual and Performing Arts ✍
Global and Multicultural Perspectives in the Discipline (3 Units)	
Select 3 units ¹	3
Total Units	9-15

¹ 3 units may be lower or upper division. Courses to be selected in consultation with major advisor

All courses and petitions for substitution will be approved by the Office of Undergraduate Studies and will reflect the criteria and learning outcomes of the Certificate Program.

General Education Policies

- All upper division GE courses require at least second semester sophomore standing (45 units) and completion of all GE Area A courses as prerequisites.
- At least 9 units must be chosen from upper division GE courses (100-199) and at least 9 units must be taken in residence at Sacramento State (these units may overlap).
- Each course taken to satisfy the Area A Basic Subjects and Area B4 Quantitative Reasoning must be completed with a grade of "C-" or higher.
- A 2.0 cumulative GPA is required in General Education.

Overlap Between General Education and Majors/Minors (Fall 1992 - Spring 2013)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. A maximum of nine units of coursework from your major department may also be applied to the General Education requirements.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements*

Note: For Business Administration majors, substitute "College of Business" for "major department." For Social Science majors, substitute "History" for "major department."

Overlap Between General Education and Majors/Minors (Fall 2013 and Later)

General Education requirements include five areas (A-E) in which you must take courses (area requirements), a nine-unit upper division requirement, a Race and Ethnicity requirement, and a Writing Intensive requirement. The overlap possibilities among these four aspects of General Education are outlined below. Students needing help applying these overlap policies are encouraged to see an advisor in the Academic Advising Center, Lassen Hall 1012.

1. There is no university restriction on the overlap of courses between GE and coursework approved for GE from your major department.
2. The Race and Ethnicity requirement can be met with an upper or lower division course from a student's major or major department. Example: A Social Work major can use SWRK 102 to meet the Race and Ethnicity requirement.
3. The Writing Intensive requirement can be met with a course from the major or major department in specified majors, but not in all majors.
4. There is no restriction on the overlap of courses between GE and minor requirements

Transfer Students

Transfer students who have completed lower division General Education requirements at a California Community College, including those certified under the Intersegmental General Education Transfer Core Curriculum (IGETC), and/or those in receipt of an Associate Degree for Transfer (ADT), are required to complete 9 units of upper division GE at Sacramento State, meet the foreign language proficiency graduation requirement, meet the state "code" requirements in U.S. History, American and California Government, and the writing intensive requirement. These 9 units may or may not include the writing intensive requirement, depending on the policy of the student's major department. Students who have not completed an approved course for the "Race and Ethnicity in American Society" category at a community college must take a course in this category at Sacramento State. In addition, all transfer students, except those fully certified as having completed the IGETC core curriculum, must complete the required second semester writing course or an approved course at a community college.

Note: Foreign Language Proficiency Requirement - If not satisfied before entering Sacramento State, it may be satisfied in General Education Area C2 (Humanities). "C- or higher required." The alternative methods for satisfying the Foreign Language Proficiency Requirement are described here: <http://www.csus.edu/wll/for-students/graduation-requirement.html>

For more information about IGETC requirements and/or Associate Degrees for Transfer, contact your community college counselor.

General Education Honors Program Program Description

"Education is not preparation for life; education is life itself." – John Dewey

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their freshman and sophomore years. There is an additional nine-unit upper division Honors sequence that students take to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

The guiding principles of the Honors Programs are active learning, global subject matter, study of primary texts, and an interdisciplinary orientation. Specially selected faculty provide challenging and stimulating learning experiences in small class settings. The cornerstone experience of the freshmen and sophomore years is a three semester Honors seminar, in which students will read some of the great books of the civilizations of the world and discuss some of the issues raised by these authors.

Honors students have access to a lounge and central administrative office, where they can relax, study, meet with advisors, and talk with one another. The program is open to qualified entering freshmen; all others interested should contact the Honors Director.

For further information and application instructions, visit the Honors Web site at www.csus.edu/honorsprogram (<http://www.csus.edu/honorsprogram>).

HONR 1. First Year Seminar: Education, Self-Examination, and Living. 3 Units

Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring

Introduction to comparative ideas of education and self-development. In writings from around the world, examines works on education, autobiographical accounts, and short stories to explore concepts of teaching, learning, human growth and development, and the role of the school and university in the realization of human potential.

HONR 2. Great Books and World Civilization I. 3 Units

Prerequisite(s): HONR 1 and instructor permission.
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students read, discuss, and explore some of the most influential works of literature, philosophy, history, and religion from cultures around the world prior to the 15th century. Students will gain knowledge of different cultural traditions, explore ways to criticize and to learn from different genres of literature, examine their own concepts and ideas, and practice skills of critical thinking in dialogue with challenging works. Readings will be drawn from a broad array of sources, including Greek, Chinese, and Indian traditions, different religious faiths, and works of literature representing a variety of outlooks and views.

HONR 3. Great Books and World Civilization II. 3 Units

Prerequisite(s): HONR 2 and instructor permission.
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring

Students read, discuss, and explore some of the most influential works of literature, philosophy, history, and religion from cultures around the world from the 15th century to the present. Students will gain knowledge of different cultural traditions, explore ways to criticize and to learn from different genres of literature, examine their own concepts and ideas, and practice skills of critical thinking in dialogue with challenging works. Readings will be drawn from a broad array of sources, including Greek, Chinese, and Indian traditions, different religious faiths, and works of literature representing a variety of outlooks and views.

HONR 101. Science and the Public Good. 3 Units

General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring

This course examines how scientists employ information derived through the scientific method and statistical analyses to form conclusions. The methodology of science is applied to public policy debates relating to climate change, the use of DNA, Creationist/evolutionist issues, water conservation, land use zoning, energy, mineral resources, and other topics.

HONR 102. The Public Good Through the Visual and Performing Arts. 3 Units

Prerequisite(s): Upper division status in Honors Program; GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

This course explores the role of the visual and performing arts as a catalyzing and infinitely variable means of pursuing the public good. Students will engage with the artistic process as well as learn how works of art have successfully challenged ideological conventions and helped change social and political systems. Strategies of making art will be examined in the form of specific visual and performativity methodologies, the context of the artist, and the public perception of various art forms.

HONR 103. Civic Engagement, Service Learning: Pursuing the Public Good. 3 Units

Prerequisite(s): Must be admitted to Honors Program
Term Typically Offered: Fall, Spring

Students to be an active participant in his/her own learning process through a service learning experience and participation in a corresponding seminar. Students are offered a reciprocal opportunity to acquire knowledge and develop skills while providing service and assistance to the community. Students will have the opportunity to assess the circumstances of an organization and provide feedback on their situation. The student will evaluate and assess his/her service learning from three perspectives: the physical universe and its life forms, social issues and social science research, and the arts.

Note: An international experience can be substituted for a local service learning experience. See Honors Program Director for more information.

HONR 120. Honors One World Seminar. 3 Units

Prerequisite(s): Open to students in the Honors program and permission of the program director.
 Seminar dedicated to exploring the One World theme for the university. Topic changes annually.

HONR 150. Leadership Seminar. 3 Units

Prerequisite(s): Open only to Honors students.
Term Typically Offered: Fall, Spring

Seminar dedicated to exploring the principles of effective leadership.

HONR 195. Community Fieldwork and Internship. 3 Units

Prerequisite(s): Open to students in the Honors Program with permission of the program director and advanced approval of project goal and objective.
Term Typically Offered: Fall, Spring

Supervised service-learning experience with a community partner. This experience focuses on application of the interdisciplinary approach of the General Education Honors Program while affording students direct, hands-on experiences.

Credit/No Credit

HONR 196. Honors Senior Thesis. 3 Units

Prerequisite(s): Open to students in the Honors program with permission of the program director.

Honors research seminar in which students will complete a research paper in the discipline of their choice based on original research. Recommended for the student's final semester of study.

HONR 199. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Open to students enrolled in the General Education Honors Program. Individual projects and directed reading for students who are competent to assume independent work. Requires approval of the Honors Program Director and Honors faculty member under whom the independent work is to be conducted.

GE Honors Certificate

Units required for Certificate: 42

Program Description

The General Education Honors Program is a course of study to provide academic challenges and enhanced learning for highly motivated students at Sacramento State. Honors students take most of these courses in their first two years. An additional nine-unit upper division Honors sequence is completed to earn an Honors certificate upon graduation. The Honors courses fulfill almost all Sacramento State General Education requirements.

Requirements

Honors students take forty-two (42) units of Honors courses (33 lower division and 9 upper division). Limited exceptions are permitted with permission of the Director.

In their first two years, Honors students take approximately three Honors courses (9 units) per semester, filling out their schedules with other General Education courses or courses required in their pre-major. Honors students must take at least 12 units overall per semester.

The core of the curriculum will be a three-semester Honors seminar in which students read some of the great books of world civilizations, consider some of the big issues raised by world thinkers and writers, and improve their skills in critical thinking and writing:

Code	Title	Units
HONR 1	First Year Seminar: Education, Self-Examination, and Living	3
HONR 2	Great Books and World Civilization I	3
HONR 3	Great Books and World Civilization II	3

The Honors courses fulfill almost all Sacramento State General Education requirements for graduation. GE courses that students take in addition to their Honors courses are: ENGL 5, Math, and a physical science course with lab. Students must also fulfill a university graduation requirement in foreign languages.

Honors students are assigned a faculty advisor upon arrival at Sacramento State. They must consult with their advisor at least once a semester before registering for their courses.

The freshman and sophomore courses for the first Honors cohort are approximately as follows:

Program Requirements

Freshman Year		Units
First Semester		
HIST 50H	World History I: to 1500	3
HONR 1	First Year Seminar: Education, Self-Examination, and Living	3
HIST 15H	Major Problems in U.S. History ①	3
		Units
		9
Second Semester		
COMS 4H	Honors Public Speaking (may be taken in fall or spring)	3
EDUC 10H	Critical Thinking and the Educated Person: Honors	3
HIST 51H	World History from 1500 to the Present	3
		Units
		9
Sophomore Year		
Third Semester		
ANTH 2H or ETHN 11H or GEOG 2H	Introduction to Cultural Anthropology - Honors ² or Introduction to Ethnic Studies (Honors) ② or Cultural Geography - Honors	3
ENVS 10H	Honors Environmental Science	3
HONR 2	Great Books and World Civilization I	3
		Units
		9
Fourth Semester		
POLS 1H	Honors Government	3
HONR 3	Great Books and World Civilization II	3
		Units
		6
Junior and Senior Years		
Honors students take three specially designed Honors courses to fulfill their upper division requirement in General Education:		
HONR 101	Science and the Public Good	3
HONR 102	The Public Good Through the Visual and Performing Arts ③	3
HONR 103	Civic Engagement, Service Learning: Pursuing the Public Good	3
		Units
		9
Total Units		42

¹ May be completed in any semester in the program.

² Students choose ANTH 2H, GEOG 2H or ETHN 11H to complete their Area D requirements.

ROTC

Office of Academic Affairs

Program Description

Aerospace Studies/Air Force

The Department of Aerospace Studies offers three and four year academic and training programs towards a commission in the United States Air Force. The Air Force Reserve Officer Training Corps (AFROTC) program is designed to develop officers in the USAF through leadership and academic training. Cadets participate in dialogues, problem solving, and other planning activities. Program goals are achieved through formal

academic classes, physical fitness training, and Leadership Laboratory (a 2-hour weekly military training session). Qualified undergraduate or specially qualified graduate students may apply for AFROTC. The program accepts students from most of the local two- and four-year community colleges and universities. Contact the Department (www.csus.edu/afrotc/ (<http://www.csus.edu/afrotc/>)) for information on open enrollment procedures for non-Sacramento State students.

Eligibility

As one of the prerequisites for commissioning, each cadet must attend a two-week field training encampment. This training is conducted at an Air Force base during the summer, normally between a cadet's sophomore and junior years. Field training emphasizes military orientation, academics, physical fitness training, leadership exercises, teamwork, job specialty briefings, military drill and ceremonies.

Upon completion of the AFROTC program and all requirements for a bachelor's degree, cadets are commissioned as second lieutenants and serve a minimum of four years in the Air Force. Graduate students are eligible for an Air Force commission upon successful completion of the AFROTC program. AFROTC students may compete to be selected and enter pilot, combat systems operator ("CSO"-navigators, weapon system operators, etc.), remotely piloted aircraft pilot, or air battle manager training after commissioning. These career fields, particularly pilot, are highly selective career fields and the competition is intense. Other commissionees go on active duty in specialties consistent with their academic majors, their desires, and the needs of the Air Force. Commissionees may request a delay from entry on active duty to continue their education, or they may apply for Air Force sponsored graduate study to begin immediately upon entering on active duty service.

Scholarships

AFROTC may offer scholarships to qualified students. Less than 20% of AFROTC cadets are on scholarships and they are highly competitive. Scholarships usually provide for tuition, books, lab and incidental fees, and a tax-free monthly stipend ranging from \$300-\$500.

Except for scholarship recipients, students are under no obligation to the Air Force until they enter their junior cadet year. Upon entering their junior cadet year all cadets (scholarships/non-scholarships) begin receiving a monthly stipend ranging from \$300-\$500. More detailed program information is available upon request from AFROTC, Sacramento State, Chair, Department of Aerospace Studies, Yosemite Hall Room 122, (916) 278-7315 or at www.csus.edu/afrotc/ (<http://www.csus.edu/afrotc/>)

Program Description

Military Science/Army

The Military Science Department operates as an extension office of the Military Science Department at the University of California at Davis and offers hands-on training in management and leadership. The program stresses the following leadership dimensions: oral and written communications, oral presentations (formal briefings), initiative, sensitivity, influence, planning and organizing, delegation, administrative control, problem analysis, judgment, decisiveness, physical stamina, mission accomplishment, and fellowship. Also stressed are current events, national and international politics, military affairs, ethics training, and human relations with emphasis on eliminating racial and gender discrimination. Management and leadership are taught using the U.S. Army as a model. Military skills (such as drill and ceremonies, map reading, and squad tactics) are taught to create an environment where

students can enter leadership positions and apply theories taught in the classroom. Students learn by doing. The program assists students in all academic fields to prepare for positions of leadership in military or civilian careers.

The Department offers two program tracks:

1. a purely academic track, and
2. a precommissioning track for those desiring a commission in the U.S. Army

The academic track entails no obligation to the military and is open to all students. Students pursuing the academic track do not wear a uniform or otherwise participate in extracurricular activities designed as part of the precommissioning process. Activities for all students include the Ranger club (a club designed for adventure activities such as rappel ling, white-water rafting, orienteering, and patrolling) and intramural sports teams.

Students who desire a commission in the U.S. Army participate in both the academic portion of the program and in the leadership laboratories and extracurricular activities designed to enhance their leadership and technical skills. They wear uniforms to leadership laboratories and selected classes and become ROTC cadets. Students may be cadets in the lower division courses without incurring a military obligation. Students participating in the upper division precommissioning program incur a military obligation. See below for details. Extracurricular activities for cadets include an intercollegiate sports team (Ranger Challenge), the university color guard, military honor society, a rifle/pistol team, and opportunities to participate in field training exercises.

Military Science Program Options

Students are enrolled in military science under **one** of two programs.

Four-Year Program

Students are enrolled in the basic course (lower division) for the first two years on a voluntary basis. There is no military obligation associated with attendance in lower division courses. Admission to the advanced course (upper division) is by application from second-year lower division students who meet the academic, physical, and military aptitude requirements. Qualified veterans can enter the advanced course immediately because of their military service experience, upon approval by the Department Chair. Upper division students receive \$350 (Juniors) or \$400 (Seniors) subsistence per month after executing a contract agreeing to complete the course and accept a commission if offered. During the course, all military science textbooks, uniforms and equipment are provided without cost. Students are given leadership development experience at summer camp (advanced camp) between their third and fourth years of the course. Emphasis is on individual participation, leadership development and the capability to function effectively in positions of significant responsibility.

Two-Year Program

The two-year program is for students who have not attended lower division Military Science classes. In lieu of lower division courses an applicant attends the Army ROTC National Leader's Camp at Fort Knox, Kentucky. Applicants are paid for camp attendance and transportation costs. Applications are accepted during the winter and spring terms of the year preceding enrollment in the two-year program. All other provisions explained above for the upper division course apply to the two-year program.

Scholarships

The U.S. Army offers four-, three-, and two-year Active Duty and two-year Reserve Forces Duty or Dedicated California National Guard scholarships to students planning to attend or attending Sacramento State. The U.S. Army ROTC scholarship package pays tuition and educational fees. Also included in all scholarships is a flat rate of \$600 per year for textbooks, up to \$400 per year for miscellaneous fees such as laboratory, student activity, transcript, and graduation fees, and a subsistence allowance of up to \$400 a month for 10 months for each year that the scholarship is in effect.

The Army Reserve Officers' Training Corps four-year Active Duty merit scholarships are awarded to qualified high school seniors in a national competition each year. There are two cycles available for submission of the four-year scholarship application. High school juniors can compete for an Early Cycles scholarship by submitting their application complete and postmarked by July 15 between their junior and senior years. Applicants will receive notification of their final status by November 1. As high school seniors, students compete for the Regular Cycle scholarship by submitting their application complete and postmarked by December 1. Those applicants not selected in the Early Cycle are considered in the Regular Cycle competition. Applicants will receive notification of their final status by March 1 of their senior year in high school. Interested applicants should see their high school counselor for an application or contact the UC Davis Department of Military Science at (530) 752-7682.

The three-year Active Duty and two-year Reserve Forces Duty scholarships are awarded to college students who are already attending Sacramento State or transferring from a junior college to Sacramento State, and have three to two years remaining before graduating with a baccalaureate. Students interested in competing for these scholarships can submit their application beginning in November of each school year. The deadline for submission of an application is January 15 for the two-year scholarship and February 15 for the three-year scholarship. Students apply for and are awarded these Army scholarships through the Military Science Department.

Leadership Laboratory

During the course of the school year, several weekends and two hours per week are spent in the conduct of practical exercises. Classes emphasize adventure activities including offense, defense and patrolling techniques, weapons familiarization, rappel ling, rope bridging, obstacle course, leadership reaction course, and land navigation. All cadets are required to attend leadership laboratories at the UC Davis campus for practical leadership experience and to prepare for attendance at the Army ROTC Advanced Camp, held at Fort Knox, Kentucky.

AERO 1A. Heritage and Values of the United States Air Force I. 1 Unit Term Typically Offered: Fall, Spring

Orientation to the Air Force and AFROTC. This is a survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, organizations of the Air Force, and benefits of Air Force membership. Students will be required to complete an oral and written project.

AERO 1B. Heritage and Values of the United States Air Force II. 1 Unit Term Typically Offered: Fall, Spring

Continuation of AERO 1A: completes students' orientation to the Air Force. Specific topics include evolution of Airpower, Air Force structure, and social media and the Air Force. Students will be required to complete an oral and written project.

AERO 21A. Team Leadership and Fundamentals I. 1 Unit Term Typically Offered: Fall, Spring

Focuses on laying the foundation for teams and leadership in the Air Force. Topics include skills that will allow cadets to improve their leadership on a personal level and within a team. Cadets will experience initial field training preparation. Communication skills will be emphasized and include: public speaking, writing, and class participation.

AERO 21B. Team Leadership and Fundamentals II. 1 Unit Term Typically Offered: Fall, Spring

Continuation of AERO 21A. The purpose of this course is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadets to AFROTC offer candidates. Topics include conflict management, human relations, building teams. Communication skills will be emphasized and include: speaking, writing, and class participation.

AERO 99. Special Problems. 1 - 4 Units Term Typically Offered: Fall, Spring

Academic study and evaluation in specified topics associated with aerospace development, technology, and doctrine.

Note: Open only to students who appear competent to complete assigned work and who meet prerequisites established by the Department of Aerospace Studies. Approval in writing by the Department Chair required.

Credit/No Credit

AERO 135A. Leading People and Effective Communication I. 3 Units Term Typically Offered: Fall, Spring

This course teaches cadets advanced skills and knowledge in management and leadership. Also a survey of selected concepts, principles, and theories on decision making, change management, effective supervision and Air Force diversity issues. Students will be given the opportunity to improve speaking and writing skills.

AERO 135B. Leading People and Effective Communication II. 3 Units
Term Typically Offered: Fall, Spring

Continuation of AERO 135A. Survey of selected concepts, principles, and theories on negotiating in teams, bias, creating a vision, public affairs, and professionalism. Students will be given the opportunity to improve speaking and writing skills.

AERO 145A. National Security and Preparation for Active Duty I. 3 Units

Term Typically Offered: Fall, Spring

Provides an overview of the role of the military in our national security policy and processes. It includes an analysis of the roles of the three branches of government as they relate to national security; organization of the Air Force as well as other branches of the military; an overview of military ethics; how the Air Force deploys; and a discussion of global current events which impact our national security. Students are expected to participate in class discussions/complete written/oral presentations.

AERO 145B. National Security and Preparation for Active Duty II. 3 Units

Term Typically Offered: Fall, Spring

Continuation of AERO 145A. Presentation of critical issues facing today's military professionals. A wide variety of topics are discussed including: the military legal system; the laws of armed conflict; security issues; personal finance; professional/unprofessional relationships; information warfare; and issues pertinent to the first assignment after commissioning into the Air Force. Students will be expected to participate in class discussions and complete a written and oral presentation.

AERO 199. Special Problems. 1 - 4 Units

Term Typically Offered: Fall, Spring

Academic study and evaluation in specified topics associated with aerospace development, technology, and doctrine.

Note: Open only to those students who appear competent to complete assigned work and who meet prerequisites established by the Department of Aerospace Studies. Approval in writing by the Department Chair required.

Credit/No Credit

MILS 14. Introduction to Military Science I. 1 Unit
Term Typically Offered: Fall, Spring

Discussion of the military as one element of national power; its role in American defense; its purpose, weapons and organizations; its participation in international treaties. Discussion of other subjects required for a student to understand the military and its place in modern society. Fall only.

MILS 15. Introduction to Military Science II. 1 Unit
Term Typically Offered: Fall, Spring

Discussion of the military's role in American Society, current society attitudes, sources of its leaders, and an examination of its structure. Spring only.

MILS 24. Principles and Tactics of the Soldier. 1 Unit
Term Typically Offered: Fall, Spring

Familiarizes students with the nine principles of war, and gain an appreciation for the role of the commander in warfare. A study of small unit level will enable the student to understand the nature of the battlefield environment, and will put the decisions of the commander into perspective. These discussions will lead to the discussion of the elements of leadership to be presented in MILS 25. Fall only.

MILS 25. Leadership Assessment and Beginning Counseling Skills. 1 Unit

Term Typically Offered: Fall, Spring

Students will gain insight and practical experience in the manager-leader skills of counseling using the Army's sixteen leadership dimensions as a model. The student will understand the elements of leadership, and undergo the Army's Leadership Assessment Program in class. Interactive role playing scenarios will be conducted and behavior recorded in a group setting. The student will be given individual feedback on the results of the assessment by scheduling a private appointment with the instructor. Spring only.

MILS 99. Special Problems. 1 - 3 Units

Prerequisite(s): Instructor permission.

Term Typically Offered: Fall, Spring

Intensive examination of one or more special problems in Military Science. Possible areas of study include examination of the structure of the military and its place in modern society, participation in international treaties, leadership skills, decision making, as well as other topics in military science.

MILS 134. Principles Of Instruction. 2 Units
Term Typically Offered: Fall, Spring

Principles and practice in fundamentals applicable to military instruction to include planning, presentation, execution and evaluation. Student presentations exemplify lecture material. Application of small combat unit tactics (squad and platoon) will solidify concepts discussed in class. Fall only.

MILS 135. Military Operations. 2 Units

Prerequisite(s): Upper division standing, MILS 134 or instructor permission.

Term Typically Offered: Fall, Spring

Military small unit tactical theory and application are taught and serve as a basis for leadership development. Introduces principals of combat contemporary operating environment, Geneva Law of Land Warfare, and military offensive and defensive operations. Emphasis is placed on developing critical thinking, problem solving, and communication skills. Spring only.

MILS 144. Principles of Military Administration. 2 Units
Term Typically Offered: Fall, Spring

Comprehensive course in the organization, structure, and functions of the various types of staffs and an introduction to the theory and application of military law and legal systems focusing on the Uniform Code of Military Justice and the rights of the accused under the Constitution. Fall only.

MILS 145. Military Leadership and Ethics.**2 Units****Term Typically Offered:** Fall, Spring

Capstone seminar designed to bring together all previous Military Science instruction. Examines contemporary leadership problems. Designed to provide the ROTC cadet with the basic management skills necessary for a foundation for future growth as a junior officer. Spring only.

MILS 199. Special Problems.**1 - 3 Units**

Prerequisite(s): MILS 14, MILS 15, MILS 24, MILS 25 and Department Chair permission.

Term Typically Offered: Fall, Spring

Intensive examination of one or more special problems in military science. Possible areas of study include leadership dimensions, professional ethics, critical thinking, problem solving, communication skills as well as other topics in military science.

www.csus.edu/gradstudies (<http://www.csus.edu/gradstudies>)

Special Major (Graduate)

Graduate Program

The Special Major for the Master's degree provides an alternative for superior students whose special needs and interests cannot adequately be met by any one of the existing master's degree programs of the University. The student may earn a Master of Arts or a Master of Science, as appropriate to the department in which the culminating experience requirement is completed. The special major is a coherent program directed towards a clear theme, not available within an existing graduate major. The courses are chosen from two or more departments and may bridge more than one college within the University. The courses must be carefully selected for their correlation and clear applicability to the objective of the unique major being proposed. The proposed program must be compatible with the objectives of the University and supportable by courses already offered within the degree programs and by the expertise of the faculty members.

Eligibility

The Special Major program is restricted to superior graduate students who are eligible for admission to classified standing in one of the regular master's degree programs of the University.

Applicants must present evidence of overall undergraduate grade point averages of 3.0 and 3.0 in the last 60 semester units taken.

Courses taken to fulfill prerequisite requirements must be completed with a minimum GPA of 3.5, and they may not be counted toward the degree requirements.

Admission Requirements

Students may apply to the University as unclassified graduate students or directly into a Special Major program.

A Special Major application with department approvals must be submitted no later than the end of the first semester of attendance.

The applicant will need to obtain the assistance and approval of three or more faculty advisors. Because of the interdisciplinary nature of the Special Major, students are required to obtain the assistance and concurrence of faculty advisors from the key instructional units listed in the Program of Study. Obtain the detailed Graduate Special Major guidelines from the Office of Graduate Studies, River Front Center 206, (916) 278-6470. Prepare the program in consultation with the faculty committee.

Advancement to Candidacy

Each student must file an application for Advancement to Candidacy indicating a proposed program of graduate study. This procedure may begin as soon as the classified graduate student has:

- removed any deficiencies in admission requirements;
- completed at least 12 units of 200-level courses with a minimum 3.0 GPA; and
- taken the Writing Placement for Graduate Students (WPG) or taken a Graduate Writing Intensive (GWI) course in their discipline within the first two semesters of coursework at California State University, Sacramento or secured approval for a WPG waiver.

Master of Arts/Master of Science – Special Major

Minimum upper division and graduate level units required: 30

- At least 18 units must be in regularly established lecture or seminar courses at the 200 level (not to include 299 courses).
- No more than six units may be in Independent Study (299 or similar courses).
- No more than six units shall be in any one or in any combination of:
 - a. approved extension credit;
 - b. transfer credit, for work carrying graduate degree residence credit at another accredited institution. No more than half the units may be in any one department.

Special Major (Undergraduate)

Program Description

When an existing, authorized Bachelor's degree, Minor, Certificate, or Non-Certificate Program of Study does not meet the needs of a student, a Special Major or Minor can be requested. The Special Major or Minor can be a first and only program or a second major or minor. In the latter case, students are encouraged to develop a program of study which complements the first major. Programs will be interdisciplinary in nature and will require at least six units of coursework in each of at least two

academic units. Materials describing the procedures and requirements applying to special majors and minors can be obtained from the Dean's office in each of the colleges or online at: www.csus.edu/acaf/ge/Student%20Forms/Revised%20Policy%20for%20Special%20Major.pdf (<http://www.csus.edu/acaf/ge/Student%20Forms/Revised%20Policy%20for%20Special%20Major.pdf>). All approvals should be obtained at least one year in advance of graduation date. Final special major program plans with appropriate signatures are submitted to the Dean for Undergraduate Studies, Sacramento Hall 234. The program does not qualify for special major authorization until all parties have approved the program.

Eligibility

To qualify for a Special Major or Minor a student must satisfy the following requirements:

- Before submitting the application to begin work on the Special Major, the student must have a combined grade point average of 2.5 on all coursework completed to that point.
- Describe the educational and career objectives sought.
- Identify and justify the relationship of the pattern of study requested to the objectives sought.
- Outline the coursework and academic activity necessary to complete the objectives cited.
- No more than 6 units may be in Independent Study (199 or similar courses) and Fieldwork (195 or similar courses).
- Obtain the assistance and approval of two or more faculty advisors from the key instructional units listed in the Program of Study as well as the Department or Academic Unit Chairs from those units.
- Obtain the approval of the appropriate college dean(s).
- Submit all materials for review and approval to the Office of Undergraduate Studies, Sacramento Hall 234.

Specific Degree Requirements

- A minimum/maximum total of 120 units are required for the Bachelor of Arts or Bachelor of Science Special Major
- A BA Special Major must have a minimum of 24 units
- A BS Special Major must have a minimum of 36 units
- Each Special Major must have a minimum of 6 units in each of the key areas of the degree program
- All other University requirements for a Bachelor's degree, such as State Code, General Education, upper division minimum requirements, etc. must be met.
- At least two-thirds of the upper division units must be taken in residence at California State University, Sacramento

Program Requirements

Special Major

A minimum of 120 units are required for the Bachelor of Arts or Bachelor of Science Special Major. No more than 6 units may be in Independent Study (199 or similar courses) and Fieldwork (195 or similar courses).

The unit requirements for the major are:

- BA: no less than 24 units with at least 12 upper division units
- BS: no less than 36 units with at least 18 upper division units

In all cases at least two thirds of the upper division units must be taken in residence, i.e., at Sacramento State.

Special Minor

Total units required for the Special Minor: 18, including a minimum of 12 upper division units in the field of specialization.

Programs:

Athletics (p. 1065)

Athletics

President's Office

Program Description

The program of intercollegiate athletics is organized and conducted as an integral part of the total educational program of the University. Academic excellence and athletic accomplishments go hand in hand at Sacramento State. There are three separate and unique missions in this program: to contribute to the educational objectives of the University; to provide a healthy, competitive athletic experience to individual student-athletes; to serve as a public relations vehicle within the community.

The Department of Intercollegiate Athletics offers both academic courses and an intercollegiate athletics program. Academic courses offer the opportunity for individuals to gain knowledge and understanding in a particular area of expertise related to intercollegiate athletics.

Sacramento State has made a strong commitment to the achievement of national excellence at the NCAA Division I level. It also is committed to maintaining an equitable program between men and women.

Special Features

- Most of Sacramento State's sports are affiliated with the Big Sky Conference.
- Baseball is a member of the Western Athletic Conference
- Men's Soccer and Beach Volleyball are members of the Big West Conference.
- Gymnastics is a member of the Mountain Pacific Sports Federation.
- Rowing is a member of the American Athletic Conference.
- The Student-Athlete Resource Center (SARC) (Lassen Hall 3002) offers a counseling system for student-athletes, designed specifically by the Department of Intercollegiate Athletics and Student Affairs to ensure academic development.

Student-Athlete Special Action Review Committee

The Student-Athlete Special Action (SASA) Committee will be convened at the request of the Athletic Admissions & Initial Eligibility Coordinator. The SASA Committee's purpose is to review, on a case-by-case basis at the request of the Athletic Admissions & Initial Eligibility Coordinator, prospective student-athlete applicants to California State University, Sacramento who do not meet University admission standards and/or NCAA eligibility requirements. The SASA Committee will consider and provide recommendations to the Director of Admissions on whether an applicant should be granted special admission to the University.

The primary information to be reviewed will be the applicant's overall academic performance as demonstrated by grade point average, SAT/ACT scores, and/or complete college coursework. Additional educational evidence may also be considered (e.g., at-risk issues, family background, and learning disability).

The SASA Committee will be comprised of the following individuals and should include at least four voting representatives (five preferred) present at any requested meeting.

1. NCAA Faculty Athletic Representative
2. Director of the Academic Advising Center (or their designee)
3. Representative from the Student-Athlete Resource Center (SARC)
4. Associate Athletic Director (e.g. Senior Woman Administrator or Associate Athletic Director)
5. Faculty member of the Intercollegiate Athletics Advisory Committee (IAAC)
6. Campus staff/faculty/administrator (outside of Athletics and/or SARC) and may include a representative from International Programs and Global Education (IPGE) if the prospective student-athlete is an international student.

Other staff may attend a SASA Review Committee meeting to provide background or serve as support to the committee based on their relationship to the particular case. Example: head coach, admissions representative, SARC Director, International Programs and Global Education representative, etc.

The following process will be used in the review of each case:

1. If a prospective student-athlete does not meet University admission standards, is denied admission, or denied an admissions appeal to the University because he or she has demonstrated a lack of academic preparedness to succeed in college, the coach may request that the Athletic Admissions & Initial Eligibility Coordinator schedule a meeting with the SASA Committee to review the admission status of the prospective student-athlete and determine whether the granting of a special admission is warranted. This request may also come from the Undergraduate Admissions Committee or a member of the Office of Global Education depending on the specific student and situation.
2. The prospective student-athlete, coach and/or athletic director are encouraged to forward or present any relevant information to the SASA Committee for its review and consideration. This can include the prospective student-athlete being present during the meeting to answer questions and present any background information they believe is important in considering their application.
3. The admission decision recommended by the SASA Committee for each applicant will be forwarded in writing to the Director of Admission via the Athletic Admissions & Initial Eligibility Coordinator and should include any stipulations or expectations that relate to the student-athlete's admissions recommendation.
4. The Director of Admissions will communicate in writing the final admissions decision(s) on each applicant to the respective head coach, the athletics director and the Athletic Admissions & Initial Eligibility Coordinator.
5. If any stipulations or expectations of the admissions decision(s) are recommended and accepted by the Director of Admissions, a written memorandum of understanding for the approved applicant(s) will be produced by the Athletic Admissions & Initial Eligibility Coordinator and signed by the head coach, student-athlete, and athletic director.

ATIC 88. Women's Cross Country. 2 Units

Prerequisite(s): Intercollegiate Student Athletes only

Term Typically Offered: Fall, Spring

Practice begins mid-August and the season ends in mid-November.

Credit/No Credit

ATIC 89. Women's Track and Field. 2 Units

Prerequisite(s): Intercollegiate Student Athletes only

Term Typically Offered: Fall, Spring

Indoor Track and Field practice begins in the fall. The competitive season is in the Winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May.

Credit/No Credit

ATIC 167. Coaching of Football. 3 Units

Term Typically Offered: Fall, Spring

Examines all phases of the game, including offense, defense and special teams. Other topics covered are public/media relations, budget management, academic rules, marketing strategies, officiating, equipment and many other aspects. Lecture two hours, activity two hours.

ATIC 175. Sports Information Fieldwork. 1 - 3 Units

Prerequisite(s): JOUR 123 or instructor permission.

Term Typically Offered: Fall, Spring

Directed observations and work experience with intercollegiate athletics sports information support services. Field work is offered to give students orientation in the profession of sports information services. Supervision is provided by the instructional staff of the university. Each student is required to maintain a record of activities and assignments and to prepare periodic reports.

Note: May be repeated once for credit.

Credit/No Credit

ATIC 195. Field Experience in Intercollegiate Athletics. 1 - 3 Units

Term Typically Offered: Fall, Spring

Directed experience in athletics. Student interns keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports.

Note: Registration requires prior approval of Director of Athletics.

Credit/No Credit

ATIC 199. Directed Individual Study. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual research, project or directed reading.

Note: Registration requires approval of the faculty under whom the individual work is to be conducted and the Director of Athletics.

Credit/No Credit

APPENDICES

Appendix A: Determination of Residency for Tuition Purposes

University requirements for establishing residency for tuition purposes are independent from requirements for establishing residency for other purposes, such as for tax purposes, or other state or institutional residency. These regulations were promulgated not to determine whether a student is a resident or nonresident of California, but rather to determine whether a student qualifies to pay university fees at the in-state or out-of-state rate. A resident for tuition purposes is someone who meets the requirements set forth in the Uniform Student Residency Requirements. These laws governing residency for tuition purposes at the California State University are California Education Code sections 68000-68086, 68120-68133, and 89705-89707.5, and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41900- 41915. This material can be viewed by accessing the California State University's website at www.calstate.edu/residency (<http://www.calstate.edu/residency>)

Each campus's Admissions Office is responsible for determining the residency status of that campus's new and returning students based, as applicable, on the student's Application for Admission, Residency Questionnaire, Reclassification Request Form and, as necessary, other information the student furnishes. A student who fails to provide sufficient information to establish resident status will be classified a nonresident.

Generally, establishing California residency for tuition purposes requires a combination of physical presence and intent to remain indefinitely in the State of California. An adult who, at least 366 days prior to the residency determination date for the term in which resident status is sought, can demonstrate that both physical presence in the state combined with evidence of intent to remain in California indefinitely, may establish California residency for tuition purposes. A student under the age of 19 by the residency determination date derives residency from the parent(s) with whom he/she resides or most recently resided.

Evidence demonstrating intent to remain in the State of California indefinitely may vary from case to case, but will include, and is not necessarily limited to, the absence of residential ties to any other state, California voter registration and history of actually voting in California elections, maintaining California vehicle registration and driver's license, maintaining active California bank accounts, filing California income tax returns and listing a California address on federal tax returns, owning residential property or occupying or renting a residence where permanent belongings are kept, maintaining active memberships in California professional or social organizations, and maintaining a permanent military address and home of record in California.

A nonresident student seeking reclassification is required to complete a Residency Questionnaire that includes questions concerning his/her financial independence. Financial independence is required, in addition to physical presence and intent to remain in California indefinitely, for reclassification eligibility. Financial independence is established if in the calendar year the reclassification application is made – and in any of the three calendar years preceding the reclassification application – the student:

- has not and will not be claimed as an exemption for state and federal tax purposes by his/her parent(s);

- has not and will not receive more than (\$750 per year in financial assistance from his/her parent(s); and
- has not lived and will not live longer than six weeks in the home of his/her parent(s).

A nonresident student who has been appointed as a graduate student teaching assistant, a graduate student research assistant, or a graduate student teaching associate on any CSU campus and is employed on a 0.49 or more time basis is exempt from the financial independence requirement.

Non-citizens establish residency in the same manner as citizens, unless precluded by the Immigration and Nationality Act from establishing domicile in the United States.

Exceptions to the general residency requirements are contained in California Education Code sections 68070-68086 and California Code of Regulations, Title 5, Subchapter 5, Article 4, sections 41906- 41906.6, 41910. Whether an exception applies to a particular student can only be determined after the submission of an application for admission and, as necessary, additional supporting documentation. Because neither the campus nor the Chancellor's Office staff may give legal advice, applicants are strongly urged to review the material for themselves and consult with a legal advisor.

Residency determination dates are set each term. They are:

Quarter Term Campuses

Fall	September 20
Winter	January 5
Spring	April 1
Summer	July 1

Semester Term Campuses

Fall	September 20
Winter ¹	January 5
Spring	January 25
Summer	June 1

¹ Applies only to winter term at CSU Stanislaus

CalState TEACH operates on a trimester system. The residency determination dates for CalState TEACH are as follows:

Fall	September 20
Spring	January 5
Summer	June 1

Students classified as nonresidents may appeal a final campus decision within 30 days of notification by the campus. Information on the appeal process may be found online (<http://www.calstate.edu/sas/residency/appeals.shtml>). A campus residency classification appeal must be submitted via the InfoReady online Residence Appeal Form to the California State University Chancellor's Office (<http://calstate.infoready4.com/#competitionDetail/1760156>).

Appeals via email, fax, and U.S. mail will NOT be accepted. A student with a documented disability that prohibits the student from submitting an appeal through the InfoReady site should contact Student Academic Services:

The California State University

Attn: Student Academic Services
 401 Golden Shore, 6th Floor
 Long Beach, California 90802-4210
 Email: residencyappeals@calstate.edu

The Chancellor's Office can either decide the appeal or send the matter back to the campus for further review.

A student incorrectly classified as a resident or incorrectly granted an exception from nonresident tuition is subject to reclassification as a nonresident or withdrawal of the exception and subject to payment of nonresident tuition in arrears. If incorrect classification results from false or concealed facts, the student may also be subject to discipline pursuant to Section 41301 of Title 5 of the California Code of Regulations. A student previously classified as a resident or previously granted an exception is required to immediately notify the Admissions Office if the student has reason to believe that the student no longer qualifies as a resident or no longer meets the criteria for an exception.

Changes may have been made in the rate of nonresident tuition and in the statutes and regulations governing residency for tuition purposes in California between the time this information is published and the relevant residency determination date. Students are urged to review the statutes and regulations stated above.

Appendix B: Student Conduct

Title 5, California Code of Regulations, § 41301 Standards for Student Conduct.

Campus Community Values

The university is committed to maintaining a safe and healthy living and learning environment for students, faculty, and staff. Each member of the campus community should choose behaviors that contribute toward this end. Students are expected to be good citizens and to engage in responsible behaviors that reflect well upon their university, to be civil to one another and to others in the campus community, and contribute positively to student and university life.

Grounds for Student Discipline

Student behavior that is not consistent with the Student Conduct Code is addressed through an educational process that is designed to promote safety and good citizenship and, when necessary, impose appropriate consequences. The following are the grounds upon which student discipline can be based:

1. Dishonesty, including:
 - a. Cheating, plagiarism, or other forms of academic dishonesty that are intended to gain unfair academic advantage.
 - b. Furnishing false information to a University official, faculty member, or campus office.
 - c. Forgery, alteration, or misuse of a University document, key, or identification instrument.
 - d. Misrepresenting one's self to be an authorized agent of the University or one of its auxiliaries.
2. Unauthorized entry into, presence in, use of, or misuse of university property.
3. Willful, material and substantial disruption or obstruction of a university-related activity, or any on-campus activity.
4. Participating in an activity that substantially and materially disrupts the normal operations of the university, or infringes on the rights of members of the university community.
5. Willful, material, and substantial obstruction of the free flow of pedestrian or other traffic, on or leading to campus property or an off-campus university related activity.
6. Disorderly, lewd, indecent, or obscene behavior at a university related activity, or directed toward a member of the university community.
7. Conduct that threatens or endangers the health or safety of any person within or related to the university community, including physical abuse, threats, intimidation, harassment, or sexual misconduct.
8. Hazing or conspiracy to haze. Hazing is defined as any method of initiation or pre-initiation into a student organization or student body, whether or not the organization or body is officially recognized by an educational institution, which is likely to cause serious bodily injury to any former, current, or prospective student of any school, community college, college, university or other educational institution in this state (Penal Code 245.6), and in addition, any act likely to cause physical harm, personal degradation or disgrace resulting in physical or mental harm, to any former, current, or prospective student of any school, community college, college, university or other educational institution. The term "hazing" does not include customary athletic events or school sanctioned events. Neither the express or implied consent of a victim of hazing, nor the lack of active participation in a particular hazing incident is a defense. Apathy or acquiescence in the presence of hazing is not a neutral act, and is also a violation of this section.
9. Use, possession, manufacture, or distribution of illegal drugs or drug-related paraphernalia, (except as expressly permitted by law and university regulations) or the misuse of legal pharmaceutical drugs.
10. Use, possession, manufacture, or distribution of alcoholic beverages (except as expressly permitted by law and university regulations), or public intoxication while on campus or at a university related activity.
11. Theft of property or services from the university community, or misappropriation of university resources.
12. Unauthorized destruction, or damage to university property or other property in the university community.
13. Possession or misuse of firearms or guns, replicas, ammunition, explosives, fireworks, knives, other weapons, or dangerous chemicals (without the prior authorization of the campus president) on campus or at a university related activity.
14. Unauthorized recording, dissemination, or publication of academic presentations (including handwritten notes) for a commercial purpose.
15. Misuse of computer facilities or resources, including:
 - a. Unauthorized entry into a file, for any purpose.
 - b. Unauthorized transfer of a file.
 - c. Use of another's identification or password.
 - d. Use of computing facilities, campus network, or other resources to interfere with the work of another member of the university community.
 - e. Use of computing facilities and resources to send obscene or intimidating and abusive messages.
 - f. Use of computing facilities and resources to interfere with normal University operations.
 - g. Use of computing facilities and resources in violation of copyright laws.
 - h. Violation of a campus computer use policy.
16. Violation of any published University policy, rule, regulation, or presidential order.

17. Failure to comply with directions of, or interference with, any University official or any public safety officer while acting in the performance of his/her duties.
18. Any act chargeable as a violation of a federal, state, or local law that poses a substantial threat to the safety or wellbeing of members of the University community, to property within the university community or poses a significant threat of disruption or interference with university operations.
19. Violation of the Student Conduct Procedures, including:
 - a. Falsification, distortion, or misrepresentation of information related to a student discipline matter.
 - b. Disruption or interference with the orderly progress of a student discipline proceeding.
 - c. Initiation of a student discipline proceeding in bad faith.
 - d. Attempting to discourage another from participating in the student discipline matter.
 - e. Attempting to influence the impartiality of any participant in a student discipline matter.
 - f. Verbal or physical harassment or intimidation of any participant in a student discipline matter.
 - g. Failure to comply with the sanction(s) imposed under a student discipline proceeding.
20. Encouraging, permitting, or assisting another to do any act that could subject him or her to discipline.

Procedures for Enforcing This Code

The Chancellor shall adopt procedures to ensure students are afforded appropriate notice and an opportunity to be heard before the university imposes any sanction for a violation of the Student Conduct Code¹.

¹ At the time of publication, such procedures are set forth in California State University Executive Order 1098 (Revised June 23, 2015), available at <http://calstate.edu/eo/EO-1098-rev-6-23-15.html>.]

Application of This Code

Sanctions for the conduct listed above can be imposed on applicants, enrolled students, students between academic terms, graduates awaiting degrees, and students who withdraw from school while a disciplinary matter is pending. Conduct that threatens the safety or security of the campus community, or substantially disrupts the functions or operation of the University is within the jurisdiction of this Article regardless of whether it occurs on or off campus. Nothing in this Code may conflict with Education Code Section 66301 that prohibits disciplinary action against students based on behavior protected by the First Amendment.

Title 5, California Code of Regulations, Section 41302. Disposition of Fees: Campus Emergency; Interim Suspension

The President of the campus may place on probation, suspend, or expel a student for one or more of the causes enumerated in Section 41301. No fees or tuition paid by or for such student for the semester, quarter, or summer session in which he or she is suspended or expelled shall be refunded. If the student is readmitted before the close of the semester, quarter, or summer session in which he or she is suspended, no additional tuition or fees shall be required of the student on account of the suspension.

During periods of campus emergency, as determined by the President of the individual campus, the President may, after consultation with the Chancellor, place into immediate effect any emergency regulations, procedures, and other measures deemed necessary or appropriate to

meet the emergency, safeguard persons and property, and maintain educational activities.

The President may immediately impose an interim suspension in all cases in which there is reasonable cause to believe that such an immediate suspension is required in order to protect lives or property and to insure the maintenance of order. A student so placed on interim suspension shall be given prompt notice of charges and the opportunity for a hearing within 10 days of the imposition of interim suspension. During the period of interim suspension, the student shall not, without prior written permission of the President or designated representative, enter any campus of the California State University other than to attend the hearing. Violation of any condition of interim suspension shall be grounds for expulsion.

Appendix C: Privacy Rights of Students in Education Records

The federal Family Educational Rights and Privacy Act of 1974 (20 U.S.C. 1232g) (FERPA) and regulations adopted thereunder (34 C.F.R. 99) set out requirements designed to protect students' privacy in their educational records maintained by the campus. The statute and regulations govern access to certain student records maintained by the campus and the release of those records. FERPA provides that the campus must give students access to most records directly related to the student, and must also provide opportunity for a hearing to challenge the records if the student claims they are inaccurate, misleading, or otherwise inappropriate. The right to a hearing under this law does not include any right to challenge the appropriateness of a grade determined by the instructor. FERPA generally requires the campus obtain a student's written consent before releasing personally identifiable data about the student. The campus has adopted a set of policies and procedures governing implementation of the statute and the regulations. Copies of these policies and procedures may be obtained at Lassen Hall 3008. Among the types of information included in the campus statement of policies and procedures is:

1. the student records maintained and the information they contain;
2. the campus official responsible for maintaining each record;
3. the location of access lists indicating persons requesting or receiving information from the record;
4. policies for reviewing and expunging records;
5. student access rights to their records;
6. procedure for challenging the content of student records; and
7. the right of the student to file a complaint with the Department of Education.

The Department of Education has established an office and review board to investigate complaints and adjudicate violations. The designated office is:

Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, D.C. 20202-5920.

FERPA authorizes the campus to release "directory information" pertaining to students. "Directory information" may include the student's name, address, telephone listing, electronic mail address, photograph, date and place of birth, major field of study, participation in officially recognized activities and sports, weight and height of members of athletic teams, dates of attendance, grade level, enrollment status,

degrees, honors, and awards received, and the most recent previous educational agency or institution the student attended. The campus may release the "directory information" at any time unless the campus has received prior written objection from the student specifying the information the student requests not be released. Written objections should be sent to the Office of the University Registrar (Lassen Hall 2000).

The campus is authorized to provide access to student records to campus officials and employees who have legitimate educational interests in such access. These persons have responsibilities in the campus's academic, administrative or service functions and have reason for accessing student records associated with their campus or other related academic responsibilities. Student records will be disclosed to the CSU Chancellor's Office to conduct research, to analyze trends, or to provide other administrative services. Student records may also be disclosed to other persons or organizations under certain conditions (e.g., as part of the accreditation or program evaluation; in response to a court order or subpoena; in connection with financial aid; or to other institutions to which the student is transferring).

All student records of the California State University, including California State University, Sacramento, are kept in accordance with the provisions of the FERPA, as amended.

FERPA affords students certain rights with respect to their education records. These rights include:

1. The right to inspect and review the student's education records within 45 days of the day the University receives a request for access. Students should submit to the registrar, dean, head of the academic department, or other appropriate official, written requests that identify the record(s) they wish to inspect. The University official will make arrangements for access and notify the student of the time and place where the records may be inspected. If the records are not maintained by the University official to whom the request was submitted, that official shall advise the student of the correct official to whom request should be addressed.
2. The right to request the amendment of the student's education records that the student believes are inaccurate or misleading. Students may ask the University to amend a record that they believe is inaccurate or misleading. They should write the University official responsible for the record, clearly identify the part of the record they want changed, and specify why it is inaccurate or misleading. If the University decides not to amend the record as requested by the student, the University will notify the student of the decision and advise information regarding the hearing procedures will be provided to the student when notified of the right to a hearing.
3. The right to consent to disclosures of personally identifiable information contained in the student's education records and the right to withdraw consent to disclosure FERPA authorizes disclosure without consent to school officials with legitimate educational interests. A school official is a person employed by the University in an administrative, supervisory, academic, research, or support staff position (including law enforcement unit personnel and health staff); a person or company with whom the University has contracted (such as an auditor, clearinghouse, or collection agent); a person serving on the Board of Trustees; or a student serving on an official committee or assisting another school official in performing his or her tasks. A school official has a legitimate educational interest if the official needs to review an education record in order to fulfill his or her professional responsibility. In addition, the University may disclose

education records without consent upon request a) to officials of another school in which a student seeks or intends to enroll, and b) to a parent who establishes that student's status as a dependent according to Internal Revenue Code.

4. The right to file a complaint with the U.S. Department of Education concerning alleged failures by California State University, Sacramento to comply with the requirements of FERPA. The name and address of the office that administers FERPA is
Family Policy Compliance Office
U.S. Department of Education
400 Maryland Avenue, SW
Washington, DC 20202-4605
5. California State University, Sacramento shall exercise its prerogative within the Family Educational Rights and Privacy Act, as amended, and release directory information to any person, party, or agency, so long as the student has not requested confidentiality. University directory information is defined as that information contained in an education record of the student that generally would not be considered harmful or an invasion of privacy if disclosed. The following is considered Direct Information and Sacramento State will release and make available to the public unless notified by the student to withhold release of this information: Student's name, addresses, University email address, telephone number, likenesses used in University publications including photographs, date of birth, major field of study, class level, dates of attendance, enrollment status (part/full-time), degrees earned, awards and honors (e.g., Dean's Honor List) received, participation in University recognized activities and sports, weight and health of members of athletic teams and most recent educational agency or institution attended by the student. For student employees covered by the Unit 11 Collective Bargaining Agreement with the United Auto Workers (e.g., Teaching Associates, Graduate Assistants, and Instructional Student Assistants), directory information which may be released by the CSU to the UAW also includes: enrollment status (undergraduate vs. graduate, part-time vs. full-time), department employed and employment status (e.g., TA, GA, or ISA). Data may be added to or removed from the definition of directory information from time to time. Only currently enrolled students may withhold disclosure of directory information by filing a request form with the Office of the Registrar through the Student Services Counter.

For more information about FERPA, please go to the University Registrar's website (<http://www.csus.edu/registrar/Confidentiality%20FERPA>).

Appendix D: Average Support Cost & Source of Funds Per Full-Time Equivalent Student

The total support cost per full-time equivalent student (FTES) includes the expenditures for current operations, including payments made to students in the form of financial aid, and all fully reimbursed programs contained in state appropriations. The average support cost is determined by dividing the total cost by the number of FTES. The total CSU 2018/19 budget amounts were \$3,627,143,000 from state General Fund (GF) appropriations and before adding \$22.5 million CalPERS retirement adjustment, \$2,479,020,000 from gross tuition revenue, and \$639,084,000 from other fee revenues for a total of \$6,745,247,000. The 2018/19 resident FTES target is 364,131 and the nonresident FTES based on past-year actual is 24,416 for a total of 388,547 FTES. The GF appropriation is applicable to resident students only whereas fee

revenues are collected from resident and nonresident students. FTES is determined by dividing the total academic student load (e.g. 15 units per semester) (the figure used here to define a full-time student's academic load).

2018/19	Amount	Average Cost Per FTE Student	Percentage
State Appropriation (GF) ¹	3,627,143,000	9,961	55.4%
Net Gross Tuition Revenue ²	2,479,020,000	6,380	35.5%
Other Fees Revenue ²	639,084,000	1,645	9.1%
Total Support Cost	6,745,247,000	17,986	100%

¹ Represents state GF appropriation in the Budget Act of 2018/19; GF is divisible by resident students only (364,131 FTES).

² Represents CSU Operating Fund, gross tuition and other fees revenue amounts submitted in campus August 2018/19 final budgets. Revenues are divisible by resident and nonresident students (388,547 FTES).

The average CSU 2018/19 academic year, resident, undergraduate student basic tuition and other mandatory fees required to apply to, enroll in, or attend the university is \$7,303 (\$5,742 tuition fee plus \$1,561 average campus-based fees). However, the costs paid by individual students will vary depending on campus, program, and whether a student is part-time, full-time, resident, or nonresident.

Appendix E: Procedure for the Establishment or Abolishment of Campus-Based Mandatory Fees

The law governing the California State University provides that specific campus fees defined as mandatory, such as a *student association fee* and a *student center fee*, may be established. A *student association fee* must be established upon a favorable vote of two-thirds of the students voting in an election held for this purpose (Education Code, Section 89300). The campus President may adjust the *student association fee* only after the fee adjustment has been approved by a majority of students voting in a referendum established for that purpose. The required fee shall be subject to referendum at any time upon the presentation of a petition to the campus President containing the signatures of 10 percent of the regularly enrolled students at the university. *Student association fees* support a variety of cultural and recreational programs, childcare centers, and special student support programs. A *student center fee* may be established only after a fee referendum is held which approves by a two-thirds favorable vote the establishment of the fee (Education Code, Section 89304). Once bonds are issued, authority to set and adjust *student center fees* is governed by provisions of the State University Revenue Bond Act of 1947, including, but not limited to, Education Code sections 90012, 90027, and 90068.

The process to establish and adjust other campus-based mandatory fees requires consideration by the campus fee advisory committee and a student referendum as established by Executive Order 1102, Section III. The campus President may use alternate consultation mechanisms if he/she determines that a referendum is not the best mechanism to achieve appropriate and meaningful consultation. Results of the

referendum and the fee committee review are advisory to the campus President. The President may adjust campus-based mandatory fees but must request the Chancellor to establish a new mandatory fee. The President shall provide to the campus fee advisory committee a report of all campus-based mandatory fees. The campus shall report annually to the Chancellor a complete inventory of all campus-based mandatory fees.

For more information or questions, please contact the Budget Office in the CSU Chancellor's Office at (562) 951-4560.

Appendix F: Nondiscrimination Policy and Complaint Procedures

Protected Status: Genetic Information, Marital Status, Medical Condition, Nationality, Race or Ethnicity (including color or ancestry), Religion or Religious Creed, and Veteran or Military Status.

The California State University does not discriminate on the basis of age, genetic information, marital status, medical condition, nationality, race or ethnicity (including color and ancestry), religion (or religious creed), and veteran or military status - as these terms are defined in CSU Executive Order 1097 - in its programs and activities, including admission and access. Federal and state laws, including Title VI of the Civil Rights Act of 1964 and the California Equity in Higher Education Act, prohibit such discrimination. The Office for Equal Opportunity has been designated to coordinate the efforts of California State University, Sacramento to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to William "Skip" Bishop, Director of Equal Opportunity, at California State University, Sacramento 6000 J Street, Sacramento, CA 95819-6032, (916) 278-5770. CSU Executive Order 1097 Revised October 5, 2016 (<http://www.calstate.edu/eo/EO-1097-rev-10-5-16>) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation **made by students** against the CSU, a CSU employee, other CSU students or a third party.

Protected Status: Disability

The California State University does not discriminate on the basis of disability (physical and mental) - as this term is defined in CSU Executive Order 1097 - in its programs and activities, including admission and access. Federal and state laws, including sections 504 and 508 of the Rehabilitation Act of 1973 and the Americans with Disabilities Act of 1990, prohibit such discrimination. The Office for Equal Opportunity has been designated to coordinate the efforts of California State University, Sacramento to comply with all applicable federal and state laws prohibiting discrimination on the basis of disability. Inquiries concerning compliance may be presented to William "Skip" Bishop, Director of Equal Opportunity, at California State University, Sacramento 6000 J Street, Sacramento, CA 95819-6032, (916) 278-5770. CSU Executive Order 1097 Revised October 5, 2016 (<http://www.calstate.edu/eo/EO-1097-rev-10-5-16.html>) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation **made by students** against the CSU, a CSU employee, other CSU students or a third party.

Protected Status: Gender (or sex), Gender Identity (including transgender), Gender Expression and Sexual Orientation

The California State University does not discriminate on the basis of gender (or sex), gender identity (including transgender), gender expression or sexual orientation - as these terms are defined in CSU

policy - in its programs and activities, including admission and access. Federal and state laws, including Title IX of the Education Amendments of 1972, prohibit such discrimination. William "Skip" Bishop, the Director of Equal Opportunity, has been designated to coordinate the efforts of California State University, Sacramento to comply with all applicable federal and state laws prohibiting discrimination on these bases. Inquiries concerning compliance may be presented to the Office for Equal Opportunity at (916) 278-5770, equalopportunity@csus.edu, or visit our website at www.csus.edu/hr/departments/equal-opportunity/ (<http://www.csus.edu/hr/departments/equal-opportunity/>). The California State University is committed to providing equal opportunities to all CSU students in all campus programs, including intercollegiate athletics. CSU Executive Order 1097 Revised October 5, 2016 (<http://www.calstate.edu/eo/eo-1097-rev-10-5-16.html>) (or any successor executive order) is the systemwide procedure for all complaints of discrimination, harassment or retaliation **made by students** against the CSU, a CSU employee, other CSU students or a third party.

As a matter of federal and state law and California State University policy, the following types of conduct are prohibited:

Sex Discrimination or Gender Discrimination means an adverse action taken against a student by the CSU, a CSU employee, or another student because of gender or sex (including sexual harassment, sexual misconduct, domestic violence, dating violence, and stalking).

Sexual Harassment, a form of sex discrimination, is unwelcome verbal, nonverbal or physical conduct of a sexual nature that includes, but is not limited, to sexual advances, requests for sexual favors, and any other conduct of a sexual nature where:

1. Submission to, or rejection of, the conduct is explicitly or implicitly used as the basis for any decision affecting a complainant's status or progress, or access to benefits and services, honors, programs, or activities available at or through the university; **or**
2. The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the complainant, and is in fact considered by the complainant, as limiting his or her ability to participate in or benefit from the services, activities or opportunities offered by the university; **or**
3. The conduct is sufficiently severe, persistent or pervasive that its effect, whether or not intended, could be considered by a reasonable person in the shoes of the complainant, and is in fact considered by the complainant, as creating an intimidating, hostile or offensive environment.

Sexual harassment could include being forced to engage in unwanted sexual contact as a condition of membership in a student organization; being subjected to video exploitation or a campaign of sexually explicit graffiti; or frequently being exposed to unwanted images of a sexual nature in a classroom that are unrelated to the coursework.

Sexual harassment also includes acts of verbal, non-verbal or physical aggression, intimidation or hostility based on gender or sex-stereotyping, even if those acts do not involve conduct of a sexual nature.

Executive Order 1097 covers unwelcome conduct of a sexual nature. While romantic, sexual, intimate, personal or social relationships between members of the university community may begin as consensual, they may evolve into situations that lead to sexual harassment or sexual misconduct, including dating or domestic violence, or stalking, subject to this policy.

Claiming that the conduct was not motivated by sexual desire is not a defense to a complaint of harassment based on gender.

Sexual Misconduct: All sexual activity between members of the university community must be based on affirmative consent. Engaging in any sexual activity without first obtaining affirmative consent to the specific activity is sexual misconduct, whether or not the conduct violates any civil or criminal law. Sexual activity includes, but is not limited to, kissing, touching intimate body parts, fondling, intercourse, penetration of any body part, and oral sex. It also includes any unwelcome physical acts, such as unwelcome sexual touching, sexual assault, sexual battery, rape, and dating violence. When based on gender, domestic violence or stalking also constitutes sexual misconduct. Sexual misconduct may include using physical force, violence, threat or intimidation, ignoring the objections of the other person, causing the other person's intoxication or incapacitation through the use of drugs or alcohol, or taking advantage of the other person's incapacitation (including voluntary intoxication) to engage in sexual activity. Men as well as women can be victims of these forms of sexual misconduct. Sexual activity with a minor is never consensual when the complainant is under 18 years old, because the minor is considered incapable of giving legal consent due to age.

Sexual Assault is a form of sexual misconduct and is an attempt, coupled with the ability, to commit a violent injury on the person of another because of that person's gender or sex.

Sexual Battery is a form of sexual misconduct and is any willful and unlawful use of force or violence upon the person of another because of that person's gender or sex as well as touching an intimate part of another person against that person's will and for the purpose of sexual arousal, gratification or abuse.

Rape is a form of sexual misconduct and is non-consensual sexual intercourse that may also involve the use of threat of force, violence, or immediate and unlawful bodily injury or threats of future retaliation and duress. Any sexual penetration, however slight, is sufficient to constitute rape. Sexual acts including intercourse are considered non-consensual when a person is incapable of giving consent because s/he is incapacitated from alcohol and/or drugs, is under 18 years old, or if a mental disorder or developmental or physical disability renders the person incapable of giving consent. The respondent's relationship to the person (such as family member, spouse, friend, acquaintance or stranger) is irrelevant.

Acquaintance Rape is a form of sexual misconduct committed by an individual known to the victim. This includes a person the victim may have just met; i.e., at a party, introduced through a friend, or on a social networking website.

Affirmative Consent means an informed, affirmative, conscious, voluntary, and mutual agreement to engage in sexual activity. It is the responsibility of each person involved in the sexual activity to ensure that s/he has the affirmative consent of the other participant(s) to engage in the sexual activity. Lack of protest or resistance does not mean consent nor does silence mean consent. Affirmative consent must be voluntary, and given without coercion, force, threats or intimidation.

- The existence of a dating or social relationship between those involved, or the fact of past sexual activities between them, should never by itself be assumed to be an indicator of affirmative consent. A request for someone to use a condom or birth control does not, in and of itself, constitute affirmative consent.

- Affirmative consent can be withdrawn or revoked. Consent to one form of sexual activity (or sexual act) does not constitute consent to other forms of sexual activity. Consent given to sexual activity on one occasion does not constitute consent on another occasion. There must always be mutual and affirmative consent to engage in sexual activity. Consent must be ongoing throughout a sexual activity and can be revoked at any time, including after penetration. Once consent is withdrawn or revoked, the sexual activity must stop immediately.
- A person who is incapacitated cannot give affirmative consent. A person is unable to consent when s/he is asleep, unconscious or is incapacitated due to the influence of drugs, alcohol, or medication so that s/he could not understand the fact, nature or extent of the sexual activity. A person is incapacitated if s/he lacks the physical and/ or mental ability to make informed, rational decisions. Whether an intoxicated person (as a result of using alcohol or other drugs) is incapacitated depends on the extent to which the alcohol or other drugs impact the person's decision making capacity, awareness of consequences, and ability to make fully informed judgments. A person's own intoxication or incapacitation from drugs or alcohol does not diminish that person's responsibility to obtain affirmative consent before engaging in sexual activity.
- A person with a medical or mental disability may also lack the capacity to give consent.
- Sexual activity with a minor (a person under 18 years old) is not consensual, because a minor is considered incapable of giving legal consent due to age.
- It shall not be a valid excuse that a person affirmatively consented to the sexual activity if the respondent knew or reasonably should have known that the person was unable to consent to the sexual activity under any of the following circumstances:
 - The person was asleep or unconscious;
 - The person was incapacitated due to the influence of drugs, alcohol or medication, so that the person could not understand the fact, nature or extent of the sexual activity;
 - The person was unable to communicate due to a mental or physical condition.
- It shall not be a valid excuse that the respondent believed that the person consented to the sexual activity under either of the following circumstances:
 - The respondent's belief in affirmative consent arose from the intoxication or recklessness of the respondent;
 - The respondent did not take reasonable steps, in the circumstances known to the respondent at the time, to ascertain whether the person affirmatively consented.

Consensual Relationships: Consensual relationship means a sexual or romantic relationship between two persons who voluntarily enter into such a relationship. While sexual and/or romantic relationships between members of the university community may begin as consensual, they may evolve into situations that lead to discrimination, harassment, retaliation, sexual misconduct, dating or domestic violence, or stalking.

- A University employee shall not enter into a consensual relationship with a student or employee over whom that employee exercises direct or otherwise significant academic, administrative, supervisory, evaluative, counseling, or extracurricular authority. In the event such a relationship already exists, each campus shall develop a procedure to reassess such authority to avoid violations of policy.
- This prohibition does not limit the right of an employee to make a recommendation on the personnel matters concerning a family or household member where the right to make recommendations on

such personnel matters is explicitly provided for in the applicable collective bargaining agreement or MPP/confidential personnel plan.

Domestic Violence is abuse committed against someone who is a current or former spouse, current or former cohabitant, someone with whom the abuser has a child, someone with whom the abuser has or had a dating or engagement relationship, or a person similarly situated under California domestic or family violence law. Cohabitant means two unrelated persons living together for a substantial period of time, resulting in some permanency of relationship. It does not include roommates who do not have a romantic, intimate, or sexual relationship. Factors that may determine whether persons are cohabiting include, but are not limited to (1) sexual relations between the parties while sharing the same living quarters, (2) sharing of income or expenses, (3) joint use or ownership of property, (4) whether the parties hold themselves out as spouses, (5) the continuity of the relationship, and (6) the length of the relationship. For purposes of this definition, "abuse" means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

Dating Violence is abuse committed by a person who is or has been in a social or dating relationship of a romantic or intimate nature with the victim. This may include someone the victim just met; i.e., at a party, introduced through a friend, or on a social networking website. For purposes of this definition, "abuse" means intentionally or recklessly causing or attempting to cause bodily injury or placing another person in reasonable apprehension of imminent serious bodily injury to himself or herself, or another. Abuse does not include non-physical, emotional distress or injury.

Stalking means a repeated course of conduct directed at a specific person that would cause a reasonable person to fear for his/her or others' safety or to suffer substantial emotional distress. For purposes of this definition:

- Course of conduct means two or more acts, including but not limited to, acts in which the stalker directly, indirectly, or through third parties, by any action, method, device, or means, follows, monitors, observes, surveys, threatens, or communicates to or about a person, or interferes with a person's property;
- Reasonable person means a reasonable person under similar circumstances and with the same protected status as the complainant;
- Substantial emotional distress means significant mental suffering or anguish that may, but does not necessarily, require medical or other professional treatment or counseling.

For further information see California State University, Sacramento's Notice of Nondiscrimination on the Basis of Sex, Myths and Facts about Sexual Violence, and Rights and Options for Victims of Sexual Violence, Dating Violence, Domestic Violence, and Stalking at <http://www.csus.edu/titleix/>

Who to Contact If You Have Complaints, Questions or Concerns

Title IX requires the university to designate a Title IX Coordinator to monitor and oversee overall Title IX compliance. The campus Title IX Coordinator is available to explain and discuss your right to file a criminal complaint (for example, in cases of sexual violence); the university's complaint process, including the investigation process; how

confidentiality is handled; available resources, both on and off campus; and other related matters. **If you are in the midst of an emergency, please call the police immediately by dialing 9-1-1.**

Campus Title IX Coordinator:

William "Skip" Bishop
Director for Equal Opportunity
William.bishop@csus.edu
(916) 278-5770
Monday–Friday, 8:00 am–5:00 pm

Deputy Title IX Coordinators:

Alison Nygard
Office for Equal Opportunity Investigator
alison.morgan@csus.edu
916-278-5770
Monday–Friday, 8:00 am–5:00 pm

Stephanie Cruz
Office for Equal Opportunity Investigator
stephanie.cruz@csus.edu
916-278-5770
Monday–Friday, 8:00 am–5:00 pm

Lois Mattice
Associate Director of Athletics/SWA
Athletic Center 2140
lmattice@csus.edu
916-278-7548
Monday – Friday, 8:00 am – 5:00 pm

Tom Carroll
Interim Director of Student Conduct
Lassen Hall 3008
tcarroll@csus.edu
916-278-6060
Monday – Friday, 8:00 am – 5:00 pm

Aja Holmes
Senior Associate Director, Residential Life
Sierra Hall
aja.holmes@csus.edu
916-278-6655
Monday – Friday, 8:00 am – 5:00 pm

University Police:

Mark Iwasa
6000 J Street Sacramento CA 95819-6029
police@csus.edu
911 (emergencies only)
(916) 278-6800

University Police Service Center:

University Union
916-278-2788
Hours: Monday–Friday 8:30 a.m.–Noon and 1:00–4:30 p.m.

Local Police:

Sacramento Police Department
5770 Freeport Boulevard, Suite 100
Sacramento, CA 95822

Non-emergency: 916-264-5471
Emergency: 9-1-1

U.S. Department of Education, Office for Civil Rights:

(800) 421-3481 (main office), or (415) 486-5555 (California office), or (800) 877-8339 (TDD) or ocr@ed.gov (main office) or ocr.sanfrancisco@ed.gov (California office)

If you wish to fill out a complaint form online with the OCR, you may do so at:
<http://www2.ed.gov/about/offices/list/ocr/complaintintro.html>.

If you wish to fill out a complaint form online with the OCR, you may do so at: www2.ed.gov/about/offices/list/ocr/complaintintro.html (<http://www2.ed.gov/about/offices/list/ocr/complaintintro.html>).

Title IX requires the university to adopt and publish complaint procedures that provide for prompt and equitable resolution of gender discrimination complaints, including sexual harassment and misconduct, as well as provide training, education and preventive measures related to sex discrimination. CSU Executive Order 1097 (www.calstate.edu/eo/EO-1097-rev-10-5-16.html) (<http://www.calstate.edu/eo/EO-1097-rev-10-5-16.html>) is the systemwide procedure for all complaints of discrimination, harassment or retaliation **made by students** against the CSU, a CSU employee, other CSU students or a third party.

Duty to Report. Except as provided below under confidentiality and sexual misconduct, dating violence, domestic violence, and stalking, **any** university employee who knows or has reason to know of allegations or acts that violate university policy shall promptly inform the Title IX Coordinator. These employees are required to disclose all information including the names of the parties, **even where the person has requested that his/her name remain confidential**. The Title IX Coordinator will determine whether confidentiality is appropriate given the circumstances of each such incident (see confidential reporting options outlined below).

Regardless of whether an alleged victim of gender discrimination ultimately files a complaint, if the campus knows, or has reason to know, about possible sexual discrimination, harassment or misconduct, violence, it must review the matter to determine if an investigation is warranted. The campus must then take appropriate steps to eliminate any gender discrimination/harassment/misconduct, prevent its recurrence, and remedy its effects.

Safety of the Campus Community is Primary

The university's primary concern is the safety of its campus community members. The use of alcohol or drugs never makes the victim at fault for gender discrimination, harassment or misconduct; therefore, victims should not be deterred from reporting incidents of sexual misconduct out of a concern that they might be disciplined for related violations of drug, alcohol or other university policies. Except in extreme circumstances, victims of sexual misconduct shall not be subject to discipline for related violations of the Student Conduct Code.

Information Regarding Campus, Criminal and Civil Consequences of Committing Acts of Sexual Violence

Individuals alleged to have committed sexual misconduct may face criminal prosecution by law enforcement and may incur penalties as a result of civil litigation. In addition, employees and students may face discipline at the university, up to including suspension or expulsion. Employees may face sanctions up to and including dismissal from

employment, pursuant to established CSU policies and provisions of applicable collective bargaining unit agreements.

Students who are charged by the university with gender discrimination, harassment or misconduct will be subject to discipline, pursuant to the California State University Student Conduct Procedures (see Executive Order 1098 at www.calstate.edu/EO/EO-1098-rev-6-23-15.pdf (<http://www.calstate.edu/EO/EO-1098-rev-6-23-15.pdf>) or any successor executive order) and will be subject to appropriate sanctions. In addition, during any investigation, the university may implement interim measures in order to maintain a safe and non-discriminatory educational environment. Such measures may include, but not be limited to: immediate interim suspension from the university; a required move from university-owned or affiliated housing; adjustments to course schedule; and/or prohibition from contact with parties involved in the alleged incident.

Confidentiality and Sexual Misconduct, Dating Violence, Domestic Violence and Stalking

The University encourages victims of sexual misconduct, dating violence, domestic violence, or stalking (collectively sexual misconduct) to talk to someone about what happened – so they can get the support they need, and so the university can respond appropriately.

Privileged and Confidential Communications

Physicians, Psychotherapists, Professional Counselors, Licensed Clinical Social Workers, and Clergy – Physicians, psychotherapists, professional, licensed counselors, licensed clinical social workers, and clergy who work or volunteer on or off campus, acting solely in those roles or capacities as part of their employment, and who provide medical or mental health treatment or counseling (and those who act under their supervision, including all individuals who work or volunteer in their centers and offices) may not report any information about an incident of sexual misconduct to anyone else at the University, including the Title IX Coordinator, without the victim's consent. A victim can seek assistance and support from physicians, psychotherapists, professional, licensed counselors, licensed clinical social workers, and clergy without triggering a university investigation that could reveal the victim's identity or the fact of the victim's disclosure. However, see limited exceptions below regarding when health care practitioners must report to local law enforcement agencies. Health care practitioners should explain these limited exceptions to victims, if applicable.

Sexual Assault and Domestic Violence Counselors and Advocates – Sexual assault and domestic violence counselors and advocates who work or volunteer on or off campus in sexual assault centers, victim advocacy offices, women's centers, and health centers (including those who act in that role under their supervision, along with nonprofessional counselors or advocates who or volunteer in sexual assault centers, victim advocacy offices, women's centers, gender equity centers, or health centers) may talk to a victim without revealing any information about the victim and the incident of sexual misconduct to anyone else at the University, including the Title IX Coordinator, without the victim's consent. A victim can seek assistance and support from these counselors and advocates without triggering a university investigation that could reveal his/her identity or that a victim disclosed an incident to them. However, see limited exceptions below regarding when sexual assault and domestic violence counselors and advocates must report to local law enforcement agencies. Counselors and advocates should explain these limited exceptions to victims, if applicable.

The university will be unable to conduct an investigation into a particular incident or pursue disciplinary action against a perpetrator if a victim

chooses to (1) speak only to a physician, professional licensed counselor, licensed clinical social worker, clergy member, sexual assault counselor, domestic violence counselor or advocate; and (2) maintain complete confidentiality. Even so, these individuals will assist victims in receiving other necessary protection and support, such as victim advocacy, disability, medical/health or mental health services, or legal services, and will advise victims regarding their right to file a Title IX complaint with the University and a separate complaint with local or university police. If a victim insists on confidentiality, such professionals, counselors and advocates will likely not be able to assist the victim with: university academic support or accommodations; changes to university-based living or working schedules; or adjustments to course schedules. A victim who at first requests confidentiality may later decide to file a complaint with the university or report the incident to the police, and thus have the incident fully investigated. These counselors and advocates can provide victims with that assistance if requested by the victim. These counselors and advocates will also explain that Title IX includes protections against retaliation, and that the university will not only take steps to prevent retaliation when it knows or reasonably should know of possible retaliation, but will also take strong responsive action if it occurs.

Exceptions: Under California law, any health practitioner employed in a health facility, clinic, physician's office, or local or state public health department or clinic is required to make a report to local law enforcement if he or she provides medical services for a *physical condition* to a patient/victim who he or she knows or reasonably suspects is suffering from (1) a wound or physical injury inflicted by a firearm; or (2) any wound or other physical injury inflicted upon a victim where the injury is the result of assaultive or abusive conduct (including sexual misconduct, domestic violence, and dating violence). This exception does not apply to sexual assault and domestic violence counselors and advocates. Health care practitioners should explain this limited exception to victims, if applicable.

Additionally, under California law, *all* professionals described above (physicians, psychotherapists, professional counselors, licensed clinical social workers, clergy, and sexual assault and domestic violence counselors and advocates) are mandatory child abuse and neglect reporters, and are required to report incidents involving victims under 18 years of age to local law enforcement. These professionals will explain this limited exception to victims, if applicable.

Finally, some or all of these professionals may also have reporting obligations under California law to: (1) local law enforcement in cases involving threats of immediate or imminent harm to self or others where disclosure of the information is necessary to prevent the threatened danger; or (2) to the court if compelled by court order or subpoena in a criminal proceeding related to the sexual violence incident. If applicable, these professionals will explain this limited exception to victims.

Reporting to University or Local Police

If a victim reports to local or University Police about sexual misconduct, the police are required to notify victims that their names will become a matter of public record unless confidentiality is requested. If a victim requests that his/her identity be kept confidential, his/her name will not become a matter of public record and the police will not report the victim's identity to anyone else at the University, including the Title IX Coordinator. University Police will, however, report the facts of the incident itself to the Title IX Coordinator being sure not to reveal to the Title IX Coordinator victim names/identities or compromise their own criminal investigation. The university is required by the federal Clery

Act to report certain types of crimes (including certain sex offenses) in statistical reports. However, while the university will report the type of incident in the annual crime statistics report known as the Annual Security Report, victim names/identities will not be revealed.

Reporting to the Title IX Coordinator and Other University Employees

Most university employees have a duty to report sexual misconduct incidents when they are on notice of it. When a victim tells the Title IX Coordinator or another University employee about a sexual misconduct incident, the victim has the right to expect the University to take immediate and appropriate steps to investigate what happened and to resolve the matter promptly and equitably. In all cases, the University strongly encourages victims to report sexual misconduct directly to the campus Title IX Coordinator. As detailed above, all University employees except physicians, licensed professional counselors, licensed clinical social workers, sexual assault counselors and advocates, must report to the Title IX Coordinator all relevant details about any sexual violence incidents of which they become aware. The University will need to determine what happened – and will need to know the names of the victim(s) and the perpetrator(s), any witnesses, and any other relevant facts, including the date, time and specific location of the incident.

To the extent possible, information reported to the Title IX Coordinator or other University employees will be shared only with individuals responsible for handling the University's response to the incident. The University will protect the privacy of individuals involved in a sexual misconduct incident except as otherwise required by law or University policy. A sexual misconduct report may result in the gathering of extremely sensitive information about individuals in the campus community. While such information is considered confidential, University policy regarding access to public records and disclosure of personal information may require disclosure of certain information concerning a report of sexual misconduct. In such cases, efforts will be made to redact the records, as appropriate, in order to protect the victim's identity and privacy and the privacy of other involved individuals. Except as detailed in the section on Privileged and Confidential Communications above, no University employee, including the Title IX Coordinator, should disclose the victim's identity to the police without the victim's consent or unless the victim has also reported the incident to the police. If a victim requests of the Title IX Coordinator or another University employee that his/her identity remain completely confidential, the Title IX Coordinator will explain that the University cannot always honor that request and guarantee complete confidentiality. If a victim wishes to remain confidential or request that no investigation be conducted or disciplinary action taken, the University must weigh that request against the University's obligation to provide a safe, non-discriminatory environment for all students, employees, and third parties, including the victim. Under those circumstances, the Title IX Coordinator will determine whether the victim's request for complete confidentiality and/or no investigation can be honored under the facts and circumstances of the particular case, including whether the University has a legal obligation to report the incident, conduct an investigation or take other appropriate steps. Without information about a victim's identity, the University's ability to meaningfully investigate the incident and pursue disciplinary action against the perpetrator may be severely limited. See Executive Order 1095 for further details around confidential reporting, and other related matters (www.calstate.edu/EO/EO-1095.pdf (<http://www.calstate.edu/eo/EO-1095-rev-6-23-15.html>)).

Inquiries Concerning Compliance

Inquiries concerning compliance or the application of these laws and programs and activities of Sacramento State may be referred to the specific campus officers identified above or to the Regional Director of the Office for Civil Rights, United States Department of Education, 50 Beale Street, Suite 7200, San Francisco, California 94105.

Appendix G: University Library Policy and Procedures

(916) 278-6926

[library.csus.edu](http://www.library.csus.edu) (<http://www.library.csus.edu>)

Library Hours

For Library hours visit <http://library.csus.edu/hours/> or call (916) 278-6926.

Library Privileges

The Sacramento State OneCard serves as a library card. Students, faculty, and staff must present a valid OneCard each time an item is checked out or renewed. Library privileges are nontransferable and the OneCard may be used only by the person to whom it has been issued.

Loan Periods and Renewal Procedures

The basic loan period is 16 weeks, with automatic renewals of the same period, providing another patron has not placed a recall on the item. All items are subject to recall. All due date reminders and other notices are sent via Sac State email.

Overdue and Lost Item Fees

An item is overdue one day after the due date. Unless the item is recalled, no fees will accrue until 44 full days after the due date. After that date a bill listing a \$90.00 item replacement fee will be sent. For more

information regarding Suspensions and Fines, including information on Course Reserves, please visit: <http://library.csus.edu>

To avoid overdue fees check your account at one of the following web locations:

MyLibraryAccount: <http://library.csus.edu/mylibrary.html>

My Sac State, Library tab: <http://my.csus.edu>

Overdue Reminder, Bills, and Overdue Fee Notices

All notices are emailed to your Sac State email address. Notices include: loan receipts, borrowing activity summaries, courtesy, due date change, lost item replacement, and hold shelf notices.

Appendix H: Schedule of Tuition and Fees - 2018/19 and 2019/20

The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU reserves the right, even after tuition or fees are initially charged or initial payments are made, to increase or modify any listed tuition or fees. All listed fees, other than mandatory systemwide tuition, are subject to change without notice, until the date when instruction for a particular semester or quarter has begun. All CSU-listed tuition and fees should be regarded as estimates that are subject to change upon approval by the Board of Trustees, the chancellor or the presidents, as appropriate. Changes in mandatory systemwide tuition will be made in accordance with the requirements of the Working Families Student Fee Transparency and Accountability Act (Sections 66028 – 66028.6 of the Education Code).

The following reflects applicable systemwide tuition and fees for both semester and quarter campuses that were authorized by the Board of Trustees at the March 2017 meeting. These rates are subject to change.

All Students

Application fee (nonrefundable), payable online at the time of application via credit card, e-check or PayPal: \$55

2018-2019 Basic Tuition

Units	Per Semester	Per Quarter
Undergraduate Tuition		
6.1 or more	\$2,871	\$1,914
0 to 6.0	\$1,665	\$1,110
Credential Program Tuition		
6.1 or more	\$3,330	\$2,220
0 to 6.0	\$1,932	\$1,288
Graduate/Post Baccalaureate Tuition		
6.1 or more	\$3,588	\$2,392
0 to 6.0	\$2,082	\$1,388

2018/19 Doctorate Tuition ¹

Units	Per Semester	Per Quarter	Per Academic Year
Audiology - All Students	\$7,317		\$14,742
Education - All Students	\$5,919	\$3,946	\$11,838

Nursing Practice - \$7,635 All Students	\$15,270
Physical Therapy \$8,598 - All Students	\$17,196

¹ Applicable term tuition applies for campuses with special terms, as determined by the campus. Total college year tuition cannot exceed the academic year plus summer term tuition. The summer term tuition for the education doctorate at quarter campuses is equal to the per semester tuition listed in the table. Total tuition for the education doctorate over the college year equals the per academic year tuition plus the per semester tuition for the summer term at all CSU campuses.

2018-2019 Graduate Business Professional Fee

Charge per Unit: Semester = \$270, Quarter = \$180

The Graduate Business Professional Fee is paid on a per unit basis, in addition to basic tuition and campus fees, for the following graduate business programs:

- Master of Business Administration (M.B.A.)
- Master of Science (M.S.) programs in Accountancy
- Master of Science (M.S.) programs in Business Administration
- Master of Science (M.S.) programs in Health Care Management
- Master of Science (M.S.) programs in Business and Technology
- Master of Science (M.S.) programs in Information Systems
- Master of Science (M.S.) programs in Taxation

Nonresident Students (U.S. and Foreign)

Nonresident Tuition (in addition to basic tuition and other systemwide fees charged all students) for all campuses:

Charge Per Unit: Semester = \$396, Quarter = \$264.

The total nonresident tuition paid per term will be determined by the number of units taken.

Mandatory systemwide tuition is waived for those individuals who qualify for such exemption under the provisions of the California Education Code (see section on fee waivers).

Students are charged campus fees in addition to tuition and systemwide fees. Information on campus fees can be found by contacting the individual campus(es).

Credit Cards

Visa and MasterCard credit cards may be used for payment of student tuition and fees but may be subject to a non-refundable credit card processing fee.

Schedule of Tuition and Fees, 2019/20

The CSU makes every effort to keep student costs to a minimum. Tuition and fees listed in published schedules or student accounts may need to be increased when public funding is inadequate. Therefore, CSU reserves the right, even after initial payments are made, to increase or modify any listed tuition or fees. All listed fees, other than mandatory systemwide tuition, are subject to change without notice, until the date when instruction for a particular semester or quarter has begun. All CSU-listed tuition and fees should be regarded as **estimates** that are subject to change upon approval by the Board of Trustees, the chancellor or the presidents, as appropriate. Changes in mandatory systemwide tuition will be made in accordance with the requirements of the Working Families

Student Fee Transparency and Accountability Act (Sections 66028 – 66028.6 of the Education Code).

The following reflects applicable systemwide tuition for both semester and quarter campuses. **These rates are subject to change.**

All Students

Application fee (nonrefundable), payable online at the time of application via credit card, e-check or PayPal: \$55

2019/20 Basic Tuition

Units	Per Semester	Per Quarter
Undergraduate Tuition		
6.1 or more	\$2,871	\$1,914
0 to 6.0	\$1,665	\$1,110
Credential Program Tuition		
6.1 or more	\$3,330	\$2,220
0 to 6.0	\$1,932	\$1,288
Graduate/Post Baccalaureate Tuition		
6.1 or more	\$3,588	\$2,392
0 to 6.0	\$2,082	\$1,388

2019/20 Doctorate Tuition ¹

Units	Per Semester	Per Quarter	Per Academic Year
Audiology - All Students	\$7,371		\$14,742
Education - All Students	\$5,919	\$3,946	\$11,838
Nursing Practice - \$7,635 All Students			\$15,270
Physical Therapy \$8,598 - All Students			\$17,196

¹ Applicable term tuition applies for campuses with special terms, as determined by the campus. Total college year tuition cannot exceed the academic year plus summer term tuition. The summer term tuition for the education doctorate at quarter campuses is equal to the per semester tuition listed in the table. Total tuition for the education doctorate over the college year equals the per academic year tuition plus the per semester tuition for the summer term at all CSU campuses.

2019/20 Graduate Business Professional Fee

Charge per Unit: Semester = \$270, Quarter = \$180.

The Graduate Business Professional Fee is paid on a per unit basis in addition to basic tuition fees and campus fees for the following graduate business programs:

- Master of Business Administration (M.B.A.)
- Master of Science (M.S.) programs in Accountancy
- Master of Science (M.S.) programs in Business Administration
- Master of Science (M.S.) programs in Health Care Management
- Master of Science (M.S.) programs in Business and Technology
- Master of Science (M.S.) programs in Information Systems
- Master of Science (M.S.) programs in Taxation

Nonresident Students (U.S. and Foreign)

Nonresident Tuition (in addition to basic tuition and systemwide fees charged all students) for all campuses:

Charge Per Unit: Semester = \$396, Quarter = \$264.

The total nonresident tuition paid per term will be determined by the number of units taken.

Mandatory systemwide tuition is waived for those individuals who qualify for such exemption under the provisions of the California Education Code (see section on fee waivers).

Students are charged campus fees in addition to tuition and systemwide fees. Information on campus fees can be found by contacting the individual campus(es).

Credit Cards

Visa and MasterCard credit cards may be used for payment of student tuition and fees but may be subject to a non-refundable credit card processing fee.

Appendix I: Availability of Institutional and Financial Assistance Information

The following information concerning student financial assistance may be obtained from the Financial Aid Office, Lassen Hall 1006, (916) 278-6554:

1. A description of the federal, state, institutional, local, and private student financial assistance programs available to students who enroll at Sacramento State;
2. For each aid program, a description of procedures and forms by which students apply for assistance, student eligibility requirements, criteria for selecting recipients from the group of eligible applicants, and criteria for determining the amount of a student's award;
3. A description of the rights and responsibilities of students receiving financial assistance, including federal Title IV student assistance programs, and criteria for continued student eligibility under each program;
4. The satisfactory academic progress standards that students must maintain for the purpose of receiving financial assistance and criteria by which a student who has failed to maintain satisfactory progress may reestablish eligibility for financial assistance;
5. The method by which financial assistance disbursements will be made to students and the frequency of those disbursements;
6. The way the school provides for Pell-eligible students to obtain or purchase required books and supplies by the seventh day of a payment period and how the student may opt out;
7. The terms of any loan received as part of the student's financial aid package, a sample loan repayment schedule, and the necessity for repaying loans;
8. The general conditions and terms applicable to any employment provided as part of the student's financial aid package;
9. The terms and conditions of the loans students receive under the Direct Loan and Perkins Loan Programs;
10. The exit counseling information the school provides and collects for student borrowers; and
11. Contact information for campus offices available for disputes concerning federal, institutional and private loans.

Information concerning the cost of attending Sacramento State is available from the following and includes tuition and fees; the estimated costs of books and supplies; estimates of typical student room, board, and transportation costs; and, if requested, additional costs for specific programs.

Brian Henley, Director of Admissions & Outreach
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000
(916) 278-7766

Information concerning the refund policies of Sacramento State for the return of unearned tuition and fees or other refundable portions of institutional charges is available from:

Anita Kermes, Director of Financial Aid Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6554.

Information concerning policies regarding the return of federal Title IV student assistance funds as required by regulation is available from:

Anita Kermes, Director of Financial Aid Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6554.

Information regarding special facilities and services available to students with disabilities may be obtained from:

Mary Lee Vance, Director, Office of Services to Students with Disabilities
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6955.

Information concerning Sacramento State policies, procedures, and facilities for students and others to report criminal actions or other emergencies occurring on campus may be obtained from:

Mark Iwasa, Chief of Police
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000.

Information concerning Sacramento State annual campus security report and annual fire safety report may be obtained from:

Mark Iwasa, Chief of Police
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6000.

Information concerning the prevention of drug and alcohol abuse and rehabilitation programs may be obtained from:

Reva Wittenberg, Associate Director of Campus Wellness
California State University, Sacramento

6000 J Street
Sacramento, CA 95819-6032
(916) 278-82036.

Information regarding student retention and graduation rates at Sacramento State and, if available, the number and percentage of students completing the program in which the student is enrolled or has expressed interest may be obtained from:

Yvonne Harris, Associate Vice President, Research Affairs,
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6402.

Information concerning athletic opportunities available to male and female students and the financial resources and personnel that Sacramento State dedicates to its men's and women's teams may be obtained from:

Mark Orr, Director of Athletics
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6348.

Information concerning teacher preparation programs at Sacramento State, including the pass rate on teacher certification examinations, may be obtained from:

Elizabeth Christian, Credentials Analysts Office
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
Eureka Hall 414
(916) 278-4567.

Information concerning grievance procedures for students who feel aggrieved in their relationships with the University, its policies, practices, and procedures, or its faculty and staff may be obtained from:

Dr. Ed Mills, Vice President, Student Affairs
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6060.

Information concerning student body diversity at Sacramento State, including the percentage of enrolled, full-time students who are (1) male, (2) female, (3) Pell Grant recipients, and (4) self-identified members of a specific racial or ethnic group, must be obtained from:

Yvonne Harris, Associate Vice President, Research Affairs
California State University, Sacramento
6000 J Street
Sacramento, CA 95819-6032
(916) 278-6402.

Information concerning student activities at California State University, Sacramento is available at <http://www.csus.edu/soal/>

The federal Military Selective Service Act (the "Act") requires most males residing in the United States to present themselves for registration with the Selective Service System within 30 days of their 18th birthday. Most males between the ages of 18 and 25 must be registered. Males born

after December 31, 1959, may be required to submit a statement of compliance with the Act and regulations in order to receive any grant, loan, or work assistance under specified provisions of existing federal law. In California, students subject to the Act who fail to register are also ineligible to receive any need-based student grants funded by the state or a public postsecondary institution.

Selective Service registration forms are available at any U.S. Post Office, and many high schools have a staff member or teacher appointed as a Selective Service Registrar. Applicants for financial aid can also request that information provided on the Free Application for Federal Student Aid (FAFSA) be used to register them with the Selective Service. Information on the Selective Service System is available and the registration process may be initiated online at www.sss.gov (<http://www.sss.gov>).

Appendix J: Personal Safety and Protection of Property

Personal Safety and Protection of Public Property
Police Department Building
Police Emergency: (916) 278-6900 or dial 911 from any campus phone
www.csus.edu/police (<http://www.csus.edu/police>)
www.facebook.com/sacstatepolice (<https://www.facebook.com/sacstatepolice>)
[www.twitter.com/sacstatepolice](https://twitter.com/sacstatepolice) (<https://twitter.com/sacstatepolice>)

The University and the Sacramento State Police Department (formerly known as the Department of Public Safety) encourage the prompt reporting of any incident that compromises the safety, health, or rights of Sacramento State community members. The Sacramento State Police Department is the primary respondent for campus emergencies and reports of criminal activity on campus. Officers are fully certified by the State of California with full arrest powers and cooperate with State and local police agencies (Sacramento City Police and Sacramento County Sheriff's Departments), resulting in the University's awareness of criminal activity perpetrated beyond the campus. Reports of criminal activity will be fully investigated, and appropriate referrals made to the courts, the University, or both.

Campus Buildings: Buildings on the Sacramento State campus remain open only through the completion of the last scheduled event. A daily schedule is provided to Facilities Management and buildings are electronically locked on the basis of that schedule. For those buildings that are not electronically controlled, Custodial Services and Community Service Specialists are responsible for the unlocking of buildings on a daily basis for scheduled classes. After buildings are locked, only employees with offices and personnel with maintenance responsibilities have access to buildings.

Personal Safety Training: The Sacramento State Police Department has full-time Police Officers who are available, on request, for personal safety presentations to increase awareness and personal responsibility of students, faculty, or staff. Please call (916) 278-6000 for an appointment. Presentations are offered consistently during the semester. The Sacramento State Police Department has completed approximately 671 crime prevention and safety presentations between 2006 and 2014. A full-time Sacramento State employee is available for seminars concerning personal safety for women through the Violence and Sexual Assault Support Services (916) 278-3799. In addition, students are employed through the Sacramento State Police Department as Community Service Officers (CSOs) with primary responsibility for providing patrols and community assistance on campus. The CSOs provide directed patrols in

the Residential Life Complex, Academic Information Resource Center, and the Library.

Residence Halls: Sacramento State Residence Hall policy requires that exterior doors be locked at all times. All residents are issued a fob for personal access to the exterior doors and rest rooms. A resident must accompany all guests. Additional information is contained in the Guide to Residential Life available through the Office of Residential Life in Sierra Hall. The Sacramento State Police Department worked with the American River Courtyard planning group on physical security for the new facility. The American River Courtyard residence hall opened in August, 2009; the new Riverview residence hall is expected to open in 2016.

Publications: Brochures are available through the Sacramento State Police Department which provides additional information and training under the following titles: A Guide to Safe & Responsible Partying, Alcohol Alert, Alcohol - The Hard Facts, Apartment Safety Checklist, Bicycles on Campus, Bicycle Safety Tips, CA Driver License & Identification Cards, CA Victim Compensation Program (CalVCP), Compensation for Victims of Violent Crime, Crime Prevention Information, Crime Victims Services, Dater's Bill of Rights, Depression and College Students, Domestic Violence, Do You Know How To Be Safe, Help for Victims of Domestic Violence, Parents You're Not Done Yet, Personal Safety Guide, Police Department Brochure, Preventing Arson & Vandalism, Preventing Date Rape, Preventing Vehicle Theft, Safety Tips for Runners and Walkers, Sexual Assault Act Sheet, Sexual Assault Prevention, Sexual Harassment Facts, Streetwise - The Way to Be, Sustaining Your Gang Prevention Efforts, Tobacco Laws, and Victim Witness Assistance Program. The Sacramento State Violence and Sexual Assault Support Services Program has a brochure on Personal Safety. An Emergency Response Manual is available to the campus community through the Sacramento State Police Department, or online at www.csus.edu/police (<http://www.csus.edu/police>), with information concerning procedures for fire, earthquake, serious injury, bomb threat, hazardous material leaks, and crimes in progress.

In compliance with the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act and the Campus Fire Safety Right-To-Know Act, Sacramento State has made statistics and information available online at www.csus.edu/police/cleryact.htm. The Sacramento State Police Department collects crime statistics from local and appropriate police agencies, gathers information from multiple sources both on and off campus and prepares the report. Crimes reported on campus, in certain off-campus buildings or property owned or controlled by Sacramento State and on public property within or immediately adjacent to and accessible from the campus during the last three years is included. The report includes fire safety statistics and information, institutional policies concerning campus security, alcohol and drug use, crime prevention, the reporting of crimes, sexual assault and other safety matters. During the fall semester of every year, information is emailed to all enrolled and prospective students, faculty and staff. In addition, all CSU employees receive a notice concerning this information on their August paycheck. Print copies are available in the University Library, Police Service Center located in the University Union and by request from the Office of the Vice President for Student Affairs and the Sacramento State Police Department.

Appendix K: Civil and Criminal Penalties for Violation of Federal Copyright Laws

Anyone who is found to be liable for copyright infringement may be liable for either the owner's actual damages along with any profits of

the infringer or statutory damages of up to \$30,000 per work infringed. In the case of a willful infringement, a court may award up to \$150,000 per work infringed. (See 17 U.S.C. §504.) Courts also have discretion to award costs and attorneys' fees to the prevailing party. (See 17 U.S.C. §505.) Willful copyright infringement can also result in criminal penalties, including imprisonment and fines. (See 17 U.S.C. §506 and 18 U.S.C. §2319.)

Appendix L: Career Placement

The Office of Research Affairs or the Office of University Initiatives and Student Success may furnish, upon request, information about the employment of students who graduate from programs or courses of study preparing students for a particular career field. Any such data provided must be in a form that does not allow for the identification of any individual student. This information includes data concerning the average starting salary and the percentage of previously enrolled students who obtained employment. The information may include data collected from either graduates of the campus or graduates of all campuses in the California State University.

Appendix M: Changes of Rules and Policies

Although every effort has been made to assure the accuracy of the information in this catalog, students and others who use this catalog should note that laws, rules, and policies change from time to time and that these changes may alter the information contained in this publication. Changes may come in the form of statutes enacted by the Legislature, rules and policies adopted by the Board of Trustees of the California State University, by the Chancellor or designee of the California State University, or by the President or designee of the campus. It is not possible in a publication of this size to include all of the rules, policies and other information that pertain to students, the institution, and the California State University. More current or complete information may be obtained from the appropriate department, school, or administrative office.

COURSES A-Z

Accountancy (ACCY)

ACCY 1. Accounting Fundamentals. 3 Units

Prerequisite(s): Entry Level Math (ELM) test of at least 36 or a CR grade in LS 7A.

Term Typically Offered: Fall, Spring

Accounting as the basis of an information system with emphasis on concepts and assumptions underlying data accumulation for financial reports. Includes the concepts of income determination and financial position, and the accounting for various types of ownership equities.

ACCY 2. Managerial Accounting. 3 Units

Prerequisite(s): ACCY 1.

Term Typically Offered: Fall, Spring

Use and reporting of accounting data for managerial planning, control, and decision making. Broad coverage of concepts, classification, and behavior of costs.

ACCY 111. Intermediate Accounting I. 3 Units

Term Typically Offered: Fall, Spring

In-depth knowledge of how financial information provides information about a company's: economic resources, obligations, and owner's equity; income and its components; and cash flows. Topics include the development and application of basic assumptions, principles and constraints underlying financial statements; the use of information derived from financial statements and the limitations of the information; and the use of accounting information to evaluate a company's return on investment, risk, financial, flexibility, liquidity, and operational capability. Students learn how to prepare financial statements.

ACCY 112. Intermediate Accounting II. 3 Units

Prerequisite(s): ACCY 111.

Term Typically Offered: Fall, Spring

Application of Generally Accepted Accounting Principles to the reporting of tangible and intangible assets, liabilities, and the capital section of the balance sheet. Other topics include the reporting of stock-based compensation and earnings-per-share.

ACCY 113. Intermediate Accounting III. 3 Units

Prerequisite(s): ACCY 111.

Term Typically Offered: Fall, Spring

Application of Generally Accepted Accounting Principles to revenue recognition and matching, pensions, leases, income taxes, accounting changes, interim financial statements, and segmental reporting. Students develop an in-depth knowledge of the preparation and the analysis of the cash flow statement.

ACCY 117. Advanced Accounting. 3 Units

Prerequisite(s): ACCY 111 and ACCY 112.

Term Typically Offered: Fall, Spring

Specialized topics in partnership accounting; consolidated statements; foreign currency translation and financial statements.

ACCY 121. Cost Accounting. 3 Units

Term Typically Offered: Fall, Spring

Importance of the allocation of costs; the cost allocation techniques available to accountants; the techniques used by management to maintain and create enterprise value, e.g., CVP analysis; the accountant's responsibility for the management of inventory; and the ethical consideration in internal reporting.

ACCY 122. Advanced Management Accounting. 3 Units

Prerequisite(s): ACCY 121.

Term Typically Offered: Fall, Spring

Accountant's responsibility to provide financial and no financial information to managers; the planning techniques available to accountants; managerial control techniques that enhance the maintenance and improvement of enterprise value, and short-run and long-run analyses.

ACCY 131. Survey of Auditing, Attest, and Assurance Topics. 3 Units

Prerequisite(s): ACCY 111, ACCY 112.

Term Typically Offered: Fall, Spring

Survey of topics in auditing as a control activity in society. Covers a variety of opportunities in the auditing profession including external auditing, internal auditing, compliance auditing, and operational auditing as well as fraud examinations. Topics include evidence and documentation, professional ethics, auditing computer systems, statistical sampling, and internal controls.

ACCY 132. Accountants' Ethical and Professional Responsibilities. 3 Units

Prerequisite(s): ACCY 111, ACCY 112.

Corequisite(s): ACCY 131.

Term Typically Offered: Fall, Spring

This course addresses professional responsibilities for the accounting profession, including the development of ethical standards, ethical reasoning, AICPA and California Codes of Professional Conduct, financial reporting fraud, corporate governance, and other relevant topics.

ACCY 161. Government and Nonprofit Accounting. 3 Units

Prerequisite(s): ACCY 111

Term Typically Offered: Fall, Spring

Fundamentals of accounting and financial reporting for governmental units and institutions; accounting for various types of funds; accounting aspects of budgetary control.

ACCY 171. Federal Tax Procedures I. 3 Units

Term Typically Offered: Fall, Spring

Federal taxation concepts are used in effective decision making; a working knowledge of the concepts of gross income, deductions, tax rates, and property transactions as they pertain to C corporations, partnerships, S corporations, and individuals; and proficiency in the application of tax concepts as they pertain to business and individual taxpayers.

<p>ACCY 172. Federal Tax Procedures II. 3 Units Prerequisite(s): ACCY 171. Term Typically Offered: Fall, Spring</p> <p>Business entity formation, operation, and termination and business taxation principles and concepts used in effective decision-making. Students develop the ability to understand and apply business tax principles and the critical and analytical skills that are necessary in the study and application of taxation and tax law.</p>	<p>ACCY 220. Accountancy Teaching Experience. 3 - 6 Units Term Typically Offered: Fall, Spring</p> <p>Supervised experience of teaching lower division accountancy courses. Students will teach one section of ACCY 1 or 2 for each three units of credit. They may teach no more than two classes (6 units of credit) during any semester and be under direct supervision of an appropriate coordinator. To be eligible, students must register for nine units in addition to ACCY 220 and must have approval of the Department Chair. May not be used to satisfy any requirements in the CBA graduate programs. No student may earn more than twelve (12) units cumulative. Credit/No Credit</p>
<p>ACCY 190. International Accounting. 3 Units Term Typically Offered: Fall, Spring</p> <p>Accounting concepts, principles, and methods applicable to multinational transactions and global corporations. Contents include the translation of financial statements, comparative accounting systems, financial reporting, currency risk management, international accounting standards and organizations, taxation problems, and the managerial aspects of multinational transactions.</p>	<p>ACCY 240. Integrated Accounting Concepts. 3 Units Term Typically Offered: Fall, Spring</p> <p>Designed for students who enter the Master of Science Accountancy program without a Bachelor of Science in Accountancy or students who need to refresh their basic skills and understanding in record keeping, financial statement preparation and analysis, ethics in the practice of accounting, and internal controls through the use of comprehensive case study/practice set. Delivered via independent project work rather than lecture.</p>
<p>ACCY 194. Cooperative Education Experience in Accountancy. 6 - 12 Units Prerequisite(s): Minimum overall GPA of 2.75; instructor permission. Term Typically Offered: Fall, Spring</p> <p>In-depth supervised work experience in accounting for the purpose of exposing the student to comprehensive accountancy experience in business, governmental, or service agencies. Note: Open to upper division students, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.</p> <p>Credit/No Credit</p>	<p>ACCY 250. Financial Reporting I. 3 Units Term Typically Offered: Fall, Spring</p> <p>Corporate financial reporting to external users in accordance with US Generally Accepted Accounting Principles (GAAP), including financial information about a company's economic resources, obligations, owners' equity, income, case flow, and use of information to evaluate a company's return on investment, risk, financial flexibility, liquidity, and operational capability.</p>
<p>ACCY 195. Internship in Accountancy. 3 Units Prerequisite(s): Completion of 15 units of upper division business courses at Sacramento State; minimum overall GPA of 2.75; instructor permission. Term Typically Offered: Fall, Spring</p> <p>Supervised work experience in accountancy for the purpose of increasing student understanding of the nature and scope of the operations of business, governmental, or service agencies. Supervision is provided by the faculty and the cooperating agencies. Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.</p> <p>Credit/No Credit</p>	<p>ACCY 251. Foundations of International Accounting. 3 Units Prerequisite(s): ACCY 250 or equivalent. Term Typically Offered: Fall, Spring</p> <p>The role of culture in accounting; comparative international financial and managerial accounting fundamentals; international financial statement analysis; international accounting standards and U.S. GAAP convergence; international business combinations; foreign exchange; international auditing; international taxation; and international capital flows.</p>
<p>ACCY 199. Special Problems in Accountancy. 1 - 3 Units Prerequisite(s): Senior status or instructor permission. Term Typically Offered: Fall, Spring</p> <p>Individual projects or directed reading for students qualified to carry on independent work. Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030. Note: Open to declared business administration majors only.</p> <p>Credit/No Credit</p>	<p>ACCY 260. Financial Reporting II. 3 Units Prerequisite(s): ACCY 250. Term Typically Offered: Fall, Spring</p> <p>In-depth study of technical financial accounting issues including accounting for pensions and leases, income tax, accounting changes, consolidated financial statements, and foreign currency.</p> <p>ACCY 261. Cost Analysis and Control. 3 Units Term Typically Offered: Fall, Spring</p> <p>Fundamentals of cost accounting concepts and practice relating to cost accumulation, control, and analysis for managerial planning and decision making. Specific topics generally include product costing, standards, cost allocation, estimation, budgeting, transfer pricing, and performance evaluation. Emphasis is on current issues.</p>

ACCY 262. Auditing. 3 Units Term Typically Offered: Fall, Spring	ACCY 270. Tax Research and Procedure. 3 Units Prerequisite(s): ACCY 172 or ACCY 269. Term Typically Offered: Fall, Spring
<p>Study auditing as a control activity in society. It covers a variety of opportunities in the auditing profession including external auditing, internal auditing, compliance auditing, and operational auditing as well as fraud examinations. Topics include evidence and documentation, auditing computer systems, and internal controls.</p>	<p>Tax reporting and collection procedure; administrative and judicial procedures governing tax controversies; the rights and obligations of the taxpayer. Intensive training in performing and communicating tax research. Includes use of current database programs. Lecture basis, followed by "hands-on" application of research methods.</p>
ACCY 263. Governmental and Non-Profit Accounting. 3 Units Term Typically Offered: Fall, Spring	ACCY 271. Tax Accounting Periods and Methods. 3 Units Prerequisite(s): ACCY 172 or ACCY 269. Term Typically Offered: Fall, Spring
<p>This course provides an in depth study of accounting and reporting for state and local governmental and non-profit entities. The course emphasizes the governmental reporting environment, the accounting for various types of funds, the accounting aspects of budgetary control, and the preparation of governmental financial information to be included in the Comprehensive Annual Financial Report. This course also emphasizes the key differences between governmental and non-profit organizations, and the financial accounting and reporting for non-profit organizations.</p>	<p>Concepts and principles of the overall cash, accrual and hybrid methods of tax accounting. Applications of specific methods such as: inventory costing and capitalization rules, installment sales, long-term contracts, and original issue discount/time value of money will be examined. Lecture format to present the underlying rules and concepts. Case studies will then be analyzed and discussed by the students to examine the topics in a "real-world" context.</p>
ACCY 264. Taxation of Business Entities. 3 Units Term Typically Offered: Fall, Spring	ACCY 272. Taxation of Business Enterprises I - Corporations. 3 Units Prerequisite(s): ACCY 172 or ACCY 269. Term Typically Offered: Fall, Spring
<p>Covers the topics for corporate tax, partnership tax, estate and gift tax, and tax planning. Corporate tax includes taxation of transactions between corporations and their shareholders, transfers to corporations, dividends and non-liquidating distributions, stock redemptions, corporate liquidations, and S corporation. Partnership tax includes operation and liquidation, dissolution, sales, and exchange of partnership interests. Estate and gift tax addresses the types of transfers for federal gift tax.</p>	<p>Discusses federal tax law as it applies to corporations, including the following topics: special deductions, formation, distributions, and complete liquidations. Incorporates problem sets, case analysis, a corporate tax return project, and a research project to enhance analytical and critical thinking skills and compliance experience.</p>
ACCY 265. Advanced Accounting Information Systems Analysis and Controls. 3 Units Term Typically Offered: Fall, Spring	ACCY 273. Taxation of Business Enterprises II - Partnerships. 3 Units Prerequisite(s): ACCY 172 or ACCY 269. Term Typically Offered: Fall, Spring
<p>Emphasis on the role of computer and information technology in the development, analysis, and operation of accounting information systems; may include advanced coverage of accounting transaction cycles, accounting systems planning and analysis, accounting system design, accounting systems implementation and operation, the accounting system internal control structure, data modeling and database design in accounting, computer fraud and security, and auditing of computer-based information systems.</p>	<p>Discusses general concepts, acquisitions and basis of partnerships interests, operations, transfers of partnership interests, and distributions. Incorporates problem sets, a partnership tax return project, and research projects to enhance analytical and critical thinking skills and compliance experience and to develop students' technical proficiency in the application of partnership concepts.</p>
ACCY 266. Business Environment and Concepts. 3 Units Term Typically Offered: Fall, Spring	ACCY 274. Estate, Gift and Trust Taxation. 3 Units Prerequisite(s): ACCY 172 or ACCY 269. Term Typically Offered: Fall, Spring
<p>Designed to provide understanding of knowledge and skills necessary for the general business environment and business operation. In addition, students are required to apply that knowledge in performing professional responsibilities. Topics include corporate governance, business cycles, global economic markets, business strategy, effect of financial management policies on accounting transactions, economic substance of transactions and their accounting implications, and budgeting/forecasting techniques.</p>	<p>Taxation of decedent's estate and lifetime gifts; valuation of property subject to estate and gift taxes; income taxation of estates and trusts; estate planning. Uses a lecture format to present the underlying rules and concepts. Case studies will then be analyzed and discussed by the students to examine the topics in a "real-world" context.</p>
ACCY 269. Taxation of Individuals. 3 Units Term Typically Offered: Fall, Spring	ACCY 275. International Wealth and Asset Management. 3 Units Term Typically Offered: Fall, Spring
<p>Covers the required topics for tax form preparation for reporting individual incomes. Examines fundamental concepts in tax law and the underlying reasons for income identification, exemption, and deduction.</p>	<p>Importance of global asset protection and wealth management; domestic Statutory and case law authorities of selected European, American and Asian countries as they relate to wealth protection and asset management; bi-lateral international agreements relating to wealth management and asset protection; Multilateral agreement affecting wealth management and asset protection; tax and legal liability minimizing models.</p>

ACCY 276. U.S. Taxation of International Transactions. 3 Units**Prerequisite(s):** ACCY 272, Advanced to Candidacy.**Term Typically Offered:** Fall, Spring

U.S. tax jurisdiction; U.S. source of income rules and related expense allocation; U.S. taxation of foreign taxpayers; transfer pricing issues; U.S. taxation of the foreign income of U.S. citizens and residents; cross border transactions; foreign currency tax issues; and U.S. bilateral tax agreements. Successful completion will satisfy the culminating experience for the MSBA/Taxation program. Students may select topics for their Master's projects that are outside the discipline topic of the class subject to the approval of the instructor.

ACCY 277. Comparative International Tax Systems. 3 Units**Term Typically Offered:** Fall, Spring

The similarities and differences between current global tax systems including jurisdiction and conflict of laws issues; the role of bilateral international tax treaties and other international tax related agreements in business operations; international tax planning for individuals and multinational enterprise including corporations, partnerships and estates and trusts.

ACCY 278. International and Multi-State Taxation. 3 Units**Term Typically Offered:** Fall, Spring

Focuses on the taxation of cross-border transactions which encompasses discussion of the laws, rules, and regulations that affect transactions that cross both state and national borders. It covers various issues such as income sourcing and jurisdiction to tax. This course generally discusses these issues from the perspective of a U.S. person, but emphasizes and illustrates the general applicability of these rules for the tax regimes as established by other countries and states.

ACCY 280. Management Control Systems. 3 Units**Term Typically Offered:** Fall, Spring

Development of the concepts and practice of management control systems. How alternative accounting-based planning, performance motivation and evaluation, and control systems fit and are used in varying strategic, management, and operative environments. How systems focus and motivate managers' decision behavior. How systems fit and are used in varying decision, competitive, and organization settings. Emphasis is on cases.

ACCY 295. Internship in Accountancy. 3 Units**Prerequisite(s):** Classified graduate status; minimum Sacramento State GPA of 3.0 required.**Term Typically Offered:** Fall, Spring

Supervised work experience in business, governmental service, or agencies for the purpose of increasing and enhancing student understanding of the nature and scope of the organization's accounting operations. Supervision is provided by the faculty and the cooperating agencies. Open to MS in Accountancy students. Petitions are obtained from Tahoe Hall 1035.

Credit/No Credit

ACCY 296. Experimental Offerings in Accountancy. 3 Units**Term Typically Offered:** Fall, Spring

When a sufficient number of qualified students apply, a faculty member may conduct a seminar on a designated advanced topic in accountancy.

ACCY 299. Special Problems in Accountancy. 1 - 3 Units**Prerequisite(s):** Classified graduate status.**Term Typically Offered:** Fall, Spring

Individual projects or directed reading for students qualified to carry on independent work. Admission requires approval of faculty member under whom the individual work is to be conducted in addition to the approval from the Department Chair of Accountancy. Petitions to be obtained from the CBA Graduate Programs Office, Tahoe Hall 1037.

Credit/No Credit

ACCY 500A. Thesis. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy; completion of MGMT 210 is required for the MBA only.**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree.

ACCY 500B. Project. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy; completion of MGMT 210 is required for the MBA only.**Term Typically Offered:** Fall, Spring

Completion of a project approved for the Master's degree.

ACCY 500C. Comprehensive Examination for MS/Accountancy and MSBA/Taxation Degrees. 1 - 3 Units**Prerequisite(s):** Advanced to candidacy. For comprehensive examination for MBA only (MGMT 500C, 1 unit), completion of Program Requirements (ACCY 240, MGMT 222, MGMT 223, MGMT 234, MGMT 280, MIS 221, OBE 252). For comprehensive examination for MS/Accountancy and MSBA/Taxation degrees, student must be in final semester of program.**Term Typically Offered:** Fall, Spring**Note:** MS Accountancy degree, student must be in final semester of program.**ACCY 501. Culminating Experience Project in Accounting and Ethics. 3 Units****Prerequisite(s):** Advancement to Candidacy**Term Typically Offered:** Fall, Spring

Each student conducts an individual project to fulfill the culminating experience graduation requirement of the MS in Accountancy program as required in Title V of the CA Educational Code. The course also covers the development of ethical standards, ethical reasoning, AICPA Code of Professional Conduct, accountants' professional responsibilities, financial reporting fraud and responses, corporate governance, and other relevant topics.

Note: May be repeated for credit

Accountancy Information System (AIS)

AIS 141. Accounting Information Systems Development. 3 Units**Term Typically Offered:** Fall, Spring

Design, analysis, and implementation of computer-based accounting information systems. Discussion of flow charting, data security, systems development, program architecture, and management of the implementation process. Development of computer applications and formulation of decision information for managerial uses. Use of the computer in projects.

AIS 142. Enterprise and E-Commerce Accounting Models. 3 Units**Prerequisite(s):** AIS 141 or instructor permission.**Term Typically Offered:** Fall, Spring

Survey of Enterprise Resource Planning (ERP) models, Business-to-Business (B2B) E-commerce models, and the effects of the changing business and technology landscape upon the accounting profession. Topics include internal control, auditing, and economics relating to these new business-process models.

AIS 194. Cooperative Education Experience in Accounting Information Systems Problems. 6 - 12 Units**Prerequisite(s):** Minimum overall GPA of 2.75; instructor permission.**Term Typically Offered:** Fall, Spring

In-depth supervised work experience in accounting information systems for the purpose of exposing the student to comprehensive Accounting Information Systems experience in business, governmental, or service agencies.

Note: Open to upper division students, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

AIS 195. Internship in Accounting Information Systems. 3 - 6 Units**Prerequisite(s):** Completion of 15 units of upper division business courses at Sacramento State; minimum GPA of 2.75 required; instructor permission.**Term Typically Offered:** Fall, Spring

Supervised work experience in accounting information systems for the purpose of increasing student understanding of the nature and scope of the operations of business, governmental, or service agencies. Supervision is provided by the faculty and cooperating agencies.

Note: Open to declared business administration upper division majors only, subject to permission of the Accountancy Area. Petitions can be obtained from the Student Affairs Office, Tahoe 2065.

Credit/No Credit

AIS 199. Special Problems in Accounting Information Systems.**1 - 3 Units****Prerequisite(s):** Senior status or instructor permission.**Term Typically Offered:** Fall, Spring

Individual accounting information systems projects or directed reading for students qualified to carry on independent work.

Note: Open to declared business administration majors only. Admission requires approval of the instructor and the Associate Dean. Petitions can be obtained from the Undergraduate Business Advising Center, Tahoe 1030.

Credit/No Credit

Anthropology (ANTH)

ANTH 1. Introduction to Biological Anthropology. 3 Units**General Education Area/Graduation Requirement:** Life Forms (B2)**Term Typically Offered:** Fall, Spring, Summer

Covers the concepts, methods of inquiry, and theory of biological evolution and their application to the human species. There is a specific focus on molecular, Mendelian and population genetics, mechanisms of evolution, primatology, paleoanthropology, biocultural adaptations, and human variation. The scientific method serves as the foundation to the course.

ANTH 1A. Biological Anthropology Laboratory. 1 Unit**Prerequisite(s):** ANTH 1 (may be taken concurrently)**General Education Area/Graduation Requirement:** Laboratory (B3), Life Forms (B2)**Term Typically Offered:** Fall, Spring

Designed to familiarize the student with the materials and techniques of physical anthropology. Includes human and other primate osteology, anthropometric techniques, and allied methods in the gathering and analysis of physical anthropological data. Through working with the departmental collection of fossil casts and a wide variety of charts and models, the student also becomes familiar with the stages of human and primate evolution.

ANTH 2. Introduction to Cultural Anthropology. 3 Units**General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, the course contributes to a critical understanding of continuity and diversity in peoples' lifestyles, social institutions, and cultural practices in different societies around the world. The course also examines the impact of political, economic, and social changes, such as colonization, decolonization, and globalization on people and cultures over the last century.

ANTH 2H. Introduction to Cultural Anthropology - Honors. 3 Units**Term Typically Offered:** Fall only

Introduction to anthropological approaches in the study of people and cultures. Using ethnographic case studies, contributes to a critical understanding of the continuity and diversity in peoples' lifestyles, social institutions, and cultural practices in different societies around the world. Examines the impact of political, economic, and social changes, such as colonization, decolonization, globalization, etc., on people and cultures over the last century. Intended for students enrolled in the University's GE Honors Program.

Note: Students must be admitted to the GE Honors Program.**ANTH 3. Introduction to Archaeology. 3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Introduces students to the methods and theories used by archaeologists to find, recover, and interpret such remains in an effort to reconstruct and understand the lives of earlier peoples. The class uses archaeological case studies, films, and hands-on examples of tools and other artifacts produced by simple stone age hunters and more complex civilizations that lived in California and other parts of the world.

ANTH 4. Language, Culture, and Critical Thinking. 3 Units**General Education Area/Graduation Requirement:** Critical Thinking (A3)**Term Typically Offered:** Fall, Spring

Introduction to the abstract and formal structures of language and cultural dimensions of human communication via major linguistic anthropological concepts, theoretical assumptions, and methodologies. Addresses the logical, formal relationship between underlying rules of natural languages while critically analyzing how speakers from different cultures use language to convey complex social and cultural information. Course illuminates how language is used to create and reinforce relationships of power (race, class, gender); develops ability to recognize linguistic fallacies; and instructs in basic critical thinking skills.

ANTH 13. Magic, Witchcraft and Religion. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Cross-cultural study of the forms and functions of supernatural beliefs and associated rituals in various societies of Africa, Asia, aboriginal Australia, Oceania, South America, native North America and elsewhere. Emphasis is on understanding beliefs and rituals within given social contexts, and using broad comparisons to derive insight into the general functions of beliefs and rituals in human life.

ANTH 16. Comparative Early Civilizations. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Examines the emergence and development of early civilizations. Studies state formation, urbanization, market system development, and other processes relevant to the evolution of early civilizations from the standpoints of cross-cultural comparison and modern anthropological theory. The goal is to identify cross-cultural regularities as well as critical differences that can explain the various evolutionary trajectories of these societies. The civilizations that will be contrasted include societies from Mesopotamia, Egypt, the Indus Valley, China, Mesoamerica, Andean South America, and other regions.

ANTH 21. Freshman Seminar: Becoming an Educated Person. 3 Units**General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Provides students with the opportunity to interact with fellow classmates and the seminar leader to build a community of academic support and personal support.

ANTH 101. Cultural Diversity. 3 Units**General Education Area/Graduation Requirement:** GE AREA D, Race & Ethnicity Graduation Requirement (RE), United States History**Term Typically Offered:** Fall, Spring, Summer

Focuses on analyzing the historically conditioned political, economic and social factors that have contributed to cultural diversity in the U.S.; a critical anthropological approach is developed to explore the intersection of race, class, gender, ethnicity and sexuality; the political economy of institutions and ideas, such as racism, classism, sexual stereotyping, family, religion, state, color-blindness, multiculturalism, etc.; and, discourses of cultural diversity in the U.S.

ANTH 102. The Nature of Culture. 3 Units**Prerequisite(s):** GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI), GE AREA D**Term Typically Offered:** Fall, Spring

An upper division general introduction to cultural anthropology. Divided into two major parts: a survey of theories, methods and concepts of cultural anthropology, and an introduction to applied cultural anthropology.

ANTH 103. Psychological Anthropology. 3 Units**Prerequisite(s):** ANTH 2 or ANTH 102.**Term Typically Offered:** Fall, Spring

Cross-cultural comparative approach to human cognition, child-training practices, personality development, deviant behavior, cultural psychiatry, and data gathering techniques.

ANTH 104. The History of Anthropology. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Anthropological theory in historical perspective.

ANTH 105. Anthropology of War. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Examination of the nature of war, primarily as it occurs in pre-industrial societies, and a survey of the kinds of explanations of this phenomenon current in anthropology. Emphasis is on understanding the complexity, variability, and cultural imbeddedness of war as it occurs around the world.

ANTH 106. Culture and Personality of the Chicano Child. 3 Units**Term Typically Offered:** Fall, Spring

Study of child growth and development patterns universal to all children with focus on the pressures and effects of the Mexican and Anglo cultures on the development of the Chicano child.

ANTH 107. Anthropology of Hunters and Gatherers. 3 Units**Prerequisite(s):** ANTH 3**Term Typically Offered:** Fall, Spring

Survey of the rapidly disappearing life way which anthropologists call hunting and gathering, with economies based on the use of wild plant and animal resources. Using ethnographic examples from the Arctic, southern Africa, rainforests in South America, deserts of Australia, and western North America, explores variation in hunter-gatherer societies with respect to differences in environment, technology, social organization, and the historical effects of interaction with more complex cultural groups. Models that attempt to explain long-term changes in this life way are also explored.

- ANTH 108. Economic Anthropology.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Examines the fundamentals of economic anthropology through a focus on production, exchange, and consumption in a range of historical and ethnographic contexts. Introduces different frameworks for theorizing the economy and explaining human behavior and decision-making. Addresses central questions and issues in cultural anthropology on the origins of value, wealth and social stratification, the meanings of work, gift exchange and reciprocity, property regimes, morality and debt, marketing and desire.
- ANTH 109. Ecological and Evolutionary Approaches to Anthropology.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Survey of anthropological research regarding the relationships between human behavior, ecology, and evolution. Reviews historic development of research in this field, and contrasts approaches based in ecological and evolutionary theory. Reviews and evaluates of case studies. Topics include hunter-gatherer and hominid economy and social organization, foraging theory, work effort, population growth and regulation, origins of agriculture, warfare, ritual and resource conservation, and origins of complex society.
- ANTH 110. Archaeological Method and Theory.** 3 Units
Prerequisite(s): ANTH 3.
Term Typically Offered: Fall, Spring
- Traces the development of archaeology from its inception in the eighteenth century up to the present time. Readings, lectures, and class assignments follow the evolution of archaeological method and theory in relation to changing ideas about the role of culture, environment, and technology within the broader discipline of anthropology.
- ANTH 111. California Archaeology.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Pre-contact California encompassed some of the most extensive environmental and cultural diversity ever to exist on the planet, containing widely divergent biota, many distinct languages and cultures, and among the densest hunter-gatherer populations ever recorded. At least 11,000-12,000 years of human occupation have been marked by multiple migrations and major shifts in technological and social organization. Explores long-term trends in cultural development across the state, and examines models used to explain why semi-permanent settlements, intensive subsistence strategies, and complex social institutions arose in some times/places and not others.
- ANTH 112. Great Basin Archaeology.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Explores the cultural and natural history of the Great Basin from the last glacial maximum into the historic era. Though largely arid, this region in fact manifests considerable environmental variability and has seen significant climatic alterations since the Pleistocene. Human occupation of the Great Basin witnessed major changes in demography, technology, subsistence practices, and sociopolitical organization over the last 10-12,000 years. The course looks to understand cultural and environmental variability across the region through examination of the long-term material record and consideration of anthropological and biological models.
- ANTH 113. Prehistory of the Southwest.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Survey of the prehistory of the Arizona, New Mexico, Western Colorado, Utah, and adjacent regions of Nevada, Texas and northwestern Mexico. Major prehistoric cultures of the Southwest (Hohokam, Anasazi, Mogollon, Fremont) are covered in detail. Focus on major transitions in subsistence and social organization emphasizing current issues of archaeological research. Cultural influences from outside areas are also considered.
- ANTH 114. North American Prehistory.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Familiarizes students with the archaeological record of North America, and provides an analytical framework through which it may be understood in anthropologically meaningful terms. This will be accomplished by considering some of the explanations that have been proposed to account for the prehistory of the continent, and by examining the archaeological remains and cultural sequences found in various areas, including the North and Southeast, Great Plains, Pacific Northwest, and arctic/subarctic regions.
- ANTH 115. Origins of Agriculture.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- Surveys and evaluates worldwide anthropological perspectives of the origins of agriculture and the rise of complex society. Traces the development of major archaeological theories for the inception and spread of agriculture and civilization, acquainting students with groundbreaking archaeological research associated with each theoretical perspective. Current archaeological research is reviewed in-depth, providing a context for critique of the theories. Examples from North America, Latin America, the Middle East, India and China are compared and contrasted using movies, readings, and lectures.
- ANTH 116. Old World Prehistory: Paleolithic Archaeology.** 3 Units
Term Typically Offered: Fall, Spring
- Old World Paleolithic archaeology from the emergence of hominids until the development of agriculture and civilization. Cultural developments in Africa, Asia, Europe and Australia are examined with the aim of highlighting similarities and differences in the process of technological, demographic, and sociopolitical change within each region. Explanatory models are offered to account for cultural evolution in various parts of the Old World are explored and assessed.

ANTH 117. World Prehistory and the Evolution of Modern Humanity. 3 Units

Prerequisite(s): Any lower-division Area B2 GE course

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall, Spring

Covers human prehistory, from the emergence of culture through the domestication of plants and animals, and the origins of complex societies. Included are major cultural developments on every continent, emphasizing similarities and differences in the nature and timing of key technological, cultural, and sociological changes. Methodologies for learning about the past, major archaeological discoveries, important personalities, and contributions to the modern world are discussed in the context of understanding the strengths of a scientific approach to understanding the human past.

ANTH 119. Analysis of Faunal Remains. 4 Units

Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Seminar on techniques and methods employed in analysis of faunal remains from archaeological sites, coupled with a laboratory providing hands-on identification of mammalian remains from these settings. Large focus on quantitative methods used in zooarchaeology to infer behavioral patterns of the human past and their paleoenvironments.

ANTH 120. Introductory Statistics for Anthropologists. 3 Units

Prerequisite(s): Anthropology (Archaeological and Biological Anthropology) concentration.

Term Typically Offered: Fall, Spring

Covers the conceptual framework involved in quantitative methods of data analysis commonly employed in anthropology. The emphasis is primarily on understanding concepts and secondarily on learning techniques of data analysis. Topics include data description and distributions, estimation procedures, hypothesis testing, and model fitting. Illustration of concepts in lecture are made with data from archaeology, physical anthropology, and social/cultural anthropology.

ANTH 121. Archaeology of Mexico. 3 Units

General Education Area/Graduation Requirement: Humanities (Area C2)

Term Typically Offered: Fall, Spring

Provides an upper division introduction to the archeology of Mesoamerica for students not majoring in anthropology. Discusses the evolution of the ancient civilizations of Mesoamerica, including Mexico, Guatemala, Belize, Honduras, and El Salvador. Examines the development of societies from the earliest inhabitants to the growth of empires. Includes coverage of the Olmecs, Monte Alban, Teotihuacan, the Classic Maya, the Toltecs, and the Aztecs.

Note: Cannot be used to meet the requirements of the Anthropology major; interested majors should take ANTH 122.

ANTH 122. The Evolution of Early Mesoamerican States. 3 Units

Prerequisite(s): ANTH 3

Term Typically Offered: Fall, Spring

Traces the emergence of pre-hispanic state societies in Mesoamerica from the growth of the earliest settlements to the collapse of the Aztec empire. Analyzes how complex societies evolved in Mesoamerica, focusing on such evidence as household and village social organization, craft specialization and interregional exchange, religion and ideology, and the logistics of state management and imperial expansion.

ANTH 123. Ancient Technology. 3 Units
Term Typically Offered: Fall, Spring

Examines the importance of various preindustrial technologies, and the techniques and methods involved in their manufacture and use. Topics include stone, bone, wood, and hide working, ceramics, weaving, metallurgy, and other crafts essential to human survival in ancient and contemporary societies around the world.

ANTH 124. Environmental Archaeology. 3 Units

Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Term Typically Offered: Fall, Spring

All human societies depend on their natural surroundings, and so the reconstruction of prehistoric environments is an essential part of archaeological interpretation. Three interrelated aspects of environmental archaeology are considered: (1) general approaches to paleoenvironmental reconstruction, employing various biological and geological indicators; (2) the analysis of human plant and animal food remains; and (3) the geological and other processes that are responsible for the formation of archaeological deposits.

ANTH 125. Historical Archaeology. 3 Units

Term Typically Offered: Fall, Spring

Written history only records a small portion of human activities that occurred in the recent past. Explores the numerous methods of investigation, analysis and interpretation that are available to aid the historical archaeologist in discovering missing information and in some cases correcting erroneous statements, assumptions and interpretations about the past.

ANTH 126. Techniques of Archaeological Analysis. 3 Units

Prerequisite(s): ANTH 3 and Anthropology (Archaeological and Biological Anthropology) concentration.

Term Typically Offered: Fall, Spring

Introduces students to various approaches to archaeological analysis, focusing on how different classes of data are collected, classified, and interpreted to resolve research issues. Includes such topics as the handling, treatment, and analysis of flaked and ground stone tools, plant and animal food remains, and other types of archaeological materials. Lecture one hour, laboratory six hours.

Note: May be repeated once for credit.

ANTH 127. Cultural Resource Management in Theory and Practice. 3 Units

Prerequisite(s): ANTH 3

Term Typically Offered: Fall, Spring

Takes a wide-ranging look at how cultural resources are managed and preserved in California, the greater U.S., and other parts of the world. More than just a review of applicable laws and regulations, it is designed to offer a history of historic preservation, examine its role in our society, and explore the prospects for its continued presence. Practical aspects of Cultural Resource Management (CRM) are reviewed with respect to designing, budgeting, and performing archaeological surveys, site evaluation studies, and data recovery or mitigation programs.

- ANTH 128. Indians of California.** 3 Units
Term Typically Offered: Fall, Spring
- Provides a survey of the traditional cultures of California Native American groups as they existed immediately after Western contact. Exploration of the ecological linguistic, economic, social, political, and religious diversity of California Native American groups provides a background for analysis of current anthropological theories of hunter-gatherer adaptations, subsistence intensification, political economy, cultural complexity, and California prehistory.
- ANTH 129. Human Use of Caves From An Archaeological Perspective.** 3 Units
Prerequisite(s): ANTH 3.
Term Typically Offered: Fall, Spring
- Unique character of caves and their deposits present many challenges that cannot always be met with conventional archaeological, methodological and theoretical approaches. Students will be exposed to investigative techniques that facilitate the understanding of these unique archaeological resources. The investigation of the human use of caves through a worldwide perspective provides students with a thorough introduction to the study of these significant resources.
- ANTH 130. Social Justice in Interdisciplinary Perspective.** 3 Units
Prerequisite(s): Sophomore standing or instructor permission.
Term Typically Offered: Fall, Spring
- Examines the nature and forms of social justice and injustice. Addresses key philosophical and theoretical models and debates over the meaning of social justice, using historical and contemporary examples to highlight important concepts and controversies. Faculty from different departments within SSIS, and occasionally from other colleges, will address how their discipline understands and analyzes issues of social justice. Students will be encouraged to critically assess the assumptions of various perspectives on social justice, and to address the relationship of academe and social activism in achieving social justice. Cross listed as ID 124, ENVS 124, ETHN 124, FACS 124 and SOC 124. Only one may be counted for credit.
- ANTH 131. Europe in the Ethnographic Imagination.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- More than a place or "continent," Europe is a social and ideological construction employed to unite diverse linguistic and cultural communities. Focuses on major themes in contemporary Europeanist anthropology, including transformations within and between local communities and regions (especially with regards to Northern Ireland, the former Society bloc, and Yugoslav federation), immigration, neo-nationalist extremism, the changing character of religious institutions, and the European Union as a framework for organizing identity and society.
- ANTH 134. Japanese Culture and Society.** 3 Units
General Education Area/Graduation Requirement: Humanities (Area C2)
Term Typically Offered: Fall, Spring
- Culture of the Japanese: traditional and modern, rural and urban, cultural and social institutions; village and urban organization; and family structure. Aspects of social change in contemporary rural and urban Japan.
- ANTH 135. Indians of North America.** 3 Units
Term Typically Offered: Fall, Spring
- Provides a survey of traditional Native American societies and culture areas north of Mexico. Readings, lectures, and discussions emphasize primary ethnographic and historic data that provide the richest accounts of Amerindian cultures at the time of European contact and shortly thereafter.
- ANTH 140. Social Anthropology.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Cross-cultural comparisons of the structures and functions of non-literate and complex societies; the diversity of social and territorial units, their analysis and classification; and the study of social organization and control and social change in relation to kinship, marriage and family, lineage and clan, law, politics, economics and religion in diverse societies.
- ANTH 141. Culture Theory.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Exploration of the concepts, dimensions and dynamics of culture theory, viewing culture as an adaptive, comparative, cognitive, structural and symbolic system.
- ANTH 142. Political Anthropology.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Explores political anthropology as a specialized field of anthropological inquiry. Analyzes the articulation of power, authority, and legitimacy in non-state and state based societies. Contributes to an understanding of the transforming powers of modernity and resistance to it and develops a critical appreciation of how age, status, class, ethnicity, race, gender and religious ideologies shape political order within various societies around the world.
- ANTH 143. Culture and Society in Mexico.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Introduction to the cultural and social institutions of the Mexican people. The changing patterns of family, economic, political, religious, and educational systems in Mexico.
- ANTH 144. Contemporary American Culture in Anthropological Perspective.** 3 Units
Prerequisite(s): ANTH 146
Term Typically Offered: Fall, Spring
- Anthropological analysis of contemporary American culture viewed from the perspective of both internal and external observers, with emphasis on such subjects as cultural myths and social realities, values, ideology and world view, family and cultural transmission, social institutions and structures, religious ceremonies and magical rituals, and other customs and practices that establish American culture as one of the more bizarre and exotic in the world ethnographic literature.

- ANTH 145. Peoples and Cultures of Latin America.** 3 Units
Prerequisite(s): ANTH 146 or instructor permission.
Term Typically Offered: Fall, Spring
- Exploration of diversity of peoples and cultures in Latin America and the common experiences such as colonialism, ethnicity, and economy that shape their lives. Aspects of culture examined include: race and ethnicity, colonialism and its implications, the state and political institutions, religious systems, kinship and social organization, gender, economic processes, and issues pertaining to environment, urbanization, globalization, nationalism, and transnationalism.
- ANTH 146. Ethnographic Analysis.** 3 Units
Prerequisite(s): ANTH 2.
Term Typically Offered: Fall, Spring
- Introduces students to current techniques, theories, and debates in ethnographic research and analysis through the use of ethnographies and related works. Critically examines the production of ethnographic knowledge in socio-cultural anthropology from historical and contemporary perspectives.
- ANTH 147. Peoples of Southeast Asia.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring, Summer
- Survey of the native peoples of Southeast Asia (Laos, Vietnam, Thailand, Philippines, Malaysia, Indonesia, Burma and Singapore). Emphasis is on examining the forms of social and cultural pluralism in contemporary Southeast Asian societies.
- ANTH 148. Anthropology of Chinese Societies.** 3 Units
Term Typically Offered: Fall, Spring
- Exploration of the cultures of three Chinese societies (Taiwan, Hong Kong, and the People's Republic of China) in each of their unique historical contexts. A comparison and contrast of how these societies, though sharing a common cultural heritage, have had different paths of development in recent times. Aspects of culture examined include: the state and political institutions; religious systems; kinship and social organization; economic processes; and issues of regional integration, nationalism and transnationalism.
- ANTH 149. Cultures of South Asia.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Exploration of cultural practices in different South Asian societies. Analyzes the impact of colonialism, post-colonialism and discourses of modernity on South Asian societies. Examines the process of state formation, nation-building, communal conflict, economic transformations and the politics of caste, gender and class in contemporary South Asia.
- ANTH 150. Human Osteology.** 4 Units
Prerequisite(s): ANTH 1 and ANTH 1A, or BIO 22; and Anthropology (Archaeological and Biological Anthropology) concentration.
Term Typically Offered: Fall only
- Provides students a hands-on, in-depth study of human osteology. Learn growth and development of the skeletal tissues and identification of the individual skeletal elements, and practice basic measurements, sexing and aging of skeletal material. A prerequisite for advanced techniques in forensic anthropology. Students will work with the department's osteological materials.
- ANTH 151. Human Paleontology.** 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring
- Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and relationships of the extinct forms of humans.
- ANTH 152. Primate Adaptations.** 3 Units
Term Typically Offered: Spring only
- Covers the significant dental, skeletal, and soft-anatomical adaptations of the major living families and/or subfamilies within the Order Primates. In the process of surveying the adaptations, the student will become familiar with evolutionary theory, taxonomy, embryology, ecology, social systems, biomechanics, effects of size, and the functional morphology of the skeletal system in primates. Three-hour seminar, with some lecture and hands-on experience with skeletons and casts.
- ANTH 153. Evolutionary Medicine.** 3 Units
Term Typically Offered: Fall, Spring
- Introduction to the application of evolutionary theory to human health and disease. Evolutionary medicine is a rapidly growing interdisciplinary specialization utilizing insights from evolutionary theory and human evolutionary ecology to inform understandings of human health, development and disease; and also to critique existing biomedical theory about the human condition. Topics include reproduction, child birth, lactation, growth and development, infectious diseases, parasites, diet and nutrition, mental and behavioral disorders, and substance use and addiction.
Note: ANTH 1, BIO 10, BIO 11, or PSYC 2 recommended.
- ANTH 154. Primate Behavior.** 3 Units
Term Typically Offered: Fall, Spring
- Survey of the genetic, ecological and social influences on non-human primate behavior from an evolutionary perspective; covers the major non-human primate groups, including their taxonomy, major adaptations, and their present geographic distribution. The history and development of primate behavior also will be considered with an emphasis on various models for interpreting behavior.
- ANTH 155. Fundamentals of Biological Anthropology.** 3 Units
Prerequisite(s): ANTH 1 and ANTH 1A.
Term Typically Offered: Fall, Spring
- Survey of the development of method and theory in physical anthropology from its origins in zoology, anatomy, and medicine, to the various approaches currently used in the study of human biology and evolution. Concepts considered include the scientific method, modern genetics, evolutionary theory, the race concept and other approaches to explaining human variation, taxonomy and systematics, and macro-evolutionary models. Critical reading and analytical skills will be emphasized.

ANTH 156. Evolution of Human Behavior.**3 Units****Prerequisite(s):** ANTH 1, BIO 10, or PSYC 2 recommended.**Term Typically Offered:** Fall, Spring

Introduction to the application of evolutionary theory to human behavior and psychology. Reviews and contrasts contemporary perspectives of human behavioral evolution with emphasis on insights from the emerging field of evolutionary psychology. Topics include human behavior and cognition as adaptations, "selfish genes," game theory, evolution of social behavior, evolution of altruism, human mating strategies, parenting, behavioral disorders, evolution of the life cycle, human behavioral ecology, Darwinian medicine, and evolutionary psychology.

ANTH 157. Human Variation.**3 Units****Prerequisite(s):** ANTH 1, BIO 10, or instructor permission.**Term Typically Offered:** Fall, Spring

Survey of the basic principles of human genetics with emphasis on the mechanisms that shape human evolution and the development of human races. Analyzes the laws of heredity as exhibited in modern human populations and human adaptability to climatic extremes. Historical development of concepts. Discussion of most current research.

ANTH 158. Human Skeletal Analysis.**4 Units****Prerequisite(s):** ANTH 150.**Term Typically Offered:** Spring only

Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ethnicity; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.

ANTH 159. Forensic Anthropology.**3 Units****Prerequisite(s):** Any lower-division GE Area B2 course.**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5**Term Typically Offered:** Fall, Spring

Overview of forensic anthropology - an applied field of biological anthropology that works with law enforcement, medical examiners, and human rights agencies. Forensic anthropologists answer questions of medico-legal significance by applying techniques designed for analysis of human skeletal remains. Includes determining time since death, the biological profile, trauma analysis and the role of the forensic anthropologist in human rights investigations.

ANTH 160. Linguistic Anthropology.**3 Units****Prerequisite(s):** ANTH 4 or instructor permission.**Term Typically Offered:** Fall, Spring

Introduction to language and linguistics for anthropologists with emphasis on the role of linguistic anthropology in the development of theory and method within the discipline; non-human communication systems, language acquisition, and culture theory; the fundamentals of descriptive and structural linguistics; types of human languages; the diversity and distribution of languages from prehistoric to modern times; fundamentals of historical linguistics and proto-cultural studies.

ANTH 161. African Cultures and Societies.**3 Units****Prerequisite(s):** ANTH 146 or instructor approval**Term Typically Offered:** Fall, Spring

Explores the cultural richness and regional variation of African societies. Engages students with central issues and debates pertaining to Africa in relation to the deepening global interconnectedness of the human socio-cultural worlds. Topical discussions include: colonial legacy, the postcolonial state and traditional authority; ethnic identity and cultural diversity; family, kinship and the African youth; masculinity, sexuality and women; Islam, Christianity and indigenous spirituality; health, poverty and development; migration and globalization; ecotourism and African cultures.

ANTH 162. Language and Culture.**3 Units****Prerequisite(s):** ANTH 4 or instructor permission.**Term Typically Offered:** Fall, Spring

Relationship between language and culture; historical relationships between languages; language families and major cultural traditions; cross-cultural studies of how the language influences perception and the organization of reality; the ways in which language is embedded in social life and practices, and the ways in which various cultural patterns and values are reflected in language.

ANTH 163. Urban Anthropology.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Overview of both anthropological method and theory applied to research of urban environments and a survey of significant anthropological studies that have been conducted in these settings. Examines such topics as the urbanization process, the culture of cities, urban sub-cultures, social problems in urban areas, social networks and adaptive kinship strategies in cities, and the concentration and exercise of power, wealth and influence in urban centers.

ANTH 164. Culture Change.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Anthropological study of mechanisms and process of social and culture change; basic theories of ecological adaptation and cultural evolution; action chains and cultural patterns; technological innovation, migration, acculturation, cultural dissonance, conflict, and cultural revitalization; analysis of case studies emphasizing contemporary conditions and problems; rapid technological innovation, population control, immigration and acculturation, social diversification, ethnic conflict.

ANTH 165. Applied Anthropology.**3 Units****Prerequisite(s):** ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176; and Anthropology (Culture, Language, and Society) concentration.**Term Typically Offered:** Fall, Spring

Provides tools for exploring the application of an anthropological paradigm to various aspects of culture change and conflict. Content is organized into a series of critical topical areas such as modernization, economic development, human services, and urbanization.

ANTH 166. Rise of Religious Cults. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring, Summer

Examination of cult movements, involving comparisons of the ideals, objectives and symbolic processes common to ecstatic religious movements throughout the world -- from Melanesian cargo cults to the Peoples' Temple. Anthropological perspectives are used to examine religious cults as conscious attempts to perpetuate traditional values and social goals or to radically change the status quo; millenarian movements, crisis cults, nature communes, exotic religious importations, and cult characteristics of modern secular movements.

ANTH 167. Religion and Culture. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Examines ethnographic perspectives on the character and intersections of religion, ritual, and culture. Surveys the thought of "classical" social theorists (e.g., Durkheim, Tylor, Weber, and Evans-Pritchard), and concentrates on central topics in the anthropology of religion. Including the political nature of embodiment and trance, religion and nationalism, the significance of language and performance, the gendered character of many religious phenomena, and science and religion as competing epistemologies.

ANTH 168. Folklore in Anthropological Perspective. 3 Units**Prerequisite(s):** ANTH 160 or ANTH 162 or instructor permission.**Term Typically Offered:** Fall, Spring

Anthropological contributions to the study of folklore; survey of oral literature and other folklore forms, such as myth, folktale, legend, proverb, riddle, and games, in their social contexts; folklore as "autobiographical ethnography;" folklore in everyday life, survey and comparison of folklore traditions in several culture areas.

ANTH 169. Research Methods in Linguistic Anthropology. 3 Units**Prerequisite(s):** ANTH 160 or ANTH 162, and Anthropology (Culture, Language, and Society) concentration.**Term Typically Offered:** Fall, Spring

Consideration of language in its social context: language and power, language and gender, interethnic communication, language and race, pidgins and creoles, multilingualism, standardization, language ideology. Instruction in ethnographic and linguistic methods of data collection and analysis; identification of socially significant linguistic variables. Contributions of the study of contextualized speech to linguistic theory.

ANTH 170. The Religious Landscape of the Sacramento Valley. 3 Units**Prerequisite(s):** GEAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Humanities (Area C2), Writing Intensive Graduation Requirement (WI)**Term Typically Offered:** Fall, Spring

Introduction to the field study of religious communities. Addresses the nature of religious pluralism in the U.S. today. The practice and belief systems of at least five different religious communities will be studied each semester. Students are required to do an in-depth term project based on research in one or more religious communities.

Cross Listed: HRS 170; only one may be counted for credit.

ANTH 171. Bioarchaeology: Analyzing Human Remains from Archaeology Sites. 3 Units**Prerequisite(s):** ANTH 1 and ANTH 1A or instructor permission**Term Typically Offered:** Fall, Spring

An exploration of research conducted on human remains from archaeological sites, including historical and ethical perspectives. Examines the effects of funerary context and preservation on skeletal remains. Demonstrates relevance of human skeletal analysis to understanding demography, causes of human skeletal variation, dietary patterns, and relevant themes in paleopathological research. Special emphasis placed on infectious disease, growth and development, activity patterns, injury and trauma, craniofacial adaptations, and methods for identifying genetic relationships in human skeletal remains.

ANTH 172. Anthropologies of Music. 3 Units**Prerequisite(s):** ANTH 146 or Instructor Permission.**Term Typically Offered:** Fall, Spring

Introduces students to current anthropological research on social groups and cultural practices that orient around and draw inspiration from music, wherever and however it is conceived. Course focus is not on music theory or structure; rather, it critically examines anthropological and ethnographic works that focus on the relations among such social domains and features as visual and aural aesthetics, political belief, gender, ritual, religion, race, and ethnicity.

ANTH 173. Anthropology of Contemporary Asia. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission**Term Typically Offered:** Fall, Spring

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ANTH 174. Anthropology of Food. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission**Term Typically Offered:** Fall, Spring

Examines food and eating from an anthropological perspective. Demonstrates how food communicates social messages about individual or group identity, creates social boundaries or forges belonging, and can reflect one's politics, values, and ethics. Through ethnographic examples and attention to global processes, this course explores food production, circulation, and consumption.

ANTH 175. Anthropology of Globalization. 3 Units**Prerequisite(s):** ANTH 146 or instructor permission**Term Typically Offered:** Fall, Spring

The course introduces students to major themes that inform anthropological understanding of globalization. This course will explore theoretical perspectives, topics, and methods of analysis developed in anthropology to capture the effects of intermingling global/local cultural forces and the diverse relations of power that structure them and in which they are embedded.

ANTH 176. Museums, Culture, and Society.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Provides an introduction to museum anthropology. Surveys the emergence of modern anthropology from its origins in 17th century natural history to its late 19th century institutionalization in museums. Explores the role of collectors, curators and financial patrons in the development of museums and social theory. Examines the contemporary poetics and politics of museums and cultural interpretation, including cultural property rights, cultural self-representation, collaborative exhibit development, and the ethnography of museums.

ANTH 177. Museum Methods.**3 Units****Prerequisite(s):** ANTH 176 and Anthropology (Culture, Language, and Society) concentration.**Term Typically Offered:** Fall, Spring

Combined lecture and laboratory course designed to teach basic museum methods. Surveys contemporary issues and practices in museum governance, management, interpretation, and evaluation. Provides hands-on collections and exhibit experience, including participation in the design, fabrication and installation of an exhibition.

ANTH 178. Internship.**3 - 4 Units****Term Typically Offered:** Fall, Spring

Practical experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.

Note: May be repeated for credit.

Credit/No Credit

ANTH 181. Anthropology of Human Rights.**3 Units****Prerequisite(s):** ANTH 146 or instructor permission.**Term Typically Offered:** Fall, Spring

Examines multiple dimensions of human rights from an anthropological perspective. Explores the history and development of human rights ideas and legal conventions, and how these ideas and conventions are appropriated, adapted, contested or rejected in different cultural and political contexts. Using ethnographic case studies from around the world, addresses how the human rights discourse mediates the relationship between specific groups of people, their national states and international conventions and institutions.

ANTH 183. Women Cross-Culturally.**3 Units****General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Position of women in various societies, preliterate through contemporary industrial; the evolution of women's roles and rights cross-culturally.

ANTH 186. Culture and Poverty.**3 Units****Prerequisite(s):** GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.**General Education Area/Graduation Requirement:** Writing Intensive Graduation Requirement (WI), GE AREA D, Race & Ethnicity Graduation Requirement (RE)**Term Typically Offered:** Fall, Spring

Analyzes poverty in American society: the cross-cultural context, social inequality in the U.S., theoretical perspectives and their influence on policy, present trends and implications for the future.

ANTH 188. Anthropology of the Body.**3 Units****Term Typically Offered:** Fall, Spring

Study of the diverse ways that humans explain and attempt to alter the human body. Focus is on the meanings and implications of our own bodily experiences through objective comparison of the experiences, explanations and techniques found in our society with those in others.

ANTH 190. Advanced Topics in Linguistic Anthropology.**3 Units****Prerequisite(s):** ANTH 160 or ANTH 162 or instructor permission.**Term Typically Offered:** Fall, Spring

Seminar examining contemporary developments in theories and methods of linguistic anthropology.

Note: May be repeated for credit providing the topic and instructor are not the same.**ANTH 191. Anthropology Practicum.****3 Units****Prerequisite(s):** ANTH 165 or ANTH 169 or ANTH 177 or ANTH 192B; and senior level**Term Typically Offered:** Fall, Spring

Students work 3-6 hours per week off campus in one of several research institutions under the supervision of institutional personnel. Students are required to become familiar with the scholarly literature relevant to their placement, to participate in on-campus meetings, and to write a research paper integrating the research and fieldwork aspects of the practicum. Permission of instructor and ANTH coordinator required prior to registration. Open to seniors only.

ANTH 192A. Laboratory Work in Archaeology.**1 Unit****Prerequisite(s):** ANTH 3**Corequisite(s):** ANTH 195A; may be waived with instructor permission.**Term Typically Offered:** Fall, Spring

Introduces methods used in the basic laboratory preservation, cataloging, and initial analysis of various materials recovered through ANTH 195A survey and excavation projects; always offered in conjunction with ANTH 195A.

Note: May be repeated for credit.**ANTH 192B. Laboratory in Ethnographic Techniques.****1 Unit****Prerequisite(s):** ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.**Corequisite(s):** ANTH 195B.**Term Typically Offered:** Fall, Spring

Design and discussion of research strategies, primary ethnographic techniques, the development of interviewing skills, and practice in the use of various recording technologies.

- ANTH 195A. Fieldwork in Archaeology.** 2 Units
Prerequisite(s): ANTH 3
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring
- Introduction to archaeological field methods, covering practical aspects of how to identify and investigate isolated artifact finds, particular sites and features, and entire landscapes. Covering survey and excavation techniques, basic approaches to sampling, mapping and navigation, stratigraphic excavation, artifact and feature recording, and recovery methods.
Note: May be repeated for credit.
- ANTH 195B. Fieldwork in Ethnology.** 2 Units
Prerequisite(s): ANTH 105 or ANTH 108 or ANTH 140 or ANTH 141 or ANTH 142 or ANTH 167 or ANTH 168 or ANTH 176, and Anthropology (Culture, Language, and Society) concentration.
Corequisite(s): ANTH 192B
Term Typically Offered: Fall, Spring
- Directed team fieldwork in ethnology.
- ANTH 195C. Fieldwork in Physical Anthropology.** 2 - 3 Units
Term Typically Offered: Fall, Spring
- Individual or group fieldwork in various areas of physical anthropology, under the supervision of individual faculty members; may involve related supervised laboratory work.
- ANTH 196S. Senior Seminar in Anthropology.** 3 Units
Prerequisite(s): Anthropology majors with senior standing
Term Typically Offered: Fall, Spring
- Anthropology approaches knowledge about the human condition from multidisciplinary perspectives. This senior seminar synthesizes fundamental themes from among the sub-disciplines. Students will engage with concepts and issues from different anthropological perspectives, and then work to identify common historical, methodological and theoretical anthropological themes. On completion of the course, students will have learned to seek and interpret anthropological knowledge in a holistic fashion.
- ANTH 196T. Zooarchaeology.** 3 Units
Prerequisite(s): ANTH 3
Term Typically Offered: Fall, Spring
- An examination of past and recent research conducted on animal remains from archaeological sites. Discussion and survey of the primary literature in evaluating the role animal exploitation plays in human evolution and among small scale foraging, pastoralist, and complex societies. Emphasis on vertebrate taphonomy, reconstruction of diet from faunal remains, and ecological and evolutionary theory to understand human-animal relationships through time.
- ANTH 199. Special Problems.** 1 - 3 Units
Prerequisite(s): Approval of the faculty member under whom the individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open only to students who appear competent to carry on individual work. May be repeated for credit.
- Credit/No Credit
- ANTH 200. General Methods in Anthropology.** 3 Units
Term Typically Offered: Fall, Spring
- Explores uses of scientific methodology in anthropology through the examination of specific case studies in the various specialties. Focus is on the relationship among techniques, methods, and methodology; hypothesis and theory; units of analysis and comparison; deductive and inductive reasoning; inferential processes; various types of comparison (casual, controlled, hologicistic); limitations of, and objections to, "the comparative method."
- ANTH 201. Anthropological Theory.** 3 Units
Prerequisite(s): Graduate status in anthropology or instructor permission.
Term Typically Offered: Fall, Spring
- Intensive reading and seminar discussion in topics on anthropological theory and research.
Note: May be repeated for credit provided topic is not repeated.
- ANTH 202. Biological Anthropology Seminar.** 3 Units
Term Typically Offered: Fall, Spring
- Survey of contemporary issues in physical anthropology.
- ANTH 203. Archaeology.** 3 Units
Term Typically Offered: Fall, Spring
- Explores the intellectual development of archaeological method and theory; examines the history of archaeological thought from its advent to the present day, looking in detail at pre-scientific, culture-historical, processual, and post-processual approaches to the discipline; emphasis is placed on the role of archaeology as a branch of anthropology and as a historical, humanistic, and/or scientific enterprise.
- ANTH 204. Current Problems in Archaeological Method and Theory.** 3 Units
Term Typically Offered: Fall, Spring
- Explores recent methodological and theoretical developments within archaeology; focus is on contemporary debates within the discipline; topical coverage varies; examines conceptual and practical concerns, highlighting possibilities and limitations of new approaches to archaeological problems.
Note: May be repeated for credit provided topic and instructor are not repeated.
- ANTH 205. Ethnology.** 3 Units
Term Typically Offered: Fall, Spring
- Seminar is designed for students to develop a working knowledge of anthropological approaches to a number of major issues in ethnology. The focus is on the analysis of case studies.
Note: May be repeated once for credit with different instructor.
- ANTH 207. Language and Culture.** 3 Units
Term Typically Offered: Fall, Spring
- Critical examination of contemporary studies in the relationship between language and culture; nonhuman primate communication and the origin of speech; non-verbal communication; historical linguistics; comparative semiology; ethnosemantics; applications of linguistic models of analysis in the study of culture.
Note: May be repeated for credit given that the instructor changes.

- ANTH 210. Research Design in Anthropology Seminar. 3 Units**
Prerequisite(s): Graduate student status or instructor permission
Term Typically Offered: Fall, Spring
- Emphasizes research design in anthropology with a focus on proposal writing in the discipline. Centers on the development of the thesis research proposal while gaining insight on the process of acquiring competitive funding from government agencies and private foundations. Covers the fundamentals of identifying a research question, developing hypotheses, comprehensive literature reviews, intellectual merit and broader impacts of research, and budget justification.
- ANTH 222. Bioarchaeology Seminar. 3 Units**
Prerequisite(s): Graduate status in anthropology.
Term Typically Offered: Fall, Spring
- Provides an intensive, detailed discussion of method and theory in the skeletal biology of past human populations. Topics discussed include: demography, dietary analysis, mortuary dimensions, health and disease, biological distance and DNA analysis. Focuses on the interaction of biology and behavior, particularly the influence of culture and the environment on the skeletal and dental tissues.
- ANTH 223. Areal Archaeology. 3 Units**
Term Typically Offered: Fall, Spring
- Provides an intensive examination of archaeological problems within a selected regional or topical area. Through general readings and case studies, students will critically assess how current perspectives regarding relevant issues have evolved and determine how contemporary viewpoints might be improved or expanded.
Note: May be repeated for credit provided topic and instructor are not repeated.
- ANTH 226. Advanced Techniques of Archaeological Analysis. 3 Units**
Prerequisite(s): ANTH 126 or instructor permission.
Term Typically Offered: Fall, Spring
- Examines more refined approaches to archaeological analysis, focusing on how various classes of data are collected, classified, and interpreted to resolve directed research problems. Emphasis is on such topics as sampling procedures and statistical assessment of data rather than descriptive analysis and interpretation. Lecture one hour; laboratory six hours.
- ANTH 251. Human Paleontology. 3 Units**
 Survey of the field of human evolution from primate beginnings to modern humans. Emphasizes the interpretation of the fossil evidence and the major trends in hominid evolution, including the origins and the relationships of the extinct forms of humans.
- ANTH 258. Human Skeletal Analysis. 4 Units**
Prerequisite(s): ANTH 150 or instructor permission.
Term Typically Offered: Spring only
- Provides advanced techniques in osteology and forensic anthropology essential for many practicing physical anthropologists. Discussion and survey of the primary literature, followed by intensive hands-on experience with human skeletal remains. Included: techniques for determining age, sex and ancestry; measurement; pathology; and trauma. The role of the forensic anthropologist and archaeologist, ethical considerations, and human rights issues are also covered. Course format is a three-hour seminar, and a three-hour lab involving substantial hands-on experience with human skeletal remains.
 Cross listed: ANTH 158
- ANTH 274. Environmental Anthropology. 3 Units**
Term Typically Offered: Fall, Spring
- Examines the mutual constitution of nature-culture, society-environment in diverse ethnographic settings. Demonstrates that ideas about nature and material engagements with it are shaped by the dynamics of social, political, and economic relations in historical contexts. Surveys a range of environmental issues and the cultural politics of environmental struggles through different conceptual, theoretical, analytical approaches in cultural anthropology.
- ANTH 276. Museum Anthropology. 3 Units**
Prerequisite(s): Graduate status in Anthropology or instructor permission.
Term Typically Offered: Fall, Spring
- Surveys the practical, theoretical, and historical dimensions of museum anthropology and material culture studies, with particular emphasis on the U.S. and California. Situates contemporary issues related to the collection, exhibition, and repatriation of ethnographic and archaeological materials within the sociopolitical context of the globally based indigenous rights movement.
Note: Recommended for graduate students who plan to intern in the Anthropology Museum.
- ANTH 278. Internship. 3 - 4 Units**
Term Typically Offered: Fall, Spring
- Practical graduate level experience in an approved professional environment. Student intern will work directly with professionals in public and private agencies where opportunities exist for anthropological work. Supervision and evaluation are provided by a faculty internship director and the on-site supervisor. Placements require from 15-20 hours per week.
Note: May be repeated for credit given that topic and instructor changes.
- Credit/No Credit
- ANTH 292A. Laboratory Work in Archaeology. 1 Unit**
Prerequisite(s): ANTH 192A.
Corequisite(s): ANTH 295A.
Term Typically Offered: Fall, Spring
- Laboratory preservation, cataloging and initial analysis of materials recovered through archaeological fieldwork. Graduate students are expected to help supervise undergraduate students and complete a self-directed project under the supervision of the instructor.
Note: Participant must have already completed ANTH 192A or its equivalent. May be repeated once for credit.
- ANTH 295A. Fieldwork in Archaeology. 2 Units**
Prerequisite(s): ANTH 195A or equivalent.
Corequisite(s): ANTH 292A.
Term Typically Offered: Fall, Spring
- Students will assist the instructor in supervising undergraduate students or complete an assigned project in addition to the required fieldwork.
Note: May be repeated given that the topic and instructor changes.
- ANTH 295B. Fieldwork in Ethnology. 2 - 3 Units**
Term Typically Offered: Fall, Spring
- Supervised graduate level fieldwork in ethnology and ethnography.

ANTH 295C. Fieldwork in Physical Anthropology. 2 - 3 Units
Term Typically Offered: Fall, Spring

Supervised graduate level fieldwork in physical anthropology. May include laboratory research.

ANTH 299. Special Problems. 1 - 3 Units
Prerequisite(s): Approval of faculty member under whom individual work is to be conducted and the Department chair.
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students who appear competent to carry on individual work at the graduate level; May be repeated given that topic and instructor changes; May be taken twice in the same semester.

Credit/No Credit

ANTH 500. Master's Thesis. 3 Units
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring

Completion of a thesis approved for the master's degree. Number of units of credit is determined by the candidate's Master's degree advisory committee. Should be taken in final semester prior to the completion of all requirements for the degree.

Arabic (ARBC)

ARBC 1A. Elementary Arabic. 4 Units
Term Typically Offered: Fall, Spring

Introduction to standard Arabic, including Arabic letters and sounds, the essentials of Arabic grammar, and basic instruction in all four language skills: speaking, reading, listening and writing. In addition to getting a start in modern Arabic, students will also learn about social aspects of the use of Arabic.

ARBC 1B. Elementary Arabic. 4 Units
Prerequisite(s): ARBC 1A or instructor permission.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring

Continuation of ARBC 1A.

ARBC 2A. Intermediate Arabic. 4 Units
Prerequisite(s): ARBC 1B or instructor permission.
General Education Area/Graduation Requirement: Foreign Language Graduation Requirement
Term Typically Offered: Fall, Spring

Continuation of ARBC 1B with an ongoing emphasis on communication skills and the rudiments of literacy, as well as continued integration of cultural and social components with the language learning experience.

ARBC 2B. Intermediate Arabic Conversation 2. 4 Units
Prerequisite(s): ARBC 2A or instructor permission.
Term Typically Offered: Fall, Spring

Continuation of ARBC 2A intermediate conversation with an ongoing emphasis on communication skills and the rudiments of literacy, as well as continued integration of cultural and social components with the language learning experience.

ARBC 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed reading.
Note: Departmental petition required.

Credit/No Credit

Art (ART)

ART 1A. Art in the Western World: From Stone Age to End of Middle Ages. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

Survey of architecture, crafts, painting, and sculpture of the Eastern Mediterranean and European cultures.

Note: Recommended for freshman or sophomore years. It is recommended that ART 1A be taken before ART 1B.

ART 1B. Art in the Western World: From Renaissance to Baroque. 3 Units

General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

Survey of architecture, crafts, painting, and sculpture of the Eastern Mediterranean and European cultures.

Note: Recommended for freshman or sophomore years. It is recommended that ART 1A be taken before ART 1B.

ART 1C. Global Modern and Contemporary Art. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

A 3-unit lecture based survey of the history of world art from the late 18th century to the present, from the European Rococo, Enlightenment, age of science and revolution, through Neo-Classicism, Romanticism and the rise of the international avant-garde, Realism, Impression, Symbolism, photography and film. In the 20th century, Fauvism, Cubism, the Bauhaus, Expressionism, Pop, Minimal art, Postmodernism, conceptualism, performance, video and new media are considered from global perspectives and artistic production. Part of the art history foundation sequence.

Note: Recommended for freshman or sophomore years. It is also recommended that ART 1A and/or ART 1B be taken before ART 1C.

ART 2. History of Islamic Art. 3 Units
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall only

Introduces students to the art and architecture of major Islamic cultures and offers a background in the religion and philosophy of Islam. Works of art from Muslim countries and regions are studied in comparison to those of other major Asian and European cultures. Lecture. 3 units

ART 3A. Traditional Asian Art. 3 Units General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall only	ART 22. Beginning Painting. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Fall, Spring
<p>Introduces students to the art and architecture of Asia from the pre-historic through pre-modern periods (approximately 1600). The styles, subjects, and significance of the art of India, Sri Lanka, Indonesia, Thailand, Burma, Cambodia, Tibet, China, Japan and Korea will be presented in a broad context including the history, geography, ethnic populations, languages, and religions of these countries (i.e., Buddhism, Hinduism, Jainism, Islam, Daoism, and Shinto).</p>	<p>Introduction to the methods and problems of painting in oil or acrylic medium. Note: May be taken twice for credit. Fee course. Fee course.</p>
ART 3B. Modern and Contemporary Asian Art. 3 Units General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Spring only	ART 24. Beginning Watercolor. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Not offered
<p>Covers the art and architecture of Asia from the modern period to the present day. Attention will be given to the impact of outside influences upon the development of art in several Asian countries, including India, Thailand, Vietnam, Indonesia, Philippines, China, Korea, and Japan. Contacts between those countries, their exposure to western visual culture through new or increased contact with the west, and the spread of Christianity all had an impact on Asian art during the period under consideration.</p>	<p>Introduction to both transparent and opaque watercolor. Note: May be taken twice for credit. Fee course. Fee course.</p>
ART 5. Native American Art. 3 Units General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Spring only	ART 27. Beginning Color. 3 Units Term Typically Offered: Fall, Spring
<p>Historical survey and visual study of the development of American Indian art in North America from the prehistoric periods to the end of the 19th century.</p>	<p>Investigation of the interactions of color based on the laws of perception, color composition, space, and design. An empirical study of the phenomena of color as developed by Josef Albers and Johannes Itten, and the use of color as a visual experience with acrylic paints.</p>
ART 7. Introduction to Art and Visual Culture. 3 Units General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall, Spring	ART 40. Beginning Printmaking. 3 Units Prerequisite(s): ART 20A or ART 60 Term Typically Offered: Fall, Spring
<p>For the general education student who wants to explore the world of art and visual culture. A wide range of multicultural, historical, and contemporary art works, art media, art history, art ideas, and art practices are presented through illustrated lectures, discussions, field trips, guest lectures, studio visits, and beginning-level art projects. Field trip(s) may be required.</p>	<p>Introduction to printmaking processes, their history, and their contemporary applications. Students will learn a combination of basic relief, intaglio, lithography, monotype, and/or screen print techniques, along with their historical and contemporary context. Note: Fee course. This course will carry a fee of \$75 to cover ink, plates, and other supplies.</p>
ART 20A. Beginning Drawing. 3 Units General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall, Spring, Summer	ART 40B. Basic Printmaking: Etching. 3 Units Term Typically Offered: Fall, Spring
<p>Introduction to various techniques of and approaches to drawing, using still lifes, landscapes, and figures. Note: fee course. Fee course.</p>	<p>Introduction to intaglio techniques, including etching, drypoint, and aquatint. Fee course. Fee course.</p>
ART 20B. Intermediate Drawing. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Fall, Spring	ART 40D. Basic Printmaking: Relief. 3 Units Term Typically Offered: Fall, Spring
<p>Extension of drawing experiences initiated in ART 20A, with emphasis on surveying materials and concepts pertinent to contemporary and historical drawing. Note: fee course.</p>	<p>Introduction to wood and linoleum cutting and printing. Fee course. Fee course.</p>
Fee course.	ART 40E. Basic Printmaking: Silkscreen. 3 Units Term Typically Offered: Fall, Spring
Fee course.	<p>Introduction to silkscreen processes and printing. Includes the construction of the equipment necessary to print direct drawing materials, and photo-established imagery. Fee course. Fee course.</p>
	ART 50. Beginning Ceramics. 3 Units Term Typically Offered: Fall, Spring
	<p>Projects in basic techniques and approaches to the potter's wheel. Fee course. Note: May be taken twice for credit.</p>
	Fee course.

ART 53. Beginning Hand-Built Ceramics. Term Typically Offered: Fall, Spring	3 Units	ART 86. Clay Sculpture. General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall, Spring	3 Units
<p>Basic techniques and approaches to pottery through practice in hand-building methods, including coil, slab, pinch, and combinations thereof. Fee course.</p> <p>Note: May be taken twice for credit.</p>		<p>Includes work with the various forms of hand-built sculpture in both low- and high-fire clay. Glazes are used sparingly to stress forms and their relationships. Fee course.</p>	
<p>Fee course.</p>			
ART 60. Two-Dimensional Composition. Term Typically Offered: Fall, Spring	3 Units	ART 88. Beginning Sculpture. General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall, Spring	3 Units
<p>Structured exploration of principles used to organize two-dimensional images. Basic art elements and their properties are explored in a series of progressive projects.</p> <p>Note: Recommended for freshman or sophomore years.</p>		<p>Introduction to traditional and non-traditional processes of sculpture and three-dimensional forms in space. Students can expect to use the following materials: cardboard, clay, metals, plaster, plastics, wire and wood to explore the making of three-dimensional imagery. Investigations will include the formulation of ideas relative to sculptural problem solving while discovering historical and contemporary examples of sculpture. Fee course.</p>	
<p>Fee course.</p>		<p>Fee course.</p>	
ART 70. Form, Space Vision. General Education Area/Graduation Requirement: Arts (Area C1) Term Typically Offered: Fall, Spring	3 Units	ART 97. Beginning Electronic Art. Term Typically Offered: Fall, Spring	3 Units
<p>Foundation in three-dimensional design primarily concerned with the visual dialogue between form and space. A heightened visual sensitivity for three-dimensional composition is a major objective of every project. Line, plane, and volume are utilized separately and in concert to construct three-dimensional forms. A variety of materials are employed in the activation of form and space: wire, cardboard, clay, wood, and plaster. Fee course.</p> <p>Note: Recommended for freshman or sophomore years.</p>		<p>Explores the creative potential of imaging software used by visual artists. Familiarity with software, hardware and output devices will be established. The creation of digital art will be considered within the framework of current ideas in art and culture. No previous computer experience is necessary. Fee course.</p>	
<p>Fee course.</p>		<p>Fee course.</p>	
ART 74. Beginning Jewelry. Term Typically Offered: Fall, Spring	3 Units	ART 100. Origins of American Indian Art. Term Typically Offered: Fall only	3 Units
<p>Introduction to techniques and tools used in the design and fabrication of jewelry, such as lost wax casting, stone setting, and finishing processes. Emphasis is on compositional arrangement and finish. Fee course.</p>		<p>Survey of 19th and 20th century American Indian art. Emphasis is on the student's involvement with Indian art and includes discussion of Indian philosophy and art techniques.</p>	
<p>Fee course.</p>		<p>ART 101. Photography, Inception to Mid-Century. Term Typically Offered: Fall only</p>	
ART 75. Beginning Metalsmithing. Term Typically Offered: Fall, Spring	3 Units	<p>Introduces students to the history of photography, from inception to Mid-20th Century. Practices of photographers and artists, working with photographic technologies, will be discussed. The course examines photographic vision and the impact of the medium through lectures and readings by art historians and photographers.</p> <p>Cross-listed: PHOT 101.</p>	
<p>Introduction to techniques, tools, and methods used in fabrication of ferrous and non-ferrous metal, such as piercing, riveting, soldering, forging, and finishing processes. Emphasis is on composition and imagery. Fee course.</p>		<p>ART 102. Themes in World Art and Visual Culture. ✍️ 3 Units Prerequisite(s): GVAR certification before Fall 2009; or WPJ score of 80 or above; or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.</p>	
<p>Fee course.</p>		<p>General Education Area/Graduation Requirement: Arts (Area C1), Writing Intensive Graduation Requirement (WI) Term Typically Offered: Fall, Spring</p>	
ART 80. Materials Methods. Term Typically Offered: Fall, Spring	3 Units	<p>A thematic exploration of world art and visual culture throughout human history. Throughout this course, students will be able to draw connections between works of art created in various time periods and from a diverse variety of cultural contexts.</p>	
<p>Develops students' awareness of traditional and contemporary techniques used as the basis for fine and applied art. Devoted to materials and their methods of application, with most materials introduced via their traditional antecedents (for example, hide glue before modern epoxies). May be team taught. Lecture one hour; laboratory four hours. Fee course.</p> <p>Note: Sophomore status and above recommended.</p>			
<p>Fee course.</p>			

- ART 103. Art of the Ancient Mediterranean.** 3 Units
Prerequisite(s): ART 1A
Term Typically Offered: Fall only
 Architecture, crafts, and sculpture in the ancient Mediterranean world from ca. 700 BCE to ca. 500 CE.
- ART 105. Medieval Art.** 3 Units
Prerequisite(s): ART 1A or equivalent.
Term Typically Offered: Spring only
 Architecture, crafts, painting, and sculpture of medieval Western Europe.
- ART 106. Renaissance Art.** 3 Units
Prerequisite(s): ART 1A or ART 1B, or equivalent.
Term Typically Offered: Fall only – even years
 Architecture, painting, graphic arts, sculpture, and crafts principally of the 15th and 16th centuries. Emphasis is on the art of Europe in the historical context of an emerging global consciousness.
- ART 107. Baroque and Rococo Art.** 3 Units
Prerequisite(s): ART 1B or equivalent.
Term Typically Offered: Spring only – odd years
 European architecture, painting, and sculpture of the 17th and 18th centuries.
- ART 108. 19th Century Art.** 3 Units
Prerequisite(s): ART 1C or equivalent.
Term Typically Offered: Fall, Spring
 European architecture, painting, and sculpture of the 19th century.
- ART 109. Modern Art.** 3 Units
Prerequisite(s): Upper-division standing and ART 1C or equivalent with instructor approval.
Term Typically Offered: Fall only
 Presented as the cultural episode that began with the emergence of the avant-garde in mid-nineteenth century Paris and ended in the middle of the twentieth century with WW II and the beginning of the postmodern era: from Realism, the birth of photography, and Impressionism through the high modernist movements associated with the international School of Paris, including Fauvism, Cubism, Constructivism, Dada, and Surrealism. It concludes with post-WW II expressions, including Abstract Expressionism.
- ART 110. US and Caribbean Art: Race and Representation.** 3 Units
Prerequisite(s): Any lower-division GE course in art history (ART 1A, 1B, 1C, 2, 3A, 3B, 4, 5, or 7).
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
 Provides an overview of U.S. and Caribbean art from the colonial period to the present, with an emphasis on the role of race in constructing individual, community, and national visual identities. Considers artworks by African-American, Asian-American, Indigenous, Latinx, and White artists, underscoring the dynamic interactions between race, class, gender, and sexuality in the visual arts. Field trip.
 Field trip(s) may be required.
- ART 111. Latin American and Latino Art History.** 3 Units
Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), Arts (Area C1)
Term Typically Offered: Fall only
 Provides an overview of Latin American and Latino art from the independence movements of the 1820s to the present. After an introductory survey of pre-Columbian and Spanish colonial art, the art of Mexico, Central and South America, the Caribbean and the U.S. is studied within the contexts of contemporaneous cultural, intellectual, political and social history. The diverse visual cultures of Latin American and Latino art are thematically unified by an examination of common concerns and motivations.
- ART 112. Contemporary Art.** 3 Units
Prerequisite(s): ART 1C or ART 109 or instructor permission.
Term Typically Offered: Spring only
 Beginning with international Pop art and Minimalism in the 1960s, surveys the history of contemporary art from the end of avant-garde modernism to the postmodernism and globalism of today. Lectures, discussions, readings and assignments offer insights into the contexts, attitudes, and ideas behind current art and visual culture.
Note: Taught in conjunction with ART 212.
- ART 113B. Asian Art and Mythology.** 3 Units
Prerequisite(s): ART 3A or equivalent or instructor permission.
Term Typically Offered: Spring only – odd years
 Survey and investigation of selected myths from Asian cultures and traditions.
- ART 114. Topics in Early Modern Art.** 3 Units
Prerequisite(s): ART 1A or ART 1B; an upper division art history course in a related subject area; upper division or post-baccalaureate status; and GWAR certification before Fall 2009; or WPJ score of 80 or above; or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.
Term Typically Offered: Fall only – even years
 Seminar on topics in early modern art history.
Note: Course may be taken twice for credit, if the topic is not the same.
- ART 115. Topics in Asian Art.** 3 Units
Prerequisite(s): Upper division or graduate status; completion of ART 3A (or equivalent); and an upper division Asian art history course such as ART 117A, ART 117B, ART 113B, or or instructor permission; GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109M/W.
Term Typically Offered: Fall only
 Seminar on topics in Asian art.

- ART 116. Topics in Modern and Contemporary Art. 3 Units**
Prerequisite(s): Upper division or graduate status; completion of ART 1C (or equivalent); and an upper division art history course in a related subject area (or instructor permission); GVAR certification before Fall 09, WPJ score of 70+, or at least a "C-" in ENGL 109 M/W.
Term Typically Offered: Fall only
- Seminar on topics in modern and contemporary art history.
- ART 117A. Art of India and Southeast Asia. 3 Units**
Prerequisite(s): ART 3A or equivalent, or instructor permission.
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall only
- Provides a broad overview of the architectural remains and visual arts of India and Southeast Asia from prehistory to the present. Consideration will be given to the art styles, iconography, history, geography, ethnic populations, languages, and religions (i.e., Buddhism, Hinduism, Jainism, and Islam) of each region.
- ART 117B. Art of China and Japan. 3 Units**
Prerequisite(s): ART 3A or equivalent, or instructor permission.
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Spring only
- Provides a broad overview of the architectural remains and visual arts of China and Japan from prehistory to the present. Consideration will be given to the art styles, iconography, history, geography, ethnic populations, languages, and religions (i.e., Buddhism, Taoism, and Shintoism) of each region.
- ART 117C. Art of Korea. 3 Units**
Term Typically Offered: Spring only – even years
- Introduces students to the art and architecture of Korea from the pre-historic through contemporary periods. The styles, subjects, and significance of the art of Korea will be presented in a broad context including the history, geography, ethnic populations, languages, and religions of Korea (i.e., Buddhism, Daoism, Confucianism, and Christianity).
- ART 118A. Modern Architecture. 3 Units**
Prerequisite(s): ART 1C (or equivalent), or instructor permission.
Term Typically Offered: Not offered
- A survey of modern architecture which covers the architectural theories and principles underlying certain significant structures. Special consideration is given to an analysis of the works of 20th century pioneers and their followers, such as Wright, Gropius, Le Corbusier, Van der Rohe, Aalto, and Johnson, among others, and to certain movements, such as the International Style, Brutalism, and Formalism.
- ART 118B. California Architecture and Urban History. 3 Units**
Term Typically Offered: Fall, Spring
- Survey of the history of California architecture and its impact on the urban environment from Native Americans to the 20th century. Particular attention will be given to architecture as a symbol or statement of social, economic, and political empowerment.
 Cross listed as HIST 184; only one may be counted for credit.
- ART 118C. Public Art in the Americas. 3 Units**
General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall only – odd years
- Explores the major issues in the history of public art in the Americas, including monuments, memorials, murals, graffiti, and new media art. Particular attention will be given to public art in Sacramento. Field Trip. Field trip(s) may be required.
- ART 119. Directed Research in Art History. 3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
- Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 120. Advanced Drawing. 3 Units**
Prerequisite(s): ART 20B or equivalent.
Term Typically Offered: Fall, Spring
- Continuing investigation of drawing. Emphasis is on the development of individual style.
Note: May be taken twice for credit.
- ART 121. BFA Junior Studio. 3 Units**
Term Typically Offered: Fall, Spring
- Junior-level studio art course designed to prepare students for the senior year of the BFA degree. Course builds dialog among an interdisciplinary cohort of BFA students while engaging them with contemporary professional practices in the arts. Emphasis placed on students' ability to communicate about their work through critiques with faculty, peers, and visiting artists, preparation of professional documents and presentations. Fee course. Pre-requisite: Completion of a minimum of 3 units upper division studio coursework, second semester Junior standing with 75 units minimum.
 Fee course.
- ART 122A. Intermediate Painting. 3 Units**
Prerequisite(s): ART 22 or equivalent.
Term Typically Offered: Fall, Spring
- Continuing investigation of the technical and conceptual issues of painting.
Note: May be taken twice for credit.
- ART 122B. Advanced Painting. 3 Units**
Prerequisite(s): ART 122A, or ART 124A, or ART 125A, or ART 126, or instructor permission.
Term Typically Offered: Fall, Spring
- Continuing investigation of the technical and conceptual issues of painting, with an emphasis on intensive individual exploration.
Note: May be repeated four times for credit.

<p>ART 123. Figure Drawing. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Fall, Spring</p> <p>Concentrates on the development of drawing and visual skills with emphasis on the human figure. Strong emphasis is placed on anatomical knowledge of the body and its expression through drawing techniques. The effects of volume and movement in space as well as compositional possibilities with the figure are explored. Slides are used to inform students of the drawing techniques achieved in historic and contemporary images. Fee course. Note: May be taken for credit three times.</p> <p>Fee course.</p>	<p>ART 127. Collage and Assemblage. 3 Units Prerequisite(s): ART 20A, ART 22 and either ART 70 or ART 88 (or equivalent), or instructor permission. Term Typically Offered: Spring only</p> <p>Use of found and readily available materials to make 2-dimensional collage and 3-dimensional assemblage. Most projects are conceptual, a few purely visual, and take from one to three class periods, including critique, and class discussions. Note: May be taken twice for credit. Fee Course</p> <p>Fee course.</p>
<p>ART 124A. Intermediate Watercolor. 3 Units Prerequisite(s): ART 24 or equivalent. Term Typically Offered: Spring only – odd years</p> <p>Continuing investigation of the technical and conceptual issues of painting, using transparent water media. Note: May be taken twice for credit.</p>	<p>ART 128. Art and the Artist in the Marketplace. 3 Units Term Typically Offered: Spring only</p> <p>Study of the thought processes and preparations for presenting one's artwork in the marketplace. An overview of what it takes to begin showing and selling artworks, including the skills and procedures of presenting artwork to galleries. A study of contracts, loan agreements, invoicing, commissions, model releases, taxes, pricing of work, resumes, slide preparation/presentation, publicity skills, and record keeping. Lecture, field trips to galleries and museums. Field trip(s) may be required.</p>
<p>ART 124B. Advanced Watercolor. 3 Units Prerequisite(s): ART 124A or equivalent. Term Typically Offered: Fall, Spring</p> <p>Continuing investigation of the techniques and conceptual issues of painting using transparent water media, with emphasis on intensive individual exploration. Note: May be taken four times for credit.</p>	<p>ART 129. Painting/Drawing Studio. 3 Units Prerequisite(s): Instructor permission and Department chair via signed petition form. Term Typically Offered: Fall, Spring</p> <p>Open to upper division art majors or minors only who have completed 9 units in a specialized area. Note: May be repeated as often as approved by advisor and Department chair.</p>
<p>ART 125A. Life Painting. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Fall only</p> <p>Painting from professional models. Note: May be taken for credit twice. Fee course.</p> <p>Fee course.</p>	<p>ART 130. Theories in Art Education. 3 Units Prerequisite(s): Upper division or graduate status; declared major in Art. Term Typically Offered: Spring only</p> <p>Overview of national and international theories in the fields of visual art and education through historical and contemporary literature with particular attention to strategies for engaging student populations in the topics.</p>
<p>ART 125B. Life Studio. 3 Units Prerequisite(s): ART 20A or equivalent. Term Typically Offered: Fall, Spring</p> <p>Drawing and painting from professional models. Fee course. Note: May be taken twice for credit.</p> <p>Fee course.</p>	<p>ART 133. Art Education for Children. 3 Units Prerequisite(s): Upper division status; declared major or minor in Art, or a declared major in Child Development, or Liberal Studies, or Blended Liberal Studies Term Typically Offered: Fall, Spring, Summer</p> <p>Intended for students who are preparing to become elementary school teachers in California, providing meaningful, thematic instruction suitable for grades 1-6. Students will explore several 21st century education approaches applicable to both elementary generalists and visual art specialists, including meaning making, visual culture, holistic integration, learner-directed, and standards-based. Students will explore and evaluate the Common Core State Standards and the California Visual and Performing Arts Standards. Note: Fee course.</p> <p>Fee course.</p>
<p>ART 126. Painting and Drawing in the Field. 3 Units Prerequisite(s): ART 22 or ART 24, or equivalent. Term Typically Offered: Fall, Spring</p> <p>Further development of painting and drawing skills with emphasis on direct observation and use of color to make form. Class will meet at specific landscape sites to work, with primary focus on painting. In addition, work will be developed in the classroom based on prior field study. Critiques will examine how one situation is variously interpreted.</p>	

- ART 134. Interdisciplinary Art.** **3 Units**
Prerequisite(s): ART 20A and upper division status.
Term Typically Offered: Fall, Spring
- Students learn how to make connections and relationships between visual art and curriculum subjects such as ecology, history, anthropology, language arts, theatre and music. Through studio activities and interdisciplinary themes, students will learn how to integrate the California Visual Art Content Standards.
- ART 135. Overview of Secondary Art Education.** **3 Units**
Prerequisite(s): ART 133 or instructor permission.
Term Typically Offered: Fall, Spring
- Exploration of visual art and education theories, studio practices, curriculum development, and teaching strategies for art at the secondary school level. Students will explore and evaluate the National Core Arts Standards.
- ART 137. Art for Exceptional Children.** **3 Units**
Term Typically Offered: Fall, Spring
- Art is studied as a means of meeting the learning needs of atypical children, whose ages range from infancy through adolescence, and whose atypical characteristics consist of mental deficiencies, physical disabilities, emotional problems, or gifted abilities. Lectures, readings, and class discussions focus on the characteristics, and art curriculum goals of exceptional children, while studio activities provide experiences with art media. Lecture, laboratory. Fee course.
- ART 139. Directed Research in Art Education.** **3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
- Open only to upper division art majors/minors who have successfully completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 140. Intermediate Printmaking.** **3 Units**
Prerequisite(s): ART 40
Term Typically Offered: Fall, Spring
- Intermediate-level study of printmaking processes, their history, and their contemporary applications. This course focuses on a single set of printmaking media each semester: Intaglio, Relief/Monotype, Lithography, or Screen Printing. Students will engage with the relationship between research, content, and process to develop a body of work through assigned and self-designed projects.
Note: Fee course. This course will carry a fee of \$75 to cover ink, plates, and other supplies. This course may be repeated for up to 6 units of credit.
- Fee course.
- ART 141. Advanced Silkscreen.** **3 Units**
Prerequisite(s): ART 40E or equivalent.
Term Typically Offered: Fall, Spring
- Advanced work in silkscreen including photo-silkscreen. Emphasis is on exploration of color and imagery.
Note: May be taken for credit four times.
- ART 142. 3D Computer Modeling.** **3 Units**
Prerequisite(s): CSC 10 or ART 97 or equivalent.
Term Typically Offered: Fall, Spring
- Techniques and processes to create 3D computer models and environments. Exercises, assignments and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students' conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/new media and computer gaming.
Note: May be taken twice for credit. Cross-listed as CSC 126.
- ART 143. 3D Computer Animation.** **3 Units**
Prerequisite(s): ART 142 or CSC 126.
Term Typically Offered: Fall, Spring
- Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques; keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair, and fur simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects.
 Cross-listed: CSC 127.
- ART 144. Digital Printmaking.** **3 Units**
Prerequisite(s): ART 97 or equivalent.
Term Typically Offered: Fall, Spring
- Through traditional and digital print media, the course explores the convergence of digital imaging (vector and raster processes) and printmaking techniques (such as monoprint, lithography, etching and silkscreen). Vector graphics use geometry: points, lines and fills, creating crisp re-scaleable images. Raster graphics use a rectangular grid of pixels to create continuous-tone effects. By exploring these approaches and their transference to printmaking processes, students gain deeper understanding of print technology and a more tactile awareness of image making. Fee course.
Note: May be taken twice for credit.
- Fee course.
- ART 145. Advanced Printmaking Studio.** **3 Units**
Term Typically Offered: Fall, Spring
- Advanced exploration of printmaking media (etching, lithography, relief, and monoprinting techniques) within a historical framework. Students investigate the printmaking techniques of historically significant figures and apply them to their own imagery.
Note: Open to students with experience in upper division painting or photography, or lower division printmaking. May be taken twice for credit. Fee course.
- Fee course.

- ART 146. Creative Coding.** **3 Units**
Prerequisite(s): ART 97 Fee course
Term Typically Offered: Fall only
- Introduces techniques and artistic perspectives on interactivity and computationally-generated visual composition for New Media Artists. Nonlinear, dynamic, and generative approaches to composition, animation, video, and data processing are covered.
Note: This course is recommended for students planning to take ART 143 and ART 198.
- ART 147. Video Art.** **3 Units**
Prerequisite(s): ART 97 or COMS 27A/FILM 27A and COMS 27B/FILM 27B.
Term Typically Offered: Fall, Spring
- The creation and analysis of video artwork; including techniques of video production, post-production manipulation and critique, within the context of art and communication. The techniques and theory of producing and editing video will serve as a foundation for the pursuit of individual, creative projects.
 Cross-listed as COMS 157; only one may be counted for credit.
- ART 148. Barrio Art for Ethnic Groups.** **3 Units**
Term Typically Offered: Fall, Spring
- Provides a cultural situation for students who expect to work with the Mexican American community. Involves personal contact with persons in that community. Uses poetry, music, slides, and film to understand art as a non-verbal language.
Note: May be taken twice for credit.
- ART 149. Graphics/Printmaking Studio.** **3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition.
Term Typically Offered: Fall, Spring
- Open only to upper division art majors/minors who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 150. Advanced Ceramics.** **3 Units**
Prerequisite(s): ART 50 or equivalent.
Term Typically Offered: Fall, Spring
- Advanced study of ceramic techniques leading toward the development of an individual creative expression. Fee course.
Note: May be taken for credit four times.
- Fee course.
- ART 153. Hand-Built Ceramic Techniques.** **3 Units**
Prerequisite(s): ART 53 or equivalent.
Term Typically Offered: Fall, Spring
- Specialization in hand-built clay forms. Methods of working include coil, slab, pinch, and combinations of techniques which might include some wheel-thrown parts, decoration, and glazing of forms. Fee course.
Note: May be taken for credit four times.
- Fee course.
- ART 159. Ceramics Studio.** **3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
- Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 161. Photography in the Field.** **3 Units**
Prerequisite(s): PHOT 141 or instructor permission.
Term Typically Offered: Fall, Spring
- The class visits specific sites followed by a group critique of the resulting photographic work. The course objective is to examine how one situation can be interpreted by many varied sensibilities, broadening the artist's visual vocabulary. Students are required to create visually unified portfolio that demonstrates a sense of place.
 Cross-listed: PHOT 161.
- ART 162. Alternative Photographic Processes.** **3 Units**
Prerequisite(s): PHOT 141 or instructor permission.
Term Typically Offered: Fall, Spring
- Studio course exploring alternative photographic processes that may include: printing-out paper, new cyanotype, argyrotypes, and platinum-palladium. Slide discussions, individual and class critiques.
 Cross-listed: PHOT 162.
- ART 163. Pinhole Photography.** **3 Units**
Prerequisite(s): PHOT 40 or equivalent.
Term Typically Offered: Fall, Spring
- Intermediate course investigating the theory, history, and practice of pinhole photography. Use of student-made pinhole cameras of varying focal lengths using black and white and color materials. Emphasis on creative approach in both camera making and image formation, supported by intermediate-level photographic technique. Individual final portfolios and group exhibition of cameras and prints at conclusion of course.
 Cross-listed: PHOT 163.
- ART 169. Photography Studio.** **3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
- Open to upper division art majors or minors only who have completed successfully 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 174. Intermediate Jewelry.** **3 Units**
Prerequisite(s): ART 74 or equivalent, or instructor permission.
Term Typically Offered: Fall, Spring
- Continued study of the techniques and tools used in metal fabrication, such as raising, tool making, chasing and repousse, and scoring/bending process. Emphasis is on development and individual style. Fee course.
Note: May be taken twice for credit.
- Fee course.

- ART 175. Intermediate Metalsmithing.** **3 Units**
Prerequisite(s): Art 75.
Term Typically Offered: Fall, Spring
- Continued exploration of techniques, tools, and methods used in fabrication of ferrous and non-ferrous metal such as cold fastening, repoussage, forging, and finishing processes. Emphasis is on composition and imagery. Fee course.
 Fee course.
- ART 176. Advanced Jewelry.** **3 Units**
Prerequisite(s): ART 174.
Term Typically Offered: Fall, Spring
- Focus on the development of personal style in metal fabrication and casting techniques. Students learn to build mechanical devices such as clasp systems that enhance the overall appearance of their work. Research involving historical periods in metal work.
- ART 179. Small Metals Studio.** **3 Units**
Prerequisite(s): ART 176.
Term Typically Offered: Fall, Spring
- Open to upper division art majors or minors only who have completed 9 units in a specialized area.
Note: May be repeated as often as approved by advisor and Department chair.
- ART 180. Figure Sculpture.** **3 Units**
Prerequisite(s): ART 20A or equivalent.
Term Typically Offered: Fall only
- Work from live models in clay and plaster. Construction of armatures and waste mold demonstrated. Fee course.
Note: May be taken for credit four times.
 Fee course.
- ART 182. Intermediate Sculpture.** **3 Units**
Prerequisite(s): ART 70 or ART 88 or equivalent.
Term Typically Offered: Fall, Spring
- Intermediate explorations with traditional and non-traditional processes of sculpture, three-dimensional form and spatial relationships. Students will expect to explore concept based learning through visual problem solving while accumulating in depth techniques and skills in a variety of sculpture materials. Includes study of historical and contemporary examples of sculpture and other relevant forms of art.
Note: May be taken twice for credit. Fee Course
 Fee course.
- ART 183. Advanced Sculpture.** **3 Units**
Prerequisite(s): ART 180 or 182 or instructor permission.
Term Typically Offered: Fall, Spring
- Advanced explorations and study in sculpture, three-dimensional media and imagery and conceptual based art. Students can explore sculpture, advanced three-dimensional design, mixed media, installation art, site specificity, performance art, public art or other. Study will be both assignment based or self-directed. Fee course.
Note: May be taken twice for credit.
 Fee course.
- ART 187. Installation and Performance Art.** **3 Units**
Prerequisite(s): ART 20A and either ART 70 or ART 88 or equivalent.
Term Typically Offered: Spring only – even years
- Explores the practice, theory and history of making installation and performance art. Students will study contemporary artists of this genre while designing, modeling and creating installation projects. Performances are not mandatory. Students will exhibit their works in traditional campus galleries alternative spaces. Emphasizes individual investigation and discovery while remaining open to collaborative projects that may cross disciplines. Fee course.
Note: may be taken twice for credit.
 Fee course.
- ART 189. Sculpture Studio.** **3 Units**
Prerequisite(s): Instructor permission and Department chair via signed petition form.
Term Typically Offered: Fall, Spring
- Open to upper division art majors or minors only who have completed 9 units in a specialized area. Fee course.
Note: May be repeated as often as approved by advisor and Department chair.
 Fee course.
- ART 191. Film as an Art Form.** **3 Units**
Term Typically Offered: Fall, Spring
- Wide range of theory and criticism of film, photography, and painting in the 20th century is presented from which the student may cultivate a coherent critical awareness. The development of realism in Western art, the photographic image, narrative in film, montage, and the development of cinematography will be included with special attention given to the films of D.W. Griffith, Sergei Eisenstein, Jean Renoir, Alfred Hitchcock, and Orsen Welles.
- ART 192A. Senior Seminar in Studio Art.** **3 Units**
Prerequisite(s): Senior status (90 overall units), completion of 30 units of art studio courses, and (GWAR certification before Fall 09, or WPJ score of 70+ or at least a C- in ENGL 109M or ENGL 109W).
Term Typically Offered: Fall, Spring
- Culminating studio art course designed to deepen experiences in diverse visual arts. Emphasis placed on independent studio practice with additional development in verbal and written skills in a variety of art disciplines. Participation in BA candidate exhibition required in the second enrolled semester for completion of the course.
Note: Must be taken twice. Cannot be taken twice in the same semester.
- ART 192B. Senior Seminar in Art History.** **3 Units**
Prerequisite(s): Senior status, completion of all lower-division major requirements, HIST 100, and GWAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.
Term Typically Offered: Spring only
- Focuses on the research, writing, and oral presentation of a 25-35 page thesis in the student's area of interest. Seminar readings, discussions, and weekly workshops support the thesis project and develop basic career skills. Explores how to employ traditional and new research technologies and develops writing skills. Career topics include how to locate appropriate jobs, professional schools, and graduate programs; how to write professional resumes, correspondence, including graduate school and grant applications.

- ART 192C. Senior Seminar in Art Education.** **3 Units**
Prerequisite(s): Senior status, and ART 130, ART 133, ART 134, and ART 135.
Term Typically Offered: Fall only
- Relates current art education theories to teaching practices in elementary and secondary classrooms, and museum/gallery settings. Teaching practices in a classroom or gallery/museum setting will connect to curriculum materials developed.
- ART 193. Art Gallery Management.** **3 Units**
Term Typically Offered: Fall only
- Designed for direct participation of students in the management of an art gallery, including installation, publicity, and budgeting.
Note: May be taken twice for credit.
- ART 194. BFA Senior Project.** **3 Units**
Prerequisite(s): Second semester Senior standing in BFA program with a minimum 63 units in the major.
Term Typically Offered: Fall, Spring
- Under the mentorship of a faculty advisor, students develop a body of work to be exhibited in the BFA exhibition. Emphasis placed on engagement with research, content, and the process to produce professional quality work in preparation for graduate study and/or careers in the arts.
- ART 195. Fieldwork.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
- Directed observation and work experience with public agencies. Field work is offered for the purpose of giving students orientation in occupational specialties. Supervision is provided by both the instructional staff of the University and the cooperating agencies. Each student is required to maintain a record of activities and assignments, and to prepare periodic reports. The student must make arrangements with a faculty member for a work program prior to admittance to the course.
 Credit/No Credit
- ART 196. Experimental Offerings in Art.** **1 Unit**
Term Typically Offered: Fall, Spring
- Undergraduate seminar in art, to be scheduled as needed.
- ART 196U. Introduction to Curatorial Studies.** **3 Units**
Prerequisite(s): upper-division status.
 This course provides the foundation needed for professionally managing and displaying objects held in art collections. Through readings, small group discussions, field trips, guest lectures, and the directed experience of creating an exhibition of artworks from the Sacramento State Art Department collection, students learn the basics of curatorial studies and art collection management.
 Field trip(s) may be required.
- ART 197. Intermediate Electronic Art.** **3 Units**
Prerequisite(s): ART 97, or equivalent experience, such as PHOT 11, Introduction to Digital Imaging.
Term Typically Offered: Fall, Spring
- Explores the creative potential of digital imaging and multimedia art making techniques. Teaching methods will include hands on demonstrations, lab workshops, creative projects, reading assignments, seminars, discussion and critiques. The development of technical fluency will be stressed, and the creative potential of digital media within the framework of contemporary art, design and culture will be emphasized.
 Fee course.
Note: Proficiency in MAC-OS recommended. May be taken for credit three times.
 Fee course.
- ART 198. Advanced Electronic Art.** **3 Units**
Prerequisite(s): ART 197, or equivalent experience, evidenced in portfolio.
Term Typically Offered: Fall only
- Utilizes the creative potential of electronic media to create art projects, working within the conceptual framework of developments in contemporary culture using a range of available software programs. An experimental and exploratory approach to the digital medium in concept, process and execution of work is encouraged. Fee course.
Note: Proficiency in MAC-OS recommended. May be taken for credit three times.
 Fee course.
- ART 199. Special Problems.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
- Individual projects or directed reading. Open only to students who are competent to carry on individual work.
Note: Departmental petition required.
 Credit/No Credit
- ART 206. Art Theory and Criticism.** **3 Units**
Term Typically Offered: Fall only
- Seminar discussions of essential readings in Western aesthetic philosophy and contemporary art theory and criticism. Stress is placed on the conceptualization of the student's own graduate production.
Note: Required for students in art graduate program; Graduate Writing Intensive (GWI) course.
- ART 212. Contemporary Art.** **3 Units**
Prerequisite(s): Modern Art History: Art 1B or ART 109 or equivalent or instructor permission.
Term Typically Offered: Spring only
- Beginning with international Pop art and Minimalism in the 1960s, surveys the history of contemporary art from the end of avant-garde modernism to the postmodernism and globalism of today. Lectures, discussions, readings and assignments, offer insights into the contexts, attitudes and ideas behind current art and visual culture.
Note: Students who earned a grade of B or higher in ART 112 can fulfill the requirements for ART 212 by taking a one-unit supplemental ART 299 to satisfy graduate level criteria.

ART 219. Directed Research in Art History. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair.

ART 220. Advanced Problems in Painting and Drawing. 3 Units

Prerequisite(s): ART 122B, graduate art student status, or instructor permission.

Term Typically Offered: Fall, Spring

Special problems in painting and drawing.

Note: May be taken twice for credit.

ART 222. Studio Critique Seminar. 3 Units

Term Typically Offered: Fall, Spring

Critique seminar taught by one or more instructors representing different creative experiences.

Note: Required for students in the art studio graduate program, every semester until the final review has been passed. Only 6 units may be applied toward the degree program. Open only to classified graduate students.

ART 229. Painting/Drawing Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 239. Directed Research in Art Education. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 249. Graphics/Printmaking Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 259. Ceramics Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 269. Photography Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 279. Crafts/Art Metal Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified art graduate students only.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

ART 283. Graduate Sculpture. 3 Units

Prerequisite(s): Graduate Art student status, or instructor permission.

Term Typically Offered: Fall, Spring

Special problems in sculpture, mixed media, installation art, site specific art, performance art, public art or other. Students will engage in self-directed projects while participating in sculpture studio forum and critiques.

Note: may be taken twice for credit

ART 289. Sculpture Studio. 3 Units

Prerequisite(s): Instructor permission and Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Open to classified and unclassified graduate students only. Fee course.

Note: May be repeated as often as approved by advisor and Department chair; only 6 units may be applied toward the degree program.

Fee course.

ART 297. New Media 1. 3 Units

Term Typically Offered: Spring only

Students will work on self-directed new media projects with the supervision of the instructor. The work will focus on projects that are either entirely based on digital image and/or animation, or on works that also utilize other media or processes combined with digital image or animation, such as intermedia, mixed media and installation work. This course also includes reading assignments, critique and discussion.

Note: May be repeated twice for credit.

ART 298. New Media 2. 3 Units

Term Typically Offered: Fall only

Students will work on self-directed video and new media with the supervision of the instructor. The work will focus on projects that are either entirely based in new media and video, or on works that also utilize other media or processes combined with video and/or interactive processes, such as intermedia, mixed media and installation work. The course also includes reading assignments, critique and discussion.

Note: May be taken twice for credit.

ART 299. Special Problems. 1 - 3 Units

Prerequisite(s): Open only to graduate art students competent to carry on individual work. Admission requires approval of the faculty member who will direct the work and of the Department chair via signed petition form.

Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Only 6 units may be applied toward the degree program.

Credit/No Credit

ART 305. Art in the Public School. 3 Units

Prerequisite(s): Enrollment in the art teaching credential program.

Term Typically Offered: Fall, Spring

Art teaching methods and programs for public school grades K-12. Must be taken during Phase I or II of student teaching.

ART 500. Culminating Experience. 3 Units

Prerequisite(s): Advanced to candidacy and chair permission of student's project committee.

Term Typically Offered: Fall, Spring

Culminating exhibition of student work.

Arts and Letters (ALS)

ALS 21. First Year Seminar: Becoming an Educated Person. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Exploring majors in Arts and Letters and the careers they can lead to for freshmen considering a major in one of these disciplines. Provides students with the opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

ALS 39A. Special Problems for EOP Students. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individually directed projects or tutorial instruction in a skill development area or in any subject matter to develop a specific academic skill (i.e., essay writing).

Credit/No Credit

ALS 52A. Acad Strategies-ALS: History 6. 1 Unit

General Education Area/Graduation Requirement: Arts (Area C1)
Term Typically Offered: Fall, Spring

This course provides students with an opportunity to become informed and engaged participants in the cultural, artistic and literary dimensions of their communities. Students will explore the ways our experience of and appreciation for cultural products is informed by exposure to theory and practice in each of the Arts and Letters disciplines.

ALS 195. Internship in Arts and Letters. 1 - 3 Units
Prerequisite(s): Faculty approval required; Upper division status; Overall Sacramento GPA 2.3
Term Typically Offered: Fall, Spring

Directed work experience in the internship program. Instructional staff and the cooperating agency provide supervision.
 Credit/No Credit

ALS 199. Special Problems. 1 - 3 Units
Term Typically Offered: Fall, Spring

Individual projects or directed study.
Note: Petition and faculty approval required; may be repeated for credit.

Credit/No Credit

Asian Studies (ASIA)

ASIA 96. The Way of Chanoyu: An Interdisciplinary Approach to the Japanese Tea Gathering. 3 Units
Term Typically Offered: Fall, Spring

This course traces the development of a multifaceted cultural practice integrating architecture, garden design, art, painting, and calligraphy into a carefully constructed hospitality ritual. Students explore multiple aspects of Japanese Chado via hands-on learning including aesthetic, economic, scientific, socio-political and cultural dimensions associated with tea. The course is taught in the Nakatani Tea Room, including weekly classroom lectures and discussions, demonstrations, on-line learning modules, a group project, and typically, a day field trip to San Francisco. Field trip(s) may be required.

ASIA 110. Anthropology of Contemporary Asia. 3 Units
Prerequisite(s): ANTH 146 or instructor permission

This course examines contemporary Asia as an articulation of intersecting historical, cultural, political and economic processes. The course will focus on postcolonial developments and critically explore the manner in which process of globalization and neoliberal strategies embed themselves within, and the responses they elicit from societies across Asia.

ASIA 134. History of Korea: Antiquity to Present. 3 Units
Term Typically Offered: Fall only

This course traces the historical development of Korean culture from the period the Three Kingdoms to the present. In addition to the texts and records, other sources such as literature, religion, and art will be examined to gain an understanding of and appreciation for the longevity of Korea as a culture and a polity.

ASIA 135. Contemporary Korean Culture. 3 Units
Term Typically Offered: Spring only

This course provides a comprehensive understanding of Korean culture and society through the analysis of contemporary Korean popular media. By critically examining the particular cultural phenomenon of the Korean Wave, this course upholds various Korean popular media (film drama, documentaries, and music) as significant forms of visual culture, which reflect as well as shape the reality of people's everyday lives both within and outside Korea.

ASIA 136. Korean Development and Behavior. 3 Units

This course examines critical issues in Korean human development and behavior with particular attention given to current theoretical perspectives within a fast developing society. Topics include identity, cognitive development, mental health, tiger parenting, gender roles, socio-emotional development, body image, and transracial adoptions. This course integrates an interdisciplinary approach and includes indigenous discourse on Confucianism and Eastern and Western thought to understand the underlying processes of the Korean heritage person as an individual and as a member of a larger society.

ASIA 140. Modern East Asian Cinema. 3 Units

Prerequisite(s): GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Arts (Area C1), Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring, Summer

Survey of the development of cinema in Asia, focusing primarily on cinematic masterpieces from China, Hong Kong, and Japan. Focuses on directors, actors, and studios that left a lasting mark on cinema history. Also focuses on how the Asian aesthetic sense differs from the Hollywood norm.

Cross-Listed: HIST 140; only one may be counted for credit.

ASIA 151. Genocide in Southeast Asia. 3 Units
Term Typically Offered: Fall, Spring

Survey of human rights abuses and genocides that have occurred in post-colonial Southeast Asia. Focuses on mass killings in Indonesia and Cambodia and communal riots often targeting the ethnic Chinese community, religious minorities, or highland peoples like the Hmong. Topics include cultural genocide, ideological pressure, and ethnic intolerance. An interdisciplinary literature will interpret the causes and conditions while introducing students to the diverse societies and cultures of Southeast Asia.

ASIA 195. Internship: Asian Studies. 1 - 3 Units
Term Typically Offered: Fall, Spring

Supervised work experience on topics related to the study of Asia's art, culture, economics, geography, environment, politics, and government and social issues.
 Credit/No Credit

ASIA 198. Asia in the World Today. 3 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only

Senior seminar in recent scholarship and current issues concerning Asia in the world today. A capstone course for Asian Studies majors, as well as graduate students interested in Asia.

ASIA 199. Special Problems.
Term Typically Offered: Fall, Spring

Individual research projects, including directed readings, under the direction of an Asian Studies faculty person.
 Credit/No Credit

Astronomy (ASTR)

ASTR 4A. Introduction to the Solar System. **3 Units**
Prerequisite(s): One year of high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Spring only

Description and explanations of astronomical phenomena and measurements related to the Solar System and exoplanets. Structure and evolution of planetary systems. Formation of solar systems and planets. Occasional observation periods.

ASTR 4B. Introduction to Stars, Galaxies, and Cosmology. **3 Units**
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall, Spring

Description and explanations of astronomical phenomena related to stars, galaxies, and cosmology. Structure and evolution of stellar and galactic systems. Occasional observation periods.

ASTR 4C. Introduction to Astrobiology. **3 Units**
Prerequisite(s): One year high school geometry or instructor permission.
General Education Area/Graduation Requirement: Physical Science (B1)
Term Typically Offered: Fall only

Nature and history of scientific inquiry into life outside the Earth. Definitions of life. Habitability of planets and moons in our Solar System and of extrasolar planets. Likelihood of intelligent life outside Earth and rationale for the Search for Extra-Terrestrial Intelligence.

ASTR 6. Astronomical Observation Laboratory. **1 Unit**
Prerequisite(s): ASTR 4A, ASTR 4B, or ASTR 4C with C- or better; may be taken concurrently.
General Education Area/Graduation Requirement: Physical Science (B1), Laboratory (B3)
Term Typically Offered: Fall, Spring, Summer

Study and use of various telescopes; field observation of planets, stars, meteors, asteroids, the moon and sun; laboratory activities relevant to astronomy. Lab three hours.

ASTR 131. The Solar System and Space Exploration. **3 Units**
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W ; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Fall only

Planets and satellites, including their composition, structure, and atmospheres, with emphasis on modern techniques and observations. Solar surface phenomena and their influence on planets through the solar wind. Comets, meteorites, and their implications for the origin and evolution of planets. Physical effects governing feasible forms of space exploration and colonization.

Note: This course is approved as a Writing Intensive course.

ASTR 132. Stars, Galaxies and Cosmology. **3 Units**
Prerequisite(s): ASTR 4A or ASTR 4B or 4C or PHYS 11A or CHEM 1A and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Upper Division Further Studies in Area B5, Writing Intensive Graduation Requirement (WI)
Term Typically Offered: Spring only

Types and evolution of stars; structure and evolution of galaxies; overall structure of the universe; current developments in astronomy.
Note: This course is approved as a Writing Intensive course.

ASTR 150. Dark Matter and Dark Energy. **3 Units**
Prerequisite(s): PHYS 106
Corequisite(s): PHYS 110
Term Typically Offered: Spring only – odd years

Introduction to historical, observational and theoretical principles of dark matter and dark energy in the Universe. Topics will include dark matter in galaxies (rotation curves, stellar motions), dark matter in clusters (virial theorem, x-ray observations), MACHOs and WIMPs as dark matter candidates, as well as the discovery of dark energy through supernovae observations, and additional probes of dark energy. Dark matter and dark energy will be discussed in the cosmological context of the Big Bang theory.

ASTR 199. Special Problems. **1 - 2 Units**
Term Typically Offered: Fall, Spring

Individual projects or directed reading.

Note: Open only to students competent to assume individual work on approval of the instructor. Up to 2 units may be taken for a grade.

Credit/No Credit

Athletics (ATIC)

ATIC 61. Men's Cross Country. **2 Units**
Prerequisite(s): Intercollegiate Student Athletes only
Term Typically Offered: Fall, Spring

Practice begins mid-August and the season ends in mid-November.
 Credit/No Credit

<p>ATIC 62. Men's Tennis. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins the first day of the fall semester and the spring schedule ends the last of May. Credit/No Credit</p>	<p>ATIC 80. Women's Basketball. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins mid-October. The competitive season begins in November and continues to the end of February leading to the NCAA Championships for qualified teams. Credit/No Credit</p>
<p>ATIC 63. Men's Track and Field. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Indoor Track and Field practice begins in the fall. The competitive season is in the winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May. Credit/No Credit</p>	<p>ATIC 81. Women's Golf. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins the second week of September. Competition consists of one or two matches in the fall and the remaining part of the schedule is during the spring semester. Interested student-athletes who would like to walk on and try out for the team should contact the coach. Credit/No Credit</p>
<p>ATIC 64. Men's Baseball. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins in the fall with the competitive season starting February 1. The 56-game schedule is followed by the NCAA Championships for qualified teams in May. Credit/No Credit</p>	<p>ATIC 82. Women's Soccer. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Morning and afternoon practices begin in mid-August in accordance with NCAA regulations. Competitive season begins the first week of September and ends in mid-November. Daily practices during fall semester are from 2:00-4:00 p.m. Credit/No Credit</p>
<p>ATIC 65. Men's Basketball. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins mid-October. The season ends in late February and leads to NCAA Championships for qualified teams. Credit/No Credit</p>	<p>ATIC 83. Women's Gymnastics. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins in September. The competitive season starts in January and ends in late April with the NCAA Championships for qualified teams. Daily practices are 12:30-4:00 p.m. Student-athletes must contact the coach prior to tryouts. Credit/No Credit</p>
<p>ATIC 66. Men's Football. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Daily afternoon practice begins in late August. The 10-11 game schedule is followed by NCAA Championships for qualified teams in late November. There is also spring practice which follows NCAA regulations as to starting date. Credit/No Credit</p>	<p>ATIC 84. Women's Softball. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins in the fall with the competitive season starting mid-February. The 56-game schedule is followed by NCAA Championships in late May for qualified teams. Daily practices are 1:30-5:30 p.m. Credit/No Credit</p>
<p>ATIC 67. Men's Golf. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Practice begins fall semester Monday through Friday starting at noon. Credit/No Credit</p>	<p>ATIC 85. Women's Rowing. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Rowing accommodates both scholarship and walk-on athletes with no experience necessary. Tall cross-over student-athletes are encouraged to turn out. Daily practice starts in September, 6:00-8:30 a.m. There is a fall semester long distance race season and a traditional "sprint" season in the spring semester, concluding with the National Championships in May. All student-athletes race. No limit on squad size. Freshman/Novice, Junior Varsity and Varsity squads, lightweight (130 lbs.) or open. Also, coxswains required. Should be under 115 lbs. Credit/No Credit</p>
<p>ATIC 68. Men's Soccer. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p> <p>Morning and afternoon practices begin in mid-August in accordance with NCAA regulations. Competitive season begins the first week of September and ends in mid-November. Daily practices during fall semester are from 3:00-6:00 p.m. Daily practices during the spring semester are also from 3:00-6:00 p.m. beginning the third week in February and ending the last week in April. You must see the head coach for permission to tryout. Credit/No Credit</p>	

<p>ATIC 86. Women's Tennis. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p>	<p>ATIC 199. Directed Individual Study. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>Practice begins the first day of the fall semester and the spring schedule ends the last of May. Credit/No Credit</p>	<p>Individual research, project or directed reading. Note: Registration requires approval of the faculty under whom the individual work is to be conducted and the Director of Athletics. Credit/No Credit</p>
<p>ATIC 87. Women's Volleyball. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p>	<p>Biological Sciences (BIO)</p>
<p>Preseason begins in mid-August. Competition begins September 1 and ends in mid-December with NCAA Championships for qualified teams. Daily practices are 2:00-5:00 p.m. Interested student-athletes must contact the coach prior to the preseason, be cleared by the Clearinghouse, and meet all eligibility requirements in order to participate in tryouts. Credit/No Credit</p>	<p>BIO 1. Biodiversity, Evolution and Ecology. 5 Units General Education Area/Graduation Requirement: Life Forms (B2), Laboratory (B3) Term Typically Offered: Fall, Spring, Summer</p>
<p>ATIC 88. Women's Cross Country. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p>	<p>Introduction to properties of life and cells leading to genetic and biological diversity. Survey of biological diversity emphasizing variation leading to natural selection; introduction to ecological concepts within an evolutionary framework; a survey of ecosystems and global climate change. Development of scientific skills will be emphasized. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours; fee course. Note: Field trips may be required.</p>
<p>Practice begins mid-August and the season ends in mid-November. Credit/No Credit</p>	<p>Fee course. Field trip(s) may be required.</p>
<p>ATIC 89. Women's Track and Field. 2 Units Prerequisite(s): Intercollegiate Student Athletes only Term Typically Offered: Fall, Spring</p>	<p>BIO 2. Cells, Molecules and Genes. 5 Units Prerequisite(s): BIO 1 and CHEM 1A. Term Typically Offered: Fall, Spring</p>
<p>Indoor Track and Field practice begins in the fall. The competitive season is in the Winter. Outdoor Track and Field practice begins the first day of spring semester and the season ends the last week of May. Credit/No Credit</p>	<p>Introduction to molecular and cellular biology and genetics. Topics include biomolecules, cell structure and function, cellular energetics, molecular flow of information, cell division, and genetic inheritance. Development of scientific skills and a scientific mindset will be emphasized throughout the course, particularly in lab exercises and activities. Designed for science majors. Lecture three hours; laboratory three hours; activity two hours.</p>
<p>ATIC 167. Coaching of Football. 3 Units Term Typically Offered: Fall, Spring</p>	<p>BIO 7. Introduction to the Science of Biology. 4 Units General Education Area/Graduation Requirement: Laboratory (B3), Life Forms (B2) Term Typically Offered: Fall, Spring</p>
<p>Examines all phases of the game, including offense, defense and special teams. Other topics covered are public/media relations, budget management, academic rules, marketing strategies, officiating, equipment and many other aspects. Lecture two hours, activity two hours.</p>	<p>Introduction to major concepts of biology, including properties of living things, cells and their molecular constituents, the unity and diversity of organisms, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Satisfies requirements in biology for students planning to obtain the Multiple Subject Teaching Credential. Lecture three hours; laboratory three hours. Fee course. Fee course.</p>
<p>ATIC 175. Sports Information Fieldwork. 1 - 3 Units Prerequisite(s): JOUR 123 or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>Directed observations and work experience with intercollegiate athletics sports information support services. Field work is offered to give students orientation in the profession of sports information services. Supervision is provided by the instructional staff of the university. Each student is required to maintain a record of activities and assignments and to prepare periodic reports. Note: May be repeated once for credit.</p>
<p>Credit/No Credit</p>	<p>ATIC 195. Field Experience in Intercollegiate Athletics. 1 - 3 Units Term Typically Offered: Fall, Spring</p>
<p>Directed experience in athletics. Student interns keep records of daily experiences and prepare periodic progress reports. Succeeding enrollments should be in different sports. Note: Registration requires prior approval of Director of Athletics. Credit/No Credit</p>	

BIO 9. Our Living World: Evolution, Ecology and Behavior. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Designed for non-majors, this course is an introduction to the biological science behind important issues that face us today, such as those surrounding evolution, endangered species, conservation of ecosystems, and the behavior of organisms. By gaining an understanding of the scientific approach and the principles of evolution, ecology and behavior, students will be equipped to evaluate scientific developments and arguments in these and other issues as informed citizens. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 10. Basic Biological Concepts. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

An intensive introductory course for non-majors who will take additional course work in biology or related disciplines, including the allied health sciences. Introduction to the biological sciences with strong emphasis on cellular structure and metabolism, molecular biology and genetics, as well as concepts and principles common to all living systems including ecology and evolution. Lecture three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 15L. Laboratory Investigations in Biology. 1 Unit
Prerequisite(s): BIO 9, BIO 10 or BIO 20.
Corequisite(s): BIO 9, BIO 10 or BIO 20.
General Education Area/Graduation Requirement: Laboratory (B3)
Term Typically Offered: Fall, Spring

Introductory laboratory investigation of the major principles of biology, including properties of all living things, the unity and diversity of organisms, structure and function of cells, energy and metabolism, genetics, ecology, evolution, and the scientific methods of investigation employed by biologists. Laboratory three hours.

Note: Not open to Biological Sciences majors or students who have received credit for BIO 1 or BIO 2.

BIO 20. Biology: A Human Perspective. 3 Units
General Education Area/Graduation Requirement: Life Forms (B2)
Term Typically Offered: Fall, Spring

Introduction to biological concepts with emphasis on their application to humans. Topics include: Evidenced-based decision making with respect to food, nutritional supplements, drugs, pathogens, and biotechnology. How heredity and evolution contribute to our understanding of personality, sex, behavior, addiction, disease, and aging is also discussed. Lecture three hours.

Note: Not open to majors in biological sciences and/or students who have received credit for BIO 10.

BIO 22. Introductory Human Anatomy. 4 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10
Term Typically Offered: Fall, Spring

Introduction to the study of the gross and microscopic structure of the human body using a systemic approach. Lecture three hours; laboratory three hours. Fee course.
 Fee course.

BIO 25. Human Anatomy and Physiology I. 4 Units
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 25 offers basic terminology and concepts pertaining to the disciplines of anatomy and physiology, including structure/function relationships, homeostasis, and organizational levels; and provides an introduction to the structure and function of the muscular and nervous systems.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 26. Human Anatomy and Physiology II. 4 Units
Prerequisite(s): BIO 25 or instructor permission.
Term Typically Offered: Fall, Spring

BIO 25/26 series provides an introduction to the structure and function of the major organ systems of the human body. BIO 26 provides an introduction to the structure and function of the cardiovascular, respiratory, renal and digestive systems, and emphasizes homeostatic control mechanisms.

Note: Not open to students who have successfully completed BIO 22 and BIO 131, or an equivalent combination of separate anatomy and physiology courses. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 30. Anatomy & Physiology - Brief Course. 4 Units
Prerequisite(s): Physical Education majors only
Term Typically Offered: Fall, Spring

An overview of the basic anatomy and physiology of all systems. Designed to meet the standards for the Physical Education Subject Matter Program, but may also may prepare students for study in other health-related fields.

BIO 39. Microbiology for Allied Health Students. 4 Units
Prerequisite(s): BIO 10; CHEM 5 or CHEM 6A and CHEM 6B or equivalent.
Term Typically Offered: Fall, Spring

Introduction to micro-organisms, particularly bacteria and viruses, with emphasis on health care-related applications of microbiology using case studies. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, demonstration of microbial properties and will provide practice with basic microbiological skills. Lecture three hours; laboratory three hours. Fee Course.

Note: Does not satisfy microbiology requirement for Biological Sciences majors.

Fee course.

- BIO 100. Introduction to Scientific Analysis.** 2 Units
Prerequisite(s): BIO 1, BIO 2, and STAT 1; declared Biological Sciences majors only or instructor consent
Term Typically Offered: Fall, Spring
- Covers anatomy of scientific literature, reading and writing scientific papers, proper citation formats, basic interpretation of tables and figures, graphical analysis, basic statistical analysis, experimental design to effectively test a hypothesis, and effective presentation of an experiment. Lecture one hour. Activity two hours.
Note: Course cannot be taken concurrently with or after taking BIO 167
- BIO 102. The Natural History of Plants.** 3 Units
Prerequisite(s): A college course in biology or instructor permission.
Term Typically Offered: Fall, Spring
- Major plant communities of California provide a framework for understanding the interrelationships of natural environments and the dominant trees and shrubs of these areas. Identification of these species and the wildflowers of the communities are emphasized in the lab and field trips. Designed for minors in biology or for those with an interest in their natural surroundings, but is acceptable for majors who have not completed BIO 112. Lecture one hour; laboratory six hours. Fee course. Fee course.
 Field trip(s) may be required.
- BIO 103. Plants and Civilization.** 3 Units
Prerequisite(s): BIO 10 or equivalent.
Term Typically Offered: Fall, Spring
- Study of the significance of plants in the development of human civilization. Emphasis will be placed on the botanical, sociological and economic aspects of plants useful to humans. Lecture three hours.
- BIO 104. Physiology of Human Reproduction.** 3 Units
Prerequisite(s): BIO 1, BIO 2 or BIO 10.
Term Typically Offered: Spring only
- Study of the physiology of human reproduction. Topics to be covered include: gametogenesis, the basis of fertility, conception, prenatal development, parturition, lactation and the physiology of contraception. Lecture three hours.
- BIO 105. Life in the Ocean.** 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
 Study of marine life and ocean ecosystems. Exploration of the unique adaptations of marine life, how marine organisms interact with their environment, diversity of marine habitats from coral reefs to deep sea, and conservation. Does not count toward the Biological Sciences Major.
- BIO 106. Genetics: From Mendel to Molecules.** 3 Units
Term Typically Offered: Fall, Spring
- Introduction to the principles of genetics and scientific approaches used to define those principles. The physical basis of heredity, the impact of selective breeding and genetic engineering will be discussed. Lecture two hours; discussion one hour.
Note: BIO 10 recommended.
- BIO 109. Biology of Dinosaurs.** 3 Units
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
 Introduction to the biology of the dinosaurs. Dinosaurs came in a vast array of shapes and sizes and exemplify biodiversity. This course will examine the dinosaurs in an evolutionary framework, discussing their origin, the major lineages, phylogeny and what they look like today. The course will take advantage of the recent surge in scientific investigations into the biology of dinosaurs, such as parental care, sexual selection, group living, flight and feathers. Does not count toward the Biological Sciences Major.
- BIO 112. Plant Taxonomy.** 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only
- Spring flora of central California is used as the focus of study in the classification and identification of native vascular plants. Lecture two hours; laboratory six hours. Field trips may be required. Fee course. Fee course.
 Field trip(s) may be required.
- BIO 113. Evolution and Speciation in Flowering Plants.** 3 Units
Prerequisite(s): BIO 1 and BIO 2 or equivalent.
Term Typically Offered: Fall only – even years
- A survey of the important tools and mechanisms used to study speciation in plants. Topics include the molecular basis of evolutionary change, intraspecific genetic variation at both the local and landscape levels, theory regarding mechanisms of speciation, and the importance of polyploidy. Readings will be from both a text and from the primary literature, and will include in-depth discussions of historical and modern studies in plant evolution. Lecture three hours.
- BIO 115. Introduction to Neuroscience.** 4 Units
Prerequisite(s): PSYC 2 and PSYC 8; PSYC or BIO majors only. PSYC 9 recommended.
Term Typically Offered: Fall, Spring
- Investigation of the structure and function of the central nervous system including neuroanatomy and neurophysiology, sensorimotor integration. The lectures and readings emphasize the empirical questions, techniques and methods used in neuroscience research. Laboratory exercises focus on gross- and micro- neuroanatomy, models of membrane electrophysiology and motor system function. Lecture/discussion three hours; laboratory three hours.
 Cross Listed: PSYC 115; only one may be counted for credit.
- BIO 118. Natural Resource Conservation.** 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only – odd years
- Introduction to the principles and practices of biological conservation. Historical development of conservation philosophy; current issues in conservation of renewable natural resources; conservation administration. Lecture three hours.
- BIO 120. Biology of Aging.** 3 Units
Prerequisite(s): BIO 1, BIO 2, BIO 10 or BIO 20.
Term Typically Offered: Fall, Spring
- Theories of aging, cellular aging and aging effects on the various human body systems. Lecture three hours.
Note: Not open for credit to students who have previously taken BIO 131.

BIO 121. Molecular Cell Biology.**3 Units****Prerequisite(s):** BIO 184**Term Typically Offered:** Fall, Spring

Comparison of the cellular and molecular biology of prokaryotic and eukaryotic cells. Emphasis will be placed on membrane structures, transport phenomena, cell to cell communication, cellular reproduction, genetic architecture, gene expression and metabolism, as well as the eukaryotic endomembrane, cytoskeleton and extracellular matrix systems. Lecture three hours.

BIO 122. Advanced Human Anatomy.**4 Units****Prerequisite(s):** BIO 22.**Term Typically Offered:** Spring only

Gross structure of the human body using a regional approach. Lecture three hours; laboratory three hours. Fee course.
Fee course.

BIO 123. Neuroanatomy.**3 Units****Prerequisite(s):** BIO 22.**Term Typically Offered:** Fall only

Gross and microscopic structures of the central, peripheral and autonomic nervous systems. The lectures are correlated with laboratory exercises and demonstrations using human prosected cadaver specimens, audio-visual slide projected materials, charts and models. Lecture two hours; laboratory three hours. Fee course.
Fee course.

BIO 124. Clinical Hematology.**3 Units****Prerequisite(s):** CHEM 161 and BIO 184**Term Typically Offered:** Spring only

Basic principles and current clinical laboratory procedures used in the study of blood; emphasis on morphological and chemical changes in the disease processes. Lecture two hours; laboratory three hours. Fee course.
Fee course.

BIO 125. Body Fluid Analysis.**1 Unit****Prerequisite(s):** CHEM 161 or instructor permission.**Term Typically Offered:** Fall only

Production of body fluids (e.g., urine, cerebrospinal, pleural, peritoneal, pericardial, and synovial fluids); their normal characteristics and pathological changes will be discussed. A description of the laboratory tests used in the clinical evaluation of body fluids will also be presented.

BIO 126. Comparative Vertebrate Morphology.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only

Study of the anatomical systems of vertebrates in an evolutionary and functional context. Covers vertebrate form, function, development and phylogeny, overviews of organ systems, and how their modification founded the major events of vertebrate evolution including metamorphosis, water-to-land transition, tetrapodal locomotion, feeding and reproduction. Labs complement lectures with dissections of three representative species (shark, salamander, cat), and surveys of specializations in other forms. Lecture two hours; laboratory three hours. Fee course.
Fee course.

BIO 127. Developmental Biology.**4 Units****Prerequisite(s):** BIO 2.**Term Typically Offered:** Fall only

This course examines the progression of fertilized eggs of vertebrate organisms through embryonic development. This progression will be studied at biochemical, molecular, genetic, morphological and physiological levels, with an emphasis on the progressive changes that occur within cells, tissues and organs in the embryo. We will use a comparative approach between a variety of model organisms to understand similarities and differences among vertebrate and selected invertebrate species. Fee course.

Note: Prerequisite will be enforced by instructor.

Fee course.

BIO 128. Plant Anatomy and Physiology.**4 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only

An integrative examination of our current understanding of plant structure and function. Students will apply fundamental principles of cell and molecular biology, evolution, and ecology to understand the relationships between plant anatomy and plant physiology that have enabled plants to achieve such a high level of success as primary producers on our planet. Lecture three hours, laboratory three hours. Fee course.

Fee course.

BIO 130. Histology.**3 Units****Prerequisite(s):** BIO 22**Term Typically Offered:** Spring only

Study of the morphology and physiology of cells in primary normal human tissues and the arrangement and adaptations of tissues in organs and organ systems. The characteristics and properties of abnormalities in human tissues will be covered if time permits. Lecture two hours; laboratory three hours.

BIO 131. Systemic Physiology.**4 Units****Prerequisite(s):** CHEM 1B or CHEM 6B and BIO 1 or BIO 2 or BIO 10 or BIO 22.**Term Typically Offered:** Fall, Spring

Physiology of organ systems with emphasis on control and integration of system function. Experiments using humans and selected vertebrate animal models are performed in the laboratory to illustrate functional characteristics of organ systems discussed in lecture and to provide direct experience with techniques, recording systems, and methods of data analysis commonly used in physiology and related fields. Lecture three hours; laboratory three hours. Fee course.
Fee course.

BIO 131A. Advanced Problems in Physiology.**1 Unit****Corequisite(s):** BIO 131**Term Typically Offered:** Fall, Spring

Advanced problem-solving in physiology designed for students concurrently enrolled in BIO 131. Students explore solutions to challenging problem sets under the direct supervision of an experienced section leader. Discussion: two hours.
Credit/No Credit

<p>BIO 132. Neurophysiology. 3 Units Prerequisite(s): BIO 131 or both BIO 25 and BIO 26. Term Typically Offered: Fall, Spring</p> <p>Organization and function of the nervous system will be explored. Topics include mechanisms of communication between neurons, integration of sensory and motor systems, and functional brain systems. Diseased states will be introduced, as appropriate. Lecture 3 hours.</p>	<p>BIO 143. General Virology. 3 Units Prerequisite(s): BIO 121 and BIO 139 Term Typically Offered: Spring only</p> <p>Lectures and demonstrations on the fundamental characteristics and properties of plant, animal and bacterial viruses. Lecture three hours.</p>
<p>BIO 133. Cardiovascular, Respiratory and Renal Physiology. 3 Units Prerequisite(s): BIO 131. Term Typically Offered: Spring only</p> <p>Advanced consideration of the integrated physiology of the cardiovascular, respiratory, and renal systems, including acid-base physiology. Advanced problem-solving, analysis of case studies, and interpretation of experimental findings will be included. Lecture three hours.</p>	<p>BIO 144. Pathogenic Bacteriology. 4 Units Prerequisite(s): BIO 139. Term Typically Offered: Fall, Spring</p> <p>Morphological, physiological and immunological characteristics of pathogenic bacteria. In the laboratory, pure culture studies are emphasized. Lecture two hours; laboratory six hours. Fee course.</p>
<p>BIO 134. Medical Mycology. 3 Units Prerequisite(s): BIO 139. Term Typically Offered: Spring only – even years</p> <p>Study of the morphology, cultural characteristics and classification of fungi which are pathogenic for humans, as well as fungi which appear as common contaminants. Lecture two hours; laboratory three hours. Fee course.</p>	<p>BIO 145. The Diversity of Microorganisms. 4 Units Prerequisite(s): BIO 139. Term Typically Offered: Spring only</p> <p>Isolation, cultivation and characterization of a wide variety of soil and water microbes from natural habitats using a variety of culture and non-culture based techniques; natural habitats also will be examined directly for the numbers and varieties of microbes which are present using bioinformatic and statistical tools. Lecture two hours; laboratory six hours.</p>
<p>BIO 135. Endocrinology. 3 Units Prerequisite(s): BIO 121. Term Typically Offered: Fall only</p> <p>Advanced consideration of the principles of endocrinology with special emphasis on the role of hormones in growth, metabolism, stress (including the hormonal interactions during exercise) and disease. Various endocrine disorders, will serve as the model for case studies, current literature analysis and advanced problem-solving activities. Lecture three hours.</p>	<p>BIO 149A. Immunology. 3 Units Prerequisite(s): BIO 121 and BIO 139 Term Typically Offered: Fall, Spring</p> <p>Nature of antigens, antibodies and their reactions. The development of the immune response and its role in immunity and pathology. Lecture two hours.</p>
<p>BIO 139. General Microbiology. 4 Units Prerequisite(s): BIO 184; CHEM 20 or CHEM 24 Term Typically Offered: Fall, Spring</p> <p>Introduction to microorganisms, particularly bacteria and viruses, their physiology and metabolism. Laboratory work includes aseptic techniques, methods of cultivating and identifying bacteria, and demonstration of microbial properties. Lecture three hours; laboratory three hours. Fee course.</p>	<p>BIO 149B. Immunology and Serology Laboratory. 1 Unit Prerequisite(s): BIO 139, BIO 149A. Term Typically Offered: Fall, Spring</p> <p>Laboratory exercises designed to provide familiarity with common clinical laboratory procedures in serology. Laboratory three hours. Fee course.</p>
<p>BIO 140. Medical Microbiology and Emerging Infectious Diseases. 3 Units Prerequisite(s): BIO 39 or BIO 139. Term Typically Offered: Spring only</p> <p>Lectures, discussions, and readings regarding infectious viruses, bacteria, fungi, and parasites, with an emphasis on highly relevant pathogens including emerging infectious agents and microbes that are regionally endemic. The clinical syndrome, along with the molecular and cellular aspects of the course of infection of each pathogen will be discussed. Additionally, the history of microbiology and medicine as well as a brief overview of laboratory methods used for diagnosis will also be covered. Lecture three hours.</p> <p>Note: BIO 140 cannot substitute for BIO 144 in the CLS concentration in Biological Sciences.</p>	<p>BIO 149C. Advanced Problems in Immunology. 1 Unit Prerequisite(s): BIO 139 and CHEM 161. Corequisite(s): BIO 149A. Term Typically Offered: Fall only</p> <p>Advanced problem-solving in immunology designed for students concurrently enrolled in BIO 149A. Discussions and problem sets are focused on the medical, clinical, and biotechnology applications of immunology. Discussion one hour. Credit/No Credit</p>
	<p>BIO 150. Forensic Biology. 3 Units Prerequisite(s): BIO 1, BIO 2 and BIO 184. Term Typically Offered: Spring only</p> <p>Principles governing the application of biology and biological statistics to solve crimes. Topics include evidence examination and preservation, presumptive and confirmatory serological tests, hair comparison, generation and statistical analysis of mitochondrial and nuclear DNA profiles, structure and administration of the modern crime laboratory, and the role of the criminalist in the U.S. court system. Lecture two hours; laboratory three hours.</p> <p>Note: Not offered every semester</p>

BIO 151. Advanced Laboratory Techniques in Forensic Biology. 2 Units
Prerequisite(s): BIO 150 or instructor permission.
Term Typically Offered: Fall only

Laboratory exercises focusing on current research problems and skills in forensic serology, DNA typing, and court testimony. Topics will include DNA mixture and low copy number interpretation, advanced techniques in serological testing, research ethics, as well as skills for effective communication in the courtroom. Topics may also include Y-STR typing, animal and plant DNA identification and typing, microbial forensics, somatic mosaicism, ELISA specificity and sensitivity testing, and other current areas of active inquiry. Designed to prepare students for entry level positions as DNA analysts in federal, state, and local crime laboratories. Laboratory six hours. Fee course.
 Fee course.

BIO 152. Human Parasitology. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only

Examines, in detail, the most important species of protozoans, flukes, tapeworms and roundworms that infect humans. Life cycles, pathology and prophylaxis constitute the principal topics in lectures. Morphology, physiology, taxonomy and diagnosis constitute the principal topics in the laboratory. Lecture two hours; laboratory three hours. Fee course.
 Fee course.

BIO 156. Food Microbiology. 3 Units
Prerequisite(s): BIO 139.
Term Typically Offered: Fall, Spring

Microbiology of food fermentations, food preservation and spoilage. Lecture two hours; laboratory three hours. Fee course.
 Fee course.

BIO 157. General Entomology. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only

Biology of insects and a brief consideration of other terrestrial arthropods. Includes structure, physiology, ecology, classification, economic importance, collection and preservation of insects. Lecture three hours; laboratory three hours. Fee course.
 Fee course.

BIO 160. General Ecology. 3 Units
Prerequisite(s): BIO 1 and BIO 2 or BIO 1 and BIO 10; BIO 100 or ENVS 120. Fee course.
Term Typically Offered: Fall, Spring

Examination of the interrelationships among organisms and their environments. Designed for the major in Biological Sciences or related fields. Topics include the structure and function of terrestrial and aquatic ecosystems, population and community dynamics and human effects on ecosystems. Projects and field trips required. Lecture two hours; laboratory three hours.
 Fee course.
 Field trip(s) may be required.

BIO 162. Ichthyology: The Study of Fishes. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only – even years

Biology of fishes: structure, physiology, ecology, economic importance, propagation and classification. Methods of identification, life history study, propagation, collection and preservation. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.
 Fee course.
 Field trip(s) may be required.

BIO 164. Amphibians and Reptiles: An Introduction to Herpetology. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only – even years

Taxonomy, natural history, ecology and distribution of amphibians and reptiles with emphasis on local forms. Lecture two hours; laboratory three hours. Field trips may be required. Fee course.
 Fee course.
 Field trip(s) may be required.

BIO 166. Ornithology. 3 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Spring only – odd years

Biology of birds: structure, physiology, ecology, behavior, and classification. Methods of life history study, ecological studies, laboratory and field identification. Lecture two hours; laboratory three hours. Field trips required. Fee course.
 Fee course.
 Field trip(s) may be required.

BIO 167. Quantitative Methods in Biology. 3 Units
Prerequisite(s): STAT 1 and BIO 100 or graduate status
Term Typically Offered: Spring only

Focuses on statistical hypothesis testing and experimental design in the biological sciences. Topics include the development of a hypothesis, study design and implementation, management and presentation of data, identification of data types, and appropriate use of statistical procedures. General application to a wide range of biological disciplines and will emphasize the scientific process, critical thinking skills, and the interpretation of statistical results, which will include a project culminating a scientific paper and presentation. Lecture two hours; laboratory three hours.

BIO 168. Mammalogy. 4 Units
Prerequisite(s): BIO 1 and BIO 2.
Term Typically Offered: Fall only

Biology of mammals: structure, physiology, ecology, behavior, classification. Methods of life history, laboratory and field identification, collection and preservation. Lecture three hours; laboratory three hours. Field trips required. Fee course.
 Fee course.
 Field trip(s) may be required.

BIO 169. Animal Behavior.**3 Units****Prerequisite(s):** BIO 1 and BIO 2.**Term Typically Offered:** Spring only

Introduction to the fascinating world of why animals do the things that they do. Focus is on the evolution and function of animal behavior through understanding the costs and benefits of different behavior including foraging, fighting and reproduction. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 170. Advanced Nutrition and Metabolism.**3 Units****Prerequisite(s):** CHEM 161, FACS 113; or instructor permission.**Term Typically Offered:** Spring only – odd years

Study of the physiologic function of carbohydrates, lipids, protein and micronutrients including integrated metabolism, transport, regulation and relation to inborn errors/chronic disease. Introduction to gene-nutrient interaction.

Cross Listed: FACS 170; only one may be counted for credit.

BIO 173. Principles of Fisheries Biology.**3 Units****Prerequisite(s):** BIO 160, STAT 1.**Term Typically Offered:** Fall only – odd years

Introduction to the biological principles basic to fisheries science, including enumeration, recruitment, growth, abundance and mortality. Mathematics, computer modeling, and field methods will be used to understand natural populations and the impact of fishing on those populations in keeping with modern approaches to fisheries science which are grounded in population ecology and conservation biology. Lecture two hours; laboratory three hours. Fee course.

Fee course.

BIO 178. Molecular Ecology.**4 Units****Prerequisite(s):** BIO 184**Corequisite(s):** BIO 188**Term Typically Offered:** Fall, Spring

A survey of the use of molecular tools to understand ecological questions. Lecture will focus on the background and history of the use of molecular tools in ecological settings, including application of molecular tools to conservation of natural resources. Laboratory will include techniques for both wet lab and analysis of molecular data, including interpretation of results. Students will complete a capstone-style project that will culminate in the production of a research proposal.

BIO 179. Conservation Biology & Wildlife Management.**3 Units****Prerequisite(s):** BIO 100. BIO 160 recommended.**Term Typically Offered:** Spring only – odd years

Study of human effects and management of ecological systems, including populations, communities, and ecosystems. Topics include population and biodiversity responses to human activities, endangered species management, reserve design, and restoration.

Note: Lecture two hours; laboratory and fieldwork three hours. Fee course.

Fee course.

BIO 180. Advanced Molecular Biology.**4 Units****Prerequisite(s):** BIO 121 and BIO 184.**Term Typically Offered:** Fall, Spring

Examination of the structure of genes and genomes, the mechanisms by which they change, and the use of evolutionary relationships to understand function. Mechanisms of the regulation of gene expression from gene to phenotype and the tools used to study these processes. Applications of molecular tools in medicine and biotechnology and the ethics around these approaches. Lecture two hours, laboratory six hours.

BIO 183. Cancer Biology.**3 Units****Prerequisite(s):** BIO 121 and BIO 184.**Term Typically Offered:** Fall only

Study of cancer from the molecular level to the effect on whole tissues and organs. Topics to be covered include the classification and nomenclature of cancers, the process leading up to the formation of a cancer, the possible causes of cancer, and possible treatment. Lecture two hours.

BIO 183A. Advanced Problems in Cancer Biology.**1 Unit****Prerequisite(s):** BIO 121 and BIO 184 and BIO 183 or instructor permission; BIO 183 may be taken concurrently**Term Typically Offered:** Fall, Spring

Literature searches and discussions are focused on medical, clinical, and biotechnological applications of Cancer Biology.

BIO 184. General Genetics.**4 Units****Prerequisite(s):** BIO 1 and BIO 2; declared major in Biological Sciences, Biochemistry, Chemistry or instructor consent**Term Typically Offered:** Fall, Spring, Summer

Principles of inheritance as they relate to microorganisms, plants, animals and humans. Genetic mechanisms are analyzed according to evidence derived from both classical and current research. The nature, structure, and function of the genome are considered at the molecular level. Lecture three hours; laboratory three hours. Fee course.

Fee course.

BIO 185. Topics in Biology.**3 Units****Prerequisite(s):** BIO 10 or both BIO 1 and BIO 2; CHEM 20.**Term Typically Offered:** Fall, Spring

Current topics in cellular, developmental and/or molecular biology. Topics will vary. May be taken more than once provided that topics are different. Lecture three hours.

BIO 186A. Cell and Molecular Biology Seminar.**1 Unit****Prerequisite(s):** BIO 10 or both BIO 1 and BIO 2.**Term Typically Offered:** Fall, Spring

Series of at least 10 seminars in cell and molecular biology. Topics within each seminar will vary each semester.

Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement.

Credit/No Credit

BIO 186B. Ecological and Environmental Issues Seminar. 1 Unit**Prerequisite(s):** BIO 10 or both BIO 1 and BIO 2.**Term Typically Offered:** Fall only

Series of at least 10 seminars in ecological and environmental issues.

Topics within each seminar will vary each semester.

Note: May be repeated for credit. No more than one unit of BIO 186 may be counted toward the upper division major requirement. Cross Listed: ENVS 186B; only one may be counted for credit.

Credit/No Credit

BIO 186C. Introduction to Health Careers Seminar. 1 Unit**Term Typically Offered:** Fall, Spring

Designed for pre-health professional students who are in the process of researching traditional and non-traditional health professions and careers. This course consists of at least 10 seminars presented by various practicing health professionals, health professional students, and health professional school admissions officers. Topics vary each semester. One hour per week.

Credit/No Credit

BIO 187. Advanced Cell Biology. 4 Units**Prerequisite(s):** BIO 121 and BIO 184.**Term Typically Offered:** Fall, Spring

Advanced cellular and molecular biology of eukaryotic cells. Comparison to prokaryotic organism will be made as needed to illustrate key concepts. Emphasis will be placed on cellular functions and utilize two or more cellular systems; including cell to cell communication, regulation of gene expression, uptake and secretion, regulation of cytoskeletal configuration, cell migration and cellular reproduction. Lecture two hours, laboratory six hours.

BIO 188. Evolution. 3 Units**Prerequisite(s):** BIO 184 or instructor permission.**Term Typically Offered:** Fall, Spring

General survey of evolutionary processes: mechanisms of evolutionary change, adaptation and history of life. Designed for biological sciences majors. Lecture three hours.

BIO 194. Biology-Related Work Experience. 6 - 12 Units**Term Typically Offered:** Fall, Spring

Supervised employment in a biology or biology-related company or agency arranged through the Department of Biological Sciences and the Cooperative Education Program office. Requires preparation of application packet, completion of a three to six month, full-time or part-time work assignment, and a written report.

Note: Open only to upper division or graduate students with appropriate preparation. Consent of Department Cooperative Education Committee required, and Committee will determine the number of units to be granted. Students may enroll for no more than 12 total units, and units may not be used to meet biology major or graduate course work requirements.

Credit/No Credit

BIO 195. Biological Internship. 1 - 2 Units**Prerequisite(s):** Department chair and instructor (representing the appropriate biological discipline) permission.**Term Typically Offered:** Fall, Spring

Supervised work-learn experience in biology with a public or private organization. Up to 4 units may be taken. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

BIO 195D. Dental Internship. 1 - 2 Units**Prerequisite(s):** Department chair and instructor (representing the appropriate preprofessional discipline) permission.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in the medical-related and business-related aspects of dentistry. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the biological sciences upper division major requirement.

Note: 1 unit = 40 hours of participation/semester and 2 units = 80 hours of participation/semester; May be repeated for up to 4 units of credit .

Credit/No Credit

BIO 195M. Medical Internship. 2 Units**Prerequisite(s):** Department Chair, Instructor and Placement Agency's permission required.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in multiple aspects of health care. Includes a volunteer experience in the community, supplemental readings, and a presentation on current issues in medicine and health education. No more than 2 units of BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Note: 80 hours of participation/semester

Credit/No Credit

BIO 195P. Pharmacy Internship. 1 - 2 Units**Prerequisite(s):** Department Chair, Instructor, and Placement Agency permission required.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in pharmacy. Includes a volunteer experience in the community. No more than 2 units from BIO 195, BIO 197 and Bio 199 combined can be applied to the biological sciences upper division major requirement. May be repeated for up to 4 units of credit. 1.0-2.0 units (40-80 hours of participation/semester).

Credit/No Credit

BIO 195T. Teaching Internship. 1 - 2 Units**Prerequisite(s):** Department chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised non-paid internship experience in K-12 teaching. Includes regular meetings with supervising teacher and submission of a field experience journal. May be repeated for credit.

Note: No more than 2 units from BIO 195, 197 and 199 combined can be applied to the biological sciences upper division major requirement.

Credit/No Credit

BIO 197A. Laboratory Teaching Assistant. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised experiences will include aspects of laboratory preparation and aspects of teaching biology laboratory courses. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

BIO 197B. Laboratory Techniques. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Supervised laboratory experiences for advanced students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197C. Co-curricular Activities in Biology. 1 - 2 Units**Term Typically Offered:** Fall, Spring

Students may earn BIO 197C credit by participating as tutors and/or section or discussion leaders for biological sciences classes or teaching as voluntary instructors or tutors in K-12 courses or programs offered by other community organizations. Participation requires four to eight hours weekly. Admission requires approval of professor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197D. Advanced Laboratory Exploration. 1 - 2 Units**Prerequisite(s):** BIO 197A and instructor permission.**Term Typically Offered:** Fall, Spring

Advanced, supervised experiences that explore the science behind laboratory experiences and discussion regarding aspects of specific laboratories that promote understanding of scientific content. Conferences and laboratory experiences four to eight hours weekly; written assignments and/or oral presentations required. Admission requires approval of professor and Department Chair.

Note: No more than 2 units from BIO 195, BIO 197, BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 197E. Intermediate Lab Techniques. 1 - 2 Units**Prerequisite(s):** BIO 197B and instructor or Department Chair permission**Term Typically Offered:** Fall, Spring

Supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 197F. Advanced Lab Techniques. 1 - 2 Units**Prerequisite(s):** BIO 197B and instructor permission.**Term Typically Offered:** Fall, Spring

Advanced supervised laboratory experiences for skilled students in the organization and techniques for operation of a basic sciences laboratory. Conferences and laboratory experiences four to eight hours weekly. Admission requires approval of instructor and Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

Credit/No Credit

BIO 198A. Honors Proseminar and Research. 2 Units

Prerequisite(s): Open only to honors students in biological sciences who have an overall GPA of 3.25 and a minimum of 3.0 GPA in biology courses (at least six units of upper division biology excluding BIO 106, BIO 108, BIO 194, BIO 195, BIO 197 and BIO 199).

Term Typically Offered: Fall, Spring

Contemporary topics in biology selected by students in the course will form the basis for an introduction to scientific journals, the scientific method, and research as a professional pursuit. Each student develops a refined research proposal and prepares a seminar summarizing the proposal and the current state of knowledge in the topic area. Students will develop and refine their methodology under the direction of a faculty sponsor.

BIO 198B. Honors Research and Seminar. 2 Units**Prerequisite(s):** BIO 198A.**Term Typically Offered:** Fall, Spring

Directed research involving completion of an independently conducted research project for which a proposal and methodology was developed in BIO 198A. Data collection, summary and analysis, and formulation of conclusions based on the data will be discussed periodically with a faculty sponsor. Culmination will consist of preparation of an undergraduate thesis, poster and presentation of a seminar summarizing results and conclusions.

Note: Open only to honors students in Biological Sciences. Fee course.

Fee course.

BIO 199A. Introductory Undergraduate Research. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Student conducts introductory, independent laboratory or field research on an original question. Research must culminate in a formal report.

Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once, no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199B. Directed Readings. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Directed Readings on a topic in Biology culminating in a research paper. Admission requires submission of a prospectus approved by the faculty member under whom the work is to be conducted and the Department Chair.

Note: May be taken more than once, but no more than 2 units from BIO 195, BIO 197 and BIO 199 combined can be applied to the Biological Sciences upper division major requirement.

BIO 199C. Intermediate Undergraduate Research. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Student conducts independent laboratory or field research on an original question. Research must culminate in a formal report. Weekly meetings may be required. Students must have a research prospectus approved by faculty mentor and Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 199D. Advanced Undergraduate Research. 1 - 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Advanced laboratory or field research on an original question. The research must culminate in a formal report. Weekly meetings may be required. Students must have a prospectus approved by the faculty member and the Department Chair.

Note: May be taken more than once; no more than 2 units from BIO 195, BIO 197 and BIO 199 combined may be applied to the Biological Sciences upper division major requirement.

BIO 214. Advanced Plant Ecology. 3 Units**Prerequisite(s):** BIO 160.**Term Typically Offered:** Fall, Spring

Fundamental properties of plant populations; population regulation; community productivity and structure; a study of ecotypic and ecocline variation in plant populations. Lecture one hour; laboratory and field six hours.

BIO 220. Introduction to Scientific Inquiry. 2 Units**Term Typically Offered:** Fall, Spring

Graduate level introduction to scientific inquiry in the biological sciences. Students learn to apply the scientific method, critically evaluate the scientific literature, initiate their graduate project, and develop written and oral scientific presentation skills. Lecture two hours.

Note: Graduate Writing Intensive (GWI).

BIO 221A. Cell and Molecular Methods and Techniques. 2 Units**Prerequisite(s):** BIO 220 (may be taken concurrently).**Term Typically Offered:** Fall, Spring

Introduction to research methods in molecular and cellular biology. Students learn both cell and molecular techniques in the context of hypothesis-driven research to answer questions relating to a specific gene and cellular system. Experimental design and commonly used laboratory techniques will be explored. Two three hour laboratory periods.

Fee course.

Fee course.

BIO 221B. Methods in Ecology, Evolution and Conservation. 2 Units**Prerequisite(s):** BIO 167, BIO 220 (may be taken concurrently).**Term Typically Offered:** Fall, Spring

Introduction to research methods in ecology, evolution and conservation biology. Students learn field and laboratory techniques with a variety of taxa in a range of local ecosystems. Students will work with several faculty conducting research projects. Topics will include developing hypotheses, experimental design, study implementation, and statistical analyses. Students will be expected to present findings in oral and written form. Two three hour laboratory periods. Fee course.

Fee course.

BIO 221C. Exploration of Biological Methodology. 3 Units**Term Typically Offered:** Fall, Spring

Intended for students in the MA grant proposal track, this course explores a selected topic from multiple scientific perspectives. A discovery-based laboratory project using cell and molecular techniques complimented with lectures, discussions and field trips that investigate the ecological, environmental, and evolutionary aspects of the same topic. The laboratory project will focus on a current biological topic (such as genetically modified organisms) in accordance with the instructor's interests and expertise. One hour lecture, six hours lab per week.

Note: Not open to students in the Master of Science in Molecular and Cellular Biology Concentration.

Field trip(s) may be required.

BIO 222. Molecular Biology. 3 Units**Prerequisite(s):** BIO 184, CHEM 161.**Term Typically Offered:** Fall, Spring

Processes and control of DNA replication, transcription, and translation developed from a consideration of the current literature. Lecture three hours.

- BIO 223. Human Molecular Genetics. 3 Units**
Prerequisite(s): BIO 184 and CHEM 161.
Term Typically Offered: Fall, Spring
- In-depth study of the molecular basis of human disease, emphasizing current experimental approaches and technologies. Topics include the isolation and analysis of disease genes, the influence of teratogens and random environmental events on human embryonic development, the molecular and biochemical consequences of mutagenesis, and ethical issues that currently surround the field. Lecture 3 hours.
- BIO 224. Genomics, Proteomics, and Bioinformatics. 3 Units**
Prerequisite(s): BIO 184, BIO 222 and graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Examination of current approaches in structural genomics, functional genomics and proteomics, and the bioinformatics tools utilized to understand genome organization, the regulation of gene expression, gene function and the evolutionary relationships within and between genomes. Lecture two hours; laboratory 3 hours.
- BIO 225. Stem Cell Biology and Manufacturing Practices. 1 Unit**
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
- Graduate level introductory course in human stem cell biology with specific emphasis on adult, embryonic, and induced pluripotent stem cells. Topics will include how stem cells are isolated or generated, how they are cultured, and how they are used for regenerative therapies. In addition, students will learn about Good Manufacturing Practice (GMP) and how to manufacture human stem cells.
- BIO 227. Development and Regenerative Medicine. 3 Units**
Prerequisite(s): Graduate status and instructor permission.
Term Typically Offered: Fall, Spring
- Examines the processes of cellular development in the embryo and adult with a focus on stem cells. Stem cells will be studied at the biochemical, molecular, genetic, epigenetic, cellular and physiological level, with an emphasis on their roles in promoting organismal health and disease. Current research and clinical applications will be examined, along with the bioethics, policies and politics of their use.
- BIO 245. Host/Pathogen Interactions. 3 Units**
Prerequisite(s): BIO 121, BIO 139, BIO 184. Courses recommended but not required: BIO 144, BIO 149, BIO 180.
Term Typically Offered: Fall, Spring
- Critical reading and discussion of current literature on host/pathogen interactions. Topics to be covered include: alteration of host intracellular trafficking, subversion of cell cytoskeleton for invasion, intracellular survival mechanisms, pathogen-induced cell killing, and evasion and subversion of the host immune system.
- BIO 247. Contemporary Topics in Immunology. 2 Units**
Prerequisite(s): BIO 149A or instructor permission.
Term Typically Offered: Fall, Spring
- Readings and discussions of current literature emphasizing new field developments and controversies. Lecture two hours.
- BIO 260. Advanced Ecology. 3 Units**
Prerequisite(s): BIO 160 or equivalent.
Term Typically Offered: Fall, Spring
- Principles and applications of theoretical and field ecology as they apply to populations, communities and ecosystems.
- BIO 269. Behavioral Ecology. 3 Units**
Prerequisite(s): BIO 160 or instructor permission.
Term Typically Offered: Fall, Spring
- Advanced study of animal behavior focusing on the life history consequences of social organization, spacing systems, sexual behavior, reproductive ecology, feeding ecology, competitive interactions and predator-prey interactions.
- BIO 273. Advanced Fishery Biology and Management. 3 Units**
Prerequisite(s): BIO 173 or instructor permission.
Term Typically Offered: Fall, Spring
- Critical review and evaluation of current techniques and concepts relating to the management, protection, and improvement of fishery resources. Lecture three hours.
- BIO 279. Conservation Biology and Wildlife Management. 3 Units**
Prerequisite(s): BIO 160, BIO 179; or instructor permission.
Term Typically Offered: Fall, Spring
- Critical review of applications of ecological and wildlife-orientated theory in conservation biology research. Exploration of key topics and issues in conservation of organisms, with emphasis on vertebrate animals and plants. Lecture/discussion three hours.
- BIO 282. Evolution. 3 Units**
Term Typically Offered: Fall, Spring
- Process of evolution throughout the taxonomic hierarchy and factors responsible for the generation of variability of the gene, cell, organism and population levels are explored through lectures, text readings and a survey of current periodical literature. Lecture 3 hours.
- BIO 283. Biogeography. 3 Units**
Term Typically Offered: Fall, Spring
- Study of the past and present plant and animal distributions, and the geologic, climatic and ecologic factors involved in their migration, establishment and extinction. Lecture/discussions three hours.
- BIO 285. Topics in Biology. 3 Units**
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Fall, Spring
- Readings and discussions of current literature emphasizing new developments and controversies in a comparatively narrow range of biological topics. Topics will vary with each offering, encompassing one recognized specialty in biology. May be repeated for credit when the topics vary.

BIO 293. Research Conference. 2 Units**Prerequisite(s):** Department Chair and instructor permission.**Term Typically Offered:** Fall, Spring

Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques.

Note: Discussion two hours. May be taken twice for credit. Only two units may be applied to the University's requirement for 200-level courses; May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 294A. Seminar in Molecular and Cellular Biology. 1 Unit**Prerequisite(s):** Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.**Term Typically Offered:** Fall, Spring

Review and discussion of scientific literature in cell and molecular biology. Seminar topics will vary by semester.

Note: May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 294B. Seminar in Ecology, Evolution and Conservation. 1 Unit**Prerequisite(s):** Student must be a Biology major at the master's level to enroll in this class and/or have instructor permission.**Term Typically Offered:** Fall, Spring

Review and discussion of scientific literature in ecology, evolution, and conservation biology. Seminar topics will vary by semester.

Note: May be repeated for up to 4 units of credit.

Credit/No Credit

BIO 297A. Teaching Biology Seminar. 1 Unit**Prerequisite(s):** Acceptance in the GTA Program or instructor permission.**Term Typically Offered:** Fall, Spring

Training for graduate students who wish to participate in the Department's Graduate Teaching Associate (GTA) Program and others interested in teaching biology. Weekly seminar session covering aspects of teaching biology laboratories. Lecture/discussion. Not applicable toward 18 unit 200-level course work requirement.

Credit/No Credit

BIO 297B. Laboratory Teaching. 1 Unit**Prerequisite(s):** Acceptance in the GTA Program or instructor permission.**Term Typically Offered:** Fall, Spring

Training for graduate students admitted to the Graduate Teaching Associate (GTA) Program. Students assist in teaching three hours of biology laboratory weekly under the supervision of a laboratory instructor. Laboratory three hours. Not applicable toward 18 unit 200-level coursework requirement.

Credit/No Credit

BIO 299. Problems in Biological Sciences. 1 - 4 Units**Term Typically Offered:** Fall, Spring

Library research, short-term original research, technique development, or thesis research site selection and preliminary field observations. Culminating experience will be in the format of a scientific paper, annotated bibliography, demonstration of technique mastery, or oral presentation. Enrollment requires classified graduate status and approval of the project by a faculty supervisor and the Department Chair.

Credit/No Credit

BIO 500. Master's Thesis. 4 Units**Prerequisite(s):** Advanced to candidacy and chair permission of his/her thesis committee.**Term Typically Offered:** Fall, Spring

Completion of a thesis approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 502. Master's Project. 2 Units**Prerequisite(s):** Advanced to candidacy and chair permission of his/her committee.**Term Typically Offered:** Fall, Spring

Completion of a written project based on a research problem in biology approved for the Master of Arts Degree. Should be taken in final semester prior to the completion of all requirements for the degree.

BIO 633. Human Gross Anatomy for Physical Therapists. 3 Units**Prerequisite(s):** BIO 22 or instructor permission.**Corequisite(s):** PT 600, PT 602, PT 608, PT 630.**Term Typically Offered:** Fall, Spring

Study of the gross anatomy of selected regions of the human body. Emphasis will be placed on musculoskeletal, neurovascular and anatomy of the joints of the back, thoracic wall, abdominal wall, upper limb and lower limb. Anatomical relationships will be reinforced through study of cross-sectional anatomy. Lecture two hours; lab three hours.

Note: Course designed for students enrolled in the Doctor of Physical Therapy Program.

Business Administration (BUS)

BUS 162. Project Management. 3 Units**Prerequisite(s):** MGMT 102.**Term Typically Offered:** Fall, Spring

Processes, methodologies, tools, techniques, software, economic analysis, and life-cycle costing for managing different phases of projects. Emphasis on effective management of projects to achieve operational, managerial, and strategic goals of organizations.

Business Honors (BHON)

BHON 102. Business Communication. 2 Units**Prerequisite(s):** Admitted into Business Honors Program.**Term Typically Offered:** Fall, Spring

Provides basic concepts for the understanding and practice of communication for managers and professionals. Examines the use of language and conversations in business settings and their role in coordinating actions, resolving breakdowns in work performance, and providing customer satisfaction. Topics include professional styles and formats of business writing and development of competence in business conversation skills (written, electronic and oral).

- BHON 103. Business Legal Environment. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- Investigates substantive law and stresses critical thinking and analytical evaluation of contemporary business legal issues. Identifies ethical concerns and addresses potential legal problems. Topics include an introduction to the legal system, court procedures, contracts and sales, real and personal property, labor and employment law, product liability, and the government regulation of business.
- BHON 104. Fundamentals of Organizational Behavior. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- The course provides students frameworks to deal and work with members of work organizations, and focuses on how individual, group and organization-level factors influence employee attitudes and behaviors. The course further discusses challenges people face in today's dynamic work environment and global settings.
- BHON 105. Introduction to Management Information Systems. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- Explores the application of information technology in the organizational environment to assist in managerial decision making. Examines the alignment of IT and business strategy.
- BHON 106. Business Data Analysis. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- Applies statistical methods to solve business problems and inform managerial decision making. Topics include data analysis, statistical reasoning, model building and communication of statistical results. A statistical computer package is used in this course.
- BHON 107. Business Finance. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- Study of principles of finance and their application to typical financial problems of business enterprises. Topics include financial analysis, management of working capital, capital budgeting, long-term financing, dividend policy, internal financing, and time value of money.
- BHON 108. Fundamentals in Marketing. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- An introduction to marketing concepts and principals. Examines the marketing function, its relationships with other business functions, and its role in the US and global economies.
- BHON 109. Operations Management. 2 Units**
Prerequisite(s): Admitted into Business Honors Program.
Term Typically Offered: Fall, Spring
- Introduces the basic concepts and methods used to analyze and improve operation performance in manufacturing and service organizations. Topics include operations strategy, process design and capacity management, inventory management, supply chain management, and operations planning and control.
- BHON 120. Business Intelligence. 3 Units**
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring
- Focuses on enterprise problem solving and decision making using information technology, and data and financial analyses for mission critical and integral applications in planning and control. Alternative solutions are examined and evaluated for their effectiveness in achieving results.
- BHON 130. Value Chain and Supply Chain Management. 3 Units**
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring
- Methods used for developing effective organizational value chains that integrate strategic planning, procurement, R&D, production, warehousing, distribution, and customer service to support business strategy. Includes critical decisions surrounding various organizational stakeholders, such as customer and supplier management, and the movement of goods and information throughout a supply chain network.
- BHON 140. Enterprise Resource Planning and Infrastructure. 3 Units**
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring
- Examines the design, planning, implementation and impact of enterprise-wide systems on the organization and infrastructure. Focuses on the integration and coordination of all facets of business, including production, accounting, finance, human resources, and marketing to improve the organization's resource planning, and management and operational control.
- BHON 150. Entrepreneurship and Innovation. 3 Units**
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring
- An application based course that provides a broad understanding of the new venture processes. Discusses fundamental tools and skills necessary to create, run, and grow a successful new venture. Offers a multidisciplinary framework for studying and developing innovative and creative capabilities of entrepreneurs.
- BHON 160. Project Management. 3 Units**
Prerequisite(s): BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109
Term Typically Offered: Fall, Spring
- Methods and processes used for planning, controlling and managing projects. Includes project selection and scope, scheduling methodologies, economic analysis, the use of software, and life-cycle costing for managing different phases of projects. Emphasis on effective management of projects to achieve operational, managerial and strategic goals of organizations.

BHON 170. Strategy and Leadership. 3 Units**Prerequisite(s):** BHON 102, BHON 104, BHON 105, BHON 106, BHON 107, BHON 108, BHON 109**Term Typically Offered:** Fall, Spring

An introduction to traditional and contemporary theories of business strategy, corporate strategy and strategic leadership. Compares and contrasts theories in strategy and styles of strategic leadership through case studies, current research, and conversations with business leaders.

BHON 190. Practicum in Business. 1 Unit**Prerequisite(s):** BHON 120, BHON 130, BHON 140, BHON 150 and BHON 160.**Corequisite(s):** BHON 170.**Term Typically Offered:** Fall, Spring

A series of forums that exposes students to practical business issues that have significant impact on the enterprise. Discussions with managers who have effectively led planning and operations. Compares and contrasts business concepts and principles to their practical applications.

Chemistry (CHEM)

CHEM 1A. General Chemistry I. 5 Units**Prerequisite(s):** High school chemistry and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or a minimum grade of "C" in CHEM 4.**General Education Area/Graduation Requirement:** Physical Science (B1), Laboratory (B3)**Term Typically Offered:** Fall, Spring

Fundamental principles and concepts of chemistry, including stoichiometry; thermochemistry; atomic and molecular structure; solution chemistry, including acid-base chemistry; quantum theory; bonding and intermolecular forces; and chemical kinetics. Lecture three hours, laboratory three hours, discussion one hour.

Note: Not open to enrollment by engineering majors, who should take CHEM 1E, General Chemistry for Engineering.**CHEM 1B. General Chemistry II. 5 Units****Prerequisite(s):** CHEM 1A with a passing grade of C or better.**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Continuation of the development of fundamental principles of chemistry and application of principles developed in CHEM 1A. The laboratory work emphasizes applications of equilibrium principles, including some qualitative analysis, coordination chemistry and bioinorganic chemistry. Lecture three hours, laboratory six hours. Knowledge of word processing and spreadsheet software is recommended.

CHEM 1E. General Chemistry for Engineering. 4 Units**Prerequisite(s):** High school chemistry; Math 30 or eligibility to take MATH 30 as evidenced by the calculus readiness diagnostic exam; passing score on a standardized Chemistry diagnostic exam given prior to each semester, or minimum grade of "C" in CHEM 4**Term Typically Offered:** Fall, Spring, Summer

A one-semester chemistry course for engineering students covering the fundamental principles and concepts of chemistry important to engineering applications. Lecture topics include atomic and molecular structure, solution chemistry, equilibrium, oxidation-reduction, thermochemistry; intermolecular forces; electrochemistry; radiochemistry; polymers; metallic bonding and alloys; chemical diffusion and kinetics. Lecture three hours, Lab three hours.

Note: Enrollment in this course is restricted to engineering majors.**CHEM 4. Chemical Calculations. 3 Units****Prerequisite(s):** High school algebra and college algebra; sufficient performance on the college algebra diagnostic test, or equivalent.**Term Typically Offered:** Fall, Spring, Summer

Introductory chemistry for students who plan to major in a scientific field. Appropriate for students desiring to prepare themselves for Chemistry 1A. Emphasizes chemical nomenclature and techniques of chemical problem solving. Topics covered include: dimensional analysis; conversions between measuring units; weight, mole and chemical equations; density; elementary gas laws; heat and temperature; elementary acid and base chemistry; oxidation and reduction; solutions. Three hours lecture.

CHEM 5. Chemistry for Nurses. 5 Units**Prerequisite(s):** One year high school algebra, high school chemistry .**General Education Area/Graduation Requirement:** Physical Science (B1), Laboratory (B3)**Term Typically Offered:** Fall, Spring

One-semester chemistry survey course for pre-nursing students, covering the areas of general chemistry, organic chemistry and biochemistry.

Major lecture topics include atomic and molecular structure and bonding, nomenclature of relevant inorganic and organic compounds, states of matter and intermolecular forces, solutions and solubility, reactions of inorganic, organic, and biological molecules, stereochemistry, structure and function of biological macromolecules, nutrition and metabolism. Emphasize chemistry as it appears in a practical nursing context. Lecture four hours, laboratory three hours.

CHEM 6A. Introduction to General Chemistry. 5 Units**Prerequisite(s):** One year high school algebra; high school chemistry recommended.**General Education Area/Graduation Requirement:** Physical Science (B1), Laboratory (B3)**Term Typically Offered:** Fall, Spring

Structure of atoms, molecules and ions; their interactions including stoichiometry, equilibria, and oxidation-reduction. Does not fulfill the requirements for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours, discussion one hour, laboratory three hours.

CHEM 6B. Introduction to Organic and Biological Chemistry. 5 Units

Prerequisite(s): CHEM 1A or CHEM 6A, or a high school chemistry course and passing a qualifying exam given in the first laboratory period.

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall, Spring

Introduction to structure and properties of the major classes of organic compounds; introduction to nomenclature and to the fundamental concepts of reaction mechanisms and stereochemistry; the chemistry and metabolism of carbohydrates, lipids, proteins (including enzymes); the chemistry of nucleic acids. Does not fulfill the requirement for more advanced study in chemistry and cannot be counted toward a major or minor in chemistry. Lecture three hours; discussion one hour; laboratory three hours.

CHEM 20. Organic Chemistry Lecture--Brief Course. 3 Units

Prerequisite(s): CHEM 1B.

Term Typically Offered: Fall, Spring, Summer

Basic principles of organic chemistry. Recommended for students majoring in life-sciences, but not recommended for preprofessional students.

CHEM 20L. Introductory Organic Chemistry Laboratory. 1 Unit

Prerequisite(s): CHEM 20; CHEM 20 may be taken concurrently.

Term Typically Offered: Fall, Spring

Basic organic experimental techniques. Experimental topics include: melting points, purification of solids, distillation, chromatography, extraction, and functional group qualitative analysis. Specifically designed for Biological Sciences majors and others who want to meet the Chemistry minor requirements for a lower division organic laboratory. Laboratory three hours.

CHEM 24. Organic Chemistry Lecture I. 3 Units

Prerequisite(s): CHEM 1B.

Term Typically Offered: Fall, Spring, Summer

Introduction to the basic principals of organic chemistry, including nomenclature, properties and reactions of various classes of organic compounds. Reaction mechanisms will be emphasized.

Note: Required for chemistry majors and recommended for preprofessional students.

CHEM 25. Organic Chemistry Laboratory. 3 Units

Prerequisite(s): CHEM 24, CHEM 124; CHEM 124 may be taken concurrently.

Term Typically Offered: Fall, Spring, Summer

Basic organic experimental techniques including the preparation, separation, purification and identification of organic compounds. Discussion one hour, laboratory six hours.

CHEM 31. Quantitative Analysis. 4 Units

Prerequisite(s): CHEM 1B.

Term Typically Offered: Fall, Spring

Chemical measurements including associated statistics, chemical equilibrium in aqueous solutions, volumetric analysis, and an introduction to spectrophotometry and chromatography. Lecture two hours, laboratory six hours.

CHEM 89. Introduction to Undergraduate Research. 1 - 3 Units

Term Typically Offered: Fall, Spring

Introduction to undergraduate research which requires students to become familiar lab safety policies, SDSs, and SOPs in the research lab (if applicable), attend group meetings (if applicable) and learn methods of experimental, educational and/or computational design. Students must show proficiency in these requirements in order to receive a final grade. Credit/No Credit

CHEM 106. Chemical Concepts. 3 Units

Prerequisite(s): GEOL 8 or BIO 7 and ENGL 20 or an equivalent second semester composition course.

Term Typically Offered: Fall, Spring

Principles and concepts of chemistry with applications in the home and environment. Satisfies the upper division chemistry requirement for the multiple-subject teaching credential. Lecture one hour, discussion and activity four hours. Does not fulfill credit requirements for the major or minor in chemistry.

CHEM 110. Inorganic Chemistry Lecture. 3 Units

Prerequisite(s): CHEM 125, CHEM 140B or CHEM 142 instructor permission; CHEM 140B may be taken concurrently, however, students are encouraged to complete CHEM 140B and CHEM 141 first.

Corequisite(s): CHEM 110L.

Term Typically Offered: Fall only

Application of atomic structure, the periodic law, molecular structure and bonding principles, electrochemical principles and other selected models and concepts to theoretical and descriptive inorganic chemistry. Physical and chemical properties of selected elements and inorganic compounds are studied.

CHEM 110L. Advanced Inorganic Chemistry Laboratory. 2 Units

Prerequisite(s): CHEM 125, ENGL 20 or an equivalent second semester composition course.

Corequisite(s): CHEM 110.

Term Typically Offered: Fall only

Preparation, purification and instrumental studies of inorganic compounds. Instrumental and experimental techniques will include EPR, magnetic susceptibility, FTIR, UV-VIS spectroscopy and inert atmosphere techniques.

CHEM 124. Organic Chemistry Lecture II. 3 Units

Prerequisite(s): CHEM 24 or instructor permission; concurrent enrollment in CHEM 25 recommended.

Term Typically Offered: Fall, Spring, Summer

Continued discussion of the principals of organic chemistry, including nomenclature, properties, and reactions of various classes of organic compounds and spectroscopic analysis. Reaction mechanisms will be emphasized.

CHEM 125. Advanced Organic Chemistry Laboratory. 3 Units

Prerequisite(s): CHEM 25, CHEM 124, ENGL 20 or an equivalent second semester composition course.

Term Typically Offered: Fall, Spring

Focuses on advanced organic laboratory techniques and instrumental methods of analysis. Not intended for pre-health professional majors. Discussion one hour, laboratory six hours.

- CHEM 126. Physical Organic Chemistry. 3 Units**
Prerequisite(s): CHEM 124, and CHEM 140B or CHEM 142, or instructor permission.
Corequisite(s): CHEM 140B or CHEM 142 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.
Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.
- CHEM 128. Organic Synthesis. 3 Units**
Prerequisite(s): CHEM 124.
Term Typically Offered: Spring only
- Application of functional group reactions to multistep syntheses. Recently developed synthetic methods and literature searching will be emphasized.
- CHEM 133. Chemical Instrumentation. 4 Units**
Prerequisite(s): CHEM 31, concurrent enrollment in CHEM 140B or completion of CHEM 142; ENGL 20 or an equivalent second semester composition course. Graded: Graded Student. Units: 4.0
Term Typically Offered: Fall, Spring
- Modern instrumentation and methods for chemical analysis. Function of electronics and computers in instruments. Theory and use of instruments in the areas of electrochemistry, spectroscopy, mass spectrometry and chromatography. Lecture two hours, laboratory six hours.
- CHEM 140A. Physical Chemistry Lecture I. 3 Units**
Prerequisite(s): CHEM 1B, CHEM 24, CHEM 31, MATH 32, PHYS 5A, PHYS 5B, or PHYS 11A, PHYS 11B, PHYS 11C; PHYS 11C may be taken concurrently.
Term Typically Offered: Fall only
- Introduction to chemical thermodynamics and kinetics.
- CHEM 140B. Physical Chemistry Lecture II. 3 Units**
Prerequisite(s): CHEM 140A.
Term Typically Offered: Fall, Spring
- Introduction to molecular quantum chemistry, structure of matter, molecular spectroscopy, and statistical thermodynamics.
- CHEM 141. Physical Chemistry Laboratory. 3 Units**
Prerequisite(s): ENGL 20 or an equivalent second semester composition course; CHEM 140A, CHEM 140B or CHEM 142, instructor permission; CHEM 140B may be taken concurrently.
Term Typically Offered: Fall, Spring
- Selected exercises in the practice of physio-chemical laboratory methods. Lecture one hour, laboratory six hours.
- CHEM 142. Introduction to Physical Chemistry. 4 Units**
Prerequisite(s): CHEM 1B, CHEM 24, PHYS 5A, PHYS 5B, MATH 31.
Term Typically Offered: Fall, Spring
- Introductory presentation of the theoretical and practical aspects of thermodynamics, quantum chemistry, spectroscopy, and kinetics. As time permits, other topics will be: solution chemistry, hydrodynamics, electrochemistry, and crystallography.
Note: Not acceptable for the BS or the BA without concentration.
- CHEM 145. Applications of Computational Chemistry. 3 Units**
Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.
Term Typically Offered: Fall only – odd years
- Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/computational software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.
Note: CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145. Cross-listed: CHEM 245.
- CHEM 160A. Structure and Function of Biological Molecules. 3 Units**
Prerequisite(s): CHEM 124; MATH 26A or MATH 30 is recommended. Fall only.
Term Typically Offered: Fall only
- The chemistry and biochemistry of amino acids, proteins, nucleic acids, lipids and carbohydrates. Also includes enzyme kinetics, the structure and function of biological membranes and discussion of some common laboratory methods. Lecture three hours.
- CHEM 160B. Metabolism and Regulation of Biological Systems. 3 Units**
Prerequisite(s): CHEM 160A or equivalent course; one year of organic chemistry. Spring only.
Term Typically Offered: Spring only
- The bioenergetics and regulation of anaerobic and aerobic metabolic pathways. Major topics include glycolysis, Krebs's cycle, fatty acid and amino acid oxidation, lipid biosynthesis and photosynthesis. Particular emphasis is given to pathway regulation and integration. Lecture three hours.
- CHEM 161. General Biochemistry. 3 Units**
Prerequisite(s): CHEM 20 or CHEM 124; one year of biological science is recommended.
Term Typically Offered: Fall, Spring, Summer
- Introduction to the structure and function of biological molecules (carbohydrates, lipids, proteins, nucleic acids, enzymes and hormones), enzyme kinetics, the structure and function of membranes, and the bioenergetics and regulation of major anaerobic and aerobic metabolic pathways.

CHEM 162. General Biochemistry Laboratory. 3 Units

Prerequisite(s): CHEM 31; CHEM 160A or CHEM 161 (either CHEM 160A or CHEM 161 may be taken concurrently); ENGL 20 or an equivalent second semester composition course.

Term Typically Offered: Fall, Spring

Introduction to fundamental laboratory techniques for the purification and analysis of biological molecules, including chromatographic separation of amino acids and proteins, electrophoretic separation of proteins and nucleic acids, enzyme kinetics, and basic bioinformatics. Discussion one hour, laboratory six hours.

CHEM 164. Advanced Biochemistry Laboratory. 3 Units

Prerequisite(s): CHEM 162 or equivalent; ENGL 20 or an equivalent second semester composition course.

Term Typically Offered: Fall, Spring

Capstone course which emphasizes biochemical laboratory experimental design and trouble-shooting skills. Common biochemistry laboratory techniques are applied in semester-long individual student projects. Discussion one hour, laboratory six hours.

CHEM 189A. Undergraduate Research. 1 - 3 Units

Prerequisite(s): ENGL 20 or equivalent

Term Typically Offered: Fall, Spring

Directed undergraduate research involving a project that requires use of chemical literature and experimental design. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189B. Intermediate Undergraduate Research. 1 - 3 Units

Prerequisite(s): ENGL 20 or equivalent and CHEM 189A

Term Typically Offered: Fall, Spring

Continuing directed undergraduate research involving a project with emphasis on experimentation and data analysis. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189C. Advanced Undergraduate Research. 1 - 3 Units

Prerequisite(s): ENGL 20 and CHEM 189B

Term Typically Offered: Fall, Spring

Culminating directed undergraduate research with emphasis on comprehensive data analysis and formulation of conclusions. A comprehensive written report and/or scientific poster must be submitted to receive a final grade.

Note: Only three units of CHEM 189A-C may be applied toward the major requirement in chemistry for the BA or BS degrees.

CHEM 189D. Culminating Advanced Undergraduate Research.

1 - 3 Units

Prerequisite(s): ENGL 20 and CHEM 189C

Term Typically Offered: Fall, Spring

Extension of culminating undergraduate research with emphasis on finalizing data analysis and writing experimental methods for potential publication. A comprehensive written report (if a scientific poster was completed in 189C) and/or scientific poster (if a written report was completed in 189C) must be submitted to receive a final grade.

Credit/No Credit

CHEM 194. Chemistry-Related Work Experience. 6 - 12 Units

Prerequisite(s): Open only to upper division students and consent of Department Chair. Units may not be applied toward a major in Chemistry or Biochemistry.

Term Typically Offered: Fall, Spring

Supervised employment in a Chemistry related company or agency. Placement is arranged through the Department and the Cooperative Education Program office. Requires completion of a 3-6 month work assignment and a written report. Credit/No Credit

CHEM 198. Senior Research. 3 Units

Prerequisite(s): One upper division chemistry laboratory class, ENGL 20 or an equivalent second semester composition course and instructor and department chair permission.

Term Typically Offered: Fall, Spring

The student will conduct an independent study of a chemical research topic that is based on experimental techniques or advanced computer modeling. Significant use of chemical literature and information retrieval is required. A well-written, comprehensive, and well-documented final report must be submitted to receive a final grade. A weekly seminar is required. Seminar one hour, laboratory activities are a minimum of six hours per week.

CHEM 198H. Chemistry Honors Thesis. 3 Units

Prerequisite(s): Open only to students who meet the Chemistry Honors Program criteria; CHEM 198 may be taken concurrently.

Term Typically Offered: Spring only

Completion of an undergraduate honors thesis and attendance at chemistry seminars. Students will develop a written thesis containing background, methodology, results, and discussion of an experimental or computational research project involving their own original data.

CHEM 200. Research Methods in Chemistry. 3 Units

Prerequisite(s): Must be a Chemistry graduate student or have instructor permission

Term Typically Offered: Fall, Spring

This course is designed to improve the ability of graduate students to research and interpret the chemical literature. Students work through a series of exercises in preparation for a major writing project such as a thesis proposal or a thesis chapter/section. Exercises include analysis of primary research articles, peer review of student writing samples, and presentation of scientific information. These activities will improve students' understanding of how scientific questions are developed and posed through proposals and dissemination of research results.

CHEM 220. Spectrometric Identification of Compounds. 3 Units

Term Typically Offered: Fall, Spring

Interpretation of ultraviolet, infrared, nuclear magnetic resonance, and the mass spectra for the elucidation of chemical structures, with emphasis on problem solving.

- CHEM 226. Physical Organic Chemistry. 3 Units**
Prerequisite(s): Enrollment in Chemistry master's degree program or instructor permission
Term Typically Offered: Fall, Spring
- Study of mechanistic organic chemistry, the physical tools used to study reaction mechanisms, and the relationship between structure and reactivity. Topics include bonding theories, stereoelectronic effects, transition state theory, thermodynamics, kinetic analysis, isotope effects, linear free energy relationships, and application of frontier molecular orbital theory to examine reactions including pericyclic reactions.
Note: Students who have taken CHEM 126 at Sacramento State cannot take CHEM 226 for credit.
- CHEM 230. Separation Methods in Chemistry. 3 Units**
Term Typically Offered: Fall, Spring
- Theoretical and practical aspects of separation sciences. Methods of separations that are included are liquid-liquid extraction and ion exchange, gas, and liquid chromatography. Lecture three hours.
- CHEM 245. Applications of Computational Chemistry. 3 Units**
Prerequisite(s): CHEM 140A and CHEM 140B or CHEM 142, or instructor permission.
Term Typically Offered: Fall, Spring
- Brief introduction/background in computational theory, with emphasis on chemical/biochemical applications. Demonstration/instruction of widely used modeling/instruction of software. Covering techniques including molecular mechanics, semi-empirical methods and "ab initio" methods. Application of computational methods to thermodynamics, kinetics, spectra, electrochemistry, molecular properties. Lecture three hours.
Note: CHEM 245 students will complete an additional research project beyond that expected of students in CHEM 145. Cross-listed: CHEM 145.
- CHEM 250. Selected Topics in Chemistry. 3 Units**
Prerequisite(s): Enrollment in MS Chemistry graduate program or instructor permission.
Term Typically Offered: Fall, Spring
- Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.
Note: May be team-taught. May be repeated once for credit if topics are different.
- CHEM 251. Topics in Interdisciplinary Chemistry. 3 Units**
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
- Lecture course focusing on interdisciplinary topics in chemistry and related fields. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.
- CHEM 252. Topics in Synthetic Chemistry. 3 Units**
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
- Lecture course focusing on synthetic chemistry. Focus may be on biochemical, inorganic, or organic synthetic chemistry. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.
- CHEM 253. Topics in Applied Chemistry. 3 Units**
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
- Lecture course focusing on applications of chemistry to a variety of fields. Areas of focus may include biological, environmental, materials, and pharmaceutical applications. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.
- CHEM 254. Topics in Physical Chemistry. 3 Units**
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
- Lecture course focusing on topics in physical chemistry. Areas of focus may include content areas such as quantum mechanics, physical/organic or biophysical chemistry, an/or in-depth treatment of structure analysis and determination. Course activities may include literature review, individual and/or group oral presentations, independent research project. May be team-taught.
- CHEM 255. Topics in Chemistry Education. 3 Units**
Prerequisite(s): enrollment in Chemistry master's degree program or permission of instructor.
Term Typically Offered: Fall, Spring
- Intensive coverage of one or more advanced topics in chemistry. A variety of learning/teaching methodologies may be employed, including lecture, team projects, computer modeling, oral presentations and poster projects. May be team-taught.
- CHEM 260. Protein Biochemistry. 3 Units**
Prerequisite(s): One semester of biochemistry.
Term Typically Offered: Fall, Spring
- Provides a comprehensive review of proteins, with emphasis on protein structure and structure/function relationships. Topics include methods for structure determination, stability and folding, catalysis and denovo protein design. Topical examples from the literature, particularly those related to disease states, are used to illustrate fundamental principles of protein structure and function.
- CHEM 261. Nucleic Acid Chemistry. 3 Units**
Prerequisite(s): Undergraduate course in biochemistry.
Term Typically Offered: Fall, Spring
- The recent biochemical literature will be used to study the structural, chemical, and physical properties of nucleic acids. Chemical mechanisms of mutation, protein-nucleic acid interactions, and DNA-drug interactions will be used to illustrate these properties.

- CHEM 294. Seminar In Chemistry.** **0.5 Units**
Term Typically Offered: Fall, Spring
- Student presentations of topics from the chemical literature and their thesis research.
Note: Grade of C/NC will be based on attendance and successful presentation of a seminar. May be repeated for a total of 2 units
- Credit/No Credit
- CHEM 296. Experimental Offerings in Chemistry.** **1 Unit**
Prerequisite(s): Instructor approval.
Term Typically Offered: Fall, Spring
- Presentation and discussion of graduate student and faculty research and current literature with emphasis on critical evaluation of research design, data analysis and presentation techniques. One hour discussion.
Note: May be taken up to four times for credit, but only one unit may be applied to the University's requirement for 200-level courses.
- Credit/No Credit
- CHEM 299. Special Problems.** **1 - 6 Units**
Term Typically Offered: Fall, Spring
- Graduate research. Approval must be obtained from a departmental committee and the faculty member under whom the work is to be conducted. Written report must be submitted before a final grade is given.
- Credit/No Credit
- CHEM 500. Culminating Experience.** **2 - 4 Units**
Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis committee.
Term Typically Offered: Fall, Spring
- Completion of a thesis or project approved for the Master's degree. Should be taken in final semester prior to the completion of all requirements for the degree. Number of units of credit is determined by the candidate's master's degree advisory committee.
- ## Child Development (CHDV)
- CHDV 23. Assessment and Observation in Child Development.** **3 Units**
Prerequisite(s): CHDV 30, or CHDV 35, or equivalent
- Purposes of and methodological issues involved in assessing and observing early child development and learning in educational and developmental settings. Topics include selection of appropriate observation methods, survey of standardized measures, ethics, and interpretation and implications of assessment data for teaching and learning. Focus will be on becoming objective and unbiased observers, use of both informal and formal assessment tools, and principles of observational assessment research. Students will be required to complete up to 10 hours of observation outside of class. APA style will be introduced to support the development of practical and scholarly communication and writing.
- CHDV 30. Human Development.** **3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Interdisciplinary study of human development with practical observations. Addresses physical, socio-cultural, intellectual and emotional aspects of growth and development from conception to death. A variety of field experiences will be required.
- CHDV 31. Adult Supervision and Mentoring In Early Childhood Programs.** **2 Units**
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Spring only
- Study of research and exemplary practices in the supervision of early childhood teachers, other program staff, parents and volunteers. Content emphasizes adult learning.
- CHDV 32. Administration and Supervision of Early Childhood Programs.** **3 Units**
Prerequisite(s): CHDV 30 or CHDV 35 or equivalent.
Term Typically Offered: Fall only
- Basic issues, procedures and practices in the administration and supervision of public and private schools. Requires administrative supervisory fieldwork in an early childhood program.
- CHDV 35. Child and Adolescent Development.** **3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Examination of theory and research on cognitive, social and physical human development from conception through adolescence. Content will include data-collection techniques such as observation. Some course material will be applied to an analysis of elementary schooling.
- CHDV 35F. Human Development and Elementary Field Experience.** **2 Units**
Corequisite(s): Completion of or enrollment in CHDV 35.
Term Typically Offered: Fall, Spring
- Directed field experiences in elementary school settings. Students are required to work at an elementary school and attend an on campus seminar. Includes the integration of student field experiences with theory and research in Human Development. Issues in learning, social development, adult career selection and schooling will be explored.
- Credit/No Credit
- CHDV 44. Community Service Learning in Developmental and Educational Settings.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
- Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.
Note: May be taken up to four times for credit (maximum 12 units of credit).
- Credit/No Credit

CHDV 123. Qualitative Methods in Human Development. 3 Units**Prerequisite(s):** CHDV 30, or CHDV 35, or equivalent**Term Typically Offered:** Fall, Spring

Introduction to qualitative research methods and their philosophical underpinnings. The focus will be on theoretical, methodological, and ethical issues in studying human learning and developmental processes from interpretive and social constructivist perspectives. Attention given to methodological strategies used to document and analyze learning and development in context. Strategies include participant-observation field notes, interviews, audio/video recordings, documents, and artifacts, with implications for theory, policy, and practice. APA style will be introduced to support the development of scholarly communication and writing.

Note: For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.**CHDV 128. Combined Research Methods in Human Development. 3 Units****Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent.**Term Typically Offered:** Fall, Spring, Summer

Introduction to qualitative and quantitative research methods and their philosophical underpinnings. Consider theoretical, methodological, and ethical issues in studying learning and developmental processes from interpretive and social constructivist perspectives. Think critically about the generation of research questions and hypotheses and design and conduct of research inquiry, with implications for theory, policy, and practice. Students learn to locate, understand, critique, conduct, and report research findings from multiple approaches and be introduced to APA style writing as a tool for scholarly communication.

CHDV 130. Parent Education. 3 Units**Term Typically Offered:** Fall, Spring

Ways parent education may be conducted in Child Development programs to meet legislated requirements as well as parent needs. Attention will be given to parent education programs which serve children of different ages, diverse language and cultural backgrounds, and children with special needs. The rights and responsibilities of children, parents and teachers will be discussed. Discussion and participation in such classroom activities as panels, presentations, demonstrations and cooperative learning assignments.

CHDV 131. Language Development. 3 Units**Prerequisite(s):** CHDV 133. CHDV 133 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Investigation of the development of language and its relationship to school learning, cognitive development and social development. Both linguistic and communication competence are included. Specific attention to second language acquisition and principles underlying effective instruction in linguistically diverse children.

Note: Topic areas will vary by semester, and the course may be repeated.**CHDV 132. Fieldwork in Child Development. 3 Units****Prerequisite(s):** CHDV 123**Term Typically Offered:** Fall, Spring

Directed field experiences in settings selected to meet students' experience and needs. Students are required to work at the selected setting and attend an on-campus seminar to explore developmental content and issues. Discussion will also focus on attention to professional development and ethics in community and educational settings working with children and families.

Note: May be taken as a core requirement and repeated as an elective.**CHDV 133. Quantitative Methods in Human Development. 3 Units****Prerequisite(s):** CHDV 30, or CHDV 35, or equivalent**Term Typically Offered:** Fall, Spring

Introduction to quantitative research methods in human development and their philosophical underpinnings. Major topics include the structures, design and conduct of research inquiry, and the generation of research questions and hypotheses, and collection of data. Emphasis will also be on engaging in quantitative research as well as increasing students' ability to locate, understand, critique, and report research findings. Students will be challenged to think critically about methodological issues in quantitative research. AP A style will be introduced to support the development of scholarly communication and writing.

Note: For CHDV majors, must be taken prior to completion of 90 units; completion of 45 total units credit.**CHDV 134. Development of Young Children as Mathematical and Scientific Thinkers. 3 Units****Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent.**Term Typically Offered:** Summer only

Theory, research, and practice in development of the child's thinking about mathematical and scientific concepts. Topics will include: (a) early emergence of conceptual reasoning connected with mathematics and science, (b) symbolic development and language of mathematics and science, (c) developmental sequences in mathematical and scientific thinking, (d) California Preschool Learning Foundations; (e) age-appropriate and culturally-relevant experiences to promote mathematic and scientific reasoning. Activities include lecture, discussions, presentations, cooperative learning assignments, and integration of course content with early childhood classroom practice.

CHDV 135. Crosscultural Child Development. 3 Units**Prerequisite(s):** CHDV 133. CHDV 133 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Examination of the physical, socio-emotional and cognitive development in children from a crosscultural orientation. Will investigate cultural variables that influence child development from both inter- and intranational perspectives. Discussion of culturally universal and culturally specific behaviors, cognitions and experiences will be covered.

CHDV 136. Developmental Experiences, Methods and Curriculum. 3 Units**Prerequisite(s):** CHDV 123. CHDV 123 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Examination of theory, research, and exemplary practices and programs for children through elementary school. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 137. Cognitive Development. 3 Units**Prerequisite(s):** CHDV 133.**Corequisite(s):** CHDV 137L.**Term Typically Offered:** Fall, Spring

Cognitive development of children from conception through adolescence with consideration of biological and environmental influences.

Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.

Note: Student must co-enroll in the corresponding section of CHDV 137L.

CHDV 137L. Cognitive Development Research Laboratory. 1 Unit**Prerequisite(s):** CHDV 133.**Corequisite(s):** CHDV 137.**Term Typically Offered:** Fall, Spring

Laboratory course to complement CHDV 137. Emphasis placed on the observation, interaction, documentation, and using a scientific approach to learn about cognitive development. Classroom, field, and research experiences supporting the study of cognitive development.

Note: Student must co-enroll in the corresponding section of CHDV 137.

CHDV 138. Social and Emotional Development. 3 Units**Prerequisite(s):** CHDV 133.**Corequisite(s):** CHDV 138L.**Term Typically Offered:** Fall, Spring

Study of the social and emotional development of children from conception through adolescence with consideration of biological and environmental influences. Lectures, discussions and participation in such classroom activities as presentations, demonstrations and cooperative learning assignments.

Note: Student must co-enroll in the corresponding section of CHDV 138L.

CHDV 138L. Social and Emotional Development Laboratory. 1 Unit**Prerequisite(s):** CHDV 133.**Corequisite(s):** CHDV 138.**Term Typically Offered:** Fall, Spring

Laboratory course to complement CHDV 138. Emphasis placed on the nature of observation, interaction, and using a scientific approach to learn about social and emotional development. Classroom and field experiences related to the study of social and emotional development.

Note: Student must co-enroll in the corresponding section of CHDV 138.

CHDV 139. Educational Play: Theory and Practice. 3 Units**Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent**Term Typically Offered:** Summer only

Use of play as an educational vehicle in early childhood. Discovering how play helps children develop physically, socially, emotionally, cognitively and creatively through a variety of playful modes. Constructing appropriate developmental play materials and activities with emphasis on the active role of the adult in child's play. Activities include discussions, presentations, demonstrations and cooperative learning assignments.

CHDV 140. Coordination of Early Childhood Programs. 3 Units**Prerequisite(s):** CHDV 30 or CHDV 35 or equivalent**Term Typically Offered:** Fall, Spring

Advanced methodology of coordinating early childhood programs, to include organization, staff development and community relations. Includes the functions of parents, aides, volunteers and varied early childhood organizational patterns.

CHDV 141. History of Childhood: International and Interdisciplinary Perspectives. 3 Units**General Education Area/Graduation Requirement:** Humanities (Area C2)**Term Typically Offered:** Fall, Spring

Examination of what it means to be a child in today's world by comparing social constructions of childhood across the broad historical periods and in contrasting parts of the world. Exploration of cultural beliefs, values and practices of childhood in different historical, social, and economic contexts. Comparative approach provides a critical framework from which to analyze scholarly inquiry about how children develop in families, schools, and broader society. Course content will interest students from a broad array of majors.

CHDV 143. Mind and Brain in Developmental Context. 3 Units**Prerequisite(s):** CHDV 30 or 35; Introductory Biology.**General Education Area/Graduation Requirement:** Upper Division Further Studies in Area B5**Term Typically Offered:** Fall, Spring, Summer

Investigation of the biological processes underlying child development, from conception through adolescence. Emphasis will be on the genetic, neurological, and endocrine processes related to cognition, social, and emotional development. Students will explore the bidirectional nature of psychobiological processes, with specific emphasis on the psychobiological mechanisms underlying the transaction between cultural, educational, and social-emotional related to educational, and mental and physical health functioning.

CHDV 144. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units**Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 145. Controversial Issues in Childhood Development, Education, and Social Policy. 3 Units

Prerequisite(s): GWAAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI), GE AREA D, Race & Ethnicity Graduation Requirement (RE)

Term Typically Offered: Fall, Spring

Discussion-based examination of controversial issues linking development, education, and cultural practice in which scholarly inquiry has substantial implications for social policy. Specific topics vary by semester and include topics of both historical relevance and contemporary debates. Content relevant to multiple disciplines including issues such as adolescent risk behavior, bilingual education, brain-base pedagogy, child care, children and the law, cultural diversity, developmental theory and educational practice, gender, literacy practices, motivation, parenting styles, school violence, special education, standardized testing, and technological change.

CHDV 150A. Early Literacy Development in First and Second Language. 2 Units

Prerequisite(s): CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.

Corequisite(s): CHDV 150B.

Term Typically Offered: Summer only

Students will become familiar with language and emergent literacy of young children from birth to eight. An overview of research-based developmental progression will be emphasized as it relates to the learning foundations for language and literacy. Other focal points will be home-school connections and cultural influences on literary development. Assessment topics, including observation and other developmental strategies will be intergrated. An emphasis on increasing students' ability to connect theoretical understanding to the practice offered in CHDV 150B.

CHDV 150B. Early Literacy Development in First and Second Language Practicum. 1 Unit

Prerequisite(s): CHDV 123 or CHDV 133. CHDV 123 or CHDV 133 may be taken concurrently.

Corequisite(s): CHDV 150B.

Term Typically Offered: Summer only

The practicum experience (20 hours) will provide students with the application of course content material learned in CHDV 150A. Students will observe and validate multiple experiences in which first and second language learners learn language and literacy successfully. Factors affecting language and literacy development will be addressed. Credit/No Credit

CHDV 153. Apprenticeship in Advanced Child Development. 3 Units

Prerequisite(s): Instructor permission

Term Typically Offered: Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.

Prerequisite: Instructor permission.

Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to four times for 12 units of credit, with a limit of 6 units applied towards the CHDV major requirements.

CHDV 154. Issues in Parenting. 3 Units

Prerequisite(s): CHDV 30 or CHDV 35 or FACS 52.

Term Typically Offered: Fall, Spring, Summer

Survey of historical and contemporary attitudes toward parenting. Review of research on child-rearing and parent-child relationships. Use of case studies to explore the influence of personality, developmental stage, family structure, ethnic and cultural factors on parenting. Lecture, Case Study.

Cross-listed: FACS 154; only one may be counted for credit.

CHDV 157. Infant and Toddler: Development and Care. 3 Units

Prerequisite(s): One of the following: CHDV 30 or CHDV 35, FACS 50, PSYC 148, or SWRK 125A.

Term Typically Offered: Fall, Spring

Research theory and practice are examined in relation to each area of infant and toddler development (conception through 24 months): Physical, social, emotional, cognitive, and perceptual. Individual differences and needs are stressed. Issues pertinent to individual and group care will be covered. Activities include lecture, discussion, and observations.

Cross Listed: FACS 157; only one may be counted for credit.

CHDV 163. ASL Literature. 3 Units

Prerequisite(s): DEAF 154

Term Typically Offered: Fall, Spring

Students will learn several different forms of ASL literature. Aspects of both form and content will be analyzed as well as their role in the preservation and circulation of Deaf cultural forms. Students will also learn to perform narratives and/or poems in ASL. They will understand the effects of genre, style, perspective, and other artistic techniques on ASL signed art performances, and utilize similar techniques in their developed performances. Students may perform their stories for a general audience. Field trip.

Note: Course taught in ASL with No Voice.

Field trip(s) may be required.

CHDV 194. Cooperative Education Experience. 3 Units

Prerequisite(s): Completion of 60 units total credit and instructor permission. May be taken four times for a maximum of 12 units credit.

Term Typically Offered: Fall, Spring

Cooperative Education (Co-op) relates academic theory to professional practice by providing paid work experience in the student's major field of study and academic credit. Students receive supervised employment in school districts, state and community agencies, companies and other appropriate settings. Requires regular meetings with faculty supervisor, completion of field study assignment, evaluation by field-based supervisor, and a written final report.

Credit/No Credit

CHDV 196A. Approaches to Research Methods in Child Development A. 3 Units

Prerequisite(s): CHDV 30 or CHDV 35 or equivalent; completion of 45 total units; Must be taken prior to completion of 90 units.

Term Typically Offered: Fall, Spring

This course examines methodological issues involved in assessment, observation, analysis, and design in the field of child development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills of scientific inquiry.

Note: First course in a series. 196B must be taken in the semester immediately following completion of CHDV 196A.

CHDV 196B. Approaches to Research Methods in Child Development B. 3 Units

Prerequisite(s): CHDV 196A.

Term Typically Offered: Fall, Spring

Two semester sequence of instruction that examines methodological issues involved in assessment, observation, research design, and analytical concepts involved in the field of child and adolescent development. Topics include the research process, APA style writing, ethics, design and methods, use assessment tools, qualitative and quantitative data analysis and interpretation. The focus will be on becoming critical consumers of research and developing the skills for scientific inquiry.

Note: Must be taken prior to 90 units.

CHDV 199. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects designed especially for students capable of independent study. Admission by written approval of the instructor and Department Chair.

Credit/No Credit

CHDV 200. Proseminar in Child Development. 3 Units

Prerequisite(s): Admission to MA Child Development program or instructor permission.

Term Typically Offered: Fall only

Orientation to advanced scholarship in human development with a focus on understanding and evaluating current directions in developmental research. Developmental research methods and analytical strategies will be explored.

CHDV 210. Seminar in Social Development. 3 Units

Term Typically Offered: Fall, Spring

Advanced seminar focusing on theoretical and empirical readings covering topics in social/emotional development. Potential topics may include social and emotional development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 211. Seminar in Cognitive Development. 3 Units

Prerequisite(s): Admission to MA program or instructor permission.

Term Typically Offered: Fall, Spring

Advanced developmental seminar focusing on theoretical and empirical readings covering topics in cognitive development. Specific topics will be related to cognitive development of children from conception through adolescence with consideration of biological and environmental influences.

CHDV 242. Theoretical Approaches to Child Development. 3 Units

Prerequisite(s): Graduate standing or instructor permission.

Term Typically Offered: Fall, Spring

An in-depth examination of physical, cognitive, and social development from infancy through adolescence. Content includes current developmental theory and research and the application of this research to educational and community settings, with special emphasis on the cultural context of development. The development of critical thinking skills and scholarly writing will be emphasized.

Note: Graduate Writing Intensive course

CHDV 244. Community Service Learning in Developmental and Educational Settings. 1 - 3 Units

Term Typically Offered: Fall, Spring

Designed to provide a range of service learning experiences where students apply their academic knowledge and skills in community-based settings. The community-based experiences will be combined with classroom activities designed to develop student understanding of topics related to their service activities such as tutoring reading and math, mentoring students from disadvantaged backgrounds, working with special populations of children.

Note: May be taken up to four times for credit (maximum 12 units of credit).

Credit/No Credit

CHDV 245. Selected Topics in Developmental Theory. 3 - 6 Units

Prerequisite(s): Admission to MA program or instructor permission.

Term Typically Offered: Fall, Spring

In-depth study of selected topics in cognitive and socio-emotional development of preschool and primary grade children as related to educational practice. Content includes theory and research on psychological dimensions of children as they participate in various contextual settings.

Note: May be repeated twice as long as topic differs. Three units may be used toward the elective requirements in the Master of Arts in Child Development.

CHDV 246. Motivation and Learning in Children. 3 Units

Prerequisite(s): Graduate standing, or instructor permission.

Term Typically Offered: Fall, Spring

Sources of and developmental changes in motivation, including biological predispositions, critical life events, individual differences, and social, cultural and educational experiences will be examined. Students will participate in a group research effort on motivation and educational practice.

CHDV 247. Theoretical and Applied Perspectives on Cross-cultural Development. 3 Units

Prerequisite(s): CHDV 200 or instructor permission. CHDV 200 may be taken concurrently.

Term Typically Offered: Fall, Spring

The cultural basis of human development through an in-depth examination of the socio-emotional, cognitive, language and gender development of children from infancy through adolescence within and across different cultures and communities. Theory, methods, and research of cross-cultural investigations will be considered and applications of course material to educational and community settings will be explored and analyzed.

CHDV 248. Curriculum and Instruction. 3 Units

Prerequisite(s): Graduate standing or instructor permission.

Term Typically Offered: Fall, Spring

Advanced study of the sociocultural influences on curriculum development. Research, theory, and curricular practices will be analyzed, evaluated and applied to a variety of preschool and primary grade settings.

CHDV 249. Language Processes in Development. 3 Units

Prerequisite(s): Admission to MA program or instructor permission.

Term Typically Offered: Fall, Spring

Language is an important cognitive and communicative tool that promotes learning. Through an integrative approach to language and cognitive development, students will examine how children learn through language. Students will have practical experience in collecting and analyzing children's language learning in educational settings.

CHDV 250. Quantitative Research Methods. 3 Units

Prerequisite(s): CHDV 133; admission to the MA program or instructor permission.

Term Typically Offered: Fall, Spring

Critical analysis of quantitative research methods used in the study of development. Core issues in studying development will be discussed as they relate to families and societal issues. Major topics include the philosophical underpinnings of research design, various research methods of inquiry, ethical issues, and the development of research questions and data collection. Critical thinking and writing skills will be emphasized.

CHDV 253. Apprenticeship in Advanced Child Development. 3 Units

Prerequisite(s): Instructor permission.

Term Typically Offered: Fall, Spring

Faculty mentors will meet with graduate and undergraduate apprentices individually or in small groups for guided discussions of assigned readings and/or research data analysis/collection endeavors.

Note: Readings will depend on the specific mentor's research or scholarly interest; May be repeated up to 4 times for credit.

CHDV 290. Seminar for Culminating Experience. 3 Units

Prerequisite(s): Advancement to candidacy; completion of at least 20 units of course work towards the MA, instructor permission.

Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations to be included in the culminating experience: defining and narrowing a topic for study; abstract writing; differentiation of primary/secondary source of evidence; development of organizational schemes for a literature review; database literature searches; APA format requirements; time management, range and breadth of evidence for a comprehensive review; connecting the review and project/thesis; writing style and quality; revisions and critical feedback; social/psychological dimensions of thesis/project process; data analysis and statistics help on campus for thesis.
Credit/No Credit

CHDV 292. Culminating Seminar for Exam Option. 3 Units

Prerequisite(s): Completion of all foundation course requirements for MA program (CHDV 200A, CHDV 200B, CHDV 242, CHDV 247, CHDV 250) advancement to candidacy, or instructor permission.

Term Typically Offered: Fall, Spring

Seminar to focus on topics/elements/expectations for the exam option culminating experience: test preparation and tips, exam writing, practice exam questions, time management, and community building with other students. Students will complete reading and writing assignments related to each exam area and prepare for an exam question related to an approved elective topic of their choice. Students will submit an exam petition to be reviewed and approved by the departmental exam committee.

Credit/No Credit

CHDV 295. Practicum in Child Development. 1 - 3 Units

Prerequisite(s): Graduate standing, or instructor permission.

Term Typically Offered: Fall, Spring

Directed field based experience in preschool, elementary or other community based settings serving children from infancy through adolescence and their families. Designed to provide students the opportunity to develop professional skills and understandings in applied settings or explore career development opportunities with particular emphasis on leadership or administrative skills and knowledge.

Note: Students are required to work at an instructor-approved field site consistent with their career goals and interests and attend an on campus seminar.

CHDV 299. Special Problems. 1 - 3 Units

Prerequisite(s): Open only to upper division and graduate students with consent of faculty advisor and Department Chair.

Term Typically Offered: Fall, Spring

Individual projects at graduate level designed especially for students capable of independent study. Departmental petition, signed by instructor with whom student will be working and department chair, required.
Credit/No Credit

CHDV 504. Culminating Experience in Child Development: Thesis or Project. 3 Units

Prerequisite(s): Admission to MA, Child Development program or instructor permission.

Term Typically Offered: Fall, Spring

Guidance toward completion of thesis or project option for the MA, Child Development program. Credit is given upon successful completion of a thesis, project, or other approved culminating experience. Open only to the graduate student who has been advanced to candidacy for the Master's degree and has secured the permission of his/her faculty advisor and the Department Chair one full semester prior to registration.

CHDV 505. Culminating Experience in Child Development: Exam Option. 3 Units

Prerequisite(s): Admission to and completion of all course requirements for the MA, Child Development program, CHDV 292 or instructor permission.

Term Typically Offered: Fall, Spring

Guidance in ongoing preparation for the examination option for the MA, Child Development program. Credit is given upon successful completion of the examination option for the culminating experience. Open only to the graduate student who has completed all other course requirements, has been advanced to candidacy for the Master's degree, and has secured the permission of the Department Chair one full semester prior to registration.

Credit/No Credit

Chinese (CHIN)

CHIN 1A. Elementary Mandarin. 5 Units

Term Typically Offered: Fall only

Beginning Mandarin with emphasis on listening comprehension, speaking, grammar structure and character writing. The relationship between language and culture will also be emphasized. Includes an introduction to elements of Chinese culture that pertain to language, such as mode of thinking, inter-human relations, and aesthetic expressions.

CHIN 1B. Elementary Mandarin. 5 Units

Prerequisite(s): CHIN 1A or instructor permission.

General Education Area/Graduation Requirement: Humanities (Area C2), Foreign Language Graduation Requirement

Term Typically Offered: Spring only

Continuation of CHIN 1A, with growing emphasis on reading, writing, and listening. Chinese cultural patterns as reflected in the language, such as societal values and views of the world, will continue to be emphasized.

CHIN 2A. Intermediate Mandarin. 4 Units

Prerequisite(s): CHIN 1B or instructor permission.

General Education Area/Graduation Requirement: Foreign Language Graduation Requirement

Term Typically Offered: Fall only

Intermediate Mandarin on the further development of reading, speaking, and writing skills. Emphasis will be placed on the shift from romanized script to Chinese characters. Introduction will also be made to simple prose reading. Meets the Foreign Language Graduation Proficiency Requirement.

CHIN 2B. Intermediate Mandarin. 4 Units

Prerequisite(s): CHIN 2A or instructor permission.

General Education Area/Graduation Requirement: Foreign Language Graduation Requirement

Term Typically Offered: Spring only

Continuation of CHIN 2A designed to further the development of reading, speaking and writing skills at the intermediate to intermediate-high level.

CHIN 110. Advanced Mandarin: Modern Chinese Fiction. 3 Units

Prerequisite(s): CHIN 2B or instructor permission.

Term Typically Offered: Fall, Spring

Taught exclusively in Mandarin as an introduction to Modern Chinese Fiction through a careful study of representative works from both the People's Republic of China and Taiwan.

CHIN 120. Chinese Civilization. 3 Units

General Education Area/Graduation Requirement: Humanities (Area C2)

Term Typically Offered: Fall, Spring

Presentation of formative cultural achievements of China through language and literature with a view to understanding present-day popular Chinese culture. A general survey conducted in English for students who are taking Chinese language courses and others who want a deeper appreciation of this important non-Western culture.

CHIN 130. Introduction to Classical and Literary Chinese. 3 Units

Prerequisite(s): CHIN 2A or equivalent

The classical Chinese language, also known as literary Chinese, is the doorway into the fascinating world of Chinese culture. It has been the primary form of communication for at least three thousand years. Although Classical Chinese uses many of the same characters as modern Mandarin Chinese, the syntax and diction are quite different. In this course, we will study the language through readings in early philosophical, historical, and poetic texts.

CHIN 150. Survey of Chinese Literature. 3 Units

Prerequisite(s): GVAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.

Term Typically Offered: Spring only

Introduction to Chinese literature from classical times to the present. The various forms of Chinese prose, poetry, and novel will be surveyed through the selective reading of representative works (in English translation). Class is conducted in English.

CHIN 195. Fieldwork-Tutoring. 1 - 3 Units

Prerequisite(s): Advanced level fluency and instructor permission.

Term Typically Offered: Fall, Spring

Tutoring of lower division students in Mandarin or Cantonese. 3 hours of tutoring per week for each unit. May be taken for credit more than once. Credit/No Credit

CHIN 199. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on independent study. Admission requires the approval of the instructor by whom the work is to be supervised. Credit/No Credit

Civil Engineering (CE)

CE 1A. Civil Engineering Seminar.

1 Unit

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Introduces students to civil engineering as a profession. Topics include the technical disciplines (environmental, geotechnical, structural, transportation, and water resources), the role of civil engineers in planning, constructing and operating infrastructure, and professional responsibilities such as licensure and ethics. Case studies are used to explore both technical and nontechnical aspects of civil engineering projects such as design and environmental constraints, constructability, and social and political issues.

CE 4. Engineering Graphics and CAD.

2 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

In-depth graphic analysis and solution of typical three dimensional space problems by applying the principles of orthogonal projection. Fundamentals of interactive computer aided design and drafting. Lecture one hour; laboratory three hours.

CE 9. Plane and Topographic Surveying.

3 Units

Prerequisite(s): MATH 30; MATH 30 may be taken concurrently. Not currently enrolled in CE 9.

Term Typically Offered: Fall, Spring

Instruments, methods and theories necessary for the measurement of distance, direction, angles and elevations. Application of data to traverse computations, estimation of earthwork volumes, transportation facility design and construction layout. Introduction to legal aspects of surveying, geodetic surveys, maps, boundary surveys and new technologies used in surveying. Lecture two hours; laboratory three hours.

CE 100. Engineering Geology.

2 Units

Prerequisite(s): ENGR 112; may be taken concurrently.

Term Typically Offered: Fall, Spring

Soil and rock mechanics and their relations to geological features influencing design, construction and maintenance of engineering projects. Lectures and field problems.

CE 101. Computer Applications in Civil Engineering.

3 Units

Prerequisite(s): ENGR 30 and CE 4; CE 4 may be taken concurrently.

Term Typically Offered: Fall, Spring

Development of programming- and algorithm-based problem-solving skills in civil engineering using modern programming and scripting languages and scientific computing programs. Application to numerical methods, data science, and visualization.

CE 113. Structural Laboratory.

1 Unit

Prerequisite(s): CE 101 and ENGR 112; WPJ score of 70+, or at least a "C-" in ENGL 109M or ENGL 109W.

General Education Area/Graduation Requirement: Further Studies in Area B (B5)

Term Typically Offered: Fall, Spring

Introduction to the principles of structural analysis and design by testing of structural elements. Experimental verification of the assumptions of strength of materials. Introduction to laboratory techniques. Laboratory three hours.

CE 135. Hydraulics Laboratory.

4 Units

Prerequisite(s): CE 101, CE 137, and GWAR; CE 137 may be taken concurrently.

Term Typically Offered: Fall, Spring

Laboratory experiments relating the principles of fluid mechanics to real fluid flow. Laboratory three hours.

CE 137. Water Resources Engineering.

3 Units

Prerequisite(s): CE 1A, CE 101, ENGR 115, and ENGR 132.

Term Typically Offered: Fall, Spring

Hydrologic and hydraulic fundamentals which are common to water resources projects; introduction to reservoirs, dams, pipelines, channels, hydraulic machinery, ground water, water rights, statistical analysis, engineering economy applications, and water resources planning.

CE 138. Hydrology.

3 Units

Prerequisite(s): CE 137.

Term Typically Offered: Fall only

Introduction to hydrologic engineering design. Precipitation analysis, hydrograph and flood routing applications for civil engineering. Groundwater hydrology including quality problems in development of subsurface water resources. Statistical applications in hydrology.

CE 139. Open Channel Hydraulics.

3 Units

Prerequisite(s): CE 137.

Term Typically Offered: Spring only

Civil engineering design problems in open channel flow. Model design, pressure problems, design application of hydraulic analysis in structures, transitions, culverts, weirs and spillways. Channel design including roughness for subcritical and supercritical flow. Analyzes and design problems in steady, uniform, gradually and rapidly varied flow.

CE 146. Civil Engineering Professional Practice.

3 Units

Prerequisite(s): CE 1A and ENGR 30; GWAR; CE 1A may be taken concurrently.

Corequisite(s): CE 1A.

Term Typically Offered: Fall, Spring

Introduction to the legal and business environment of professional engineering practice, including legal responsibilities of professionals, ethics, risk and liability, types and use of contracts, specifications, the construction bid process, and environmental responsibilities. Elements of engineering organizations such as business economics, human resources, and project management.

- CE 147. Transportation Engineering.** **4 Units**
Prerequisite(s): Complete CE 1A, CE 9, CE 101, ENGR 115, GWAR certification before Fall 2009; or WPJ score of 80 or above; or 3-unit placement in ENGL 109M/W; or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.
Term Typically Offered: Fall, Spring
- Introduction to the fundamental topics in Transportation Engineering. Focus on roadway geometric design, layout considerations, pavement materials and design, traffic operations and analysis. Lecture three hours; laboratory three hours.
- CE 148. Transportation Systems.** **3 Units**
Prerequisite(s): CE 147
Term Typically Offered: Spring only
- Transportation systems evaluation and management. Focus on transportation planning methods, including data analysis, estimation of future demand, evaluation of travel demand impacts on existing systems, and transportation system decision-making.
- CE 149. Traffic Analysis and Design.** **3 Units**
Prerequisite(s): CE 147
Term Typically Offered: Spring only
- Introduction to the fundamental principles of traffic operations, traffic data collection methods, intersection control, signal design and analysis techniques. Methods and software for designing and optimizing signalized and unsignalized intersection operation. This course may be paired with CE 265.
- CE 151. Introduction to GIS in Civil Engineering.** **3 Units**
Prerequisite(s): ENGR 115, CE 9, and either CE 137, CE 147, CE 170A, or CE 171A.
Term Typically Offered: Fall only
- Fundamental geographic information system (GIS) concepts; GIS data acquisition and analysis; GIS analytical methods. Lab exercises with GIS software used to introduce students to typical uses of GIS in civil engineering. This course may be paired with the graduate-level course GIS Applications in Civil Engineering. Lecture two hours; lab three hours.
- CE 161. Introduction to Structural Analysis.** **3 Units**
Prerequisite(s): CE 1A, CE 101, ENGR 112, and MATH 35 or MATH 100.
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Analysis of statically determinate and indeterminate beams, frames, and trusses. Includes energy principles, flexibility and stiffness analyses, and influence lines. Computers are used to aid in the solution of complex structural problems.
- CE 163. Structural Design in Steel I.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall only
- Theory and practice in design of structural steel members and connections using current design specifications. Design of tension and compression members, laterally supported and unsupported beams, beam-columns, and bolted and welded connections. Use of microcomputers in design.
- CE 164. Reinforced Concrete Design.** **3 Units**
Prerequisite(s): CE 113, CE 161; CE 113 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Theory and practice in design of reinforced concrete beams, slabs, columns, footings and retaining walls. Includes study of design, preparation and testing of cements, aggregates and concrete mixtures.
- CE 166. Seismic Behavior of Structures.** **3 Units**
Prerequisite(s): CE 101, CE 161, ENGR 110.
Term Typically Offered: Spring only
- Analyzes simple structures' response to dynamic loads with emphasis on response to earthquake ground motion. Introduction to multi-story buildings dynamics. Modal and approximate analyses of earthquake response. Dynamic analysis and building code procedures.
- CE 168. Pre-stressed Concrete Design.** **3 Units**
Prerequisite(s): CE 161, CE 164; CE 164 may be taken concurrently.
Term Typically Offered: Fall only – even years
- Analyzes and design of pre-stressed concrete structures using ultimate strength and working stress methods. Detailed study of stress-strain behavior of P.C. members. Study of bond and shear. An introduction to least-weight design.
- CE 169A. Timber Design.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall only
- Wood as a structural material. Design of sawn and glulam beams, concentrically and eccentrically loaded columns, shear walls, flexible diaphragms and connections for vertical and lateral loading including effects of wind and seismic forces.
- CE 169B. Reinforced Masonry Design.** **3 Units**
Prerequisite(s): CE 161.
Term Typically Offered: Fall, Spring
- Reinforced masonry as a structural material. Design of reinforced masonry beams, concentrically and eccentrically loaded columns, walls for vertical and lateral loading including effects of wind and seismic forces. Design of a small building for wind and seismic loading including torsional effects.
- CE 170. Principles of Environmental Engineering.** **4 Units**
Prerequisite(s): CHEM 1E or CHEM 1A, CE 1A, CE 101, CE 146, ENGR 115; CE 146 may be taken concurrently
Term Typically Offered: Fall, Spring
- Introduction to the principles and practices of environmental quality management. Physical and chemical principles affecting environmental quality. Water and air quality parameters, their importance, and natural processes that affect them. Introduction to treatment processes and waste management. Environmental ethics. Lecture three hours. Laboratory three hours.
- CE 170A. Principles of Environmental Engineering.** **3 Units**
Prerequisite(s): CHEM 1E or CHEM 1A, ENGR 115, CE 1A, and CE 101.
CE 101 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to principles of environmental quality management. Environmental ethics. Physical and chemical principles affecting environmental quality. Water quality parameters, their importance, and natural processes that affect them. Environmental health and risk assessment.

CE 170B. Environmental Engineering Practice.**2 Units****Prerequisite(s):** CE 170A**Term Typically Offered:** Fall, Spring

Introduction to environmental engineering professional practices. Water and wastewater treatment processes. Solid waste management. Air quality parameters and management. Sustainability.

CE 171A. Soil Mechanics.**4 Units**

Prerequisite(s): Complete CE 1A, CE 100, CE 101, ENGR 112; GEAR certification before Fall 2009 or WPJ score of 80 or above or 3-unit placement in ENGL 109M/W or 4-unit placement in ENGL 109M/W + co-enrollment in ENGL 109X; or WPJ score 70/71 + co-enrollment in ENGL 109X.

Term Typically Offered: Fall, Spring

Composition and properties of soils; soil classification; soil compaction; soil-water interaction, including permeability and seepage analyses; soil stresses; soil compressibility, consolidation, and settlement analysis; soil shear strength. Lecture three hours; laboratory three hours.

CE 171B. Soil Mechanics and Foundation Engineering.**3 Units****Prerequisite(s):** CE 171A.**Term Typically Offered:** Spring only

Lateral earth pressures and principles of retaining wall design; slope stability analysis and principles of slope stabilization design; ultimate bearing capacity of soils, allowable bearing pressures and settlement of structures; principles of foundation design including shallow foundations and deep foundations.

CE 172. Design of Urban Water and Sewer Systems.**3 Units****Prerequisite(s):** CE 137.**Term Typically Offered:** Fall only

Hydraulic design of water distribution and sewerage systems. Computer-assisted pipe network analysis. Analysis of pump systems. Pump station design. Other selected topics.

CE 173. Design of Water Quality Control Processes.**3 Units****Prerequisite(s):** CE 170B, ENGR 132.**Term Typically Offered:** Spring only

Analysis and design of selected physical, chemical, and biological facilities for water purification and wastewater treatment. Emphasis is on design based on loading factors and integration of unit processes into treatment systems.

CE 181. Geoenvironmental Engineering.**3 Units**

Prerequisite(s): CE 170B and CE 171A; CE 170B may be taken concurrently

Term Typically Offered: Not offered

Equilibrium distribution of contaminants among air, water and solid phases of soil systems; analysis and modeling of soil vapor extraction (SVE), pump and treat, and soil washing systems; movement of gasses in landfills; infiltration through landfill cover; geosynthetic liner systems; hazardous waste containment systems.

CE 184. Geotechnical Earthquake Engineering.**3 Units****Prerequisite(s):** CE 171A.**Term Typically Offered:** Fall only

Introduction to seismology and seismic hazard analysis; determination of building code design loads; prediction of soil-site effects; evaluation of liquefaction triggering, cyclic softening and associated consequences; introduction to mitigation techniques for liquefaction and ground failure hazards.

CE 190A. Civil Engineering Project Skills.**3 Units**

Prerequisite(s): CE 137 or CE 147 or CE 161 or CE 170A or CE 171A. This course is intended to be taken in the final year of study before taking CE 190B.

General Education Area/Graduation Requirement: GE AREA D**Term Typically Offered:** Fall, Spring

Introduction to professional engineering practice through case studies of existing projects, including estimating, scheduling, and specifications. Evaluation of design alternatives for engineering projects using principles of engineering economy and cost benefit analysis. Engineering ethics and professional responsibilities.

Credit/No Credit

CE 190B. Senior Project.**3 Units****Prerequisite(s):** CE 190A**Term Typically Offered:** Fall, Spring

Culminating degree requirement. Completion of a conceptual design and evaluation of alternatives under realistic constraints for proposed infrastructure projects. Students work in teams with practicing professionals providing mentoring. Draws upon full educational experience to date. Lecture two hours. Laboratory three hours.

Note: This course must be taken in the final semester.**CE 194. Career Development in Civil Engineering.****1 Unit****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Designed for Civil Engineering students making career decisions. Instruction will include effective career planning strategies and techniques including skill assessments, employment search strategy, goal setting, time management, interview techniques and resume writing. Lecture one hour.

Note: Units earned cannot be used to satisfy major requirements. Cross Listed: ENGR 194, EEE194

Credit/No Credit

CE 195. Fieldwork in Civil Engineering.**1 - 3 Units**

Prerequisite(s): Petition approval by supervising faculty member and Department chair.

Term Typically Offered: Fall, Spring

Supervised work experience in civil engineering with public agencies or firms in the industry.

Note: May be repeated for credit.

Credit/No Credit

- CE 195A. Professional Practice.** 1 - 12 Units
Prerequisite(s): Instructor permission.
Term Typically Offered: Fall, Spring
- Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science.
Note: Requires satisfactory completion of the work assignment and a written report.
- Credit/No Credit
- CE 196H. Concrete Technology.** 3 Units
Prerequisite(s): CE 113
Term Typically Offered: Fall, Spring
- History of portland cement, production, hydration, aggregates, supplementary cementitious materials, chemical admixtures, fresh and hardened concrete properties, concrete mixture design, and concrete construction. Introduction to concrete durability, concrete repair, and advances in concrete technology. The laboratory period will be used for demonstrations, experiments, and field trips.
 Field trip(s) may be required.
- CE 196M. Groundwater Engineering.** 3 Units
Prerequisite(s): CE 137
- Principles of groundwater, and occurrence and movement of groundwater. Groundwater flow, Darcy's Law, solutions of steady and unsteady flow problems. Confined and unconfined aquifers, leaky aquifers, pumping test design, and groundwater management.
- CE 199. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading.
Note: Open to students judged capable of carrying out individual work. Admission requires departmental approval and sponsorship of a supervising faculty member. Cannot be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May be repeated.
- CE 199E. Independent Study Technical Elective.** 3 Units
Prerequisite(s): GPA of 2.5 or greater in the upper division courses of the major; grade of "B" or better in the required major course associated with the proposed area of study (CE 137 or CE 146 or CE 147 or CE 161 or CE 170 or CE 171A).
Term Typically Offered: Fall, Spring
- Individual project, research, or directed reading on an advanced topic.
Note: Open to only those students prepared and capable of carrying out independent work. Admission requires departmental approval and sponsorship of a supervising faculty member. Can be used as a technical elective in the major. Consult the CE Department for admission procedures and other requirements. May not be repeated for credit.
- CE 231A. Computer Methods of Structural Analysis I.** 3 Units
Prerequisite(s): CE 161.
Term Typically Offered: Fall only – even years
- Flexibility and stiffness methods of structural analysis are applied to two- and three-dimensional framed structures. Use of computer software to perform analysis is discussed in detail. Techniques of computer modeling are discussed.
- CE 231B. Computer Methods of Structural Analysis II.** 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
- Continuation of CE 231A with extension of theory to allow for the analysis of a wider variety of structures. Structural analysis software is used for the analysis of three-dimensional structures. Fundamentals of the finite element method and computer modeling with applications to structural problems.
- CE 232. Nonlinear Structural Analysis.** 3 Units
Prerequisite(s): CE 231A or instructor permission.
Term Typically Offered: Spring only – odd years
- Theory and applications of nonlinear structural analysis including geometric and material nonlinear effects. Stability issues and second-order analysis methods in the context of moment amplification effects, member buckling, and the behavior of structural elements and frames undergoing large deformations. Inelastic material behavior and stress resultant plasticity concepts within a line-type element framework. Computer implementation of geometric nonlinear behavior.
- CE 234. Dynamics and Earthquake Response of Structures.** 3 Units
Prerequisite(s): Knowledge of the stiffness method of structural analysis.
Term Typically Offered: Fall only – odd years
- Response of structures modeled as single-degree systems to harmonic, periodic, and arbitrary excitation and earthquake ground motion; effects of damping and material nonlinearity; numerical methods using spreadsheets; response spectra. Response of structures modeled as multi-degree systems: modeling of structure mass, damping and elastic stiffness; solution by modal superposition; time-history and response spectrum analysis; implications for codes for earthquake-resistant design. Microcomputer software is extensively used.
- CE 235. Advanced Steel Design.** 3 Units
Prerequisite(s): CE 163
Term Typically Offered: Spring only – even years
- Advanced design methodology of steel structures using Load and Resistance Factor Design (LRFD). System level behavior, especially from a seismic loading perspective, is integrated into the design of steel components and connections. Other topics include plate girder design, plastic design of indeterminate systems, design of moment frame systems, and design of braced-frame systems.
- CE 250. Systems Analysis of Resources Development.** 3 Units
Prerequisite(s): Graduate status or instructor permission.
Term Typically Offered: Spring only – even years
- Investigation of resource planning using the "systems approach". Objectives of resource development; basic economic and technologic concepts, and economic factors affecting system design. Consideration of evaluation, institutional constraints, and uncertainty in water resources systems. Familiarization with modern computer techniques. Applications of concepts to air and land resources.
- CE 251. Water Resources Planning.** 3 Units
Prerequisite(s): CE 250 or instructor permission.
Term Typically Offered: Fall only – odd years
- Application of single and multi-objective planning to the design and operation of water resources projects. Objectives and constraints for water projects, criteria and procedures for evaluation, planning under uncertainty. Application in water development and water quality planning, with case studies.

<p>CE 252A. Environmental Quality Processes I. 3 Units Prerequisite(s): CE 170 or equivalent. Term Typically Offered: Fall, Spring</p>	<p>CE 262. Advanced Transportation Facility Design. 3 Units Prerequisite(s): CE 147 or instructor permission. Term Typically Offered: Fall only – even years</p>
<p>Theory and practice of chemical processes affecting water quality. Chemical equilibrium, stoichiometry and kinetics of aqueous chemistry. Acid-base, precipitation-dissolution, oxidation-reduction, and coordination chemistry. Adsorption.</p>	<p>Advanced study of current topics in highway and mass transportation facility design including safety, curve design, pavement design and drainage facility design. Focuses on current design practice and recent or impending changes in design practice.</p>
<p>CE 252B. Environmental Quality Processes II. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 263. Traffic Flow Theory. 3 Units Prerequisite(s): CE 147 or CE 148; ENGR 203 or instructor permission. Term Typically Offered: Fall only – even years</p>
<p>Theory and practice of biological processes for controlling water. Stoichiometry and kinetics of microbial growth. Aerobic and anaerobic metabolism. Engineered suspended and attached growth systems. Introduction to sludge treatment.</p>	<p>Study of traffic flow characteristics including flow rate, speed, and density, at both the microscopic and macroscopic levels. Traffic flow analysis using the theoretical methods including capacity analysis, traffic stream models, shockwave analysis, and queuing analysis. Emphasis is on theory with demonstration of practical applications.</p>
<p>CE 252C. Environmental Quality Processes III. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 265. Analysis and Control of Traffic Systems. 3 Units Prerequisite(s): CE 147 or CE 148; CE 263 or instructor permission. Term Typically Offered: Fall only – odd years</p>
<p>Theory and practice of physical and chemical processes used in engineered water and wastewater systems. Adsorption, ion exchange, gas transfer, membrane processes, coagulation, flocculation, sedimentation, filtration, precipitation, disinfection, and stripping. Physical/chemical reactors.</p>	<p>Traffic data collection and analysis, practical application of theoretical methods of analysis such as capacity, level of service, and queuing theory. Investigation of traffic control techniques such as actuated signals and signal systems, and study of management techniques for traffic congestion.</p>
<p>CE 254. Water Quality Management. 3 Units Prerequisite(s): CE 170 or equivalent, CE 252A recommended, or instructor permission. Term Typically Offered: Fall, Spring</p>	<p>CE 266. Advanced Design in Reinforced Concrete. 3 Units Prerequisite(s): CE 161, CE 163, CE 164. Term Typically Offered: Spring only – even years</p>
<p>Examination of pollution sources and effects on water bodies, and the management issues and tools used to protect environmental quality. Topics include point and nonpoint pollution sources, interactions in the environment, Federal and State laws, water quality objectives, beneficial uses, and regulatory mechanisms such as basin plans and total maximum daily loads (TMDLs). Emphasis is on surface water.</p>	<p>Advanced topics in behavior and design in reinforced concrete. Detailing for seismic response.</p>
<p>CE 255. Transport of Chemicals in Soil Systems. 3 Units Prerequisite(s): MATH 45. Graduate status. Term Typically Offered: Fall, Spring</p>	<p>CE 267. Structural Systems for Buildings. 3 Units Prerequisite(s): CE 232 or instructor permission. Term Typically Offered: Spring only – even years</p>
<p>Study of the mechanics of movement of chemicals in soil, including equilibrium and partition models, development of mass transport equations in porous media, analytical solution for one-dimensional transport, lumped parameter transport model (linear reservoir model), transport of reactive and conservative chemicals numerical solutions of transport models, transport in the unsaturated zone and coupled models for saturated and unsaturated zone.</p>	<p>Analyzes and design of various structural systems for buildings: frames, tubes, shear walls with or without openings and interaction between these types. Secondary effects such as P^{Δ}, material and geometrical nonlinearities.</p>
<p>CE 261. Transportation Planning. 3 Units Prerequisite(s): CE 148 or instructor permission. Term Typically Offered: Fall only – odd years</p>	<p>CE 268. Pre-stressed Concrete Bridge Design. 3 Units Prerequisite(s): CE 164 or instructor approval. Term Typically Offered: Fall only – even years</p>
<p>Introduction to the complexities of comprehensive intermodal transportation planning. Study of transportation problems, system operating characteristics, alternative modes, and the planning process. Analyzes factors affecting travel behavior and methods of forecasting demand for travel by various modes.</p>	<p>Behavior and design of short and medium-span prestressed concrete bridges using American Association of State Highway and Transportation Officials (AASHTO) Load Resistance Factor Design (LRFD) specifications. Topics include: bridge types, aesthetics; design process; superstructure load types and live load analysis; limit states and load combinations; prestressed concrete materials; flexural analysis and design; shear analysis and design; and introduction to substructure analysis and design, including seismic design criteria. A team project is required.</p>
	<p>CE 269. Pavement Design. 3 Units Prerequisite(s): CE 147 and CE 171A. Term Typically Offered: Spring only – even years</p>
	<p>Fundamental principles of pavement analysis, design, and evaluation. Topics include pavement materials, mechanics, traffic and environmental loadings, pavement performance, design methods, construction and economic evaluation.</p>

- CE 271. Modern Hydrologic Techniques.** **3 Units**
Prerequisite(s): CE 137 or CE 138 and ENGR 203 or instructor permission.
Term Typically Offered: Spring only – even years
- Analyses of hydrologic and meteorologic phenomena by mathematical, statistical, and system methods, linear and non linear, stochastic and parametric hydrology, computer applications in hydrology.
- CE 272. Advanced Engineering Hydraulics.** **3 Units**
Prerequisite(s): CE 137 or equivalent.
Term Typically Offered: Spring only – even years
- Steady uniform and non-uniform open channel flows including gradually, rapid and spatially varied flows; analysis of supercritical flow in transition; basic principles of unsteady flows; long wave theory; Saint-Venant Equations and their solutions including method of characteristics, explicit and implicit finite difference numerical methods.
- CE 274. Hydrologic Modeling.** **3 Units**
Prerequisite(s): CE 272 or equivalent; instructor permission.
Term Typically Offered: Spring only – odd years
- Theories and structure of hydraulic model components; application of HEC-RAS (River Analysis System) and HEC-HMS (Hydrologic Modeling System) computer programs; emphasis on flood routing methods; dam safety analysis methodology including dam break and dam overtopping cases; application of microcomputers in hydraulics computations.
- CE 276. Groundwater Hydrology.** **3 Units**
Prerequisite(s): CE 137 or instructor permission.
Term Typically Offered: Fall only – even years
- Occurrence and movement of groundwater; physical characteristics of aquifers; analysis of steady-state groundwater flow problems by mathematical, digital computer, electrical analog and graphical methods; analysis of unsteady-state problems in confined and unconfined, aquifers; multiple well systems.
- CE 280A. Advanced Soil Mechanics and Foundation Engineering I.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – even years
- Advanced analyses in soil mechanics and their practical applications in foundation engineering; compressibility of soils, settlement analysis, and tolerable settlement; lateral earth pressures and design of earth retaining structures; bearing capacity of shallow foundations; in-situ soil testing for foundation design; design of deep foundations, including driven piles, drilled shaft foundations, and laterally loaded piles.
- CE 280B. Advanced Soil Mechanics and Foundation Engineering II.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall only – odd years
- Advanced analyses in shear strength of cohesionless and cohesive soils, including stress-strain characteristics of soils, total and effective stress analyses; slope stability analyses for natural slopes, fill slopes, earth dams, levees, and methods of slope stabilization; analysis and design of anchored bulkheads, cellular cofferdams, soil nail walls, tieback walls, mechanically stabilized earth walls, and segmental retaining walls.
- CE 280C. Geotechnical Modeling.** **3 Units**
Prerequisite(s): CE 171A
Term Typically Offered: Fall only – even years
- Advanced analysis principles and procedures for calculating monotonic and cyclic soil element response effective stress and pore water pressure distributions, dynamic site response, and soil deformations; application to analysis of complex geotechnical engineering systems such as levees, dams, and wharfs. Laboratory time devoted to numerical analysis software and physical element and small scale tests. Lecture two hours. Laboratory three hours.
- CE 283. Ground Modification Engineering.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Fall, Spring
- Principles of soil stabilization and earth reinforcement; mechanical compaction and treatment of difficult soils, including expansive soils, collapsible soils, oversize materials, and compressible fill; prefabricated vertical drains and preloading; dynamic deep compaction; vibro compaction; vibro-replacement; rammed aggregate pier; compaction grouting; jet grouting; slurry grouting; chemical grouting; deep soil mixing; slurry trench walls.
- CE 284. Soil Dynamics and Earthquake Engineering.** **3 Units**
Prerequisite(s): CE 171A or equivalent.
Term Typically Offered: Spring only – odd years
- Introduction to vibration theory; wave propagation in soils and dynamic behavior of soils and foundations; dynamic tests; analysis of dynamically loaded foundations; causes of earthquakes; earthquake magnitude and zones; ground motions induced by earthquakes; earthquake-resistant design of foundations and earth dams.
- CE 285. Geosynthetics I.** **3 Units**
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall only – even years
- Overview of geotextiles, geogrids and geonets; geosynthetic properties and test methods; geosynthetic functions and mechanisms as in separation, roadway and soil reinforcement, filtration, and drainage; applications and design methods; construction, fabrication and installation.
- CE 286. Geosynthetics II.** **3 Units**
Prerequisite(s): CE 171A or instructor permission.
Term Typically Offered: Fall, Spring
- Overview of geomembranes, geosynthetic clay liners, and geocomposites. Topics include: geosynthetic properties and test methods; geosynthetic functions and mechanisms as in landfill liners, liquid barriers and carriers, erosion control, drainage, and design and construction methods.
- CE 289. Project Management for Civil Engineers.** **3 Units**
Prerequisite(s): Graduate standing or instructor permission.
Term Typically Offered: Spring only
- Theory and practice of project management in civil engineering. Interrelationship of planning, design, and construction. New technologies and techniques used in both US and international architectural/engineering/construction (A/E/C) markets. Topics: Project initiation, early estimates, project budgeting, work plans, design proposals, scheduling, tracking, design coordination, construction, project close-out, team and personal management skills, and quality control.

CE 296D. Stormwater Management.**3 Units****Prerequisite(s):** CE 137 and CE 170**Term Typically Offered:** Fall, Spring

Principles and practices of stormwater management. Physical and chemical principles affecting stormwater quality, environmental effects, and treatment. Regulatory purposes and requirements for managing construction and post-construction runoff. Choosing and designing Best Management Practices. Erosion control. Hydrologic and hydraulic design of small drainage systems. Emphasis on California climatic and regulatory conditions.

CE 296H. GIS Applications in Civil Engineering.**3 Units****Prerequisite(s):** ENGR 115, CE 9 and CE 137 or CE 147 or CE 171A.**Term Typically Offered:** Fall, Spring

Introduction to fundamental concepts of geographic information systems (GIS), methods, and applications in civil engineering. Design and develop GIS-based analytical methods and solutions for civil engineering problems. Lab exercises are used to design and practice GIS applications in civil engineering. This course may be paired with CE 196H.

CE 299. Special Problems.**1 - 3 Units****Term Typically Offered:** Fall, Spring

Special problems in graduate research.

Note: Approval of a petition must be obtained from the faculty supervising the work and the Department Graduate Program Coordinator. Letter grade or Credit/No Credit.

Credit/No Credit

CE 500. Culminating Experience.**3 - 6 Units****Prerequisite(s):** Advanced to candidacy and permission of the faculty advisor and Department Chair.**Term Typically Offered:** Fall, Spring

Successful completion of either: A. Thesis (3-6 units), or B. Project (3-6 units) or C. Directed Study and Examination (3 units). Plan A requires a thesis and is primarily research-orientated. Plan B requires a project report that is primarily application oriented. Plan C requires a detailed literature review or experimental data analysis resulting in a written report plus an examination by three faculty. A public presentation is required for all three plans.

Communication Sciences and Disorders (CSAD)

CSAD 110. Physics of Sound and Phonetics.**4 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 111**Term Typically Offered:** Fall only

Physical production, acoustic characteristics of sounds of speech. International Phonetic Alphabet as applied to speech sounds; practice in phonetic transcription of dialects and deviant speech; applications in speech education, speech and hearing therapy. Introduction to physiological acoustics, psychoacoustics, and acoustic phonetics. Perception of speech including voice, resonance, individual speech segments; instrumentation for acoustic and perceptual analysis of speech.

CSAD 111. Anatomy and Physiology of the Speech Mechanism.**3 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 110**Term Typically Offered:** Fall only

Anatomical, physiological and neurological bases of speech. Covers development, normal structure and function. A general course in human anatomy is recommended as background.

CSAD 112. Language Science and Development.**3 Units****Prerequisite(s):** CHDV 30, DEAF 51, PSYC 2, and STAT 1**Corequisite(s):** CSAD 110 and CSAD 111**Term Typically Offered:** Fall only

Overview and comparison of normal and abnormal child language development from infancy through upper elementary school. Establishes a framework for understanding language disorders including autism and pervasive developmental delay. Includes theories of language acquisition, basic principles of language sampling, systems of language, elements of grammar, and preparation for informal and standardized assessment of language disorders. Introduces students to the impact of variables such as attention deficit disorder, poverty, bilingualism on developing language skills.

CSAD 120. Introduction to Language, Speech and Hearing Problems.**3 Units****Term Typically Offered:** Fall, Spring

Review of normal speech and language development. Overview of language, speech, and hearing development and disorders including multicultural issues. Introduction to professional issues and ethics.

CSAD 123. Voice and Fluency.**3 Units****Prerequisite(s):** CSAD 125, CSAD 126, PSYC 2, STAT 1, CHDV 30, and DEAF 51.**Term Typically Offered:** Fall, Spring

Fluency - Characteristics of stuttering, etiologic theories and their implications for treatment. Management of stuttering and other disorders of rhythm. Voice - Current concepts regarding anatomy and physiology, etiology, assessment and treatment of hyperfunctional and organic disorders.

CSAD 125. Developmental and Acquired Neurogenic Language Disorders Across the Lifespan.**3 Units****Prerequisite(s):** CSAD 112, CHDV 30, PSYC 2, STAT 1, and DEAF 51.**Term Typically Offered:** Spring only

Language disorders and the dynamic, reciprocal relationships between the disability, the client, his/her family, and the environment. Developmental and acquired neurogenic language disorders from infancy through adulthood will be covered including neurophysiology and neuropathology.

CSAD 126. Speech Sound Development and Disorders in Children: Aspects of Articulation and Phonology.**3 Units****Prerequisite(s):** CSAD 110, CHDV 30, PSYC 2, STAT 1, and DEAF 51.**Term Typically Offered:** Spring only

Study of normal articulation and phonological development in children. Discussion of etiologies and specific characteristics of articulatory-phonological disorders. Introductory description of foundational specific assessment and treatment principles. Analyzes case studies.

CSAD 127. Introduction to Medical Speech Pathology. 3 Units

Prerequisite(s): CSAD 123, CSAD 125, CSAD 126, PSYC 2, STAT 1, CHDV 30, and DEAF 51.

Term Typically Offered: Fall, Spring

Current concepts regarding anatomy and physiology, etiology, assessment, and treatment of craniofacial disorders, laryngectomy, tracheostomy and dysphagia.

CSAD 130. Audiology and Hearing Testing. 3 Units

Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110 and CSAD 111

Term Typically Offered: Spring only

Introduction to audiology; anatomy and physiology of the hearing mechanism; pathologies of the ear; basic acoustics of sound and its relation to hearing and speech; school hearing screening; hearing conversation; audiometric interpretation and its relationship to speech language and learning disorders.

CSAD 133. Aural Rehabilitation. 3 Units

Prerequisite(s): CSAD 125, CSAD 126, CSAD 130, PSYC 2, STAT 1, CHDV 30, and DEAF 51.

Term Typically Offered: Fall, Spring

According to Tye-Murray, aural rehabilitation is "intervention aimed at minimizing and alleviating the communication difficulties associated with hearing loss." This course examines communication assessment and remediation approaches for children and adults with both peripheral and central auditory problems.

CSAD 140. SLPA Methods. 3 Units

Prerequisite(s): CSAD 145 and instructor permission.

Corequisite(s): CSAD 140L.

Term Typically Offered: Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 140L. SLPA Practicum, Ethical and Legal Parameters. 3 Units

Prerequisite(s): CSAD 145 and instructor permission.

Corequisite(s): CSAD 140.

Term Typically Offered: Fall, Spring

Taken by students as one of their senior level courses when they wish to pursue a Speech-Language Pathology Assistant (SLPA) licensure. Graduate students who have not had a similar course and wish to obtain this licensure will also need to enroll prior to pursuing the licensure.

CSAD 142. Topics in Autism Spectrum Disorders. 2 Units

Prerequisite(s): CSAD 112, CSAD 125, PSYC 2, STAT 1, CHDV 30, and DEAF 51.

Term Typically Offered: Fall, Spring

Detailed look at characteristics of autism spectrum disorders (including Asperger's Syndrome, PDD-NOS and Autism). Issues related to diagnosis/assessment, early intervention, school-based intervention, functional therapeutic techniques and theories, and current "hot topics" in Autism (Theory of Mind, joint attention, biomedical issues, dietary restrictions, sensory regulation and intervention paradigms) will be a part of this course.

CSAD 143. Communication Disorders in Multicultural Populations. 3 Units

Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 125, and CSAD 126.

Term Typically Offered: Fall, Spring

Identification, evaluation, and treatment of multicultural, multilingual clients with communication disorders. Discussion of normal second language acquisition, bilingual development, and cultural values related to effective service delivery for multicultural clients.

CSAD 145. Supervised Field Observations. 1 Unit

Prerequisite(s): CSAD 110, CSAD 111, CSAD 112, PSYC 2, STAT 1, CHDV 30, and DEAF 51.

Corequisite(s): CSAD 125, CSAD 126, and CSAD 130.

Term Typically Offered: Spring only

Directed observations of speech and hearing testing (screening and diagnostic); therapy and case staffing in schools, service clinics and hospitals.

Credit/No Credit

CSAD 146. Introduction to Clinical Issues and Methods. 3 Units

Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, STAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.

Term Typically Offered: Fall, Spring

Methods and materials used in clinical procedures are introduced. Work with graduate students and clients provides introduction to actual procedures and ethical practices. Introduction to ASHA Code of Ethics and legal issues in professional practice including federal and state laws and regulations, funding sources and scope of practice, survey of professional settings for speech and hearing services, including multidisciplinary settings. Prior to enrolling in CSAD 146, students must fulfill the catalogue requirements listed in the catalogue section "Undergraduate Clinical Assistantship."

CSAD 147. Assessment Procedures. 3 Units

Prerequisite(s): CSAD 125, CSAD 126, CSAD 145, PSYC 2, STAT 1, CHDV 30, and DEAF 51.

Term Typically Offered: Fall, Spring

Current principles, methods and materials used by the speech-language pathologist to assess communication disorders are presented.

Issues related to a model of assessment, informal and formal testing, dynamic assessment, interview techniques, administration, scoring and interpretation of test results, report writing and related issues will be discussed.

CSAD 148. Research in Speech - Language Pathology and Audiology. 3 Units

Prerequisite(s): CHDV 30, DEAF 51, PSYC 2, SAT 1, CSAD 110, CSAD 111, CSAD 112, CSAD 125, CSAD 126, CSAD 130, and CSAD 145.

Term Typically Offered: Fall, Spring

Survey of research strategies and methods in Speech-Language Pathology and Audiology. Statistical procedures and single-subject designs. Emphasis on interpreting research reports in the literature and on developing research projects. Writing research proposals and reports.

- CSAD 199. Special Problems.** **1 - 3 Units**
Term Typically Offered: Fall, Spring
 Individual projects or directed reading. Open only to students competent to carry on individual work.
Note: Departmental petition required.
 Credit/No Credit
- CSAD 217. AAC and Assistive Technologies.** **2 Units**
Term Typically Offered: Spring only
 Biological, acoustic, psychological, development, linguistic, and cultural bases for motor speech disorders, focusing on augmentative and alternative communication an assistive technologies as well as their assessment and treatment techniques.
- CSAD 218. Motor Speech Disorders.** **3 Units**
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall only
 Background pertinent to understanding neurophysiology associated with congenital and acquired dysarthria and dyspraxia. Descriptions and classifications of disorders and their causes, methods of assessment and treatment.
- CSAD 219. Counseling Techniques for Speech Pathologists and Audiologists.** **3 Units**
Term Typically Offered: Fall only
 Development of strategies for counseling and interviewing clients with communication disorders and their families. Development of specific skills such as effective listening, dealing constructively with emotions, working with families, and leading support groups. Students will learn to deal effectively with the affective side of communication disorders to help clients benefit maximally from assessment and treatment.
- CSAD 221. Neurogenic Language Disorders.** **4 Units**
Term Typically Offered: Spring only
 In-depth study of language and cognitive disorders in adult, secondary to cerebrovascular accident, dementia, and/or traumatic brain injury. Assessment and intervention strategies are covered with particular emphasis on functional outcomes.
- CSAD 222. Curriculum in Relation to Language -- Learning Disabilities in School-age Children.** **3 Units**
Prerequisite(s): Instructor permission.
Term Typically Offered: Spring only
 Language acquisition as a continuum from oral language to reading and writing, the role of the speech-language specialist in working with reading disabilities; the interactions among speech-language intervention and curricula areas including mathematics, spelling, handwriting, social studies and language arts; and various service delivery models, including collaborative consultation and learning centers.
- CSAD 223. Advanced Seminar in Child Language Disorders.** **3 Units**
Prerequisite(s): CSAD 125 or equivalent
Term Typically Offered: Fall only
 In-depth study of childhood language disorders emphasizing the use of critical thinking to integrate evidence-based practice into discussion of current assessment and intervention practices for children with primary and secondary language impairment Specific topics include language sampling, early intervention, connecting intervention with Common Core State Standards, and team-based service delivery. Populations addressed include bilingual learners, those with working memory deficits, and autism spectrum disorder. The impact of the digital era and screen exposure on children with language impairment is discussed.
- CSAD 227. Dysphagia and the Medical Setting.** **3 Units**
Prerequisite(s): CSAD 218, CSAD 221, instructor permission.
Term Typically Offered: Fall, Spring
 Swallowing problems from infancy through old age; growth patterns and failures in younger populations; feeding and swallowing problems related to normal aging processes and those associated with neurogenic disorders. Assessment and treatment. Includes theoretical and experiential components. Overview of the role of Speech-Language Pathologist in the hospital setting including learning how to read medical charts, basic insurance information, understanding other disciplines and how they affect the job and career of an SLP in the hospital, and medical terms/abbreviations.
- CSAD 228A. Methods: Speech Disorders I.** **2 Units**
Prerequisite(s): CSAD 125, CSAD 126, CSAD 143, CSAD 145, CSAD 146, CSAD 148 or equivalents; instructor permission.
Corequisite(s): CSAD 229A.
Term Typically Offered: Fall, Spring
 Diagnosis and treatment as applied to the current caseload, including articulation and phonological disorders and characteristics associated with English as a second language (ESL) populations. Methods for both children and adults. Staffings, case studies and presentations, demonstrations and class discussions.
- CSAD 228B. Methods: Speech Disorders II.** **1 Unit**
Prerequisite(s): CSAD 123, CSAD 127 or equivalents; CSAD 228A, instructor permission.
Corequisite(s): CSAD 229B.
Term Typically Offered: Fall, Spring
 Techniques and materials for assessing and treating speech disorders emphasizing fluency and voice. Staffings and discussion of cases in the current caseload.
Note: May be repeated.
- CSAD 228C. Methods: Speech Disorders III.** **1 Unit**
Prerequisite(s): CSAD 218, CSAD 228B; CSAD 221 may be concurrent; instructor permission.
Corequisite(s): CSAD 229C.
Term Typically Offered: Fall, Spring
 Techniques and materials for assessing and treating clients with disordered speech secondary to developmental disabilities and syndromes, degenerative diseases or complex problems associated with English as a second language (ESL). Discussions of cases in the current caseload.
Note: May be repeated.

<p>CSAD 229A. Practice: Speech Disorders I. 2 Units Prerequisite(s): Instructor permission Corequisite(s): CSAD 228A Term Typically Offered: Fall, Spring</p>	<p>CSAD 242C. Methods: Language Disorders III. 1 Unit Prerequisite(s): CSAD 218, CSAD 242B; CSAD 221 may be taken concurrently; instructor permission. Corequisite(s): CSAD 243C. Term Typically Offered: Fall, Spring</p>
<p>Supervised clinical practice emphasizing articulation and phonological disorders, and phonological difficulties associated with English as a second language (ESL). Clients may include both children and adults.</p> <p>CSAD 229B. Practice: Speech Disorders II. 2 Units Prerequisite(s): Instructor permission. Corequisite(s): CSAD 228B. Term Typically Offered: Fall, Spring</p>	<p>Techniques and materials for assessing and treating speech and language disorders emphasizing disorders secondary to cerebral vascular accidents, traumatic brain injury, or other neurological disorders. Discussion of cases in the current caseload. Note: May be repeated.</p>
<p>Supervised clinical practice emphasizing clients whose speech is disrupted by abnormal rhythm and rate (e.g. stuttering and cluttering) or abnormal vocal pitch, loudness, and/or quality.</p> <p>CSAD 229C. Practice: Speech Disorders III. 2 Units Prerequisite(s): Instructor permission Corequisite(s): CSAD 228C Term Typically Offered: Fall, Spring</p>	<p>CSAD 243A. Practice: Language Disorders I. 2 Units Prerequisite(s): Instructor permission Corequisite(s): CSAD 242A Term Typically Offered: Fall, Spring</p>
<p>Supervised clinical practice emphasizing children and adults whose speech is disrupted secondary to developmental disorders and syndromes, degenerative disorders or complex problems.</p>	<p>Supervised clinical practice in language disorders emphasizing children and adults with peripheral hearing loss or central auditory processing disorders (CAPD).</p>
<p>CSAD 241S. Practice: Hearing Screenings. 1 Unit Prerequisite(s): CSAD 130 Term Typically Offered: Fall, Spring</p>	<p>CSAD 243B. Practice: Language Disorders II. 2 Units Prerequisite(s): Instructor permission Corequisite(s): CSAD 242B Term Typically Offered: Fall, Spring</p>
<p>Supervised clinical practice in the administration of hearing screening tests. The student must furnish his/her own transportation. Fifteen to twenty hours for one unit. Credit/No Credit</p>	<p>Supervised clinical practice with children demonstrating language disorders secondary to a myriad of contributing factors including delayed development, neurological problems, and various genetic conditions.</p>
<p>CSAD 242A. Methods: Language Disorders I & Professional Writing-Field of Speech-Language Pathology & Audiology. 2 Units Prerequisite(s): Admission to Graduate Program Corequisite(s): CSAD 243A Term Typically Offered: Fall, Spring</p>	<p>CSAD 243C. Practice: Language Disorders III. 2 Units Prerequisite(s): CSAD 243B; instructor permission Corequisite(s): CSAD 242C Term Typically Offered: Fall, Spring</p>
<p>Methods, materials and procedures in language disorders with emphasis on working with children and adults with peripheral hearing loss or central auditory processing disorders (CAPD). Includes staffing and discussion of cases in the current caseload. Focus on professional writing in the field of Speech-Language Pathology through the development of treatment plan proposals, critical responses, and clinic reports.</p>	<p>Supervised clinical practice emphasizing adult clients whose speech and language are disordered secondary to neurogenically related problems such as cerebrovascular accident, traumatic brain injury, or other neurological disorders.</p>
<p>CSAD 242B. Methods: Language Disorders II. 1 Unit Prerequisite(s): CSAD 223, CSAD 242A; instructor permission. Corequisite(s): CSAD 243B. Term Typically Offered: Fall, Spring</p>	<p>CSAD 244. Methods: Speech -- Language Assessment. 1 Unit Prerequisite(s): CSAD 147 or equivalent; CSAD 228B, CSAD 242B; instructor permission. Corequisite(s): CSAD 245. Term Typically Offered: Fall, Spring</p>
<p>Techniques and materials for assessing and treating children with disordered language secondary to a myriad of contributing factors including delayed development, neurological problems and various genetic conditions. Discussion of cases in the current caseload. Note: May be repeated.</p>	<p>Methods and materials for initial assessment in Speech-Language Pathology.</p> <p>CSAD 245. Practice: Speech -- Language Assessment. 1 Unit Prerequisite(s): Instructor permission Corequisite(s): CSAD 244 Term Typically Offered: Fall, Spring</p>
	<p>Supervised clinical practice in assessment with a variety of communication disorders in children and adults. Experience with interdisciplinary teams.</p>

CSAD 250. Speech/Language Internships Seminar. 2 Units

Prerequisite(s): CSAD 228A, CSAD 228B, CSAD 228C, CSAD 229A, CSAD 229B, CSAD 229C, CSAD 241S, CSAD 242A, CSAD 242B, CSAD 242C, CSAD 243A, CSAD 243B, CSAD 243C, CSAD 244, CSAD 245.
Corequisite(s): CSAD 295I, or CSAD 295M, or CSAD 295P, or CSAD 295S.
Term Typically Offered: Fall, Spring

Assessment, scheduling and conducting language speech and hearing programs in schools. Related issues including scope of practice, managed care, interagency cooperation and transdisciplinary approaches.

CSAD 295I. Internship: Speech-Language and Hearing Services in Schools (SLHS). 4 Units

Prerequisite(s): All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST.
Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in the school setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
 Credit/No Credit

CSAD 295M. Internship: Speech-Language Pathology in a Medical Setting. 4 Units

Prerequisite(s): All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST.
Corequisite(s): CSAD 250. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
 Credit/No Credit

CSAD 295P. Internship: Speech-Language Pathology in Private Practice. 4 Units

Prerequisite(s): CSAD 250. All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit. Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in a private practice setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
 Credit/No Credit

CSAD 295S. Internship: Special Class Authorization Eligibility. 4 Units

Prerequisite(s): CSAD 250. All previous semester's clinical practica and coursework must be completed, achievement of a passing score on the CBEST. Graded: Credit/No Credit Units: 4
Term Typically Offered: Fall, Spring

Supervised clinical practice in a medical setting. Students are expected to conform to the schedules of the placement(s) to which they are assigned. The student must furnish his/her own transportation.
 Credit/No Credit

CSAD 299. Special Problems. 1 - 3 Units

Term Typically Offered: Fall, Spring

Individual projects or directed reading. Open only to students who appear competent to carry on individual work.

Note: Departmental petition required.

Credit/No Credit

CSAD 500C. Culminating Experience: Comprehensive Exam. 2 Units

Prerequisite(s): Advanced to Candidacy Graded: Credit/No Credit Units: 2.0

Term Typically Offered: Fall, Spring

Written exam comprised of eight questions. Examinees are given one and a half hours to complete each question.

CSAD 500P. Culminating Experience: Project. 2 Units

Prerequisite(s): Advancement to Candidacy. Graded: Credit/No Credit. Units: 2.0 - 4.0

Term Typically Offered: Fall, Spring

Independent work conducted under the supervision of faculty members. A project is a significant undertaking appropriate to the professional fields of Speech-Language Pathology or Audiology. It must evidence originality, independent thinking, appropriate form and organization, and a rationale. It must be described and summarized in a written document that includes the project's significance, objectives, methodology, and a conclusion or recommendation. Students must follow all department and university project guidelines.

CSAD 500T. Culminating Experience: Thesis. 2 Units

Prerequisite(s): Advanced to Candidacy. Graded: Credit/No Credit.

Term Typically Offered: Fall, Spring

Independent research study, conducted under the supervision of faculty members. Thesis must involve a research question or hypothesis, review of pertinent literature, collection and analysis of data. It is the student's responsibility to locate and recruit subjects, to collect data, and to write the thesis. Students must follow all department and university thesis guidelines.

Communication Studies (COMS)

COMS 2. Argumentation. 3 Units

General Education Area/Graduation Requirement: Critical Thinking (A3)

Term Typically Offered: Fall, Spring

Practice in argumentation, critical evaluation, evidence, and reasoning. Basic principles are applied in a variety of formal and informal advocacy situations. Concepts of argument structure and context are discussed and applied.

Note: Majors must complete with a grade of "C-" or better.

COMS 4. Introduction to Public Speaking. 3 Units

General Education Area/Graduation Requirement: Oral Communication (A1)

Term Typically Offered: Fall, Spring

Theory and technique of public speaking. Emphasis on organizing, supporting, and clearly stating ideas. Practice in informative and persuasive speaking.

- COMS 4H. Honors Public Speaking. 3 Units**
Prerequisite(s): Open only to Honors students.
General Education Area/Graduation Requirement: Oral Communication (A1)
Term Typically Offered: Fall, Spring
- Provides both theoretical and practical training in the art of public discourse. Students learn both to recognize and to demonstrate the strategic processes of organizing and delivering speeches, especially within the context of global citizenship issues. Students are also introduced to the basic idea of forming reasonable challenges to speech in the public square.
- COMS 5. The Communication Experience. 3 Units**
General Education Area/Graduation Requirement: Oral Communication (A1)
Term Typically Offered: Fall, Spring
- Basic skills and introductory concepts necessary for effective communication in a variety of settings. Special emphasis on practical experiences within groups, facilitation of interpersonal relationships, and methods of conflict resolution.
Note: Not recommended for COMS majors in General, Organizational or Public Relations concentrations.
- COMS 8. Interpersonal Communication Skills. 3 Units**
Term Typically Offered: Fall, Spring
- Basic skills and introductory concepts for examining and altering interpersonal communication. In addition to lectures and discussions, students engage in structured interpersonal exercises and simulations to practice interpersonal communication skills such as listening, paraphrasing, describing feelings and intentions, and giving and receiving criticism.
Note: Majors must complete with a grade "C-" or better.
- COMS 20A. Audio Production. 2 Units**
Corequisite(s): COMS 20B.
Term Typically Offered: Fall, Spring
- Introduction to the theory and practice of audio production in radio, television, film and recording applications.
 Cross listed: FILM 20A.
- COMS 20B. Audio Production Laboratory. 1 Unit**
Corequisite(s): COMS 20A.
Term Typically Offered: Fall, Spring
- Experience in audio console operation, microphone selection and use, and audio recording in radio, television, film and recording applications.
 Cross listed: FILM 20B.
- COMS 21. First Year Seminar: Becoming an Educated Person. 3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall, Spring
- Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Helps students to develop and exercise fundamental academic success strategies and to improve their basic learning skills. Students interact with fellow students and the seminar leader to build a community of academic and personal support.
- COMS 26. Introduction to Capturing and Editing Digital Media. 3 Units**
Term Typically Offered: Fall, Spring
- Developing skills in producing photographic, graphic and animated materials used for the World Wide Web and multimedia.
- COMS 27A. Digital Film/Video Production. 2 Units**
Corequisite(s): COMS 27B.
Term Typically Offered: Fall, Spring
- Addresses the theory and practice of film/video production. Students will be expected to understand: camera operation, audio control, basic directing, lighting, and editing. Students will also be expected to learn the terminology of video production/post-production and use this terminology competently. Students enrolled in COMS 27A must be concurrently enrolled in COMS 27B. There are no exceptions to this requirement.
 Cross-listed: FILM 27A
- COMS 27B. Digital Film/Video Production Laboratory. 1 Unit**
Corequisite(s): COMS 27A.
Term Typically Offered: Fall, Spring
- Provides practical, hands-on experience in video production. Students will be expected to become proficient in all production roles: camera operation, audio control, basic directing, lighting, and editing. Students enrolled in COMS 27B must be concurrently enrolled in COMS 27A.
 Cross listed: FILM 27B.
- COMS 55. Media Communication and Society. 3 Units**
Term Typically Offered: Fall, Spring
- Introduction to the basic concepts of mass communication, including the effects, uses, and functions associated with the goods and services of mass media. Examination of the ways mass media combine with other institutions to affect the organization, design, and comprehension of messages, as well as political thought, cultural beliefs, and economic behavior.
Note: Majors must complete with a grade of "C-" or better. Cross Listed: JOUR 55; only one may be counted for credit.
- COMS 100A. Survey of Communication Studies. 3 Units**
Term Typically Offered: Fall, Spring, Summer
- Survey of various theories of communication. Attention given to such topics as verbal and nonverbal coding, information processing, interpersonal and small group communication, organizational communication, the structure and effects of mediated communication, rhetorical criticism, and research in communication.
Note: Majors and minors must complete with a grade of "C-" or better.

COMS 100B. Rhetoric and Social Influence. ✍️ 3 Units

Prerequisite(s): COMS Studies Majors only. COMS 2, COMS 4, (COMS 5 is accepted for COMS 4 for MCOM majors) or transfer equivalents and (GWAR Certification before Fall 09, or WPJ score of 80+, or at least a C- in ENGL 109M or ENGL 109W).

Corequisite(s): COMS 100A

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring, Summer

Detailed examination of texts on controversial issues in order to illustrate the varied forms of rhetorical action and the diverse modes of rhetorical analysis. Examples drawn from the literature of classical/contemporary rhetors.

Note: Majors must complete with a grade of "C-" or better; Writing Intensive

COMS 100C. Introduction to Scientific Methods in Communication Research. 3 Units

Prerequisite(s): COMS 100A; may be taken concurrently.

Term Typically Offered: Fall, Spring, Summer

Empirical methods commonly applied during communication research. An introduction to the concepts fundamental to the scientific study of communication, including conceptual and operational definitions, sampling, measurement, experimental design, independent and dependent variables, and quantitative data analysis.

Note: Majors must complete with a grade of "C-" or better.

COMS 101. Information Management and Privacy. 3 Units

Term Typically Offered: Fall, Spring

Students develop skills to use information proficiently in digital environments. In order to cope with information overload, students learn how to define and limit informational needs, how to access and evaluate information critically, and how to analyze and integrate information purposefully. The course teaches students evolving strategies and techniques for maintaining personal information spaces and security.

COMS 103. Presentational Speaking in the Organization. 3 Units

Prerequisite(s): A general education oral communication course.

Term Typically Offered: Fall, Spring, Summer

Contemporary communication techniques for use in business and industry. Principles and practice of oral reporting, persuasive speaking, conference participation, and interpersonal interaction.

Note: COMS majors are urged to take COMS 104 instead of COMS 103.

COMS 104. Persuasive Public Speaking. 3 Units

Prerequisite(s): COMS 2, COMS 4, or instructor permission.

Term Typically Offered: Fall, Spring

Advanced public speaking focusing upon persuasive strategies, principles and techniques.

COMS 105. Communication in Small Groups. 3 Units

Term Typically Offered: Fall, Spring, Summer

Theory and practice in small group communication. Topics include leadership, meeting management, evolution of group norms, phases of group development, communication networks, good communication techniques, conflict management, and problem solving in a variety of contexts.

COMS 106. Digital Media Creation - An Introduction. 3 Units

Term Typically Offered: Fall, Spring

Students learn multimedia authoring through the manipulation of digital media download legally from online repositories. Students learn how to digitally edit pixel-based images, vector images, audio, video and 3D models, while learning the principles that govern all digital media. The course uses Open Source and specialized software.

COMS 107. Children And Television. 3 Units

Term Typically Offered: Fall, Spring

Cognitive, affective, and behavioral effects of television on children. Explores in detail issues such as televised violence, stereotyping, advertising and cognitive development. Discusses relationship between television and education.

COMS 108. Family Communication. 3 Units

Prerequisite(s): COMS 8 or FACS 50 or SOC 166, or instructor permission.

Term Typically Offered: Fall, Spring

Family as a small group with emphasis on understanding and interpreting the dynamics of family communication and socio-psychological theories. Cross Listed: FACS 108; only one may be counted for credit.

COMS 110. Advanced Debate Workshop. 1 Unit

Term Typically Offered: Fall, Spring

Participation in intercollegiate debate competition. Credit/No Credit

COMS 111. Debate Research Practicum. 3 Units

Term Typically Offered: Fall only

Directed research in the current intercollegiate debate topic; identification of issues, compilation of evidence, and case building.

Note: May be taken four times for credit with instructor permission.

COMS 114. Communication and American Culture. 3 Units

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring, Summer

Critical analysis of the ways modern American media interact with the conduct of American life; emphasizes the role of commercialism and other aspects of contemporary American capitalism; examines the problem of personal development and relationships in the context of a commercially dominated media system.

COMS 115. Nonverbal Communication. 3 Units

Term Typically Offered: Fall, Spring

Nonverbal communication will focus on the nonverbal aspects of human communication. Students will learn the vocabulary of nonverbal communication (NVC) as we examine the nature of NVC, NVC Codes, and the effects of NVC on messages we receive and send. In addition, we will consider nonverbal behaviors in interpersonal relationships, intercultural communication and research in nonverbal.

COMS 116. Intercultural Communication. 3 Units

Term Typically Offered: Fall, Spring, Summer

Analysis of factors which influence communication between individuals of different cultures and cocultures. Discussion and practical application.

- COMS 117. Multimedia Communication. 3 Units**
Prerequisite(s): COMS 106
Term Typically Offered: Fall, Spring
- Students create and integrate information and digital media with the purpose of informing or persuading an audience. By identifying communication needs, students learn to prepare multimedia presentational aids and standalone multimedia presentations for distribution in online environments. This course features topics in visual communication, story-boarding, presentation and delivery.
- COMS 118. Survey of Public Relations. 3 Units**
Prerequisite(s): At least one college writing course in ENGL or JOUR with a grade of "C-" or better.
Term Typically Offered: Fall, Spring, Summer
- Introduces the student to publics, organization-environment relationships, structures, practices, and processes from a communication theory and research perspective. Specifically, the student is introduced to the multi-phased approach to public relations, an approach that highlights the PR subprocesses of task identification, task analysis, and task performance.
- COMS 119. Conflict Resolution Through Communication. 3 Units**
Term Typically Offered: Fall, Spring
- Ways to identify, clarify, and resolve conflicts in dyads, groups, and organizations. Conflict is contrasted with disagreement, aggression, incompatible values, etc. The costs and benefits of conflict are explored.
- COMS 120. History of the Media. 3 Units**
Prerequisite(s): COMS 55 or JOUR 55 or equivalent; may be taken concurrently.
Term Typically Offered: Fall, Spring
- Examination of development of major mass communication media in the U.S. and of how the economics, content, regulation and audience use of the media have been affected by the way the media have evolved. Current issues and trends are discussed, as well as possible future development. Cross Listed: JOUR 120; only one may be counted for credit.
- COMS 121. Media Aesthetics. 3 Units**
Term Typically Offered: Fall, Spring
- Overview and analysis of the primary aesthetic tools used to create messages in video and film. The basic properties of light, color, area, space, shape, sound, time and motion are defined and discussed as they relate to media production. Introduces students to the concepts and vocabulary necessary for effectively conceiving, producing or criticizing mediated messages. Designed primarily for students with interest in digital media. Provides a foundation for students working in media criticism.
 Cross listed: FILM 121.
- COMS 122. Writing for Interactive Media. 3 Units**
Prerequisite(s): ENGL 1A and ENGL 20 or (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W.)
Term Typically Offered: Fall, Spring
- Writing and editing for visual, audio, and interactive media. How to choose appropriate format and delivery mechanisms for news, web sites, kiosks, and CD/DVD. Topics include copyright law and information ethics.
- COMS 123. Writing for Public Relations. 3 Units**
Prerequisite(s): JOUR 30; GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.
Term Typically Offered: Fall, Spring
- Organization and operation of communication media; practice in publicity and public relations techniques. Emphasis on clear writing and correct public relations formats such as releases, PSAs, articles, and speeches.
 Cross listed: JOUR 123
- COMS 124. Writing Scripts for Film/Video. 3 Units**
Prerequisite(s): ENGL 1A and ENGL 20.
Term Typically Offered: Fall, Spring
- Developing narratives, documentaries, educational, promotional, and experimental short screenplays. Students are expected to develop a writing style and master screenwriting and audio/visual scripting formats. Scripts will be developed to be produced in advanced production courses: COMS/FILM 128 and COMS/FILM 185.
 Cross listed: FILM 124.
- COMS 126. Motion Graphics in Film and Video. 3 Units**
Prerequisite(s): COMS 20A, COMS 20B and COMS 26 or both COMS 27A and COMS 27B each with a grade of "B-" or better or instructor permission.
Term Typically Offered: Fall, Spring
- Artistic and technical skills employed when capturing and editing photographic, audio, and video data files. Data files are prepared for export into multimedia authoring applications. Mastery of appropriate hardware and software.
- COMS 127. Producing and Directing for Television. 3 Units**
Prerequisite(s): COMS 20A, COMS 20B, COMS 27A, COMS 27B, each with a grade of "B-" or better.
Term Typically Offered: Fall, Spring
- Theory and practice of producing and directing television programs with emphasis on studio and control room techniques.
- COMS 128. Non-Studio Video Production. 3 Units**
Prerequisite(s): COMS 20A, COMS 20B, COMS 27A, COMS 27B each with a grade of "B-" or better.
Term Typically Offered: Fall, Spring
- Production of video materials using portable cameras and recorders. Application of electronic field production and post-production techniques.
 Cross-listed: FILM 128.
- COMS 129. Film and Video Production Management. 3 Units**
Term Typically Offered: Fall, Spring
- Management and administration of the preproduction and production process. Course to include script breakdown, budgeting, scheduling and other preproduction and production management skills needed for film or video production. Special attention on the history, development and current practices of the Production Manager.
 Cross listed: FILM 129.

- COMS 130. Staging and Lighting Digital Video.** 3 Units
Prerequisite(s): COMS 20A, COMS 20B, COMS 27A, COMS 27B, each with a grade of B- or better.
Term Typically Offered: Fall, Spring
- Introduction to the aesthetics, concepts and techniques used to control lighting in digital video productions. Aspects of staging, blocking and composition in the context of studio and location lighting.
Note: Students enrolled are required to work on productions outside of scheduled class time (1-3 hours/week). Cross listed: FILM 130.
- COMS 133. The Documentary Film.** 3 Units
Term Typically Offered: Fall, Spring
- Examines the historical, development, and present state of documentary film. Emphasis is on both understanding and critically analyzing the significance of various genres of the documentary and its uses as a tool for information, proselytizing, education, and propaganda.
- COMS 136. Introduction to Electronic Publishing.** 3 Units
Prerequisite(s): COMS 26 or instructor permission.
Term Typically Offered: Fall, Spring
- Design and production of information sites for the World Wide Web. Concepts covered include market analysis, cognitive design, layout, navigation, interactive strategies, site management, and multimedia components for electronic distribution systems. Introduction to object oriented programs and XHTML text editors.
- COMS 140. Online Collaboration.** 3 Units
Term Typically Offered: Fall, Spring
- Students learn to communicate in virtual environments in real-time and asynchronously. Students survey current technologies for collaboration, explore psychological and cultural aspects of individuals working and communicating in teams across computer networks, and identify strategies to foster cooperatives in distributed work.
- COMS 141. Theory of Film and Video Editing.** 3 Units
Prerequisite(s): COMS/FILM 27A and COMS/FILM 27B with final posted grade of C or better.
Term Typically Offered: Fall, Spring
- Study of history and theory of film and video editing. Many films are viewed and discussed, examining how editing theory is put into practice. Cross listed: FILM 141.
- COMS 142. Film As Communication.** 3 Units
Term Typically Offered: Fall only
- Explores the uses of film as a tool of communication.
- COMS 143. Theories of Interpersonal Communication.** 3 Units
Prerequisite(s): COMS 8 or equivalent; COMS 100A may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer
- One-to-one communication between individuals in both social and task settings. Theories of communication during the growth and decay of relationships, as well as research on the forces behind relational dynamics. Topics include nonverbal communication, self concept, communication of self, theories of conflict resolution, communication competence and the rhetoric of disconfirmation.
- COMS 144. Developing Rich Media Websites.** 3 Units
Prerequisite(s): COMS 27A, and COMS 27B.
Term Typically Offered: Fall, Spring
- An introduction to the creation of multimedia websites using current multimedia development software such as Flash. Emphasis will be placed on creating interactive video and formatting video programs for delivery over the WWW, extranets, or intranet.
- COMS 145. Organizational Communication.** 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Fall, Spring, Summer
- Basic concepts of interpersonal and inter-group communication within formal and informal social organizations. Current techniques of auditing and evaluating organizational communication.
- COMS 149. Multimedia Authoring.** 3 Units
Prerequisite(s): COMS 106, COMS 126.
Term Typically Offered: Fall, Spring
- Basic multimedia authoring theory and skills. Text, graphics, audio, and video are synchronized into interactive media. Topics include 2D animation, interface design, and fundamentals of scripting language.
- COMS 150. Mass Communication Theories and Effects.** 3 Units
Prerequisite(s): COMS 55 or JOUR 55 or equivalent; and COMS 100A which may be taken concurrently.
Term Typically Offered: Fall, Spring, Summer
- Survey of the major theories dealing with the relationship between the mass media and human communication behavior. Examination of research into the social, political, economic and cultural effects of mass communication.
- COMS 152. Freedom Of Speech.** 3 Units
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Thorough introduction to issues related to freedom of speech and censorship, sections of the historical origins of free speech, seditious speech, libel and slander, pornography and obscenity, commercial speech and advertising, symbolic speech and hate speech. The class brings a communication focus to addressing issues related to the First Amendment.
- COMS 153. Journalism Law and Ethics.** 3 Units
Term Typically Offered: Fall, Spring
- Laws and regulations that govern print, broadcast, and the electronic mass media in the U.S. Discusses the process by which laws and regulations are enacted and interpreted as well as legal and regulatory issues concerned with the content, control, political role and responsibilities of media practitioners, regulators, Congress, and the public.
 Cross listed: JOUR 153
- COMS 154. Instructional Design and Training.** 3 Units
Term Typically Offered: Fall, Spring
- Communication theory and practice in organizational training. Surveys instructional communication theory and the instructional design process. Focus on effective communication in training contexts. Topics include needs assessment, training design, training evaluation and training delivery via electronic media.

- COMS 155. Survey of World Cinema. 3 Units**
Term Typically Offered: Fall, Spring
- A historical review of the development of major international film styles and themes. Concepts derived from this study of international film are then used as a basis to analyze contemporary films of India, Asia, and Africa. Emphasis is on both the development of formal film technique and a comparison of the unique cultural values that shape the film narrative and style.
- COMS 157. Video Art. 3 Units**
Prerequisite(s): ART 97 or COMS 27A/Film 27A and COMS 27B/Film 27B.
Term Typically Offered: Fall, Spring
- The creation and analysis of video artwork; including techniques of video production, post-production manipulation and critique, within the context of art and communication. The techniques and theory of producing and editing video will serve as a foundation for the pursuit of individual, creative projects.
 Cross-listed as ART 147; only one may be counted for credit.
- COMS 158. Public Relations Planning and Management. 3 Units**
Prerequisite(s): COMS 118 and COMS 123 or JOUR 123 with grade of "C-" or better.
Term Typically Offered: Fall, Spring
- Theoretical concepts to the solution of problems for pre-selected non-profit and campus clients by forming small group PR agencies; completing needs assessments; profiling target and secondary audiences; developing and implementing a strategic public relations plan; producing targeted messages for media kits and other uses; developing and evaluating formative and summative evaluation plans; and making formal in-class presentations to peers, clients and invited PR professionals. Students will also learn how to negotiate contracts, maintain client relations, track work on projects and develop timelines and budgets.
 Cross Listed: JOUR 158; only one may be counted for credit.
- COMS 160. Political Communication. 3 Units**
Term Typically Offered: Fall only
- Analyzes the relationship between mass media and political decision-making, including a structural analysis of political and media institutions. Particular attention on the formation of public opinion through messages and strategies, and the impact of public opinion on public policy.
- COMS 161. Health Communication. 3 Units**
Term Typically Offered: Fall, Spring
- Communication principles and techniques as they apply to the many facets of health care, health education and promotion, and research in health communication. Emphasis on understanding and improving communication among health professionals, and between health professionals and clients. Explores the rapidly emerging field of health communication. Selected concepts and theories of human communication are directly applied to communication problems and situations in health care settings through the use of case studies. In addition, pertinent research that helps explain human interaction in health care is incorporated through readings and discussions.
- COMS 162. Gender Ideology and Communication. 3 Units**
Prerequisite(s): COMS 100A
Term Typically Offered: Fall, Spring
- Scholarly, theoretical and critical writings on the production and circulation of gender roles, images, and gender-types attributes through communication, with a special focus on mass-mediated communication such as television, video, and film.
- COMS 164. Visual Communication. 3 Units**
Prerequisite(s): COMS 100A and 100B or equivalent, with a grade of C- or better.
Term Typically Offered: Fall, Spring, Summer
- Comprehensive overview of the theoretical concepts and communication methodologies appropriate for analysis of contemporary visual messages. Focuses on rhetorical analysis of visual messages. Significant research and critical writing required
- COMS 165. Communication and Religion. 3 Units**
Term Typically Offered: Fall, Spring, Summer
- Examines the history, development and present state of religious communication. Discussion of the limits and challenges communication theories face when confronted with situations requiring them to describe the indescribable. Emphasis upon the communication methods in a religious context as well as the communication strategies, limits, and possibilities that are revealed in what is arguably the most extreme of communication situations: the intersection of religion and words.
- COMS 166. Theories of Persuasion and Attitude Change. 3 Units**
Term Typically Offered: Fall, Spring
- Various theories of persuasion and attitude change, both classical and empirical, in terms of their effectiveness and social impact. Includes units on production and consumption of persuasive messages.
- COMS 167. Systems and Theories of Rhetoric. 3 Units**
Prerequisite(s): COMS 100B or equivalent with a grade of "C-" or better.
Term Typically Offered: Fall, Spring, Summer
- Historical survey of theories of rhetoric. Comparison/contrast of scope and value of rhetorical theories. Practice in critical writing.
- COMS 168. Approaches to Rhetorical Criticism. 3 Units**
Prerequisite(s): COMS 100B or equivalent with a grade of "C-" or better.
Term Typically Offered: Fall, Spring, Summer
- Analyzes rhetorical events, using a variety of critical perspectives. Current issues on criticism's function and the critic's role. Practice in critical writing.
- COMS 169. Television Criticism. 3 Units**
Prerequisite(s): COMS 100B with a grade of C- or better; completion of 12 units of upper division COMS courses; or unclassified graduate student status; or instructor permission.
Term Typically Offered: Fall, Spring, Summer
- Introduction to television criticism theory and to various critical methods with which television program texts may be analyzed. Current theoretical and critical issues in the function of criticism and the role of the critic are addressed through readings, writing assignments, screenings and discussion.

COMS 170. Data Analysis in Communication Research. 3 Units

Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.

Term Typically Offered: Fall, Spring, Summer

Introduction to the application of data analysis to the study of communication processes.

COMS 171. Survey Methods in Communication Research. 3 Units

Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.

Term Typically Offered: Fall, Spring, Summer

Techniques of survey research in communication, including sampling, questionnaire construction, interviewing, data analysis, and report writing. Each student designs and executes a research project.

COMS 172. Content Analysis. 3 Units

Prerequisite(s): COMS 100C or equivalent with a grade of "C-" or better; or instructor permission.

Term Typically Offered: Fall, Spring

Content analysis as a research technique in communication. Emphasizes design and execution of content analysis studies in a wide range of communication situations. Each student completes several short studies and a major project.

COMS 173. Communication, Language and Culture. 3 Units

Prerequisite(s): COMS 100A.

Term Typically Offered: Spring only

Cross-cultural exploration of communication and social interaction; relationship between language and society; cross-cultural implications of values embedded in message production, transmission, and interpretation; studies of how language influences perception and organization of social reality; linguistics, information and message transmission.

Note: Restricted to junior and above or instructor permission.

COMS 174. International Communication. 3 Units

Prerequisite(s): COMS 100A.

Term Typically Offered: Fall, Spring, Summer

Movement of mediated messages across and between national boundaries. Topics include news and entertainment flow, media systems and philosophies, cultural dependency and imperialism, the new world information order and communication development.

COMS 175. Creative Problem Solving. 3 Units

Term Typically Offered: Fall, Spring

Creative problem solving techniques for use by individuals and groups. Topics include the nature of creative problem solving, barriers to creativity, clear problem definition, idea generation, decision making, group dynamics in creative situations, implementation of changes, and overcoming resistance to change.

COMS 176. Communication and Terrorism. 3 Units

Prerequisite(s): COMS 100A or instructor permission

Term Typically Offered: Spring only

This course addresses the communication aspects of terrorism, including both the ways terrorism has been used to make political and religious statements worldwide; how the media cover those messages; and how we talk about those messages and the coverage they receive. The course draws on the cutting-edge communication research from international/intercultural, political, mass communication, and computer-mediated communication sources. This is a course in the communication of terrorism. It is neither a course in the political science of terrorism nor in the criminal justice enforcement of counter-terrorism.

COMS 178. Virtual Communities on the Internet. 3 Units

Term Typically Offered: Fall, Spring

The nature of communication in virtual communities on the Internet and the impact that these communities have on traditional communication media. Topics include: the interaction of real and cyber communities, self-publishing, educational uses of virtual communities, virtual self-governance, artificial intelligent agents, and the issues of security, privacy, and anonymity. Students will participate in structured on-line activities.

COMS 179. Media, Sports, and Society. 3 Units

Term Typically Offered: Spring only

Examines and critiques the relationship between the mass media and sports. Reviews theoretical approaches for studying media and sports (including historical, sociological, psychological, political, and cultural studies perspectives), then examines how sport is mediated through literature, print journalism, radio, and television.

COMS 180. Senior Seminar in Organizational Communication. 3 Units

Prerequisite(s): COMS 145; completion of 12 units of upper division COMS courses including COMS 100A.

Term Typically Offered: Fall, Spring, Summer

Seminar on communication theories, techniques and research methodologies in the field of social and governmental organizational systems.

COMS 181. Senior Seminar in Small Group Communication. 3 Units

Prerequisite(s): COMS 105; completion of 12 units of upper division COMS courses including COMS 100A.

Term Typically Offered: Fall, Spring, Summer

Seminar on the ways theories of group communication are realized in actual social settings.

COMS 182. Senior Seminar in Interpersonal Communication. 3 Units

Prerequisite(s): COMS 8, COMS 143, and completion of 12 units of upper division COMS courses including COMS100A.

Term Typically Offered: Fall, Spring, Summer

Seminar on advanced theories of interpersonal communication. Sample topics include relational development, relational termination, communication and interpersonal attraction, and communication competence. Students present one in-class report and complete a major research paper.

COMS 183. Senior Seminar in Media Issues and Ethics. 3 Units

Prerequisite(s): COMS 55 or JOUR 55; COMS 150; completion of 12 units of upper division COMS courses including COMS 100A.

Term Typically Offered: Fall, Spring

Seminar on the functions and roles of communication media in contemporary society. Includes issues and ethical considerations associated with freedom, responsibility and control examined from the points of view of the media, the government and the public. Specific topics will vary.

COMS 184B. Multimedia Project Completion. 3 Units

Prerequisite(s): Instructor permission.

Corequisite(s): COMS 184A.

Term Typically Offered: Fall, Spring

Second of a two-semester senior project sequence. Students complete the project designed in COMS 184A. Projects are completed with assistance and feedback from the instructor, client, and working professionals.

COMS 185. Senior Practicum in Video Production. 3 Units

Prerequisite(s): COMS/FILM 124 with a final posted grade of C or better.

Term Typically Offered: Fall, Spring

Assignments in various phases of video production including creative use of camera, sound and lighting, editing production design, production planning and management, and directing and producing. Students in first semester function as crew members for productions.

Note: May be repeated once for credit. Repeating students are expected to produce and direct a major student project. Cross listed: FILM 185.

COMS 186. Seminar in Health Communication. 3 Units

Term Typically Offered: Fall, Spring

Examines how health messages impact individuals, communities, and mass audiences. Critiques health communication research, raises awareness about health-related messages in our daily lives, applies theories of health communication, and critically analyzes how the creation, sending, and reception of health messages impacts society. Sample topics include doctor-patient communication, cross-cultural communication about health, and mass media effects of health-related images in media.

COMS 187. Issue Management and Case Studies in Public Relations. 3 Units

Prerequisite(s): COMS 118; completion of 12 units of upper division COMS courses.

Term Typically Offered: Fall, Spring

Examines the management of issues in the public and private sectors including knowledge and skills in the communication activities and thinking processes that affect an issue's development. Uses case studies of organizations—governmental agencies, businesses, and not-for-profit entities to assess issue development and management by examining the fundamental questions confronting organizations: What should the particular organization do and how should it do it? Examines criteria for selecting among alternative options, and the relation of the organization to its environment. Explores the broader social, legal, and ethical implications of the organization's activities.

COMS 188. Senior Seminar in Intercultural Communication. 3 Units

Prerequisite(s): COMS 116; completion of 12 units of upper division COMS courses including COMS 100A.

Term Typically Offered: Fall, Spring, Summer

Critically examines and analyzes complex dynamics and concepts in communication and culture in a pluralistic society. Also relates various perspectives on intercultural communication theories and methods to an analysis of social interaction processes among culturally diverse groups. An interactive dimension includes problem-solving strategies.

COMS 189. Practicum in Communication Training. 3 Units

Prerequisite(s): COMS 145 and COMS 154 or instructor permission.

Term Typically Offered: Spring only

Students work in groups to complete organizational training projects within community organizations. After assessing the organization's needs, students design, conduct and evaluate training. Advanced readings and professional competencies are emphasized.

COMS 190. Human Communication on the Internet. 3 Units

Term Typically Offered: Fall only

Provides an in-depth study of communication models that summarize and explain the interaction of humans in electronic environments, especially the Internet. Students locate, organize, analyze, and synthesize the latest research in online communication and make connection between theoretical models and their own experiences.

COMS 191. New Media and Society. 3 Units

Term Typically Offered: Fall, Spring, Summer

The course examines contemporary social, cultural, political and economic topics regarding the adoption of digital media and the Internet. Students understand their role as citizens of a global knowledge-based society and the ethical dimensions brought by the new computer-enabled media environment.

COMS 192. Senior Seminar in Film. 3 Units

Prerequisite(s): Completion of the Film Studies upper and lower division core or COMS 142, and (GWAR Certification before Fall 09, or WPJ score of 80+, or at least a C- in ENGL 109M or ENGL 109W).

Term Typically Offered: Spring only

Research seminar that provides an in-depth investigation of film as an art form, a medium of mass communication and a means of personal expression. Subject will vary according to instructor.

Cross listed: FILM 192.

COMS 194. Communication Studies - Related Work Experience. 3 - 6 Units

Prerequisite(s): Open only to upper division or graduate students with appropriate course preparation. Units may not be used to meet COMS major, minor or graduate course work requirements. Consent of Communication Studies Department faculty advisor required. No more than 12 units may be counted toward the degree.

Term Typically Offered: Fall, Spring

Supervised employment in a company or agency working on communication studies-related assignments, arranged through the Department of Communication Studies and the Cooperative Education Program office. Requires preparation of application packet, completion of a 6 month full-time or part-time work assignment, and a written report. Credit/No Credit

- COMS 195. Internship in Communication Studies.** 1 - 6 Units
Prerequisite(s): COMS 100A, minimum 2.3 overall GPA.
Corequisite(s): COMS 100A.
Term Typically Offered: Summer only
- Directed work experience in the internship program. Supervision is provided by both instructional staff and the cooperating agency. Faculty approval required.
 Credit/No Credit
- COMS 196. Critical Analysis of the Media.** 3 Units
Prerequisite(s): Upper division standing for majors and non majors.
Term Typically Offered: Fall, Spring
- The course will introduce students to semiotics that will be employed to tease out "overt" and hidden meanings in news (print and video) and other mediated messages. In particular the course will focus on the various, powerful strands of American ideology, e.g., individualism, democracy, patriarchy, femininity, feminism, capitalism, the family, patriotism, environmentalism, and the First Amendment that shape an understanding of ourselves and of our society. It will examine the present state of American journalism and how it operates.
- COMS 199. Special Problems.** 1 - 3 Units
Prerequisite(s): COMS 100A.
Term Typically Offered: Fall, Spring
- Individual projects or directed reading open to students who wish to attempt independent work. Faculty approval required.
 Credit/No Credit
- COMS 200. Qualitative Research Methods in Communication Studies.** 3 Units
Term Typically Offered: Fall, Spring
- Focuses on qualitative research methods as one methodological option to use in scholarly research. Critically review and analyze existing qualitative research projects; creation of qualitative research project; and response the research projects of peers. Consideration of ways to successfully integrate into the communication discipline through a variety of class discussions, readings, and activities.
Note: Graduate student status or instructor permission required
- COMS 201. Communication Theory.** 3 Units
Term Typically Offered: Fall, Spring
- Approaches to the study of human communication. Emphasizes general theories of communication and specific theories of rhetoric, symbolic interaction, information processing, interpersonal communication, small group communication, persuasion, organizational communication, and mass communication. Must be taken within first two semesters of graduate enrollment.
Note: Graduate standing or instructor permission required.
- COMS 202. Quantitative Research Methods in Communication Studies.** 3 Units
Prerequisite(s): Graduate student status or instructor permission.
Term Typically Offered: Fall, Spring
- Introduction to advanced quantitative and qualitative research methods. Students will demonstrate their ability to apply at least one research perspective to a significant topic of interest in the discipline. Students are expected to produce a well-crafted research proposal as part of a culminating experience.
- COMS 206. Organizational Communication.** 3 Units
Term Typically Offered: Fall, Spring
- History, research, and theories in the social, psychological, and structural aspects of organizational communication. Students undertake field studies integrating various analytical approaches.
- COMS 207. Dyadic Communication.** 3 Units
Term Typically Offered: Fall, Spring
- Various theoretical approaches to interpersonal or face-to-face communication.
- COMS 208. Communication and National Development.** 3 Units
Term Typically Offered: Fall, Spring
- Role of communication in national development. Examines how communication (government policies, technologies and implementation strategies) can be used in the development of third world nations.
- COMS 209. Communication and Social Change.** 3 Units
Term Typically Offered: Fall, Spring
- Relationship between movement rhetoric, mass media messages and major societal changes and paradigm shifts. Students examine the flow of communication from individual and group "change agents" to the larger population and write a paper which illuminates a contemporary social change in progress.
- COMS 210. Seminar in Mass Communication.** 3 Units
Term Typically Offered: Fall, Spring
- Concentrated survey of mass media systems and an analysis of theories of media uses and effects. Students are required to conduct library research on a specific media-related topic and to present their findings orally.
- COMS 211. Electronic Media and American Culture.** 3 Units
Term Typically Offered: Fall, Spring
- American thought and culture as reflected in and influenced by the content of electronic media.
- COMS 212. Seminar in Small Group Communication.** 3 Units
Term Typically Offered: Fall, Spring
- Theory and research about task-oriented groups.
- COMS 213. Seminar In Criticism.** 3 Units
Term Typically Offered: Fall, Spring
- Intensive examination of critical theory. A major critical paper is prepared by each student.
Note: Graduate Writing Intensive
- COMS 215. Communication and Public Opinion.** 3 Units
Term Typically Offered: Fall, Spring
- Examines theoretical foundations of public opinion formation and change and explores current public opinion measurement methodologies.

- COMS 216. Seminar on Contemporary Issues in Intercultural Communication.** 3 Units
Term Typically Offered: Fall, Spring
- Various theories, perspectives and approaches to the study of intercultural communication. Selected contemporary issues pertaining to race and culture and their impact on the communication process, especially the multicultural/multiracial consciousness in California in particular, and the U.S. in general.
- COMS 217. Assessment of Communication Behavior in Organizations.** 3 Units
Term Typically Offered: Fall, Spring
- Review of measuring instruments commonly used to assess communication practices in large organizations. Students also critically review relevant research literature regarding important communication issues in large organizations.
- COMS 219. Conflict Resolution.** 3 Units
Term Typically Offered: Fall, Spring
- Review of theory and research of the role of communication in conflict resolution.
- COMS 221. Instructional Communication Theory.** 3 Units
Term Typically Offered: Fall, Spring
- Survey of dominant theories of instructional communication. Students read, study and critique prevailing bodies of literature which have a bearing on the study and practice of instructional communication. Theories are used to help students reflect on their own experiences as teachers and students and to generate new ideas for research in instructional communication.
- COMS 222. Instructional Communication Practicum.** 3 Units
Term Typically Offered: Fall, Spring
- Examination of communication theory and research in instructional or training contexts. Designed for beginning teachers or organizational trainers. Centers on those communication principles which contribute to greater student/client learning and satisfaction. Emphasis on the development and implementation of instructional communication packages for adult learners.
- COMS 228. Corporate Advocacy and Public Policy.** 3 Units
Term Typically Offered: Fall, Spring
- Explores "corporate advocacy" as a kind of rhetorical, persuasive transaction between Corporate America and those in its environment. Seeks to understand corporate America's role in the "policy process" (broadly defined), by analyzing the constituted authority for policy formation, the actual institutions involved in such formation, the interaction between/among these centers of power, the difference between authority and influence between/among these centers of power and influence, and how corporate America uses rhetorical messages to enhance various goals.
- COMS 230. Computer-Mediated Communication.** 3 Units
Term Typically Offered: Fall, Spring
- Instruction and analysis of human and social Computer-Mediated Communications. Covers from how digital media affects representation and narrative to research on current uses of the Internet and the theoretical frameworks applied to summarize it. Includes a component of Computer Literacy that will help students understand Computer-Mediated Communication and use online collaborative tools efficiently. No previous computer knowledge is required.
- COMS 285. Practicum for Teaching Associates in Communication Studies.** 1 Unit
Prerequisite(s): COMS 200, COMS 201.
Term Typically Offered: Fall, Spring
- Open to students appointed as teaching associates in Communication Studies. Designed to facilitate the development, refinement, and maintenance of effective teaching methods and strategies.
Note: May be repeated up to three times with permission of instructor.
- Credit/No Credit
- COMS 295. Internship in Communication Studies.** 1 - 6 Units
Term Typically Offered: Fall, Spring
- Directed work experience in the internship program. Supervision is provided by both the instructional staff and the cooperating agency. Faculty and Graduate Committee approval required the semester prior to enrollment.
 Credit/No Credit
- COMS 297. Directed Study and Comprehensive Examination.** 1 - 3 Units
Prerequisite(s): Must be advanced to candidacy.
Term Typically Offered: Fall, Spring
- Structured and supervised reading program for MA candidates preparing for comprehensive examinations. Should be taken after completion of all other requirements for the degree. Credit given upon successful completion of comprehensive examinations. Examining committee determines the number of units to be credited.
Note: Open to students who have been advanced to candidacy and have secured permission of the chair of their examining committee and the Graduate Coordinator.
- Credit/No Credit
- COMS 298. Colloquium In Communication.** 3 Units
Term Typically Offered: Fall, Spring
- A seminar on a communication topic of contemporary concern. Topic may change from semester to semester. May be taken for credit more than once, provided topic is not repeated.
- COMS 299. Special Problems.** 1 - 3 Units
Term Typically Offered: Fall, Spring
- Individual projects or directed reading open to students wishing to attempt independent work. Faculty and Graduate Committee approval required the semester prior to enrollment.
 Credit/No Credit

COMS 500. Culminating Experience. 3 - 6 Units

Prerequisite(s): Advanced to candidacy and chair permission of his/her thesis or project committee.

Term Typically Offered: Fall, Spring

Completion of a thesis or project approved for the Master's degree. Thesis or project prospectus committees determine the number of units to be credited.

Computer Engineering (CPE)

CPE 64. Introduction to Logic Design. 4 Units

Prerequisite(s): CSC 15 or CSC 25 or ENGR 50.

General Education Area/Graduation Requirement: Understanding Personal Development (E)

Term Typically Offered: Fall, Spring

Covers the following topics: logic gates, binary number system, conversion between number systems, Boolean algebra, Karnaugh maps, combinational logic, digital logic design, flip-flops, programmable logic devices (PLDs), counters, registers, memories, state machines, designing combinational logic and state machines into PLDs, and basic computer architecture. Lab emphasizes the use of software equation entry design tools, the use of a schematic entry, and the use of a logic simulation design tool. Lab assignments are design-oriented. Lecture three hours; laboratory three hours.

Cross listed: EEE 64

CPE 64W. Introduction to Logic Design Workshop. 1 Unit

Corequisite(s): CPE 64.

Term Typically Offered: Fall, Spring

Designated to assist students in developing a more thorough understanding of logic simulation and logic design. Focus is on problem solving and design. Activity two hours.

Cross Listed: EEE 64W; only one may be counted for credit.

Credit/No Credit

CPE 138. Computer Networks and Internets. 3 Units

Prerequisite(s): CSC 35, CSC 60, CSC 130.

Term Typically Offered: Fall, Spring

Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling. LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol, Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, Search engine operations, and Web database operations.

Cross Listed: CSC 138; only one may be counted for credit.

CPE 142. Advanced Computer Organization. 3 Units

Prerequisite(s): CSC 137 or CPE 166 and CPE 185.

Term Typically Offered: Fall, Spring

Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchical memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.

Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CPE 144. Dsp Architecture Design. 3 Units

Prerequisite(s): CPE 142.

Term Typically Offered: Fall, Spring

Fundamental principles of Digital Signal Processing (DSP): sampling theory, aliasing effects, frequency response, Finite Impulse Response filters, Infinite Impulse Response filters, spectrum analysis, Z transforms, Discrete Fourier Transform, and Fast Fourier Transform. Emphasis on hardware design to achieve high-speed real and complex multiplications and additions. Pipelining, Harvard, and modified Harvard architectures are included. Concludes with architectural overviews of modern DSP applications: modems, speech processing, audio and video compression and expansion, and cellular.

CPE 151. Cmos And Vlsi. 3 Units

Prerequisite(s): CPE 64 and EEE 108.

Term Typically Offered: Fall, Spring

Begins with an introduction to CMOS gates and design of CMOS combinational and sequential functions at the gate level, including CMOS memory. The theory of MOS transistors is covered including: DC equations, threshold voltage, body effect, subthreshold region, channel length modulation, tunneling, punch through, basic CMOS inverter, and the CMOS transmission gate. A basic exposure to VLSI includes the following topics: CMOS processing technology, CMOS layout, CMOS circuit design and CMOS logic design. Simulations on SPICE and basic VLSI layouts using LEDIT will be included.

CPE 153. Vlsi Design. 3 Units

Prerequisite(s): CPE 151.

Term Typically Offered: Fall, Spring

Review basic CMOS VLSI technology, circuit characterization and performance estimation, and provides detailed information on synthesis, placing and routing, clocking strategies, quality and reliability, and I/O structures. Design examples, design techniques, and testing techniques will be presented via current EDA design tools. Students assigned one project from concept design through validation.

CPE 159. Operating System Pragmatics. 3 Units

Prerequisite(s): CSC 139.

Term Typically Offered: Fall, Spring

Application of operating system principles to the design and implementation of a multi-tasking operating system. Students will write an operating system for a computer system. Topics include scheduling of processes, control and allocation of computer resources and user interfacing.

Cross Listed: CSC 159; only one may be counted for credit.

CPE 166. Advanced Logic Design.**4 Units****Prerequisite(s):** CPE 64, ENGR 17.**Term Typically Offered:** Fall, Spring

VHDL and Verilog Hardware Description Languages are studied and used on the following advanced level logic design topics: synchronous state machines, asynchronous state machines, metastability, hazards, races, testability, boundary scan, scan chains, and built-in self-tests. Commercial Electronic Design Automation (EDA) toolsets are used to synthesize lab projects containing a hierarchy of modules into Field Programmable Gate Arrays (FPGAs). Post synthesis simulations by these same tools verify the design before implementation on rapid prototyping boards in the lab.

CPE 185. Computer Interfacing.**4 Units****Prerequisite(s):** CPE 64, CSC 35 and CSC 60.**Term Typically Offered:** Fall, Spring

Design of microcomputer systems including memory systems, parallel and serial input/output, timer modules, and interrupt structures; designing "C" language code, in laboratory, to exercise interface modules of parallel and serial input/output, timer modules, and interrupts; extensive study of interrupt handlers, assemblers, linkers, and loaders. Practical features of interfaces, handshaking techniques, displays, keypads, and trackballs are included.

CPE 186. Computer Hardware System Design.**3 Units****Prerequisite(s):** CPE 185 or EEE 174.**Term Typically Offered:** Fall, Spring

Study of Intel and Motorola architectures, bus structures, interrupts, memory interface and controllers, bus arbitration, DMA controllers, I/O interface, bridges and microcontroller. Electromagnetic compatibility and regulations, cabling and shielding, grounding, digital circuit noise and layout.

CPE 187. Embedded Processor System Design.**2 Units****Prerequisite(s):** CPE 166, CPE 185, EEE 102, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).**Term Typically Offered:** Fall, Spring

Students will design, construct and test an embedded processor system project. All address decoding, control functions, input and output ports, handshaking signals and interrupt control will be implemented in an FPGA. The system will interface to a microcontroller system. Students will use an assembler, a C compiler and either VHDL or Verilog to fully test their project. Laboratory techniques include oscilloscopes, logic analyzers, protocol analyzers and programmers for EPROMs, FLASH and microcontrollers. One lecture per week and one three-hour laboratory per week.

CPE 190. Senior Design Project I.**2 Units****Prerequisite(s):** CPE 142, CPE 166, CPE 186, CPE 187, EEE 108**Term Typically Offered:** Fall, Spring

Centers on developing hardware and software project planning and engineering design skills. Emphasis is placed on design philosophies, problem definition, project planning and budgeting, written and oral communication skills, working with others in a team arrangement, development of specifications and effective utilization of available resources. Lecture one hour per week, laboratory three hours per week.

CPE 191. Senior Design Project II.**2 Units****Prerequisite(s):** CPE 190, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).**Term Typically Offered:** Fall, Spring

Continuation of CPE 190. Students are expected to continue the project started by design teams in CPE 190. The hardware will be completed, tested and redesigned if necessary. At the same time, software for the project will be finished and debugged. The final results of the team project will be presented to the CPE faculty and students at a prearranged seminar. Lecture one hour, laboratory three hours.

CPE 195. Fieldwork in Computer Engineering.**1 - 15 Units****Prerequisite(s):** Petition approval by Program Coordinator.**Term Typically Offered:** Fall, Spring

Directed observations and work experience in computer engineering with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies. Faculty approval required.

Note: May be repeated for credit.

Credit/No Credit

CPE 195A. Professional Practice.**1 - 12 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 195B. Professional Practice.**1 - 12 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 195C. Professional Practice.**1 - 12 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Supervised employment in a professional engineering or computer science environment. Placement arranged through the College of Engineering and Computer Science. Requires satisfactory completion of the work assignment and a written report.

Credit/No Credit

CPE 199. Special Problems.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

Note: Open only to those students who appear competent to carry on individual work. Admission to this course requires approval of the faculty member under whom the individual work is to be conducted, in addition to the approval of the advisor. May be repeated for credit.

CPE 201. Research Methodology.**1 Unit****Prerequisite(s):** Fully classified graduate status.**Term Typically Offered:** Fall, Spring

Research methodology, problem formulation and problem solving. Collective and individual study of selective issues and problems relating to fields of study in the Computer Engineering Graduate Program. Orientation to the requirements for Master's Thesis or Project in Computer Engineering.
Credit/No Credit

CPE 273. Hierarchical Digital Design Methodology.**3 Units****Prerequisite(s):** CSC 205, EEE 285 or their equivalents.**Term Typically Offered:** Fall, Spring

Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process', and design with Application Specific Integrated Circuits (ASICs) and programmable logic.

CPE 274. Advanced Timing Analysis.**3 Units****Prerequisite(s):** EEE 273, CSC 273, CPE 273 or instructor permission.**Term Typically Offered:** Fall, Spring

Timing analysis of Application Specific Integrated Circuit (ASIC) designs: Topics include ASIC design methodology, static timing analysis, timing design constraints, design reports, clock timing issues, timing exceptions, operating conditions, hierarchical analysis, analyzing designs with asynchronous logic, performance measurement and power issues. Cross-listed: EEE 274; only one may be counted for credit.

CPE 280. Advanced Computer Architecture.**3 Units****Prerequisite(s):** CSC 205, fully classified graduate status.**Term Typically Offered:** Fall, Spring

Introduction to parallel architecture covering computer classification schemes, fine and course grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.

CPE 296T. Digital Speech Processing.**3 Units****Prerequisite(s):** EEE 181 or instructor permission.**Term Typically Offered:** Fall, Spring

The objective of this course is to cover the digital processing of speech signals. Topics include speech production and perception, speech processing in the time frequency domains. Short-time energy and Short-time Fourier analysis, homomorphic and linear predictive coding methods. Also covered are speech coding, basic introduction of text-to-speech synthesis and speech recognition.
Cross listed: EEE 296T.

CPE 299. Special Problems.**1 - 3 Units****Prerequisite(s):** Instructor permission.**Term Typically Offered:** Fall, Spring

Open to qualified students who wish to pursue problems of their own choice. Projects must have approval and supervision of a faculty advisor.

CPE 500. Culminating Experience.**5 Units****Prerequisite(s):** Advanced to candidacy and graduate coordinator's permission.**Term Typically Offered:** Fall, Spring

Completion of a thesis or project approved for the master's degree.
Note: May be repeated for credit.

Computer Science (CSC)

CSC 1. Introduction to Computer Science.**3 Units****Prerequisite(s):** Intermediate algebra.**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Fundamental concepts of computers, computation and programming; history and principles of computing; problem solving; input, output; data representation, storage, and file organization; computer hardware, networking and data communication; social, economic and ethical implications; computer security and privacy. Students will solve problems using a programming language. Lecture, two hours; technical activity and laboratory, two hours.

CSC 1A. Introduction to Computer Science for Advanced Students.**3 Units****Term Typically Offered:** Fall, Spring

Same material as covered in CSC 1 but intended for students who already have significant knowledge of the fundamental concepts of computers and/or computer programming. Students must attend the orientation session during the first class meeting. Two placement tests, one on programming and one on concepts, will be scheduled and used to determine student's prior preparation.

Note: May be taken by those wishing to obtain credit by examination. Please refer to examination credit guidelines in the University catalog. Not open to students who have received credit for CSC 1 or MIS 5.

Credit/No Credit

CSC 5. Personal Computing.**3 Units****Term Typically Offered:** Fall, Spring

Introduction to the role and use of personal computers, emphasizing the use and relevancy of common software for word processing, database, spreadsheet analysis, graphics, and communications. Examination of the personal computing milieu and the applications environment. Lecture two hours, technical activity and laboratory two hours.

CSC 8. Introduction to Internet Technologies.**3 Units****Prerequisite(s):** Basic computer literacy recommended.**Term Typically Offered:** Summer only

Internet applications such as email, instant messaging, file transfer, secure communications, the web, and related tools and protocols. Basics of the web-publishing process and methods used to locate authoritative information on the internet. Webpage design, internet security and emerging technologies on the internet.

- CSC 8S. Self-Paced Introduction to Internet Technologies. 3 Units**
Prerequisite(s): Basic computer literacy recommended.
Term Typically Offered: Fall, Spring
- Covers the same material as CSC 8, Introduction to Internet Technologies. Provided by electronic means in addition to meetings for orientation, laboratory demonstrations, and tests. Internet applications such as Email, instant messaging, file transfer, secure communications, the Web, and related tools and protocols. Basics of the Web-publishing process and methods used to locate authoritative information on the Internet. Webpage design, Internet security and emerging/declining technologies on the Internet.
 Credit/No Credit
- CSC 10. Introduction to Programming Logic. 3 Units**
Prerequisite(s): Math 11 or equivalent
General Education Area/Graduation Requirement: Further Studies in Area B (B5)
Term Typically Offered: Fall, Spring
- Introduction to computer science with an emphasis on programming concepts and methodology. Intended to assist students with little or no programming experience to understand the basic principles of programming logic. Topics include computer hardware and software, problem solving and algorithm development, flow of control, modular design using techniques that can be applied to common programming languages. Lecture two hours, technical activity and laboratory two hours.
- CSC 10A. Accelerated Introduction to Programming Logic. 3 Units**
Term Typically Offered: Fall, Spring
- Introduction to computer science with an emphasis on programming concepts, logic, and methodology: computer hardware and software, problem solving and algorithm development, flow of control, and modular design. Accelerated and more in-depth study of programming concepts than CSC 10. Intended for computer science and computer engineering majors who have little or no programming experience. Lecture two hours, technical activity and laboratory, two hours. Not open to students who have received credit for CSC 10. Prerequisite: Math 11
- CSC 15. Programming Concepts and Methodology I. 3 Units**
Prerequisite(s): CSC 10, or programming experience in a high-level programming language.
Term Typically Offered: Fall, Spring, Summer
- Programming concepts using an object-oriented programming language. Introduction to methodologies for program design, development, testing, and documentation. Topics include program design, algorithm design, number systems, classes and objects, methods (functions), control structures, arrays, and interactive input/output. Lecture two hours, technical activity and laboratory two hours.
- CSC 15W. Programming Methodology I Workshop. 1 Unit**
Corequisite(s): CSC 15.
Term Typically Offered: Fall, Spring, Summer
- Designed to assist students in developing a more thorough understanding of programming methodology and problem solving techniques. Activity two hours.
 Credit/No Credit
- CSC 20. Programming Concepts and Methodology II. 3 Units**
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring
- Application of object-oriented techniques for systematic problem analysis and specification, design, coding, testing, and documentation. Semester-long project approach emphasizing larger programs. Managing program complexity using abstraction. Introduction to algorithm analysis and Big-O notation. Advanced language features. Basic sorting and searching algorithms. Recursion. Lecture two hours, technical activity and laboratory two hours.
- CSC 21. First Year Seminar: Becoming an Educated Person. 3 Units**
General Education Area/Graduation Requirement: Understanding Personal Development (E)
Term Typically Offered: Fall only
- Introduction to the nature and possible meanings of higher education, and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Development of information competence and computer literacy. Students interact with fellow students and the seminar leader to build a community of academic and personal support.
- CSC 22. Visual Programming in BASIC. 3 Units**
Prerequisite(s): Intermediate Algebra.
Term Typically Offered: Fall, Spring
- Computer Programming using Visual Basic. Topics include the Visual Basic Integrated Development Environment, visual user interface development, concepts of object-oriented programming, variables, control structures, arrays, functions, subroutines, strings, files, and database access. Applications will be created in areas such as business, games, and multimedia. Lecture two hours, technical activity and laboratory two hours.
- CSC 25. Introduction to C Programming. 3 Units**
Term Typically Offered: Fall only
- Topics include: types, operators, control structures, input/output, arithmetic operations, the C library and preprocessor, functions and parameters, arrays, strings, pointers, and structures. Program design and style will be emphasized. Students will use a compiler.
Note: Students with significant programming experience should take CSC 60 rather than CSC 25. Lecture two hours, technical activity and laboratory two hours.
- CSC 28. Discrete Structures for Computer Science. 3 Units**
Prerequisite(s): MATH 26A or MATH 29; and CSC 20; CSC 20 may be taken concurrently.
Term Typically Offered: Fall, Spring
- Introduction to the essential discrete structures used in Computer Science, with emphasis on their applications. Topics include: counting methods, elementary formal logic and set theory, recursive programming, digital logic and combinational circuits, real number representation, regular expressions, finite automata.

- CSC 35. Introduction to Computer Architecture.** 3 Units
Prerequisite(s): CSC 15.
Term Typically Offered: Fall, Spring
- Internal representation of numeric and non-numeric data, assembly level machine architecture, addressing modes, subroutine linkage, polled input/output, interrupts, high-level language interfacing, macros and pseudo operations. Lecture two hours, technical activity and laboratory two hours.
- CSC 60. Introduction to Systems Programming in UNIX.** 3 Units
Prerequisite(s): CSC 20, CSC 35.
Term Typically Offered: Fall, Spring
- Features of the C language commonly used in systems programming, application to systems programming in a UNIX environment. Topics include C preprocessor macros, I/O, bit-manipulation facilities, timesharing system concepts, file permissions, shell script programming, make files and source code control, basic system calls like fork and exec, pointers and dynamic memory allocation, libraries and relocation and linking concepts including assembler handling of symbol tables. Prior knowledge of a C like programming language is presumed.
- CSC 80. Web Development with HTML/XHTML and Tools.** 3 Units
Prerequisite(s): CSC 8 or equivalent computer and Internet experience.
Term Typically Offered: Fall, Spring
- Hands-on course covering the processes and guidelines for creating and customizing interactive webpages. Emphasis on use of HTML/XHTML, CSS, and tools to create webpages. HTML/XHTML syntax to create, format, and link documents. Use of tables, graphics, styles, forms, multimedia, and other features in webpages. Effective webpage design and website organization. Lecture two hours and technical activity and laboratory two hours.
- CSC 114. Digital Evidence and Computer Crime.** 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Fall, Spring
- Topics include technology and law, computer basics for digital investigations, network basics for digital investigations, investigation of computer crime, and the handling of digital evidence.
- CSC 115. Internet Security.** 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only
- Internet security problems and discussion of potential solutions: network vulnerabilities and attacks, secure communication and use of cryptography, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and use of software tools for network security.
- CSC 116. Cyber Forensics.** 3 Units
Prerequisite(s): CSC 1 and CSC 8 or CSC 8S or CSC 80; or instructor permission.
Term Typically Offered: Summer only
- Fundamentals of computer forensics and cyber-crime scene analysis including laws, regulations, and international standards; formal methodology for conducting security incident investigations; categories of electronic evidence. Projects involving digital forensic tools.
- CSC 120. Web Server Administration.** 3 Units
Prerequisite(s): CSC 80.
Term Typically Offered: Fall, Spring
- Managing and maintaining Web servers. Administering open source and commercial Web servers, Web hosting alternatives, professional standards and practices of website hosting, Web server installation, configuration, management, and security. Selecting and using technologies to support professional quality websites. Lecture two hours; technical activity and laboratory two hours.
- CSC 121. Client-Side Web Programming.** 3 Units
Prerequisite(s): CSC 22, CSC 80 or equivalents; OR PCSC/CSC Major, CSC 60, CSC 130.
Term Typically Offered: Fall, Spring
- Client-side Web programming using JavaScript, DHTML, and client-side Web technologies. Event-driven programming, dynamic data types, control structures, and introduction to object-oriented programming and program design. Use of cookies and built-in objects. Validation and processing of forms. Basic features of the Document Object Model.
- CSC 122. Web Database Applications.** 3 Units
Prerequisite(s): CSC 10 or CSC 22; and CSC 80 or equivalent.
Term Typically Offered: Fall, Spring
- Fundamentals of building effective database-driven web applications. Particular emphasis on database access via web interfaces. Introduction to database management systems, their structure and usage, SQL, integrating web applications with databases, design and implementation of dynamic web database applications.
- CSC 123. Web Application Development.** 3 Units
Prerequisite(s): CSC 22, CSC 121, CSC 122, or equivalent experience; OR PCSC/CSC Major, CSC 60, CSC 134.
Term Typically Offered: Fall, Spring
- Developing multi-tiered enterprise-level Web applications. Standards of Web services and other current Web technologies, including XML, AJAX, and server-side programming such as Java EE, .NET, or PHP. Development of Web applications such as those used for e-commerce, e-business, and content management. Format consists of two 1.5 hour lecture/lab sessions per week.
- CSC 126. 3D Computer Modeling.** 3 Units
Prerequisite(s): CSC 10 or ART 97 or equivalent.
Term Typically Offered: Fall only
- Techniques and processes to create 3D computer models and environments. Exercises, assignments and projects designed to build skill levels with 3D computer modeling tools. Demonstrations and workshops in the use of 3D computer modeling software. Critiques, discussion and presentations to develop students' conceptual grasp of 3D computer modeling and virtual reality environments. Example applications in art/new media and computer gaming.
Note: May be taken twice for credit. Cross-listed as ART 142.

CSC 127. 3D Computer Animation.**3 Units****Prerequisite(s):** ART 142 or CSC 126.**Term Typically Offered:** Spring only

Creative skills and techniques for animating 3D computer-modeled objects/environments. Topics include animation techniques; keyframing and interpolation; deformation and morphing; path control; skeletal animation; model rigging and skinning; forward and inverse kinematics, constraints and IK solvers; particle systems; fluid, cloth, hair, and fur simulation; shape keys; and soft body animation. Emphasis on both skill development and creative application of modeling and animation techniques. Includes demos, in class and homework exercises, and self directed projects.

Cross-listed: ART 143.

CSC 130. Data Structures and Algorithm Analysis.**3 Units****Prerequisite(s):** CSC 20, CSC 28; CSC 28 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Specification, implementation, and manipulation of complex data structures: linear/lists, stacks, queues, trees, sets, and graphs. Design and analysis of algorithms. Recursion and stack-based memory management. Advanced searching and sorting. NP-completeness.

CSC 131. Computer Software Engineering.**3 Units****Prerequisite(s):** CSC 130; may be taken concurrently.**Term Typically Offered:** Fall, Spring

Principles of Software Engineering covering the software development life cycle, including software requirements engineering (elicitation, modeling, analysis and specification), software design, software implementation and testing. Main topics include various software development process models, method and techniques for specifying requirements, architectural and detailed design specification, prototyping, top-down and bottom-up software implementation and testing. Topics also include project management, project documentation and the development of communication skills through written documentation and oral presentation.

CSC 132. Computing Theory.**3 Units****Prerequisite(s):** CSC 28, CSC 130; CSC 130 may be taken concurrently.**Term Typically Offered:** Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; language recognition and generation; language hierarchy; deterministic and non-deterministic automata; regular expressions; pushdown automata and context-free grammars; properties of regular and context-free languages; Turing machines; computable and noncomputable functions; decidability.

CSC 133. Object-Oriented Computer Graphics Programming.**3 Units****Prerequisite(s):** CSC 130, CSC 131.**Term Typically Offered:** Fall, Spring

Introduction to computer graphics and advanced topics in object-oriented (OO) programming. The OO paradigm is used throughout, utilizing computer graphics as the vehicle for solidifying basic OO concepts, studying the implementation of event-driven systems, and for developing a thorough understanding of advanced OO concepts such as inheritance and polymorphism. Topics include fundamental concepts of object-oriented programming, software design patterns, graphic devices, line and surface drawing, simple 2D and 3D representation, and use of User Interface components.

CSC 134. Database Management Systems.**3 Units****Prerequisite(s):** CSC 130.**Term Typically Offered:** Fall, Spring

Entity-Relationship (ER) model; relational model; relational database design by ER-to-relational mapping; design of applications using database technology; SQL; schema definition, constraints, and queries; relational algebra; data normalization; access methods such as indexing and hash structures; introduction to transaction processing.

CSC 135. Computing Theory and Programming Languages.**3 Units****Prerequisite(s):** CSC 28, CSC 35, CSC 130.**General Education Area/Graduation Requirement:** Further Studies in Area B (B5)**Term Typically Offered:** Fall, Spring

Introduction to computing theory with examples and applications. Automata and formal languages; regular expressions; deterministic and non-deterministic finite automata; pumping lemma for regular languages; push-down automata and context-free grammars; language recognition; parsing techniques including recursive descent; Turing machines; computable and non-computable functions. Design and implementation of selected features of programming languages. Functional and logic programming paradigms.

CSC 136. Programming Languages.**3 Units****Prerequisite(s):** CSC 35, CSC 132.**Term Typically Offered:** Fall, Spring

Evolution and characteristics of programming languages. Scripting, procedural, object-oriented, functional and logic paradigms. Language specification; interpreters and compilers; virtual machines; parsing techniques. Design and implementation of selected features of programming languages. Programming languages used in the development of intelligent systems, with introduction to Artificial Intelligence. Trends in programming languages.

CSC 137. Computer Organization.**3 Units****Prerequisite(s):** CSC 28, CSC 35, CSC 130**Term Typically Offered:** Fall, Spring

Introduction to computer organization and architecture. Combinational devices, sequential and synchronized circuits, memory organization, CPU architecture and organization, bus structures, input/output, interrupts, DMA, memory hierarchy, introduction to instruction level parallelism, multithreading, and multiprocessing. Exposure to hardware security issues.

CSC 138. Computer Networks and Internets.**3 Units****Prerequisite(s):** CSC 35, CSC 60, CSC 130.**Term Typically Offered:** Fall, Spring

Overview of the fundamentals of computer networks and connections between networks, from the physical layer up through peer-to-peer communications at the application level. Lower layer characteristics including serial vs. parallel, capacity issues, high-speed connections, LAN framing and error handling. LAN vs. WAN characteristics, network architecture and the ISO network model. Internetworking components including LANs, repeaters, routers, bridges, and gateways. Internet addresses, TCP/IP, and the Domain Name System. Common Internet client/server application protocols including SMTP and FTP. Client/Server programming involving sockets. World Wide Web characteristics including CGI and HTTP protocol, Web pages, Web browsers, Web servers, and Applets. Introduction to advanced Web issues such as Web security, search engine operations, and Web database operations.
Cross Listed: CPE 138; only one may be counted for credit.

CSC 139. Operating System Principles.**3 Units****Prerequisite(s):** CSC 60 and CSC 130, and either CSC 137 or CPE 185**Term Typically Offered:** Fall, Spring

Concepts, principles, fundamental issues, organization and structure of contemporary operating systems. Topics include processes, threads, concurrency, scheduling, inter-process communication and synchronization, deadlock, real and virtual memory management, device management, file systems, network and distributed operating systems, security, and protection.

CSC 140. Advanced Algorithm Design and Analysis.**3 Units****Prerequisite(s):** CSC 130.**Term Typically Offered:** Spring only

Algorithm design using dynamic programming, randomization and greedy methods. Analysis using recurrence relations and amortization. String and network-flow algorithms. NP-completeness, reductions, and approximation algorithms. Review of divide-and-conquer design and asymptotic notation.

CSC 142. Advanced Computer Organization.**3 Units****Prerequisite(s):** CSC 137 or CPE 166 and CPE 185.**Term Typically Offered:** Fall, Spring

Design and performance issues of computers. Instruction set architecture, computer arithmetic, processor design, survey of contemporary architectures, interfacing I/O devices, hierarchical memory design and analysis, parallelism and multiprocessing, distributed systems, techniques for enhancing performance, and an introduction to EDA tools for design and verification of computers. Design and simulation of a microcomputer in an HDL.

Note: Open to students with full CSC or CPE major standing only. Cross Listed: CPE 142; only one may be counted for credit.

CSC 148. Modeling and Experimental Design.**3 Units****Prerequisite(s):** MATH 26B or MATH 31, STAT 50 or ENGR 115, and proficiency in a programming language.**Term Typically Offered:** Not offered

Modeling and simulation techniques; Monte Carlo methods; queuing theory; model formulation, data collection and analysis, experimental design; model verification and validation.

CSC 151. Compiler Construction.**3 Units****Prerequisite(s):** CSC 135**Term Typically Offered:** Fall only

Practical approach to compiler design and implementation. Organization of a compiler, algorithms for lexical, syntactic and semantic analysis, recursive descent and/or LALR parsing, organization of symbol tables, error detection and recovery, object code generation. Modular design will be emphasized.

CSC 152. Cryptography.**3 Units****Prerequisite(s):** CSC 60, CSC 130; and STAT 50 or ENGR 115**Term Typically Offered:** Fall only

Introduction to design and analysis of cryptographic systems. Symmetric cryptography: Block ciphers and secure hash functions. Asymmetric cryptography: Key exchange and public-key systems. Authentication and encryption in an adversarial model. Simple cryptanalysis. Protocol design and analysis.

CSC 153. Computer Forensics Principles and Practices.**3 Units****Prerequisite(s):** CSC 138 or CPE 138.**Term Typically Offered:** Spring only

Fundamentals of computer forensics, cyber-crime scene analysis and electronic discovery. Technical and formal methodology for conducting security incident investigations; file systems and storage analysis, data hiding techniques, network forensics; projects involving using, understanding, and designing digital forensics tools; anti-forensics; legal issues and standards.

CSC 154. Computer System Attacks and Countermeasures.**3 Units****Prerequisite(s):** CSC 138 or CPE 138.**Term Typically Offered:** Fall only

Introduction to network and computer security with a focus on how intruders gain access to systems, how they escalate privileges, and what steps can be taken to secure a system against such attacks. Topics include: Perimeter defenses, intrusion detection systems, social engineering, distributed denial of service attacks, buffer overflows, race conditions, trojans, and viruses.

CSC 155. Advanced Computer Graphics.**3 Units****Prerequisite(s):** CSC 133.**Term Typically Offered:** Fall only

Modeling, viewing, and rendering techniques in 3D computer graphics systems. Topics include modeling systems and data structures; polygonal and parametric surface representation; transformations, windowing, clipping and projections in 3D; hidden surface removal algorithms; techniques for realism such as shading, shadows, highlights, and texture; fractals and procedural models; introduction to animation; hardware support for computer graphics; and the application of graphics principles to virtual reality systems and 3D games.

CSC 159. Operating System Pragmatics.**3 Units****Prerequisite(s):** CSC 139.**Term Typically Offered:** Fall, Spring

Application of operating system principles to the design and implementation of a multitasking operating system. Students will write an operating system for a computer platform. Topics include: scheduling of processes, control and allocation of computer resources, and user interfacing.

Cross Listed: CPE 159; only one may be counted for credit.

CSC 163. Parallel Programming with GPUs. 3 Units

Prerequisite(s): CSC 60, CSC 130, CSC 137; and either MATH 30 or MATH 26A.

Term Typically Offered: Fall, Spring

Parallel programming with emphasis on developing GPU computing applications. Topics include the GPU architecture and programming model, mapping computations to parallel hardware, parallel computation patterns, parallel programming optimization techniques, and application case studies.

CSC 165. Computer Game Architecture and Implementation. 3 Units

Prerequisite(s): CSC 130; CSC 133; MATH 26A or MATH 30; PHYS 5A or PHYS 11A.

Term Typically Offered: Spring only

Architecture and implementation of computer game systems. Topics include game engine architecture; screen management and rendering control; geometric models; algorithms and data structures for spatial partitioning, occlusion, and collision detection; real-time interactive 3D graphics and animation techniques; behavioral control for autonomous characters; simulation of physical phenomena; sound and music in games; optimization techniques; multi-player games and networking; game development tools and environments. Substantial programming and project work.

CSC 170. Software Requirements and Specification. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – odd years

Analysis and specification of functional and non-functional requirements for real-time and non-real-time software systems in the context of a software development lifecycle. Determining customer and user software requirements and ensuring that specifications are correct, complete, and testable. Includes modeling techniques, methods for representing real-time requirements, and the use of Computer-Aided Software Engineering (CASE) tools to illustrate analysis concepts.

CSC 171. Software Engineering Project Management. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – even years

Fundamental issues in the management and economics of a software engineering project in the context of the software development lifecycle. Topics include: techniques for project planning (budgeting and scheduling), controlling (including quality assurance and configuration management), organizing, staffing, and directing a software project (leadership and motivation); and contemporary issues in management.

CSC 174. Advanced Database Management Systems. 3 Units

Prerequisite(s): CSC 131, CSC 134.

Term Typically Offered: Fall only

Enhanced Entity-Relationship (EER) modeling; relational database design based on EER; SQL views; integrity constraints and triggers; stored procedures and functions; database programming techniques; query processing and optimization; transactions concurrency and recovery techniques; relational decomposition and normalization algorithms; database schema and data security.

CSC 176. Database Architecture and Optimization. 3 Units

Prerequisite(s): CSC 174.

Term Typically Offered: Spring only

Advanced object-relational systems, advanced catalog systems, security mechanisms, distributed database processing, advanced schema design-partitioning, introduction to data warehousing and data mining, materialized views, Internet technologies, parallel query processing, system utilities, database tuning, DBA tools and techniques.

CSC 177. Data Warehousing and Data Mining. 3 Units

Prerequisite(s): CSC 134 and STAT 50 or ENGR 115.

Term Typically Offered: Spring only

Data warehousing involves data preprocessing, data integration, and providing on-line analytical processing (OLAP) tools for the interactive analysis of multidimensional data, which facilitates effective data mining. Data mining is the automated extraction of hidden predictive information from databases. Data mining applies concepts and techniques from the fields of databases, machine learning, algorithms, information retrieval, and statistics. Topics include: data warehousing, association analysis, classification, clustering, numeric prediction, and selected advanced data mining topics.

CSC 179. Software Testing and Quality Assurance. 3 Units

Prerequisite(s): CSC 131.

Term Typically Offered: Spring only – even years

Testing, verification, validation, and control of real-time and non-real-time software systems in the context of a software development lifecycle. Topics include: unit, integration and system testing; verification and validation (V&V), quality assurance, metrics, and configuration management.

CSC 180. Intelligent Systems. 3 Units

Prerequisite(s): MATH 26B or MATH 31; STAT 50 or ENGR 115; CSC 130 and CSC 135.

Term Typically Offered: Spring only

Theory and implementation of a variety of techniques used to simulate intelligent behavior. Expert systems, fuzzy logic, neural networks, evolutionary computation, and two-player game-tree search will be covered in depth. Knowledge representation, pattern recognition, hybrid approaches, and handling uncertainty will also be discussed.

CSC 190. Senior Project: Part I. 2 Units

Prerequisite(s): Senior status, completion of CSC 130, CSC 131 and four additional 3-unit CSC upper-division courses that fulfill the major requirements (excluding CSC 192-195, 198, 199), and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).

Term Typically Offered: Fall, Spring

First of a two-course sequence in which student teams undertake a project to develop and deliver a software product. Approved project sponsors must be from industry, government, a non-profit organization, or other area. Teams apply software engineering principles in the preparation of a software proposal, a project management plan and a software requirements specification. All technical work is published using guidelines modeled after IEEE documentation standards. Oral and written reports are required. Lecture one hour, laboratory three hours.

CSC 191. Senior Project-Part II. 2 Units Prerequisite(s): CSC 190. Term Typically Offered: Fall, Spring	CSC 195B. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring
<p>Continuation of the group project begun in CSC 190. Teams apply software engineering principles to the design, implementation and testing of their software product. All technical work is published using guidelines modeled after IEEE documentation standards along with an appropriate user manual. Oral and written reports are required. Senior project is completed with the successful delivery, installation and demonstration of the software along with all approved documentation. Lecture one hour, laboratory three hours.</p>	<p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center. Note: Requires satisfactory completion of the work assignment and a written report.</p> <p>Credit/No Credit</p>
CSC 192. Career Planning. 1 Unit Prerequisite(s): CSC 130 and three additional upper-division courses that fulfill major requirements with a C- grade or better (excluding CSC 190-195, CSC 198, and CSC 199). Term Typically Offered: Fall, Spring	CSC 196P. Cloud and Mobile Computing Pragmatics. 3 Units Prerequisite(s): CSC 134, CSC 138, and CSC 139 Introduction to cloud computing. Cloud services. Deployment options. The installation, configuration, and deployment of a cloud infrastructure based upon industrial standards. Step-by-step cloud setup as well as the development of scripts for automated deployment. The installation, building, deployment, testing, and provisioning of a multi-tier cloud based mobile application as a cloud service.
<p>Designed to help students learn more about the labor market and opportunities in the Computer Science field. Students will examine their interests, consider their goals, and learn how to conduct an effective proactive job search. Strategies for long term career growth will be identified.</p> <p>Credit/No Credit</p>	CSC 196V. Data Visualization. 3 Units Prerequisite(s): CSC 130, CSC 134, and STAT 50 or ENGR 115. Term Typically Offered: Fall, Spring
CSC 194. Computer Science Seminar. 1 Unit Prerequisite(s): Upper division or graduate status in CSC. Term Typically Offered: Spring only	<p>Design principles and concepts for visualizing data; current visualization systems and languages, exploratory data analysis, interaction techniques, high-dimensional data, network visualization, and text visualization.</p>
<p>Series of weekly seminars on Computer Science topics. These topics cover subjects not normally taught in the course of a school year and they range from the very theoretical in Computer Science through applications to presentations by industry on working conditions, real world environment and job opportunities.</p> <p>Note: May be repeated for credit.</p>	CSC 198. Co-Curricular Activities in Computer Science. 1 - 3 Units Term Typically Offered: Fall, Spring <p>Students will serve in leadership roles in computer science activities, provide tutoring or technical assistance in labs, assist instructors in grading coursework, or assist in other activities related to the subject matter and concerns of the department.</p> <p>Credit/No Credit</p>
CSC 195. Fieldwork in Computer Science. 1 - 4 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring	CSC 199. Special Problems. 1 - 3 Units Term Typically Offered: Fall, Spring
<p>Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.</p> <p>Note: Faculty approval required. May be repeated for credit.</p> <p>Credit/No Credit</p>	<p>Individual projects or directed reading in specified topics in computer science.</p> <p>Note: Open only to students who appear competent to carry on individual work; approval of faculty supervisor and advisor required. May be repeated for credit.</p> <p>Credit/No Credit</p>
CSC 195A. Professional Practice. 1 - 12 Units Prerequisite(s): Instructor permission. Term Typically Offered: Fall, Spring	CSC 201. Programming Language Principles. 3 Units Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering. Term Typically Offered: Fall, Spring
<p>Supervised employment in a professional engineering or computer science environment. Placement arranged through the Career Center. Note: Requires satisfactory completion of the work assignment and a written report.</p> <p>Credit/No Credit</p>	<p>Notations for the specification of programming language syntax and semantics; attribute, translational, operational, axiomatic, algebraic, denotational, and action semantics. Applications of programming language syntax and programming language semantics. Use of meta languages to generate executable language definitions for language implementation, program transformation, program property analysis, and rapid software prototyping. Principles of logic, functional, and object-oriented programming languages.</p>

CSC 204. Data Models for Database Management Systems. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Database management system (DBMS) architecture; database file organizations and access methods; the relational model and relational algebra; SQL query language; introduction to query optimization; concurrent transaction processing and backup and recovery; applications using embedded SQL, object types, and stored procedures; database analysis and design notations: EER, UML, and XML; web database environments; database security and administration throughout course.

Note: Not intended for students who have completed CSC 174.

CSC 205. Computer Systems Structure. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.

Term Typically Offered: Fall, Spring

Overview of computer systems organization and design. Concepts of instruction set architecture, interactions of hardware-software interface, principles of performance analysis, processor design, instruction level parallelism, survey of contemporary architectures, hierarchical memory design and analysis, interfacing I/O devices, parallel processing and multiprocessing, and introduction to EDA tools and methodologies for computer systems design and verification.

CSC 206. Algorithms And Paradigms. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Design and analysis of algorithms. Classical design paradigms including greedy, divide-and-conquer, dynamic programming, and backtracking algorithmic methods. Alternative paradigms of computing including parallel and numerical approaches. Theoretical limits of computation. Selected additional topics such as genetic, approximation, and probabilistic algorithms.

CSC 209. Research Methodology. 1 Unit

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering, completion of at least 12 units of 200-level courses in Computer Science, and (GWAR Certification before Fall 09, or WPJ score of 70+, or at least a C- in ENGL 109M or ENGL 109W).

Term Typically Offered: Fall, Spring

Research methodology, problem formulation, and problem solving. Orientation to the requirements for Master's Thesis or Project. Presentations on various research topics.
Credit/No Credit

CSC 212. Bioinformatics: Data Integration and Algorithms. 3 Units

Prerequisite(s): CSC 130, STAT 50, and graduate status; BIO 10 recommended.

Term Typically Offered: Fall, Spring

The application of information technology and computer science to biological problems, in particular to biomedical science issues involving genetic sequences. Algorithms and their applications to DNA sequencing and protein database search; tools and techniques for data integration to transform genetic sequencing data into comprehensible information to study biological processes.

CSC 214. Knowledge-Based Systems. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Historical perspective of knowledge-based systems and their relationship to artificial intelligence. Concepts of knowledge representation and automated reasoning. Survey of expert systems in a variety of applications in engineering and other fields. Implementation of expert systems and expert system shells.

CSC 215. Artificial Intelligence. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.

Term Typically Offered: Fall, Spring

Nature of intelligence and possibility of its realization on digital computers via algorithmic and heuristic programming methods. Knowledge representation. Search procedures. Problem-solving paradigms and simulation of cognitive processes. Machine learning. Natural language understanding, expert systems, and knowledge engineering. Image understanding. Future of artificial intelligence and limits of machine intelligence.

CSC 219. Machine Learning. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering or Computer Engineering.

Term Typically Offered: Fall, Spring

Introduction to major paradigms and methods of machine learning. Inductive learning, explanation-based learning, classifier systems and genetic algorithms, analogical reasoning, case-based learning, connectionist learning, data driven approaches to empirical discovery, and basis of learning theory. Focus is on representative systems that have been built.

CSC 230. Software System Engineering. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.

Term Typically Offered: Fall, Spring

Integration of managerial and technical activities in system engineering that control the cost, schedule, and technical achievement of the developing software system. Application of the principles, activities, tasks and procedures of system engineering and software engineering to the development of a software system.

CSC 231. Software Engineering Metrics. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Software quality and quantity metrics in software engineering. Measurement theory and metrics. Metrics include management metrics, indirect and direct metrics and predictive metrics. Uses of metrics include software cost and schedule estimates, model calibration, and software productivity measurements. Metrics techniques include the Goal-Question-Metric approach, COCOMO, and function point analysis.

CSC 232. Software Requirements Analysis and Design. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Software engineering requirements including elicitation, analysis, specification, verification and management. Emphasizes IEEE software engineering requirements and standards and the concept of operations (ConOps) document. Techniques include structured analysis, use cases and object-oriented analysis.

CSC 233. Advanced Software Engineering Project Management. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Advanced methods and procedures for managing a software development project. Includes project planning, scheduling, and cost estimation, project organizational types, staffing and training considerations, leading and motivating computer personnel, and methods for measuring and controlling a project. Emphasizes IEEE software engineering management standards and keys to project success.

CSC 234. Software Verification and Validation. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering; or Computer Engineering and CSC 131.

Term Typically Offered: Fall, Spring

Verification and validation (V & V) techniques to identify and resolve software problems and high-risk issues early in the software lifecycle. Application of V & V to all phases of the lifecycle process. Includes planning and reporting on the V & V effort. Topics also include software quality assurance and software testing.

CSC 235. Software Architecture. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Software architecture styles. Concepts and activities for software architecture design. Notations, models, and specification languages for software architecture design. Engineering discipline and guidance for software architecture design. Techniques, methods, tools for designing, building, analyzing, and evaluating software architecture. Object-oriented approach for software architecture design. Architecture-based software development. Management of software architecture design. Reuse of software architecture design.

CSC 236. Formal Methods in Secure Software Engineering. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Basic concepts of formal methods in secure software engineering; formal methods based software development models and methodologies; formal methods for software system specification, modeling, analysis, verification, information assurance and security; systems and tools for the application of formal methods in secure software engineering; advances of formal methods in secure software engineering.

CSC 237. Microprocessor Systems Architecture. 3 Units

Prerequisite(s): CSC 205.

Term Typically Offered: Fall, Spring

Microprocessor/microcomputer architecture and hardware/software interfacing design. RISC v. CISC architecture in-depth, case studies of several popular commercial advanced 32-bit microprocessors. Microcomputer firmware architecture is discussed and illustrated with detailed examples. Term project in which students specify, design and build the hardware and firmware of a computer system.

CSC 238. Human-Computer Interface Design. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Issues involved in design of interaction between people and computers. Insight and experience in key issues of HCI design. Emphasis on identifying issues and tradeoffs in interaction design. Development and evaluation of alternative solutions to design problems.

CSC 239. Advanced Operating Systems Principles and Design. 3 Units

Prerequisite(s): CSC 205.

Term Typically Offered: Fall, Spring

Advanced concepts of concurrent processes, concurrent programming and operating systems. Virtual memory management systems, deadlock, file systems, operating system performance measurement and evaluation.

CSC 242. Computer-Aided Systems Design and Verification. 3 Units

Prerequisite(s): CSC 205 or CSC/EEE 273.

Term Typically Offered: Fall, Spring

Design and verification methodology using hardware description and verification languages (HDLs). Advances in IC chip design; introduction to HDLs such as System Verilog; HDVL language basics including data types, arrays, structures, unions, procedural blocks, tasks, functions, and interface concepts; design hierarchy; verification planning and productivity; verification infrastructure; guidelines for efficient verification of large designs; assertion-based verification; comprehensive computer-related design projects.

CSC 244. Database System Design. 3 Units

Prerequisite(s): CSC 174 or CSC 204.

Term Typically Offered: Fall, Spring

Topics in the design and implementation of database management systems. Database system concepts and architectures; query compiler, query processing algorithms, logical and physical query plans, query optimization; recovery, concurrency control; transaction management in centralized database management systems and distributed database management systems. Also exploration of current research directions, issues, and results related to databases and data management.

CSC 245. Performance Modeling and Evaluation. 3 Units

Prerequisite(s): Fully classified graduate status in Computer Science or Software Engineering.

Term Typically Offered: Fall, Spring

Performance and cost measures; software and hardware performance monitors; data reduction and evaluation; analytic and simulation models of hardware and program behavior; performance-cost trade-offs and resource allocation.

- CSC 250. Computer Security.** **3 Units**
Prerequisite(s): Fully classified graduate standing in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
- Principles and technologies behind computer security. Introduction to encryption and decryption; security mechanisms in computer programs, operating systems, databases, and networks; administration of computer security, and legal and ethical issues.
- CSC 251. Principles of Compiler Design.** **3 Units**
Prerequisite(s): CSC 151 or CSC 201.
Term Typically Offered: Fall, Spring
- Programming language translation, lexical analysis, syntax analysis including LR, LALR, and predictive techniques. Semantic analysis including semantic specification. Code generation and optimization including control and data flow analysis. Storage management. Error detection and recovery.
- CSC 252. Cryptography Theory and Practice.** **3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
- Introduction to design and analysis of cryptographic systems. Symmetric cryptography: block ciphers and secure hash functions. Asymmetric cryptography: key exchange and public-key systems. Authentication and encryption in an adversarial model. Simple cryptanalysis. Protocol design and analysis.
- CSC 253. Computer Forensics.** **3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
- Structured security incident investigations internal and external; emphasis on analysis of electronic evidence and proper audit; utilization of scientific aids in obtaining information from computing devices; legal electronic evidence.
- CSC 254. Network Security.** **3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Computer Engineering, or Software Engineering.
Term Typically Offered: Fall, Spring
- In-depth study of network security problems and discussion of potential solutions. Topics include: network vulnerabilities and attacks, secure communication, Internet security protocols and tools to defend against network attacks, network intrusion detection, and wireless network security. Survey and demonstration of software tools used for network security.
- CSC 255. Computer Networks.** **3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or a Computer Engineering.
Term Typically Offered: Fall, Spring
- Computer networking fundamentals with emphasis on higher level protocols and functions. Network design considerations, software design and layering concepts, interface design, routing and congestion control algorithms, internetworking, transport protocol design, and end-to-end communication, session and application protocols. Specific examples of commercial and international standards.
- CSC 258. Distributed Systems.** **3 Units**
Prerequisite(s): CSC 204 and fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring
- Distributed system architectures, distributed object model, component-based design, time and global states, coordination and agreement, distributed transactions and concurrency control, replication, security, distributed multimedia systems, message passing and distributed shared memory, Web services and Service-Oriented Architecture (SOA), Grid computing. Emphasis on scalability, manageability, security, and dependability of distributed systems.
- CSC 273. Hierarchical Digital Design Methodology.** **3 Units**
Prerequisite(s): CSC 205, CPE 64, or equivalent.
Term Typically Offered: Fall, Spring
- Advanced logic modeling, simulation, and synthesis techniques. Topics include modeling, simulation, and synthesis techniques, using Hardware Description Language (HDL's), Register Transfer Level (RTL) representation, high-level functional partitioning, functional verification and testing, computer-aided logic synthesis, logical verification and testing, timing and delay analysis, automated place and route process, and design with Application Specific Integrated Circuits (ASICs) and programmable logic.
 Cross Listed: EEE 273; only one may be counted for credit.
- CSC 275. Advanced Data Communication Systems.** **3 Units**
Prerequisite(s): Fully classified graduate status in Computer Science, Software Engineering, or Computer Engineering.
Term Typically Offered: Fall, Spring
- Fundamental concepts, principles and issues of data communication systems. The ISO/OSI reference model is used as a vehicle for discussion and emphasizes the lower layer of the model. Specific topics include: motivation and objectives, layered architectures, physical layer principles and protocols, data link and medium access control principles and protocols, circuit, packet and cell switching, local area network design principles and performance comparisons, high speed networking, introduction to wide area network architectures. Typical examples and standards are cited for point-to-point, satellite, packet radio and local area networks.
- CSC 280. Advanced Computer Architecture.** **3 Units**
Prerequisite(s): CSC 205 and fully classified graduate status in Computer Science or Software Engineering.
Term Typically Offered: Fall, Spring
- Introduction to parallel architecture covering computer classification schemes, fine and coarse grain parallelism, processor interconnections, and performance issues of multiprocessor systems. Includes parallel and pipelined instruction execution, structure of multiprocessor systems, memory hierarchy and coherency in shared memory systems, programming issues of multiprocessor systems, arithmetic pipeline design, and design for testability.
 Cross Listed: EEE 280; only one may be counted for credit.
- CSC 288. Special Topics in Computer Science - Software Engineering.** **3 Units**
Term Typically Offered: Fall, Spring
- Contemporary topics in computer science will be offered as needed. Topics offered:

CSC 295. Fieldwork. 1 - 3 Units Term Typically Offered: Fall, Spring	CM 20. Construction Materials and Processes. 3 Units Prerequisite(s): CM 10, ENGL 1A; CM 10 may be taken concurrently. Term Typically Offered: Spring only
<p>Directed observations and work experience in computer science with firms in the industry or public agencies. Supervision is provided by the instructional staff and the cooperating agencies.</p> <p>Note: Faculty approval required. May be repeated for credit.</p>	<p>Introduction to construction materials; to their properties in-place in completed projects, and to their characteristics that affect construction processes. The organizations, methods, equipment and safety considerations that are common to projects of all types and to all segments of the industry. Field trips. Lecture two hours; laboratory three hours.</p> <p>Field trip(s) may be required.</p>
Credit/No Credit CSC 299. Special Problems. 1 - 3 Units Term Typically Offered: Fall, Spring	CM 21. Construction Graphics. 3 Units Prerequisite(s): ENGL 1A and CM 10; CM 10 may be taken concurrently. Term Typically Offered: Fall only
<p>Any properly qualified student who wishes to pursue a problem of his own choice may do so if the proposed subject is acceptable to the member of the staff with whom he/she works and to his/her advisor.</p> <p>Note: May be repeated for credit.</p>	<p>Instruction and exercises in graphic techniques and procedures applicable to construction. Analysis of drawings in the civil, architectural, structural, mechanical, and electrical fields and how drawings affect construction planning. Freehand sketching. Isometric and oblique projections. Material quantity surveying. Lecture two hours; laboratory three hours.</p>
Credit/No Credit CSC 500. Master's Thesis. 1 - 5 Units Prerequisite(s): CSC 209; advanced to candidacy. Term Typically Offered: Fall, Spring	CM 22. Construction Documents. 3 Units Prerequisite(s): ENGL 1A, CM 20, and CM 21; CM 20 may be taken concurrently. Term Typically Offered: Spring only
<p>Completion of a thesis approved for the Master's degree.</p> <p>Note: May be repeated for credit.</p>	<p>Analyzes construction contract documents. Technical and legal interpretations and implications to managers of the construction process. Quantity surveying. Lecture two hours; laboratory three hours.</p>
CSC 502. Master's Project. 1 - 2 Units Prerequisite(s): CSC 209; advanced to candidacy. Term Typically Offered: Fall, Spring	CM 30. Engineering Mechanics--Statics. 3 Units Prerequisite(s): MATH 26A or MATH 30; and PSYC 5A or PSYC 11A. Term Typically Offered: Spring only
<p>Completion of a project approved for the Master's degree.</p>	<p>Introduction to the solution of engineering design problems. Concepts of units, vectors, equilibrium, forces, force systems, shear and moment diagrams. Lecture three hours.</p>
<h2 style="text-align: center;">Construction Management (CM)</h2>	
CM 9. Construction Surveying and Layout. 3 Units Prerequisite(s): CM 10, CM 20, CM 21 and either Math 26A or MATH 30 ; CM 21 and Math 26A or MATH 30 may be taken concurrently. Corequisite(s): CM 21. Term Typically Offered: Fall, Spring	CM 40. Properties of Construction Materials. 3 Units Prerequisite(s): PHYS 5A. Term Typically Offered: Fall only
<p>Geomatics and the principles of surveying measurements for distance, direction, and elevation. Special emphasis on the application of surveying skills relevant to the field of construction, including building, bridge, and sitework layout techniques and procedures, establishment of reference line and grade, topographic mapping, and earthwork computations. Lecture two hours. Laboratory 3 hours.</p>	<p>Study of the engineering performance characteristics of materials. Covers testing concepts and procedures. Includes basic properties of metals, aggregates, cements, concrete, timber, asphalt, masonry and plastics with emphasis on construction applications. Lecture two hours; laboratory three hours.</p>
CM 10. The Construction Industry. 1 Unit Term Typically Offered: Fall, Spring	CM 110. Legal Aspects of Construction. 3 Units Prerequisite(s): Senior class standing, MGMT 101, CM 22. Corequisite(s): CM 126 Term Typically Offered: Fall only
<p>Introduction to the Construction Management program and the many facets of the construction industry and to the various career opportunities. The unique products of construction, the organizations involved, and the people that make it happen. Guest speakers. Lecture one hour.</p> <p>Credit/No Credit</p>	<p>Application of advanced legal concepts to the construction process. Analyzes problems relating to contract formation, administration, and interpretation. Includes bidding and contract enforcement; litigation of disputes vs. arbitration; liability for negligence, warranty, and strict liability; safety; license law requirements; mechanics' liens and stop notices; bond rights and obligations. Lecture three hours.</p>
CM 15. Fundamentals of Construction Management. 3 Units Prerequisite(s): CM 10. CM 10 may be taken concurrently. Term Typically Offered: Fall, Spring	
<p>Introduction to the Construction Management program and industry. Critical reading, thinking and writing for the construction profession. Introduction to visualization and graphic communication using both manual and computer assisted techniques. Introduction to quantitative software commonly used in the construction industry.</p>	

- CM 111. Construction Labor Relations.** 3 Units
Term Typically Offered: Spring only
 Study of federal and state labor law; labor unions, and their importance in the construction industry; and an analysis of the growth of open-shop construction. Employment law. Lecture three hours.
- CM 120. Construction Operations and Methods Analysis.** 3 Units
Prerequisite(s): CM 22.
Corequisite(s): CM 121.
Term Typically Offered: Fall only
 Introduction to the analysis and management of construction projects in terms of the work that must be performed in the construction process. Analyzes operations and methods using concepts and techniques, including video, that are applicable to all types of projects in all segments of the industry, variables affecting productivity. Safety as an integral part of project and operations management. Field trips. Lecture two hours; laboratory three hours.
 Field trip(s) may be required.
- CM 121. Fundamentals of Construction Estimating.** 3 Units
Prerequisite(s): CM 22.
Corequisite(s): CM 120.
Term Typically Offered: Fall only
 Study of the basic approaches to estimating the cost of construction projects from a managerial viewpoint. Types of estimates and methods; elements of cost, variables and costing concepts; analysis procedures for detailed estimates. Lecture two hours; laboratory three hours.
- CM 124. Engineering Construction.** 3 Units
Prerequisite(s): CM 125, CM 135.
Term Typically Offered: Fall only
 Study of engineering construction projects with emphasis on equipment-paced operations including safety aspects. Engineering fundamentals and other factors that affect equipment selection and production. Amplification of recording and analysis techniques. Unit price contracts. Field trips. Lecture two hours; laboratory three hours.
 Field trip(s) may be required.
- CM 125. Advanced Estimating and Bidding.** 3 Units
Prerequisite(s): CM 120, CM 121.
Term Typically Offered: Spring only
 Study of the concepts and practices involved in the total estimating and bidding process in construction, from initial project selection to submission of final bids. Covers considerations in project selection, sub-bid analysis, contingency and risk analysis, pricing concepts, bidding models, and an introduction to computer applications. A complete project estimate and bid is prepared by each student. Lecture two hours; laboratory three hours.
- CM 126. Construction Project Management.** 3 Units
Prerequisite(s): CM 125, CM 127.
Corequisite(s): CM 110.
Term Typically Offered: Fall only
 Introduction to the study of Project Management as it is used on the larger construction project. Students study how construction contractors manage cost, time, scope, and quality. The theory of Project Management is developed and compared to management of the on-going business enterprise. Matrix and functional organizations are examined within the context of the industrial, commercial and heavy contract construction industries using the principles of the management process. Lecture three hours.
- CM 127. Planning, Scheduling and Control.** 3 Units
Prerequisite(s): CM 121.
Term Typically Offered: Spring only
 Study of the concepts used in planning and controlling construction projects. Arrow, PERT, precedence, and linear scheduling methods; resource leveling; time-cost analysis; bar charts; and time-scaled diagrams. Manual procedures followed by computer applications. Lecture three hours.
- CM 129. Senior Project.** 3 Units
Prerequisite(s): CM 110, CM 111, CM 124, CM 126, HROB 101.
Term Typically Offered: Spring only
 Consideration of technical, legal, business and human factors (including safety) in applying the functional approach to the management of construction organizations, projects, and operations. The individual construction professional in a competitive industry: personal and professional development, ethics, stress, physical and mental health. The industry and the construction professional in relation to the social and physical environments. Lecture three hours.
- CM 130. Structures I -- Design Principles and Structural Steel Design.** 3 Units
Prerequisite(s): CM 30, CM 40; CM 40 may be taken concurrently.
Term Typically Offered: Fall only
 Introduction to structural design. Consideration of load conditions, stresses, strain, beam deflection and column action. Basic design of structural steel members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Lecture three hours.
- CM 135. Soils and Foundations.** 3 Units
Prerequisite(s): CM 130.
Term Typically Offered: Spring only
 Study of the properties and behaviors of soils used as materials in construction. Index and physical properties of soils including compaction; permeability, compressibility, and shear strength. Methods of laboratory and field tests. Principles of foundation design, pavements, embankments and temporary soil support systems for trenches and cuts. Lecture two hours; laboratory three hours.
- CM 136. Principles of Mechanical and Electrical Engineering.** 3 Units
Prerequisite(s): PHYS 5B, CM 30.
Term Typically Offered: Fall only
 Basic principles of thermodynamics with application to heating, ventilating and air conditioning systems. Introduction to electrical circuits and circuit analysis with construction applications. Lecture three hours.

CM 140. Structures II -- Timber and Formwork Design. 3 Units**Prerequisite(s):** CM 130.**Term Typically Offered:** Spring only

Basic design of structural timber members with emphasis on systems used in practical situations. Beams, trusses, and columns are designed using the Uniform Building Code as a reference and the results are shown on detailed drawings and sketches. Application of engineering principles to satisfy construction requirements that are not designed or shown in typical construction documents. Includes analysis and design of concrete form systems, shoring, and falsework, and construction dewatering. Lecture three hours.

CM 150. Structures III -- Reinforced Concrete and Reinforced Masonry. 3 Units**Prerequisite(s):** CM 130.**Term Typically Offered:** Fall only

Basic design concepts of reinforced concrete and reinforced masonry design. Topics and examples include design of beams, slabs, columns and walls. Students are required to demonstrate drafting ability. Assignments include design and drawings of various structural systems. Lecture three hours.

CM 199. Special Problems. 1 - 3 Units**Term Typically Offered:** Fall, Spring

Individual projects or directed reading.

Note: Open only to students competent to carry on individual work. Admission to this course requires approval of an instructor and the program coordinator.

Credit/No Credit

Criminal Justice (CRJ)

CRJ 1. Introduction to Criminal Justice and Society. 3 Units**General Education Area/Graduation Requirement:** GE AREA D**Term Typically Offered:** Fall, Spring

Reviews the problem of crime and the societal response to criminals. Institutions discussed are those intended to discover the crime and the criminal and those designed to deal with the criminal, the victim, and society, once the criminal has been labeled. Finally, the bureaucracy of crime and its measurement as a social phenomenon are discussed.

CRJ 2. Law of Crimes. 3 Units**Term Typically Offered:** Fall, Spring

Introduction to the case method of studying criminal law. Understanding and correlating the common law crimes and substantive law crimes. Study and emphasis on the classification and nature of crimes, the requisite elements of the major common law felonies and criminal responsibility of various persons involved in crime.

CRJ 4. General Investigative Techniques. 3 Units**Term Typically Offered:** Fall, Spring

Techniques involved in the investigation of crimes; interview of victims and witnesses; questioning of suspects; organization and procedure in the investigation of crimes; crime scene searches; surveillance; use of scientific aids; and sources of information.

CRJ 5. The Community and the Justice System. 3 Units**Term Typically Offered:** Fall, Spring

Examines complex, dynamic relationships between communities and the justice system in addressing crime and conflict with emphasis on the challenges and prospects of administering justice within a diverse, multicultural population and the roles played by race, ethnicity, gender, religion, sexual orientation, age, social class, culture, and justice professionals in shaping relationships within the justice system. Special topics include crime prevention, restorative justice, and conflict resolution and pure justice.

CRJ 21. First Year Seminar: Becoming an Educated Person. 3 Units**General Education Area/Graduation Requirement:** Understanding Personal Development (E)**Term Typically Offered:** Fall, Spring

Introduction to the nature and possible meanings of higher education and the functions and resources of the University. Designed to help students develop and exercise fundamental academic success strategies and to improve their basic learning skills. Also provide students with an opportunity to interact with fellow students and the seminar leader and to build a community of academic and personal support.

CRJ 101. Introduction to Criminal Justice Research Methods. 3 Units**Prerequisite(s):** Restricted to Criminal Justice majors**Term Typically Offered:** Fall, Spring

Introduction to research methodologies used in the social sciences, with a special emphasis on those methods most often used in the study of crime and criminal behavior, police/court systems, and correctional institutions, policies, and programs. Students will acquire the knowledge and skills necessary to understand, critically analyze and assess descriptive and quantitative research studies. Topics include the roles of theory and ethics in research, hypothesis testing, and research design.

CRJ 102. Crime And Punishment. 3 Units**Prerequisite(s):** Criminal Justice major**Term Typically Offered:** Fall, Spring

This course provides an overview of the causes, consequences and responses to crime in society, with special emphasis on the use of theory and research to guide criminal justice policy and practice. The course surveys major theories of crime causation, examines consequences of crime on individuals and societies, and explores various perspectives on the appropriate role of criminal sanctions and offender treatment in modern day systems of justice.

CRJ 105. Delinquency, Prevention and Control. 3 Units**Prerequisite(s):** CRJ 101 and CRJ 102; restricted to declared majors or chair permission.**Term Typically Offered:** Fall only

Comprehensive juvenile delinquency planning process and its contribution to effective delinquency prevention and control; new roles for delinquency control agencies (police, courts, and corrections); the Youth Service Bureau; innovative strategies in delinquency prevention programming.

- CRJ 106. Analysis of Career Criminals. 3 Units**
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring
- Observation and analysis of criminal career patterns using the following approaches: anthropological, autobiographical, psychological, psychiatric, and sociological. The examination of career criminal behavior patterns will focus upon: the process of induction into criminal activity; the deviant orientation of the professional criminal; the organization, life style, and activities of the specialized criminal; and the methodological problems associated with the measurement of recidivism.
- CRJ 108. Domestic Crime and Violence. 3 Units**
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall, Spring
- Detailed examination of the multiple causes, effects and dynamics of crime against children, spouses, domestic partners and the dependent elderly, the response of criminal justice agencies to these crimes and the impact of these crimes on their victims.
- CRJ 109. Media, Crime, and Criminal Justice. 3 Units**
Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared majors or chair permission.
Term Typically Offered: Fall only
- Analyzes the social construction of crime by news and entertainment media and introduces criminal justice students to the manner in which the media influences and shapes crime in their own society and in the criminal justice system. Analyzes images of crime and the criminal justice system that are presented through the major mass media within America, including a detailed analysis of media institutions, American pop culture, and the construction of crime and justice. Exposes students to a new way of looking at crime problems and provide them with a deeper understanding of how crime and the criminal justice system are both socially constructed by the news and entertainment media.
- CRJ 111. Women and the Criminal Justice System. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall only
- Survey of the roles of women as offenders, victims and employees in the criminal justice system. Examines statistics, research and the literature as it relates to female crime. Evaluates current patterns and practices of law enforcement, criminal courts and corrections relative to women as offenders, victims, and employees.
- CRJ 112. Gangs and Threat Groups in America. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examination of criminal organizations in America. The problems posed by "anti-social groups," their structure and their history in contemporary American society. The spectrum of social sciences is employed in an examination of "illegal groups" and such issues as aggression and group dynamics. Styles such as street gangs, prison gangs and traditional organized crime are defined and studied.
- CRJ 114. Sexual Offenses and Offenders. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Exploration of relevant factors and dimensions of sexual offenses and offenders related to the Criminal Justice system, its cliental and practitioners.
- CRJ 115. Violence and Terrorism. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Systemically examines political violence, responses by government institutions to that violence and implications of both for the administration of justice. Content is structured along a continuum, ranging from small scale violence to mass violence - assassinations, terrorism by sub-national and transnational organizations, state terror and genocide. In recent years political violence has progressively drawn the American governmental institutions, particularly justice agencies, into the global picture of violence committed by both domestic and international terrorists.
- CRJ 116. Restorative Justice and Conflict Resolution. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Examines concepts, principles, techniques of conflict resolution and restorative justice in contemporary US legal system, global peacebuilding, across cultures, and comparative justice practices. The centerpiece is a classroom simulation that introduces students to theoretic analysis and practical knowledge on resolution of conflicts and crime. Addresses nonviolent responses to inter/intra state and community conflicts. Topics include negotiation, mediation, victim offender reconciliation, alternative dispute resolution (ADR), circle sentencing, transitional justice, peace treaty, transformative justice, intergroup dialogues, etc.
- CRJ 117. American Criminal Justice and Minority Groups. 3 Units**
General Education Area/Graduation Requirement: Race & Ethnicity Graduation Requirement (RE), GE AREA D
Term Typically Offered: Fall, Spring
- Course examines the origins of racial/ethnic/gender/sex discrimination and disparities in the US justice system. Additionally, course provides a critical examination of the processes and outcomes of the justice system by reviewing the major theories of crime and number of minorities reported in crime data. Using discussions about various criminal justice policies and their impact on minority groups, the course assesses the changing dynamic of race relations and diversity in society and their influences on justice administration.
- CRJ 118. Drug Abuse and Criminal Behavior. 3 Units**
General Education Area/Graduation Requirement: GE AREA D
Term Typically Offered: Fall, Spring
- Sociogenic review of the case histories and life styles of selected juvenile and adult offenders with a history of drug abuse. An inquiry into the drug scene, "street" drugs, an examination of people who have abused drugs and have been guilty of delinquent or criminal acts for the purpose of determining the known and identified relationships between drug abuse and crime, and probing the many unknown relationships. A sustained and disciplined examination of the main issues and problems by the use of case studies, discussion groups, and student involvement.

CRJ 121. The Structure and Function of the American Courts. 3 Units**Prerequisite(s):** declared majors or minors or chair permission.**Term Typically Offered:** Fall, Spring

Overview of the Federal and State court structures including jurisdiction, venue, roles of court participants, due process and post arrest procedures employed in adjudication, trial process, appellate review. Constitutional issues such as discretion, indigent rights, right to counsel, discovery, pleas, bail and preventive detention, competency, evidence suppression, double jeopardy, and speedy trial will also be addressed.

CRJ 123. Law of Arrest, Search and Seizure. 3 Units**Prerequisite(s):** Restricted to declared majors or minors or department chair permission.**Term Typically Offered:** Fall, Spring

Current and recent developments relating to arrest, searches, and seizures; study of constitutional rights predominately associated with the Fourth, Fifth, Sixth and Fourteenth Amendments as related to criminal justice and its administration – warrants, warrantless seizures, exclusionary rule, confession, eye-witness identification, electronic surveillance, entrapment, and state variance with federal rules. Case study method law course.

CRJ 125. Law of Responsibility. 3 Units**Prerequisite(s):** Restricted to declared majors or chair permission.**Term Typically Offered:** Spring only

Substantive criminal law of responsibility and culpability. Topics include legal cause, mens rea, negligence, intent and its equivalents, motive, immaturity, mental incapacitates, mistake, and affirmative defenses including authority and privilege as found in American statute and case law. A case method law course.

CRJ 126. Law of Evidence. 3 Units**Prerequisite(s):** CRJ 121 and CRJ 123; restricted to declared majors or chair permission.**Term Typically Offered:** Fall only

Law of evidence as codified and its complimentary interpretations by the courts. Topics include the admission and exclusion of evidence, relevance, the hearsay rule and its exceptions, the use of writings and demonstrative evidence, judicial notice, order of proof and presumptions, and issues relating to witness competency and privileges. Constitutional exclusions and their impacts are not covered.

CRJ 127. Juvenile Law. 3 Units**Prerequisite(s):** CRJ 102 and CRJ 121; restricted to CRJ majors or chair permission.**Term Typically Offered:** Fall, Spring

Overview of legal concepts and principles affecting the adjudication of delinquent children in juvenile and adult court systems, develops the ability to read and analyze difficult legal issues relating to juvenile law, and provides the information required to evaluate the effectiveness of the juvenile court system in the context of its stated rehabilitative goals and the potential impact of a shift in focus to a more retribution-oriented structure.

CRJ 128. Administrative Law for Public Safety Personnel. 3 Units**Prerequisite(s):** CRJ 121 and CRJ 123; restricted to CRJ majors or chair permission**Term Typically Offered:** Spring only

Administrative law is the study of the adjudicatory and law making processes that take place within administrative agencies of the executive branches of government. Further, it is a study of the legal relationship between those agencies and the legislature, the courts, and private parties. Particular attention will be paid to the Federal Administrative Procedures Act, and the California Administrative Procedure Act.

CRJ 130. Fundamentals of Corrections. 3 Units**Prerequisite(s):** Restricted to declared CRJ majors or minors or department chair permission.**Term Typically Offered:** Fall, Spring

Overview and critical analysis of contemporary correctional theory and practice. Comparison of mainline American corrections with historical, cross-cultural, philosophical and non-traditional views of corrections. Controversial issues in contemporary corrections, including prisoner rights, victimization, the death penalty, unions, institutional corrections, community corrections, future of corrections, correctional careers, and administration and staffing of correctional programs.

CRJ 131. Correctional Institutions. 3 Units**Prerequisite(s):** CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission**Term Typically Offered:** Fall, Spring

Role and function of the correctional institution in the administration of criminal justice. A review of institutional procedures: reception, classification, program assignment, mass custody, treatment programs, and release, including parole and discharge. The inmate social system and its relationship to the official world that contains it. The following topics will receive special attention: the determinate sentence; the confinement of repetitively violent offenders; the death penalty and its impact on prison management, inmate social services; prison reform; and the stresses experienced by institutional personnel.

CRJ 134. Community Based Corrections. 3 Units**Prerequisite(s):** CRJ 101, CRJ 102 and CRJ 130; restricted to declared majors or chair permission.**Term Typically Offered:** Fall only

Role of local and state government in the development of community-based correctional programs; regional detention facilities; recent trends in jail organization and management; ex-offenders and employment; the impact of community corrections on the criminal justice system.

CRJ 136. Corrections Administration. 3 Units**Prerequisite(s):** CRJ 101, CRJ 130 and CRJ 160; restricted to declared majors or chair permission.**Term Typically Offered:** Fall, Spring

Concepts of administration; corrections as a component of criminal justice; organization and management of correctional services and correctional institutions for delinquent youth and adult offenders; probation and parole; and the legal and political contexts of corrections.

CRJ 141. Police and Society.**3 Units****Prerequisite(s):** Restricted to declared CRJ majors or minors or department chair permission**Term Typically Offered:** Fall, Spring

Examination of the origins, philosophy, objectives and priorities of the police service in the U.S. A holistic analysis of political, social, economic, legal and other factors impacting the relationship between the police and the society they serve. Police use of discretion, police roles, police and minority groups, police and protest groups, police brutality, and police ethics are also studied.

CRJ 142. Police Administration.**3 Units****Prerequisite(s):** CRJ 101, CRJ 141 and CRJ 160; restricted to declared majors or chair permission.**Term Typically Offered:** Fall only

Concepts of organization and management; relationships between police agencies and the public, other criminal justice agencies, and other agencies of government; organization for delivery of police services: first response, crime investigation, youth services, vice, communications, and information management.

CRJ 144. Contemporary Issues in Police Administration.**3 Units****Prerequisite(s):** CRJ 101 and CRJ 141; restricted to declared CRJ majors or chair permission.**Term Typically Offered:** Fall, Spring

Roles of police in a democratic society; analysis of public disobedience to law; racial and ethnic group relationships with police; public, official, and police corruption; police discretion; professionalism; development of criminal intelligence.

CRJ 151. White Collar Crime.**3 Units****Prerequisite(s):** Junior/Senior status, Criminal Justice or Fire Service Management major or chair permission**Term Typically Offered:** Fall, Spring

Introduces students to a variety of white collar crime issues, including definitional complexities, the causes, frequency and impact of economic crime, and victim and offender profiles. Governmental corruption, organizational fraud, consumer and environmental offenses, anti-trust violations and international schemes will be covered. Students will also become familiar with methods used to investigate, prosecute and sentence white collar offenders. Policy considerations will be discussed for controlling national and international white collar crime.

CRJ 152. Interviewing and Detection of Deception.**3 Units****Prerequisite(s):** CRJ 102; restricted to declared CRJ majors or chair permission.**Term Typically Offered:** Fall, Spring

Principles and techniques of interviewing and detection of deception studied from communication, physiological and psycho-social points of view. Introduction to the use of the polygraph; laws pertaining to confessions and admissions.

CRJ 153. Advanced Criminal Investigation.**3 Units****Prerequisite(s):** CRJ 102; restricted to declared CRJ majors or declared Forensic minor or have chair permission.**Term Typically Offered:** Fall, Spring

Principles involved in the investigation of crimes; utilization of scientific aids in obtaining information from physical objects; concepts in obtaining information from and about people; concept of reconstruction of crime and profile of suspect; development of leads; investigative problems in major crimes; special problems in crime investigation.

CRJ 154. Introduction to Physical Evidence.**3 Units****Prerequisite(s):** CRJ 102; restricted to declared CRJ majors or Forensic Investigation minor or chair permission.**Term Typically Offered:** Fall, Spring

Provides an overview of the role of science in collecting and evaluating physical evidence as a component of the criminal investigation and legal processes. Various operations in the examination and interpretation of physical evidence are examined with emphasis on the role of science in supporting the investigator and in the litigation process. Suitable for both science and non-science majors.

CRJ 156. Introduction to Crime and Intelligence Analysis.**3 Units****Prerequisite(s):** CRJ 101; must be a declared CRJ major or have chair permission.**Term Typically Offered:** Fall, Spring

Introduction to crime and intelligence analysis with a special emphasis on those methods most often used in the study of crime and criminal behavior patterns. Students will acquire the knowledge and skills necessary toward understanding crime analysis, intelligence analysis and mapping geospatial data. Topics include theory, the history of crime analysis, crime analysis technologies, intelligence analysis, and types/functions of crime analysis.

CRJ 160. Justice and Public Safety Administration.**3 Units****Prerequisite(s):** restricted to declared CRJ majors or minors or department chair permission.**Term Typically Offered:** Fall, Spring

Examines the nature and development of public safety and criminal justice organizations in American society with attention to how the unique functions performed by these agencies has shaped and developed their nature. Particular emphasis is placed on understanding the unique problems generated by administration of bureaucratic, public agencies in a highly politicized environment. Examines the influence of social and political factors on justice and public safety organizations.

CRJ 162. Intergovernmental Relations, Finance and Budgeting for Public Safety Personnel.**3 Units****Prerequisite(s):** CRJ 160 or PPA 100; Junior or Senior standing; must be a Criminal Justice or Fire Service Management Major.**Term Typically Offered:** Fall only

An examination of the structure, organization and management of state and local government with particular attention to the interplay between governmental agencies that is focused on the operations and management of public safety agencies. Government leadership models, such as mayor and city manager will be examined. Finance, the state and local budgets, taxation, revenue and spending will be addressed.

CRJ 163. Leadership in Criminal Justice and Public Safety. 3 Units

Prerequisite(s): CRJ 160; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Addresses role of leadership in shaping and directing complex justice and public safety organizations. Leadership styles, roles, communication, group dynamics and organizational culture are examined and applied to organizational maintenance, adaptation, and change. Also addresses the role of employee organizations and personal practices in shaping leadership options and styles in public agencies. Particular attention is focused on implementing leadership in the bureaucratic and public agencies typical to the fields of criminal justice and public safety administration.

CRJ 165. Planning for Justice and Public Safety. 3 Units

Prerequisite(s): CRJ 101, CRJ 102 and CRJ 160; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Spring only

Addresses planning in complex justice and public safety organizations. Focuses on the role of planning in preparing for change, maximizing utilization of resources and addressing crime and public safety. Emphasis is placed on the use of planning to unify fragmented public agencies at multiple levels of government in preparing for disaster, controlling crime, and assuring public safety.

CRJ 166. Personnel Administration in Criminal Justice and Public Safety Organizations. 3 Units

Prerequisite(s): CRJ 160; declared CRJ major or chair permission

Term Typically Offered: Fall, Spring

This course provides an understanding of history, theories, laws, and practices related to contemporary as well as future criminal justice/public safety personnel administration and practice.

CRJ 167. Collective Bargaining and Arbitration Issues in Public Safety. 3 Units

Prerequisite(s): Must be a declared CRJ major or chair permission.

Term Typically Offered: Fall, Spring

This course is designed to provide the public safety student and/or criminal justice student, practitioner and/or administrator with an understanding of public safety personnel practices in the area of collective bargaining. Labor-management relations, dispute resolution, arbitration, and the various laws that govern labor-management relations, at all levels of government, will be covered.

CRJ 168. Justice and Public Safety Information Systems. 3 Units

Prerequisite(s): Restricted to declared majors or chair permission.

Term Typically Offered: Fall, Spring

Introduction to criminal justice and public safety information systems. Provides a framework for understanding the needs, types, capabilities and applications of information systems to the field. Current uses are surveyed and future potential applications are examined.

CRJ 169. Emergency Management. 3 Units

Prerequisite(s): CRJ 164; Criminal Justice or Fire Service Management major, or instructor permission.

Term Typically Offered: Fall, Spring

Course reviews the history of emergency management, the current systems in place to manage mitigation, preparedness, response and recovery and the coordination and communication required to do so. Diverse responses to various emergencies will be presented with detailed examination of the roles of various levels of government and integration required. The formal declaration of emergencies and federal aid procedures, agencies involved and their administration will be covered.

CRJ 170. Human Trafficking and Slavery. 3 Units

Prerequisite(s): Junior/Senior level and CRJ majors only; or department chair permission.

Term Typically Offered: Fall, Spring

The course explores the international and domestic legal framework that defines human trafficking and slavery and analyzes the major theories and current research on related causes and risk factors. The role of involvement of transnational organized criminal groups and vulnerability of social groups are discussed. Lastly, the course provides a critical analysis of effective strategies in victim identification, protection, prosecution, and prevention as instrumental components in assessment of crime control policy.

CRJ 172. Comparative Criminal Justice Systems. 3 Units

Prerequisite(s): Junior status; restricted to declared CRJ majors or chair permission

Term Typically Offered: Fall, Spring

Examines representative criminal justice systems from a variety of nations with emphasis on the role of history, culture, social and political values and economic institutions in shaping institutions of justice including law, police, courts, corrections, and juvenile justice systems and practice. Attention is paid to conflict and cooperation between criminal justice systems and ideologies that occur when peoples of different cultures and systems are in close proximity.

CRJ 174. Criminal Justice Systems of the Future. 3 Units

Term Typically Offered: Fall, Spring

Societal structures, definitions of deviance and criminal behavior, social problems related to criminality, the nature of systems for handling criminals and sanctions in future societies.

CRJ 176. Security Systems. 3 Units

Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

Purposes, functions and historical development of industrial security in the U.S. Co-responsibilities of security personnel and line supervisors; principles of physical security, document protection, pilferage prevention and employee programs for plant and inventory protection. Survey of related laws and cooperating agencies of government.

CRJ 181. Topics in Criminal Justice. 3 Units

Prerequisite(s): CRJ 100 and CRJ 110; must be a CRJ major.

Term Typically Offered: Fall, Spring

Topics of interest to criminal justice students and faculty will be offered as the need arises.

Note: May be repeated provided the topic is different.

CRJ 190. Contemporary Issues in Criminal Justice. ✍ 3 Units

Prerequisite(s): CRJ 101, CRJ 102, CRJ 121, CRJ 123, CRJ 130, CRJ 141, CRJ 160; restricted to declared CRJ majors or chair permission with senior status, and GWAR certification before Fall 09; or WPJ score of 80+; or 3-unit placement in ENGL 109M or ENGL 109W; or 4-unit placement in ENGL 109M or ENGL 109W and co-enrollment in ENGL 109X; or WPJ score 70 or 71 and co-enrollment in ENGL 109X.

General Education Area/Graduation Requirement: Writing Intensive Graduation Requirement (WI)

Term Typically Offered: Fall, Spring

Examination of current issues in criminal justice with an emphasis on the application of law, management, practice and ethics to analysis of contemporary criminal justice policy. The culminating event for criminal justice majors with an emphasis upon written and oral communication, research and analytical thinking.

CRJ 191. Topics in Criminal Justice Administration. 3 Units

Prerequisite(s): CRJ 101 and CRJ 102; restricted to declared CRJ majors or chair permission.

Term Typically Offered: Fall, Spring

CRJ 195. Internship. 1 - 6 Units

Prerequisite(s): Restricted to declared majors or chair permission and senior status

Term Typically Offered: Fall, Spring

Supervised work and experience in justice or public safety related agencies designed to expand the student's understanding of techniques, procedures and problems that occur in these agencies. Supervision provided by both faculty and agency personnel.

Note: may be repeated for credit

Credit/No Credit

CRJ 196. Experimental Offerings in Criminal Justice. 2 - 4 Units

Prerequisite(s): Restricted to declared majors and minors or instructor permission.

Term Typically Offered: Fall, Spring

To be offered in the various fields of Criminal Justice in response to student needs.

CRJ 196A. The Mentally Ill Individual in the Criminal Justice System. 3 Units

Term Typically Offered: Fall, Spring

Overview and analysis of how mentally ill individuals interface with the criminal justice system, from first contacts with the police, to their entry into the jails, courts, and prisons, and then reentry into the community via parole and probation. The history of how the mentally ill became so embedded in the criminal justice system, whether mental illness has become criminalized, evidence-based mental health programs, and treatment for this population will be covered.

CRJ 196B. Law of Homeland Security and Emergency Management. 3 Units

Term Typically Offered: Fall, Spring

Current and historical developments relating to the laws surrounding homeland security and emergency management. Topics include the legal framework for the U.S. domestic preparedness and national incident management system, the role of the military in emergency response and homeland security, and the legal jurisdiction and authority of federal, state, and local public safety, as well as private sector institutions, in terrorism prevention and response. Course utilizes cases, statutes, executive orders, government reports, and scholarly research.

CRJ 196S. Ethics and the Criminal Justice System. 3 Units

Prerequisite(s): CRJ Majors or department chair permission

Term Typically Offered: Fall, Spring

Purpose of course is to learn various ethical considerations within the criminal justice system. Course will briefly explore the classical, philosophical foundations of ethics and proceed into surveying modern, ethical decision-making among the various criminal justice components. Criminal justice system ethics and decision-making of the police, prosecution, courts, corrections, and probation/parole from a managerial standpoint and a line perspective will be examined and critiqued. Emphasis will be placed on viable, practical solutions to ethical conundrums.

CRJ 198. Co-Curricular Activities. 1 - 3 Units

Prerequisite(s): Permission of the sponsoring professor and the Division Chair.

Term Typically Offered: Fall, Spring

Co-Curricular activities related to the subject matters and intellectual concerns of the Division of Criminal Justice, including service learning, related community service assignments, and service on University and community policy making bodies.
Credit/No Credit

CRJ 199. Special Problems. 1 - 3 Units

Prerequisite(s): Restricted to declared CRJ majors or chair permission and senior status.

Term Typically Offered: Fall, Spring

Individual projects or directed reading, open only to those students who appear competent to carry on individual work.
Credit/No Credit

CRJ 200. Research Methods in Criminal Justice. ✍ 3 Units

Prerequisite(s): Classified graduate status, satisfactory completion of a basic statistics course.

Term Typically Offered: Fall, Spring

Research theory and methodology in Criminal Justice; research designs; conceptual models; design and preparation of Master's thesis prospectus.

Note: Graduate Writing Intensive (GWI) course.

CRJ 201. Advanced Research Design and Data in Criminal Justice.**3 Units****Prerequisite(s):** CRJ 200

This course provides applied explanations of advanced research designing, use of data development strategies, and techniques for effective data analysis using statistical software. Topics generally covered include: (1) issues and techniques in advanced research design with emphasis on theory testing and hypothesis formulation; (2) measurement, data collection strategies, reliability and validity of measures and results, sampling, surveys; and, (3) examination of qualitative versus quantitative research techniques, working with observational data, field research issues, and triangulation.

Note: Required core course**CRJ 205. Criminal Justice Policy Analysis.****3 Units**

Prerequisite(s): Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GVAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.

Term Typically Offered: Fall, Spring

Examination of responses of the criminal justice system to major current issues with attention to factors influencing their effects; review of uses and limitations of various responses; appraisal of the consequences of various criminal justice policy alternatives.

CRJ 207. Criminal Justice Research and Program Evaluation.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Systematic review of selected evaluations of major criminal justice programs, demonstration projects, experiments, and innovations; introduction to basic techniques of interpretation and analysis of research findings to determine outcomes.

CRJ 210. Critical Examination of Law and Justice.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examines the historical, theoretical, and practical developments that gave rise to the dominance of legal formalism in the American legal tradition. Examines the multiple challenges to that model, including legal realism, the sociology of law, critical legal studies, and critical race theory. Will critically examine the intersection of the American legal tradition with issues concerning the possibility and implementation of social justice strategies in diverse, and increasingly global contexts.

CRJ 220. Politics of Crime Legislation.**3 Units**

Prerequisite(s): Graduate status, CRJ 200, CRJ 255, and CRJ 260, which may be taken concurrently; or instructor permission; GVAR certification before Fall 09, WPJ score of 70+, or at least a C- in ENGL 109 M/W.

Term Typically Offered: Fall, Spring

Familiarizes students with the legislative process, the performance of the legislature as it relates to the handling of crime bills and the role of interest groups and politics in the process of initiating and passing laws. Topics include: theoretical models of lawmaking, factors in legislative decision-making, the politics of crime legislation, ethics in politics, and how people influence and use the legislative process.

CRJ 230. The Prison.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Contemporary penal institutions will be studied using the literature in the social sciences, the biographies of prisoners, and the writings of prison critics.

CRJ 231. Graduate Seminar in Corrections.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Provides a historical analysis and discussion of the current state of corrections and correctional management. Theories of punishment will be addressed and management techniques will be covered. Goes beyond concepts of institutionalized corrections to explore modern correctional alternatives, correctional policy and special topics relevant to corrections.

CRJ 233. Psychodynamics of Confinement.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examination of current conditions of confinement; review of confinement related factors common to populations in penal institutions, military installations, mental hospitals, prisoner of war camps, and concentration camps; investigation into the broader implications of conditions of confinement for society; survey of practical strategies for developing and implementing standards for confined populations.

CRJ 240. Contemporary Issues in Policing.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

In-depth study of contemporary issues in policing in the U.S., including management, organization and issues confronting law enforcement at federal, state and local levels.

CRJ 250. Comparative Analysis of the Criminal Justice System.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examination of alternative systems for criminal justice provides a basis for improved understanding of organizational and functional components within given sociopolitical environments. Through comparison of formal and operational levels, decision-making processes are made explicit with reference to historical, legal, social, and economic parameters in the administration of justice.

CRJ 251. White-Collar Crime.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Examines the underlying theories and the diverse nature of white-collar crime. Studies offenses associated with corporations, occupations, governments, enterprises and individuals. Examines the offenders and the organizational culture that facilitates criminal action. Topics include embezzlement, political corruption, employee theft, fraud, computer crime, and environmental crime. Study consequences for victims, offender characteristics and the theoretical explanations for the decisions by criminals to commit white-collar crimes.

CRJ 252. Violence and Victims.**3 Units****Prerequisite(s):** CRJ 200, CRJ 201, CRJ 255 and CRJ 260**Term Typically Offered:** Fall, Spring

Comprehensive survey of the literature on violence emphasizing high-fear crimes; the repetitively violent criminal; the emerging field of victimology; improved delivery of social services to victims; juvenile gangs; and the response of criminal justice agencies to urban violence.

- CRJ 255. Crime, Criminology and Criminal Justice. 3 Units**
Prerequisite(s): Classified graduate status.
Term Typically Offered: Fall, Spring
- Study of major criminological theories, their ideological premises and basic assumptions, interrelationships, and the shifts in emphasis and focal points in the study of criminality. Analyzes past and current applications of theory to the intervention strategies of crime control.
- CRJ 256. Historical Analysis of the American Criminal Justice System. 3 Units**
Prerequisite(s): Classified graduate status
Term Typically Offered: Fall, Spring
