Q4.2. Are students doing well and meeting program standard? If not, how will the program work to improve student performance of the selected PLO?

Written Communication Value Rubric

	Total % of Students Who score 3.0 or above	Met the Standard or not? (Standard: 65 % of our second year graduate students should score 3.0 or above by the time of their graduation.)
3.1 Context of and Purpose for Writing	66.6%	Met
3.2 Content Development	66.6%	Met
3.3 Genre and Disciplinary Conventions	55.5%	Didn't Meet
3.4 Sources and Evidence	55.5%	Didn't Meet
3.5 Control of Syntax and Mechanics	66.7%	Met

The key assessments analyzed here are students review of literature in thier action research report. Based on the standards and criteria from 3.1 to 3.5 in the written communication rubric in Appendix I, the majority of iMET students had appropriate written communication skills. Students meet the standards of 3.1 (66.6%), 3.2 (66.6%) and 3.5 (66.7%). Students do not meet the standards of 3.3 (55.5%) and 3.4 (55.5%). Students meet some of our written communication standards. The areas needing improvement: 1). 3.3: Genre and Disciplinary Conventions (55.5%) 2). 3.4: Source and Evidence (55.5%). In order to help students in our program successfully become better academic writers, we will design more classroom activities and assignments related to: 1). 3.3: Genre and Disciplinary Conventions and 3.4: Source and Evidence in EDTE 507 and EDTE 284 courses; 2). Require students to apply these skills as they compose comprehensive responses for all their assignments in iMet courses.

In conclusion, iMET students successfully met criteria 3.1: Context of and Purpose for Writing (66.6%), 3.2: Content Development (66.6%) and 3.5: Control of Syntax and Mechanics (66.7%). The areas for more improvement are 3.3: Genre and Disciplinary Conventions (55.5%) 2). 3.4: Source and Evidence (55.5%).

Standards of Performance for Education Technology (iMet) Graduate Students

Q2.3. If your program has an explicit standard(s) of performance for the selected PLO, describe the desired level of learning: *Seventy percent (70 %) of our students will score 3.0 or above using the VALUE rubric by the time they graduate from the four semester program.*

2Critical Thinking Value Rubric

Criterion	Capstone 4	Milestone 3	Milestone 2	Benchmark 1
6.1: Explanation of issues	Issue/problem to be considered critically is stated clearly and described comprehensively, delivering all relevant information necessary for full understanding.	Issue/problem to be considered critically is stated, described, and clarified so that understanding is not seriously impeded by omissions.	Issue/problem to be considered critically is stated but description leaves some terms undefined, ambiguities unexplored, boundaries undetermined, and/or backgrounds unknown.	Issue/problem to be considered critically is stated without clarification or description.
6.2: Evidence <i>Selecting and using information to investigate a point of view or conclusion</i>	Information is taken from source(s) with enough interpretation/evaluation to develop a comprehensive analysis or synthesis.	Information is taken from source(s) with enough interpretation/evaluation to develop a coherent analysis or synthesis.	Information is taken from source(s) with some interpretation/evaluation, but not enough to develop a coherent analysis or synthesis.	Information is taken from source(s) without any interpretation/evaluation. Viewpoints of experts are taken as fact, without question.
6.3: Influence of context and assumptions	Thoroughly (systematically and methodically) analyzes own and others' assumptions and carefully evaluates the relevance of contexts when presenting a position.	Identifies own and others' assumptions and several relevant contexts when presenting a position.	Questions some assumptions. Identifies several relevant contexts when presenting a position. May be more aware of others' assumptions than one's own (or vice versa).	Shows an emerging awareness of present assumptions (sometimes labels assertions as assumptions).
6.4: Student's position (perspective, thesis/hypothesis)	Specific position (perspective, thesis/hypothesis) is imaginative, taking into account the complexities of an issue. Limits of position (perspective, thesis/hypothesis) are acknowledged. Others' points of view are synthesized within position.	Specific position (perspective, thesis/hypothesis) takes into account the complexities of an issue. Others' points of view are acknowledged within position (perspective, thesis/hypothesis).	Specific position (perspective, thesis/hypothesis) acknowledges different sides of an issue.	Specific position (perspective, thesis/hypothesis) is stated, but is simplistic and obvious.
6.5: Conclusions and related outcomes (implications and consequences)	Conclusions and related outcomes (consequences and implications) are logical and reflect students' informed evaluation and ability to place evidence and perspectives discussed in priority order.	Conclusion is logically tied to a range of information, including opposing viewpoints; related outcomes (consequences and implications) are identified clearly.	Conclusion is logically tied to information (because information is chosen to fit the desired conclusion); some related outcomes (consequences and implications) are identified clearly.	Conclusion is inconsistently tied to some of the information discussed; related outcomes (consequences and implications) are oversimplified.

Uses language that generally conveys meaning to readers with clarity, although writing may include some errors.	Uses language that sometimes impedes meaning because of errors in usage.

65 % of our second year graduate students should score 3.0 or above by the time of their graduation.

Appendix II: Key Assessment for the iMET Program
EDTE 507 Literature Review component of the Culminating Experience

Purpose: One component of your culminating experience is to complete a review of the research literature on a topic related to your action research. This paper is expected to demonstrate greater maturity and understanding than any literature review you submitted at earlier in your graduate program.

Description of Requirement: Write a review of literature that thoroughly summarizes and evaluates key empirical research articles and other literature addressing your topic. Remember that a literature review is a piece of discursive prose, not a list describing or summarizing one piece of literature after another. Your aim should be to synthesize the material into a cohesive portrayal of where the research is at this point in time and how it can help in your research planning or education practice. The literature review should:

- 1) set the context with a clearly-articulated introduction that includes a statement of the problem, a brief explanation of the significance of your topic (to the education field and beyond, if applicable), an introduction to your definitions and background, and the theoretical framework for your paper;
- 2) demonstrate that you have thoroughly investigated the issue, collected and evaluated evidence from a variety of empirical sources and taken conflicting perspectives into consideration;
- 3) conform to APA guidelines for writing clearly and concisely (APA, Chapter 3) and address the mechanics of style (APA Chapter 4); and
- 4) be original and current (the narrative should be in your voice and the majority of research articles should have been published within the past seven years).

Format:

- This should be a 15 to 20 page, double-spaced paper in 12 point, Times New Roman or similar font with 1 inch margins all around. In addition, include a title page, abstract and references section. Appendixes are optional.
- Your paper should be formatted according to APA 6th edition guidelines, particularly with regards to headers, headings, citations, figures, tables and references.
- This is not a research report. It is a literature review. Recognize the distinctions of this genre and write accordingly. Follow the guidelines in the *Literature Review Template* below.

Submission: The finished draft should be submitted as an email attachment to your Culminating Experience advisor by 11:59 pm on January 23rd. After meeting with your advisor during on Jan. 27 or 28, upload the draft to your ePortfolio.

Evaluation: The **finished draft** will be evaluated based on the attached *Rubric for Literature Review*. You will not receive an actual letter grade but any component that falls below a 3 will need to be revised and re-evaluated. If a literature review does not meet passing standards you will receive a *No-Credit* for EDTE 507.

Literature Review Template

The template on the following pages will guide you through the essential steps to write up your literature review. It includes recommended headings following APA guidelines for papers with three levels of heading, but you might choose to use as few as two levels or as much as five. The choice is yours, provided you follow APA formatting as indicated below.

APA Headings	
Level	Format
1	Centered, Boldface, Uppercase and Lowercase Headings
2	Left-aligned, Boldface, Uppercase and Lowercase Heading
3	Indented, boldface, lowercase heading with period.
4	<i>Indented, boldface, italicized, lowercase heading with period.</i>
5	<i>Indented, italicized, lowercase heading with period.</i>

In general, the following Conventions of style in research and reporting should be followed:

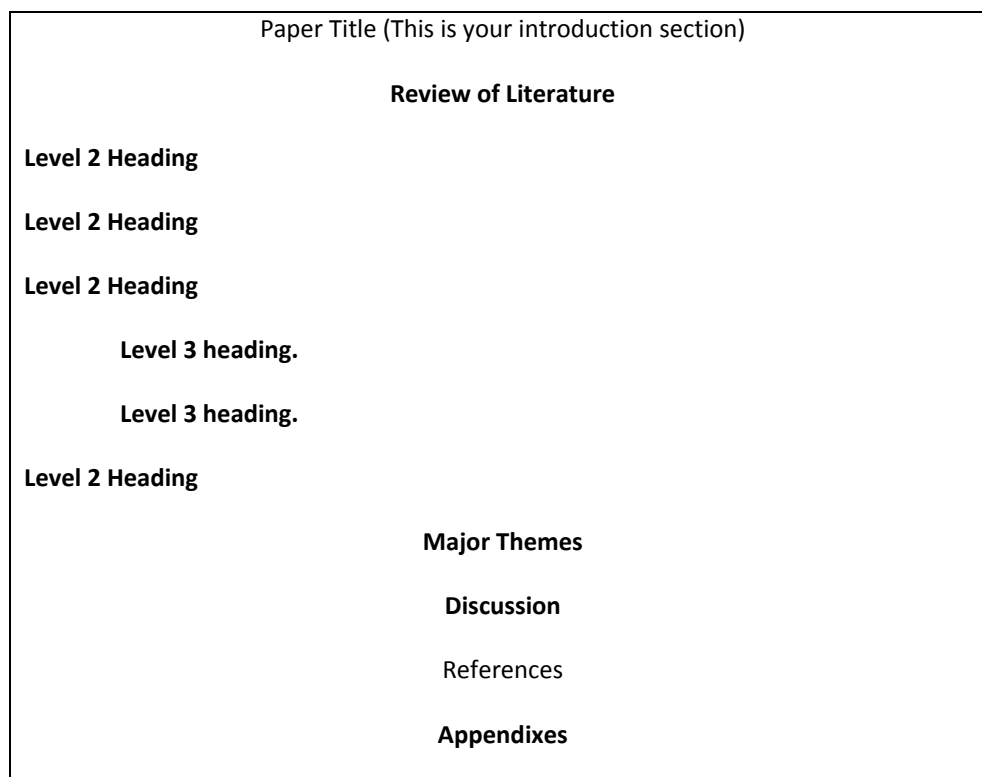

- Title—should indicate clearly what report is about; limit to approximately 15 words or less
- Person and voice—typically written in third person point of view rather than the first person point of view or the passive voice
The study showed that..., NOT I found out that....

The participants responded..., NOT The participants have been asked....
- Tense—generally speaking, final reports written in past tense; proposals written in future tense
- Tentative versus definitive statements—*conclusions* usually reported with tentative statements; *procedures* and *results of descriptive analyses* can be stated more definitively
- Simplicity of language—use plain, straightforward language; don't try to impress your readers...let your research speak for itself! (differences in qualitative versus quantitative reports)
- Concise—condense the information when you can
- Consistency—consistency throughout the report is essential

The general format of your essay should:

- be typed, double-spaced, with two spaces after punctuation between sentences
- on standard-sized paper (8.5"x11")
- with 1" margins on all sides
- in 12 pt. Times New Roman or a similar font
- include a page header (title) in the upper left-hand of every page and a page number in the upper right-hand side of every page

Potential organization based on 3 levels of headings (You will decide on the actual titles for your headings):
