Q1.2.

Please provide more detailed background information about **EACH PLO** you checked above and other information such as how your specific PLOs are **explicitly** linked to the Sac State BLGs:

The CHDV programs evaluated student outcomes in two primary domains specific to our programs: Goal 3: Communication in the Discipline, which involves both writing competency and Information Literacy and Goal 5: Professional and Career Knowledge and Behaviors, which involves both Integrative and Applied Learning, as well as Overall Competencies in the Major/Discipline.

These PLOs are explicitly linked to the Sac State BLGs in the following ways:

A) Through examination of Integrative and Applied Learning and Overall Competencies in the Major/Discipline, we have specifically addressed the Sac State BLG of **Intellectual and Practical Skills**.

In this assessment we examined both direct measures of student performance on a key/signature assignment, as well as indirect (student survey measures) which specifically addressed the Sac State BLG of **Intellectual and Practical Skills**.

b) Direct measures indicated student performance on the creation of a curriculum project that assessed students' ability to draw on theory and research to create a practical project.

Indirect measures of perceptions and experiences in our fieldwork courses, noting the components of the experience which most promoted social and community (school) engagement, as well as obstacles to the students' development.

Furthermore, this process also specifically addressed Sac State BLG **Personal and Social Responsibility**

by examining students' perceptions of their own experiences in community and socially engaged settings.

While the program does not have a specific standard of performance for this PLO, for some direct indicators of the PLO, based on student performance of signature assignments, we do. For other indicators of the PLO, including indirect measures of student experience, we are utilizing a more qualitative analysis of how to continually improve student opportunities to connect theory and practice in applied educational and community settings.

- 2. No
- 3. Don't know

Q4.2.

Are students doing well and meeting the program standard? If not, how will the program work to improve student performance of the selected PLO?

78% of students assessed were performing at or above standards for the curriculum project, which is a direct measure of student performance on Integrative and Applied Learning in the major. In this project, students are required to integrate knowledge on theories of development and apply them into the creation of a curriculum project. However, 22% of students were performing below the minimum expectation. This year the program will be taking a look at the projects required and see if student preparation (units completed prior to enrollment) play a part in student success.

Data from the fieldwork surveys indicated that students are generally very pleased with their fieldwork experience. However, some concerns were raised that should be addressed immediately. The findings will be presented at program area meetings to discuss the concerns that students have, and to consider adjustments to how the student work is assessed, as well as increasing opportunities for students that match their stated career goals.

Q5.2.1.

Please provide a detailed example of how you used the assessment data above:

The assessment data/report from 2014-15 examined student writing in the discipline as well as critical thinking. Based on the findings, significant curricular alterations have been made in the foundational research methods courses to ensure that students are given a full year of training in discipline-based writing and data analysis skills prior to moving forward into upper-division theory courses. This curricular change included moving from two separate courses (CHDV 123 and CHDV 133) to making the courses into an integrated two-semester foundational research methods experience that will ensure adequate training in the discipline.

- Demonstrate your understanding of developmental theory and principles relevant to your group's age/grade level
- Focus on meaningful concepts or skills related to your unit topic
- Identify related CA K-12 content standards or PLF Foundations
- Identify age appropriate objectives
- Include standards, objectives, development/content areas and procedures that align with each other
- Incorporate appropriate learning strategies and procedures
- Integrate more than one content or domain area if appropriate

INSTRUCTIONS:

- Each lesson should address at least one of the major concepts or topic areas in your unit summary and unit web. Group members should coordinate your lesson topics so that everyone is doing a different lesson.
- Lessons should be based upon state curriculum standards or learning foundations selected from your group's unit standards set. As appropriate to the concepts, lessons should integrate two or more of the content or developmental domains.

Language/literacy

Cognitive/Science

Arts/Music/Drama

- Instructions, a blank lesson template and lesson examples are included in the Unit Assignments folder for the Lesson Plan.
- Each student will submit the lesson plan individually through the assignment link in the Lesson Plan folder.
- The lesson plans will be graded individually using this scale: 18-20 A, 15-17 B, 12-14 C, 9-11 D, 8 or less F. This assignment is worth 10% of your overall grade.

Dear Child Development Students,

Each semester the CHDV program gathers assessment information about students' experiences in the CHDV programs. This information is used to make improvements to the program and curriculum. This semester's program assessment is focused on students' experiences in field based or service learning classes. You are receiving this message because you are enrolled in one of these classes this semester.

We are asking that you complete a brief (under 8-minute) survey that will help us to understand how the Child Development Program is supporting student achievement of program learning goals. Your participation in the survey is voluntary. Completion of the survey will indicate your consent to participate. Your responses will be kept confidential and anonymous. Data collected through the survey will be aggregated and you will not be identified by name in any written documents.

You can complete the survey by clicking on the link below and following the directions on each page. The survey includes some simple ranking items and should only take about 8 minutes or so to complete. The link will be available through December 21, 2015.

This survey is intended for the sole purpose of collecting information related to CHDV program assessment. **It will not in any way affect your grade in the course in which you are enrolled.** Individual course instructors will not have access to any of this program assessment data.

Please take a few minutes to share your experiences and help us improve the CHDV program for all our students!!

Thank you,

Dr. Susan Gomez
CHDV Assessment Coordinator
