Throughout the COVID-19 crisis, all our folks in P&R were on campus and working hard to support our students, faculty, and staff. The Human Resources/Employment Services team is excited to recap many of the accomplishments from the past year.

Asset management is a large part of what P&R does as well. They work closely with IRT, managing classrooms,labs, chairs, file cabinets, plug-in calculators, all kinds of stuff. It's not just about getting everything in and then putting it away, but about creating a system where we can track things and maintain a database of equipment on campus.

P&R stores old computers until student assistants with the IRT Refresh Program can collect and erase the hard drives. Computers in good working order are donated to schools and non-profits or used in the P&R lab. However, we need the hard drives to be removed, which is where IRT comes in. They can collect and erase the hard drives, so that we can make sure that everything is properly disposed of.

The IRT Refresh Program can collect and erase the hard drives. Computers in good working order are donated to schools and non-profits or used in the P&R lab.
