#### **Non Pre-Priced Tasks**

- Contractor must have permission from Sacramento State to use a Non Pre-priced Task prior to submission
- Three (3) Quotes on vendors' or subcontractors' letterhead
- Justification for less than three (3) Quotes
- Contractor is paid the amount in the following formula:

#### Non Pre-Priced Adjustment Factor:

The Trustees will base the calculation of the non pre-priced adjustment factor on the Normal Working Hours Adjustment Factor, as bid by the Contractor, in one of two ways.

(1) When the Normal Working Hours Adjustment Factor as bid is 1.0000 or less.

In this case, the formula to determine the Non Pre-priced Adjustment Factor is: the cost of the non-pre-priced item multiplied by the Normal Working Hours Adjustment Factor,

multiplied by 1.15. For example: if the Normal Working Hours Adjustment Factor is .8500; and the cost of the non pre-priced item is \$10,000, the mark-up formula is: (\$10,000 \*.8500) \* 1.15 = \$9,775.

(2) When the Normal Working Hours Adjustment Factor as bid is 1.0001 or more.

In this case, the University-allowed mark-up on non pre-priced items shall not exceed 15% total, and the formula is: the cost of the non prepriced item multiplied by 1.15. For example: if the Normal

Working Hours Adjustment Factor is 1.2000, and the cost of the non pre-priced item is \$10,000, the mark-up formula is: \$10,000 \* 1.15 = \$11,500.

(Continued on the next slide)

SACRAMENTO STATE Redefine the Possible

### **Non Pre-Priced Tasks**

#### **Contractor Performed Duties**

A = The unit price appearing in the Construction Task Catalog for each trade classification required multiplied by the quantity and multiplied by the appropriate Adjustment Factor identified and submitted in the Job Order Price Proposal as a pre-priced task.

B = The unit price appearing in the Construction Task Catalog for each piece of equipment required multiplied by the quantity and multiplied by the appropriate Adjustment Factor identified and submitted in the proposal as a pre-priced task.

C = The lowest of three independent quotes for all materials multiplied by the quantity and multiplied by the non pre-priced Adjustment Factor identified and submitted in the Job Order Price Proposal as a non pre-priced task.

Total cost for non pre-priced tasks performed with Contractor's own forces = A + B + C.

(Continued on the next slide)

SACRAMENTO STATE Redefine the Possible

#### **Non Pre-Priced Tasks**

#### **Subcontractor Performed Duties**

If the Work is to be subcontracted, the Contractor must submit three independent quotes for the Work from Subcontractors. The Contractor shall not submit a quote or bid from any supplier or subcontractor that the Contractor is not prepared to use. The University may require additional quotes and bids if the suppliers or subcontractors are not acceptable or if the prices are not reasonable. If three quotes or bids cannot be obtained, the Contractor will provide the reason in writing for the University's approval as to why three quotes cannot be submitted.

D = Subcontractor Costs (supported by three quotes)

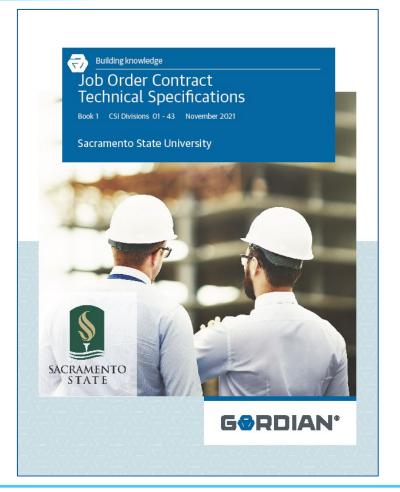

Total Cost for non pre-priced tasks performed by subcontractor = D multiplied by the Non Pre-Priced Adjustment Factor.

#### **Bid Considerations**

- Contractors Should Expect To
  - Prepare Incidental Drawings or Sketches for Some Projects
    - Justify Quantity Calculations
    - Explain Detail of Work
  - Prepare Proposals for Some Projects That Might be Canceled
  - Margins on CTC Tasks Vary
  - Some Projects are More Profitable than Others
  - Maintain a Fully Functioning Local Office
  - Hold Required Licenses

#### **Bid Considerations: Contractor Adjustment Factor**

Importance of Adjustment Factors

- Determines Lowest Bidder AND
- Used to Price Individual Work Orders
- Price Proposal Total Becomes the Job Order Amount

Unit Price	X	Quantity	X	Adjustment Factor	=	Total for Task
Unit Price	x	Quantity	x	Adjustment Factor	=	Total for Task
• Unit Price	X	Quantity	x	Adjustment Factor	=	Total for Task

**Total Job Order Price** 

# **Risks of Low Adjustment Factor**

SACRAMENTO STATE Redefine the Possible

- Leads to Arguments in Proposal Review
  - Unsupportable Tasks
  - Exaggerated Quantities
- Leads to Delays in Work Order Development
  - Takes Longer to Review Proposals
- Creates an Adversarial Relationship
  - Reduced Volume of Work
  - Will Shorten Contract
  - Lost Profitability
- No Second Chance to Improve your Margin

# **Review of Key Points**

- Focus on Total Potential Value of Contract
- Evaluate Construction Task Catalog<sup>®</sup>
  - Analyze Unit Prices
  - Know the General Guidelines for Using the CTC
- Contractor Performance Drives Volume
  - Ability to Market Program and Services
  - Responsive Service
  - Accurate Proposals
  - Safe and Clean Project Sites
  - High Quality Construction
  - On-Time Completion
  - On Time Close Out
