SHARING LINKEDIN LEARNING CONTENT

Want to share a LinkedIn Learning video or course with others at Sac State? It’s an easy two-step process.

When viewing content in LinkedIn Learning, the screen will look like this:

Notice the arrow in the very top right corner of the viewing pane:

Click on that arrow, and a menu of ways to share content is provided. The most common ways to share content with others at Sac State are:

- Email: Clicking on the email option will open up a new message in your Sac State email account with the content link embedded in the new message. Simply type in the recipient’s email address then send.
- Link: LinkedIn Learning generates a copy of the video link to your clipboard, which you can then paste into a document, email, website, or any other place you wish to place the link.

For questions or comments about this LinkedIn Learning feature, please contact learn-dev@csus.edu.
