Scheduled Hours by Room and Time of Day Report Key

Purpose of Report

The Scheduled Hours by Room and Time of Day report allows a user to view how each individual room is scheduled throughout an average week during a specified term on a specified campus. This report shows specifically when a room is used for academic classes by time of day/day of week. The total average hours by time and day are included as well. This report can be used to show when specific rooms are in use (and when they are open) throughout the scheduling week.

Building and room grouping = Report is grouped by building and room allowing the report to show individual schedules for each room.

Average weekly hours = Average weekly class hours being offered in the room. Does not include event hours. In this example, there is a class scheduled in room 150 on Tuesday at 2:00, 3:00, and 4:00. Class hours are rounded up to the next quarter hour (i.e. a class that meets from 8:00a to 9:40a would have one hour counted in the 8:00 am block and .75 hours counted in the 9:00 am block). Classes that don't meet the entire term are weighted less (e.g. a class that only meets for two thirds of the term will have its one hour time blocks counted as .66 hours of average weekly utilization).
