Low Enrollment Sections by Subject for Selected Term Report Key

Purpose of Report

The Low Seat Fill Sections by Subject for Selected Term report allows a user to view all sections for a selected term that do not meet a minimum seat fill requirement. A user defined parameter allows the seat fill calculation to be based on either the actual enrollment or max enrollment of the section. Additional parameters allow a user to only include sections of a specific subject that are scheduled into specific room types. Crosslisted classes will use the Crosslist Enrollment and Crosslist Max Enrollment fields to calculate seat fill.

Section Information = Subject, course, section information for the low seat fill sections is displayed, grouped by subject.

Minimum Seat Fill = User defined minimum seat fill value. The report will only display sections that don't meet this minimum seat fill.
