

## Learn More About "Conditional Admission"

All offers of admission are conditional. Students are conditionally admitted by their self-reported and in-progress coursework as indicated on the application from Cal State Apply during the application filing period.

After students are admitted and accept their Intent-to-Enroll (ITE), their official transcripts are reviewed to determine if they are on track to complete all admission requirements within the allowed timeframe. Students who are on track to transfer are invited to register for mandatory New Student Orientation.

All applicants must maintain eligibility by completing all courses with passing grades (C- or higher), submitting all required official transcripts and test scores (SAT, ACT, TOEFL, AP, IB, etc.), and adhering to all deadlines and other requirements.

Admitted students will be required to submit final official high school transcripts with their high school graduation date included by June 30, 2019 to finish validating their admission eligibility prior to beginning classes at Sac State. Admitted high school students with college credit will also be required to submit official transcripts from all colleges attended by June 30, 2019.

Applications are term specific, which means that Sacramento State will not defer or roll forward your application or admission from term to term. If you do not attend Sacramento State in the term designated on your application, then you must reapply and submit a new application and fee for the subsequent term you wish to be considered for admissions to Sacramento State.
