

Comments from SIF studnets over the years

“Thank you Dr. Moore for walking us through the RIVER process and teaching us how to use the [Bloomberg] Terminal. I learned much in this class and will continue to apply all that I have learned”

-Spring 2021 SIF Student

Thank you “for giving students, including myself, the opportunity to take the Student Investment Fund course. It was very helpful and informational by providing hands on experience in portfolio management. I do not have any career background in Finance and therefore, I benefited greatly from the experience. I look forward to using your RIVER process and applying it to my own personal portfolio.”

-Spring 2021 SIF Student

“Thank you for all your patience and wisdom this semester. I learned more from You than my other classes.”

-Fall 2020 SIF Student

“I would like to thank you for this semester in the SIF. You taught us how to properly run a portfolio and it became more of a team of all sectors having the same goal... You pushed us to learn aspects of portfolio management that I was not comfortable with at the time. In retrospect, I believe I have gained more knowledge from this class over any other financial course I have taken here at Sac State.... Now I know how to manage a portfolio, gauge risk, and use smarter investing tools.”

-Fall 2020 SIF Student

The student investment fund “nurtured my passion for finance” and “helped me develop my quantitative ability and analytical acumen”

-2019 SIF Student

“Your teaching style and interaction with the class made the Student Investment Fund particularly interesting and something I looked forward to each week. Furthermore, your initiative to implement Bloomberg Terminals to the curriculum, and require students to be Bloomberg Market Concepts certified, is something that has proved invaluable to me.”

-2017 SIF Student

“I had an extremely enriching experience during my time as a part of the SIF when it was under your leadership, and even recommended my friends to join.”

-2017 SIF Student

SIF “was an open space to share knowledge and ideas, and to help refine investment theses... Dr. Moore would go out of his way to connect students with real world opportunities. I got my first career job from an employer coming to the SIF, and I came back to speak to the SIF in 2019 about my experience in the investment management field.”
