

Dear xxxx ,

Once again, congratulations and welcome to the Graduate Program in Communication Sciences and Disorders at Sacramento State for 20xx/20xx. By now, you should have received and responded to the official acceptance correspondence from the Sacramento State Office of Graduate Studies. If you have not received the official campus offer, please contact me immediately.

As noted on our website:

Accepted applicants are admitted into the program and randomly assigned into two groups (cohorts). The first cohort, referred to as “Fall Starts” begins clinic in the fall and can expect to graduate in a minimum of 4 semesters (coursework and internship experiences will be completed in the spring semester of the second year; however, degrees are typically conferred at the end of August).

The second Cohort, referred to as “Spring Starts” begins coursework in the fall semester and clinic in the spring semester. This group can expect to graduate in a minimum of 5 semesters (coursework and internship experiences will be completed in the fall semester of the third year; however, degrees are typically conferred at the end of January).

Although both Cohorts begin academic work in the Fall of 2019, Fall Clinical Cohorts are comprised of a minimum of 4 semesters and Spring Clinical Cohorts are comprised of a minimum of 5 semesters. For a full description of didactic and clinical curriculum, please visit the current catalogue website:

<http://catalog.csus.edu/colleges/health-human-services/communication-sciences-disorders/ms-in-communication-sciences-and-disorders/>

You have been randomly assigned to the XXXX cohort for 20xx/20xx.

Hope to see you at the CSAD Open House on XXX, 3:00-6:00 PM!

Very best,

Darla K. Hagge
