Place of Course in Program

The purpose of this elective independent study is to introduce students, through service learning, to current research and best practice in the area of child language and literacy delays and, when possible, the prevention of these delays.

The Sacramento State Literacy Connection is a collaboration of Dr. Robert Pieretti and students in the Applied Communication Sciences Lab (ACSL) in the Department of Communication Sciences and Disorders at Sacramento State. In addition to various research projects, the Sacramento State Literacy Connection is regularly involved in three ongoing community-based projects. These include the Sac State Storytime Connection, parent training in the area of language and literacy development, and the maintenance of a website dedicated to literacy enhancement.
Service Learning:
The main focus of this course is “learning by doing” – I want you to participate in activities at a community partner site that are educationally beneficial to you and that also support the work of the community partner. This process is also called “Service Learning.” Specifically, Service Learning helps students to:

- Deepen their understanding of course material
- Make connections between the work they are doing at a community partner site and ideas and concepts discussed and taught in our core CSAD curriculum
- Put into practice the skills they are learning in the classroom.

Service Learning also supports community partners by providing students to assist with:

- Direct service with clients
- Special event/program planning and/or project development
- Both direct service and project/program development
