“The Defense MicroElectronics Activity: Your Local Neighborhood DoD Federal Laboratory”

Dr. Kevin Geoghegan

Defense MicroElectronics Activity (DMEA)

Recent events have brought significant attention to and concern for the state of the Nation’s supply chain; and, in particular, the Nation’s reliance on the global semiconductor industry for the microelectronics produced for national security and defense. For the Department of Defense, addressing these issues daily is the Defense MicroElectronics Activity (DMEA) located in McClellan Park, CA. In this talk, the origins, history, and mission of the DMEA will be presented including its role as a DoD Federal Laboratory. The talk will then culminate in the discussion of the longstanding relationship between DMEA and Sacramento State and the continued opportunities ahead via the recently executed Educational Partnership Agreement.

Thursday, March 17, 2022
4:00 - 5:20PM
Mendocino Hall 1015

Open & Free to all students, faculty and public
