¹ Full-Time Equivalent Students are calculated by dividing the sum of the Student Credit Units (SCU) by 15 for Undergraduates and 12 for Graduate Students. For example, if a course is a 3- credit unit class with an enrollment of 47 undergraduate students and 1 graduate student, the student FTE would be computed as (47x3)/15+(1x3)/12=9.4+0.25=9.65. Please note that FTES calculated from the student enrollment file should be close, but not exactly equal, to that calculated from the course section file.

² Instructional Faculty FTE: This incorporates only those faculty members with in-classroom workloads, including supervisory teaching, and/or instructors who are administrators or staff. The FTE for Full-time faculty is calculated as WTU/12. The FTE for Part-time, FERP, and Teaching Assistants are calculated as WTU/15. Instructional FTEF are allocated to the department offering the course, regardless of the instructor's affiliation.

³ Student-Faculty Ratio is FTES divided by FTEF

College	3.3	3.0	2.8	3.0	3.3	3.0
University	2.8	2.3	2.3	2.7	2.3	2.3

Note: Median years to degree are used to calculate the average rather than the mean in order to reduce the impact that extreme values would otherwise have on the averages of smaller units.

1. This rate is calculated by dividing the number of students who graduated from their initial major by the number of students in the original cohort.

2. This rate is calculated by dividing the number of students who graduated from their initial major plus inflow students by the number of students in the adjusted cohort (original cohort plus inflow students minus outflow students). This is the actual graduation rate for each major and college.

3. This rate is calculated by dividing the number of students who graduated from their initial major plus outflow students by the number of students in the original cohort. This is the official graduate rate for each major and college.
