

OFFICE OF RESEARCH, INNOVATION, & ECONOMIC DEVELOPMENT

WHO WE ARE

The Office of Research, Innovation, and Economic Development (ORIED), a unit of Academic Affairs, works to expand the research capacity of Sacramento State's faculty, staff, and students. ORIED supports faculty seeking external funding for their research and scholarly activities, and on behalf of the University, submits grant and contract proposals. In addition, this office is responsible for administering internal research funds and recognition programs and, as part of its research integrity and compliance functions, facilitates the Institutional Review Board (IRB), the Institutional Animal Care and Use Committee (IACUC), the Institutional Biosafety Committee (IBC), and superintends campus academic centers and institutes. ORIED also provides support services to faculty with IP services as well as assisting external stakeholders in connecting with appropriate university specialists who can offer research and project development, business and technical expertise and assistance with talent creation and workforce development.

SACRAMENTO STATE

SERVICES WE PROVIDE

Research and Proposal Development (RPD)

Assist faculty and staff seeking external support for their research and scholarly activities through services providing research proposal, narrative, application and budget development. Work in conjunction with UEI Sponsored Programs Administration that manages the resulting awards.

Innovation and Technology Transfer (ITT)

Help protect faculty, staff and students' intellectual property and optimize the flow of innovations to the community to serve the public good and to the marketplace to help generate revenue that supports future research activities.

Economic Development (ED)

Serve as a liaison through which the community and external partners can assess vast range of services, resources and expertise embedded in the Sacramento State campus. Assist with proposals for economic and workforce development related grants.

Research Integrity and Compliance (RIC)

Assist faculty, students, and staff with research compliance in the areas of human and animal subjects research, financial conflict of interest, responsible conduct of research, export controls, and data use and material transfer agreements.

Student Research Center (SRC)

Exists to broaden opportunities for students to collaborate with faculty on authentic research, scholarship, and creative activities. We focus on both undergraduate and graduate student research opportunities, deliver professionalization workshops and offer opportunities for research dissemination.

USGS Cooperative Agreement Program

Facilitates cooperative scientific research, educational development, and technological collaboration for solving environmental problems benefitting local communities, school systems, governmental agencies and the public.

Who's Who in ORIED

William DeGraffenreid, PhD
Associate Vice President
