SUSTAINABILITY INTERNSHIPS

What fun things will you work on?

Sac State Sustainability is seeking student interns for a variety of projects. Examples of internship opportunities include but are not limited to:

BAC Yard Internship:

Interns assist Sac State Sustainability in meeting our 100% organic waste diversion goal through learning about composting and how organic waste is managed in a sustainable way within the University setting. BAC Yard interns also learn about beekeeping and honey extraction as well as our food production methods in both traditional soil-grown garden beds at the BAC Yard and Capital Public Radio.

Carbon Neutrality Internship:

Interns assist Sac State Sustainability in assessing campus greenhouse gas emissions and reduction strategies toward meeting our 2040 carbon neutrality goal.

Zero Waste Internship:

Interns assist Sac State Sustainability in assessing campus waste management and reduction projects toward meeting our 2030 zero waste goal.

Energy Management Internship:

Interns assist Sac State Sustainability in monitoring campus energy management systems and implementing efficiency strategies.

And many other sustainability internship projects...
