

## CSU SENSITIVE POSITIONS

### SENSITIVE POSITIONS

Sensitive positions are designated by the CSU as requiring heightened scrutiny of individuals holding the position, based on potential for harm to children, concerns for the safety and security of the people, animals, or property, or heightened risk of financial loss to the CSU or individuals in the university community. Whether a CSU position should be considered sensitive is determined by the duties and responsibilities of the position and not the job title or classification. The posted position description shall state that the position has been designated to be a sensitive position. In addition to identifying the background check requirement for sensitive positions, all posted position descriptions should include an identifier (e.g., checkbox) indicating whether or not the position will have access to sensitive data.

The table below provides information regarding key duties and responsibilities associated with examples of occupations or positions considered sensitive. For each category, additional background check requirements beyond the minimally required background check (employment verification, education verification, reference check, and criminal records check) have been defined. New hires as well as current employees who are newly appointed, transferred, promoted, reassigned, or reclassified into a sensitive position are subject to these requirements. **The list of positions and tasks is illustrative and is not exhaustive.** For example, healthcare professionals include but are not limited to positions such as physician assistants, dentists, nurses, physicians, veterinarians, therapists, medical assistants, and speech pathologists.
