**Course Description:**
Examines social/emotional assessment strategies and instruments appropriate for working with students in schools. Topics include clinical interviewing, social-emotional functioning, and effective report writing.

**Prerequisites:**
EDS 242A & 242B; and approval as a candidate in the School Psychology Program.

**Corequisite:**
EDS 243A

**Course Objectives:**
Students will demonstrate …
1. knowledge of psychoeducational evaluation practices (practice doing so is provided in EDS 243A).
2. knowledge of assessment practices specific to selected learning challenges.
3. knowledge of ethical and legal issues associated with psychoeducational evaluations (e.g., special education eligibility criteria).
4. awareness of the importance of attending to cultural factors that influence the psychoeducational evaluation.
5. skill in evaluating psychoeducational case study data.

**Required Readings:**
1. Article 3. Identification, Referral, and Assessment
2. Article 3.1. Individuals with Exceptional Needs
2. Chapter 11, *Best Practices in Curriculum-Based Evaluation in Early Reading* (pp. 171-186)
9. Chapter 25, Best Practices in the Assessment of Youth with Attention Deficit Hyperactivity Disorder Within a Multitiered Services Framework (pp. 391-404).
10. Chapter 26, Best Practices in Early Identification and Services for Children with Autism Spectrum Disorders (pp. 405-416).

1. Chapter 5, Best Practices in Nondiscriminatory Assessment (pp. 61-74).
2. Chapter 22, A Psychometric Primer for School Psychologists (pp. 281-300).

1. Chapter 7, Best Practices on Interventions for Students with Reading Disabilities (pp. 97-114).
2. Chapter 19, Best Practices in Assessing and Improving Executive Skills (pp. 269-286).
3. Chapter 23, Best Practices in Classroom Interventions for Attention Problems (pp. 335-348).
4. Chapter 24, Best Practices in School-Based Interventions for Anxiety and Depression (pp. 349-364).

Recommended Readings:

Course Requirements/Grading (100 points maximum):

1. **Attendance/Class participation.** Attendance and participation in class discussions and activities will be worth 20 points. Included in this grading element will be student presentations of selected psychoeducational assessment measures. An outline for these presentations is provided below. Interactional learning cannot be duplicated outside the classroom. Students missing more than 2 classes cannot receive an A; students missing more than 3 classes cannot receive a passing grade. Students more than 20 minutes late for any class will be considered absent, even if able to attend the majority of the class period.

2. **Quizzes.** Performance on three separate quizzes (each worth 10 points) will be used to assess student knowledge of important concepts (e.g., legal issues, specific assessment issues). Performance on these quizzes will be worth a total of 30 points.

3. **Final Examination.** A take home case study final exam will be worth 50 points.

**Letter grades will be based upon the following point totals**

- **A** = 95 points and above
- **A-** = 94 to 90 points
- **B+** = 89 to 88 points
- **B** = 87 to 85 points
- **B-** = 84 to 80 points
- **C** = 79 to 70 points
- **D** = 69 to 50 points
- **F** = below 50 points

**Special Notes:**

1. This course addresses elements of the following NASP 2010 *Standards for Graduate Preparation of School Psychologists*:
   - II. Data-Based Decision-Making and Accountability
   - IV.1. Interventions and Instructional Support to Develop Academic Skills
   - IV.2. Interventions and Mental Health Services to Develop Social and Life Skills
   - VII. Diversity
   - VIII.1. Research and Program Evaluation
   - VIII.2. Legal, Ethical, and Professional Practice

2. Specific student outcomes achieved during this course that are consistent with CSUS School Psychology Learning Outcomes includes development of the ability to “conceptualize student needs from a developmental and ecological perspective;” to use “a wide range of methods in assessing the needs of school aged youth…;” “… implement problem-solving approaches that address the needs of school aged youth either within the school setting …; understand the specialized needs of diverse student populations;” and engage in practices that are consistent with ethical and legal standards of the profession, including a solid understanding of special education regulations.

3. Computer/Smart phone use is not allowed (emailing, web surfing, texting) unless it is a directed part of a classroom activity. If you need to use your computer for note-taking during class please check with the instructor prior to doing so for this class (you will be asked to turn off the device’s Wi-Fi). If you need to have your smart phone on to receive important work or family communications please place it on vibrate and step out of the classroom to respond to a text or take a phone call.

4. Assigned grades will be consistent with CSUS grading policy as described in the CSUS course catalog.

5. All assignments are due on the dates indicated on the course outline. A minimum of one full grade deduction will be applied to all late assignments.

6. If you have a disability and require accommodations, you need to provide disability documentations to SSWD, Lassen Hall 1008, (916) 278-6955. Please discuss your accommodation needs with the instructor after class or during office hours early in the semester.
7. Academic Honesty Policy: Go to [http://www.csus.edu/admbus/umanual/UMA00150.htm](http://www.csus.edu/admbus/umanual/UMA00150.htm) for the CSUS Academic Honesty Policy and Procedures. Per University Policy all students are responsible for:
   a) Understanding the rules that preserve academic honesty and abiding by them at all times. This includes learning and following the particular rules associated with specific classes, exams, and course assignments. Ignorance of these rules is not a defense to a charge of academic dishonesty.
   b) Understanding what cheating and plagiarism are and taking steps to avoid them. Students are expected to do this whether working individually or as part of a group.
   c) Not taking credit for academic work that is not their own.
   d) Not knowingly encouraging or making possible cheating or plagiarism by others.
Please refer to [http://library.csus.edu/content2.asp?pageID=353](http://library.csus.edu/content2.asp?pageID=353) for a student tutorial on how to avoid plagiarism.
Psychoeducational Assessment Measure Presentation PPT Outline

1. Provide the name, publisher, and cost of the measure.

2. Describe the population for which the test is (and is not) appropriate.

3. Review the psychometric properties of the test.

4. Describe the psychoeducational constructs the test purports to measure. In doing so make it clear why and individual would choose to administer the given test.

5. Discuss how the data provided by this measure will inform instruction.

6. Illustrate the test’s use by providing and interpreting case study data.

7. Provide a report template that will facilitate the use of the measure.

NOTE: Strive to share with your colleagues information that will be practically beneficial. In other words, give them something that they can use the next time they are in the clinic and recognize the need to administer this measure. Be sure to either bring hard copies of your presentation materials to class, or email such to all students and the instructor before the class meeting.

1. September 12, CTOPP   Nora Newman
2. September 19, TOWRE   Katie Berry
3. September 19, GORT    Christina Mihov
4. September 26, TOWL    Tiffany Chen
5. September 26, K-Math  Anderson Silva
6. October 3, Conners    Nina Martinez
7. October 10, BASC     Alejandro Figeroa
8. October 17, RCMAS    Jade Vo
9. October 24, CDI      Danielle McIntyre
10. October 31, Vineland Lyndsie Vinson
11. November 14, CARS   Neli Mihov
12. November 28, GARS   Hayley Padua-Dean
13. December 5, DAS     Cecilia Rodriguez
14. December 5, FAR     Lindsey Rein
15. December 5, NEPSY   Nichia Huff
16. December 5, TBD     Allison Marion
17. December 5, TBD     Randy Xiong
18. December 5, TBD     Celene Rodriguez

Title 5. Education  
Division 1. California Department of Education  
Chapter 3. Individuals with Exceptional Needs  
Subchapter 1. Special Education  
Article 3.1. Individuals with Exceptional Needs

5 CCR § 3030

§ 3030. Eligibility Criteria.

(a) A child shall qualify as an individual with exceptional needs, pursuant to Education Code section 56026, if the results of the assessment as required by Education Code section 56320 demonstrate that the degree of the child's impairment as described in subdivisions (b)(1) through (b)(13) requires special education in one or more of the program options authorized by Education Code section 56361. The decision as to whether or not the assessment results demonstrate that the degree of the child's impairment requires special education shall be made by the IEP team, including personnel in accordance with Education Code section 56341(b). The IEP team shall take into account all the relevant material which is available on the child. No single score or product of scores shall be used as the sole criterion for the decision of the IEP team as to the child's eligibility for special education.

(b) The disability terms used in defining an individual with exceptional needs are as follows:

(1) Autism means a developmental disability significantly affecting verbal and nonverbal communication and social interaction, generally evident before age three, and adversely affecting a child's educational performance. Other characteristics often associated with autism are engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences.  
(A) Autism does not apply if a child's educational performance is adversely affected primarily because the child has an emotional disturbance, as defined in subdivision (b)(4) of this section.  
(B) A child who manifests the characteristics of autism after age three could be identified as having autism if the criteria in subdivision (b)(1) of this section are satisfied.

(2) Deaf-blindness means concomitant hearing and visual impairments, the combination of which causes such severe communication and other developmental and educational needs that they cannot be accommodated in special education programs solely for children with deafness or children with blindness.

(3) Deafness means a hearing impairment that is so severe that the child is impaired in processing linguistic information through hearing, with or without amplification that adversely affects a child's educational performance.

(4) Emotional disturbance means a condition exhibiting one or more of the following characteristics over a long period of time and to a marked degree that adversely affects a child's educational performance:
(A) An inability to learn that cannot be explained by intellectual, sensory, or health factors.
(B) An inability to build or maintain satisfactory interpersonal relationships with peers and teachers.
(C) Inappropriate types of behavior or feelings under normal circumstances.
(D) A general pervasive mood of unhappiness or depression.
(E) A tendency to develop physical symptoms or fears associated with personal or school problems.
(F) Emotional disturbance includes schizophrenia. The term does not apply to children who are socially maladjusted, unless it is determined that they have an emotional disturbance under subdivision (b)(4) of this section.

(5) Hearing impairment means an impairment in hearing, whether permanent or fluctuating, that adversely affects a child's educational performance but that is not included under the definition of deafness in this section.

(6) Intellectual disability means significantly subaverage general intellectual functioning, existing concurrently with deficits in adaptive behavior and manifested during the developmental period that adversely affects a child's educational performance.

(7) Multiple disabilities means concomitant impairments, such as intellectual disability-blindness or intellectual disability-orthopedic impairment, the combination of which causes such severe educational needs that they cannot be accommodated in special education programs solely for one of the impairments. “Multiple disabilities” does not include deaf-blindness.

(8) Orthopedic impairment means a severe orthopedic impairment that adversely affects a child's educational performance. The term includes impairments caused by a congenital anomaly, impairments caused by disease (e.g., poliomyelitis, bone tuberculosis), and impairments from other causes (e.g., cerebral palsy, amputations, and fractures or burns that cause contractures).

(9) Other health impairment means having limited strength, vitality, or alertness, including a heightened alertness to environmental stimuli, that results in limited alertness with respect to the educational environment that:
(A) Is due to chronic or acute health problems such as asthma, attention deficit disorder or attention deficit hyperactivity disorder, diabetes, epilepsy, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, and Tourette syndrome; and
(B) Adversely affects a child's educational performance.

(10) Specific learning disability means a disorder in one or more of the basic psychological processes involved in understanding or in using language, spoken or written, that may have manifested itself in the imperfect ability to listen, think, speak, read, write, spell, or do mathematical calculations, including conditions such as perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia. The basic psychological processes include attention, visual processing, auditory processing, sensory-motor skills, cognitive abilities including association, conceptualization and expression.
(A) Specific learning disabilities do not include learning problems that are primarily the result of visual, hearing, or motor disabilities, of intellectual disability, of emotional disturbance, or of environmental, cultural, or economic disadvantage.

(B) In determining whether a pupil has a specific learning disability, the public agency may consider whether a pupil has a severe discrepancy between intellectual ability and achievement in oral expression, listening comprehension, written expression, basic reading skill, reading comprehension, mathematical calculation, or mathematical reasoning. The decision as to whether or not a severe discrepancy exists shall take into account all relevant material which is available on the pupil. No single score or product of scores, test or procedure shall be used as the sole criterion for the decisions of the IEP team as to the pupil's eligibility for special education. In determining the existence of a severe discrepancy, the IEP team shall use the following procedures:

1. When standardized tests are considered to be valid for a specific pupil, a severe discrepancy is demonstrated by: first, converting into common standard scores, using a mean of 100 and standard deviation of 15, the achievement test score and the intellectual ability test score to be compared; second, computing the difference between these common standard scores; and third, comparing this computed difference to the standard criterion which is the product of 1.5 multiplied by the standard deviation of the distribution of computed differences of students taking these achievement and ability tests. A computed difference which equals or exceeds this standard criterion, adjusted by one standard error of measurement, the adjustment not to exceed 4 common standard score points, indicates a severe discrepancy when such discrepancy is corroborated by other assessment data which may include other tests, scales, instruments, observations and work samples, as appropriate.

2. When standardized tests are considered to be invalid for a specific pupil, the discrepancy shall be measured by alternative means as specified on the assessment plan.

3. If the standardized tests do not reveal a severe discrepancy as defined in subdivisions 1. or 2. above, the IEP team may find that a severe discrepancy does exist, provided that the team documents in a written report that the severe discrepancy between ability and achievement exists as a result of a disorder in one or more of the basic psychological processes. The report shall include a statement of the area, the degree, and the basis and method used in determining the discrepancy. The report shall contain information considered by the team which shall include, but not be limited to:

   (i) Data obtained from standardized assessment instruments;
   (ii) Information provided by the parent;
   (iii) Information provided by the pupil's present teacher;
   (iv) Evidence of the pupil's performance in the regular and/or special education classroom obtained from observations, work samples, and group test scores;
   (v) Consideration of the pupil's age, particularly for young children; and
   (vi) Any additional relevant information.

4. A severe discrepancy shall not be primarily the result of limited school experience or poor school attendance.

(C) Whether or not a pupil exhibits a severe discrepancy as described in subdivision (b)(10)(B) above, a pupil may be determined to have a specific learning disability if:

1. The pupil does not achieve adequately for the pupil's age or to meet State-approved grade-level standards in one or more of the following areas, when provided with learning experiences and instruction appropriate for the pupil's age or State-approved grade-level standards:
(i) Oral expression.
(ii) Listening comprehension.
(iii) Written expression.
(iv) Basic reading skill.
(v) Reading fluency skills.
(vi) Reading comprehension.
(vii) Mathematics calculation.
(viii) Mathematics problem solving, and

2. (i) The pupil does not make sufficient progress to meet age or State-approved grade-level standards in one or more of the areas identified in subdivision (b)(10)(C)(1) of this section when using a process based on the pupil's response to scientific, research-based intervention; or
(ii) The pupil exhibits a pattern of strengths and weaknesses in performance, achievement, or both, relative to age, State-approved grade-level standards, or intellectual development, that is determined by the group to be relevant to the identification of a specific learning disability, using appropriate assessments, consistent with 34 C.F.R. sections 300.304 and 300.305; and

3. The findings under subdivisions (b)(10)(C)(1) and (2) of this section are not primarily the result of:
(i) A visual, hearing, or motor disability;
(ii) Intellectual disability;
(iii) Emotional disturbance;
(iv) Cultural factors;
(v) Environmental or economic disadvantage; or
(vi) Limited English proficiency.

4. To ensure that underachievement in a pupil suspected of having a specific learning disability is not due to lack of appropriate instruction in reading or math, the group making the decision must consider:
(i) Data that demonstrate that prior to, or as a part of, the referral process, the pupil was provided appropriate instruction in regular education settings, delivered by qualified personnel; and
(ii) Data-based documentation of repeated assessments of achievement at reasonable intervals, reflecting formal assessment of student progress during instruction, which was provided to the pupil's parents.

5. In determining whether a pupil has a specific learning disability, the public agency must ensure that the pupil is observed in the pupil's learning environment in accordance with 34 C.F.R. section 300.310. In the case of a child of less than school age or out of school, a qualified professional must observe the child in an environment appropriate for a child of that age. The eligibility determination must be documented in accordance with 34 C.F.R. section 300.311.

(11) A pupil has a language or speech disorder as defined in Education Code section 56333, and it is determined that the pupil's disorder meets one or more of the following criteria:

(A) Articulation disorder.
1. The pupil displays reduced intelligibility or an inability to use the speech mechanism which significantly interferes with communication and attracts adverse attention. Significant interference in communication occurs when the pupil's production of single or multiple speech sounds on a developmental scale of articulation competency is below that expected for his or her chronological age or developmental level, and which adversely affects educational performance.
2. A pupil does not meet the criteria for an articulation disorder if the sole assessed disability is an abnormal swallowing pattern.
(B) Abnormal Voice. A pupil has an abnormal voice which is characterized by persistent, defective voice quality, pitch, or loudness.
(C) Fluency Disorders. A pupil has a fluency disorder when the flow of verbal expression including rate and rhythm adversely affects communication between the pupil and listener.
(D) Language Disorder. The pupil has an expressive or receptive language disorder when he or she meets one of the following criteria:
1. The pupil scores at least 1.5 standard deviations below the mean, or below the 7th percentile, for his or her chronological age or developmental level on two or more standardized tests in one or more of the following areas of language development: morphology, syntax, semantics, or pragmatics. When standardized tests are considered to be invalid for the specific pupil, the expected language performance level shall be determined by alternative means as specified on the assessment plan, or
2. The pupil scores at least 1.5 standard deviations below the mean or the score is below the 7th percentile for his or her chronological age or developmental level on one or more standardized tests in one of the areas listed in subdivision (A) and displays inappropriate or inadequate usage of expressive or receptive language as measured by a representative spontaneous or elicited language sample of a minimum of 50 utterances. The language sample must be recorded or transcribed and analyzed, and the results included in the assessment report. If the pupil is unable to produce this sample, the language, speech, and hearing specialist shall document why a fifty utterance sample was not obtainable and the contexts in which attempts were made to elicit the sample. When standardized tests are considered to be invalid for the specific pupil, the expected language performance level shall be determined by alternative means as specified in the assessment plan.

(12) Traumatic brain injury means an acquired injury to the brain caused by an external physical force, resulting in total or partial functional disability or psychosocial impairment, or both, that adversely affects a child's educational performance. Traumatic brain injury applies to open or closed head injuries resulting in impairments in one or more areas, such as cognition; language; memory; attention; reasoning; abstract thinking; judgment; problem-solving; sensory, perceptual, and motor abilities; psychosocial behavior; physical functions; information processing; and speech.
(A) Traumatic brain injury does not apply to brain injuries that are congenital or degenerative, or to brain injuries induced by birth trauma.

(13) Visual impairment including blindness means an impairment in vision that, even with correction, adversely affects a child's educational performance. The term includes both partial sight and blindness.

Note: Authority cited: Section 56100, Education Code. Reference: Sections 56026, 56320, 56333 and 56337, Education Code; 20 U.S.C. Sections 1401(3)(A) and 1414(a) and (b); and 34 C.F.R. Sections 300.8, 300.300, 300.301, 300.304, 300.305, 300.306, 300.307, 300.308, 300.309 and 300.311.

5 CCR § 3031
§ 3031. Additional Eligibility Criteria for Individuals with Exceptional Needs - Age Birth to Younger Than Three Years.
(a) A child, age birth to younger than three years, shall qualify as an individual with exceptional needs pursuant to Education Code section 56026(c)(1) and Government Code section 95014 if the Individualized Family Service Plan (IFSP) team determines that the child meets the following criteria:

1. Is identified as an individual with exceptional needs pursuant to section 3030, and
2. Is identified as requiring intensive special education and services by meeting one of the following criteria:

   (A) The child has a developmental delay as determined by a significant difference between the expected level of development for their age and their current level of functioning in one or more of the following five developmental areas:
   
   1. cognitive development;
   2. physical and motor development, including vision and hearing;
   3. communication development;
   4. social or emotional development; or
   5. adaptive development.

   A significant difference is defined as a 33 percent delay in one developmental area before 24 months of age, or, at 24 months of age or older, either a delay of 50 percent in one developmental area or a 33 percent delay in two or more developmental areas.

   (B) The child has a disabling medical condition or congenital syndrome which the IFSP team determines has a high predictability of requiring intensive special education and services.

(b) Programs for individuals with exceptional needs younger than three years of age are permissive in accordance with Education Code sections 56001(c) and (d) except for those programs mandated pursuant to Education Code section 56425.
Sample Psychoeducational Report Eligibility Statements

Template conventions:

a) Text in **bold** specifies text to be adapted to personalize the statement for a given report.

b) Text in *italics* provides direction to the report author and should not be used within the report.

1. Autism

   From this assessment it would appear that **Name** meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(1)]. **Name** is suggested to meet “autism” eligibility criteria as he/she exhibits significant verbal and nonverbal communication, and social interaction deficits. These challenges were evident early in **Name**’s development and are judged to significantly adversely affect his/her educational performance. These difficulties do not appear to be primarily due to an emotional disturbance [as defined in CCR, Title 5 §3030(b)(4)]. Other characteristics associated with “autism” and displayed by **Name** include: engagement in repetitive activities and stereotyped movements, resistance to environmental change or change in daily routines, and unusual responses to sensory experiences. [NOTE: these associated characteristics are listed in §3030(b)(1), but are not specified as being required for eligibility as a student with autism.]

2. Deaf/Blindness

   From this assessment it would appear that **Name** meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(2)]. **Name** is suggested to meet “deaf/blind” eligibility criteria as he/she has concomitant hearing and visual impairments, the combination of which causes severe communication, developmental, and educational problems. It is suggested that **Name**’s vision and hearing challenges cannot be accommodated in special education programs solely for students with deafness or students with blindness.

3. Deaf

   From this assessment it would appear that **Name** meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(3)]. **Name** is suggested to meet “deaf” eligibility criteria he/she has a hearing impairment that is so severe that he/she is impaired in processing linguistic information through hearing, with or without amplification. This impairment is suggested to adversely affect **Name**’s educational performance.

4. Emotionally Disturbed

   **Name** appears to meet appears to meet eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(4)]. **Name** is suggested to meet “emotionally disturbed” eligibility criteria as from this assessment it has been suggested that he/she has an emotional condition, [NOTE: as indicated specified the emotional condition here,] that results in the following characteristic(s): [NOTE: only one of the following is required, but if a student displays more than one list all that apply]

   (A) An inability to learn which cannot be explained by intellectual, sensory, or health factors.

   (B) An inability to build or maintain satisfactory interpersonal relationships with peers and teachers.

   (C) Inappropriate types of behavior or feelings under normal circumstances.

   (D) A general pervasive mood of unhappiness or depression.

   (E) A tendency to develop physical symptoms or fears associated with personal or school problems.

   **This/These** challenges appear to have existed for a long period of time, to a marked degree, and are suggested to adversely affect **Name**’s educational performance. **This/These** challenges do not appear to be solely due to social maladjustment.

5. Hearing impairment
From this assessment it would appear that Name meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(5)]. Name is suggested to meet “hearing impairment” eligibility criteria as he/she has a permanent/fluctuating hearing impairment, that adversely affects Name’s educational performance and is not included under the definition of deafness [as defined in CCR, Title 5, §3030(b)(3)].

6. Intellectual Disability
Name appears to meet eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(6)]. Name is suggested to meet “intellectual disability” eligibility criteria as he/she appears to have significantly subaverage general intellectual functioning, existing concurrently with deficits in adaptive behavior. These challenges were manifested during the developmental period (which is generally thought to be birth to age 18 years) and are suggested to adversely affect his/her educational performance.

7. Multiple Disabilities
Name appears to meet eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(7)]. Name is suggested to meet “multiple disabilities” eligibility criteria as he/she has the following concomitant impairments [NOTE: must specify at least two of the following, with intellectual disability-blindness and intellectual disability-orthopedic impairment being two examples specifically mentioned in §3030(b)(7)]: autism, intellectual disability, blindness, deafness, orthopedic impairment, traumatic brain injury. The combination of these disabilities is suggested to cause severe educational needs that cannot be accommodated in a special education program solely for one of the impairments. Name does not appear to meet criteria for deaf-blindness (as defined in CCR, Title 5).

8. Orthopedic Impairment
From this assessment it would appear that Name meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(8)]. He/She has a severe orthopedic impairment, [NOTE: specify the impairment here. These impairments may be disabilities caused by a congenital anomaly, disease (e.g., poliomyelitis, bone tuberculosis), and impairments from other causes (e.g., cerebral palsy, amputations, and factors or burns that cause contractures], that adversely affects Name’s educational performance.

9. Other Health Impairment
From this assessment it would appear that Name meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(9)]. Name appears to meet “other health impairment” eligibility criteria as he/she is suggested to have limited strength/vitality/alertness, heightened alertness to environmental stimuli with respect to the educational environment, due to a chronic/acute health problem; [NOTE: specify the impairment here Specific health problems offered in (b)(9) are “asthma, attention deficit disorder or attention deficit hyperactivity disorder, diabetes, epilepsy, a heart condition, hemophilia, lead poisoning, leukemia, nephritis, rheumatic fever, sickle cell anemia, and Tourette syndrome.”]. This health impairment is suggested to adversely affects Name’s educational performance.

10. Specific Learning Disability
Name appears to meet eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(10)]. Name is suggested to meet “specific learning disability” criteria as he/she appears to have a disorder in the following basic psychological process(es) involved in understanding or in using spoken/written language: [List the basic psychological processing disorder(s) here. NOTE: Examples of basic
psychological processes mentioned in (b)(10) are: “attention, visual processing, auditory processing, sensory-motor skills, cognitive abilities including association, conceptualization and expression.” Specific “conditions” that can result in these processing disorders, offered as examples of a “specific learning disability”, and mentioned in (b)(10) are “perceptual disabilities, brain injury, minimal brain dysfunction, dyslexia, and developmental aphasia.”. For Name, this specific learning disability appears to result in an imperfect ability to listen, think, speak, read, write, spell, do mathematical calculations. Name’s learning problems are not primarily the result of visual, hearing, or motor difficulties; of intellectual disability; of emotional disturbance; or of environmental, cultural, or economic disadvantage. Nor can they be primarily attributed to limited school experience or poor school attendance. Further data is available that demonstrates he/she was provided appropriate general education instruction by qualified professionals and that prior to this referral there was data-based documentation of repeated assessments of achievement at reasonable intervals, which reflects formal assessment of Name’s progress during instruction (data that was provided to his/her parents).

Evidence that the basic psychological processing deficit has adversely affected Name’s educational performance includes that he/she does not achieve adequately for his/her age to meet State-approved grade level standard in the following area(s) even after having been provided with appropriate learning experiences and instruction: [Specify the area(s) here from the list of the following] oral expression, listening comprehension, written expression, basic reading skill, reading fluency skill, reading comprehension, mathematics calculation, mathematics problem solving. Further, Name is suggested to have not made sufficient progress to meet age or State-approved grade-level standards in these areas despite the use of scientific, research-based interventions.

Evidence that the basic psychological processing deficit has adversely affected Name’s educational performance includes that he/she does not achieve adequately for his/her age to meet state-approved grade level standard in the following area(s) even after having been provided with appropriate learning experiences and instruction: [Specify the area(s) here from the list of the following] oral expression, listening comprehension, written expression, basic reading skill, reading fluency skill, reading comprehension, mathematics calculation, mathematics problem solving. Further, Name appears to exhibit a pattern of strengths and weaknesses in performance/achievement/performance and achievement relative to his/her age/State-approved grade-level standards/intellectual development.

Evidence that the basic psychological processing deficit has adversely affected Name’s educational performance includes that he/she does not achieve adequately for his/her age to meet state-approved grade level standard in the following area(s) even after having been provided with appropriate learning experiences and instruction: [Specify the area(s) here from the list of the following] oral expression/listening comprehension/written expression/basic reading skill/reading comprehension/mathematical calculation/mathematical reasoning. Further, there is a logical connection between this/these low achievement test score(s) and the basic psychological processing disorder identified above. This discrepancy does not appear to be primarily the result of limited school experiences or poor school attendance. The ability/achievement discrepancy would not appear to be due to poor school attendance. It should also be noted that in the opinion of the Examiner, this learning problem could not be corrected within the general education program.

11. Language or Speech Disorder
From assessment conducted by the speech and language specialist it has been suggested that Name meets eligibility criteria as an individual with exceptional needs (according to the California Code of Regulations - Title 5; Division 1; Chapter 3,
Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(11)]. Name appears to meet “language or speech disorder” eligibility criteria as he/she has been suggested to have [From consultation with the speech and language specialist specify the disorder here from the list of the following] an articulation disorder, abnormal voice, a fluency disorder, a language disorder.

12. Traumatic Brain Injury
From assessment conducted by the speech and language specialist it has been suggested that Name meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(12)]. Name appears to meet “traumatic brain injury” eligibility criteria as he/she has an acquired injury to the brain that is the result of an external physical force. As the result of this injury Name has total/partial functional disability/psychosocial impairment that is suggested to adversely affects his/her educational performance. From the assessment data it appears that Name’s close/open head injury has resulted in impairment(s) in the following area(s): [Specify the area(s) here. The following list provides examples] cognition; language; memory; attention; reasoning; abstract thinking; judgement; problem-solving; sensory, perceptual, and motor abilities; psychosocial behavior; physical functions; information processing; speech. This is not a congenital or degenerative injury and was not induced by birth trauma.

13. Vision Impairment
From this assessment it would appear that Name meets eligibility criteria as an individual with exceptional needs [according to the California Code of Regulations - Title 5; Division 1; Chapter 3, Individuals with Exceptional Needs; Subchapter 1, Special Education; Article 3.1, Individuals with Exceptional Needs; §3030(b)(13)]. Name is suggested to meet “vision impairment” eligibility criteria as he/she has a visual impairment (partial sight/blindness) that, even with correction, can be argued to adversely affects his/her educational performance.
