**Subject:** Meeting Overview from Tuesday, November 6th- SIGN UPS!

Hey Chem Club!

Sorry that this is going out so late, but here is a brief overview of yesterday's meeting!

---

**Story Winery**- THIS SATURDAY! **Carpool will meet at 11:30am** in Sequoia. (Or if you plan to meet us there, we will be at the winery at 1). We need people who are willing to be **designated drivers** for those of us who are wine tasting. If you would like to sign up to go, please **email me ASAP** (especially if you are willing to

be a driver)! It is important that we give them an accurate headcount of the people attending. For more information on the Winery and the ex-pharmacists who run it, please visit: <http://www.zin.com/>

**Dr. Metcalf's Project**- Also THIS SATURDAY! Dr. Metcalf would like assistance **making WAPIs** (temperature-measuring devices for water pasteurization). This event is on campus, on the **2<sup>nd</sup> floor of Humboldt Hall**. The time slots available are from **9am-12pm**, and **1pm-3pm**. You are welcome to help make WAPIs before meeting for carpool for the winery! Please send me an email if you are interested. You will be **saving lives!!!**

**Turkey Bowl**- Next **Thursday, November 15<sup>th</sup>. 7-11pm** at Country Club Lanes- bring at least **2 cans of canned food!** Carpool to the alley will meet Sequoia 1<sup>st</sup> floor at **6:30pm**. This event is a mixer for all the math and science clubs, so be sure to attend and meet some new people (: Since this event also serves as a canned food drive, please be sure to bring some along. Also, so that we can reserve the correct number of lanes, if you have not yet signed up to attend and plan on attending, please email me!

**Shriner's Hospital Science Day**- Next **Saturday, November 17<sup>th</sup>. 2:30-4:30pm**. Carpool will meet first floor Sequoia at 1:30pm. This year, the experiments we will be doing are as follows:

- Ferrofluid
- Slime
- Tie Dye (with rubbing alcohol)
- Milk Tie Dye

Space is limited for this event, but don't let that hold you back from **signing up** to attend! We will hold a lottery for the slots to attend, and let you know asap if you are selected to attend. The children really love the experiments we do, and love to have a break from their monotonous days in the hospital. Please consider attending (: Physics Club will also be sending several of their members to do cool physics experiments, so who knows, you might learn something!

**AMPAC Tour**- Friday, **November 30<sup>th</sup>. Carpool will meet at 1pm in Sequoia**. AMPAC is an industrial company which primarily works to create **precursors to pharmaceuticals**. Their facility is designed to produce chemicals on a **large scale**, and as such, it is really impressive to see their mixing tanks, reaction vessels and other equipment that make their reactions possible. If you are interested in attending, please let us know! **We must have your name and nationality for you to attend** (since AMPAC cohabits with Aerojet).

---

Thanks everyone! As always, if you have any questions, please feel free to ask!
